Q. I will ask you now, Mr. White, whether or not you were satisfied, as president of United Public Utilities Corporation, which in turn owned all the stock of Northern Power & Light Company, as to those provisions and the rate therein provided for?

Mr. Benson: Which ones are those?

Mr. Stafford: That's five mills.

A. Yes, I was satisfied.

Q. Were you satisfied that that rate was fair, just and proper insofar as Northern Power & Light Company was concerned? A. Yes, I was.

Q. Now, Mr. White, calling your attention also to Article VI, in the same contract, the provision in the first paragraph which provides:

"As Northern Company's share of the fixed charges, maintenance and operating expenses relating to the interconnection facilities enumerated above, Northern Company agrees to pay Northwestern Company, beginning January 1, 1936, the sum of $1,666.66 a month. This charge is over and above all energy charges provided under Article V above."

It is also provided therein that:

"Upon the termination of this contract by either party, Northern Company will pay Northwestern Company, in addition to all other charges hereinbefore enumerated, a sum equivalent to one half the actual cost to Northwestern Company to remove and dismantle the interconnection facilities enumerated above and to return all material to the store-room of Northwestern Company in Aberdeen, South Dakota."

Also in the same Article the third paragraph provides that Northern Company has no obligation to pay Northwestern Company for any part of the construction cost of those facilities or for the use thereof for any period prior to January 1, 1936. Were you familiar with those provisions in the contract, on or about October 7, 1936?

A. Yes.

Q. Did you at that time, as president of United Public Utilities Corporation, the owner of all the stock of North-

ern Power & Light Company, consider the charge provided in Article VI of $1,666.66 a month as a fair and reasonable and proper charge insofar as Northern Power & Light was concerned? A. Yes.

Q. Were you also satisfied with the other provision of Article VI, the one relating to upon termination the obligation of Northern to pay one-half of the dismantling and removal charges, and the other provision, which exonerated Northern from paying for the use of the facilities for any period prior to January 1, 1936? A. Yes.

Q. I have asked you whether you were so satisfied in your capacity as president of United Public Utilities Corporation. I will ask you the same question, whether you were so satisfied as to the rate of $1,666.66 a month, the dismantling and removal charge provision to pay Northwestern and also with the five mill energy interchange rate. Were you satisfied that they were proper, fair and reasonable charges in your capacity as director of United Public Utilities Corporation? A. Yes.

Q. And you were also at the time a director of Northern Power & Light Company? A. Yes.

Q. Were you satisfied as to each of the aforementioned charges, in your capacity as director of Northern Power & Light Company? A. Yes.

Q. Now, I refer you to Exhibit D to the same complaint in this action, which is a contract made and entered into July 1, 1939, between Northwestern Public Service Company and Dakota Public Service Company, and directing your attention to Article XII, which provides that 1939 contract cancels and supersedes the interconnection contract dated October 7, 1936, Exhibit B of the complaint, I will ask you now, Mr. White, if during the entire period from October 7, 1936, to and including July 1, 1939, during all the time that the 1936 contract was in force, you were satisfied that the rates and the charges therein provided for to be paid by Northern Power & Light Company were fair, reasonable and proper from the standpoint of Northern Power & Light Company? A. Yes.

Q. Were you so satisfied in your capacity as president and a director of United Public Utilities Corporation?

A. Yes.

Q. And were you so satisfied as a director of Northern Power & Light Company during that period? A. Yes.

Q. And were you a director of Northern Power & Light Company during that period? A. Yes.

Q. And president and a director of United Public Utilities Corporation? A. Yes.

Q. Mr. White, did you instruct the management or officers of Northern Power & Light Company to execute this contract on behalf of Northern Power & Light Company? A. Yes.

Q. You previously testified, have you not, that you had approved the contract? A. Yes.

Q. Did you so instruct the officers to execute that contract, and approve the contract itself in the exercise of an informed and independent judgment? A. Yes.

By Mr. Robinson:

Q. Mr. White, in your capacity as president of the United Public Utilities Corporation, did you have occasion during the year 1937 and particularly during the month of June of that year, to give consideration to the problem of the capacity of Northern Power & Light Company and the North Dakota Power & Light Company, the generating capacity of those companies? A. Yes.

Q. Did you have occasion to bring to the attention of the board of directors of United Public Utilities Corporation the problems of the generating capacity confronting those subsidiaries? A. Yes.

Q. Mr White, I show you what purports to be the original minutes of a meeting of the board of directors of United Public Utilities Corporation, held at room 1335 Land Title Building, Philadelphia, Pennsylvania, on June 24, 1937, at 10 o'clock a. m. Eastern Daylight Saving Time, and ask you whether or not this represents the original minutes of the meeting of that corporation, held on that day? A. It does. It is the original minutes.

Q. I will now read the first paragraph from Page 3, of a regular meeting of the board of directors of United Public Utilities Corporation, which Mr. White has just testified were the original minutes of the meeting held June 24, 1937.

"A recent survey of the available generating capacity of the Dakota properties indicates an insufficient margin of the effective capacity over probable demand.

"A lengthy discussion followed of the ability of those subsidiaries adequately to serve their customers should the demand for current in the state exceed the estimated demand or breakdowns occur in the chief generating units of either subsidiaries of the corporation or of Northwestern Public Service Company from which subsidiaries of the corporation have in the past been able to obtain substantial amounts of power during peak loads under a 'dump power' contract."

The above quoted portion of the minutes was received in evidence.

(Read from deposition.)

Q. Mr. White, did United Public Utilities Corporation own any properties in the state of North or South Dakota at this time other than Northern Power & Light, North Dakota Power & Light and Knife River Coal Mining Company? A. No.

Q. Mr. White, the minutes of the meeting of June 24, 1937, which you have just identified, indicate that a lengthy discussion of the ability of these subsidiaries to serve their customers, under certain circumstances might result, and that such fact was brought forth in view of a recent survey. I want to ask you whether or not, in the conducting of the meetings of the board of directors of United Public Utilities Corporation you were in the habit of preparing an agenda which would cover the items to be discussed in such meetings? A. Yes.

Q. Mr. White, as president of United Public Utilities Corporation, did you maintain the practice of preparing an agenda for the matters to be discussed by the board of directors of that corporation at the meeting held by that corporation? A. Yes.

Q. Was that a regular practice? A. Yes.

Q. Did you prepare such agenda for the meeting of the board of directors of United Public Utilities Corporation held June 24, 1937, at 10 o'clock A. M., Eastern Daylight Saving Time, at room 1335 Land Title Building, Philadelphia, Pennsylvania? A. Yes.

Defendant's Exhibit 242, which is also referred to as Defendant's Exhibit 22 in White's deposition, was received in evidence. It is as follows:

Defendant's Exhibit 242.

Agenda:

Directors Meeting At Philadelphia, Pa.

June 24, 1937.

Directors:

Present: Messrs. Barroll, Nichols,
Erhard, Welsh,
Kynett, White.

Present by Invitation.

Mr. F. H. Scheetz,
General Counsel.

Absent: Mr. N. P. Zech

* * * * * * *

5. Recent survey of available generating capacity on Dakota properties shows serious shortage. Fall peak load in 1936 was 9715 k. w. and effective capacity was only 9990 k. w., giving effecting reserve of only 275 k. w. The maximum rated capacity of all plants including small high-cost standbys, is 11,460 k. w., so that even if it were practicable to use everyone of these plants on the peak load, the reserve was only 1745 k. w., or about 18%.

If the 3500 k. w. unit at Beulah should go out on the peak, the effective capacity would be reduced to 6490 k. w., leaving a shortage of 3275 k. w. of effective capacity and reducing the minimum available rated capacity to 7960 k. w. or 1755 k. w. less than the peak load. Under normal operations, Northwestern Public Service Co. is sending 2200 k. w. north on the winter peak loads for about 4 hours and is sending 500 k. w. north on the spring peak loads.

* * * * * * *

Q. Mr. White, I show you Defendant's Exhibit 22 for identification, consisting of four pages, and purporting to be an agenda for the directors' meeting at Philadelphia, Pennsylvania, June 24, 1937, and ask you whether or not that document was furnished to us at our request, from your files? A. It was.

(Read from deposition.)

Q. Mr. White, I again show you Item 5 of Defendant's Exhibit 22 for identification, just Item 5.

A. Yes, all right.

Q. And ask you whether the matters set forth therein were discussed by the board of directors on that date, at its directors' meeting on June 24, 1937? A. Yes.

Q. Mr. White, did the directors and general counsel of United Public Utilities Corporation ever take a trip over the properties of the three subsidiaries of that corporation, located in North and South Dakota, that is, Northern Power & Light Company, North Dakota Power & Light Company and Knife River Coal Mining Company? A. Yes.

Q. Do you recall on or about what date such trip and such inspection was made?

A. October 2nd to 9th, 1937.

Q. Do you recall the points, that is, the parts of the properties located in North and South Dakota that you and the other members of the board and your general counsel visited on that occasion? A. Yes.

Q. Mr. White, would you tell us just what properties and what inspections were made by the board of directors and their general counsel on the occasion of that trip; just what properties were visited and what inspections were made?

A. I have in my files a detailed itinerary of that trip, which I will need to refresh my recollection.

Q. Mr. White, I show you Defendant's Exhibit 23 for identification, consisting of a cover and three pages containing typewritten material on both sides, and purporting to be an itinerary of a trip over the Dakota properties of United Public Utilities Corporation, and ask you whether you have ever seen that before? A. I have.

Defendant's Exhibit 243, which is also referred to as Defendant's Exhibit 23 in White's deposition, was re-

ceived in evidence. It shows that on the trip referred to in the preceding testimony the directors and general counsel of United Public Utilities Corporation visited and inspected the generating plant of defendant and the interconnection substation and facilities and the system dispatcher's office at Aberdeen, South Dakota, after 3:50 P. M. on October 3rd; drove over the properties out to Mobridge, South Dakota, to the division office of the Northern Power and Light Company; visited the Mobridge plant on October 4th and took a trip over a part of Northern Power and Light Company's transmission system via Bowdle, Eureka, Wishek and Steele, arriving at Bismarck, North Dakota, at approximately 3:30 P. M. October 4th, and there visited the generating plant of North Dakota Power & Light Company and visited the State Capitol Building and drove around Bismarck and Mandan, North Dakota, prior to 7:30 P. M. on the same day; on October 5th proceeded to Beulah, North Dakota, and there visited the main generating plant of North Dakota Power & Light Company and also visited and inspected both the underground and outside operations of Knife River Coal Mining Company prior to 3:00 P. M. on October 5th and left for Dickinson, North Dakota, at approximately 3:00 o'clock on said day, and on October 6th visited the power plant at Dickinson, North Dakota, another division office of North Dakota Power & Light Company, leaving Dickinson at 9:30 A. M. on October 6th for the Black Hills of South Dakota and then drove to Huron, South Dakota, arriving at midnight October 7th; and concluded their inspection trip by a visit to the general offices of defendant, North Dakota Power & Light Company, Northern Power and Light Company and Knife River Coal Mining Company at Huron, (where they had lunch at 11:30 A. M.) and by a visit to defendant's branch office at Webster, leaving there approximately at 4:50 P. M. October 8th.

Q. Was defendant's Exhibit 23 for identification prepared at your direction? A. No. It—

Mr. Benson: Q. Is that the trip you took? That is an itinerary of your trip? A. That's the itinerary.

(Read from Deposition.)

Q. Mr. White, Defendant's Exhibit 23 for identification refers to a visit to the general offices of Northwestern Public Service Company, North Dakota Power & Light Company, Northern Power & Light Company and Knife River Coal Mining Company, at Huron, South Dakota. Will you state, please, what if anything occurred on the occasion of your visit to that office?

A. The visit consisted in the main of individual conversations between directors and the several members of the general management staff in that office.

Q. Conversations concerning what subject, Mr. White?

Mr. Benson; Q. Were you present at all of them? A. No.

Mr. Robinson: Q. Conversations at which you were present, please? A. I cannot detail such conversations.

Defendant's Exhibit 244, which is also referred to as Defendant's Exhibit 24 in White's deposition, was identified and produced by White. It was offered in evidence, whereupon the following occurred:

"Mr. Fellows: If that offer is limited for the purpose of showing the information contained in the exhibits, we have no objection. If it purports to be proof of any facts contained in it, we object to its general admission on the ground it is incompetent; no foundation laid; there are purported facts in there and no showing by whom it was prepared.

Mr. Stafford: It is agreeable to us to limit the offer for the purpose that this was the document which came out of Mr. White's files and which had come to his attention.

The Court: So limited it will be received."

Exhibit 244 reads in part as follows:

Survey of Power Requirements.

Northwestern Public Service Company.

Northern Power and Light Company.

North Dakota Power and Light Company.

The systems of North Dakota Power & Light Company, Northern Power and Light Company and the South Dakota system of Northwestern Public Service Company have been operated as a single interconnected system since 1931. The three companies have been under the same management since 1929 and late in 1930 Northwestern Public Service Company made an investment of approximately $330,000 for interconnection facilities with Northern Power and Light Company.

The U. P. U. group has very little generating capacity on the south end of the system and service was very poor. As a result a number of municipal agitations had developed and in order to clear up these situations it was necessary to improve service by installing additional generating capacity, or by means of interconnection facilities with Northwestern Public Service Company. At that time it was more or less understood that the U. P. U. properties would be merged with Northwestern Public Service Company and in view of this plan it was decided to interconnect the two groups. Such interconnection gave Northern Power and Light Company an additional power supply at three separate points and would also permit utilizing the low price energy at Beulah to a fuller extent. In view of the fact that Northern Power and Light Company did not have sufficient cash to make these improvements the entire expenditure was made by Northwestern Public Service Company. Since that time the requirements for the entire system have been generated in the power plants having the lowest unit costs, regardless of Company ownership.

The rates for energy transferred between companies have been on a straight energy basis to distribute the savings in operating costs between companies on an equitable basis,

but up to this time no consideration has been given to the proper apportionment of fixed charges on generating capacity between the two groups. Since January 1, 1936, Northern Power and Light Company has paid Northwestern Public Service Company $20,000 a year, representing fixed charges on one-half of the investment in interconnection facilities between the two companies. Prior to that time Northwestern Public Service Company stood all of the fixed charges on this investment.

Under the present method of operation the Beulah station is operated at a high load factor. As the load of the U. P. U. system has increased a higher percentage of the output of this station has been required for the north end of the system and while a substantial number of kilowatt-hours are transferred from Northern to Northwestern, all of this energy is transferred during off peak periods. Following is a typical one day operating cycle showing kilowatts received or delivered between Northern Power and Light Company and Northwestern Public Service Company.

Kilowatts Received or Delivered by Northern Power and Light Company During Typical Day's Operation.

	Summer—August		Winter—December	
	Received	Delivered	Received	Delivered
12 Midnite	0	900	0	1800
1 A. M.	0	1400	0	1200
2 "	0	1600	0	1300
3 "	0	1700	0	1400
4 "	0	1800	0	1100
5 "	0	1800	0	900
6 "	0	1500	0	1200
7 "	0	900	0	1900
8 "	0	700	0	1300
9 "	0	200	0	500
10 "	500	0	0	400
11 "	300	0	0	200
12 Noon	400	0	0	100
1 P. M.	400	0	0	500
2 "	200	0	0	800
3 "	0	0	0	800
4 "	100	0	0	1100
5 "	100	0	0	600
6 "	100	0	900	0
7 "	0	100	900	0
8 "	0	100	300	0
9 "	800	0	300	0
10 "	600	0	0	300
11 "	0	300	0	1100
12 Midnite	0	900	0	1800

The U. P. U. system has very little reserve generating capacity and as shown by the above tabulation it is normally necessary for Northwestern Public Service Company to feed into the south end of the system during peak hours.

Purpose of Survey.

There are certain advantages and economies under the present method of operation beneficial to all companies and if these benefits are equitably distributed between the two groups the present method of operation is justified. We are satisfied that the present rate for interchange power provides an equitable distribution of the savings in operating costs by reason of operating the systems of both companies as a single interconnected system, but no consideration has been given to the proper apportionment of fixed charges on generating capacity. One of the purposes of this report is to establish an equitable distribution of fixed charges on generating facilities to the respective groups.

It might be practical for one group to provide the investment to protect the other group for a reasonable period of time, but if this is carried too far it might result in serious complications in the future on account of the difference in ownership. Insofar as is practical a balance of investment should be maintained between the two groups. If this balance is thrown out of line temporarily by one group making an investment that will be used by both, the fixed charges should be apportioned on an equitable basis.

Limiting Factors

(A) Cooling Water
(B) Capacity of Station
(C) 1 Boiler
(D) 2 Boilers
(E) 3 Boilers
(F) 4 Boilers
(G) Boiler Capacity

Estimated System Peaks and Generating Capacity Required.

From a standpoint of practical operation we need the following generating capacity.

(A) To take care of system peak.

(B) Plus 5000 KW reserve in the event the largest unit is out of service.

(C) Plus reserve of 15% of the system peak—

The interconnected system has 18 generating stations and approximately 3000 miles of transmission line. Some of the plants are very small and in case of emergency it is very difficult to get some of these small units on the line. This requirement is based upon the maximum capacity of the system. While it is possible to generate the maximum capacity shown for each individual plant under favorable conditions, in actual operation we cannot depend upon every unit generating its maximum capacity and staying on the line. If effective capacity were used as basis a much smaller reserve would be required.

On the above basis, the following generating capacity will be required to take care of anticipated peaks for the period from 1938 to 1942, inclusive.

	Summer Operation			Winter Operation		
	Peak Load Kilowatts	Capacity Required With Reserves	Additional Capacity Needed to Take Care of Requirements	Peak Load Kilowatts	Capacity Required With Reserves	Additional Capacity Needed to Take Care of Requirements
1937....	21,150	29,900	2,330	24,425	33,700	1,245
1938....	22,500	31,500	4,000	25,900	35,500	555
1939....	24,000	33,200	5,630	27,600	37,500	2,555
1940....	25,600	35,100	7,530	29,400	39,600	4,655
1941....	27,300	37,100	9,530	31,300	41,800	6,855
1942....	29,100	39,200	11,630	33,300	44,200	9,255

The 1937 peak shown in the above tabulation was the actual peak for the year 1937 which occurred in December. Future peaks were estimated on the basis of a 6% increase

in demands with no increase in load factor. We do not feel that there is any reason for anticipating much, if any, improvement in our present load factor as the bulk of our increased output will be in the residential classification.

We have a comparatively high saturation on refrigerators and we anticipate that a substantial part of our future development will be in ranges and better lighting to customers in the higher income brackets and in lighting to the poorly developed customers. This business will not improve the load factor.

It will be noticed that insofar as the relationship between peaks and capacity is concerned, our effective peaks are actually occurring in the summer months. Last winter we had effective capacity of 1.245 kilowatts in excess of the capacity needed to carry the system peak with necessary reserve, but this summer there was a deficiency of 2.330 kilowatts on the same basis.

Proposed Plan of Providing for Additional Generating Capacity Required.

In making this forecast we must decide whether future development will be toward centralization of generating facilities in comparatively large plants, or decentralization with the thought in mind of protecting important load centers with smaller plants located at strategic locations, or a combination of both.

Consideration must also be given to the characteristics of our present system, including location, size and condition of the present generating stations as well as the transmission system.

Consideration must also be given to keeping a balance of investment between the two systems and to financial conditions of the respective companies and to the prospects of future development.

There are strong arguments in favor of developing a fairly large station at a location with an ample water sup-

ply and comparatively cheap fuel. A plant of this kind would stabilize the system and would simplify the operations.

One of the arguments against this plan is the problem of finding a location that is exactly suitable. If a large portion of the system's generating capacity is located at one point we must depend upon the transmission system to utilize the output. We are serving a sparsely settled territory with a comparatively few good towns widely scattered and a great many small towns. These good towns insist upon reliable service 24 hours a day and our past experience with our type of construction has proven that transmission line service is not entirely dependable.

A typical illustration of this was our experience in Webster a few years ago when this town and a number of other towns were out of service for a week during a sleet storm. In order to assure Webster that we would not have a reoccurrence it was necessary to install a diesel plant. We have had a number of other similar experiences and just last winter a number of our towns were without service from 2 days to over a week.

Towns of over 1000 population can provide their own plants with rates that compare favorably with ours and except as we can offer them comparable service there is a danger of losing some of these good towns.

Concentration of power in a large station near water and good fuel would necessitate a more substantial transmission system with greater capacity in order to utilize the output of the plant in load centers of the system. In our opinion the total cost of power with fixed charges included would be higher than with smaller units added to the present system for some years to come.

A large generating station means a heavy investment to be provided at one time and it would take several years to grow into this investment. Under this plan we would have a substantial excess of reserve equipment for the first few years on which we would not be able to earn a return. If our load increases as we anticipate this equip-

ment would be eventually utilized but with present unstable conditions it is impossible to forecast with any degree of accuracy what the future has in store for us. For the past five or six years we have suffered from unusual drouth conditions and there has been very little wealth produced in the territory. During this period the government has provided a substantial amount of relief in one form or another and we have been able to get along. At the present time there is a tendency on the part of the government to cut down on relief expenditures and while we feel confident that normal weather conditions will return there is no use in gambling too much on the future.

After carefully considering this matter from all angles, we recommend that the immediate needs of the system be taken care of by adding a few small units to our present system. This investment can be made piecemeal as the load increases and unless such a plan is carried too far our plans for a comparatively large plant sometime in the future to stabilize the system and to obtain low unit costs will not have to be abandoned.

On this basis we recommend the following additions:

	Investment	Summer Operation		Winter Operation	
		Capacity Required	Maximum Capacity Provided	Capacity Required	Maximum Capacity Provided
End of 1937		29,900	27,570	33,700	34,945
1938					
Cooling Tower at Aberdeen	14,000		1,000		
New Steam Ends for Aberdeen Turbine	60,000		1,250		1,250
2 New Boilers & Accessories in Bismarck Plant	140,000				800
End of 1938	214,000	31,500	29,820	35,500	36,995
1939					
1-1000 KW Diesel gas engine at Dickinson	125,000		1,000		1,000
Cooling Tower at Mitchell	14,000		1,000		
End of 1939	139,000	33,200	31,820	37,500	37,995
1940					
1-1500 KW Turbine & Boiler at Mobridge	130,000		1,500		1,500
1-1000 KW Diesel Plant at Scotland	125,000		1,000		1,000
End of 1940	255,000	35,100	34,320	39,600	40,495
1941					
1-1500 KW Diesel Gas Engine at Mandan	150,000		1,500		1,500
End of 1941	150,000	37,100	35,820	41,800	41,995
Total Investment	758,000				

The above plan will take care of our anticipated requirements for the next four years at a minimum expenditure and we believe that these additions will fit in well with any system which may be proposed for the future.

Under the heading of "Explanation of Proposed Additions" follows a detailed explanation of the foregoing proposed additions.

Allocation of Investment Costs Between Groups.

Insofar as is practical we believe that a balance of investment should be maintained between the two groups

but in the event that one group makes an investment that will be used temporarily by both, the fixed charges should be apportioned on an equitable basis.

We believe the fairest basis of apportioning these fixed charges is on the basis of demands. Each group contributes a certain percentage of the total system peak and should contribute that same percentage of the generating equipment necessary to carry these demands.

On this basis we have made the following calculation which shows the charge or credit for generating capacity furnished by one group to the other.

	System Peak December 1937	% of Total
U. P. U. Group	10,620	41%
N. W. P. S. Co.	15,280	59%
Total	25,900	100%

Allocation of Capacity to U. P. U. Group:

	Total System Capacity Including Proposed Additions	U. P. U. Group Proportion 41%	U. P. U. Capacity Including Proposed Additions	Difference
1938	36,995	15,168	13,355	1,813
1939	37,995	15,578	14,355	1,223
1940	40,495	16,603	15,855	748
1941	41,995	17,217	17,355	138

If the construction program as outlined is carried out the U. P. U. group will owe Northwestern Public Service Company fixed charges until 1940 when the investment is brought in line with a small credit in favor of the U. P. U. group. The 1938 charge is based upon the 1937 peak and includes the proposed additions to be made during the year 1938.

We believe a fair basis would be to assume an investment of $110 per kilowatt and to charge 12% on this investment.

On this basis the fixed charges to be collected by Northwestern Public Service Company from the U. P. U. group will be as follows:

	Kilowatts of Capacity Provided	Investment at $110 per Kilowatt	Annual Fixed Charges at 12%
1938	1800	198,000	23,760
1939	1200	132,000	15,840
1940	750	82,500	9,900

We suggest that the fixed charges for the year 1938 be on the above basis and that a similar calculation be made each year in the future to determine the proper allocation of fixed charges.

The U. P. U. group cannot render dependable service in the south end of their system with present generating facilities. Northwestern Public Service Company has surplus generating capacity that is available at three separate points (Ipswich, Ellendale and Gettysburg) through present interconnection facilities and we feel that Northern Power and Light Company is better off purchasing their requirements in accordance with the above plan than they would be by immediately providing for their own requirements with additional generating equipment.

Results of Operating With Systems Interconnected.

Net KWH Generated

	North Dakota Power & Light Company	Northern Power & Light Company	Northwestern Public Service Company	Total	
1930	22,422,901	3,282,959	37,241,025	62,946,885	
1931	27,098,736	2,349,768	36,817,980	66,286,484	
1932	28,050,786	1,582,873	33,439,965	63,073,624	
1933	29,630,180	1,226,393	34,636,244	65,492,817	
1934	30,474,912	2,205,562	37,114,393	69,794,867	
1935	34,722,029	3,725,338	40,621,155	79,118,522	
1936	34,764,503	4,691,944	49,295,565	88,752,012	
1937	38,349,756	4,655,719	48,746,417	91,751,892	
Cost per Kilowatt-hour in Mills					% Reduction Since 1930
1930	7.68	26.01	10.55	10.33	
1931	6.23	27.84	10.37	9.30	10.0%
1932	5.82	35.41	9.72	8.63	16.4%
1933	5.84	35.84	9.33	8.25	20.1%
1934	6.35	20.32	9.05	8.23	20.3%
1935	5.70	14.86	9.33	8.00	22.5%
1936	6.36	12.90	8.86	8.10	22.5%
1937	5.66	12.21	8.80	7.66	25.8%

We believe that the above tabulation proves that there are substantial savings under the present method of operation. We also feel that our present energy rate for interchange power provides an equitable distribution of these savings between the two groups. We have tried to take everything into consideration in our proposal for additional capacity for this report represents our best judgment in this matter. We feel that the basis proposed for allocating fixed charges on investment between the two groups will give a fair and equitable distribution and if the matter is handled on this or some similar basis both groups will save in investment charges as well as in operating expenses, as less reserve equipment is needed for the combined system than would be the case if each system was operated independently of the other. This method also permits the more efficient plants to operate at better load factors thus making a savings in unit costs.

Engineering Exhibits.

We are attaching hereto the following exhibits prepared by our Engineering Department as a part of this report:

Exhibit "A"—Electric and Steam Equipment Capacities by Stations—Northwestern Public Service Company.

Exhibit "B"—Electric and Steam Equipment Capacities by Stations—North Dakota Power & Light Company.

Exhibit "C"—Electric and Steam Equipment Capacities by Stations—Northern Power and Light Company.

Exhibit "D"—Summary of Steam & Diesel Generating Stations—All Companies.

Exhibit "E"—Comparison of Generation and Costs Year 1930 and Year 1936.

The survey contains a detailed analysis of the cash required for the proposed improvements showing a total of $262,500.00 for North Dakota Power & Light Company and $135,500.00 for Northern Power and Light Company; and

also showing the "Estimated Cash Available for Interest and Dividends After Financing Proposed Construction Program" of a total over the four year period, 1938 through 1941, of $476,300.00 for North Dakota Power & Light Company and $197,400.00 over the period for Northern Power and Light Company.

Conclusion.

The recommendations contained in this report represent the best judgment of everyone in this office. Insofar as the allocation of fixed charges on investment is concerned we have tried to take a fair and impartial viewpoint.

We believe we are in a position to do this as in the operation of the properties we have not recognized the difference in ownership as being a factor and it has been our intention to operate the properties in exactly the same manner as though the entire property belonged to one company.

Q. Mr. White, I ask you to look at Exhibit 24 for identification, purporting to be a copy of a survey of power requirements, and ask you who prepared that exhibit, if you know?

A. To the best of my knowledge it was prepared by or under the direction of Mr. C. J. Strike.

Q. And is that the Mr. C. J. Strike that you have testified was an officer and director of Northern Power & Light Company and North Dakota Power & Light Company?

A. Yes.

Defendant's Exhibit 244-A, which is also referred to as Defendant's Exhibit 24-A in White's deposition, was received in evidence. It consists of a handwritten index to the document received in evidence as Defendant's Exhibit 244.

Q. I will ask you who prepared Defendant's Exhibit 24-A for identification, if you know?

A. That was prepared by Mr. McClanahan of my office, of the Chicago office of the United Public Utilities Corporation.

Q. Mr. White, again directing your attention to Defendant's Exhibit 24 for identification, will you tell me from whom you received that document?

A. I received one copy of it from Mr. Strike.

Q. Mr. White, I again direct your attention to Defendant's Exhibit 24 for identification, and ask you whether you know whether this is a copy of that exhibit which was prepared by Mr. Strike? A. Yes.

Q. Mr. White, could you tell us on or about what date you received the copy of Defendant's Exhibit 24 for identification from Mr. Strike?

A. During the last two months of 1937.

(Read from deposition.)

Q. Mr. White, I show you what purport to be the minutes, the original minutes of a regular meeting of the Board of Directors of United Public Utilities Corporation, held at 1335 Land Title Building, on December 21, 1937, in Philadelphia, Pennsylvania, at 10 a. m. Eastern stand-

ard time and ask you whether this is the original minutes of that meeting? A. It is.

Mr. Robinson: Subject to counsel's right to object, pursuant to the stipulation, I will now read the first full paragraph appearing on page 3 of the minutes of the regular meeting of the board of directors of United Public Utilities Corporation, held at 1335 Land Title Building, Philadelphia, Pennsylvania, on December 31, 1937, at 10 o'clock A. M., Eastern Standard Time.

> "The president exhibited a copy of a report from officials of North Dakota Power & Light Company, Northern Power & Light Company, subsidiaries of the corporation, and Northwestern Public Service Company, all of which are interconnected, recommending a construction program for the next five years to increase generating capacity and improve the transmission system. The report contemplates that this program will meet the increasing demand for energy, as it is expected to develop in the interconnected system, and will distribute the cost among the three companies in proportion to their respective needs. This report was discussed at length by the board, and the president was instructed to furnish copies to members of the board for further study."

The aforesaid portion of the minutes was received in evidence.

(Read from deposition.)

Q. Mr. White, did you exhibit a copy of a report which you received from officials of North Dakota Power & Light Company, Northern Power & Light Company, subsidiaries of United Public Utilities Corporation, and Northwestern Public Service Company, recommending a construction program for the next five years, to increase the generating capacity and improve the transmission system, at the regular meeting of the board of directors of United Public Utilities Corporation held on December 21, 1937, at 1335 Land Title Building, Philadelphia? A. Yes.

Q. Mr. White, is Defendant's Exhibit 24 for identification a copy of a report which you submitted to the board of directors of United Public Utilities Corporation at the regular meeting held December 21, 1937? A. Yes.

Q. Was that report which you exhibited to the board on that date discussed at length by the board? A. Yes.

Q. And were you, as president of United Public Utilities Corporation, instructed by the board of directors of that corporation on that date to furnish copies of that report to members of the board for further study? A. Yes.

Q. And did you deliver copies to the members of the board? A. Yes.

Defendant's Exhibit 245, which is also referred to as Defendant's Exhibit 25 in White's deposition, was received in evidence. It reads as follows:

Defendant's Exhibit 245.

Inter-Company Charges.

January 10, 8

F. E. F esi—S. W. White.
C. J trike.

Some weeks past I prepared a survey of power requirements for the inter-connected system in the two Dakotas which report was turned over to Mr. Buell for engineering study. This report gave the analysis of present demands and present capacities by companies and outlines a prospective program for the ensuing five years. This program may of course, be varied as judgment or conditions may dictate. On the other hand, there is one fundamental principle which I believe we are obliged to face definitely at this time which I wish to outline as follows:

As you will appreciate, this office is representing both groups of properties and as such, we are obliged to deal equitably and fairly in all decisions between the two groups. Under the original plan, there was no understanding and during the past few years we have adopted the following plan.

A. The expenses of the Huron office are allocated on a basis of gross.

B. Fixed charges on *inter-connection* facilities between the two groups are borne fifty-fifty between the companies.

In referring to companies, of course, I mean, the U. P. U. group in the Dakotas and Northwestern Public Service Company.

We now have the final consideration of system capacity and the report above referred to covers the same in detail. The U. P. U. group with 41% of the system peak, should, of course, furnish 41% of the system capacity, including the necessary reserve. By considering both companies as one unit, we, of course, are able to get by with less system reserve. On this basis, in the year of 1938 the U. P. U. group should purchase from Northwestern Public Service Company 1800 Kilowatts of capacity, which considered at $110.00 per Kilowatt and 12% fixed charges would mean an annual charge of $23,760.00. This is all set forth on Page 11 of the report above referred to.

In the interest of equity between the two groups, this charge should be put into effect as of January 1st and in making the budgets for the year of 1938, we reflected the same.

If there is any question relative to our judgment in this matter, or if any one desires a conference, or further information please advise.

Yours very truly,

CJS—B C. J. STRIKE.

Defendant's Exhibit 246, which is also referred to as Defendant's Exhibit 25-A in White's deposition, was received in evidence. It reads as follows:

Defendant's Exhibit 246.

January 17, 8

Power Requirements.

Dakota Companies.

C. J. Strike:
F. E. Kruesi.

Replying to your letter of January 10th, regarding the survey of power requirements of the Northwestern Public Service Company, Northern Power & Light Company and North Dakota Power & Light Company, which you made. I have gone over your survey and believe it to be right

in principle. Several questions have arisen in my mind with regard to the details.

I understand that Mr. Buell has been studying this survey and has in the course of preparation a report which he expects to have ready the latter part of this week. It would seem to me to be best as soon as his report is ready that Mr. Stokke and you come in, and that we should ask to meet with Mr. White to discuss the whole matter and try to arrive at some conclusions for the 1938 program at least. It will fit in with Mr. White's plan if this is done not later than the early part of next week.

As soon as Mr. Buell is ready, he will communicate with you and arrange for a meeting date convenient to all.

F. E. KRUESI.

FEK:db

cc-SWW
JHB

(Read from deposition.)

Q. Mr. White, did you have a meeting with Mr. Strike, Mr. Stokke and Mr. Kruesi some time after January 17, 1938, at which you discussed the question of the power requirements of the North Dakota Power & Light Company and the Northern Power & Light Company?

A. I had such a meeting shortly after January 10th, which may have been after January 17th.

Q. Mr. White, I show you Defendant's Exhibit 25-A for identification. Directing your attention to the date thereon and the information appearing in the second paragraph thereof, I will ask you whether that refreshes your recollection as to the possible date upon which that meeting was held?

A. Yes. It would be after the 17th.

Q. Of January, 1938? A. Correct.

Q. Mr. White, do you know a Mr. Buell? A. Yes.

Q. Do you recall whether at that meeting you discussed the question of whether Mr. Buell was giving study to the survey that had been made by the men in the field? A. Yes.

Q. Now, Mr. White, just who is Mr. Buell?

A. Mr. James H. Buell is an engineer, who is now about 65 years old, and has spent the greater portion of his business career in the public utility business. At the time of the discussion just referred to, and continuing on up to the present time, he has been associated with Middle West Service Company as head of their engineering department.

Q. Prior to the date of the discussion to which you have just testified, that is, sometime shortly after January 17, 1938, did you have any business connections with Mr. Buell, or any business dealings? A. Yes.

Q. How long prior to that date would you say you had had business dealings with Mr. Buell?

A. Since the beginning of my receivership.

Q. By the way, is Mr. H. J. Buell, the one who is often referred to as Major Buell? A. Yes.

Q. Then you have had business dealings with Mr. Buell since shortly after April 15 of 1932 in the electrical utility field? A. That's correct.

Q. Has Mr. Buell performed any services for you or any of the companies in which you are interested, during that period? A. Yes.

Q. Has he performed very many services for your companies during that period? A. Yes.

Mr. Robinson: I will now read from page 6 of the minutes of a regular meeting of the board of directors of United Public Utilities Corporation held at 1335 Land Title Building, Philadelphia, on January 20, 1938, the paragraph designated "(e)":

"North Dakota Power & Light Company—

Northern Power & Light Company.

Discussion was had of plans for increasing the generating capacities of these subsidiaries, but action was deferred pending a report from Major Buell and further study."

I now offer in evidence that portion of the minutes which I have just read, both generally and for the purpose of indicating that the board of directors of United Public Utilities Corporation determined to delay action

concerning an increase in the generating capacities of the Dakota subsidiaries pending a report from Major Buell.

Mr. Fellows: No objection.

The Court: Received.

(Read from deposition.)

Mr. Robinson: Pursuant to stipulation I will now read from the 12th page of the organization meeting of the board of directors of United Public Utilities Corporation, held at Room 1335 Land Title Building, Philadelphia, on March 9, 1938.

I will read first from page 11, as follows:

"The president made the following report on subsidiaries of the Corporation."

I will now read from Page 12 of those minutes:

"(c) North Dakota Power & Light Company and Northern Power & Light Company.

"The appraisal of the properties of these subsidiaries being made by the North Dakota Railroad Commission is nearing completion.

"New power exchange contracts are being negotiated by these subsidiaries with Northwestern Public Service Company in line with recommendations made in the report entitled 'Survey of Power Requirements'. Intercompany payments are now being made consistent with the recommendations pending execution of the contracts."

I will now offer in evidence that portion of the minutes of the organization meeting of the board of directors of United Public Utilities Corporation, held at room 1335 Land Title Building, Philadelphia, Pennsylvania, on the 9th day of March, 1938, which I have just read.

Mr. Benson: I would like to ask the witness a question.

Q. What was this survey of power requirements referred to in that memorandum, in the minutes that he was reading? Is that a document that has been identified here before?

A. That is the title of the document prepared by Mr. C. J. Strike.

Mr. Robinson: Exhibit 24.

Defendant's Exhibits 247, 247-A and 247-B were offered in evidence.

Mr. Fellows: We object to the instruments for the reason there is no proper foundation laid; incompetent; contains a mass of conclusions and opinions and assumptions by James H. Buell, who is not present himself for cross examination as to the veracity or reliability of his statements; irrelevant and immaterial. We have no objection if its purpose is limited simply to the fact that the witness, White, received this instrument, but so far as any of its conclusions and statements contained in it, we object.

Mr. Stafford: So far as the opportunity to cross examine, the deposition of Mr. White was taken upon stipulation in which either party could take the deposition of any witness they desired. James H. Buell was in Chicago at the same time. We were there two or three weeks. If they had wanted to examine Mr. Buell they could do it. We are offering this to show that these documents were given to Mr. White and show who gave them. I am offering them for the purpose of showing the information appearing in them was brought to his attention.

The Court: With that limitation they will be received. As to counsel's objection as to the statements of the man making the reports, and his conclusions, I think that would be incompetent. If you limit your offer to the fact that that is information Mr. White had, that is one of the things he considered, it will be received.

Defendant's Exhibit 247.

Middle West Service Company
Chicago

For Company Business Only

Date May 2, 1938

Subject Interchange Capacity Agreement

Location North and South Dakota Properties

To C. J. Strike-S. W. White

From James H. Buell

Companies Participating.

1—Northwestern Public Service Company—"Northwestern."

2—North Dakota Power & Light Company—"North Dakota."

3—Northern Power & Light Company—"Northern."

The attached agreement prepared for the above companies proposes to combine or "pool" their generating capacities and transmission facilities. The immediate as well as ultimate purpose is to obtain a greater employment of now existing or future facilities. It is an economically sound and sensible procedure since by so doing the overall investment is lower than the sum total required of each company acting independently.

The prime requisite to such an agreement is that it shall be beneficial to each of the companies at its inception and so continue thereafter during its life. To accomplish this certain premises, conditions and stipulations are essential. Briefly stated these are as follows:

Item - 1. Power plant capacities of the three companies when combined must result in a *lower* total of installed and effective generating capacity than that total which would obtain if each company provided adequate capacity for its own individual system requirements.

Item - 2. The combination of pooling of such generating facilities must be adequate not only to serve the maximum

individual requirements of each company at any time but also the maximum combined system demand of all these companies at any time. The exchange or interchange of such capacities must be practical, flexible and reliable.

Item - 3. Determination of capacities at unit ratings of generating facilities making up the total plant capacity of each company shall be on an agreed or accepted basis. Blocks of power purchased from other utility companies or municipalities may be included upon assurance of reliability.

Item - 4. Blocks of power sold to utilities other than those within the power pool must be deducted from the plant capacities of that company participating. This is likewise true of blocks of power sold to municipalities. Reason for this is self evident since these blocks of power are prior obligations and they have a public interest. They cannot be entered into the power pool until such sale contract is terminated. Such blocks of power, if any, should be recorded in a supplement to the proposed agreement.

Item - 5. Each of the participating companies must obligate itself not to install or add generating capacity without the consent of the other two signatories of this proposed agreement unless such added capacity is not to be included for common use.

Item - 6. The agreement must set forth as a matter of record the present individual and combined plant capacities for each participating company. It must also record the individual and thereafter the combined system demand of the three companies in order to determine the ratio of system demand to combined generating capacity. This establishes the reserve capacity and its relation to system demand.

Item - 7. Since it is the essence of the contract to combine or pool the generating capacities of the three companies it follows that whatever excess capacity may obtain shall be apportioned among the three companies in ratio directly proportioned to the individual requirement of each company. The result should be such that each company carries the same percentage of reserve capacity

either by actual ownership or by purchase from the available excess. Payment or compensation for the full and free use of this reserve must be likewise apportioned or proportioned.

Item - 8. This agreement is primarily for the exchange of capacity. Energy can and may flow incident to the exchange of reserve capacity. It is fundamental that capacity shall be available when needed. Flow of energy should be covered by separate or supplementary agreement since costs of such energy will vary between the companies.

Discussion of the foregoing features follow.

In so doing "Company generating capacities" and "maximum system demand" as described in the proposed agreement and prepared therefrom are accepted for this discussion. Any modification or change subsequently made in any values need not disturb the analysis to follow which has for its purpose only that of verifying the arrangement as an equitable one.

Item - 1. The summary below sets forth the present relation of "Company generating capacities" to "Company system maximum demands" in order to show the present reserve for each company as well as for the group combined. Data in tabulations is as of December, 1937.

Present Relation Plant Capacities to System Maximum Demand.

	Company Plant Capacities Kilowatts	Company Maximum Demands Kilowatts	Company Reserve Capacity Kilowatts	%
a–Northwestern	19,670 kw	14,175 kw	5,495 kw	39.7
b–North Dakota	9,120 "	7,175 "	1,945 "	27.1
c–Northern	1,850 "	3,125 "	1,275 "	
Total	30,640 kw	24,475 kw	6,165 kw	25.17

The reserve plant capacity for the entire group is 6,165 kw or 25.17% in excess of the interconnected system maximum demand giving effect to deficiency of "Northern" of 1,275 kw.

Now follows a comparison of system loads and plant capacities wherein each company is treated individually

and to show surplus or deficits for each company in event it depended solely on its own generating facilities.

Relation Plant Capacities—Largest Unit Down.

	Company Plant Capacities	Largest Unit	Company Net Effect. Capacity	System Peak	Surplus or Deficit
a–Northwestern	19,670 kw	5,000 kw	14,670 kw	14,175 kw	495 kw
b–North Dakota	9,120 "	3,500 "	5,620 "	7,175 "	1,555 "
c–Northern	1,850 "	1,200 "	650 "	3,125 "	2,475 "
Total	30,640 kw		20,940 kw	24,475 kw	3,535 kw

It will be seen that "Northwestern" has a surplus of 495 kw whereas "North Dakota" and "Northern" have deficits of 1,555 kw and 2475 kw respectively.

The foregoing establishes the fact that the systems grouped or interconnected have an adequate reserve when so combined. Separated and considered individually there is a deficit of 3,535 kilowatts. Providing that amount of capacity only, would be meaningless since there would be no reserve capacity. Adding sufficient capacity to meet these deficits and give 20% reserve for each company would require 8000 kilowatts of new capacity. Pooling system capacities therefore saves the investment incident to adding 8000 kw in three units by each of the above three companies. Evaluated this represents $900,000.00 at the very least.

Item - 2. This has been fully established since the three systems have been and are now operated as one group. Interchange of capacity is practical, flexible and provides a reliability that would not obtain without this interconnection.

Item - 3. The plant ratings are accepted for this discussion. No power is obtained by any of the companies from any sources other than that within their own interconnected systems. This feature is subject to review by the Committee on Operations.

Item 4. None of the operating companies has wholesale contracts to sell nor do they purchase from utilities or municipal plants outside this group. This feature is also

one for review and decision by the "Committee on Operation."

Item - 5. This is incorporated in agreement. It is of mutual interest to each of the companies that there shall be adequate reserve capacity and no more.

Item - 6. This is set forth in detail and made a part of contract. These values will change from year to year. Agreement on these values must be unanimous.

Item - 7. The manner in which the contract provides for the apportionment of excess capacity will be seen to be entirely equitable and moreover is adaptable for future additions of capacity at the time such additions are made by any of the companies. The apportionment of excess capacity to be made for the year 1938 as such excess capacity now obtains is shown later on by way of explanation. Projection is then made for the year 1940 to see working application of contract provision, increased plant capacities and increased system maximum demand.

Item - 8. Sale or purchase of energy incident to the exchange of capacity, or without relation thereto, has so many variables that same should be covered by separate contract. Sale of energy must treat with surplus and emergency capacity in addition to excess capacity.

Billing Basis—The objective is that each company shall have full and free use of the excess capacity available from any one or both of the other companies. This, in turn, calls for an equitable distribution of charges for such excess capacity that may be actually used or made available for protection only.

The apportionment of excess generating capacity must be such that after distribution or apportionment each company shall have the same ratio of reserve capacity to its system maximum demand as obtained for the three companies combined. The billing basis proposed compensates these companies which have excess capacity to sell and imposes an obligation on those companies receiving or buying such excess capacity to pay for same.

Relation of plant capacities to system peaks as of December, 1937, is again set forth below, in order to show existing reserves and basis for billing for the year 1938.

Present Relation Company Plant Capacities to Company System Maximum Demand.

	Company Plant Capac. Kilowatts	Company System Max. Demands Kw.	Reserve Capacity Kilowatts	Per Cent
a–Northwestern	19,670 kw	14,175 kw	5,495 kw	39.7 %
b–North Dakota	9,120 "	7,175 "	1,945 "	27.1 "
c–Northern	1,850 "	3,125 "	1,275 "	
Interconnected Totals	30,640 kw	24,475 kw	6,165 kw	25.19%

The "interconnected reserve capacity" is 6,165 kilowatts which is 25.19% of the interconnected system maximum demand of 24,475 kilowatts. The intent of this contract is to apportion the reserve of 6,165 kw. among the three companies so that each company proportion or percentage is the same, namely 25.19%. This is established as follows:

	Company Max. Demand	%			Plant Capacities After Apportionment
Northwestern	14,175 kw	× 25.2 =	3,568 kw	+ 14,175 =	17,743 kw
North Dakota	7,175 "	× 25.2 =	1,809 "	7,175 =	8,984 "
Northern	3,125 "	× 25.2 =	788 "	3,125 =	3,913 "
Interconnected System	24,475 kw	× 25.2 =	6,165	24,475 =	30,640 "

The Company excess reserve and deficiency capacities are then established as follows:

	Company Plant Capacities	Company Capacities After Apportioning Reserve	Company Excess Deficiency Capacities
Northwestern	19,670 kw	17,743 kw	1,927 kw
North Dakota	9,120 "	8,984 "	136 "
Northern	1,850 "	3,913 "	2,063 "
	30,640 kw	30,640 kw	0

"Northern" has a deficiency of reserve capacity of 2,063 kw and thereby will establish a firm demand on "Northwestern" for the year 1938 for 1,927 kw and "North Dakota" for 136 kw. If it were an isolated or independent

company it would have to install 2,400 kw probably in three units with no reserve after loss of largest unit. As it is, under this contract, it buys 2,063 kw and has a reserve of 25.2%.

During the year 1938, "Northwestern" will add 1000 kilowatts to its plant capacity at Aberdeen and let it be assumed "North Dakota" installs 3,500 kilowatts additional in Bismarck in the year 1939, "Northern" adds no additional capacity.

Let it be assumed system maximum demands be increased during the interim. The company generating capacities, maximum demands, reserve and excess capacities in which the billing base will be established for the year 1940, will be in the following order:

Assumed Status 1940	Company Plant Capacities	Company Maximum Demands	Company Reserve Capacities	% Company Reserve Capacity
Northwestern	20,670 kw	16,758 kw	3,912	23.4 %
North Dakota	12,620 "	8,822 "	3,798	43.2 %
Northern	1,850 "	3,820 "	1,970	51.5 %
Interconnected Totals	35,140 kw	29,400 kw	5,740	19.52%

Apportioning the reserve capacity of 5,740 so that each company has the same percentage for the system namely, 19.52%, the following obtains.

Assumed Status 1940	Company Maximum Demand	Reserve Capacity 19.52%	Plant Gen. Capacity Requirements	Actual Generating Capacity	Excess or Deficit
Northwestern	16,758 kw	3,272 kw	20,030 kw	20,670 kw	640 kw
North Dakota	8,822 "	1,720 "	10,542 "	12,620 "	2,078 "
Northern	3,820 "	748 "	4,568 "	1,850 "	2,718 "
	29,400 kw	5,740 kw	35,140 kw	35,140 kw	0

In this instance "Northern" has a deficit of 2,718 kw by virtue which it establishes a firm demand on "North Dakota" for 2,078 kw and "Northwestern" for 640 kw.

All of the foregoing has been prepared solely for the purpose of analysis and explanation. Therein is indicated that the arrangement proposed is equitable and practical.

The figures used are no criterion for that period. They were used for illustration only.

The arrangement in the form in which I have prepared it follows the customary arrangement usual to contracts of this nature.

(Read from deposition).

Q. Mr. White, did you have dittoed copies prepared of Defendant's Exhibit 26 for identification?

A. Let me see the original. Yes.

Q. Do you recall the purpose for which you prepared such copies? A. Yes.

Q. What was that purpose, please?

A. To give each member of my board of directors a copy.

Q. And did you give each member of your board of directors a copy? A. Yes.

Defendant's Exhibit 247-A which is also referred to as Defendant's Exhibit 26-A in White's deposition, was produced and identified by White and was received in evidence. It reads in part as follows:

Defendant's Exhibit 247-A.

May 3. 8

Interchange Capacity,
Dakota Properties,
C. J. Strike,
James H. Buell.

I thank you sincerely for your letter of April 23rd, which I have not acknowledged previously owing to my absence from the Chicago office.

Please understand that I have been working on this whole proposition persistently and industriously; also as fast as I could focus the attention of all other parties con-

cerned. Mr. White and I have spent considerable time on discussing details. At this writing I have rewritten the contract and it is now in the hands of the Legal Department and Mr. Vennard for revisions and approval.

The contract as prepared follows the arrangements which obtain for the companies in the power pool of the Chicago area. I endeavored to be specific and to follow this arrangement since by so doing, if this contract comes under the jurisdiction of the Federal Power Commission, which we think it will, we will be in a better position to obtain the approval of that body.

Referring again to your letter of April 23rd, please let us dispose of each of the items discussed therein, in the following order:

Maximum System Demand—I feel that you have sufficient information in your records of last December to establish the thirty minute demand. The main thing is that you state demand figures which you think are as nearly representative, accurate and equitable as possible for your staff to determine. This year you will put in the necessary meters and the contract term for the year 1939 will be based on demand charges that are substantiated from exact meter records.

Summarizing this item I feel that the thirty minute period is more equitable and on a sounder basis for an agreement such as this rather than a fifteen minute demand.

Committee on Operations—It is highly advisable that each company be represented on this committee by someone who is responsible and capable of passing upon company generating capacity system demands and tying same in [which] the interconnected system generating capacities and maximum demands in order to ascertain how the excess reserve capacity shall be apportioned.

Accordingly, I recommend for this committee that Mr. E. K. Albert be appointed for the Northwestern Public Service Company, Mr. N. S. Patterson for the Northern Power and Light Company and Mr. F. B. Porter, for the North Dakota Power and Light Company. If you desire to

make any changes and substitute others therefore, please do not hesitate to do so. I do wish that each company be represented on this committee by a [bonda] fide employee of that company.

[Directions for the method of preparation and the contents of Exhibits A, B, C and D, constituting the annual supplements to the Reserve Capacity Agreements, were set forth in detail.]

In conclusion, please follow the wording of the contract which I have prepared and in which you will note that I have made no use of the term effective generating capacity. In a pool contract, any rated generating capacity agreed upon by the Committee on Operations becomes firm capacity. Effective capacity is that which remains when the largest unit is out of service. In a pool contract such as we are preparing, that condition does not obtain. All of the company capacities are pooled and that which is in excess of the system demands is reserve capacity.

In conclusion, may I say that you are in error in feeling that the question is becoming more complicated. The endeavor is certainly not to make it complicated but instead comprehensive. In order to do so and answer all questions that have been raised in this office or which may be raised by the Federal Power Commission, I have made certain inquiries which have been properly and adequately answered by Mr. Albert.

It is better to have data and information of this nature in advance since that establishes the fact that the entire transaction has been given the analysis and investigation it deserves.

JAMES H. BUELL.

Defendant's Exhibit 247-B, which is also referred to as Defendant's Exhibit 26-B in White's deposition, was produced and identified by White. It was received in evidence

for the purpose of showing the information appearing therein and that the same was brought to White's attention and considered by him. It is the agreement referred to in Defendant's Exhibit 247 and is substantially the same as the 1938 Interchange Capacity Agreement (Exhibit C to the Complaint).

Q. Mr. White, after receiving Defendant's Exhibit 26 for identification, Defendant's Exhibit 26-A for identification, and Defendant's Exhibit 26-B for identification, did you study those documents? A. Yes.

Q. What study did you make of those documents?

A. Well, I read them carefully and had discussions with Major Buell regarding the reasons, or their propriety, or the necessity of parts.

Q. By "parts," do you mean parts of the document?

A. Parts of the document.

Q. You have testified that you have received those documents on or about the date they bear. After those dates, namely May 2, 3 or 4, 1938, did you give [an] consideration and study to those memoranda and the drafts of contracts? A. Yes.

Q. Did you request or direct others to give such study and consideration to the same documents? A. Yes.

Defendant's Exhibit 248, which is also referred to as Defendant's Exhibit 42 in White's deposition, was identified and produced by White. It was received in evidence and reads as follows:

Defendant's Exhibit 248.

United Public Utilities Corporation
20 North Wacker Drive,
Chicago, Illinois.

May 27, 1938.

Mr. F. E. Kruesi, President,
Middle West Service Co.,
Chicago, Illinois.

Dear Frank:

I understand from Major Buell that the last draft of the Capacity Interchange Agreement between Northwestern

Public Service Co. and Northern Power and Light Co. is somewhere in the mill.

After we have secured the benefit of suggestions and corrections from those in the Middle West Service Co., whose ideas will be helpful and the approval of the legal side from Mr. Ralph Stevenson, I would like to refer the final draft to our General Counsel, Mr. Scheetz, and then I suppose our real trouble will begin in securing the approval of Federal Power Commission. At best it looks like a torturous procedure before we complete the job and I would suggest that we complete the preliminary steps as soon as possible.

Very truly yours,

.....

President.

Q. Now, I ask you to refer to the letter and see whether that refreshes your recollection as to what other people you directed these matters to be studied and considered and worked on? A. It does.

Q. And who are they, please?

A. Well, for examination from the legal point of view, it was referred to both Mr. Ralph Stevenson of the legal department of Middle West Service Company, and to Mr. Scheetz, who is general counsel.

Q. Did you say Mr. Stevenson was counsel for Middle West? A. Service Company, yes.

Q. Go ahead.

A. In the meantime this subject then was discussed at considerable length with my [association,] Mr. Peale, who had the title of treasurer of my company.

Q. By "my" company, you mean United Public Utilities Corporation? A. Yes.

(Read from deposition.)

Mr. Stafford: At this time, pursuant to stipulation previously entered into at these hearings regarding the offering into evidence of portions of the minutes of the meeting of the directors of United Public Utilities Corporation, which minutes have been previously authenticated and identified by another witness, Mr. Francis H. Scheetz, I will read

from the minutes of a regular meeting of that board of directors, held in Philadelphia on June 15, 1938, reading from the fifth page of those minutes:

> "The president furnished to members of the Board copies of a memorandum dated May 2, 1938, of the interchange capacity agreement by the three participating companies, Northwestern Public Service Company, North Dakota Power & Light Company, and Northern Power & Light Company, with the statement that the provisions of this agreement are substantially in accord with 'Survey of Power Requirements', copies of which were submitted to the board in January, 1938."

The foregoing portion of the minutes was received in evidence.

Q. Mr. White, did you at any time refer to the board of directors of United Public Utilities Corporation the memorandum prepared by Mr. Buell, which is identified as Defendant's Exhibit 26 for identification? A. Yes.

Q. Do you recall at what meeting of the directors you submitted that memorandum?

A. I gave each director a copy of the memorandum at the directors' meeting held on June 15, 1938.

Q. Did you make any statement to the directors at that time with regard to the provisions of the proposed interchange capacity agreement, that you recall? A. Yes.

Q. Will you please state what it was?

A. I told them it was generally along the lines of the survey of power requirements, copies of which, by their instructions I had mailed to each director shortly after the last meeting, which had been held in December of 1937. By the "last" meeting I don't mean the last meeting prior to June 15th, but the last meeting in 1937.

Q. As a matter of fact, that meeting was in January, 1938, wasn't it, Mr. White? Would it refresh your recollection by referring to the minutes of the June 15th meeting?

A. No. At a meeting held in December, 1937, I had with me a copy of the survey on power requirements which we discussed at that meeting, and as a result of that discussion the directors asked me to prepare and send to

each director a copy of that survey, and upon my return to the office I had the survey manifolded and sent it to each director by mail.

Q. Mr. White, what was your reaction to the Buell recommendation in the memo of May 2, 1938, and the form of agreement which Mr. Buell had prepared?

A. I felt the proposal was equitably conceived and mutually desirable from the standpoint of the companies which were proposed for participation in the pooling of the generating capacities.

Q. You have previously testified this morning that you desired to have the matter submitted to the U. P. U. counsel, Mr. Scheetz, and also to get the legal approval of Mr. Stevenson on behalf of Middle West Service Company. Do you know whether or not the matters were submitted to those gentlemen? A. Yes, they were.

Q. Let me ask you this: Did Mr. Scheetz approve the contract?

Mr. Benson: Q. Did you get a written form of approval from Mr. Scheetz?

A. I do not recall whether I got a written form of approval from Mr. Scheetz.

Q. Do you recall whether you got—

A. (Continuing) —or from Mr. Stevenson.

Mr. Benson: I see. Just a moment. You answered my question.

Mr. Stafford: Q. Going back to mine, do you recall whether or not Mr. Scheetz approved the contract?

Mr. Benson: Do you remember that, and the communication if any you had from Scheetz or Stevenson?

A. No, I don't remember. I do know that—

Mr. Stafford: Q. Did you have any conversations with Mr. Scheetz about the matter? A. Yes.

Q. Do you recall when and where?

A. I had conversations on the subject of the contract, particularly at the directors' meeting on June 15, 1938, at which Mr. Scheetz was present and participated in the general discussion of the directors and the explanation to the directors of the character and the intent of the contract.

Q. Any other conversations with Mr. Scheetz on this subject matter, that you recall?

A. Not that I can specifically recall.

Q. Did you have any conversations with Mr. Scheetz regarding this contract, in Chicago, during the month of November, 1938, that you recall?

A. Unless there is something in my correspondence files to refresh my recollection of such a discussion, I cannot recall it at this moment.

Q. But you do recall Mr. Scheetz discussed the matter with you fully at the June 15, 1938, meeting?

A. I do recall that there was a general discussion in which all of the directors participated and—

Mr. Benson: You have answered the question.

A. (Continuing) —both Mr. Scheetz and I participated in that discussion.

Q. I understand from your prior testimony that Mr. Scheetz did approve the contract as counsel for the U. P. U. Corporation? A. Yes.

Q. Do you know whether or not that contract of 1938, the interchange capacity contract, Exhibit C to the complaint, was executed by officers acting on behalf of Northern Power & Light Company? A. Yes.

Q. Do you recall the approximate date of execution?

A. In the first ten days of December.

Q. What year? A. 1938.

Q. I direct your attention, Mr. White, to Exhibit C to the complaint in this suit, which is a copy, photostatic copy of the interchange capacity agreement, dated January 1st, 1938, between Northwestern Public Service Company, North Dakota Power & Light Company and Northern Power & Light Company. You are familiar with this contract, Mr. White? A. Reasonably.

Q. Well, this is the contract that was executed in December, the first ten days of December, 1938? A. Yes.

Q. I direct your attention to the provisions of Article VIII, Section 1, which provides: "Subject to the terms and conditions of this agreement each company will furnish its proportion of the 'reserve capacity' required for the interconnected system, or in lieu thereof, the company or companies with a deficiency of reserve capacity will pay the

other company or companies having an excess reserve capacity a demand charge of $13 and 20 cents per kilowatt of firm demand per year." You are familiar with that charge? A. Yes.

Q. You were familiar with that during 1938 and the period that you have been testifying about? A. Yes.

Q. Were you satisfied, Mr. White, as president of United Public Utilities Corporation, and as a director of both North Dakota Power & Light Company and Northern Power & Light Company, and as a director of United Public Utilities Corporation, the owner of all the stock of both of those subsidiaries, that that was a fair arrangement and a fair charge from the standpoint of the two Dakota subsidiaries?

A. I was satisfied that that provision was fair and desirable from the standpoint of the companies I represented.

Q. And the board of directors of United Public Utilities Corporation had [approve] this contract, had they not?

A. Yes.

Q. And I take it the same answer would obtain: Were they also satisfied that that was the fair, reasonable and proper charge or arrangement in so far as the two Dakota subsidiaries were concerned, in so far as you know?

A. So far as I know, they were entirely satisfied, and the record so indicates.

Q. But the directors of the United Public Utilities Corporation did approve this agreement which contained this charge? A. They did.

Q. I direct your attention to the provisions of the contract relative to firm demand. The term is used in Section 1 of Article VIII, I just referred to, and it is again used in Section 2 of Article VII. What did you know, if anything, Mr. White, as to the ability of Northwestern Public Service Company at that time to provide firm power to Northern Power & Light Company or to North Dakota Power & Light Company?

A. I had been advised by engineers in whom I had confidence that Northern Power & Light Company was not in a position to contract for the sale of firm power.

Q. Northern Power & Light or Northwestern Public Service? You mean to contract for the sale of firm power or for the purchase of firm power, or both?

A. Well, Northern Power & Light Company was certainly in a position to contract for the purchase of firm power.

Q. Did you understand that under this agreement, this arrangement embodied therein, that Northern Power & Light was getting firm power commitments from Northwestern Public Service Company or from North Dakota Power & Light?

I am not asking you to interpret the contract. I am just asking you whether you recall anything about that subject matter?

A. Yes, I recall a great deal about it. I did not understand that the company member of this pool with an excess of reserve generating capacity was definitely contracting to furnish firm power, but I did understand that the actual generating capacity of Northwestern Public Service Company would under all then foreseeable conditions make available to Northern all of its requirements at the time of its peak demand, which could not be supplied either from its own generating stations or from the excess capacity of North Dakota Power & Light Company.

Q. During the period from May, 1938, to and including December, 1938, the 1936 contract between Northern Power & Light Company and Northwestern Public Service Company, Exhibit B to the complaint, was in full force and effect, was it not? That is the interconnection contract?

A. Yes.

Q. Do you know whether or not the companies were making the payments called for under that contract?

A. Northern Power & Light was making the payments called for under that contract.

Q. Well, that is with reference to the transmission line charges you are referring to?

A. The payments under the interconnection contract.

Q. How about the five mill energy interchange?

A. Payments for the interchange energy were being made.

Q. Well, Mr. White, during this period of 1938, which I have previously fixed, namely, from May, 1938 to and including December, 1938, was any change made in those charges either for interconnection facilities or for the energy interchange rate? A. No.

Q. Were you satisfied that those rates provided by the 1936 contract, and in force, as you have just described them to us, were fair and reasonable and satisfactory to you as president of U. P. U. Corporation, as a director of that company, and as a director of both North Dakota Power & Light Company and of Northern Power & Light Company? A. Yes.

Q. You have testified, Mr. White, that you approved the 1938 contract, Exhibit C to the complaint, and that your board of directors of U. P. U. corporation also approved it. Now, taking yourself personally, was your approval the result of your own independent judgment and thinking or was it influenced by domination or control of you by persons in the Northwestern Public Service Company organization?

A. It was in no wise a result of domination of any company, group or person. It was the result of my own independent thinking.

Q. Mr. White, the complaint in this case alleges, and I think without contradiction, that North Dakota Power & Light Company and Northern Power & Light Company were merged effective July 1, 1939, so that Northern Power & Light Company was merged into the North Dakota Company, and the name of the surviving corporation changed to Dakota Public Service Company. Do you recall the merger of those two subsidiaries? A. Yes.

Q. And was it accomplished effective July 1, 1939?

A. Yes.

Q. The complaint also annexes as exhibits D and E. two contracts executed between Dakota Public Service Company and Northwestern Public Service Company, one relating to the interconnection facilities and the interchange of energy charge, and the other relating to the intercapacity exchange arrangement. Do you recall how those contracts came to be prepared and executed between the companies?

A. Do you mean by that the original suggestion from which the—

Q. Yes. On July 1, 1939, there was in existence the 1936 contract and the 1938 contract. Now, the complaint charges subsequent to July 1, 1939, a contract, new contracts were executed. I want to know what you know or recall about how that matter came about?

A. Pardon me. I had misunderstood your question. Following the merger of Northern Power & Light Company into North Dakota Power & Light Company, with a change of name to Dakota Public Service Company, I wrote a letter to Mr. Sanborn on August 3, 1939, suggesting to him that the capacity interchange contract be redrafted into a two party contract, between Northwestern and Dakota Public Service Company, with the new company.

Defendant's Exhibit 249, which is also referred to as Defendant's Exhibit 43 in White's deposition, was identified and produced by White. It was received in evidence and reads as follows:

Defendant's Exhibit 249.

August 3, 1939.

Mr. A. B. Sanborn, President,
Dakota Public Service Co.,
Huron, South Dakota.

Dear Beck:

Enclosed, find two copies of Supervision Contract of Middle West Service Company with Dakota Public [Service] Company, effective as of July 1, 1939, both of which copies have been executed by Middle West Service Company.

When you have executed copies, please return one copy to Mr. C. V. Dinges, Jr., Treasurer, Middle West Service Company. This contract will supplant the existing contracts of Middle West, in identical form, with Northern Power & Light Co., and North Dakota Power and Light Co.

By the terms of the merger agreement, these previous contracts are, of course, assumed by Dakota Public Service Company, but I think it is better to clear the record by signing up a new contract.

Incidentally, don't you think it would be a good idea to redraft the capacity interchange contract with Northwest-

ern Public Service Company, so that it will be a two-party contract. Such procedure will certainly simplify future descriptions of the arrangement when reporting to regulatory bodies.

Very truly yours,

.....

President.

[The original exhibit shows in the left margin the initials "C. P."]

Encl. 2.

Copy of Management Contract between Dakota P/S Co. and Middle West will be found in Contract File—(kept current)—and marked "Dakota Public Service Co. Supervision Contract with Middle West Serv. Co."

Q. This "C. P." in the margin, what is that?

A. That indicates that Mr. Peale of my office had read the carbon copy before it was filed.

Q. Was it his habit to initial carbon copies of your correspondence, indicating those he had read?

A. Yes, and many of the exhibits that have been introduced out of my files will bear his initials in pencil, "C. P."

(Read from deposition:)

Q. Prior to July 1, 1939, Mr. White were there any contracts in existence between Northern Power & Light Company or North Dakota Power & Light Company and Middle West Service Company? A. Yes.

Q. Subsequent to July 1, 1939, were those contracts superseded by new contracts between Middle West Service Company and Dakota Public Service Company effective as of July 1, 1939? A. Yes.

Q. Did you send copies of the new contracts with Dakota Public Service Company to Mr. Sanborn for execution by him, together with your letter of August 3, 1939, being Defendant's Exhibit 43 for identification? A. I did.

Q. Did Mr. Sanborn attend to the execution of those contracts, do you know? A. Yes.

Mr. Benson: What contracts did you [sent] to Mr. Sanborn with this Exhibit 43?

A. I sent him copies of the supervision contract between Middle West Service Company and Dakota Public Service Company, which had been prepared by Middle West Service Company and submitted to me for approval.

Q. Those were the only contracts you sent with the August 3rd letter? A. That's correct.

Mr. Stafford: Q. Did Mr. Sanborn make any reply to your letter of August 3, 1939? A. Yes.

Defendant's Exhibit 250, which is also referred to as Defendant's Exhibit 44 in White's deposition, was produced and identified by White. It was received in evidence and reads as follows:

Defendant's Exhibit 250.

Dakota Public Service Company,
General Offices,
Huron, South Dakota.

August 8, 1939.

Mr. Samuel W. White, President
United Public Utilities Corporation
20 North Wacker Drive
Chicago, Illinois

Dear Sam:

I wish to think you for your letter of August 3rd enclosing supervision contract for Dakota Public Service Company with the Middle West Service Company. I am executing the contracts today and sending one to the treasurer of the Middle West Service Company.

We have had in mind for some time the necessity of redrafting the interchange capacity contract and the transmission contract into a two party agreement between Northwestern Public Service Company and Dakota Public

Service Company. We will get this cleaned up as quickly as we can get at it.

You will note that we have deposited by check $200,000 excess funds in the Peoples-Pittsburgh Trust Company, Pittsburgh, Pa., in accordance with your request. I agree that where there is no risk involved 1% is better than nothing.

Yours sincerely,

A. B. SANBORN,
President.

ABS/f

(Read from deposition:)

Q. Do you know how the year 1939 contracts were drafted, put into final form for execution? By that I mean, do you know who worked on that? A. Yes.

Q. Will you tell us, please, your best recollection?

A. They were drafted in the office of—the joint office of Dakota Public Service Company and Northwestern Public Service Company, as per my request.

Q. Did you submit these drafts or cause them to be submitted to any attorneys in the process of their preparation?

A. They were submitted to Mr. Scheetz by me, the general counsel of the United Public Utilities Corporation.

Q. That is, they were submitted by you to Mr. Scheetz?

A. That's correct.

Q. And do you know whether or not Mr. Scheetz submitted them to any other lawyers or conferred with them about the drafts? A. Not to my present recollection.

Q. Referring to Defendant's Exhibit 43 for identification, being your letter of August 3, 1939, to Mr. Sanborn, in which you state to him, incidentally, doesn't he think it would be a good idea to redraft the capacity interchange contract with Northwestern so it would be a two party contract? Do you recall at the present moment what purpose if any you had in mind in suggesting the redrafting of these documents?

A. Merely the simplification, to put them in the form of a contract with Dakota Public Service Company instead

of allowing them to become effective,—instead of—strike that. Instead of depending on the succession of liability under the merger agreement, to make the previously existing contracts binding.

Q. Did you have in mind by executing the two 1939 agreements effecting any change in the rates or charges called for by the 1936 contract and the 1938 contract?

A. No.

Q. As a matter of fact, Mr. White, no such changes were accomplished or provided for by the two 1939 agreements, were they? A. No, they were not.

Q. You are familiar with the two 1939 contracts, being Exhibit D to the complaint. That is the one which is denominated "Interconnection contract", and the other being Exhibit E to the complaint, being denominated "Interchange capacity agreement", both being dated July 1, 1939, by and between Northwestern Public Service Company and Dakota Public Service Company? A. I am.

Q. And there were in fact no changes made in the rates which we have previously gone over in your testimony, prescribed in the 1936 contract and in the 1938 contract?

A. There were no changes. Might I supplement that last answer by making it read: There were no changes in the prices.

Q. Well, you can do so if you will tell me what you mean by the "prices"?

A. I mean that there were no changes in any of the important terms of the contract, but I do know that we had in mind at that time—

Q. Specifically I had in mind: Were there any changes in the five mill energy interchange rate? Was there any change?

A. I want my answer to read: That there were no changes in the five mill interchange rate nor in the monthly payments under the interconnection agreement.

Q. That is the $1,666.66 monthly charge?

A. That is correct.

Q. All right.

A. Nor in the amount of $1.10 a month for each kilowatt deficiency for the company having a deficiency below the average amount of generating reserve under the agreement.

Q. Just a minute. That $1.10 per month, that is also

known as the $13.20 per kilowatt of firm demand per year charge? A. That's correct.

Q. Were you satisfied, at the time of the execution of the 1939 contracts, Exhibits D and E to the complaint, as president of the United Public Utilities Corporation, and a director of that company, and as a director of the Dakota Public Service Company, as to whether or not the five mill energy interchange rate, the $20,000 per year payment for the interconnection facilities, and the $13.20 per kilowatt of firm demand per year charge were fair, reasonable and proper from the standpoint of Dakota Public Service Company? A. Yes.

Q. And did you consider those charges which I have just previously enumerated, to be fair, reasonable and proper as far as Dakota Public Service Company was concerned? A. I did.

Q. And you did so consider them to be fair, reasonable and proper in the capacities that I have previously described to you, namely, as president of U. P. U.— A. I did.

Q. (Continuing) —director of U. P. U., and a director of Dakota Public Service Company? A. I did.

Q. You were a director of Dakota Public Service Company at that time? A. Yes.

Q. The complaint in this suit also annexes and incorporates another contract, being described as Exhibit F to the complaint, dated July 1, 1941, between Northwestern Public Service Company and Dakota Public Service Company. Did you have anything to do with the negotiations of that contract, Mr. White? A. Of the 1941 contract?

Q. Yes. A. Yes.

Q. Did you have discussions with other persons concerning the same? A. Yes.

Q. One discussion or several discussions? A. Several.

Q. Well, can you go back and recall for us the first discussion concerning the subject matter of the 1941 contract? A. The first discussion I had—

Q. Can you do so? A. Yes.

Q. When was that first discussion? I want to know when? A. Early in 1941.

Q. With whom? A. Mr. Sanborn.

Q. Where, if you recall? A. In Chicago, in my office.

Q. That is, at 20 North Wacker Drive? A. Yes.

Q. Was anybody else present at that discussion? A. No.

Q. Now, will you please relate for us the substance of what Mr. Sanborn said to you and what you said to Mr. Sanborn, regarding the 1941 contract, on that occasion?

A. Mr. Sanborn told me that the combined systems were [accumulative] substantial demands for energy with respect to their generating facilities, and that additional capacity would have to be provided in the interconnected system; that Northwestern Public Service Company was willing to plan an addition to the north end of their system, but that it would be necessary for Dakota Public Service Company to agree to any addition under the 1939 agreement.

Q. Wait. There are two agreements in 1939. Which one do you refer to?

A. I refer to the capacity interchange agreement. In order to justify Northwestern in building such an addition, he pointed out that Northwestern might very properly build an addition to its system at Huron as being closer to the center of the Northwestern system, but since there was a shortage of generating capacity on the southern end of Dakota Public Service, the Northwestern might be justified in building its proposed addition at Aberdeen, for the benefit of the combined systems, if Dakota Public Service Company would be willing to give some protection to Northwestern's investment by making the 1939 agreement for interchange of capacity non-cancellable for at least ten years.

Q. You have heard the question and the answer read. Is there anything further that you wish to add at this time?

A. I might add that in those initial discussions, Mr. Sanborn was proposing that Northwestern would add 5,000 kilowatts to their generating capacity.

Q. That was in the initial conversations you are telling us about, with Mr. Sanborn? A. Yes.

Q. Now, did you take up the question of the proposed term arrangement which Mr. Sanborn was asking for if he went ahead and located his proposed additional capacity at the north end of the Northwestern System? Did you take that matter up with the United Public Utilities Corporation directors? A. Not immediately.

Q. Well, I am not trying to fix the time. I am asking whether you did or did not take it up with the directors?

A. Yes.

Q. All right. You say "not immediately". Is there something that intervened between the time of the conversation you just described with Mr. Sanborn in Chicago and when you took the matter up with the U. P. U. directors? A. Yes.

Q. What did take place during that intervening period?

A. A new study was made of the [probably] future requirements for additional generating capacity in the interconnected system.

Q. Who made that study, Mr. White, if you know?

A. That was made by Mr. Sanborn's organization in the joint management of Dakota Public Service Company and Northwestern Public Service Company.

Q. Was that with or without your knowledge and approval?

A. It was with my knowledge and approval that such a study should be made.

Q. Did you have any other intervening factor that occurred between the time of the conversation with Mr. Sanborn and the time you brought this matter up with the board?

A. Yes, there were some other discussions of the same subject, and subsequently the original proposal of 5,000 kilowatts additional capacity was changed to provide for the installation of 7500 kilowatts of capacity at Aberdeen.

Q. Do you recall the reason why there was a change in the proposed addition from 5,000 kilowatts to 7500 kilowatts? A. Yes.

Q. Will you please state what that reason was?

A. Mr. Sanborn felt that the probable increases in Northwestern's demands would warrant the installation of 7500 kilowatts additional capacity instead of 5,000, because the average initial cost of a 7500 kilowatt increase would be lower, and that the extra 2500 so provided, 2500 kilowatts so provided would be needed within a comparatively short time, say two or three years.

Mr. Stafford: At this time, pursuant to stipulation of counsel regarding the introduction of portions of minutes of United Public Utilities Corporation directors' meetings, I read into the record from the minutes of the or-

ganization meeting of the directors of that company, held in Jersey City, New Jersey, on April 30, 1941. I am reading from the 8th page of those minutes, said minutes having previously been identified and authenticated by another witness, as follows:

> "A proposed 10 year contract for pooling of electric generating capacity and interchange of energy between Dakota Public Service Company and Northwestern Public Service Company was discussed.
>
> "Upon motion duly made, seconded and unanimously adopted, the management was instructed to recommend to Dakota Public Service Company that such a long term contract be negotiated in order to assure that company of an adequate source of energy to meet its increasing requirements."

The foregoing portion of the minutes was received in evidence.

Q. Now, Mr. White, were you present at that organization meeting of the board of directors of U. P. U. corporation on April 30, 1941? A. Yes.

Q. Do you recall whether or not at that meeting the proposed term contract between Dakota Public Service and Northwestern Public Service was discussed by those directors? A. It was discussed.

Q. You recall that it was? A. Yes.

Q. Do you have any recollection as to what instructions, if any, were given to the management of U. P. U. Corporation with regard to their proposed contract?

A. The directors of the United Public Utilities Corporation passed a resolution instructing the management to recommend to Dakota Public Service Company that such a contract be negotiated.

Q. Do you know, Mr. White, whether such negotiations were had looking towards the accomplishment of that type of contract? Were there such negotiations? A. Yes.

Q. Did you have any part in them, personally? A. Yes.

Q. Who did you have negotiations with, concerning that matter, if you recall?

A. Mr. Sandstedt, Mr. Sanborn, Mr. Kruesi and Mr. Buell.

Q. Mr. Sandstedt at that time was vice president and treasurer of Dakota Public Service Company? A. Yes.

Q. And Mr. Sanborn, was he an officer of that company also? A. Yes.

Q. What office did he hold?

A. He was president of Dakota Public Service Company.

Q. What was Mr. Kruesi's position at that time?

A. He was president of Middle West Service Company.

Q. And Mr. Buell?

A. Was engineer for Middle West Service Company.

Q. He is the same Mr. Buell that you have testified about previously? A. Yes.

Q. I notice Mr. Sandstedt's letter, which is Plaintiff's Exhibit 66 (R. p. 493, supra), is dated June 26, 1941. Did you have occasion to go over or inspect the Dakota properties prior to that date? A. Yes.

Q. And do you recall the approximate date of the visit?

A. Well, it was prior to June 17th, 1941.

Q. Some time in May or early June? The exact date is not material for my question. I just want you to fix it approximately? A. It was not long prior to June 17th.

Q. Who, if anybody, accompanies you on that trip, Mr. White?

A. Mr. Lakin, Mr. Kruesi and Mr. Buell from Chicago. Mr. Sanborn, Mr. Sandstedt, Mr. Stokke and one or two [other] from Huron.

Q. Mr. Lakin was then a director of United Public Utilities Corporation, and president of its Indiana-Ohio subsidiaries, was he? A. Yes.

Q. You have already identified Mr. Kruesi? A. Yes.

Q. And Mr. Buell, Mr. Sandstedt and Mr. Sanborn?

A. Yes.

Q. Who was Mr. Stokke at that time?

A. Mr. Stokke was an engineer, in charge of power plant operations in Dakota Public Service Company and Northwestern Public Service Company.

Q. You did make that inspection trip at that time. Do I understand you correct, that you did? A. Yes.

Q. Did you visit all of the properties?

A. I visited all the—visited most of the properties of Dakota Public Service Company and part of the Northwestern properties.

Q. I take it you visited Aberdeen?

A. Aberdeen, Huron.

Q. And Huron? A. Yes.

Q. Was there any particular purpose for making that inspection trip? A. Yes.

Q. I know that you previously testified you had made several inspection trips. I wondered if this one had any particular purpose?

A. This one was both a regular inspection trip, such as I have been accustomed to making from time to time, and it was also for general review of the operating system out there, with respect to two subjects in particular, namely the—first, the operation of the interconnected system, and second, the possibility, to which I was giving consideration at that time, of recommending to my board the purchase by Dakota Public Service Company of the common stock of Northwestern Public Service Company.

Q. You mentioned you had discussions with Mr. Buell regarding this proposed term contract. Do you know whether or not Mr. Buell prepared any memoranda or drafts of agreement concerning the subject matter of your discussion, namely, the proposed term contract?

A. I don't recall that he did. Oh, draft of a contract?

Q. Yes. I think I included that in my question: If I didn't I intended to include drafts of this proposed contract. A. I don't recall—

Mr. Benson: Are you refreshing your recollection from a memoranda?

A. I was trying to, and I find nothing thereon with respect to it.

Defendant's Exhibit 251, which is also referred to as Defendant's Exhibit 46 in White's deposition, was produced and identified by White. It was received in evidence and consists of 12 pages, the first one of which reads as follows:

Mr. White:

Will you kindly look this over with comments, suggestions and corrections.

JHB.

The next 10 pages are a carbon copy of a draft of the 1941 Agreement (part of Exhibit F to the Complaint). The last page is a proposed supplement regarding reserve capacity data for the calendar year 1941 on a one hour basis.

Defendant's Exhibit 252, which is also referred to as Defendant's Exhibit 47 in White's deposition, was produced and identified by White. It was received in evidence and reads as follows:

NORTHWESTERN PUBLIC SERVICE COMPANY ----- "Northwestern"

DAKOTA PUBLIC SERVICE COMPANY ---------- "Dakota"

THIS AGREEMENT made and entered into this ___ day of _____ 1941, by and between Northwestern Public Service Company, a corporation organized under the laws of Delaware, hereinafter referred to as "Northwestern" and Dakota Public Service Company, likewise organized under the laws of Delaware, hereinafter referred to as "Dakota."

WITNESSETH:

WHEREAS, "Northwestern" is engaged in the business of producing and selling electrical energy within the geographical area of the eastern half of the State of South Dakota, such territorial limits as they exist at the date hereof being so designated and shown on the plat attached hereto, marked "Exhibit A", and hereby made a part hereof; and

WHEREAS, "Dakota" is engaged in the business of producing and selling electrical energy within the geographical area located in the southern half of North Dakota and the north central part of South Dakota, such territorial limits as they exist at the date hereof being so designated and shown on the plat attached hereto marked "Exhibit A" and hereby made a part hereof.

WHEREAS, both companies desire to interchange electric power and energy in order to utilize existing power plants to their maximum capacity and to provide emergency service, one to the other, and,

WHEREAS, "Northwestern" has heretofore, at its own cost and expense, constructed certain interconnection facilities with the transmission system of "Dakota" which facilities are more specifically described as follows:

Item 1. A certain portion of Aberdeen's interconnected substation and control equipment used exclusively for interconnection with "Dakota" located within the corporate limits of the city of Aberdeen, South Dakota.

Item 2. A certain Gettysburg substation, located at Gettysburg, South Dakota, used exclusively for interconnection with "Dakota" and serving Gettysburg, a Dakota property.

Item 3. Certain twenty-two/thirty-eight kilovolt transmission lines from Aberdeen, South Dakota to Barnard, South Dakota and from Aberdeen, South Dakota to Ipswich, South Dakota, totaling fifty (50) miles more or less for interconnection with "Dakota"

Item 4. A certain thirty-three kilovolt transmission line from Highmore, South Dakota to Gettysburg, South Dakota, a distance of sixty-two (62) miles more or less for interconnection at Gettysburg with "Dakota" and,

WHEREAS, the transmission systems of the said companies are now interconnected as shown on the plat attached hereto marked "Exhibit A", and made a part hereof and such systems are now operated as an interconnected system, and

WHEREAS, it is the desire of the two companies to interchange electric power and energy in order to utilize existing power plants to their maximum capacity and to make full and substantial use of the interconnection of their respective transmission systems for the interchange

Defendant's Exhibit 252.

of electrical energy and/or reserve and/or spare capacity in their combined systems as such reserve or spare capacity may obtain in their respective generating stations and may from time to time be available; it being recognised that economy of supply is to be realised by both companies when either of them is entitled to draw upon the reserve or spare capacity of the other, whether for use in general light and power business or for the purpose of having available such reserve capacity during emergencies or during the overhauling of equipment or whenever other need may arise; it being further recognised that it is to the interest not only of the companies themselves but of the public, that their respective systems shall be developed with such proper harmonious cooperation as will tend to prevent avoidable expenditures and thereby tend to minimise the cost of producing and supplying electrical energy; and it being further recognised that if two neighboring supply companies are adequately interconnected it is not necessary for either of them to own and maintain as large an amount of reserve or spare capacity as though each company was separate and isolated from the other; and

WHEREAS, it is now the desire of each of the parties hereto that under and pursuant to the agreement such as this is intended to be, a flexible and equitable basis be established for the apportionment of charges covering the interchange or use of said reserve or spare generating capacity as may now or hereafter obtain either incident to the actual exchange of such capacity or its employment for stand-by purposes all in order that the two companies may be operated at the highest efficiency and the lowest practicable cost,

NOW THEREFORE, in consideration of the premises of One Dollar and other good and valuable considerations in hand paid by each of the parties to the other, the receipt of which payment is hereby by each of the parties confessed, and in consideration of the mutual covenants and conditions hereinafter set forth, and of the benefits expected to be derived herefrom, the parties hereby agree as follows:

ARTICLE I - DEFINITIONS

Section 1 - The term, "points of delivery" means the various points where the transmission lines of "Northwestern" meet the transmission lines of "Dakota."

RENUMBER

Section 2 - The term, "firm power" means that power which either company is obligated to furnish the other and for which the company receiving such firm power is obligated to pay whether it takes it or not.

Section 3 - The term, "surplus energy" means that energy which either company may, in its judgment, have available from time to time and desires to furnish and sell to the other company and which energy the other company desires to take, and for which it agrees to pay.

Section 4 - The term, "emergency power" means that ENERGY which either company, upon receiving due notice from the other company, can and does furnish the other company ~~for a short period of time~~ during an emergency caused by the failure or break-down of any of the facilities of the other party.

Section 5 - The term "billing period" means that period between successive meter readings taken for the purpose of power and energy billing which reading will be taken as nearly as practicable on the 25th day of each ~~current~~ month.

Section 6 - The term "station generating capacity" with respect to any generating station owned, leased, or otherwise controlled by either of the parties hereto, shall mean the rated capacity in kilowatts of such station; or the number of kilowatts of ~~electrical energy~~ CAPACITY which such station can ~~continuously~~ to the interconnected system continuously (except for periods of ~~routine~~ repair and inspection), whichever is lower; ~~and provided further or such rating may be qualified or defined in~~ Section 1 of Article IV hereinafter.

Subject to Section 1 of Article IV

Section 7 - The term "Company generating capacity" with respect to either party hereto shall mean the sum total in kilowatts of all the several station generating capacities, as above defined and described.

Section 8 - The term "Company system maximum demand" with respect to either party ~~hereto~~ (as hereinafter designated) shall be the coincident demands (in kilowatts) made upon the system of such party during that one hour in ~~such month~~ in which the combined coincident system demands of both parties IN THE AGGREGATE were greater than in any other hour previously recorded ~~in any other month~~ during the calendar year.

Section 9 - The term "Company reserve capacity" with respect to either party shall mean the excess (in kilowatts) of the Company generating capacity of such party over and above the Company system maximum demand (in kilowatts) of such party during the calendar year.

Section 10 - The term "per cent Company reserve capacity" with respect to either party shall mean the percentage which the Company reserve capacity of such party bears to the "Company system maximum demand" of such party.

Section 11 - The term "per cent interconnected system reserve capacity" shall mean the percentage which the reserve capacity of both parties hereto bears to the sum of the "Company system maximum demands" of both parties hereto.

Section 12 - The term "required reserve" with respect to either party shall mean the amount (in kilowatts) obtained by multiplying the "Company system maximum demand" by the "per cent interconnected system reserve capacity" ~~of both parties hereto~~ OF SUCH PARTY

Section 13 - The term "Company excess reserve capacity" with respect to either party shall mean the amount (in kilowatts) by which the "Company reserve capacity" of such party exceeds the "required reserve."

Section 14 - The word "term" unless otherwise indicated by the context shall include not only the original term of the agreement but also any and every period of extension effected under the provisions hereof.

ARTICLE II - TERM

Section 1 - This agreement will become effective on July 1, 1941, and will continue thereafter for a period of ten (10) years, and thereafter unless and until specifically terminated by written notice from either party to the other party of its intention or desire to terminate this agreement and such notice of termination shall precede the intended and desired date of termination by not less than eighteen (18) months.

ARTICLE III - GENERAL AGREEMENT - VOLTAGE & FREQUENCY

Section 1 - Voltage and Frequency - Power and energy to be delivered or interchanged hereunder between the parties hereto will be of a character commonly known as three phase, alternating current at approximately 60 cycles and at approximately 22,000/33,000 and/or 33,000 volts pressure or at any higher voltage as such voltage or pressure may now exist or may be hereafter mutually agreed upon at the points of interconnection between the transmission systems of the two companies.

ARTICLE IV - GENERAL AGREEMENT - RESERVE CAPACITY CHARGE

Section 1 - General Provisions - Subject to the terms and conditions of this agreement either party having a "deficiency in reserve capacity" shall ~~purchase capacity to effect such deficiency~~ from the party having "Company excess reserve capacity" in accordance with and subject to the terms and provisions hereinafter set forth.

12-50d

Defendant's Exhibit 252.

"Section 13- The term "Company Receivables" or "Gross Receivables" with respect to either party shall mean the amount (or balance) which the "Gross Receivables" of such party under the "Company Receivables Agreement".

(a) Operating Committee - The terms and conditions of this agreement including the determination of "Company generating capacity," "Company system maximum peak demand," "Company reserve capacity," the "per cent Company reserve capacity" and the "required reserve," shall be ascertained by an Operating Committee consisting of two members, one member to be appointed by each of the parties hereto. In case the members of this Committee are unable to reach an agreement on any provision of this contract they will select a third party who shall be mutually agreeable and the decision of this third party shall be considered final and binding upon the parties hereto.

(b) Station Generating Capacity - The rated capacity (in kilowatts) of any generating station owned, loaned, leased and/or otherwise controlled by either party hereto as defined in Section 6 of Article I shall, in general, be the sum of the manufacturers' name plate rating at 0.8 power factor of all generating units therein, except those supplying power for station auxiliaries and/or not available for the supply of energy elsewhere or whose use is impractical or uneconomical. In case the Operating Committee shall determine, however, after full investigation and by unanimous agreement that a generating station should be rated on some basis other than the sum of the manufacturers' name plate rating, such other rating shall be used for the purpose of this agreement.

For the purpose of this agreement and until such time as there has been a change in station or company generating capacity that may warrant a change in rating of any individual station or of the total company capacity, it is agreed by the parties hereto that the "station generating capacity" and the "Company generating capacity" of each party shall be as hereinafter set forth:

NORTHWESTERN PUBLIC SERVICE COMPANY		DAKOTA PUBLIC SERVICE COMPANY	
Station	Station Generating Capacity Rating (Kilowatts)	Station	Station Generating Capacity Rating (Kilowatts)
Aberdeen	6,250 Kw	Beulah	6,000 Kw
Webster	760 "	Bismarck	5,250 "
Redfield	900 "	Dickinson	700 "
Faulkton	110 "	Mott	230 "
Huron	1,130 "	Mobridge	1,000 "
Highmore	140 "	Ellendale	400 "
Mitchell	7,500 "	Lemmon	235 "
Armour	980 "	Gettysburg	140 "
Yankton	2,520 "		
Company Generating Capacity	20,290 Kw	Company Generating Capacity	13,955 Kw

At any time when there shall have been a change ~~in the aforementioned conditions~~ which may call for a new rating, the rating previously established for any generating station capacity and/or Company generating capacity may be brought up for revision by the Operating Committee. Capacity of any generating equipment which is temporarily out of service for repair or maintenance work shall not be deducted from the rating of the generating station capacity during such temporary outage.

(c) Additional Capacity - When, in the opinion of the parties hereto, the interconnected system coincident demand increases to a point that the systems combined ~~in their aggregate~~ do not have adequate reserve facilities to supply system load requirements and/or to assure reliable service, then, and in such event, the parties hereto shall agree on the installation of additional capacity. The location of such additional capacity shall be by mutual agreement as to the most feasible and practical location; the amount and nature of such additional capacity ~~to be installed~~ and by which party ~~or both~~; taking into consideration the service requirements of each company in order that, ~~with the installation, completed the existing and additional capacity and service~~ requirements will have been ~~provided in the most efficient and economical manner. Thereupon the~~ most efficiently handled for the interconnected system

the interconnected

it shall be installed

1203

Defendant's Exhibit 252.

when such additional generating capacity becomes available to the interconnected system, the "station generating capacity" and "Company generating capacity" for either or both parties shall be adjusted for future billing purposes.

No ~~plant improvements, additions or betterments~~ additions to station generating capacity by either party will be considered for billing purposes except as both of the parties hereto have approved such ~~extension, improvement or betterment and mutually agreed on the increase in "station generating capacity" such agreement or consent shall~~ be in writing.

Section 2 - Determination of "Company ~~Excess~~ Reserve Capacity" and "Company Deficiency in Reserve Capacity."

(a) "Company ~~excess~~ reserve capacity" and "Company deficiency in reserve capacity" are subject to ~~revision~~ determined each year and may be re-determined ~~oftener~~ if a revision is warranted by the installation or removal of equipment that increases or decreases the "Company generating capacity" of either of the parties hereto.

In December of each year the Operating Committee shall determine the "Company system maximum demand" as well as the "Company generating capacity" for each of the parties hereto and ~~will~~ shall assemble and prepare an exhibit in form similar to Exhibit "B" for the year 1941, attached hereto. This exhibit ~~to be~~ marked "Exhibit B" ~~will be~~ shall be signed by each member of the Operating Committee and shall become the basis for billing under this agreement for the ensuing year, or until such time as interim adjustment is warranted by a change in station generating capacity of either party hereto.

It shall be the duty of the Operating Committee to ascertain from the combined "Company generating capacities" and the combined "Company system maximum demand" the combined "Company reserve capacities" in order to determine the "required reserve" and the amount which the company having "Excess Company ~~generating~~ capacity" shall stand ready to supply to the company having a "Deficiency in Company ~~generating~~ capacity" ~~in order that both companies shall carry the same proportion of "required reserve".~~

In case of a deficiency in "required reserve" such deficiency ~~will~~ shall be determined by deducting the "Company reserve capacity" from the "required reserve" for the party having a deficiency, but ~~in no event shall~~ the "required reserve" in kilowatts for billing purposes exceed 25% of the "Company system demand." ~~In event the "required reserve" as determined above is in excess of 25% of the "Company system demand" for the party having a deficiency in reserve capacity, the "required reserve" shall be adjusted to 25% of the maximum demand for billing purposes.~~

(b) The "Company system maximum demand" of either party hereto, as defined in Section 5 of Article I hereof, shall be ascertained by the Operating Committee ~~and shall be the net total output in kilowatt hours during the one hour of company system demand which shall be coincident for the combined systems and which shall be greater than any other hour for the year, as defined in Section 5 of Article I hereof. The hour shall be understood to be the normal integrated hour - as from 5:00 to 6:00 P.M. or 6:00 to 7:00 P.M. The "Company maximum demand" so obtained shall include (1) the energy produced by the generating stations of such party and (2) the energy purchased by such party from all sources during such hour of maximum demand.~~

The time and date when such "Company system demands" are ascertained shall be shown on Exhibit "B".

(c) Either Company having a "deficiency of reserve capacity" as ~~set forth~~ determined under Section 2(a) of Article IV hereof shall be deemed to have established demand for firm power hereunder ~~respectively~~ upon the other party hereto ~~having excess reserve capacity~~ for the number of kilowatts constituting such deficiency. Such company having a "deficiency in reserve capacity" shall pay to the supplying company ~~for the total number of kilowatts of firm power so deemed to be established (whether actually availed of and used or not)~~ a "reserve capacity charge" at the rate hereinafter specified in Article V.

(d) Unless otherwise mutually agreed, it shall be the duty of the company having an excess of reserve capacity to maintain such capacity in readiness to furnish and supply the company having a deficiency reserve capacity, up to the amount of firm power so agreed to have been established.

(e)

It is further understood and agreed that in the event the company having a "deficiency in reserve capacity" shall have temporarily an increase in such deficiency which may be greater than the "required reserve" to which it is entitled and for which it is obligated to pay the other party, it will endeavor to supply such additional capacity as it may to the extent of its ability.

ARTICLE V - RESERVE CAPACITY CHARGE

Subject to the terms and conditions of this agreement the company with a "deficiency in reserve capacity" as provided in Section 2 of Article IV hereof will pay the other company having "excess reserve capacity" for the total amount of "required reserve" as determined in Section 2 of Article IV hereof, a firm power charge of Thirteen Dollars and Twenty Cents ($13.20) per kilowatt of firm power per year. One twelfth of such firm power charge for such "required reserve" shall be due and payable by the company having a "deficiency in reserve capacity" to the company having an "excess reserve capacity" at the expiration of each calendar month during the term of this contract, all as herein prescribed.

ARTICLE VI - CENTRAL AGREEMENT - ENERGY CHARGES

Section 1 - Subject to the terms and conditions of this agreement each company will sell such surplus energy to the other and each company will furnish one to the other such emergency power and energy as one company may need and the other company may have available as further described in Section 3 hereinafter, as available and required.

Section 2 - It is further recognized that energy will be exchanged between the parties hereto in the event either party may actually take such firm power in the exercise of such use as it may make of the "required reserve" to which it is entitled.

Section 3 - Emergency Power & Energy - In the event of total or partial failure of the facilities for generation or transmission of electric power of either party, the other party agrees to use all reasonable effort and all facilities at its command (after the requirements of the other customers of the party delivering such power have been met) to furnish power and energy to the party reserving such power for short periods of time and to the extent of such failure or interruption and only for such periods of time as may be required to restore such facilities, by the exercise of every reasonable effort on the part of the party possessed of such facilities, to their normal operating condition..

ARTICLE VII - RATES

ENERGY CHARGES

Section 1 - "Northwestern" will pay to "Dakota" for such firm and surplus energy furnished and delivered by the "Dakota" Company during each billing period a sum equivalent to five tenths (0.5) cents per kilowatt hour. "Dakota" will pay to "Northwestern" for all firm and surplus energy furnished and delivered by "Northwestern" to "Dakota" during such billing period a sum equivalent to five tenths (0.5) cents per kilowatt hour.

ALL ENERGY DELIVERED UNDER THIS AGREEMENT SHALL BE BILLED AND PAID FOR AT THE RATE OF

It is understood between the parties hereto that fuel prices and generating efficiencies may change, making necessary an adjustment in the energy rates contained in this Section.

In January of each year the parties hereto will review production costs and if necessary redetermine the rates for the above energy to be charged, contained herein. Such revision, if any, will be made by supplements to this contract. It is understood that billing under the rates contained herein will become effective _____. The first review will then be made in January 1942 and each January thereafter.

1207

TRANSFER THIS TO PAGE 6

IN ADDITION TO THE ENERGY CHARGE BY AGREEMENT EMERGENCY POWER MAY BE SURCHARGED WITH THE

Section 3 - Billing for ~~such emergency power and energy will be on the basis of the energy charge as provided in Section 1 of Article VII above, plus whatever additional expense the delivering party may incur~~ in placing in operation and operating high priced plants ~~and facilities~~. It is the intent that the delivering company will not make a profit on such emergency power but will be reimbursed for all added expense that ~~such party~~ may incur during such emergency.

FOR THE PURPOSE OF SUPPLYING SUCH EMERGENCY POWER.

THE DELIVERING COMPANY AND ON ACCOUNT OF

~~Section 4. No service will be emergency service, however, unless~~ due notice has been given by the party in need of emergency power to the other party and the other party agrees to furnish such emergency power.

ARTICLE VIII - TRANSMISSION LINE CHARGES

INCURRED BY NORTHWESTERN IN ITS

Section 1 - As "Dakota's" share of the fixed charges, maintenance and operating expenses ~~relating to the~~ interconnection facilities enumerated above, "Dakota" agrees to pay "Northwestern" beginning July 1, 1941, the sum of $1,666.66 a month. This charge is over and above all ~~energy~~ OTHER charges provided ~~in Section 1 of Article VII and firm power charge for "required reserves" as set forth in Article V hereof~~. HEREIN.

Section 2 - Upon the termination of this Contract by either party, "Dakota" will pay "Northwestern" in addition to all other charges hereinbefore enumerated a sum equivalent to one-half the actual cost to "Northwestern" to remove and dismantle the interconnection facilities ~~enumerated above and to return all material to the storeroom of "Northwestern"~~ in Aberdeen, South Dakota.

"Dakota" has no obligation to pay "Northwestern" for any part of the construction cost of the interconnection facilities enumerated above or for the use of such facilities for any period prior to January 1, 1936.

ARTICLE IX - METERING

Suitable standard 33 kilovolt and/or 22,000/38,000 volt metering equipment agreeable to both parties ~~shall~~ be installed, owned and maintained by "Northwestern" at the point~~s~~ of ~~delivery~~ (or as near thereto as practicable). Meters ~~shall~~ be of such number, type and arrangement as will show separately the amounts of ~~power and~~ energy ~~supplied at each~~ DELIVERED location. Metering equipment will be tested at intervals not exceeding sixty (60) days with a representative of each party present. If, ~~as the result of such tests,~~ the metering equipment is found to be inaccurate, it ~~will~~ be restored to a condition of accuracy. If accuracy exceeds 2%, the readings of the meters ~~taken~~ during the period thirty (30) days ~~preceding (or during such shorter period as may have intervened since a periodic test)~~ will be corrected and payments adjusted accordingly, ~~prior to which period no correction of such readings will be made~~.

AT EACH

SHALL

"Dakota" may at its own expense install and maintain ~~additional~~ DUPLICATE metering equipment at the point~~s~~ of delivery for the purpose of checking the meters installed and maintained by "Northwestern" and the readings thereof.

If the meters installed by "Northwestern" wholly fail to register the ~~power and energy~~ during any period of time, for any reason whatsoever, ~~the amount of power and energy delivered during such period will be measured by means of meters installed by "Dakota"~~, and if "Dakota" has not installed meters, or if its meters have wholly failed to register during this period of time, the amounts of ~~power or~~ energy ~~so~~ delivered will be estimated according to the amounts previously delivered under substantially similar conditions.

Readings of meters installed by Dakota shall be controlling

ARTICLE X - CONTINUITY OF SERVICE

Each of the parties hereto will exercise reasonable diligence and care to avoid interruptions in delivery of ~~power~~ energy hereunder but will not be liable for any damage or loss which may be occasioned by any failure or interruptions caused by fires, strikes, riots, floods, lightning, storms, acts of God, civil disturbances, action of Public Authority, litigation, break-downs, or causes beyond reasonable control.

Either of the parties may take equipment out of service for ~~to make~~ necessary repairs or to make changes in equipment or to install new equipment or ~~any of those~~ purposes, but only for such time as may be unavoidable. REASONABLY NECESSARY.

It is understood and agreed that each of the parties hereto will use reasonable diligence and care in maintaining ~~and operating the Company generating capacity of its respective system provided for herein, to the end that it will perpetuate approximately~~ its full rated capacity as determined and agreed upon by the Operating Committee. EACH OF ITS GENERATING STATIONS AT

ARTICLE XI - LIABILITY

Each party hereto ~~will~~ save and keep the other harmless from any and all loss, cost, damage or expense, ~~and/or~~ including attorney fees for, or by reason of, any claim for injury to its own employees at any location, and to persons or property occasioned by the electric power or equipment owned or operated by it, however caused. Neither party hereto, assumes any responsibility for the equipment of the other party.

ARTICLE XII - BILLS AND PAYMENT

Succeeding the meter reading date

~~In the event of billing hereunder such~~ bills ~~will~~ be rendered each month as nearly as practical on or before the 5th day of the ~~succeeding~~ calendar month and will be payable within ten days from the date thereof.

energy either charge

If either party fails to perform any of its obligations under this contract, including prompt payment of monthly bills, the other party may suspend delivery of ~~power~~ hereunder and will not be liable in any manner for loss or damage arising from such suspension. No such suspension will interfere with the enforcement by the parties hereto of any other legal right or remedy or relieve the delinquent company from liability to pay the "reserve capacity" during any such suspension. No delay by the parties hereto in enforcing any of their rights hereunder will be deemed a waiver of such rights.

ARTICLE XIII - CONCLUSION

This contract will inure to and be binding upon the parties hereto, their successors and assigns.

It is understood and agreed that this agreement cancels and supersedes the Interchange Capacity Agreement, dated July 1, 1939, and the Interconnection Contract, dated July 1, 1939, between the parties hereto.

IN WITNESS WHEREOF, the parties hereto have caused this contract to be executed by their duly authorized officers and impressed with their respective corporate seals the date and year first above written.

Defendant's Exhibit 252.

Defendant's Exhibit 253, which is also referred to as Defendant's Exhibit 48 in White's deposition, was produced and identified by White. It was received in evidence and consists of 4 pages, the first one of which reads as follows:

Mr. White:

Herewith is a copy of the changes which I have made in my copy of the contract.

J. H. BUELL.

The last 3 pages set forth or incorporate changes made by Buell in his copy of Defendant's Exhibit 251.

Q. Have you looked at the documents? A. Yes.

Q. And do they refresh your recollection as to whether or not you did receive from Mr. Buell any memoranda or drafts of agreements relative to this proposed term contract between Northwestern and the Dakota Public Service Company? A. Yes.

Q. Did you receive any such memoranda and drafts?

A. Yes.

Q. And are those exhibits 46, 47 and 48 for identification, the drafts and memoranda which you did receive from Mr. Buell? A. Yes.

Q. Now, with reference to Defendant's Exhibit 46 for identification, I call your attention to the white sheet attached to the first page, which bears some handwritten material which reads "Mr. White, will you kindly look this over with comments, suggestions and corrections," and signed by the initials "J. H. B." Do you know whose handwriting that is? A. Yes.

Q. Whose is it, please?

A. James H. Buell's handwriting.

Q. Was this piece of paper with writing on it attached to the balance of Defendant's Exhibit 46 for identification when you received it from Mr. Buell?

A. To the best of my knowledge, yes.

Q. Do you recall the approximate time when you received this draft from Mr. Buell? A. No.

Q. Do you know whether or not this particular draft was prepared by Mr. Buell? A. No.

Q. By "No" you mean you do not know?

A. I do not know.

Q. But you know you did receive it, don't you? A. Yes.

Q. Now, with reference to Defendant's Exhibit 47 for identification, from whom did you receive this document, if you recall? From Mr. Buell?

A. No. From Mr. Sandstedt.

Q. Approximately when, if you can recall for us?

A. I couldn't name the date.

White identified all of the handwritten material appearing in Defendant's Exhibit 252 as having been made by him except the pencilled memoranda attached to page 3 reading "Section 13—The term 'Company deficiency in required reserve' with respect to either party shall mean the amount (in kilowatts) by which the 'required reserve' of such party exceeds the 'Company reserve capacity'.", and the 2 sheets appended to page 7 of the exhibit, each bearing on the left end the following printed legend: " 'Beulah Premium Lignite', Knife River Coal Mining Company, Phone 44, Bismarck, N. D."

(Read from deposition.)

Q. Well, how did you come to make all these extensive interlineations on this memorandum? Was that all done at one time or over a period of time?

A. Part of them were put on by me when I was working it over alone, and others were put on in working over the agreement in company with Mr. Sandstedt.

Q. When you say "working over,"—excuse me.

A. (Continuing) Those notations that are in handwritings I cannot identify. I cannot say when and under what circumstances those notations were put on.

Q. When you say "working over it alone" where you have reference to the location, do you mean in Chicago, or Huron, or both places? A. I mean in Chicago.

Q. How about when you were working with Mr. Sandstedt? A. In Chicago.

Q. In Chicago also? A. Yes.

Q. These documents marked respectively Defendant's

Exhibits 46, 47 and 48 for identification, which you have previously testified, were received by you. Were they received by you and considered by you prior to the preparation of the final draft of the 1941 contract between Northwestern Public Service Company and Dakota Public Service Company? A. Yes.

Q. In other words, these show your own work upon the draft, the work done, performed prior to the preparation of the final contract? A. That's correct.

Q. During the fall of 1941 did you at any time have a conversation with Mr. Sandstedt regarding the subject matter of the proposed term contract between Northwestern Public Service Company and Dakota Public Service?

A. Yes.

Q. Do you recall when that conversation occurred?

A. Yes.

Q. Well, when was it, please?

A. Early in September of 1941, at my cottage at Detroit Lakes, Minnesota.

Q. Who was at that conversation besides you and Mr. Sandstedt, if anybody?

A. Mr. Karl Goldsmith, of Pierre, South Dakota.

Q. Who was Mr. Goldsmith, please?

A. Mr. Goldsmith was an attorney who represented both Dakota Public Service Company and Northwestern Public Service Company.

Q. You say represented Dakota Public Service Company? A. Yes.

Q. Was that with your knowledge and approval?

A. Yes.

Q. And you knew of the matters and things in which he represented that company, and the service he performed, in a general way? A. Yes.

Q. Now, will you please describe for us as closely as you can recall it, the substance of that conversation between you, Mr. Goldsmith and Mr. Sandstedt?

A. Mr. Sandstedt, Mr. Goldsmith and I spent an entire afternoon, starting immediately after luncheon and continuing to dinner time, in which we went over a draft of a proposed contract between Dakota Public Service Company and Northwestern Public Service Company for the interchange of capacity, interchange of energy, and the use

of interconnection facilities, and we went over that draft word by word, paragraph by paragraph, with the previously declared intention of putting that agreement into final form.

Q. Is Defendant's Exhibit 47 for identification the draft which you gentlemen worked over at Detroit Lakes in September, 1941, or was the draft which you then [work] over one which was prepared subsequent to Defendant's Exhibit 47 for identification, and which incorporated therein the various interlineations appearing on that exhibit? Can you answer that question?

A. Having failed to find in my files a correct draft of an agreement which I was under the impression I had, I am now unable to state definitely whether the contract to which you refer as Defendant's Exhibit—

Q. 47 for identification.

A. (Continuing) —47 for identification, is a draft over which I had worked with Mr. Sandstedt before our conference at Detroit Lakes, or whether it is the draft that we worked over at Detroit Lakes.

Q. Well, it is either the draft that you worked over with Mr. Sandstedt, and also by yourself, prior to the meeting at Detroit Lakes, or it is the draft which you actually worked upon at that time with Mr. Sandstedt and Mr. Goldsmith? A. That I am prepared to subscribe to.

Q. Now, as the result of the conversations you had at Detroit Lakes, was there a further draft of contract prepared? A. Yes.

Q. And was it at that point satisfactory to you?

A. I don't recall whether the very next draft was in completely satisfactory form or whether the next draft had to go through some additional revision before the final contract was evolved.

Q. Were there any specific provisions or points which you particularly desire to have in that 1941 contract?

A. Yes.

Q. Do you recall which ones they were, or before that I will ask you: Were any of those provisions incorporated in the contract as finally written and executed? A. Yes.

Q. Will you tell us about those provisions, please?

A. There were two important points that I had insisted on. One was the provision that if Dakota was to consent

to the construction of a 7500 kilowatt addition, Dakota should not have to pay for a deficiency in its reserve capacity beyond the point where the reserve system capacity exceeded 25 per cent, even though the system reserve capacity might actually be a much larger per centage. The second point that I caused to be written into that 1941 agreement was a reconsideration back to 1936 of the basis of the $20,000 annual charge for use of interconnection facilities. In the 1936 contract, interconnection contract, which was superseded in 1939—

Q. By the 1939 interconnection contract, is that right?

A. By the 1939 interconnection contract, which was drawn to reflect the effect of the merger, it was provided that Northern Power & Light or Dakota Public Service, as the case might be, should pay an annual charge of $20,000 a year for the use of the interconnection facilities. When Northwestern asked for a ten year term on the 1941 agreement, I insisted that on the formula of 3½ per cent for taxes, maintenance and renewals, and 5 per cent annual interest on the investment in the interconnection facilities, all balance of the $20,000 a year payable under the interconnection contract, or previously paid, subsequent to January 1, 1936, should be applied to the amortization of the 50 per cent portion of the cost of those facilities, allocated to Northern Power & Light Company, or Dakota Public Service Company as the case might be.

Q. In short, you had two particular points that you were insisting on, if I understand your testimony correctly, namely, a limitation of 25 per cent of the company system demand in calculating the reserves, and the changing of the $20,000 a year annual payment for interconnection facilities to an amortization basis so as to pay off one half of the cost of those facilities over a period of time, and from that time on just to pay a maintenance and operating charge? A. That's right.

Q. Now, were those two points on which you insisted incorporated in the contract as finally executed? A. Yes.

Q. I am now looking at a photostatic copy of the 1941 contract, which is Exhibit F to the complaint, and I am looking particularly at Section 2 of Article IV, on page 5, and I note that in the fourth paragraph is provided that: "In case of a 'company deficiency in required reserve

capacity' such deficiency shall be determined by deducting the 'company reserve capacity' from the 'required reserve' for the party having a deficiency, but for billing purposes the '[require] reserve' in kilowatts shall in no event exceed 25% of the 'company system demand.'" Is that one of the provisions that reflects the first of the points which you insisted on, which you just described to us? A. Yes.

Q. Now, also, Mr. White, directing your attention to Section 2 of Article IV, subsection (d) also appearing on page 5, which provides that "Unless otherwise mutually agreed, the company having a 'company excess reserve capacity' agrees hereunder to maintain such capacity in readiness to furnish and supply power to the company having a 'company deficiency in required reserve capacity' up to the amount of such excess (not to exceed 25%)." Does that provision also reflect the point which you insisted upon and which you say was incorporated in the contract?

A. That paragraph 2 (d) was a result of my insistence that the fourth paragraph of Section 2—

Mr. Stafford: Subsection (a).

A. (Continuing) —of subsection (a) be inserted in the contract, and it says in effect that if a deficiency—

Q. Now, referring to Section 3 of Article V, which appears on page 6 of the contract, entitled, "Transmission Line Charges", it provides for payment by Dakota of the sum of $1,666.66 per month commencing January 1, 1936, and continuing through the payment due June 1, 1950, and an additional sum of $1,348.82 on July 1, 1950; and commencing August 1, 1950, and thereafter to the balance of the term, monthly payments of $442.53. Does that provision reflect the other point upon which you have testified to that you insisted upon being incorporated? A. Yes.

Q. Did you personally work on the preparation of this provision of the contract? A. Yes.

Q. With that point in mind? A. Yes.

Q. Mr. White, this Section 3 to which we have just referred, provides that Dakota agrees therein to pay to Northwestern a monthly sum of $1,666.66 commencing January 1, 1936. Do you know whether or not Northwestern has been paid by the Dakota subsidiaries, namely, Northern

Power & Light Company from 1936 to July 1, 1939, and by Dakota Public Service Company from July 1, 1939 to and including July 1, 1941, those monthly charges at that rate?

A. I have.

Q. Do you know whether or not credit was given to Dakota Public Service Company because of such payment on its contractual undertaking expressed in Section 3 of the 1941 contract? A. They did.

Q. Was the 1941 contract submitted to Mr. Scheetz, as counsel for United Public Utilities Corporation, prior to its execution? A. Yes.

Q. Did you submit it to Mr. Scheetz? A. Yes.

Q. Do you recall, Mr. White, when the 1941 contract between Dakota Public Service Company and the Northwestern Public Service Company was executed?

A. January 28, 1942.

Q. Do you recall any particular occurrence or circumstance which delayed the actual execution to the date subsequent to the effective date? The effective date of the contract is July 1, 1941. A. Yes.

Q. Now, will you describe that for us, please?

A. One was a verbal understanding between Mr. Sandstedt and myself, that Northwestern Public Service Company was warranted in proceeding to contract for the purchase of generating equipment for Aberdeen on the basis of my assurance that Dakota Public Service Company would agree to a ten year term for a contract of which only the wording remained to be worked out on a mutually agreeable basis and—

Q. Well, specifically—excuse me.

A. (Continuing) —on the strength of that verbal assurance, there was no need for rush in completing the final written document. The second item in the delay was that The Middle West Corporation was negotiating with Central Electric & Telephone Company for the sale to Central Electric & Telephone Company of common stock of Northwestern Public Service Company.

Q. Were those negotiations pending at or about this period during 1941, until the fall of 1941? A. Yes.

Q. Those are the two items which occur to you presently entering into the delay in the actual execution?

A. That's right.

Defendant's Exhibit 254, which is also referred to as Defendant's Exhibit 49 in White's deposition, was received in evidence. It reads as follows:

Defendant's Exhibit 254.

Dakota Public Service Company
General Offices
Huron, South Dakota
January 9, 1942.

Mr. S. W. White, President,
United Public Utilities Corp.,
20 No. Wacker Drive,
Chicago, Ill.

Dear Sam:

I would like to bring up again the matter of the Interchange Capacity and the Interchange Energy agreements between the Dakota Company and Northwestern.

You will remember this was held in abeyance pending such negotiations as were being carried on for the sale of Northwestern.

I understand that under conditions as they obtain now and present F. P. C. regulations any negotiations have been ended.

It seems to me that the reasons for the renegotiation of the two Interchange contracts between the Dakota Company and Northwestern are again valid and that this contract should now be completed.

We are just at the time when we are re-examining the conditions of capacity charges and failing a new agreement, I assume that these will have to be allocated under the old one.

Yours sincerely,

A. B. SANBORN.

B.
C. C. F. E. Kruesi.

Defendant's Exhibit 255, which is also referred to as Defendant's Exhibit 50 in White's deposition, was received in evidence. It reads as follows:

Defendant's Exhibit 255.

January 13, 1942

Mr. A. B. Sanborn, President,
Dakota Public Service Company,
Huron, South Dakota.

Dear Beck:

Thanks for your letter of January 9th.

I believe your understanding is the same as mine with respect to the Power Interchange Agreement between Northwestern Public Service Company and Dakota Public Service Company.

As I think I have already told you, both verbally and in writing, I have felt all along that these two companies were committed to each other on the general basis of the revised Capacity Interchange Agreement which you drew up, and, you will recall that when you wanted to commit for the purchase of Aberdeen generating equipment, I gave you unqualified assurance that Dakota would execute that contract as soon as it could be expressed in precise wording designed to obviate future misunderstandings.

Now that negotiations with Central Electric and Telephone Company have apparently been terminated, I know of no reason for further delay in the execution of that contract, and, if my memory serves me correctly, even the details of the wording have been mutually agreed on.

I have no idea as to whether Dakota's capacity charges for 1941 or 1942 would be lower under the revised contract than under the old contract, but, regardless of any advantage or disadvantage, it would be my idea that all interchange questions should be settled or adjusted on the same basis as if the contract had been actually exe-

cuted early last summer, when we reached our mutual agreement as to what the revision was to contain.

Very truly yours,

.....

President.

Copy—Mr. F. E. Kruesi.

(Read from deposition)

Q. Mr. White, did you authorize or instruct the officers of Dakota Public Service Company to execute this 1941 contract, Exhibit F to the complaint, on behalf of Dakota Public Service Company?

A. Let me see that last exhibit. I will say that I authorized them, but I did not instruct them.

Q. You knew that the contract was executed by them?

A. Yes.

Q. Did you approve of that procedure and action?

A. Yes.

Q. Do you know whether or not the 1941 contract, Exhibit F to the complaint, was filed with the Federal Power Commission? A. Yes, it was.

Defendant's Exhibit 256, which is also referred to as Defendant's Exhibit 51 in White's deposition, was received in evidence for the purpose of showing communication to White of the matters contained therein and the correspondence between White and Sanborn. It reads as follows:

Defendant's Exhibit 256.

January 30, 1942

Via Air Mail

Mr. A. B. Sanborn, President,
Dakota Public Service Company,
Huron, South Dakota.

Dear Beck:

After you left this afternoon, George Davis called me with a constructive suggestion, i. e., that we should not

antagonize F. P. C. by filing a copy of the new Power Interchange Contract with S. E. C. before it has been filed with F. P. C. He pointed out that the companies have no right to make payments under the new contract until the new contract has been approved by F. P. C. It could also be pointed out however, that had the new contract been actually executed in 1941, the payments made prior to December 31, 1941 would have been exactly the same as the payments under the two predecessor contracts, and that if, for any reason, the new contract should not be acceptable to F. P. C., nevertheless, Exhibit B, regulating payments during 1942, would still be effective as an amendment to the old interchange contract.

I think, however, Mr. Davis' point is well taken and that Dakota and Northwestern should promptly file copies of the new contract with F. P. C. accompanied by a transmittal letter indicating that the new contract was executed on a certain day in January 1942, as of July 1, 1941; that it represents a simplified combination of the two old contracts already on file with F. P. C., without material change in the formula for determining charges, but with an added equitable provision, which might become effective in the future, if either party should desire to make a comparatively heavy addition to its generating capacity.

If on Monday, February 2nd, you should mail your revised contract to F. P. C., then the way would be clear for me to tell S. E. C. about it on February 5th (if necessary) without hedging as to whether the contract has been filed with F. P. C.

Very truly yours,

.....

President.

Copies

Messrs. C. L. Sandstedt
G. Davis

Q. I show you now, Mr. White, a document marked Defendant's Exhibit 51 for identification, purporting to be a carbon copy of a letter dated January 30, 1942, addressed

to Mr. A. B. Sanborn, President, Dakota Public Service Company, and will ask you whether or not that is a true and correct copy of a letter written by you and sent by you to Mr. Sanborn on or about that date? A. It is.

Q. You sent the original or caused the same to be mailed to Mr. Sanborn, on or about January 30, 1942? A. Yes.

Defendant's Exhibit 257, which is also referred to as Defendant's Exhibit 52 in White's deposition, was received in evidence for the purpose of showing receipt thereof by White in due course. It is a copy of the letter of February 2, 1942, to the Federal Power Commission from defendant and Dakota Public Service Company, which letter is included in Plaintiff's Exhibits 32 and 34 and is reproduced herein in plaintiff's case (R. p. 289, supra).

Q. Did you receive this document, Defendant's Exhibit 52 for identification on or about February 2, 1942?

A. Yes.

Q. From whom did you receive the same if you know?

A. From Mr. Sanborn.

(Read from deposition.)

Mr. Stafford: Let the record show I am now showing the witness a carbon copy of the 1941 agreement, dated July 1, 1941, by and between Northwestern Public Service Company and Dakota Public Service Company, being Exhibit F to the [complain.]

Q. You are familiar with this contract, Mr. White?

A. Yes.

Q. I will call your attention to Article 2 on page 3, which provides that "This agreement will become effective on July 1, 1941, and will continue thereafter for a period of ten (10) years, and thereafter unless and until specifically terminated by written notice by registered mail from either party to the other of its intention or desire to terminate this agreement and such notice of termination shall precede the intended and desired date of termination by not less than eighteen months."

At the time that this contract was executed, with your approval, which you have previously testified, were you

satisfied as president of United Public Utilities Corporation, and director thereof, which company owned all of the stock of Dakota Public Service Company, and also as a director of Dakota Public Service Company, of the fairness and justness of that term, and whether the same was proper and in the best interests of Dakota Public Service Company? A. Yes, I was.

Q. Now, is this agreement the one which was negotiated pursuant to the authorization of the U. P. U. Corporation directors at the meeting of April 30, 1941? A. Yes.

Q. Did you so negotiate the contract and put it into final execution, pursuant to that authority? A. Yes.

Q. Now, I direct your attention to page 6 of the same contract, specifically to Article V, Section 1, which provides that the company have a deficiency in required reserve capacity, as defined in the agreement, shall pay the other company having a company excess reserve capacity as defined, a charge of $13.20 per year per kilowatt of such deficiency, one-twelfth of such charge to be due and payable at the end of each calendar month during the term of the contract. At the time of the execution of this contract and the approval of such execution by you, did you, as president of the United Public Utilities Corporation, and director thereof, and also as a director of Dakota Public Service Company, consider this charge of $13.20 per year per kilowatt of deficiency fair, just, reasonable and proper insofar as the Dakota Public Service Company was concerned? A. Yes, I did.

Q. You did consider it to be fair, just, proper and reasonable? A. Yes.

Q. Insofar as Dakota Public Service Company was concerned? A. That's right.

Q. Now, referring to Section 2 of the same Article V, on the same page, where it is provided that "All energy delivered under this agreement shall be billed and paid for at the rate of five-tenths cents per kilowatt hour." Also: "In addition to the energy charge, billing for emergency power may by agreement be surcharged with the additional expense incurred by the delivering part in placing in operation and operating high cost plants for the sole purpose of supplying such emergency power."

Also in the same paragraph it is recited that it is the intent that the delivering company shall not make a profit

on any such emergency power, but will be reimbursed for its additional expense.

It is further recited that it is understood that fuel prices and generating effieiencies may change and may require an adjustment in the energy rate contained in this section.

It is further recited in the same section 2 that in January, 1942, and every year thereafter, the parties should review production costs and if necessary redetermine the energy rate to be charged. Any such revision would be effected by supplement.

Now, Mr. White, this contract was executed on behalf of Dakota Public Service Company, with your approval, and you have previously testified. Were you as president of United Public Utilities Corporation, and as director of that company, and also as a director of Dakota Public Service Company, satisfied that the energy interchange rate of .5 of a cent per kilowatt hour, and the other provisions with respect to rates and charges contained in said Section 2, which I have just recited, were you satisfied that all such rates and charges were just, reasonable, proper and fair insofar as Dakota Public Service Company was concerned? A. I was so satisfied.

Q. Now, directing your attention to Section 3 of the same Article V, again appearing on page 6 of the contract, it is provided there that as Dakota's share of the fixed charges, maintenance and operating expenses incurred by Northwestern in its ownership and operation of the interconnection facilities enumerated in a previous part of the contract, Dakota agrees to pay Northwestern $1,666.66 each month beginning January 1, 1936, and continuing through the payment due June 1, 1950, and additionally $1,348.82 on July 1, 1950, and additionally, commencing August 1, 1950, and continuing monthly thereafter $442.53, providing said transmission line charges are over and above all other charges provided in the contract.

It is also specifically provided therein that Dakota should have no obligation to pay to Northwestern any part of the construction cost of the interconnection facilities enumerated in the contract, or for the use thereof for any period prior to January 1, 1936.

At the time this contract was executed by Dakota Public Service Company, with your approval, as you have previously testified, were you, as president of United Public

Utilities Corporation and as director of that company, and as a director of Dakota Public Service Company, satisfied that the charges provided for in said Section 3 and the provisions thereof, relating to such charges, were fair, reasonable, just and proper, insofar as Dakota Public Service Company was concerned? A. I was so satisfied.

Q. You testified as to your participation rather extensively in the preparation of the various rates and charges embodied in this contract, and specifically with reference to the changes therein from the contracts theretofore in effect. You have also [testify] as to your satisfaction with the continuation of the 5 mill energy interchange rate, the new provisions with reference to transmission line charges, and the continuation of the $13.20 per kilowatt per year of intercapacity charge.

Now, I will ask you, Mr. White, whether your participation and decisions in connection with the matters and things contained in this contract, and specifically with reference to the rates and charges I have just enumerated, were arrived at as a result of your own independent judgment and thinking and free from interference or domination by Northwestern Public Service Company or persons acting for and in its behalf? A. It was.

Q. It was reached as the result of free and independent judgment on your part, and without any [comination] or control by others, specifically on the part of Northwestern or persons acting for and on its behalf? A. That's correct.

Q. Mr. White, as a part of Exhibit F to the complaint there is included another document entitled "Supplemental Agreement" and recites execution of March 13, 1943, between Northwestern Public Service Company and Dakota Public Service Company, and is a part of Exhibit F to the complaint, and comprises the last two pages of that exhibit. Are you familiar with that contract?

A. Yes.

Q. Do you recall how the question of entering into that amendment originated?

A. The question arose when Mr. Sanborn wrote me under date of November 8, 1942, suggesting that the ten year term of the July 1, 1941 contract, which had been agreed on on the basis—

Q. But it did arise through Mr. Sanborn writing you a letter? A. That's correct.

Defendant's Exhibit 258, which is also referred to as Defendant's Exhibit 53 in White's deposition, was received for the purpose of showing the communication to White of the matters contained therein and the correspondence between White and Sanborn. It reads as follows:

Defendant's Exhibit 258.

Dakota Public Service Company,
General Offices,
Huron, South Dakota.

November 18, 1942.

Mr. S. W. White, President,
United Public Utilities Corp.,
20 North Wacker Drive,
Chicago, Ill.

Subject: Interchange Energy and Capacity Contract.

Dear Sam:

In looking over the above contract, you will remember you spoke of it when I met you in Chicago, I find the following to be the case. The contract as written, page 3, article 2, section 1 is effective without recourse from July 1, 1941, for ten years and thereafter subject to eighteen months notice. The contract is a successor and assigns contract.

All of those who are familiar with the drafting of this contract and the reasons the prior contract was inadequate to meet the conditions as they existed in the summer of 1941 will remember that the prime consideration was the protection required at that time by the Northwestern Company for the large investment proposed in additional generating capacity at its Aberdeen plant for the uses of the total system.

Inasmuch as the exigencies of the present emergency have prohibited most of this investment it would seem that each company might desire to be protected against the length of term of the contract until it again becomes possible to make this investment. It is suggested that this might be done by executing a rider or an amendment to

the contract reciting the changes in conditions making this necessary. I would like to call your attention to the fact that in this rider section 3, article 5, page 6, transmission line charges would also have to be taken care of in case of short term cancellation.

If you think it desirable may I suggest that you talk this matter over with Mr. Kruesi as representing the interests of the Northwestern Company in the formulation of this contract?

Yours sincerely,

B. A. B. SANBORN.

Defendant's Exhibit 259, which is also referred to as Defendant's Exhibit 54 in White's deposition, was received in evidence for the purpose of showing the correspondence between White and Sanborn. It reads as follows:

Defendant's Exhibit 259.

December 8, 1942.

Via Air Mail.

Mr. A. B. Sanborn, President,
Dakota Public Service Co.,
Huron, South Dakota.

Dear Beck:

Mr. Peale and I had a conference this morning with Messrs. Kruesi and Purchas, and discussed the terms of the Capacity and Energy Interchange Contract between Dakota Public Service Co. and Northwestern Public Service Co.

I pointed out that the sole reason for incorporation of a 10-year term in the existing contract was to afford reasonable protection to the large additional investment which Northwestern Public Service Co. proposed to make, during 1941, for a 7500 K. W. addition to the generating capacity at Aberdeen. Messrs. Kruesi and Purchas agreed that the facts were as per my representation, and that

since Northwestern has been forced to abandon the proposed addition to Aberdeen generating capacity, it is desirable, for both Northwestern and Dakota, to amend the existing contract by making it cancellable at any time, by either party, on eighteen months written notice.

It was also agreed between us that inasmuch as the terms of the first paragraph of Section 3 of Article V of the Interchange Contract were evolved in connection with a 10-year term for this inter-company agreement, any amendment to the contract, whereunder the term might be shortened, should contain an equitable provision obligating Dakota (upon cancellation of the contract by Dakota) to pay to Northwestern any balance of one-half of Northwestern's investment in the interconnection facilities that, at such date of cancellation, may remain unamortized through payments made by Dakota under Section 3 of Article V prior to the effective date of such cancellation.

You will note that the agreement reached at our meeting here today concurs in every respect with the views expressed in your letter to me under date of November 18th.

Will you prepare a draft of a rider or amendment to the contract designed to give effect to the above.

Very truly yours,

.....

President.

Copies for:
Messrs. F. E. Kruesi,
R. W. T. Purchas.

(Read from deposition:)

Q. I note that in Defendant's Exhibit 54 for identification you requested Mr. Sanborn to prepare a draft of the rider or amendment to the 1941 contract designed to effectuate the matters and things therein set forth in your said letter. Did Mr. Sanborn prepare any such draft?

A. Yes.

Q. And did he [sent] it to you? A. Yes.

Defendant's Exhibit 260, which is also referred to as Defendant's Exhibit 55 in White's deposition, was received in evidence for the purpose of showing the communication between Sanborn and White and the information furnished to White. It reads as follows:

Defendant's Exhibit 260.

Dakota Public Service Company
General Offices
Huron, South Dakota

December 11, 1942

Mr. S. W. White, President
United Public Utilities Corporation
20 North Wacker Drive
Chicago, Ill.

Interchange Capacity and Energy Contract.

Dear Sam:

In regard to your letter of December 8, we immediately drew up roughly what we thought would take care of the situation and submitted the draft to Karl Goldsmith. This, he has returned this morning with his suggestions and we are now submitting to you herewith for your consideration, our suggested Amendment.

You will note that we have made the cancellation option an either party option. This seems to me to keep the whole agreement on a bilateral plane which is very much to be desired. You will recognize that in case of cancellation, while by all agreements the line remains the property of Northwestern, each party loses its share of useful investment in the line and Northwestern also foots the full cost of dismantling the interconnection facilities.

For your information the principal sum as set up in the contract is now reduced to approximately $93,000.00. I can't help but expressing the hope that conditions will not make necessary the use of this cancellation privilege.

If, on the other hand, either party does avail themselves of this privilege it seems to me that under the contract and this Amendment each party will be as well protected as it is possible to make them.

Yours sincerely,

A. B. SANBORN

B.
Encl.

(Read from deposition:)

Q. I will show you a document that has been previously marked for identification as Defendant's Exhibit 38 for identification, and ask you to examine the same and tell me whether or not that is the draft which you received from Mr. Sanborn with his letter of December 11, 1942?

A. It is.

Q. You recognize it to be such? A. Yes.

Q. Upon receipt of that draft from Mr. Sanborn, what did you do in regard thereto, if anything?

A. I attempted to revise it by myself.

Q. That is, you made attempts, acting personally, to make revisions of the draft which you received?

A. Yes. To put it in condition with which I would be satisfied.

Q. Were you successful in your endeavor?

A. No, I was not.

Q. And what did you do then, if anything?

A. I wrote my counsel, Mr. Scheetz, to help me out.

Q. Do you remember when?

A. Under date of December 29, 1942.

Defendant's Exhibit 261, which is also referred to as Defendant's Exhibit 37 in White's deposition, was received in evidence for the purpose of showing the communication between White and Scheetz. It reads as follows:

Defendant's Exhibit 261.

United Public Utilities Corporation
902 Market Street, Wilmington, Delaware

Chicago Office
20 North Wacker Drive.

Chicago, December 29, 1942.

Mr. Francis H. Scheetz,
Evans, Bayard & Frick,
1335 Land Title Bldg.,
Philadelphia, Pa.

Dear Francis:

In addition to the agreement for allocation of expenses of the Joint General Office at Huron, Dakota Public Service Co. and Northwestern Public Service Company operated as a single system for several years prior to July 1941 under two contracts:

1. A contract under which Dakota paid Northwestern an annual rental charge of $20,000 on the interconnection facilities built, owned and maintained by Northwestern. In the event of cancellation on one year's notice, Dakota was committed to pay one-half the cost of the inter-connection facilities, plus one-half the cost of removing and storing them.

2. A contract for interchange of generating capacity and energy under which the company having the smaller percentage of reserve capacity paid to the other company a capacity charge of $1.10 a month per kilowatt for the latter's excess reserve capacity.

When, in the Spring of 1941, it was agreed between Dakota and Northwestern that Northwestern should spend $750,000 for additional generating capacity at Aberdeen, the two above-mentioned contracts were replaced by a single new contract as of July 1, 1941, for a minimum period of ten years and thereafter cancellable on eighteen months notice. The sole reason for the ten-year term was to afford adequate protection to the large investment

which N[redacted] the benefit of

[redacted] contracts for the Aberdeen addition, [redacted] found that on account of the War situation, delivery of the equipment could not be obtained, and the planned addition has been abandoned for the time being.

It has, therefore, been mutually agreed between Northwestern, Dakota, Middle West and myself, that, in view of the underlying spirit of the agreement of 1941, the present agreement should be amended to make it cancellable, at any time, by either party on eighteen months notice.

It so happens, however, that in incorporating into the July 1941 agreement a modification of the old agreement for rental of the interconnection facilities (agreement numbered 1 above) Section 3, Article V of the New Agreement was so worded that a complete cancellation, prior to July 1950, would work unjustifiable hardship on Northwestern.

In formulating the terms of the original 1936 Agreement on interconnection facilities for which Northwestern had spent an estimated $325,000, it was agreed that on one-half that amount Dakota should pay annual rental at the rate of 12½% gross to cover operation, depreciation, maintenance, taxes, insurance and investment return. This understanding resolved itself into a flat annual rental of $20,000.

In drawing the 1941 agreement, the understanding was modified to the extent of recognizing that the $20,000 annual payments would, in due course, completely extinguish Dakota's one-half of the investment and that, thereafter, Dakota should be obligated to pay only 50% of the operating, maintenance, and taxes. An exact computation was made of Northwestern's investment in the joint interconnection facilities and it was agreed that Dakota's payments of $1,666 a month should apply, first, to ½ the cost of operation, maintenance, taxes, and insurance; and, second, to the payment of 5% interest on (the unamortized portion of) one-half of Northwestern's investment; and, third, the unused balance of such monthly payments was to be applied to the amortization of the

principal of (Dakota's one-half of) the investment. On that basis, Dakota's monthly payments, which began January 1, 1936, will have amortized one-half the entire investment by June 1, 1950 except for a small balance of nine hundred odd dollars, and, thereafter, Dakota is obligated to pay only one-half the estimated cost of operating and maintaining the facilities. Because of such complete amortization, no provision was made for sharing the expense of removing and storing the materials inasmuch as they would be Northwestern's property even though Dakota would have paid one-half the cost.

In amending the present contract to make it cancellable at any time on eighteen months notice, we would like to word the amendment so that Northwestern will be fairly treated with respect to any unamortized balance of Dakota's responsibility for one-half of Northwestern's investment in the interconnection facilities.

The enclosed draft, prepared in Huron, appears to me rather inadequate not only because of its clumsy wording but, particularly, in paragraph (2) which refers to amortization of principal since January 1, 1936. Such amortization is not mentioned in Section 3, Article V of the Contract, although it is the basis of the calculation of the terms stipulated in that section.

Would you care to draft a form of amendment of the capacity and energy interchange contract?

Very truly yours,

SAMUEL W. WHITE.
President.

Encl.

Defendant's Exhibit 262, which is also referred to as Defendant's Exhibit 38 in White's deposition, was received in evidence for the purpose of showing the information made available to White and the communication thereof by White to Scheetz. It consists of a copy of the draft of "Modification of Capacity and Energy Interchange Contract" between defendant and Dakota Public Service Company.

Q. I show you a document previously marked for identification as Defendant's Exhibit 37, and I will [as] you whether or not that is the letter to Mr. Scheetz, to which you just referred? A. Yes.

Q. That is your signature on page 3, Mr. White?

A. This is the original of that letter, bearing my signature.

Q. That is your signature? A. That is my signature.

Q. Referring once more to the document previously marked for identification as Defendant's Exhibit 38, is that the draft that you forwarded to Mr. Scheetz with your letter of December 29, 1942?

A. I sent him a copy of that draft of an agreement. I cannot say positively that that is the copy.

Q. Well, I note that in your letter to him you said, "The enclosed draft, prepared in Huron"? A. That's correct.

Q. You have testified that this is the draft which you received from Mr. Sanborn?

A. Yes, but I had more than one copy of that draft.

Q. Well, would it fair to say this is a copy of the draft that you received from Huron, from Mr. Sanborn?

A. That's correct.

Q. It might be the original, but it might be a copy?

A. That's right.

(Read from deposition)

Q. You have said you sent the contract over to Mr. Scheetz and dumped it in his lap. Did you receive any reply from him with reference to the contract? A. Yes.

Q. Do you recall the approximate date?

A. Under date of January 11, 1943.

Defendant's Exhibit 263, which is also referred to as Defendant's Exhibit 56 in White's deposition, was received in evidence to show the correspondence between Scheetz and White. It reads as follows:

Defendant's Exhibit 263.

Law Offices of
Evans, Bayard & Frick
1335-43 Land Title Building
Philadelphia

January 11, 1943.

Dakota Interchange Agreement

Dear Sam:

Enclosed is a draft of Supplemental Agreement designed to cover the point made in your letter of December 29,

1942. There are two possible approaches to the question, and the equitable answer depends on the basis for the computation of the monthly payments of $1666. provided for in Article V, Section 3.

In your letter you state that these monthly payments were designed to apply first to one-half the cost of operation, maintenance, taxes and insurance, second to the payment of 5% interest on the unamortized portion of one-half of Northwestern's investment, and third to the amortization of one-half the investment. Apparently it has been assumed that the cost of operation, maintenance, taxes and insurance will be constant throughout the period of amortization, and one could take the position that whatever the future experience may be as to these costs, at any rate the one-half of the unamortized balance of the investment will be deemed to have been amortized at the end of the period.

The draft submitted by the Company opens the door to an argument in this respect. Clause (2) states that on termination there shall become due Northwestern the sum of $151,724.63 less such payments as may have been made under the contract and prior contracts since January, 1936, on the principal cost of the inter-connection facilities. If the priorities stated in your letter are correct then an increase in cost of operation would decrease the amount paid toward amortization. If this is the intent, all well and good, but otherwise I think the formula for determining the amount paid toward amortization should be specific.

Paragraph 3 of the enclosed draft amending Article V, Section 3, follows the pattern of the Company draft, but, obviously from the foregoing discussion I do not consider it adequate. My first thought was to pro rate the amortization in the ratio of the number of months between January 1, 1936, and the date of termination to the total number of months from January 1, 1936, to July 1, 1950, plus the payment to be made on July 1, 1950, but I have not made this approach because I did not know whether it reflected the equity and because obviously there is an algebraic formula underlying the present arrangement.

In Article I, Section 14, there is a definition of the term of the agreement which is eliminated by the enclosed draft

because it is now inappropriate and also because any references to the term of the agreement are now self evident. You will note that the enclosed draft makes the agreement terminable only at the end of a calendar month. I thought this would avoid a lot of arithmetic, but I am not sure about this in the light of Article I, Section 4, which states that meter readings are to be taken as nearly as practicable on the 25th day of each month; Article I, Section 7, which provides that the maximum demand shall be determined with respect to the calendar year; Article V, Section 1, which pro rates certain payments every calendar month; and Article IX, which provides for the rendition of bills on the 5th day of the calendar month and refers to monthly bills, meaning the billings based on meter readings taken on the 25th day.

Very truly yours,

FRANCIS SCHEETZ

FHS:HM

Enclosures

Mr. S. W. White, President,
United Public Utilities Corporation,
20 North Wacker Drive,
Chicago, Illinois.

Defendant's Exhibit 264, which is also referred to as Defendant's Exhibit 57 in White's deposition, was produced and identified by White. It was received in evidence for the purpose of showing the work done by United Public Utilities Corporation officers in the preparation of the 1943 amendment to the 1941 Agreement. It reads as follows:

Draft
FEB 1/11/43

SUPPLEMENTAL AGREEMENT made January , 1943, between NORTHWESTERN PUBLIC SERVICE COMPANY (Northwestern) and DAKOTA PUBLIC SERVICE COMPANY (Dakota).

There exists between the parties an Agreement, dated July 1, 1941, (herein called Basic Agreement) relating to interchange capacity and energy, which Agreement supersedes two prior agreements known as Inter-Change Contract and Inter-Change Capacity Agreement, both dated July 1, 1939. Northwestern owns certain inter connection facilities which are described in the Basic Agreement and at January 1, 1936, ~~the unamortized balance of~~ Northwestern's investment in these inter connection facilities was $303,449.26. The Basic Agreement is for a minimum term of ten years and thereafter until terminated by either party on 18 months prior written notice and provides that Dakota shall pay Northwestern the sum of $1666.66 per month for the period January 1, 1936, to June 30, 1960, inclusive, the sum of $1,348.82 on July 1, 1950, and beginning August 1, 1950, the sum of $442.53 per month. The foregoing payments made and to be made by Dakota represent the agreed amount required fully to amortize by July 1, 1950, a one-half share or $151,724.63 of ~~the~~ aforesaid ~~unamortized balance of~~ Northwestern's investment with interest at 5% per annum on the unamortized portion of the one-half share and also the amount to be contributed by Dakota to the cost of operation, maintenance and other charges applicable to the inter connection facilities. Whereas the two prior agreements were for indefinite terms subject to termination on specified notice, the Basic Agreement provided a minimum term in order to afford Northwestern a measure of protection with respect to proposed installation of additional generating capacity at its Aberdeen Plant, a project which Northwestern has

Defendant's Exhibit 264.

been compelled to abandon because of war conditions. Inasmuch as the underlying consideration for the minimum term no longer exists, the purpose of this Supplemental Agreement is to eliminate the minimum term and otherwise protect Northwestern with respect to ~~the~~ any unamortized ~~one-half~~ one half of balance of its investment in the interconnection facilities.

Accordingly the parties mutually agree as follows:

1. Article I, Section 14, is hereby eliminated.

2. Article II, Section 1 of the Basic Agreement is hereby amended to read as follows:

"This Agreement will become effective on July 1, 1941, and shall continue thereafter unless and until terminated by written notice by registered mail from either party to the other party terminating the agreement. The Agreement may be terminated only at the end of a calendar month and the written notice shall precede the termination date by not less than 18 months".

3. Article V, Section 3, of the Basic Agreement is hereby amended by the addition of the following paragraph:

"In event of the termination of this Agreement by either party pursuant to Article II, Section 1, hereof, then the obligation of Dakota to make further monthly payments under this Section 3 shall cease, but Dakota shall pay Northwestern at the termination date the unamortized ~~one-half~~ one half balance of Northwestern's investment in the inter connection facilities, that is the sum of $151,724.63 less such payments as may have been made

on account thereof under this Section 3 and under prior agreements described in Article X below.".

4. Subject to the amendments herein prescribed the Basic Agreement shall continue in full force and effect as therein provided.

IN WITNESS WHEREOF the parties hereto have caused this Agreement to be executed by their duly authorized officers and impressed with their respective corporate seals this day of 1943.

Q. I will ask you whether or not that is the draft which you received from Mr. Scheetz with his letter of January 11, 1943? A. Yes.

Q. Will you please look at the document and tell me whether or not it is in the same condition as when you received it, excluding the reporter's symbols and the perforation holes at the top? A. No.

Q. What are the changes therein, or differences?

A. I have edited it and marked changes in pencil delineations.

Q. Are all of these pencil interlineation and delineations on the first page, and I notice some here on the second page, none on the third, are all of those in your handwriting? A. Yes.

Q. And you made them on this document? A. Yes.

Q. Personally? A. Yes.

Q. After receipt of it from Mr. Scheetz?

A. That's right.

Q. Did you make any reply to Mr. Scheetz' letter of January 11, 1943? A. I did.

Q. Do you recall the date? A. No.

Q. To refresh your recollection I will show you what defendant previously marked for identification Defendant's Exhibit 39, and ask you whether or not that refreshes your recollection? A. It does.

Q. Referring to the document, is that your signature, Mr. White? A. Yes.

Q. And you sent this to Mr. Scheetz on or about January 14, 1943, or caused the letter to be mailed to him?

A. Yes.

Defendant's Exhibit 265, which is also referred to as Defendant's Exhibit 39 in White's deposition, was received in evidence for the purpose of showing the correspondence between White and Scheetz and their work in connection with formulating the 1943 amendment. It reads as follows:

Defendant's Exhibit 265.

United Public Utilities Corporation,
902 Market Street, Wilmington, Delaware.

Chicago Office:
20 North Wacker Drive.

Chicago.
January 16, 1943.

Mr. F. H. Scheetz,
Evans, Bayard & Frick,
1335 Land Title Bldg.,
Philadelphia, Pa.

Dear Francis:

Thanks for your letter of January 11th, with draft of Amendment to the Capacity and Energy Interchange Contract between Dakota and Northwestern.

In my original letter requesting this draft, I failed to mention in that connection that the general understanding between the companies that Northwestern shall own, and pay all costs of operating, the interconnection facilities. Dakota is to pay a flat monthly charge at the rate of 3½% per annum on $151,724.63 (one-half of Northwestern's investment). This computes out at $442.53 a month.

It seems to me that your draft fills the bill admirably, so I have sent it to Mr. Sanborn for his review and suggestions. I have noted a few possible changes of which the only one worth mentioning is the re-wording of the fourth sentence on Page 1, as follows:

> The foregoing payments made and to be made by Dakota represent the agreed amount required to fully amortize by July 1, 1950, a one-half share or $151,724.63 of the aforesaid Northwestern's investment

with interest in the interim at 5% per annum on the unamortized portions of the one-half share and also the monthly amount of $442.53 to be contributed by Dakota to the cost of operation, maintenance, taxes, insurance, and all other charges applicable to the inter-connection facilities.

I will consult you on any further changes that may be suggested by Dakota.

Very truly yours,

SAMUEL W. WHITE,
President.

Q. Did you write to Mr. Sanborn? A. Yes.
Q. Did you write to Mr. Sanborn in connection with the draft which you received from Mr. Scheetz? A. Yes.

Defendant's Exhibit 266, which is also referred to as Defendant's Exhibit 58 in White's deposition, was received in evidence for the purpose of showing the correspondence between White and Sanborn in regard to the 1943 amendment. It reads as follows:

Defendant's Exhibit 266.

January 16, 1943

Mr. A. B. Sanborn, President,
Dakota Public Service Co.,
Huron, South Dakota.

Dear Beck:

In conformity with the suggestion in my letter to you under date of December 8, 1942, you sent me recently a draft of a proposed Amendment to the Capacity and Energy Interchange Contract, dated July 1, 1941, between Northwestern Public Service Company and Dakota Public Service Company. While your draft of that amendment

reflected fully the spirit of our verbal understanding in the matter, I felt that it was inadequate in its wording, particularly, because it failed to indicate a formula on which the charges mentioned in Article V, Section 3 of the July 1, 1941 Agreement had been computed. I did not have much success in my own attempts to revamp your draft of an amendment, so I asked Mr. Scheetz to tackle the job on the basis of my representation of that formula.

The result of Mr. Scheetz's first effort is hereto attached. If you find that in general this form of amendment to the agreement will serve more adequately as a clear outline of procedure in event of cancellation of the Agreement prior to July 1, 1950, then please make any and all suggestions that occur to you for the improvement of this draft and, particularly, examine the accuracy of all dollar amounts mentioned in the amendment.

When you return a revised draft including your suggestions for further changes, I will refer it to Mr. Scheetz so that he can check it over finally and to Mr. Kruesi and Mr. Ralph Stevenson, so that they can also formulate a positive opinion as to the fairness, adequacy and acceptability of the Amendment.

Very truly yours,

.....

President.

Encl.

(Read from deposition)

Q. Did you send to Mr. Sanborn a copy of Mr. Scheetz' draft with that letter? A. I sent the original.

Q. You sent the original, which had been received by you from Mr. Scheetz? A. Yes.

Q. Did you receive any reply from Mr. Sanborn to your letter of January 16? A. As I recall, I did.

Defendant's Exhibit 267, which is also referred to as Defendant's Exhibit 59 in White's deposition, was received in evidence for the purpose of showing White's participation in the formulation and development of the 1943 amendment. It reads as follows:

Defendant's Exhibit 267.

Dakota Public Service Company
General Offices
Huron, South Dakota

January 18, 1943.

Mr. S. W. White, President,
United Public Utilities Corp.,
20 North Wacker Drive,
Chicago, Ill.

Subject: Amendment—Capacity and Energy Contract.

Dear Sam:

In reply to your letter of January 16, Sandy and I have gone over Scheetz' draft of the Amendment and to the best of our knowledge it covers the situation well.

Inasmuch as this carries Mr. Scheetz' trademark which we all have confidence in, we don't see the necessity of sending it out to Karl for his O. K. There is only one thing that occurs to me in all of this, and that is, that after the passing of the present emergency Northwestern will undoubtedly proceed with its Aberdeen extension after consultation with you and will then not be protected by a reasonable term agreement. On the other hand, the necessity of the moment seems to be to meet first things first, and it is difficult to figure out how we can take care of adequately in one agreement the two contingencies we are thinking about.

I have the feeling however, that as far as possible we should get away from bombarding F. P. C. with amend-

ments to this agreement although I realize that this amendment has to be filed with them.

Yours sincerely,

A. B. SANBORN.

B.

(Read from deposition)

Q. On or about January 25, 1943, did you send a copy of the draft received by you from Mr. Scheetz to Mr. F. E. Kruesi? A. Yes.

Defendant's Exhibit 268, which is also referred to as Defendant's Exhibit 60 in White's deposition, was received in evidence for the purpose of showing the communication, knowledge and exchange of ideas between White and Kruesi in connection with the formulation of the 1943 amendment. It reads as follows:

Defendant's Exhibit 268.

January 25, 1943.

Mr. F. E. Kruesi,
Middle West Service Company,
20 N. Wacker Drive,
Chicago, Illinois.

Dear Frank:

Enclosed find draft of a proposed amendment to the Capacity and Energy Interchange Agreement, dated July 1, 1941, between Northwestern Public Service Company and Dakota Public Service Company.

I believe there is complete agreement between you and me and the operating management of these two companies, as to the fairness of an amendment to the term of that 1941 contract; and I am willing to admit, without argument, that at or before the termination of that contract, Northwestern is entitled to receive from Dakota payments sufficient to amortize one-half Northwestern's investment in

the interconnection facilities, plus interest and operating expenses from January 1, 1936 to date of termination.

The only point remaining for discussion, therefore, is as to whether the enclosed draft of an amendment is in proper form to reflect adequately the existing verbal agreement. I have submitted it to Mr. Sanborn and he considers it satisfactory, but I would like to have you look it over and have it checked by your Legal Department, with a view to incorporating any changes which you may consider necessary or desirable before the two operating companies adopt it as an Amendment.

Very truly yours,

.....

President.

Encl.

Copy to
Mr. A. B. Sanborn, Pres.,
Dakota Public Service Co.,
Huron, So. Dakota.

Q. You say, Mr. White, that you did enclose a copy of the draft received from Mr. Scheetz with your letter to Mr. Kruesi? A. Yes.

Q. Do you recall whether or not you endorsed thereon the same corrections in your handwriting as appear on the copy of the draft, the same date, which is marked Defendant's Exhibit 57 for identification? A. Yes, I did.

Q. Mr. White, you have identified a letter to you from Mr. Sanborn, dated January 18, 1943, marked Defendant's Exhibit 59 for identification. Did you make any reply to that letter? A. Yes.

Defendant's Exhibit 269, which is also referred to as Defendant's Exhibit 61 in White's deposition, was received in evidence for the purpose of showing the work done by White and Sanborn in the formulation of the 1943 amendment. It reads as follows:

Defendant's Exhibit 269.

January 25, 1943.

Mr. A. B. Sanborn, President,
Dakota Public Service Co.,
Huron, South Dakota.

Re.: Capacity & Energy Interchange Agreement.

Dear Beck:

I don't believe we ought to worry right now about possible future changes in that inter-company contract. As you say, our first job is to adjust the contract to the revised conditions arising out of Northwestern's inability to build a planned addition at Aberdeen.

Under the conditions and prospects prevailing in the Spring of 1941, the present contract was soundly and equitably conceived, and I have no reason to suppose that a future reversion to such a building program under comparable conditions and with similar outlook, would not afford the basis for restoring a definit and longer term in that July 1, 1941 contract.

It is, of course, unfortunate that we have to report these formal adjustments to F. P. C. but that is the order of the day, and in view of the fundamental soundness of the intercompany position which we are maintaining, I anticipate that the filing with F. P. C. of this Amendment, and other possible future amendments, will produce no major difficulties, but may irritate us.

Very truly yours,

.....

President.

(Read from deposition:)

Q. Did you at any time, Mr. White, take up the question of the proposed 1943 amendment to the 1941 contract, with the directors of United Public Utilities Corporation?

A. Yes.

Q. Do you recall approximately when that occurred? Was it at the meeting held,—excuse me. Go ahead.

A. Held at the meeting of February 3, 1943.

Mr. Stafford: Now, pursuant to stipulation heretofore made concerning offering into evidence portions of minutes of the United Public [Utilties] Corporation directors meetings, I am reading commencing on page 4 and going over to page 5 of the minutes of a regular meeting of that board of directors, held in Philadelphia on February 3, 1943, as follows:

> "The president read and explained to the directors a proposed supplemental agreement amending the capacity and energy interchange contract between Dakota Public Service Company and Northwestern Public Service Company, dated July 1, 1941, which had been previously approved by the Board of Directors on behalf of the corporation as the owner of all the capital stock of Dakota Public Service Company. The president explained that the present agreement was predicated on the proposed installation by Northwestern Public Service Company of additional generating capacity at its Aberdeen plant, and that it has been necessary to abandon the proposed installation because of war conditions and that, therefore, he was of the opinion that it was preferable to amend the agreement so that it could be terminated at any time on 18 months notice. He stated that both the officers of Northwestern Public Service Company and Middle West Corporation (which has a controlling interest in Northwestern Public Service Company) have indicated that they regarded this proposal as fair under the circumstances, and that he believed that such an amendment could be obtained.
>
> "After discussion, and on motion duly made and seconded, the following resolution was adopted by the

affirmative vote of Messrs. Nichols, Lakin, Zech and White, with Mr. Barroll opposed:

"Resolved, That the Board of Directors, acting on behalf of United Public Utilities Corporation as the owner of all the outstanding capital stock of Dakota Public Service Company hereby approve the proposal for the amendment of the capacity and energy interchange contract between Dakota Public Service Company and Northwestern Public Service Company, dated July 1, 1941, substantially in the form set forth in a draft of Supplemental Agreement as submitted and read to the meeting, and that the president of this corporation is authorized to recommend the consummation of the supplemental agreement to the Board of Directors of Dakota Public Service Company."

The foregoing portions of minutes were received in evidence.

Q. Mr. White, you were present at the meeting of the directors, regular meeting of the directors of United Public Utilities Corporation on February 3, 1943? A. Yes.

Q. Had you taken up the matter prior to this meeting with either Northwestern Public Service Company [of] Middle West Corporation? A. Yes.

Q. What did you tell your board?

A. I told them that the whole subject had been discussed and reviewed between me and Mr. Kruesi, and that we were agreed as to the fairness and desirability of an amendment along the lines of the form which I read to that meeting.

Q. That Mr. Kruesi said it was agreeable from the Middle West and Northwestern point of view, is that what you told your board?

A. Yes, except that when Mr. Kruesi made that statement he was making it subject to such comments as Mr. Stevenson might make upon review of the draft.

Q. Did the resolution leave the exact form of agreement open? A. Yes.

Q. That I suppose was in line with Mr. Kruesi's desire to [aubmit] it to Mr. Stevenson?

A. In line with the custom of the board in leaving leeway in its resolutions to the president and general counsel of United Public Utilities Corporation.

Q. That was the general custom of the U. P. U. Corporation board? A. Yes.

Q. Do you know whether or not the contract was submitted by Mr. Kruesi to Mr. Stevenson?

A. Yes, I know that it was.

Q. Did Mr. Stevenson suggest any amendment or did he accept the document as submitted to him, if you know?

A. He suggested an amendment.

Q. Was that amendment submitted to you? A. Yes.

Q. What did you do in regard thereto?

A. I referred it to Mr. Scheetz.

Q. Did you receive any expression of opinion from Mr. Scheetz in regard to the suggestions of Mr. Stevenson?

A. Yes.

Q. In what form did he give that expression, orally or in writing? A. In a letter.

Defendant's Exhibit 270, which is also referred to as Defendant's Exhibit 40 in White's deposition, was received in evidence for the purpose of showing the correspondence between Scheetz and White and the consideration given by them in connection with the 1943 amendment. It reads in part as follows:

Defendant's Exhibit 270.

Law Offices of
Evans, Bayard & Frick
1335-43 Land Title Building
Philadelphia

March 5, 1943.

Supplemental Agreement—Dakota Public Service Company and Northwestern Public Service

Dear Sam:

Mr. Stevenson's memorandum to Mr. Krusei, dated February 11, 1943, is certainly very apt, and I accept his amendment with thanks. While it is entirely clear from the preamble of my draft that the interest is to be covered,

my revision of Article V, Section 3, certainly would short-change Northwestern.

Enclosed are five copies of the revised agreement—two of which are counterparts for execution. After they have been executed will you please have the other three copies conformed and return one for our files.

Very truly yours,
FRANCIS SCHEETZ.

FHS:HM

Enclosures

Mr. S. W. White, President,
United Public Utilities Corporation,
20 North Wacker Drive,
Chicago, Illinois.

P. S. Your letter of January 25, 1943, to Mr. Kruesi, and Mr. Stevenson's memorandum of February 11, 1943, are returned herewith.

Defendant's Exhibit 270-A, which is also referred to as Defendant's Exhibit 40-A in White's deposition, was introduced in evidence to show the correspondence between Scheetz and White and the consideration given by them in connection with the 1943 amendment. It reads as follows:

Defendant's Exhibit 270-A

Supplemental Agreement—Dakota Public Service Company
Northwestern Public Service Company
February 11, 1943.

Mr. F. E. Kruesi
Mr. R. D. Stevenson

I return Mr. White's letter of January 25th and draft of supplemental agreement to the existing agreement dated July 1, 1941, between Northwestern Public Service Company and Dakota Public Service Company.

It seems to me that the supplemental agreement is in satisfactory form with possibly the following exceptions:

From the recitals made in the draft of supplemental agreement apparently one-half of Northwestern's investment in the interconnection facilities referred to was $151,724.63 as of January 1, 1936, and the monthly payments provided for in the agreement which is being supplemented amortized this amount *together with interest at five per centum per annum on the unamortized balances of the above amount,* provided those payments were continued to the dates mentioned in the existing agreement, and the monthly payments provided for in the existing [agrement] also covered a monthly payment of $442.53 which is Dakota's contribution to the cost of operation, maintenance, taxes, etc.

If the foregoing be correct, it seems to me that the changes indicated on page 2 of the draft of supplemental agreement should be made if the supplemental agreement is to cover fully and with exactitude the payments that should be made at the termination date of the basic agreement should it be terminated under the provisions of the proposed supplemental agreement. These proposed changes simply provide for the inclusion of interest at 5% of unpaid balances of one-half of Northwestern's investment in calculating the amount to be paid at the termination date; and provide for the payment at that time of any of the $442.53 monthly payments payable before the termination date should any of them be then in default. I assume that this was the intention of the draft as submitted.

RDS/MG RALPH D. STEVENSON.

Q. I will show you a document previously marked for identification as Defendant's Exhibit 40, and ask you whether or not that is the letter to which you have just referred? A. Yes.

Q. Did you receive that letter from Mr. Scheetz on or about the date it bears, to-wit: March 5, 1943? A. Yes.

Q. That is Mr. Scheetz' signature? A. Yes.

Q. I also show you a document previously marked Defendant's Exhibit 40-A for identification and ask you whether or not that is a copy of the memorandum submitted by Mr. Ralph D. Stevenson? A. It is.

Q. In looking at Defendant's Exhibit 40 for identification I note that it is stated that Mr. Scheetz sent to you five copies of the revised agreement, two of which were counterparts, for execution. Did you receive those copies from Mr. Scheetz? A. Yes.

Q. What did you do with them, if anything?

A. I mailed them under cover—to Mr. Sanborn, under cover of a letter dated March 8, 1943, of which I sent a copy to Mr. Kruesi.

Defendant's Exhibit 271, which is also referred to as Defendant's Exhibit 62 in White's deposition, was received in evidence for the purpose of showing the correspondence between White and Sanborn in connection with the 1943 amendment. It reads as follows:

Defendant's Exhibit 271.

March 8, 1943.

Mr. A. B. Sanborn, President,
Dakota Public Service Co.,
Huron, South Dakota.

Dear Beck:

Admittedly, I have procrastinated unduly in putting into final form the draft of the proposed Amendment to the Capacity and Energy Interchange Agreement.

Enclosed, are five copies of the latest agreement—two of which are Counterparts for execution. After these two have been executed by Northwestern Public Service Company and Dakota Public Service Company, will you please have the other three copies conformed, and return one copy to Mr. Kruesi and the other two copies to me.

This final draft of the Amendment represents an improvement over the preliminary draft which you returned to me. The effect of the Amendment has not been changed in any way but, thanks to the suggestions of Mr. Ralph

Stevenson and Mr. Frank Kruesi, the wording of one or two provisions has been slightly changed and these changes have been readily accepted by Mr. Scheetz and by me. You have full assurance, therefore, that this Amendment, in the enclosed form, has been carefully considered here and bears the stamp of approval of United Public Utilities Corporation as well as the approval of Messrs. Kruesi and Stevenson.

Very truly yours,

.....

President.

Copy to:

Mr. F. E. Kruesi, Pres.,
Middle West Service Co.,
Chicago, Illinois.

Defendant's Exhibit 272, which is also referred to as Defendant's Exhibit 63 in White's deposition, was received in evidence for the purpose of showing the activity of White and Sandstedt in connection with the development of the 1943 amendment. It reads as follows:

Defendant's Exhibit 272.

Dakota Public Service Company
General Offices
Huron, South Dakota

March 13, 1943

Mr. S. W. White, President,
United Public Utilities Corporation,
20 North Wacker Drive,
Chicago, Illinois.

Dear Mr. White:

I am returning herewith two (2) executed copies of the Amendment to the Capacity and Energy Interchange Agreement.

We are furnishing Mr. Kruesi with a copy of this Amendment. It will be necessary that this agreement be

filed with the Federal Power Commission and we will also take care of this.

Yours very truly,

C. L. SANDSTEDT,

Vice President & Treasurer.

CLS/c

Encl.

cc: FE Kruesi

Defendant's Exhibit 273, which is also referred to as Defendant's Exhibit 64 in White's deposition, was received in evidence for the purpose of showing the correspondence and activity between White and Sandstedt in connection with the 1943 amendment. It reads as follows:

Defendant's Exhibit 273.

March 23, 1943

Mr. C. L. Sandstedt, Vice-President,
Dakota Public Service Company,
Huron, South Dakota.

Dear Sandy:

I am returning herewith the two originals of the Amendment to the Capacity and Interchange Agreement executed in counterparts. You will, of course, need these originals in your permanent files—1 for the files of Northwestern Public Service Company and 1 for the files of Dakota Public Service Company.

I note that these originals are not dated but, after this deficiency has been corrected, I will thank you to send me two conformed copies.

I note from your letter of March 13th that you have already sent Mr. Kruesi a conformed copy, and assume that this copy was dated.

Very truly yours,

.....

President.

Enclosures 2.

---

panies, while better than in the three years past, are pointing."

. Stafford: I am now reading from the minutes of the lar meeting of the directors of United Public Utilities oration, held in Philadelphia on December 20, 1938, ing from the second page as follows:

The president made the following report of subsidiar- f the Corporation:

b) Dakota Companies. Installation of the new boilers e Bismarck plant has been completed and satisfactory have been made of their efficiency."

. Stafford: I am now reading from the minutes of the lar meeting of the directors of United Public Utili- Corporation held in Chicago, Illinois on June 28th, reading from the bottom of the second page, and con- ng on to the third page as follows:

he president made the following report on subsidiaries e Corporation:

a) Dakota Companies. The merger of Northern Power ght Company into North Dakota Power & Light Com- , as the surviving corporation, under the title of Da- Public Service Company, has been approved by the rities and Exchange Commission, and will become tive at the opening of business July 1, 1939. Studies made show the need for additional generating ca- y and indicate the probability of a recommendation stall a new 4,000 K. W. steam generating unit in the narck plant at an estimated cost, including pipe and additional cooling tower of between $288,000 and 000."

so, from the fourth page of said minutes, as follows:

At this point Messrs. C. E. Lakin, president of the Indiana subsidiaries, A. B. Sanborn, president of the ota Companies, and A. B. Harper, president of the Smith Gas Company, on invitation entered the meet- nd discussed at length the affairs of their respective panies."

(Read from deposition)

Mr. Stafford: Let the record show I am showing the witness Exhibit F to the complaint, being a photostatic copy of the agreement dated July 1, 1941, between Northwestern Public Service Company and Dakota Public Service Company, and also the supplemental agreement thereto, dated March 13, 1943, between the same parties.

Q. Directing your attention first, Mr. White, to Article V, Section 1, page 6 of the 1941 contract, which provides for a charge of $13.20 per year per kilowatt of deficiency in the required reserve capacity, one-twelfth to be paid at the end of each calendar month during the term of the contract, and I will ask you whether or not you as president, and a director, of United Public Utilities Corporation, and as a director of Dakota Public Service Company, at the time of the execution of the 1943 amendment were satisfied that the charge of $13.20 per year per kilowatt of deficiency in the required reserve capacity was fair, reasonable, proper and just insofar as Dakota Public Service Company is concerned? A. I was so satisfied.

Q. Now, I will direct your attention to section 2 of Article V on the same page, which provides for a charge of .5 of a cent per kilowatt hour for all energy delivered under the agreement.

It is further provided that in addition to such charge, billing for emergency power may by agreement be surcharged with the additional expense incurred by the delivering party in putting into operation and operating high cost plants for the sole purpose of supplying such emergency power.

It is further provided that it is the intent that the delivering company will not make a profit on such emergency power, but will be reimbursed for all added expense that it might incur during and on account of the emergency.

It is further provided that it is understood between the parties that fuel prices and generating efficiencies may change and may require an adjustment in the energy rate contained in this section.

It is further provided that in January of 1942, and in each year thereafter, the parties [ot] the contract shall review production costs and if necessary redetermine the

Mr. Stafford: I am now reading from the minutes of a regular meeting of the directors of United Public Utilities Corporation, held in Philadelphia on September 13th, 1939, commencing at the foot of the second page and continuing on the third page, as follows:

"The president reported that the following capital expenditures by subsidiaries had been planned for the near future:

"(a) Dakota Public Service Company. Between $335,000 and $350,000 for a new 4,000 K. W. turbine and 5,000 K. V. A. generator (4,000 K. W. at 80% power factor) including about $70,000 for a new switchboard and electrical work at the Bismarck plant. These installations may require a future temporary advance by the Corporation of approximately $50,000. It is estimated that they will effect a saving of approximately $32,000 per annum on the basis of the interchange of current in 1938 under the interchange agreement with Northwestern Public Service Company and also greatly increase the assurance of continuous service by Dakota Public Service Company to its most important load center."

Mr. Stafford: I will now read from the minutes of the regular meeting of the Directors of United Public Utilities Corporation, held at Philadelphia on January 30, 1940, from the second page thereof, as follows:

"The president made the following report on subsidiaries:

"Dakota Public Service Company. The franchise election whereby this subsidiary was granted a franchise to serve Mobridge, South Dakota, is being contested and a hearing will be held February 12, 1940. The capacity charge payable to Northwestern Public Service Company under the interchange capacity agreement will be at the rate of $20,433.60 until completion of the new unit at the Bismarck station."

The following portion of said minutes was received in evidence for the purpose of showing that White made the report therein contained:

energy rate to be charged. Such revision to be effected by supplement.

Now, I will ask you, Mr. White, whether, at the time the 1943 supplement to this 1941 contract was executed, whether or not you as president of United Public Utilities Corporation and a director of that company and as a director of Dakota Public Service Company, were satisfied that the .5 of a cent per kilowatt hour, and the other provisions contained in Section 2, which I have just read, were fair, reasonable, just and proper insofar as Dakota Public Service Company was concerned? A. I was so satisfied.

Q. Now, I will direct your attention to the provisions in the supplemental agreement, appearing on the second and last page of that agreement, and appearing at the top of that page, being an amendment to Article II, Section 1, of the 1941 agreement, and providing that the agreement as amended should be effective on July 1, 1941, and continue thereafter unless and until terminated by written notice by registered mail from either [part] to the other party terminating the agreement, and such termination to be only at the end of a calendar month, and a written notice of termination to precede the date of termination by not less than 18 months.

I will refer you to Section 3, of Article V appearing on page 6 of the 1941 contract, which provides that Dakota as its share of the fixed charges, maintenance and operating expenses incurred by Northwestern in its ownership and operation of the interconnection facilities enumerated in the contract, Dakota should pay to Northwestern $1,666.66 a month beginning January 1, 1936, and continuing through the payment due June 1, 1950, the further sum of $1,348.82 on July 1, 1950, and thereafter, commencing August 1, 1950, monthly $442.53 which charge is over and above all other charges provided for in the contract.

It further provides that Dakota has no obligation to pay Northwestern for any part of the construction cost of the interconnection facilities enumerated above or for the use of such facilities for any period prior to January 1, 1936.

And I will also direct your attention to the amendment to said Section 3, of Article V, which is contained on the last page of the 1943 supplemental agreement, and which provides that in the event of the termination on 18 months'

Mr. Stafford: I am now reading from the minutes of the regular meeting of the Directors of United Public Utilities Corporation held September 25, 1940, at Philadelphia, commencing with the second page and continuing onto the third page, as follows:

"The president made the following report on subsidiaries:

"Dakota Public Service Company. The 4,000 K. W. addition of the Bismarck plant has been in operation since September 1, 1940. This brings the effective capacity of the company's generating facilities to 13,955 K. W. as compared with a maximum demand of 11,451 K. W., indicating a reserve of 21.86%. Northwestern Public Service Company now has a reserve of 18.69%, and the average of the combined systems' power pool is 20.004%. Beginning September 1, 1940, this company will collect capacity charges at an annual rate of $2811.60. Between January 1 and September 1, 1940, it paid Northwestern Public Service Company capacity charges at an annual rate of $20,433.60.

"The suit involving Mobridge, South Dakota, franchise election will probably be carried to the state Supreme Court and heard this winter.

"Selby, South Dakota, where the company lost a franchise election a year ago by a vote of 96 to 93, granted a 20 year franchise to the company on August 27, 1940, by a vote of 129 to 45.

"Tolstoy, South Dakota, where the company's former franchise was due to expire in 1945, granted a new 20 year franchise on September 3, 1940, by a vote of 68 to 3."

The following portion of said minutes was received in evidence.

Mr. Stafford: I am now reading from the minutes of the regular meeting of the directors of United Public Utilities Corporation, held in Philadelphia, February 7, 1941, reading from the third page of said minutes, as follows:

"Dakota Public Service Company. The president reported that the final cost of the new 4,000 K. W. addition

notice, which was provided for in the previous amendment, the obligation of Dakota to make further monthly payments under Section 3 should cease, but Dakota should pay Northwestern on the termination date (a) the unamortized balance of one half of Northwestern's investment in the interconnection facilities, stated to be $151,724.63, with interest at the rate of 5% per annum from January 1, 1936, to the date of termination on the unamortized balances thereof less such payments as may have been made on account thereof under said Section 3 and under prior agreements described in Article X of the contract, that is, of the 1941 contract, and (b) any monthly payment or payments of $442.53 each due prior to the termination date which had not theretofore been paid.

Now, Mr. White, at the time the supplemental agreement of 1943 was executed with your approval, as you have previously testified, were you as president and a director of United Public Utilities Corporation, and as a director of Dakota Public Service Company, satisfied that the foregoing provisions which I have just referred to, including the amendment provisions and the acceleration payment in the event of termination, were you satisfied that those charges were fair, just, reasonable and proper insofar as Dakota Public Service Company was concerned.

A. I was so satisfied with respect to each—

Q. In order to avoid the objection as to the multiplicity of the question, I will ask you whether in the capacity I have previously described in each of them, you were satisfied that had there not been any termination, the charges prescribed in Article V, Section 3, which I have directed your attention to, were fair, just, reasonable and proper insofar as Dakota Public Service Company was concerned?

A. Yes.

Q. You were satisfied at that time that those charges were fair charges? A. That is correct.

Q. Insofar as Dakota Public Service Company was concerned? A. That is correct.

Q. I will ask you also: Were you satisfied, in each of the capacities I have previously described, that the provisions incorporated in the supplemental agreement, calling for accelerated payment upon termination of the unamortized balance of one half of the investment in the interconnection

to the power plant at Bismarck was $341,979, as compared with the estimated cost of $331,915, the increase having been caused by installation of additional controls which were not originally contemplated.

"Under the capacity interchange agreement with Northwestern Public Service Company, that company will be entitled to collect monthly capacity charges from Dakota Public Service Company at the annual rate of $4,276, beginning January 1, 1941. Before the addition to the Bismarck plant was completed, such charges were running at the annual rate of approximately $22,000."

(Read from deposition.)

Q. Mr. White, yesterday afternoon I read into the record and offered in evidence portions of the minutes of United Public Utilities Corporation directors' meeting at which you rendered reports and as to some of which you testified yourself. I had asked you before that whether or not you had been in the habit of rendering reports to the U. P. U. Corporation on matters other than these particular contracts involved in this lawsuit, to which you replied generally yes. Now, do those instances which I referred to by reference to the minutes yesterday afternoon pretty well cover the situation with reference to the things you reported to your board concerning your Dakota subsidiaries? A. No, by no means.

Q. You mean there were other instances? A. Many.

Q. Well, can you tell us generally what the subject matter of those reports consisted of?

A. [Wy], yes. I regularly listed on my agenda for each directors meeting subjects for discussion or for report at those meetings. I followed my agenda rather closely and I reported on many operating matters in the subsidiaries, including the Dakota subsidiaries, which reports were not actually recorded in the minutes. In addition, I took with me reports of correspondence that I had received from the operating managements of our subsidiaries, including the Dakota subsidiaries, and told the directors about everything that I had time for as to the highlights of those reports or correspondence. But there were so many detail items to be covered in a report of that sort that, as a practical matter, we could not very well include everything that was discussed in the minutes.

Q. Well, the minutes, I believe you testified the minutes were drafted by Mr. Scheetz and then were sent to you for your comments and criticisms before they were prepared in final form. Is that right?

A. Well, partially. The actual procedure in the preparation of the minutes is that at the beginning of a meeting I gave two carbon copies of my typewritten agenda, one to the secretary and one to Mr. Scheetz—

Q. That was before the meeting?

A. Before the meeting or at the beginning of the meeting. The customary procedure was for the secretary to make a rough draft of the happenings of that meeting. He sent me one copy and he sent Mr. Scheetz a copy of such draft. I made any comments that I had with respect to the secretary's draft right on the draft copy—corrections or suggestions, and in many cases deleted things that he reported on as in my opinion not important enough to clutter up the minutes. I sent that correct draft to Mr. Scheetz, who thereupon prepared a draft of the minutes in, generally, the form in which they appear in our minute books. In advance of the next meeting, however, he sent me a copy of his draft of the minutes on which I made corrections or suggestions, and sent them back to him, and where necessary those corrections were made, and it was in that form that they were submitted to the directors at the next meeting for reading and approval or disapproval.

Q. Well, you have mentioned the Dakota subsidiaries. Just so that there won't be any misunderstanding, you mean by them both North Dakota Power & Light Company and Northern Power & Light Company prior to July 1, 1939, and Dakota Public Service Company after July 1, 1939, and Knife River Coal Mining Company at all times, from 1935 to October 19, 1945? A. That is correct.

Q. Well, from your testimony, is it a fair statement then, to say that the minutes reflect the action taken by the directors, where action was taken, and also reflect some of the reports which you made to the various meetings, but that there were also many other reports which you did not—which did not find reflection upon the minutes? A. That is correct.

facilities plus any monthly payments which had not been paid prior to termination, whether or not those charges were fair, reasonable, proper and just insofar as Dakota Public Service Company was concerned?

A. I was so satisfied.

Q. And being so satisfied you did approve and direct the execution of the supplemental agreement on the part of the Dakota Public Service Company? A. That's correct.

Q. Did you approve of the supplemental agreement of 1943 and the execution thereof on the part of Dakota Public Service Company as a result of your own free and independent judgment and thinking, or was that brought about by any influence, improper or otherwise, on the part of Northwestern Public Service Company, its officers, directors, or other acting for it?

A. I did approve of the supplement as the result of my own independent thinking, and I was not subjected to pressure or attempts to influence my judgment, by any other party.

Q. In your previous testimony, Mr. White, you have referred from time to time to reports made by you to the board of directors of United Public Utilities Corporation concerning the contracts which are appended as exhibits to the complaint in this action, I think specifically the 1936 contract and 1938 contract, the contract of 1941 and the 1943 amendment to the 1941 contract. You have also testified with regard to your recollection as to discussions of those matters before the board of directors and certain action taken. Were those the only matters pertaining to the Dakota subsidiaries of United Public Utilities Corporation which you reported to your board of directors?

A. No.

Q. There were others? A. Many.

Q. The answer is many? A. Yes.

Q. Did they extend over the period of the corporate life of United Public Utilities Corporation, that is, commencing in 1935 down to and including October 19, 1945?

A. Yes.

Q. That is, the last date is the date when you transferred the securities of the Dakota subsidiaries from United Public Utilities Corporation?

A. Yes, they extended over that range of time.

Q. Now, Mr. White, you testified about the 1936 contract and that you were familiar with it,—that contract is effective January 1, 1936. Now, directing your attention to the period commencing January 1, 1936, and continuing down to October 19th, 1945, were you familiar with the operations of the Dakota subsidiaries of United Public Utilities Corporation under the various contracts in force during that period, namely, the 1936 contract, the 1938 contract, the two 1939 contracts with Dakota Public Service Company, the 1941 contract, and the amendment to that instrument by the 1943 supplement? A. Yes, I was.

Q. Were you informed as to those operations under those contracts during regular course? A. Yes.

Q. How did you keep yourself informed concerning that subject, or how were you informed as to that subject?

A. A regular system of reports from the Dakota companies to me that gave elaborate operating figures, statistics, with detailed breakdown.

Q. Now, just so that I have a proper understanding of that, were those reports rendered directly to you by operating personnel and officers of the Dakota subsidiaries?

A. The reports were on a standard printed form and came under two headings, one an operating report, another a financial report, and were submitted for each month by the [fifteen] of the calendar month and showed, normally, not only the detail and breakdown, broken down figures for the particular month, but also corresponding figures for the calendar year up to and including that month, and in most instances the comparative figures for the month, the year to date of the previous calendar year.

Q. You testified you received these form reports each month. Did you also receive the studies, correspondence and copies of [correspondent] between Dakota subsidiaries operating personnel and the personnel of Middle West Service Company, which you referred to in your previous answer? A. Yes.

Q. Were these frequent or intermittent or how was that? A. They were frequent.

Q. And you got copies of the correspondence, memoranda, rate studies and other studies which were made either by your operating personnel or by the personnel

Defendant introduced certain portions of minutes of meetings of the directors of United Public Utilities Corporation, which were received in evidence and are as follows:

Mr. Stafford: At this time, pursuant to stipulation previously made between counsel, I will read from the minutes of a special meeting of the directors of United Public Utilities Corporation held in Philadelphia on June 6th, 1935. I am reading from the sixth page of those minutes:

"President White reported at length that of necessity the rebuilding of substantial portions of the transmission system of Northern Power & Light Company had been started, to be completed in the current year at a cost to that company estimated at $149,132, with a cash requirement of about $118,000.

"After discussion of a full report of President White, upon motion duly made and seconded the following resolution was unanimously adopted:

"Resolved, that, inasmuch as the president feels that the time is appropriate for consideration of a consolidation of Northern Power & Light Company and North Dakota Power & Light Company, the president and counsel be instructed to make further study of the question and report to the Board at its next meeting."

Mr. Stafford: I am now reading from the minutes of a special meeting of the board of directors of United Public Utilities Corporation, held in Philadelphia on August 21, 1935, reading from the fourth page of those minutes as follows:

"After discussion, and on motion duly made and seconded, the following resolution was unanimously adopted:

"Resolved, That at the discretion of the president, the treasurer is authorized and directed to advance on open account, with interest at the rate of 6% per annum, as required, to Northern Power & Light Company, funds up to but not exceeding $75,000.00 for the purpose of rebuild-

of Middle West Service Company with reference to subsidiaries?

A. The established policy and standing instructions of Middle West Service Company were that copies of letters sent by Middle West Service Company to United Public Utilities Corporation subsidiaries, including our Dakota subsidiaries, were to be sent to me.

Q. Did you have an opportunity to determine whether or not those instructions were carried out?

A. It was not customary for Middle West Service Company to issue instructions to our subsidiaries. That really was not their function, not the function of Middle West Service Company.

Q. Did these reports and other document you testified as receiving in regular course include accounting data?

A. Yes.

Q. Well, was your familiarity with operations confined solely to reports, correspondence, and other documents to which you have testified, or did you have any other source?

A. I had occasion frequently to discuss operations and results with the active management of the Dakota subsidiaries, principally the executive heads. Those executive heads were frequently in Chicago and always came to see me when they were in Chicago.

Q. Now about personal observation on the premises. Did you have any occasion to make such personal observation? A. I did at infrequent intervals.

Q. In other words, out on the properties themselves?

A. Yes. I make inspection trips over the properties infrequently. Mr. Stafford, I might add that I had a great many long distance telephone conversations with the executive management.

ing the central portion of the transmission system of that subsidiary with the understanding that such open account shall be subject to funding in negotiable securities of the subsidiary at the request of this corporation."

Mr. Stafford: I am now reading from the minutes of the meeting of the directors of United Public Utilities Corporation held in Philadelphia on October 7, 1935, reading from page 3 of those minutes:

"The president reported that as of September 15, 1935, the corporation had advanced to Northern Power & Light Company for the rebuilding of the central portion of its transmission system $70,000 out of the $75,000 authorized to be advanced for that purpose at the meeting of the Board of Directors of August 21, 1935, and that an additional $10,000 actual cash would be required for completion, and accordingly requested that the previous authorization be increased to a total of $80,000. After discussion and on motion duly made and seconded the following resolution was unanimously adopted:

"Resolved, that at the discretion of the president, the treasurer is authorized and directed to advance on open account, with interest at the rate of 6% per annum, as required, to Northern Power & Light Company, funds up to but not exceeding $80,000, for the purpose of rebuilding the central portion of the transmission system of that subsidiary, with the understanding that such open account shall be subject to funding in negotiable securities of the subsidiary at the request of this Corporation, and that such negotiable securities shall be forthwith pledged under the Corporation's Trust Indenture of January 1, 1935.

"Further Resolved, that this resolution shall supersede the resolution adopted at the meeting of the Board of Directors on August 21, 1935, authorizing an advance of not exceeding $75,000.00."

Continuing and reading from the 14th page of the same minutes:

"The president reported that the Railroad Commission of North Dakota had ordered a reduction in rates of subsidiaries operating in North Dakota, representing on the

Defendant's Exhibit 274, which is also referred to as Defendant's Exhibit 65 in White's deposition, was produced and identified by White. It was received in evidence for the purpose of showing communications sent by the operating personnel to White and received by him in ordinary course. It reads as follows:

Defendant's Exhibit 274.

Interconnected System KW load January 18 9

Northwestern Public Service Co., Northern Power & Light Co., and North Dakota Power & Light Co.

W. R. Gazin:

O. C. Stokke.

Attaching copy of load diagram sheet showing peak period load conditions and station capacities for month of December, 1938.

The figures in green pencil are *coincident 15 minute demands,* taken by actual readings of indicating and integrating meters at various locations throughout the system, on date of December 20, 1938 and apply to highest 15 minute peak of that date. There were several days when similar peak conditions existed, but no readings were taken at the time. However, 15 minute readings were taken on 3 days, which were typical peak days, and the attached sheet is a compilation of the demand data, of date during maximum 15 minute demand.

Operating conditions during the past two months had been quite stable throughout the interconnected system of the three companies. Fortunately, no doubt, the weather has been favorable and no serious trouble had been experienced during the peak season, to the hilines, substations, or plant equipment. As long as the transmission lines hold together, and no trouble is experienced with switching or generating equipment at important ties and locations, we can get by safely another year even with another increase in load on the system.

Improvements made in boiler plants the past several years have made it possible to handle the station loads

basis of current consumption a reduction of $34,729 in annual gross revenue. The advisability of effecting a merger between Northern Power & Light Company and North Dakota Power & Light Company was discussed, and the proposal was referred to the president for further study in collaboration with counsel for the corporation."

Mr. Stafford: I am now reading from the minutes of a meeting of the directors of United Public Utilities Corporation held at 50 Congress Street, Boston, [Massachussets] on November 22, 1935, reading from the second page of said minutes:

"The president reported further rate reductions by the Northern Power & Light Company to large consumers in Bismarck, North Dakota, and that the reduction would probably represent a decrease of about $5,000 in the annual gross electric revenue of that subsidiary."

Mr. Stafford: I am now reading from the minutes of a regular meeting of directors of United Public Utilities Corporation held in Philadelphia on January 29, 1936, reading from the tenth page of those minutes:

"The president reported that Northern Power & Light Company is building its Venturia-Ashley line at an estimated total cost of $16,000 and an estimated saving in maintenance of $340 per annum; that Northwestern Public Service Company is asking for an annual payment to it by Northern Power & Light Company of $20,000, or $20 per annum for 1000 K. W. firm power by way of return upon its investment of $340,000 made to serve Northern Power & Light Company; that the agitation for a municipal plant in Mandan, North Dakota, has been compromised by North Dakota Power & Light Company by the assertion that a reduction from 7¢ to 6¢ per K. W. H. will be made in the top-step of the domestic rate of that company if after eighteen months conditions are no less favorable to the company [that] as of the date of compromise.

"Upon motion duly made and seconded, the following preambles and resolutions were unanimously adopted:

"Whereas, the corporation is the owner of obligations and all the outstanding capital stock of Northern Power & Light Company, all of which securities are now pledged

shown particularly at Beulah, Bismarck and Mitchell plants. In addition, we have been giving turbo-generating equipment, and diesel units, more frequent inspections, repairs and replacements of defective or failing parts in order to keep such important equipment in safe and reliable operating condition. The Moore turbine replacement to the 1250 KVA G. E. generator has bolstered up the generating capacity and reserve capacity in the Aberdeen station.

We have not contemplated any new generating equipment for the year 1939, having in mind that we could get by another year providing no serious breakdown occurs to existing line and plant equipment. However, it is my opinion that we should soon begin a study of KW loads and system capacities, and plan on a new generating unit for installation early in 1940. This is something I would like to discuss with you within the next few months.

O. C. STOKKE.

OC Stokke/t

JHB
SWW

P. S. Also enclosing copy of plant equipment information—O. C. S.

Q. Did you receive this document from Mr. Stokke on or about the date it bears? A. Yes.

Defendant's Exhibit 274-A, which is also referred to as Defendant's Exhibit 65-A in White's deposition, was produced and identified by White. It was received in evidence for the purpose of showing the communications sent by the operating personnel to White and received by him in ordinary course. It is a copy of one of the load diagrams included in Plaintiff's Exhibit 53 and is as follows:

with the Provident Trust Company of Philadelphia, Trustee under Indenture of Trust dated January 1, 1935, securing the outstanding collateral trust bonds of the corporation, and,

"Whereas, such subsidiary is the owner of an electric distribution system in Blunt, South Dakota, and now desires to sell said distribution system to Northwestern Public Service Company, the present lessee thereof, for the sum of $18,000 cash, and in the judgment of the Board of Directors of this corporation, this service in Blunt cannot be advantageously used or retained in the proper or judicious operation of the business of said subsidiary, and the sum of $18,000 is deemed to be the fair value thereof; now, therefore, be it

"Resolved, that this corporation, as the owner of the above-described securities, hereby approves and authorizes and requests Provident Trust Company of Philadelphia, Trustee, as pledgee of the above described securities, to consent to the sale of said property for $18,000 cash, and the proper officers of this corporation be and they are hereby authorized and requested to take all such proper steps, including the execution and delivery of any appropriate documents, as upon advice of counsel for this corporation are necessary or desirable to procure the consent of the Trustee to said sale, and to carry out the terms of this resolution according to the true intendment hereof."

Mr. Stafford: At this time I am reading from the minutes of the regular meeting of the directors of United Public Utilities Corporation held in Philadelphia on August 28, 1936, reading from the seventh and eighth pages of said minutes:

"Inasmuch as the sale by Northern Power & Light Company to Northwestern Public Service Company of the distribution system in Blunt, South Dakota, is being consummated at the actual book value of the property sold—$17,876.99, instead of $18,000 as approved by resolution of the Board of Directors adopted at their meeting of January 29th, 1936, on motion duly made and seconded the following resolution was unanimously adopted:

"Resolved, That the action of the officers of United Public Utilities Corporation and Provident Trust Com-

pany of Philadelphia, under the Trust Indenture of January 1, 1935, in consenting to the sale by Northern Power & Light Company of its distribution system in Bluat, South Dakota, at a price of $17,876.99 instead of $18,000 as approved by the Board of Directors at its meeting held January 29, 1936, be and it hereby is ratified and confirmed."

Mr. Fellows: I would like to read a small portion on 614 and 615.

"Mr. Scheetz reported that the Federal Power Commission was claiming jurisdiction over all operating electric utilities which own high voltage transmission lines carrying energy originating in another state, even though all that energy is consumed by the operating utility or is sold only in intrastate commerce. He stated it was not only extremely doubtful that the Commission could sustain any such claim, but that, even if the claim were sustained, it did not follow that the Commission thereby acquired jurisdiction to [determing] the qualification of directors."

Mr. Stafford: I am now reading from the minutes of a regular meeting of the directors of United Public Utilities Corporation held in Chicago, Illinois on October 2, 1937, reading from the second page of said minutes as follows:

"The president made the following report of subsidiaries of the Corporation:

"(d) Knife River Coal Mining Company, North Dakota Power & Light Company and Northern Power & Light Company. Preparatory to the trip of inspection to be made by members of the board over the properties of these subsidiaries, a general [rport] was made concerning the territory and population served, the coal supplied by Knife River Coal Mining Company and recent earnings.

"Mr. Scheetz reported that the Federal Power Commission was claiming jurisdiction over all operating electric utilities which own high voltage transmission lines carrying energy originating in another state, even though all that energy is consumed by the operating utility or is sold only in intrastate commerce. He stated it was not only extremely doubtful that the Commission could sustain any

such claim, but that, even if the claim were sustained, it did not follow that the Commission thereby acquired jurisdiction to determine the qualification of directors."

Mr. Stafford: I am now reading from the minutes of a regular meeting of the directors of the United Public Utilities Corporation, held at Philadelphia on June 15, 1938, reading from the second page of said minutes as follows:

"On motion duly made and seconded, the following resolution was unanimously adopted:

"Resolved, that Mr. James H. Buell be and he hereby is appointed, in accordance with the provisions of subdivision (6) of Section 2 of Article III of the Trust Indenture of this corporation, dated January 1, 1935, as the independent engineer, to appraise the fair value of the fundable acquisitions of Northern Power & Light Company, North Dakota Power & Light Company and Knife River Coal Mining Company, subsidiaries of this corporation, during the period from January 1, 1935 to December 31, 1937; and to [execut] and deliver to Provident Trust Company, Trustee under said Trust Indenture, a certificate setting forth his opinion of the fair value of such fundable acquisitions of said subsidiaries in [accoreance] with the provisions of the aforesaid subdivisions of said Trust Indenture."

Now, further reading from the fourth page and continuing over to the fifth page, as follows:

"The president made the following report on subsidiaries of the corporation:

"(a) North Dakota Power & Light Company, Northern Power & Light Company, and Knife River Coal Mining Company. Mr. C. J. Strike has resigned as president of all three companies, and on July 1, 1938, Mr. A. B. Sanborn, formerly general manager of East Kootenay Power Company, Fernie, British [Columbis], will become president and chief operating executive of these subsidiaries.

"Appraisal of the properties of North Dakota Power & Light Company and Northern Power & Light Company was completed by North Dakota Railroad Commission about June 1, 1938. The amounts of these appraisals, the

On the original document, of which the foregoing exhibit is a photostatic copy, the figures in the tabulations under the caption "summary" were red under the title " 'Effective' K. W. Generating Capacity"; blue under the caption " 'Maximum' K. W. Generating Capacity"; and green under the caption "15 Min. 'Coincident' Peak K. W. Demand." The figures appearing in the rectangular boxes in said exhibit were in red for the top figures, representing " 'Effective' K. W. Generating Capacity" and in blue for the bottom figures representing " 'Maximum' K. W. Generating Capacity." The figures appearing outside the rectangular boxes were in green, representing the "15 Min. 'Coincident' Peak K. W. Demand."

Q. Did you receive this load diagram, Defendant's Exhibit 65-A for identification, at the same time that you received Defendant's Exhibit 65 for identification?

A. Yes.

Q. From Mr. Stokke? A. Yes.

Directing the witness' attention to Plaintiff's Exhibit 59, which is a letter to Buell and Gazin from Stokke, copy to White, with annual graphs attached, Mr. Stafford asked:

Q. Whose signature is it, please?

A. The signature of Mr. Otto Stokke.

Q. Do you recall whether you received this document from Mr. Stokke on or about the date it bears? A. I did.

Q. Mr. White, I neglected, in asking you about Defendant's Exhibit 66-D for identification, to call your attention to the matter appearing on the reverse side, reading, "copies to Mr. S. W. White, Chicago, Ill.," in red pencil. Do you recall whether or not that handwriting was on there at the time that you received that exhibit?

A. The marking is identical with the marking and in the same handwriting as the markings on copies of correspondence and similar graphs and reports that came to me from Mr. Stokke.

Q. Is it similar to the handwriting which you previously testified as appearing on Defendant's Exhibit 65 for identification? A. Yes.

Q. I think you anticipated my next question in your

possibility of the amounts being increased on later argument, and the possible effect of the final figures upon the rate structure and earnings of the two companies were discussed. The present estimate of the cost to the two companies of the Audit and Appraisal approximates $20,000, a sum considerably larger than had been anticipated. The Railroad Commission has ordered a rate hearing for July 6th, 1938. [Length] discussion was had of the best methods of effecting a merger of the two companies should a merger be found desirable.

"Construction of the two new boilers at the Bismarck plant of North Dakota Power & Light is well advanced."

Mr. Stafford: I am now reading from the minutes of the regular meeting of the directors of United Public Utilities Corporation held in Philadephia on August 25, 1938. The accurate description is held at 1335 Land Title Building, without designation of city, reading from the third page as follows:

"The president made the following report on the subsidiaries of the corporation:

"(e) Dakota Companies. The merger of North Dakota Power & Light Company and Northern Power & Light Company has progressed as far as circumstances permit and advance preparation for its consummation can and will be carried on.

"North Dakota Railroad Commission held a hearing on July 26th, 1938, on the question of valuation and historical costs of the properties of the two companies. A decision is not expected until the late fall. The Commission desires the two companies to record on their books their historical costs as so determined.

"A new ash conveyor, costing about $12,000 was placed in operation early in August at the Bismarck plant of the North Dakota Company, with satisfactory results through an almost total elimination of flying ashes and dust. The concrete foundations and steel work for two new boilers at the Bismarck plant had been finished and the boilers themselves have recently been shipped and are expected to be in operation about October 15, 1938.

"Crop conditions in those sections served by the Dakota

answer, but I will ask it anyhow. Did you receive, from time to time, other graphs similar to Defendant's Exhibits 66-A to 66-D, inclusive? A. Yes.

Q. Was that an annual occurrence?

A. I received them at the beginning of each year, making the same showings of operating results for the preceding year.

Q. I am not going to encumber the record by asking you to produce them and offer them in [evidnce]. I do just want to know whether you did receive similar graphs in each year? A. I did.

Q. You say each year. Do you recall the period over which that extended? Defendant's Exhibit 66 for identification was February, 1939?

A. I recall that I received them each year beginning with 1938 up to and including the report received in 1945 for the year 1944.

Defendant's Exhibit 275, which is also referred to as Defendant's Exhibit 67 in White's deposition, was received in evidence for the purpose of showing the receipt of such information by White from Stokke. It reads as follows:

Defendant's Exhibit 275.

Form 203—30M—2-40

Northwestern Public Service Company.

For Company Business Only.

Date January 6, 1941.

Subject Load Diagram—1940 Peak
Dakota Public Service Co.

Location Northwestern Public Service Co.

To S. W. White

From O. C. Stokke

Attaching copy of Load Diagram sheet showing kilowatt load conditions over the interconnected systems of the two companies in North and South Dakota. Similar copies

had been send to you in previous years for your information and files.

Suggest you interview Major Buell or Bill Gazin for details and explanations of the load diagram.

O. C. STOKKE.

OCStokke/b

Defendant's Exhibit 275-A, which is also referred to as Defendant's Exhibit 67-A in White's deposition, was received in evidence for the same purpose. It is a load diagram similar to Defendant's Exhibit 274-A, setting forth the same type of information but under the date of December 18, 1940, and the colors of the figures on the original document are the same as those on Defendant's Exhibit 274-A. It is a copy of one of the load diagrams included in Plaintiff's Exhibit 53, and it bears notations thereon in pencil which were placed by White subsequent to his receipt of it.

Q. Whose signature is it, please?

A. It is the signature of Mr. O. C. Stokke.

Q. He is the same Mr. Stokke you have previously testified about this morning? A. Yes.

Q. Did you receive this memorandum, or Defendant's Exhibit 67, from Mr. Stokke on or about the date it bears, January 6, 1941? A. Yes.

Q. Mr. White, before the noon recess, when Mr. Benson interrogated you, you described the checking of the figures on the load diagram which was done by persons on the property. Do you know whether or not you had any other checking of those figures done both with respect to this particular load diagram, which is Defendant's Exhibit 67-A and other load diagrams that you received? Did you have any or not? A. Yes.

Q. Well, will you tell us generally what that checking consisted of, who did it?

A. Mr. Peale regularly checked data in those diagrams and reports against such information as might be in our

office, and on points that we could not explain to ourselves satisfactorily we went to Mr. Buell and Mr. Gazin, who had files of much more complete engineering and operating information on the properties and asked them to explain the points that we couldn't understand; and in a few instances where Mr. Buell and Mr. Gazin could not give us an [answers] that was satisfactory to us, they wrote to the operating management for detailed information to fill in the existing gap.

Q. In those instances, where they requested additional information, do you know whether or not they received the same?

A. I can recall defnitely two or three instances in which they made inquiries, and I know that they received replies and transmitted those replies to us.

Q. I think you have testified previously that you got copies of the correspondence between Buell and Gazin from Middle West Service Company to members of the operating management, or vice versa? A. That is right.

Q. And you did get copies of that correspondence?

A. Yes.

Q. Is there anybody else in your organization besides Mr. Peale who checked into these matters.

A. Mr. McClanahan checked primarily on accounting matters.

Q. Mr. Peale was treasurer of United Public Utilities Corporation and was working with you in your office at Chicago? A. Yes.

Q. Mr. McClanahan, who was he: I think you have identified him previously, but we will do it again?

A. He was in charge of the accounting of United Public Utilities Corporation, and during the last two or three years of his association with our company he was vice-president.

Q. Mr. White, you have testified concerning, and we have offered in evidence, Defendant's Exhibit 65-A and 67-A, being the two load diagrams. Did you receive other load diagrams setting forth similar information, from time to time during the period of the operations under the inter-capacity exchange contract? A. Yes.

Q. Were they in a general way similar to the ones which we have already put into evidence? A. Yes.

Q. And that extended over the entire period from 1938 to October 19, 1945? A. Yes.

Defendant's Exhibit 276, which is also referred to as Defendant's Exhibit 68 in White's deposition, was received in evidence for the purpose of showing communications sent to White in due course. It consists of a copy of memorandum dated February 15, 1939 from Gazin to Stokke, copy to White, regarding "Interconnected System Load." It reads in part as follows:

Your letter of January 18th was completely misplaced and did not come to my attention until just recently. This accounts for the delay in reply. We are very interested in knowing that there is a substantial increase in the peak load for the interconnected group but that the percent of increase for each company stays somewhere near the same relation.

For the purpose of making comparisons we have tabulated the maximum and effective capacities for 1937 and 1938, copy of which is attached. This data is taken from the load diagram for the two years and based on the readings for December 21, 1937 and December 20, 1938.

There has been certain changes in the effective capacity rating and inasmuch as these figures will, no doubt, be used in arriving at demand charges as between companies for 1939, I believe it would be well to determine the reasons for the changes noted.

Bismarck Station—Effective capacity increased 1000 kw as the result of installation of boilers during 1938.

Mobridge Station—Effective capacity shows 100 kw reduction for this station. Will you please advise the reasons for this?

Aberdeen: Effective capacity has been increased 1000 kw as the result of the installation of 1250 KVA turbine during 1938.

Redfield Station—This station shows a reduction in effective capacity of 200 kw. Please advise the reasons for this change.

Yankton Station—This station also shows a reduction of 300 kw in effective capacity. Please advise.

As pointed out in your letter it does appear that if no unusual break-downs or line failures occur during the peak load season and the luck holds out, that the system has sufficient capacity to get through 1939. I agree with you however, that a study should again be taken up with respect to increasing capacity of the system by the installation of a new generating unit next year. It is hoped that we can get together to start work on this in the very near future. Perhaps something can be worked out to get together sometime in March.

In addition, said exhibit contains a tabulation of stations for each of the three companies, North Dakota Power & Light Company, Northern Power and Light Company and defendant, showing comparative figures for 1937 and 1938 of both maximum capacity and effective capacity for each of said stations and the total for each of the said three companies. The comparison between 1937 and 1938 shows for North Dakota Power & Light Company an increase in maximum capacity from 10,330 KW to 11,430 KW and an increase in effective capacity from 9,120 to 10,120 KW; for Northern Power and Light Company an increase in maximum capacity from 2,120 KW to 2,175 KW and a decrease in effective capacity from 1,850 KW to 1,750 KW; and for defendant an increase in maximum capacity from 22,160 KW to 22,840 KW and an increase in effective capacity from 19,130 KW to 19,430 KW.

Q. From whom did you receive this document, if anyone? A. I received it from Mr. Gazin.

Q. On or about the date it bears? February 15, 1939?

A. Yes.

Defendant's Exhibit 277, which is also referred to as Defendant's Exhibit 69 in White's deposition, was received in evidence for the purpose of showing receipt of the document by White in due course. It is as follows:

Defendant's Exhibit 277.

February 20 9

Interconnected System Load.

Northwestern Public Service Co., Northern Power & Light Co., North Dakota Power & Light Co.

W. R. Gazin,
O. C. Stokke.

"Effective" KW generating capacities of the various stations is determined each month for the respective power plants, and you are familiar with the several factors which are taken into account in arriving at the "Effective" KW generating capacity of a station.

In the December peak load diagram, prepared as of December 20, 1938, we applied generating capacities to the various stations based on operating conditions and major equipment available for both effective and maximum available generating capacity of each station. The sheet sent you contains our estimate of such generating capacities. It is customary and necessary too that consideration be given to steam demands by the steam heating systems which affect the KW generating capacity of certain generating units and station totals.

Important changes in the 1938 and 1937 station generating capacities are explained as follows:

Bismarck Station. Effective capacity increased 1000 KW as a result of available ample steam generating capacity, making it readily possible and practical to operate all generating machines at their full rated or maximum capacity. Normally, both turbo-generators are available, spinning or hot, and can be considered as "effective" capacity of about 2350 KW total. This load can be readily taken by the Bismarck plant on instant notice or demand during the month of December, during peak periods.

Mobridge Station. In previous years, we fired up both boilers in the Mobridge plant, to provide additional effec-

tive KW generating capacity in that station and to the system total. For the past peak season (1938) it was decided by the management to curtail expenses in the Mobridge plant as much as possible and we concluded to operate only one boiler, without the reserve of the second boiler in banked operating condition. With only one boiler in service we were able to pull about 1100 KWH of "Effective" capacity if required of the Mobridge Station. The weather was mild during the month of December and steam heat demand light, making for greater condensing operation and load by the turbo-generator.

Aberdeen Station. Effective and Maximum KW generating capacities increased due to addition of new steam (Moore) turbine to G. E. generator unit. This turbo-unit is "hot" and ready for service in a few minutes.

Redfield Station. Effective generating capacity reduced due to operating with only one boiler in the plant during the peak season. The Connelly boiler can readily handle the 600 KW turbo-generator at full load with normal amount of bled steam to the heating system in Redfield.

Yankton Station. Effective generating capacity based on normal operating capacities of the diesel units only during the peak season. The plant boilers were not fired up nor available for immediate service in 1938 to the steam engine generating units. During the peak season of 1937, the plant boilers were carried with banked fires in readiness to serve and for operating of the steam engine-generators. We felt it desirable to cut standby expenses in the Yankton plant through fuel savings.

Each year there are changing conditions in operating requirements and weather conditions which alter our estimates of effective and maximum generating capacities of the stations. Economy and Serviceability are the two most important factors considered and we attempt to give due consideration to each. You are of course, familiar with such factors and items involved from year to year.

OCStokke/t O. C. S.

Cc to A. B. S.
J. H. B.
S. W. W.

Q. Did you receive this carbon copy from Mr. Stokke on or about February 20, 1939? A. Yes.

(Read from deposition.)

Q. If I understand your prior testimony correctly, Mr. White, you said you had received, over the period of operating under these contracts, copies of correspondence between members of the Middle West Service Company personnel and the operating personnel of the properties. Are Defendant's Exhibits 68 for identification and 69 for identification typical of that type of correspondence? A. Yes.

Q. And you did receive correspondence of that nature although pertaining to different subjects, of course, for that entire period? A. That's correct.

Q. I believe you testified previously that you are familiar with the terms and provisions of the 1938 interchange capacity agreement? A. Yes.

Q. Also with the 1939 interchange capacity agreement? A. Yes.

Q. And also with the 1941 contract? A. Yes.

Q. Those contracts, as you know, provided for the preparation by the committee on operations provided therein of certain exhibits to be used for the basis of billing during each successive term of the contract. Did you receive copies of the exhibits prepared by the committee on operations in each year? A. Yes.

Q. From whom did you receive them, if you recall?

A. From the Huron office.

Defendant's Exhibit 278, which is also referred to as Defendant's Exhibit 70, 70-A, 70-B and 70-C in White's deposition, was received in evidence for the purpose of showing the submission of copies of such correspondence and documents to White in ordinary course. It consists of 4 sheets, the first of which is as follows:

Defendant's Exhibit 278.

Interchange Capacity Agreement February 20 9

Northwestern Public Service Co., Northern Power & Light Co. and North Dakota Power & Light Co.

J. H. Buell:

O. C. Stokke.

Attaching unsigned copies of exhibits B, C and D, to apply to interchange capacity agreement to be made effective for the year 1939. The attached sheets will give you advanced information on KW capacities of the respective power plants and companies, and peak load demands of each company, during last December peak period on the combined interconnected system.

The Committee on Operations will sign the exhibit sheets tomorrow and all signed copies will be turned over to Mr. Sanborn for disposition of the contract. You will likely hear from Mr. Sanborn within a few days.

We have gone into this matter very carefully with the principal idea of being accurate in our application of the plant capacities and peak load demands by the respective companies. We endeavored to correctly follow the instructions and intent of the interchange capacity agreement, and feel sure that the figures in the attached exhibits are quite accurate in detail as applied.

Due to increase in KW generating capacities of the Bismarck and Aberdeen stations, we now find a corresponding increase in the total station ratings of the North Dakota Power & Light Co., and Northwestern Public Service Co. No increase in Northern Power & Light Co. power plant capacities during the past year (1938). The net effect of such changes in generating capacities results

in an increased capacity charge to Northern Power & Light Co. However, you will also note that both North Dakota Power & Light Co. as well as Northwestern Public Service Company are now obliged to provide firm capacity to the Northern Power & Light Co. during the current year of 1939.

Exhibit "D" gives a summary of our final figures and computations leading up to excess or deficiencies in reserve generating capacities and demand charges as apportioned to each company.

O. C. STOKKE.

OCStokke/t

Cc to A. B. S.
S. W. W.

The last 3 sheets are respectively, Exhibits "B", "C" and "D" to the Interchange Capacity Agreement for the perio[d] ginning January 1, 1939 and ending December 31, 193[9] and contain the same statements and figures as those contained in the 3 exhibits pertaining to the same period included in Plaintiff's Exhibit 31, previously described herein (R. p. 301, supra).

Q. Did you receive this document from Mr. Stokke on or about the date it bears, February 20, 1939? A. Yes.

Q. Now, directing your attention to Defendant's Exhibits 70-A, 70-B and 70-C for identification, did you receive those documents from Mr. Stokke together with Defendant's Exhibit 70 for identification, on or about February 20, 1939? A. Yes.

Defendant's Exhibit 279, which is also referred to as Defendant's Exhibit 71, 71-A and 71-B in White's deposition, was received in evidence for the purpose of showing that in ordinary course copies of such correspondence and documents reached White. It consists of 3 sheets, the first of which is as follows:

Defendant's Exhibit 279.

September 5, 1940.

Interchange Capacity Agreement

Northwestern Public Service Company

Dakota Public Service Company

James H. Buell
C. L. Sandstedt

We are enclosing herewith for your file, copy of Exhibits "B" and "D", Supplements to the Interchange Capacity Agreement between Northwestern Public Service Company and Dakota Public Service Company, covering the period September 1, 1940 to December 31, 1940. There is no change in Exhibit "C" showing the Company System Maximum Demands which apply for the contract term beginning January 1, 1940 and ending December 31, 1940.

C. L. SANDSTEDT.

f.

Encl.

CC: SWW

The second and third sheets are respectively, Exhibits "B" and "D", being the supplement to the Interchange Capacity Agreement for the period beginning September 1, 1940 and ending December 31, 1940 and containing the same statements and figures as those contained in the two exhibits pertaining to the same period included in Plaintiff's Exhibit 31, previously reproduced herein (R. p. 313, supra), and in addition containing in Exhibit "B" two columns of pencilled figures opposite each generating station, the date 12/31/39, and the word "Mandan", in White's handwriting.

(Read from deposition)

Q. Do you recall from whom you received that document? A. Yes. I received it from the Huron office.

Q. On or about September 5, 1940? A. Yes.

Q. And you received them also from the Huron office, Exhibits 71-A and 71-B? A. Yes.

(Read from deposition)

Q. Mr. White, directing your attention to Defendant's Exhibits 71-A and 71-B, both for identification, you will note that it is stated on each of said exhibits that they are signed this first day of September, 1940? A. Yes.

Q. Do you recall whether or not supplements to the interchange capacity agreement, Exhibits B and D thereto were executed by the operating committee in the early part of the year, 1940, that is, in January or February of 1940?

A. Yes, they were.

Q. Do you recall the occasion for the execution of Defendant's Exhibits 71-A and 71-B for identification?

A. Yes.

Q. Would you state what that occasion was, please?

A. The occasion was the completion of the installation of a new 4,000 k. w. unit at Bismarck, which increased the generating capacity of Dakota Public Service Company.

Q. Do you know how much it increased the effective capacity of the generating facilities of North Dakota Public Service Company?

A. The effective generating capacity of each plant in the interconnected system was a rating capacity which the contract provided should be determined by the operating committee constituted under the contract. The operating committee determined that as of September 1, 1940, the effective generating capacity of the Bismarck plant had been increased by 3 000 kilowatts over the rating of effective capacity that it had assigned to that plan on January 1, 1940. The difference of 1,000 kilowatts between the name plate rating of the new generator at Bismarck and the effective generating capacity as determined by the operating committee was, as nearly as I can recollect the facts, ascribed to a deficiency in boiler capacity in the Bismarck plant below the amount required to bring the effective capacity up to the full amount of the name plate rating.

Q. Mr. White, I believe you testified at the start of this particular inquiry about the exhibits to the interchange capacity agreements that you received those exhibits in each year during which an intercapacity exchange agreement was in force? A. Yes.

Q. To save time, would they be similar to the ones which you have just testified to and which have been offered in evidence? A. Yes.

Q. And you received them under similar circumstances? A. Yes.

Q. And you gave them similar treatment? A. Yes.

Q. When Mr. Benson was interrogating you earlier today I think you identified Mr. J. W. Chesire Did you know that Mr. Chesire was a member of the committee on operations? A. Yes.

Q. Did you approve of his appointment to that committee? A. Yes.

Q. Do you know of any particular function he was to perform on that committee? By that I mean, was he to represent any particular company?

A. He was to represent particularly Dakota Public Service Company.

Q. With your approval? A. Yes.

Q. Were you satisfied, over the period which Mr. Chesire did represent Dakota Public Service Company on that committee with his work in that connection? A. Yes.

Q. You were satisfied he gave proper representation on the committee for Dakota Public Service Company?

A. Yes.

Q. You were satisfied at the time, that is, during each year during the period in which he so acted? A. Yes.

Q. And you are so satisfied now? A. Yes.

Q. Were you so satisfied during those periods and at the time you testified to in your capacity as president and director of the United Public Utilities Corporation, and also as a director of Dakota Public Service Company?

A. Yes.

Q. You also mentioned various times in your testimony putting on additional capacity at Bismarck. Referring to the Sargent & Lundy report back in 1936, did they make any recommendation as to the installation of additional capacity at that point, that you recall?

A. Yes, they did make such recommendation.

Q. Do you recall how much capacity they recommended?

A. Yes.

Q. You do recall that that Sargent & Lundy report was discussed at the directors meeting of the United Public Utilities Corporation during the summer of 1936, do you not? A. Yes.

Q. Well, what was the recommendation they made as to the installation of additional capacity at Bismarck?

A. They recommended the installation of an additional 3,000 kilowatts.

Q. Do you recall that, Mr. White, of your own recollection? A. Yes.

Q. Was that recommendation followed? A. No.

Q. Do you recall why it was not?

A. Yes, because the load conditions had changed between 1936, when the Sargent & Lundy report was made, and 1939, when it was decided to install additional capacity at Bismarck.

Q. I asked you if you recalled why the Sargent & Lundy recommendation was not followed?

A. Because it was determined in 1936, by the management of North Dakota Power & Light Company, after conferences with me and after my discussion of the subject with my board, that it was not practicable to finance the recommended 3000 k. w. addition at Bismarck.

Q. When you say "my board" to whom do you refer?

A. To the board of directors of United Public Utilities Corporation.

Q. Well, you have testified previously that an addition was made at Bismarck. Do you recall anything about how the matter was revived? A. Yes.

Q. All right. Can you state it from your recollection?

A. The management of Dakota Public Service Company determined that the demands on its generating facilities had grown to a point where the service to the public was endangered by the shortage in generating capacity, and that additional capacity was absolutely necessary.

Defendant's Exhibit 280, which is also referred to as Defendant's Exhibit 73 and 73-A in White's deposition, was received in evidence for the purpose of showing receipt by White from Sandstedt of those documents. It consists of 3 pages, the first of which is as follows:

Defendant's Exhibit 280.

Dakota Public Service Company
General Offices
Huron, South Dakota
November 4, 1939

Mr. Samuel W. White, President
United Public Utilities Corporation
20 North Wacker Drive
Chicago, Illinois

Dear Mr. White:

The Interchange Capacity Agreement between Northwestern Public Service Company and Dakota Public Service Company provides that when additional capacity is needed the parties will agree as to the location of the additional capacity.

I a. enclosing herewith a copy of the recommendation of the Committee on Operations which has been approved by the management of each company. If you have any suggestions or questions in regard to this matter we should appreciate hearing from you.

Yours very truly,
C. L. SANDSTEDT,
Vice President.

CLS/f

CC: J. H. Buell

Encl.

The second and third sheets are in part as follows:

Northwestern Public Service Company

Dakota Public Service Company

Section 7 of Article III of the Interchange Capacity Agreement between Northwestern Public Service Company and Dakota Public Service Company, dated January 1, 1938, provides that when, in the opinion of the parties thereto, the interconnected system's coincident demand increases to a point that the system does not have adequate reserve facilities to insure reliable service, the parties thereto will agree to the installation of additional capacity.

In accordance with this section it is agreed by the Committee on Operations that additional capacity is required and it is recommended that a 4000 KW turbine be installed at the Bismarck Station of Dakota Public Service Company. This installation will bring the installed generating capacity of the respective parties within closer balance and will also protect service to the important load centers of Bismarck and Mandan.

The following tabulation shows the effect of this installation:

The tabulation sets forth the figures resulting in the excess or deficiency in reserve capacity of defendant and Dakota Public Service Company under the billing under the 1938 and 1939 interchange capacity agreements for the year 1939 and the billing under said contracts for 1940, both prior to and after the installation of the new turbine at Bismarck; and shows an excess for defendant and a deficiency for Dakota Public Service Company of 1,374 KW under the 1939 billing and of 1,361 KW under the 1940 billing prior to installation and a deficiency for defendant and an excess for Dakota Public Service Company of 425 KW after the turbine installation.

It is estimated that the installation of the turbine will be completed about July 1, 1940 and upon completion of the installation it is recommended that the rated capacity of Dakota Public Service Company for the purpose of this Agreement be increased from 10,955 KW to 13,955 KW.

The Committee on Operations certify that this rating is fair and equitable and that the same basis of rating the respective generating stations has been used for both companies.

Signed October 10, 1939.

COMMITTEE ON OPERATIONS,

NORTHWESTERN PUBLIC SERVICE COMPANY,

By O. C. STOKKE,

DAKOTA PUBLIC SERVICE COMPANY,

By J. W. CHESIRE.

The undersigned mutually agree to the installation of a turbo-generator by Dakota Public Service Company at Bismarck, North Dakota, and approve the rated capacities as herein recommended by the Committee on Operations.

NORTHWESTERN PUBLIC SERVICE COMPANY,

By A. B. SANBORN,

President.

DAKOTA PUBLIC SERVICE COMPANY,

By C. L. SANDSTEDT,

Vice-President.

(Read from deposition.)

Q. Mr. White, do you recall whether or not the committee on operations did recommend the installation of the additional capacity at Bismarck? A. They did.

Q. On or about November 4, 1939? A. Yes.

Q. Were those recommendations carried out? A. Yes.

Q. And the additional capacity was installed? A. Yes.

Q. I believe you have previously testified it went on the line and in operation about September, 1940?

A. That's correct.

Q. As president of United Public Utilities Corporation from January 1, 1935 down to October 19, 1945, did you have any policy or practice in connection with the work orders for the expenditure of funds on behalf of the Dakota

subsidiaries of United Public Utilities Corporation? I just ask whether you did? A. Yes.

Q. Will you describe as briefly as possible for us what that policy was?

A. Before proceeding to make additions to the physical properties or replacements, it was customary for the operating companies to submit work orders covering such proposed additions and the expenditures involved, and those work orders were sent in the first instance to Middle West Service Company after they had been approved and signed by the proper operating officers of the subsidiary company. When Middle West Service Company received them, the work orders were passed in turn to department heads of Middle West Service Company who were competent to form an opinion on the desirability of the improvement and the justification for the proposed expenditure. After the work orders had been approved by the appropriate department heads of Middle West Service Company they were sent to me for my approval or disapproval. If and when I approved them in writing they were returned by me to Middle West Service Company. In each case I indicated my approval on two copies of the work order, one copy of which was retained in the files of Middle West Service Company and the other was sent to the operating subsidiary as their authority for proceeding with the work.

Q. I was out at the time, and I don't know whether you went into the question of the amounts of those work orders. Did that practice you have just described apply to all work orders, or were there any particular amounts as to which some required your approval and other might not require your approval?

A. The procedure which I have just described applied to all work orders required to be submitted for the approval of Middle West Service Company and of myself before beginning the work. The managements of the operating subsidiaries were under instructions that they need not receive advance approval on expenditures below certain limits in the cost thereof.

Q. Did those limits vary from time to time during the period you are referring to?

A. Those limits—the maximum limit on the cost of work which could be done without advance approval was at one

time as low as $100 or $200. Later that limit was moved up until in the latter part of the period under discussion it was, I believe, a limit of $500 on expenditures that had not been included in the annual budget for the year and $1,000 on items that had been included in the budget submitted at the beginning of the year.

Q. Who fixed those minimum amounts, if you know?

A. Those were fixed by agreement between me and Middle West Service Company and instructions were sent to the operating managements.

Q. Did you send the instructions?

A. The instructions were sent by Middle West Service Company with advice that I had concurred.

Q. In other words, the instructions and the limits were fixed by agreement between you and Middle West, and the instructions to the operating personnel were given by Middle West, but with your approval? A. That's correct.

Q. Was that practice which you have described with reference to work orders over the minimum amounts adhered to over the period in which you were president of United Public Utilities Corporation to and including October 19, 1945? A. Yes, strictly.

Q. Did you have that same practice in connection with other subsidiaries of United Public Utilities Corporation which was serviced by Middle West?

A. Yes, invariably, as to the practice, but the amounts, maximum amounts of expenditures without prior authorization varied with respect to each of the groups of subsidiaries.

Q. Now, Mr. White, over this period when these contracts were in force, namely, from January 1, 1936, down to and including October 19, 1945 will you state whether or not as president of United Public Utilities Corporation, and as a director of that company, and also as a director of North Dakota Power & Light Company, Northern Power & Light Company, and Dakota Public Service Company, you were satisfied as to the operations on the part of those subsidiaries which I have just named, under those contracts? A. I was so satisfied.

Q. During the testimony, Mr. White, there has been references to certain service arrangements with Middle West Service and others. I would like to go into that mat-

ter just a little bit more in detail at this point. Can you tell us who furnished those services, who made the arrangement for them, whether they were under oral or written contracts, starting back at the beginning, when you first went on the properties on April 15, 1932, as receiver and continuing on down to October 19, 1945? Let us start back in 1932, and tell us what the situation was at that time?

A. As I recollect the facts, they were that at the date of receivership on April 15, 1932, there existed between United Public Service Company and Middle West Utilities Company an arrangement which had been reduced to writing, in which it was agreed that for a consideration of $25,000 a year Middle West Utilities Company would provide all officers and directors of United Public Service Company and its subsidiaries, one of which was United Public Utilities Company, the predecessor of United Public Utilities Corporation, and another of which was Southern United Gas Company.

A. (Continuing) Under that agreement and as a consideration for the $25,000 payment, Middle West Utilities Company also undertook to do all of the accounting and treasury work of those companies and to provide management supervision over their operation subsidiaries.

Q. Was there any arrangement as to engineering services?

A. That management supervision included in it engineering services to the subsidiaries, accounting, treasury, financing, advice and assistance, the preparation of their annual reports and in general all the services that those corporations would have required for the conduct, for the independent conduct of their own business, as well as the supervision and assistance that they would have found necessary to furnish to operating subsidiaries.

Q. The contract you just described was between United Public Service Company and Middle West Utilities Company. Is that right? A. Yes.

Q. At that time Middle West Utilities Company owned all of United Public Service Company, didn't it? A. Yes.

Q. Which in turn owned all of the stock of the United Public Utilities Company and Southern United Gas Company? A. That's correct.

Q. You were receiver of United Public Service Company,

United Public Utilities Company and Southern United Gas Company. Is that correct? A. Beginning April 15, 1932.

Q. Now, after you became receiver what, if anything, did you do in connection with continuing, changing or abrogating that arrangement which you found existing between U. P. S. and Middle West Utilities Company, which you just previously described for us?

A. I reported to the Court the existence of that arrangement, and recommended that I be permitted to operate under such an arrangement with the receivers of Middle West Utilities Company, or rather, I reported that I had entered into a temporary agreement with the receivers of Middle West Utilities Company by which that contract was to be continued in force until June 30, 1932, at which time the matter of an arrangement between me as receiver and the receivers of Middle West Utilities Company would be further discussed.

Q. Well, did you do anything after your first report?

A. Yes.

Q. With regard to the same matter?

A. Yes. I made another report to the Court of my action with respect to that contract, to that arrangement.

Q. Is that the second report you are talking about, that has been identified? Do you want to look at it? (Handing document to the witness.)

Mr. Stafford: For the record that is identified as Defendant's Exhibit 6 for identification, part of which is Defendant's Exhibit 230 (R. p. 1082 supra). Let the record show that I showed him that exhibit.

A. (Continuing) —and the details of the revision of the arrangement were outlined in a subsequent report to the Court. As receiver of those three companies I had, with the Court's consent, allocated the $25,000 cost of the arrangement, 50 per cent to United Public Service Company, 40 per cent to United Public Utilities Company and 10 per cent to Southern United Gas Company.

Q. That is still the $25,000 per annum charge that you found existing when you became receiver?

A. Yes. I operated under that arrangement until September 1, 1933, when I entered into an arrangement with the receivers of Middle West Utilities Company whereby

for a fee of $6,000 a year in the [aggregte], the accounting and statistical work of the three holding companies of which I was receiver was to be done by the staff of the receivers of Middle West Utilities Company, and the general supervisory and advisory services which were being received by the operating subsidiaries of the holding companies of which I was receiver were to be paid for by the respective operating subsidiaries to the receivers of Middle West Utilities Company at one per cent of their annual operating revenues, determined after deduction of their merchandise sales and inter-company sales.

Q. You say you made that arrangement with the receivers of Middle West Utilities Company? A. Yes.

Q. In other words, if I understand you correctly, the arrangement directly between the operating subsidiaries and Middle West Utilities Company receivers was initiated during the period of your [receiverhsip], I think you said September 1, 1933?

A. The arrangement for the payment of $6,000 a year by the holding companies was initiated as of September 1, 1933, and the fee paid by the subsidiaries for the advisory and supervisory services were initiated at the same time, or approximately the same time.

Q. Now, did you report that action to the Court? A. Yes.

Q. To the United States District Court, for the Northern District of Illinois, Eastern Division, here in Chicago?

A. That is correct.

Q. Did you report that in your third report filed as receiver in that action? A. The report was so designated.

That report is Plaintiff's Exhibit 60 (R. p. 458a, supra). A portion of White's deposition is omitted for the reason that it appears in plaintiff's case, beginning at line 17, page 459 through line 11th from the bottom of page 461.

Q. Were the contracts made by North Dakota Power & Light Company and Northern Power & Light Company with Middle West Service Company submitted to the board of directors of United Public Utilities Corporation. A. Yes.

Q. Were they approved by that board of directors?

A. Yes.

Q. Do you recall at what meeting that action was taken?

A. No.

Q. Was it at the meeting of March 1, 1937?

A. I can tell by looking at the minutes.

Q. All right, sir. I show you the minutes of that meeting. Now, I show you, Mr. White, the original minutes of United Public Utilities Corporation, referring specifically to minutes of the organization meeting of the board of directors of that company, held in [Philadelphis] on March 17, 1937. Were you present at that meeting? A. Yes.

Q. Now, directing your attention to the 13th page of those minutes, you will read the same, beginning with the second paragraph? Just read it to yourself. Now, Mr. White, having read that portion of the minutes, does that refresh your recollection as to whether or not at that meeting the contracts between North Dakota Power & Light Company and Northern Power & Light Company and Middle West Service Company were submitted to the board and included within the resolution as stated in the minutes? A. It does.

Q. Were they so included? A. Yes.

Q. Was that resolution adopted, do you recall?

A. Yes, it was.

Q. Do you recall whether or not there was any report by you at that meeting as to the estimated aggregate cost to the subsidiaries under those contracts with Middle West Service Company?

A. Yes. The estimated aggregate cost for all of the electric, gas, ice, cold storage and water companies was $30,000 per annum.

Q. In other words, that was for all subsidiaries of United Public Utilities Corporation which had executed similar contracts with Middle West Service Company and not restricted just to North Dakota Power & Light Company and Northern Power & Light Company?

A. That's correct.

A portion of White's deposition is omitted for the reason that it appears in plaintiff's case, beginning at line 8, page 462, through line 15, page 463.

Q. And did you have any reasons of your own for continuing these service arrangements with Middle West Service Company, that you recall? A. Yes.

Q. Would you mind stating what they were?

A. I recognized the need for the judgment of experienced utility men in arriving at administrative decisions, and I welcomed the opportunity to arrange for the services of the Middle West Service Company organization at a cost that was substantially less than I would have incurred had I attempted to set up a supervisory organization of my own to help me in the administration of these businesses and to assist the operating managements of these [subisidiary] companies.

Q. Now, when you made your last answer, was that with relation to the time when you were receiver or with reference to the time after United Public Utilities Corporation commenced business? A. Both.

Q. Both your thoughts were the same? A. Yes.

Q. In other words, as I get your reasons, you wanted experienced knowledge and advice at a minimum of cost?

A. In the light of my direct experience with the men who comprised the staff of Middle West Service Company, I had formed a definite opinion that they could furnish to me the administrative assistance, of which I felt a need, and that they could furnish to the operating subsidiaries the advisory assistance which was desirable for the success of both operating subsidiaries, according to the opinion of both myself and the operating heads of those subsidiaries.

Q. Can you tell us something about the personnel of the Middle West Service Company and its predecessors, receivers of Middle West Utilities Company, with whom you dealt over the years, and under these contracts and arrangements you have been describing? I mean who were some of these gentlemen?

A. In the days of the receivership and trusteeship of Middle West Utilities Company I dealt, among [other], with Mr. Daniel C. Green, who was president of Middle West Utilities Company under the receivership, and later became trustee of that company. I dealt with engineers, such as Edward A. Olsen and George Mills.

Mr. Benson: George A. Mills?

A. George A. Mills; yes; with Frank E. Kruesi, up to the time he left Middle West Utilities Company organization to become president of the Dakota Companies; with J. B. Wilson who, as a sponsor of—as engineer sponsor of a group of properties, occupied a position comparable with that of Mr. Olsen and Mr. Mills; Mr. James H. Buell, with Mr. Grover C. Neff; who was president of Middle West Utilities Company under the receivership prior to the advent of Mr. Daniel C. Green, and both before and after holding that presidency was president of the Wisconsin Power & Light Company at Madison, Wisconsin.

Q. Well, now, these gentlemen that you have been telling us about, do I understand you were describing men whom you dealt with in the early days? A. Yes.

Q. By that you mean when you were receiver and trustee?

A. Well, say up to the formation of Middle West Service Company.

Q. Well, that would be up until about January, 1936?

A. That's right.

Q. Well, were there any others that you recall?

A. Yes, if I can recall them. I dealt with the heads of the accounting department, notably Mr. C. E. Packman, who was in charge of that department.

Q. Packman?

A. Yes. I dealt with statisticians and bookkeepers.

Q. We are getting pretty low down on the list now?

A. Yes.

Q. And how about after the inception of Middle West Service Company, specifically, do you have anyone in mind?

A. My dealings were with the same men or successors who occupied comparable positions.

Q. Well, Mr. Green was not there, was he?

A. Mr. Green was not there.

Q. Mr. Neff was not there? A. No.

Q. Or Mr. Olsen? Did he continue?

A. He continued about until 1937.

Q. How about Mr. Kruesi?

A. Mr. Kruesi returned to Chicago and became vice-president, and very shortly after, president of Middle West Service Company, about July, 1937, having previ-

ously been president of our Dakota subsidiaries for four years.

Q. How long did you have dealings, then, with Mr. Kruesi, after 1937, approximately?

A. Continuously up until and after October.

Q. 19th? A. 1945.

Q. How about Mr. Buell?

A. I had dealings with Mr. Buell from the beginning of the receivership up until at least October 19, 1945.

Q. Was there a Mr. Purchas among that personnel?

A. Mr. Purchas became associated with Middle West Utilities Company shortly after the beginning of the receivership, and upon the formation of the Middle West Service Company transferred his association to that company, and he is still there.

Q. Is there a Mr. Vennard among that personnel, that you dealt with? A. Yes.

Q. From when to when?

A. Mr. Edwin Vennard was with Middle West Utilities Company prior to its reorganization, according to the best of my recollection, and has been a vice-president of Middle West Service Company from its inception to the present time.

Q. Anybody else that you recall?

A. I have dealt with Mr. Gazin frequently, who is the same Mr. Gazin about whom I have previously testified.

Q. Is that with both the receivers of Middle West Utilities Company and the Middle West Service Company, or just with the latter?

A. As I recall, Mr. Gazin came to work for the receivers or trustee of Middle West Utilities Company about the beginning of 1935, and since the organization of Middle West Service Company has been associated with that company.

Q. Now, Mr. White, over this period of time you have been describing, namely, when you were receiver and trustee and subsequently as president of United Public Utilities Corporation, down to October 19, 1945, I understand from your testimony that you have had dealings and relationships with some or all of these men whom you have described to us during that period. Not all of them at the

same time, but some of them over different periods. Is that right?

A. Yes, and with all of them at some time.

Q. With all of them at some time? A. Yes.

Q. Well, can you tell us in a general way about the nature of the services which they rendered to you and to your subsidiaries, the Dakota subsidiaries, and any other subsidiaries of the U. P. U. Corporation?

A. Those services rendered to the subsidiaries are outlined in rather complete detail in the agreements between the operating subsidiaries and Middle West Service Company.

Q. Do you know whether or not the services, as outlined in those agreements, were in fact performed and rendered by these various personnel of Middle West Service Company and of the receivers prior thereto?

A. Not in every instance, because the operating subsidiaries of United Public Utilities Corporation had not called upon Middle West Service Company to furnish all of the services which the service company has had available for them. I refer particularly to advice and assistance on treasury matters.

Q. Are these matters which they do not avail themselves of?

A. Yes. Also I have in mind such services as assistance in the preparation of annual reports, and there are probably some other minor services.

Q. How about supervisory services, did they render any supervisory services to those operating subsidiaries, to your knowledge?

A. In general, except upon request from me, it has been understood between Middle West Service Company and myself that their services to our subsidiaries are advisory and not supervisory.

Q. When you say "our" subsidiaries, you mean all of the subsidiaries of United Public Utilities Corporation which had similar contracts with Middle West Service Company? A. Yes.

Q. All right, sir. I didn't mean to interrupt you. Will you proceed?

A. (Continuing) —and except by arrangement with me they have not undertaken to supervise. In certain mat-

ters, notably construction of property additions, such as power plant or transmission lines, I have asked the engineering department of Middle West Service Company to supervise the technical details of construction projects.

Q. Did they do so? A. Yes.

Q. Only on your request? A. Yes.

Q. Have you completed your statement regarding this matter? A. I guess so.

Q. All right. I believe you previously testified some time today that you received copies of memoranda, reports, correspondence, and so forth, which passed between members of Middle West Service Company and the operating personnel of the Dakota subsidiaries. Is that correct? A. Yes.

Q. Did you also receive copies of such memoranda, reports, correspondence and similar papers that passed between the personnel of Middle West Service Company and the operating heads of the other subsidiaries of United Public Utilities Corporation? A. Yes.

Q. Did you deal with the gentlemen whom you enumerated a little while back as being among the personnel of the Middle West Service Company and the predecessor, receivers of Middle West Utilities Company, on these matters of service arrangement and services rendered to your operating subsidiaries? A. Yes.

Q. You knew these men personally? A. Yes.

Q. Over the period of time you have testified? A. Yes.

Q. Mr. White, during the period of time you dealt with the Middle West Service Company, and the receivers of Middle West Utilities Company, and the various members of the personnel described, were you satisfied, as receiver, and later as trustee, of United Public Utilities Company, and later as president and director of United Public Utilities Corporation, and as a director of the Dakota subsidiaries of that last named company, with the services rendered by that personnel and by those organizations to your operating companies? A. I was satisfied.

Q. Now, also, Mr. White, were you satisfied as receiver, as trustee, president and director, as described in the preceding question, with the services rendered by Middle West Service Company and the preceding receivers of Middle West Utilities Company, and the various personnel thereof, which you have described before, rendered by

them to the Dakota subsidiaries of your receivership and then later of United Public Utilities Corporation? A. Yes.

Q. Yesterday afternoon you described for me the members of the personnel of Middle West Service Company and of the receivers of the prior Middle West Utilities Company with whom you had had dealings from the time of your appointment as receiver on April 15, 1932, and continuing on down to October 19, 1945. Did you, in your description, include all of the personnel, or are there other that you would care to add?

A. Well, I didn't intend that list as a complete list of all the people in Middle West Service Company with whom I discussed the affairs of our company. I do recall, however, that there were a few important omissions because there were a few members that I did not name with whom I had had many discussions, and I have in mind particularly Mr. R. M. Winnsborough, who was the head of the department of public relations, including advertising and including counsel on such matters as dealing with agitations for public ownership, the securing of franchises or franchise renewals. Another department head with whom I consulted a number of times, and who made one or more trips over the property with me—

Q. By "property" you mean Dakota?

A. Over the Dakota property with me, was Mr. M. R. Rodger, who was a counsellor on merchandising problems, merchandising being used in the public utility business to build load. I believe your original question was framed to include members of the Middle West Service Company whom I consulted with respect to the problems of any of the U. P. U. subsidiaries, and therefore I should include Mr. Fred Armbruster, a gas engineer.

Q. All right.

A. Very frequently on matters affecting my gas subsidiaries, and with Mr. E. G. Waters, who was a specialist in hydraulic and refrigeration engineering, with whom I have consulted on problems affecting U. P. U. subsidiaries engaged in the water business, the ice business and the cold storage business. I have made inspection trips over the properties of U. P. U. subsidiaries, accompanied by each of those men. I believe those are the most important omissions.

Q. Now, I neglected to ask you yesterday, and I will ask

you now, and in order to shorten it I will not ask you when you met each one of these individuals you have named, but rather I will ask you how many of them you knew prior to your appointment as receiver of United Public Utilities Company, on April 15, 1932, if any of them?

A. To the best of my recollection I had never met, prior to my appointment as receiver on April 15, 1932, any of the gentlemen whose names I have mentioned, or any other members of the service organization, with the exception of Daniel C. Green, whom I had met about 1913, when he was general manager of a utility company in Arkansas, whose securities, whose bonds were being handled at that time by the investment banking house with which I was then associated. Between that period, from say 1913 to not later than 1915 or '16, and my appointment as receiver, I had not seen Mr. Green.

Q. You mean during the period from approximately 1915 to 1916 to and including April 15, 1932, you had not seen Mr. Green? A. That is correct.

Q. Are there any other exceptions besides Mr. Green, that you recall?

A. Mr. Frank Kruesi lived two blocks from my home in Evanston, and I knew that he lived there, but to the best of my recollection I had not met him until I was appointed receiver on April 15, 1932.

Q. And each of the other members of the personnel of the service organization, which you have described, you did not meet until after April 15, 1932? A. That is correct.

Q. There has been mentioned in the testimony, particularly in your testimony, from time to time, the question of joint management of the Dakota subsidiary properties and Northwestern Public Service Company; also references to a general office or central office. I would like to go into that a little bit more at this time. Suppose we go back to April 15, 1932, when you were appointed receiver. Can you describe for us the situation with reference to joint management or central or general offices which existed at that time, if any?

A. In the United Public Utilities Company system?

Q. With reference to the Dakota subsidiaries.

A. When I was appointed receiver of the U. P. U. company on April 15, 1932, I found that there was a joint

management set up on the Dakota properties, including both the subsidiaries of U. P. U. and Northwestern Public Service Company, under which the operating affairs of those companies were being directed by a president who kept—Mr. T. T. Parker, who made his headquarters in Omaha, and a general office at Huron, under the immediate charge of Mr. C. J. Strike, vice president.

Q. You said Dakota subsidiaries. Is that North Dakota Power & Light Company and Northern Power & Light Company, and Knife River Coal Mining Company? A. Yes.

Q. Those three, together with Northwestern Public Service Company, is that right? A. Yes.

Q. Now, at that time, I think you have previously testified, you had 21 properties in the U. P. U. Company system. Were there any joint management arrangements existing at that time with reference to any of the other operating subsidiaries of the U. P. U. Company?

A. Yes, there was a joint management—there were one or more joint management arrangements, under which the operations of all of the 21 U. P. U. subsidiaries were affected. I reported each of those operating, joint operating arrangements to the court in detail, both in my first receiver's report and my second receiver's report.

Q. Will you describe them briefly for us, Mr. White?

A. Yes. There were seven separate operating arrangements. From Marion, Ohio, the Ohio Electric Power Company, which I believe was a subsidiary of Middle West Utilities Company, or one of its affiliated holding companies.

Mr. Benson: What did you call that, Ohio Electric Power Company?

A. Yes. Directed the operations of the seven subsidiaries of U. P. U. operating in Ohio. From Indianapolis, Indiana, Public Service Company of Indiana, a subsidiary of Midland United Company, which in turn was an affiliate of Middle West Utilities Company, operated the properties of the four Indiana subsidiaries of the U. P. U. Company. From Louisville, Kentucky, Kentucky Utilities Company, a subsidiary of Middle West Utilities Company, operated the two Kentucky subsidiaries, which were subsidiaries of United Public Service Company but not of United Public Utilities Company.

Q. You were also receiver of United Public Service Company at the same time?

A. Yes. From Jackson, Mississippi, Southern United Ice Company, a wholly owned subsidiary of United Public Service Company, operated four ice companies, which were subsidiaries of United Public Utilities Company. From Dallas, Texas, Central and Southwest Utilities Company operated two Arkansas gas subsidiaries of United Public Utilities Company. From Dallas also was operated all six subsidiaries of Southern United Gas, of which I was also receiver. I have described the sixth arrangement under which Dakota subsidiaries of United Public Utilities Company and Northwestern Public Service Company were jointly operated. The seventh joint management arrangement was one under which the City Ice Company of Kansas City, a subsidiary of Middle West Utilities Company, operated two ice subsidiaries of United Public Utilities Company, one being an ice and cold storage plant in [Forth] Worth, Texas, and the other an ice manufacturing company in [Forth] Smith, Arkansas.

Q. Do you recall the date when you filed this report with the Court? A. June 14, 1932.

Q. At that time, Mr. White, had you made any change in the joint management situations which you just described to us, and which you had reported to the Court?

A. No.

Q. Thereafter did you make any changes in any of those situations? A. Yes.

Q. Well, will you please recount for us what changes you made?

A. The first part of such a recital could be more accurately and more concisely if I referred to my second receiver's report.

Q. That is the report that is marked Defendant's Exhibit 6 for identification, part of which is Defendant's Exhibit 230 (R. p. 1082, supra). A. Yes.

Q. All right. Please do so. I just want the history.

A. Within the following eleven months after filing that first receiver's report I had caused a divisional operating office to be established at Greenville, Ohio, by Mr. C. E. Lakin, to take over from Ohio Electric Power Company and from Public Service Company of Indiana the opera-

tions of the seven Ohio subsidiaries and the four Indiana subsidiaries.

Q. Mr. C. E. Lakin is the same Mr. Lakin whom you have testified about previously in these proceedings?

A. Yes, and who still is in charge of the operations of those eleven subsidiaries in Ohio and Indiana.

Q. For United Public Utilities Corporation? A. Correct.

Q. All right.

A. I transferred to Southwestern Gas & Electric Company, Shreveport, Louisiana, the supervision of the operations of the two Arkansas gas subsidiaries of United Public Utilities Company and all of the six gas subsidiaries of Southern United Gas Company, and one ice manufacturing subsidiary of Public Utilities Company. I personally took over from City Ice Company of Kansas City the supervision of the ice manufacturing and cold storage subsidiary in [Forth] Worth, Texas, which was a subsidiary of United Public Utilities Company. Subsequently I transferred from Southwestern Gas & Electric Company the operating supervision of all the subsidiaries of United Public Utilities Company, or United Public Utilities Corporation.

Q. Do I understand your testimony correctly, from the detail you have just given us, that you terminated the arrangements which you found existing on the operating subsidiaries of U. P. U. Company, and made arrangement for other supervision or by direct supervision from your office, on all of such subsidiaries except three, namely, the Dakota subsidiaries? A. That's correct.

Q. Did you make any inquiry at any time into, or give any consideration at any time to terminating the joint management which you found in 1932 existing with reference to the three Dakota subsidiaries? A. Yes.

Q. What consideration did you give to that problem?

A. I gave general consideration to it in the days of the receivership, along with consideration of the same problem on all of our subsidiaries. It was my objective to make any management changes where I felt that such changes would result in better direction of the subsidiary business at comparable cost or equal direction at lower cost. In the case of some of the subsidiaries of United Public Utilities Corporation I was dissatisfied, I became dissatisfied with the quality of the direction and the cost

of that supervision. I considered the matter of a change in the joint management of the Dakota companies early in the receivership. I was the first one, as far as I know, to express dissatisfaction with the competency of Mr. T. T. Parker, as president of those companies, and in about a year after my appointment as receiver he had been relieved of his position.

Q. Who succeeded Mr. Parker, if you know?

A. Mr. Kruesi.

Q. What, if anything, did you have to do with Mr. Kruesi's election?

A. I was called on to tell the receivers of Middle West Utilities Company whether it would be acceptable to me from the standpoint of the subsidiaries of United Public Utilities Corporation—

Q. Company?

A. (Continuing) Company, to have Mr. Kruesi head up that joint management.

Q. Did they ask for your approval?

A. Yes, and asked for my approval of the salary that he was to be paid.

Q. Did you approve his selection and the salary paid to him? A. Yes.

Q. Was he also at that time put on the board of directors of the Dakota subsidiary companies? A. He was.

Q. Were you asked to approve his selection as a director of those companies? A. I do not recall that I was.

Q. Now, have you finished explaining to us the consideration that you gave with reference to the possible change in that situation, that you found at the Dakota companies?

A. I think my statement is complete. I am confident, however, that your summary question completes the picture, because the fact is that in due course all joint management arrangements that existed at the time of the receivership in 1932 were eliminated, with the exception of the joint management, which operated the Dakota subsidiaries of U. P. U. and Northwestern Public Service Company.

Q. You continued that arrangement. Is that it? A. Yes.

Q. Down to October 19, 1945? A. Yes.

Q. I don't mean by that not to except from that the

changes of personnel as to which there has been previous testimony, but the arrangement was continued?

A. There were some changes in the arrangement, but they were relatively unimportant.

Q. Now, what reasons did you have, Mr. White, if any, for continuing the Dakota subsidiary joint management arrangements?

A. I could never convince myself that from the standpoint of myself as an administrator of the ownership of those companies, or from the standpoint of the companies themselves, or from the standpoint of the stockholders of United Public Utilities Corporation, that I could change the arrangement to advantage. I felt that no arrangement could be made in which operating direction of the business of equal merit could be provided for equal cost, or even that an organization, an independent organization of less but acceptable merit could be provided at or less than the cost of the existing arrangement.

Q. Did you ever at any time make any exploration of the possibility of setting up a separate office for the Dakota subsidiaries? A. Yes.

Q. Do you recall when that was, Mr. White?

A. I don't believe I can fix the date.

Q. Was it during the receivership or after U. P. U. Corporation took over?

A. I had discussions on the subject both during and after the receivership, and I also recall that after one of those discussions I asked that the estimated cost of an independent set-up be prepared for me, in comparison with the cost under the joint management arrangement. That study was made, and Mr. Sandstedt came into Chicago and sat down with Mr. Peale and me, and we went over it in considerable detail, but I cannot recall the date.

Q. Was Mr. Peale with you during the receivership?

A. Yes.

Q. Well, there was such a discussion in Chicago, between you, Mr. Peale and Mr. Sandstedt? A. Yes.

Q. Was anyone else present, if you recall?

A. Not that I can recall.

Q. And you fix the time somewhere between April 15, 1932, and October, 1945?

A. Oh, yes. It was early, in the first half of that period.

Q. I see.

A. I think it was in the first half of that period, I should say.

Q. Some time between April 15, 1932, and let us say, 1938, 1939? A. Yes.

Q. Now, you say that report was made and it was discussed. Do you recall what the results of that report were? Just what did that show? Would it be desirable or undesirable?

A. Well, that was not the purpose of the report. The purpose of the report was to show the cost.

Q. Well, what did it show with reference to the cost?

A. The desirability was something on which I was reserving judgment.

Q. You tell it in your own way?

A. The analysis as submitted showed that for that type of organization—

Defendant's Exhibit 281, which is also referred to as Defendant's Exhibit 75 in White's deposition, was received for the purpose of showing a report which was prepared in the Huron office and submitted to White and discussed in accordance with his testimony. The first page of Exhibit 281 reads as follows:

Defendant's Exhibit 281.

Comparative Present and Proposed Costs by Companies
(Northwestern–U. P. U.)

The following analysis shows the actual General Office salaries and expenses for the year 1937 in comparison with a suggested General Office in Bismarck for handling the U. P. U. Companies.

Exhibit "A" shows actual salaries and expenses for the Year 1937 with the allocation to the companies, while Exhibit "B" shows the estimated salaries and expenses with a separate office in Bismarck for the U. P. U. Companies. These exhibits are summarized as follows:

Salaries	Northwestern Public Service Exhibit "A" Actual G. O. Expense 1937	Exhibit "B" Estimated With Separate Office	U. P. U. Companies "Exhibit "A" Actual G. O. Expense 1937	Exhibit "B" Est. With Bismarck Office
Executive	12,080	9,660	6,580	9,320
Treasury & Accounting	23,992	20,240	13,068	13,380
Engineering	9,840	13,100	5,360	6,600
Sales Promotion	5,904	6,120	3,216	3,600
Miscellaneous	4,778	6,600	2,602	....
Billing	3,949	4,260	2,151	3,200
Load Dispatching	2,719	2,720	1,481	1,480
Total Payroll	63,262	61,920	34,458	37,580
Other Expenses	32,262	28,100	17,313	14,800
Total G. O. Expense	95,524	90,020	51,771	52,380

Under the proposed plan there is a savings of approximately $5,500 per year for Northwestern Public Service Company, while U. P. U. expense will be approximately the same as under the present arrangement.

Insofar as possible it is desirable to take care of present employees from a company as well as the employee's standpoint in setting up a separate organization for the U. P. U. Companies, and in Exhibit "B" we have given careful consideration to this phase of the problem.

There would be some transfer of equipment such as automobiles, office equipment, etc., all of which at present is owned by Northwestern. There would also be the purchase of one billing machine, unless it was deemed more advisable to contract this work to Northwestern on a unit basis.

The Exhibit also contains two detailed sheets as to the 1937 general office payroll and expense and the allocation thereof between defendant and the U. P. U. Companies, and also two detailed sheets showing similar information as to defendant and the U. P. U. Companies with a proposed separate general office for the U. P. U. Companies at Bismarck.

Q. Who did you say prepared the report?

A. It was prepared in the Huron office, and was submitted to me by Mr. Sandstedt, and I think that Mr. Sandstedt himself prepared the report.

Q. Now, Mr. White, if you will please refer to Defendant's Exhibit 75 for identification and tell me whether or not that refreshes your recollection as to the date or approximate date of that conversation with Mr. Sandstedt and Mr. Peale?

A. Well, it does to the extent that the analysis used in the projection is based on actual figures for 1937, indicating that the time was some time in 1938.

Q. Well now, Mr. White, do you recall, independently of this Exhibit 75 for identification, what the results were which Mr. Sandstedt's report showed regarding a comparison of the projected costs with separate offices as against the actual costs for 1937?

A. As I recall the report, it had been prepared on the basis of my request, that it projects for the Dakota subsidiaries of United Public Utilities Corporation a central office at Bismarck, North Dakota, with a minimum staff, and that it need not propose for that staff as many specialists as department heads as there were in the joint management at Huron, but that where possible departmental responsibilities should be combined in one man at Bismarck, even though those responsibilities might actually have been assigned to two or more department heads in the Huron office. The overall effect of the report which Mr. Sandstedt presented showed—

Q. Hold up a minute. I am asking you what result costwise the report shows. Specifically, did it show that the arrangement for a separate office at Bismarck would be advantageous costwise to the Dakota subsidiaries, or disadvantageous?

A. Costwise the report as submitted showed that the cost to Dakota Public Service Company of maintaining such a proposed central office at Bismarck would be approximately the same as the cost that it was incurring under the joint management arrangement at Huron.

Q. Well, what is your recollection as to what the report showed costwise with reference to Northwestern Public Service Company under such a separate office arrangement for the Dakota subsidiaries?

A. The report showed a saving of approximately $5,000 to Northwestern if that company should be operated from a general office in Huron without relation to any operations of Dakota Public Service Company.

Q. All right. Now, Mr. White, did you discuss this report at the meeting you have told us about with Mr. Sandstedt and Mr. Peale? A. Yes.

Q. Did you agree with the findings as set forth in this report, which is Defendant's Exhibit 75 for identification, which you have just testified to, separately?

A. No, not altogether.

Q. Would you tell us what happened?

A. We had no occasion to object to the figures as presented in that report but as I recall we felt that for an adequate, independent management staff at Bismarck it would require either additional personnel not contemplated in the report, or executives of a caliber greater than was indicated in the report by the salaries that had been projected, and to the best of my recollection we felt that the cost of such Bismarck office would be about $15,000 a year greater than was presented in that report.

Q. You say "we felt". To whom do you refer?

A. Mr. Peale and I.

Q. The $15,000 estimated additional expense of the Dakota subsidiaries was as a result of the consideration and thinking on the part of yourself and Mr. Peale. Is that right? A. Yes.

Q. You have already testified that you made no change in the joint management arrangement, so I assume from that that you abandoned the idea of establishing any separate office? A. Yes.

Q. Now, Mr. White, you have mentioned from time to time various parties who participated in that joint management. I think it would be helpful if you could review for us at this time some of the more prominent ones with whom you had dealings from 1932 on down to 1945. You have mentioned Mr. Parker. You have mentioned Mr. Kruesi. Who else was there? I think you mentioned Mr. Strike. Can you tell us who they were and what their capacities were? A. Mr. Buckmeier.

Q. These are in addition to Mr. Parker, Mr. Kruesi and Mr. Strike? A. Yes.

Q. Who was Mr. Buckmeier?

A. Mr. Buckmeier was in charge of the accounting of all companies in the joint—general office at Huron.

Q. During the entire period?

A. He was connected with the accounting during the entire period, but Mr. Sandstedt was really in charge of the accounting department, at least during the early years of the period.

Q. I see. Well, who was Mr.— All right, go ahead.

A. I presume I have indicated sufficiently that I had many dealings with Mr. Sandstedt?

Q. Yes. I was going to ask you, who was Mr. Sandstedt during that period?

A. I believe his title—I believe there were changes in his title, but during a great portion of the time he was the vice president.

Q. Down to when? A. His death.

Q. In 1944? A. In 1944.

Q. All right. A. I had dealings with Mr. Bayles.

Q. Who was Mr. Bayles?

A. Mr. Bayles was an engineer in charge of transmission lines, substations, distribution problems—

Q. Anybody else?

A. (Continuing) —and with his assistant, who succeeded to Mr. Bayles' position when Mr. Bayles went to war Mr. Stanley Sickel.

Q. And he took over Mr. Bayles' duties when Mr. Bayles left for the service?

A. Yes, having previously been Mr. Bayles' assistant.

Q. I see.

A. Mr. Stokke, who had charge of power plants.

Q. Did that include mechanical engineering?

A. That would be designated—his work would be designated, I believe, as mechanical engineering, and Mr. Bayles' work as electrical engineering. Mr. E. M. Nottestad and I had numerous conversations about the merchandising activities of the U. P. U. subsidiaries. Mr. Nottestad had supervised those activities, and directed them.

Q. Anybody else you recall? How about Mr. Gazin. Do you know Mr. Gazin?

A. Mr. Gazin was the predecessor of Mr. Stokke.

Q. He did the same work as Mr. Stokke that you have described? A. Yes.

Q. That is, power plants, mechanical, inside? A. Yes.

Q. He preceded Mr. Stokke?

A. Yes. I had correspondence with Mr. Gazin. I talked with him in the Huron offices, but unlike Mr. Stokke and the other engineers, I did not take a trip over the properties with him. I did on a number of occasions with several others, with all of the other engineers.

Q. How about Mr. Albert? Was Mr. Albert there?

A. Yes, for a time Mr. Albert was the predecessor of Mr. Bayles.

Q. I see. Doing the same job as you have described with reference to Mr. Bayles?

A. Yes, and I went over the properties more than once with Mr. Albert.

Q. How about Mr. Sanborn? I think you have testified previously about Mr. Sanborn?

A. He was president of the company, and I have testified as to correspondence, matters, in which he was receiving copies of the same correspondence that I either received or sent.

Q. Well was the correspondence that you testified to specifically in this deposition hearing the only correspondence which you had with Mr. Sanborn?

A. Oh, no. I corresponded continuously with Mr. Sanborn, as I did with Mr. Strike and Mr. Sandstedt and Mr. Kruesi. During Mr. Sanborn's tenure as president, he had accompanied me on all trips that I took over the properties. I had talked to him on numerous occasions in my office, he and Mr. Sandstedt having been in Chicago more frequently than any of the members of the central office staff. I have talked with him numerous times on the long distance telephone.

Q. I don't think we have asked you specifically with reference to Mr. Kruesi. You have mentioned him. Now, did you go over the properties with Mr. Kruesi at any time?

A. I think Mr. Kruesi accompanied me on my trips over that property at least 80 per cent of the time. He went with me before he became president of the Dakota companies. He went with me on every trip that I took while he was president, and after he resigned as president of those operating companies, and became president of Middle West

Service Company, he accompanied me on most of my trips over those properties.

Q. Was there a Mr. McArthur in that general management?

A. Yes. Mr. McArthur is vice president of those companies, in charge of public relations and franchises; and I have had many meetings with him.

Q. You say you had many meetings with him? A. Yes.

Q. Was there a Mr. Dunn?

A. Yes. Mr. William M. Dunn.

Q. Who was he?

A. He is now the treasurer of Northwestern Public Service Company, and immediately following Mr. Sandstedt's death in 1944, he was elected, with my prior approval, as treasurer and director of Dakota Public Service Company, and continued in that office until October 19, 1945.

Q. Well, Mr. White, you have testified, during the description of these various people that you had correspondence with certain of them and personal interviews with certain of them. Would your testimony as to the ones you have mentioned prevail or obtain with reference to the others? That is, did you have correspondence with all of these people who you talked about, or personal interviews, from time to time?

A. The list that I have named would be people that I had either correspondence or personal [inteviews] with.

Q. The list you have named is not exclusive, is it? You didn't name all of them?

A. Probably not, but I did not want to give the impression that I was in active correspondence with some of those department heads.

Q. I see. Well, did you meet all of those people personally at one time or another? A. Yes.

Q. The testimony has shown reports and memorandum and recommendations submitted to you by various of these people you have mentioned. Did they from time to time submit to you memoranda, studies, and their recommendations as to various matters beyond those which we have already discussed in these depositions? A. Yes.

Q. Well, now, Mr. White, I take it that during 1932 to October 19, 1945, you had dealings with the various per-

sons whom you have just previously testified about, either some of them all at one time or all of them on some one or more occasions. I will ask you now whether or not you were satisfied with that personnel, as to their ability in the various positions which they held? A. I was.

Q. Were you satisfied as to the results which were being accomplished? A. Yes.

Q. Were you satisfied, Mr. White, over that period, with respect to those persons as to their personal integrity and loyalty to the interests of the Dakota subsidiaries?

A. Yes, I was so satisfied.

Q. Entirely so? A. Yes.

Q. And were you satisfied as to the ability and integrity and loyalty of that personnel, in your capacity as president and a director of the United Public Utilities Corporation, and as a director of Dakota Public Utilities Corporation, and as a director of Dakota Public Service Company, and its two predecessor companies, namely, North Dakota Power & Light Company and Northern Power & Light Company? A. In those capacities I was also satisfied.

Q. To the extent that that personnel performed services for the Knife River Coal Mining Company, were you also satisfied as to the same matters in [you] capacity as a director of Knife River Coal Mining Company?

A. I was not a director of Knife River Coal Mining Company.

Q. You were not a director of Knife River Coal Mining Company? A. No sir.

Q. As president and a director of United Public Utilities Corporation, and as a director of the Dakota subsidiaries thereof, excluding Knife River Coal Mining Company, were you satisfied with the monetary or financial results produced by those subsidiaries under the direction and management of the personnel you have just testified about?

A. I was so satisfied.

Q. Mr. White, you have testified previously as to your satisfaction, in the capacities as president and director of United Public Utilities Corporation, and as a director of the particular Dakota subsidiaries which were in existence at the time of my inquiries, with the five mill energy interchange rate, the [intercpacity] exchange rate of $13.20 per kilowatt firm demand, and the transmission line charges of

$20,000, with respect to the dates when the various contracts pertaining to those rates were executed by and between the Dakota subsidiaries and Northwestern Public Service Company. Now, I will just ask you over the entire period, commencing with the receivership and continuing to October 19, 1945, whether or not as president and director of United Public Utilities Corporation, and as a director of the particular Dakota subsidiaries of that company involved, and as receiver and trustee where applicable, you were satisfied with the five mill energy interchange rate, and that the same was fair, just, reasonable and proper insofar as the Dakota subsidiaries of United Public Utilities Corporation or United Public [Utilties] Company, as the case may be, were concerned?

A. I was so satisfied.

Q. I will ask you also, Mr. White, whether or not as president and director of United Public Utilities Corporation and as a director of the particular Dakota companies of that company involved, you were satisfied that the $20,000 annual charge paid by Northern Power & Light Company and subsequently by the Dakota Public Service [Compnay], under the applicable contracts, on account of the interconnection facilities, was fair, just, reasonable and proper charge insofar as those Dakota subsidiaries of the United Public Utilities Corporation were concerned?

A. I was so satisfied.

Q. Were you satisfied as to that $20,000 per annum charge during the entire period that the contracts providing for such charge were in force and effect? A. Yes, I was.

Q. Now, I will ask you further, Mr. White, whether or not, in your capacity as president and director of United Public Utilities Corporation, and as a director of the Dakota subsidiaries of that company which were involved in the particular contracts, you were satisfied that the charge of $13.20 per kilowatt of firm demand per year provided for in the 1938 interchange capacity agreement and the respective subsequent contracts providing for that same charge, I will ask you whether or not you were satisfied that that charge was fair, just, reasonable and proper insofar as the Dakota subsidiaries of United Public Utilities Corporation were concerned?

Q. Were you so satisfied, over the entire period that the

contracts providing for that interchange capacity charge were in operation and in effect? A. Yes.

Q. And I further ask you, Mr. White, whether or not since the execution of the supplemental agreement amending the 1941 contract, commonly known as the 1943 supplement, you have been satisfied from the date of that agreement to October 19, 1945, in your capacity as president and director of United Public Utilities Corporation, and as director of Dakota Public Service Company, that the acceleration provisions provided therein upon termination of the 1941 contract were fair, reasonable, just and proper insofar as the same affected Dakota Public Service Company?

Q. Mr. White, do you know whether or not Northern Power & Light Company made any payments to Northwestern Public Service Company under the 1936 contract?

A. Yes.

Q. Were those payments made with your approval?

A. Yes.

Q. And do you know whether that company, Northern Power & Light Company, made any payments to Northwestern Public Service Company under the 1938 contract?

A. Yes, they did.

Q. Were those payments made with your approval?

A. Yes, they were made with my approval.

Q. Do you know whether or not Northern Power & Light Company received payments from Northwestern Public Service Company under the 1936 contract?

A. The settlements under that contract were made on the basis of net balances of energy purchased and sold, and I don't recall whether or not Northern Power & Light Company in any one month purchased more energy under that contract than it sold during that month, but in general Northern Power & Light Company was selling more energy under the contract than it was buying, and therefore was usually required to make payment.

Q. It would be the other way around, wouldn't it, Mr. White?

A. Was required to receive payment for a net balance of energy sold.

Q. Do you know whether they did receive the payments for those net balances? A. Yes, they did.

Q. Did you approve the amounts of payments which were received by Northern Power & Light Company?

A. Yes, I did.

Q. Do you know whether or not, Mr. White, Dakota Public Service Company, subsequent to July 1, 1939, paid any moneys to Northwestern Public Service Company under the 1939 and 1941 contracts? A. Yes, it did.

Q. Did you approve those payments?

Mr. Benson: How do you know?

A. I had each month a record of the financial statements of Dakota Public Service Company, including balance sheets, which listed the accounts payable, and if and to the extent that payments of those charges were not made, such charges would have been listed as an accrual in those monthly balance sheets. Furthermore, those monthly statements included an income statement for the month in which payment under those contracts were included as operating charges for the month. Still further, I had monthly operating reports, showing the amounts of the cost to Dakota Public Service Company under those contracts, which could be used as a basis to check against the financial statements that I [preveriously] referred to.

Mr. Stafford: Will you read my last question? "Q. Did you approve those payments?" A. Yes.

Mr. Robinson: Mr. White, you have just stated that you received monthly certain financial reports and operating reports. Did you examine these reports when they were received? A. Yes.

Q. Was that a regular practice, to examine these reports? A. Yes.

Q. Did you make comparisons from time to time with monthly reports made from month to month?

A. Not as a regular practice did I have occasion to make comparisons of one month's report with another month's report, except as comparisons were made in each of those monthly reports for the comparative periods of the preceding year.

Mr. Stafford: Q. Mr. White, those reports which you have been describing, did they show the amounts of money paid from one company to the other, whichever way it

went, on the five mill interchange of energy? Did they show that information?

A. To the best of my knowledge they did.

Q. Did they show the amounts paid on the $20,000 per annum charge, which I believe was payable $1,666.66 a month? A. Yes.

Q. Did they show the amounts paid under the inter-capacity exchange agreement?

A. According to my recollection they showed them under the cost of purchased power, with an exhibit to break down the details and show that item.

Q. You did have knowledge of those payments as they were made, and your knowledge was current?

A. As I recall, yes.

Q. Were the payments made by the Dakota Public Service Company to Northwestern Public Service Company under these contracts and the amounts received by Dakota Public Service Company from Northwestern Public Service Company under these contracts, paid and received with your approval? A. Yes.

Q. Mr. White, during the course of your familiarity with these properties, either as receiver, trustee, or in your capacity as a director of the Dakota subsidiaries, and president and director of United Public Utilities Corporation, do you know whether or not there was any particular method of operating the properties followed by the operating personnel? A. Read that, will you?

Q. I specifically refer to the operation of the plants, which plants were on the line and which plants were off the line, and so forth. Do you know whether or not there was any such policy or plan of procedure followed?

A. (Read) I knew that the company had a policy—

Mr. Stafford: Q. You say you know that was the policy and the instructions given to the load dispatchers. Did you approve of that policy? A. Yes.

Q. Did you have occasion to observe at any time, Mr. White, whether that policy was followed?

A. Yes, I did have occasion to observe.

Q. When was that?

A. I have talked with the load dispatcher at Aberdeen and discussed his board on the wall, which showed what

plants were on the line at the moment of my visit in that room; asked him as to the amount of the system load, and the plants that were furnishing that load, and how much.

Mr. Benson: When was that conversation?

A. I have had at least half a dozen conversations of that sort with the load dispatcher on the occasion of visits at the Aberdeen plant during this period.

Q. Mr. White, you have testified throughout that United Public Utilities Corporation owned the securities and common stocks of Dakota Public Service Company and Knife River Coal Mining Company down to October 19, 1945?

A. Yes.

Q. Did they at that time sell those securities and stock to anyone else?

A. On October 19, 1945, United Public Utilities Corporation delivered to Montana-Dakota Utilities Co. all of the outstanding bonds, stock and notes of Dakota Public Service Company, the entire amount of which had theretofore been owned by United Public Utilities Corporation, and received payment in full on that date of the amount due under a contract or agreement of sale that had previously been entered into with Montana-Dakota Utilities Company.

Q. Do you recall when the price was agreed upon between United Public Utilities Corporation and Montana-Dakota Utilities Co.?

A. Yes. It was agreed on about April 24, 1945, and I might add that the price agreed on also included United Public Utilities Corporation's holding of Knife River Coal Mining Company.

Defendant's Exhibit 282, which is also referred to as Defendant's Exhibit 76 in White's deposition, was received in evidence. It is a conformed copy of a contract consisting of 12 pages and one cover page and 6 additional pages covering Exhibits "A" and "B", respectively. The contract was executed between United Public Utilities Corporation and plaintiff, dated July 2, 1945, relating to the sale by United Public Utilities Corporation to plaintiff of all of the outstanding securities, including the capital stock, of Dakota Public Service Company and of Knife River Coal Mining Company. The total price for the se-

curities of Dakota Public Service Company was $6,521,060.74 plus an amount equal to the net income of Dakota Public Service Company from April 30, 1945 to the closing date and the total price for the securities of Knife River Coal Mining Company was $547,461.57 plus a similar amount equal to the net income of that company for the said period. The contract provided as a condition precedent to the seller's obligation to sell the securities of Dakota Public Service Company and of Knife River Coal Mining Company that the Securities and Exchange Commission should have approved the sale of securities of Dakota Public Service Company and that all proceedings before that Commission be carried out in a manner satisfactory to or approved by Messrs. Evans, Bayard & Frick, counsel for the seller. It further provided that the obligations of the buyer to purchase should be subject, among other things, to prior approval (1) by the Securities and Exchange Commission, among other things, of the sale and purchase of the securities and of the liquidation of Dakota Public Service Company by plaintiff; (2) by the Federal Power Commission to the extent of its jurisdiction, among other things, of the purchase of the securities and the liquidation of Dakota Public Service Company by plaintiff; and (3) by the Public Service Commission of North Dakota under the statutes of that State of, among other things, said purchase and liquidation; and that neither Dakota Public Service Company nor Knife River Coal Mining Company should enter into any material contracts other than the contracts listed in Exhibits "A" and "B" to the Agreement, unless approved by plaintiff. The contract further provided that neither the seller nor plaintiff should be obligated to sell or buy the securities of either Dakota Public Service Company or Knife River Coal Mining Company separately, and that it was understood that the sale of the securities of both companies was by way of compliance by the seller with the requirements of Section 11 (b) of the Public Utility Holding Company Act of 1935.

Exhibit "A" attached to and made a part of the Agreement is a list of material contracts of Dakota Public Service Company, which list included as items 22 to 27, the following:

22. Agreement

dated March 31, 1945 between Dakota Public Service Company and Knife River Coal Mining Company. Dakota agrees to purchase annually approximately 35,000 tons of 1¼" Lignite screenings and 95,000 tons of 2" Crushed Lignite. Agreement will be in full force and effect for one year and thereafter unless cancelled by either party by at least thirty days' written notice prior to its anniversary date. This agreement amended May 29, 1945.

23. Contract for Delivery of Coal

dated April 1, 1945 between Dakota Public Service Company and Knife River Coal Mining Company. Covers investment charge and for operation and maintenance of bunker and conveying equipment at Beulah, North Dakota.

24. Agreement

dated July 1, 1941, between Northwestern Public Service Company and Dakota Public Service Company, relating to interchange capacity and energy. Term—10 years.

25. Supplemental Agreement

dated March 13, 1943, between Northwestern Public Service Company and Dakota Public Service Company, supplementing above agreement, eliminates minimum term and provides for termination of contract upon 18 months' prior written notice.

26. Agreement for Allocation of Joint Management Expenses

dated July 1, 1939, between Northwestern Public Service Company, Dakota Public Service Company, Knife River Coal Mining Company. May be cancelled on ninety days' notice.

27. Supervision Agreement

between Dakota Public Service Company and Middle West Service Company, dated July 1, 1939. May be cancelled on ninety days' notice.

Exhibit "B" attached to and made a part of the Agreement is a list of material contracts of Knife River Coal Mining Company, which list included as items 5, 7 and 8 the contracts described under items 22, 23 and 26, respectively, of Exhibit A, and item 6, being the contract between defendant and Knife River Coal Mining Company as to delivery of coal at Aberdeen.

Q. rior to the execution of this contract, of which Defendant's Exhibit 76 purports to be a true copy, did you have any conversations with any representatives of Montana-Dakota Utilities Co. with regard to the contractual arrangements between Dakota Public Service Company and Knife River Coal Mining Company on the one hand and Northwestern Public Service Company on the other?

Mr. Benson: Answer that yes or no. A. Yes.

Mr. Stafford: Q. Do you recall the approximate dates of such conversations? A. During the first six months of 1945.

Q. Well, the contract bears date July 2, 1945. Was it 30 days prior? Let me ask you another question first: Do you recall who you had the conversation with? Maybe that will refresh it better.

A. I can recall of a conversation in the month of April with Mr. Heskett.

Q. April of 1945? A. Yes.

Q. Where, Mr. White? A. In my office.

Q. In your office in Chicago? A. Yes.

Q. Was anyone else present other than you and Mr. Heskett? A. No.

Q. All right, sir. Will you please tell me the substance of that conversation the best you can recall? What did you say to Mr. Heskett and what did he say to you, regarding these contractual arrangements between Dakota Public Service Company and Knife River Coal Min-

ing Company on the one hand and Northwestern Public Service Company on the other?

A. I told him that these arrangements were in effect; told him the principal features of the arrangements, and our reasons for making them.

Q. By "arrangement," do you mean the arrangement as embodied in the 1941 contract as amended by the 1943 amendment? A. Yes, that's what I mean.

Q. Did you tell him anything about the history which antedated the 1941 contract? A. Yes.

Q. Can you tell us in substance what you told him?

A. I told him how the interconnection facilities were originally built, and how the interconnection agreement came into being.

Q. By the interconnection agreement, you mean the 1936 contract? A. Yes.

Q. Exhibit B to the complaint in this suit? A. Yes.

Q. Did you tell him anything with reference to the original of the 1938 contract, Exhibit C to the complaint, if you recall?

A. I don't recall that I told him details of the origin of the agreement. I merely told him that the arrangements included in the 1941 agreement and the 1943 supplement were in effect.

Q. Do you recall whether he made any inquiry of you as to those prior matters, on that occasion?

A. I do not recall specifically that he did.

Q. Did you tell him anything with reference to the common directors and officers who were serving both Dakota Public Service Company and Northwestern Public Service Company? A. I don't recall that I did.

Q. Well, do you recall anything else that you told him on that occasion.

A. Yes. I would like to amend that last answer.

Q. All right, sir.

A. To the extent of saying that I told him in detail as to our joint management setup in Huron, and in the course of that discussion I told him that we did have joint officers, but I do not recall any discussion of directors because the discussion was with respect to the operating features of the business.

Q. Well, do you recall anything further that you said

or that Mr. Heskett said with reference to that subject matter at that time and place?

A. I recall that I gave him as complete a word picture of our business and the operating conditions within the business of Dakota Public Service Company and Knife River Coal Mining Company, as I could, in a period of which I believe was about two hours.

Q. Well, after that conversation with Mr. Heskett, did you have any further talks with him about that same subject matter? A. Not that I recall.

Q. Well, after that conversation with Mr. Heskett, did you have any conversations with any other representative of Montana-Dakota Utilities Co? A. Yes.

Q. Well, who, for instance?

A. Well, Mr. Cecil S. Smith.

Q. Who is Mr. Smith? A. Vice president.

Q. All right.

A. Mr. Gamble, who is vice president. With Mr. Elvig.

Q. Mr. Elvig, the same gentleman who is here?

A. That's right. Who is general auditor of Montana-Dakota Utilities Company.

Mr. Benson: Q. You just asked Mr. Elvig his title, didn't you?

A. Yes, and with Mr. Paul Christopherson, who was of counsel for the company.

Q. Well, do you recall any particular pairing of these people when you had your conversations?

A. To the best of my recollection I told Mr. Cecil Smith about these arrangements at a time when he was in my office in company with Mr. Elvig.

Q. With he and Mr. Elvig in your office?

A. And that I told Mr. Christopherson about them when he was in my office, accompanied by Mr. Gamble.

Q. All right. You have told the approximate date of those conversations. That is, more definite than they occurred between the time you talked to Mr. Heskett and the time the contract was signed. Would that be in that period?

A. I think that would be in the period intervening between my conversation with Mr. Heskett and the signing of the contract.

Q. All right. Now, you can relate as nearly as you rec-

ollect, the substance of the conversation between you three gentlemen concerning the question of these inter-company contracts and arrangments, specifically as to inquiries made by them and the information given to them by you?

A. There are no outstanding features, conversations, that I can possibly recall, except that they represented an effort on my part to explain to them that the arrangements existed, and what the nature of the arrangement was, and if they asked any questions, such questions would have been no more than an ordinary attempt to understand what I was trying to tell them.

Q. Do you have any present recollection as to what explanation you made to them?

A. No more than I attempted to make a full disclosure.

Q. What do you mean by "full disclosure," of the existing arrangements or the then arrangements together with the history, or what?

A. Principally of the arrangements as they existed.

Q. Do you recall now anything more about the existing arrangements? You testified that you gave a general description. Do you recall anything beyond that?

A. Well, I think I am safe in saying that I knew the arrangements fairly well, and it was certainly my disposition to tell them everything I knew.

Q. Well, did you attempt to tell them everything you knew?

A. I did attempt to tell them everything I knew. I cannot make a representation as to the degree with which I succeeded in that attempt.

Q. During the course of those conversations with Mr. Gamble and Christopherson, did you tell them anything about the joint management and the common officers and directors of the companies? Do you recall that, whether you did or not? A. Not specifically.

Q. You do not recall. You could have, but you do not know at the present time? A. No, I do not.

Q. Now, referring to your conversation with Messrs. Elvig and Smith, I believe you said they were together—do you recall about the time that conversation occurred, other than it was during this same general period?

A. On reflection I think that my talk with Mr. Smith

and Mr. Elvig was prior to my conversation with Mr. Heskett.

Q. Where? A. In my office in Chicago.

Q. Was anyone else present besides you three gentlemen?

A. In some phases of those discussions with those two gentlemen, Mr. McClanahan, vice president of my company, was present, as was Mr. Peale, our treasurer.

Q. Mr. McClanahan and Mr. Peale were present part of the time but not all the time?

A. That is correct, to the best of my recollection.

Q. Do you recall whether or not you stated anything to either Mr. Elvig or Mr. Smith regarding the intercompany relations and the contracts and the history thereof, the joint management arrangements and the common officers and directors of those companies, which you had not stated to Mr. Christopherson, Mr. Gamble and Mr. Heskett?

A. I had one or more talks with Mr. Smith, during at least one of which Mr. Elvig was present. Mr. Elvig stayed over in Chicago to acquire some information that he wanted from our records, and he was working in another room in our office during the most of that time. As I recall, he had enough work to do to keep him busy, without participating in the general discussion of our affairs which I had with Mr. Cecil Smith.

(Question read.)

A. In answer to Mr. Stafford's question, the purpose of my conversations with Mr. Smith was to acquaint him as fully as possible with the actual state of affairs in our Dakota subsidiaries, in the course of which I discussed operating personnel, operating relationships with Northwestern Public Service Company, and the principal terms, and the effect of the contracts between Dakota Public Service Company and Knife River Coal Mining Company.

Q. How about the contract between Knife River Coal Mining Company and Northwestern Public Service Company?

A. I told him of those, and also of the contracts between Knife River Coal Mining Company and Dakota Public Service Company and the Knife River Coal Mining

Company contracts with Northwestern Public Service Company.

Q. You mentioned you told him about the operating personnel. Did you include therein the joint management arrangements and the fact that there were common officers and directors of the Dakota Company and Northwestern Public Service Company?

A. I cannot recall specifically that there was discussion.

Q. Do you know whether or not any investigation was made by Montana-Dakota Utilities Co. or representatives on their behalf, of the records, books and other papers of Dakota Public Service Company and Knife River Coal Mining Company?

A. Yes, I recall that investigations were made.

Q. Were the investigations made prior to the execution of the contract, that is, the contract of July 2, 1945?

A. Some of them were.

Q. Some of them were. Were there some investigations made after the contract, too? A. There may have been.

Q. In a prior session I referred to Exhibit D to the complaint in this action, being the contract made and entered into July 1, 1939, between Northwestern Public Service Company and Dakota Public Service Company, and I directed your attention to Article XII, which provides that 1939 contract cancels and supersedes the interconnection contract dated October 7, 1936, Exhibit B of the complaint. I ask you with reference to same contract and the same period, whether you were satisfied that the rates and charges therein provided for to be received by Northern Power & Light Company were fair, reasonable and proper from the standpoint of that company? A. I was satisfied.

Q. Were you so satisfied in your capacity as president and a director of United Public Utilities Corporation, and as a director of Northern Power & Light Company during that period? A. Yes.

Q. Mr. White, I will show you once more Defendant's Exhibit 22 for identification, which is Defendant's Exhibit 242 (R. p. 1140, supra). I ask you to read the same, and then refresh your recollection. (Handing document to witness.) A. Yes.

Q. Now, I will ask you whether or not at the meeting of the directors of United Public Utilities Corporation

on June 24, 1937, there was discussed by that board of directors the fact that a recent survey of available generating capacity on Dakota properties showed a serious shortage, that the full peak load in 1936 was 9715 K. W. and effective capacity only of 9990 k: w.; also that the maximum rate capacity of all plants, including small high-cost standbys was at that time 11,460 k. w., so that even if it were practicable to use all the plants on the peak load, the reserve would only be 1745 k. w., or about 18 per cent. Do you recall whether there was any discussion of those matters before the board?

A. The generating capacities were discussed.

Q. I will now also ask you whether there was discussed by the directors at that meeting the question of the effect upon the effective capacity if the 3500 k. w. unit at [Buelah] should go out on the peak, and that it would thereby be reduced to 6490 k. w., leaving a shortage of 3275 k. w. of effective capacity and reducing the minimum available rated capacity to 7960 k. w. or 1756 k. w. under the peak load. Were those matters discussed before the board by you? A. Yes.

Q. Were they discussed by the directors?

A. I do not recall that they were.

Q. Now, was there any other discussion at that board meeting of the fact that under normal operations Northwestern Public Service Company was sending 2200 k. w. north on the winter peak loads for about four hours and was sending 500 k. w. north on the spring peak loads?

A. That report was made by me.

Q. To your board of directors at that time?

A. That is correct.

Q. I have one more question, Mr. White. I have asked you and Mr. Robinson has asked you over the past few days whether you have produced those various documents from your files, to which you have answered I believe without exception "yes". May I ask you just what you mean by your files? Are those your personal files or your corporation files, or what?

A. I mean the general files of United Public Utilities Corporation, as maintained in their offices at 20 North Wacker Drive, Chicago, including certain amounts of material that had been transferred from those files to a storage vault.

Mr. Stafford: That brings us to the cross examination by Mr. Benson.

Mr. Fellows: The plaintiff will offer in evidence in toto, subject to the objections which appear therein, the cross examination of the witness, White, Volume 9 of the same deposition, which is on file herein, taken at Chicago on September 26th and succeeding dates consisting of page 903 to 1006, inclusive; Volume 10 of the same deposition consisting of page 1007 to 1119, inclusive; Volume 11 of the same deposition consisting of page 1120 to 1132, inclusive; Volume 12 of the same deposition consisting of page 1183 to 1280, inclusive.

Mr. Woods: If Your Honor please, we object to that method of offering this portion for the reason it does not make it possible for the defendant to know what the rulings of the Court are upon the testimony that is offered.

Mr. Robinson: For the further reason that in view of the fact all of direct testimony of White was not read in this record, there may be certain portions of the cross examination offered by the plaintiff which is improper and going outside of the scope of the direct examination. It is impossible for the Court to pass upon that feature in the absence of hearing what those questions are.

Mr. Fellows: Let me suggest if we would read every word in these depositions and the Court, upon objection received it subject to objection, it would be a proper ruling of the Court.

The Court: I don't have to receive everything. I haven't received everything. Where you have a case like this, dependent upon an enormous volume of record, if an appellate court should rule any evidence out, even though it might appear on first glance to be reversible error, for that reason the Court prefers to admit evidence rather than take the time to go into the question whether or not it is competent to the issues before the Court. I am not going to say to counsel how they shall present their evidence, but as to what the Court is apt to do, counsel has stated the attitude of the Court on that proposition. I am not going to, in the midst of this trial go into the question of the technical competency or relevancy of testimony

offered here by either side. If I did, we would be here until next summer. I am going to admit evidence over which I have no judgment at all subject to objection. I am not undertaking to dictate to counsel how they shall present their case. You are trying the case. It is up to you to present the evidence in the manner in which you think it ought to be presented.

Mr. Fellows: That is the way we want to do it, Your Honor. If the Court will receive it, I would like to read a few extracts from it.

The Court: Very well.

Mr. Stafford: We would like the same privilege. We have gone over this very carefully in an effort to shorten up this proceedings. We have boiled it down I think, not to exceed fifteen or twenty pages. We would like the same privilege of reading excerpts which we think are pertinent.

The Court: Very well.

(Read from deposition by Mr. Fellows)

Mr. Benson: I don't want to encumber the record with the entire minutes of the annual meeting of stockholders. I would like to ask counsel whether it may be stipulated that at the annual meeting held on April 25, 1946, of the stockholders of United Public Utilities Corporation, being designated in the minutes as annual meeting of stockholders, there was no resolution adopted [approved] all or any of the acts of the officers or board of directors for the preceding year.

Mr. Stafford: Well, subject to the objections previously stated, we will so stipulate, and we want the record also to show that the minutes indicate that meeting was adjourned and reconvened subsequently on Friday, June 8th, 1945, in Flemington, New Jersey.

Mr. Benson: Now, I refer to the original minutes of United Public Utilities Corporation, and specifically to the minutes entitled The Adjourned Annual Meeting of Stockholders, or rather, entitled United Public Utilities Corporation, minutes of Adjourned Annual Meeting of Stockholders, and reading from said minutes, the first paragraph thereof, I read:

"The adjourned annual meeting of stockholders was called to order at the office of the Corporation, 117 Main Street, Flemington, New Jersey, on Friday, June 8th, 1945, at 11:00 O'clock A. M., Eastern War Time."

And I ask counsel whether he is willing to stipulate that there is recorded, in the minutes of that meeting, no resolution of the stockholders approving any action of the officers and directors in the preceding year or at any other time.

Mr. Stafford: Now, what is he asking us to stipulate?

(Record read by the reporter)

Mr. Stafford: You just want it as the fact?

Mr. Benson: Yes.

Mr. Stafford: We will so stipulate, subject to the preservation of our objections as to the materiality and also such objections as we may wish to interpose to any inferences sought to be drawn from such omission.

Mr. Royhl: And the further objection that it is not proper cross examination.

Mr. Stafford: And it is not proper method of proving corporate facts.

The Court: As part of the cross examination in this deposition it may stand.

(Read from deposition)

Mr. Benson: I ask counsel for the defendant whether he will stipulate that, in the minutes of the annual meetings of the stockholders of United Public Utilities Corporation for the years 1937 to 1944, both inclusive, and all intervening years, there is no record of any resolution by the stockholders approving any action of the officers or directors in the preceding year.

Mr. Stafford: We will stipulate to that fact, subject to the same reservations as stated in the stipulation with reference to the 1945 minutes of the annual meeting of stockholders.

Q. I show you booklet marked Plaintiff's Exhibit 3 for identification, which is Plaintiff's Exhibit 98, infra. That

is an exact duplicate of the report which you filed, with the court indicated thereon, and which you filed as receiver in the proceedings indicated in the document?

A. Yes, except in the report as filed, as I recall, there were a few errors in the location of items in Exhibit 1 at the end of the report, and in this particular copy—

Q. Is it an exact duplicate except for the folded page marked Exhibit 1, which is pasted onto the inside of the back cover page? A. Yes.

Mr. Benson: The plaintiff offers Plaintiff's Exhibit 3 for identification, and particularly paragraph 8 on page 29 of said exhibit.

Plaintiff's Exhibit 98, which is also referred to as Plaintiff's Exhibit 3 in White's deposition, was marked for identification and is in part as follows:

8. In view of the substantial investment of Middle West Utilities Co. in the common stock of United Public Service Company, the substantial Middle West Utilities Company holdings of United Public Utilities Company First Lien Bonds, and also of secured notes payable by United Public Service Company and/or subsidiaries to Middle West Utilities Company and/or subsidiaries, which appear on the records to be outstanding in the amount of $5,918,000 it has appeared to me that the work of the Receiver, so far as possible and proper, should be conducted in close cooperation with the Receivers of the Middle West Utilities Company in order that they might have at all times the most complete knowledge of what is going on and in order that they may be able to contribute suggestions based on their own experience with these properties, and, also, in order that the receivership operation may have the benefit of the many possible economies available as result of such cooperation between your Receiver and the Receivers of the Middle West Utilities Company.

Mr. Fellows: We offer in evidence Plaintiff's Exhibit 98.

Mr. Stafford: Objected to as incompetent, irrelevant and immaterial; not proper cross examination; self serving; no sufficient foundation.

The Court: Objection overruled.

(Read from deposition)

Q. Mr. White, prior to your appointment as receiver of United Public Service Company and the others who were, in those days, defendants in proceedings of this type, in the District Court of the United States, for the Northern District of Illinois, Eastern Division, in the case in Equity 11652, entitled Howard J. Umland, Complainant, versus United Public Service Company, a corporation of New Jersey, et al., Defendants, will you state what businesses you had been in?

A. I had been in only one business, the investment banking business, dealing primarily in the purchase and sale of bonds, and I was in that business continuously from December, 1907, until about April 15, 1932.

Q. Were the joint management expense agreements between the Dakota subsidiaries of U. P. U. Corporation and Northwestern Public Service Company submitted to the board of directors of U. P. U. for consideration or approval or action of any kind?

A. I don't recall. I know that the directors knew of the arrangement, and that such an arrangement existed, and the general basis.

Q. I was trying to recall. I had not seen anything, or any formal action or formal report about it. You do not recall that there was any formal report about it?

A. Not that I recall, no.

Q. Has all of that material been introduced in evidence, or do you have some that has not been introduced?

Mr. Royhl: We object, unless he knows what has been introduced in evidence. We object as calling for the opinion and conclusion of the witness.

Mr. Fellows: He is asking him if he produced all reports and engineering studies found concerning the contract dated July 1, 1941.

A I find, in the additional material that I have brought over this afternoon, no further engineering reports that were made in connection with the 1941 agreement, and I had previously brought all the material that I could find in that connection. I think all of it was introduced into the record.

Q. After the July 1, 1941, contract was made, prior to

the execution to the supplement there, which is a part of Exhibit F to the complaint, was there any engineering or cost studies made for the purpose of determining the advisability of executing the supplement?

A. To the best of my knowledge, no.

Q. In considering the sale of energy from the North Dakota Company to the Northern Company at 3½ mills and the sale of energy from Northern to Northwestern Public Service Company at 5 mills, and later that rate being 5 mills as between Dakota Public Service Company and Northwestern, did you investigate the reasonableness of that rate and charge? A. Yes.

Q. You understood that the rate for energy at 5 mills was reciprocal, that is, the Northwestern Public Service Company would be 5 mills, or to the extent that they delivered under that agreement they would receive 5 mills. You understood that?

A. Yes. That was an interchange rate.

Q. Now, in considering the reasonableness of that charge and rate, did you consider it on the basis of the incremental fuel cost of generation?

A. I considered it on a basis of incremental cost insofar as the sale of energy to Northwestern was concerned.

(Read from deposition by Mr. Fellows)

Mr. Stafford: Q. Mr. White, back at the beginning of your testimony you described for us the method by which proxies were given to vote the shares of stock of the Dakota subsidiaries of United Public Utilities Corporation. I asked you at that time whether you remember or recalled the method under which that stock was voted at the annual meeting of those companies, for the election of directors during the time of your receivership and subsequent trusteeship, and you replied I believe that you did not recall the mechanics of it. I will now ask you specifically whether during the period prior to January 1, 1935, that is, when you were receiver and trustee, did you as such receiver and trustee direct the method in which those shares should be voted in the election of directors?

A. Having refreshed my memory from some additional correspondence that I was able to produce yesterday noon, I can state that I did.

Q. And did you do that in each case that there was an election prior to January 1, 1935? A. Yes.

Q. If I understand you clearly, you have as receiver directed or designated which persons those shares should be voted for in electing directors of those Dakota subsidiaries of United Public Utilities Company?

A. I designated them to the extent that I accepted recommendations, or that the final slates of directors were the recommendations with or without changes that I may have considered necessary. I haven't worded that quite correctly.

Mr. Benson: Q. Recommendations of whom?

A. The joint management.

Mr. Stafford: Q. Well, you approved the slates that they recommended?

A. I approved the slates in advance, before they were submitted to the annual meetings of stockholders.

Q. The shares of stock were voted by the proxies for those people, with your approval and consent? A. Yes.

Plaintiff's Exhibit 99, which is also referred to as Plaintiff's Exhibit 1 in White's deposition, and which is the Certificate of Incorporation of United Public Utilities Corporation under the laws of New Jersey, was received in evidence.

Plaintiff's Exhibit 100, which is also referred to as Plaintiff's Exhibit 2 in White's deposition, is a certified copy of a document entitled "Certificate of Information Recording the Elimination on July 1, 1945 of All Distinction between The Class A Common Stock and The Class B Common Stock" of United Public Utilities Corporation, executed by Samuel W. White, as President, and Lee Barroll, as Secretary of said Company, and is in part as follows:

* * * * * * *

2. Article Fourth, Sub-Division (6) of the Certificate of Incorporation further provides as follows:

> "Class A Common Stock and Class B Common Stock shall, share and share alike, be in all respects on a parity as to payment of dividends and distribution of asests and in all other respects, except that Class B Common Stock shall have no voting rights except as

(a) from time to time provided by statute, and (b) hereinafter provided in this subdivision (6) and (c) provided in subdivision numbered (7) hereof. Until the occurrence of the event mentioned in the next following sentence the holders of the Class B Common Stock shall be entitled exclusively to elect one director of the Corporation and the holders of the Class A Common Stock shall be entitled exclusively to elect the remaining directors of the Corporation. Whenever the Corporation shall have retired (by purchase, payment, conversion, redemption or otherwise), in the aggregate, an amount of its Series A bonds and/or Series B bonds and/or $3 Dividend Series Preferred Stock and/or $2.75 Dividend Series Preferred Stock (reckoning in computing such amount any such stock at $50 per share and any such bonds at the principal amount thereof) equal to one-half of the amount, in the aggregate, of all such bonds and/or Preferred Stock which shall be issued by the Corporation as a part of the reorganization of United Public Utilities Company, a corporation of the State of New Jersey, all distinction between Class A Common Stock and Class B Common Stock shall cease and the two classes of such stock shall thenceforth constitute a single class of common stock."

The reorganization of United Public Utilities Company referred to in the above quoted Sub-Division (6) is the Plan of Reorganization referred to in Paragraph 1 above.

* * * * * * *

5. Having completed on July 1, 1945 the retirement, in the aggregate, of an amount equal to one-half of the amount of the Collateral Trust Bonds and Preferred Stock (reckoning in computing such amount the Preferred Stock at $50 per share and the Collateral Trust Bonds at the principal amount thereof) issued by the Corporation under and as a part of the aforesaid Plan of Reorganization, all distinction between the Class A Common Stock and Class B Common Stock ceased on that date, and thenceforth the shares of common stock previously designated as Class A Common Stock and Class B Common Stock constituted a single class of common stock with equal voting rights

share for share, in accordance with the provisions of Article Fourth, Sub-Division (6). Accordingly, and by reason of the happening of the aforesaid contingency, the authorized common stock of the Corporation is now 1,121,758 shares, and the outstanding common stock is 370,300 shares.

* * * * * * * * *

Mr. Fellows: That completes our cross examination.

Mr. Stafford: I would like to avail ourselves of the privilege of reading portions also.

The Court: Very well.

(Read from deposition by Mr. Stafford.)

Mr. Stafford: Now, we will ask counsel for plaintiff to stipulate that the minutes of the annual meeting of stockholders of United Public Utilities Corporation, held March 9th, 1937, recite that "The Chairman stated that the accountants for the corporation had been unable to complete the preparation of the Financial Statement for the calendar year 1936, but produced for inspection a Tentative and Preliminary Report, and advised that a copy of the final report would be mailed to each stockholder."

Mr. Benson: We so stipulate.

Mr. Stafford: I will ask counsel also to stipulate that the minutes for the annual meeting of stockholders of the same corporation, held March 8th, 1938, recite that the Chairman stated that a copy of the printed annual report of the directors would be mailed to each stockholder within the current month, and that he thereupon discussed at length and in detail the year's operations of the corporation and of the subsidiaries, and that questions from stockholders were invited and answered.

Mr. Benson: We stipulate that appears in the record.

Mr. Stafford: In these minutes?

Mr. Benson: Of the minutes.

Mr. Stafford: We will further ask counsel for plaintiff to stipulate that in the minutes of each of the annual

[meeting] of the stockholders of United Public Utilities Corporation for the calendar year 1939 to and including 1945, there appears in the minutes of each such annual meeting a statement that the chairman ordered the minutes of the preceding annual meeting of the stockholders of said corporation, and also the minutes of all meetings of the board of directors of said corporation held since the preceding annual meeting of stockholders to be presented to and made available throughout the meeting for the examinations of any stockholders desiring to examine them, and that the Secretary thereupon produced said minutes, which remained open for inspection.

Mr. Benson: We so stipulate.

(Read from deposition by Mr. Stafford.)

Q. Now, Mr. White, I call your attention to Exhibit C to the plaintiff's complaint. That is a contract dated the 1st day of January, 1938, entitled Interchange Capacity Agreement. You are familiar with that agreement?

A. Yes, sir.

Q. Have you any information as to how the rate of $13.20 referred to in Article VIII was arrived [——] and which information has not been introduced in evidence here in your testimony?

A. I have a recollection on that point, and I don't recall whether or not it has been introduced in my testimony.

Mr. Benson: All right.

Q. Was this thing that you recall a written document?

The Witness: I [recal] it very clearly, and I think that —strike that—and I think now that it does appear in some of the documents that were introduced, although I don't believe the specific answer to your question was—

Mr. Benson: Elicited by counsel?

The Witness: —elicited by counsel from me.

Mr. Benson: That is the [responsiblity] of counsel, isn't it?

A. It certainly is, as far as I am concerned.

Mr. Benson: Now I show you all of the exhibits that have been offered to date in this hearing—now let's keep

them separate from your papers there—and will you run through them and indicate the document which you had in mind when you answered my last question?

The Witness: Defendant's Exhibit 24 id, which is Defendant's Exhibit 244 (R. p. 1144, supra).

Mr. Benson: Q. "Id" means for identification, doesn't it? A. I would judge so.

Q. Read the title at the top of Exhibit 24, on the first page.

A. Survey of Power Requirements, Northwestern Public Service Company, Northern Power & Light Company, North Dakota Power & Light Company.

Q. Now, in what portion of Exhibit 24 do you find what you had in mind as a statement or any representation having anything to do in any way with the rate of ~~$13.20~~?

A. I find on page 11, in the fourth full paragraph at the top of the page, being the third paragraph from the bottom of the pages, the [state] that,—shall I read it?

Mr. Benson: Yes.

The Witness: (Reading) We believe a fair basis would be to assume an investment of $110 per kilowatt and to charge 12% on this investment.

Mr. Benson: Q. Now, Mr. White, do you have any information that is not in the exhibits and that you have not heretofore testified to, which information has to do with how the rate of $13.20 per kilowatt of firm demand per year was arrived at, for use in Article VIII of Exhibit C to the plaintiff's complaint?

The Witness: I think the same basis for the $13.20 figure may be mentioned in other places in the material I have produced, and I have an independent recollection of conversations in which the fairness of that method of calculation was discussed.

Q. Now, with whom did you have such conversations?

A. With Mr. Strike and I think with Mr. Buell.

Q. Did you have more than one conversation with Mr. Strike concerning this charge? A. That I can't recollect.

Q. Can you recall the time of the conversation? A. No.

Q. Nor the place? A. No.

Q. Do you recall the conversation in detail or just the substance of it? A. Just the substance.

Q. What did Mr. Strike say, according to your best recollection?

A. That he had suggested a figure that was so low that I couldn't possibly disagree with it.

Q. Where was your experience in the investment banking business secured?

A. In Chicago between December, 1907 and July, 1922 I was connected with the Chicago office of Lee Higginson & Company, whose headquarters were in Boston. In July, 1922, I was elected vice president of the National Bank of the Republic of Chicago, and had charge of their investment securities department. I became a director in that bank about a year later, and about January 1, 1924, I formed and became the first president of the National Republic Company, an investment affiliate of the National Bank of the Republic, all of the $500,000 capital stock of which was owned in trust by the stockholders of the bank. I continued as president of that investment affiliate and as director in the bank, and I don't recall now whether I continued as a vice president of the bank, but my status in those first two capacities at least remained unchanged until about 1931, when National Bank of the Republic and the Central Trust Company of Chicago were merged into Central Republic Bank & Trust Company. At the same time, the National Republic Company and the Central Illinois Company, investment affiliates of the Central Trust Company were merged into a corporation called the Central Republic Company.

Q. You were president of that company?

A. I became vice-chairman of the board of that company.

Q. And then what?

A. And continued in that capacity, until I resigned to become receiver of United Public Service Company, et al.

Mr. Benson: Q. When you were answering Mr. Stafford's question and gave the answer to which your attention was directed by me a few moments ago in cross examination, did you mean to omit or did you just overlook defendant's Exhibit 3, and the statement made in the third paragraph, after the quotation of prices at the top of the page?

Mr. Royhl: Which page, Mr. Benson?

Mr. Benson: Page 2 of the exhibit.

The Witness: A. My statement as made in response to Mr. Stafford's question was a generalization which I expected at some time to have to amplify.

Q. Well, do you want to amplify it now?

A. The basis upon which the $1.40 price was figured was the highest price that we felt could be justified before the North Dakota Utilities Commission as a purchase price on coal purchased by North Dakota Power & Light Company at Beulah. Our reason for determining the price on that basis was to keep the profits on the sale of coal by our wholly owned coal mining subsidiary to our wholly owned electric utility subsidiary in the profit account of the coal mining company, because the earnings of that coal mining company were not subject to regulation by the State Commission. If the price on that coal had been lower, the profits of North Dakota Power & Light Company would thereby have been increased and those profits, in the aggregate, were limited, or subject to limitation by the State Railroad Commission.

Q. The explanation that you have just made was made after you had read the portion of the second paragraph of Defendant's Exhibit 3 for identification to which I directed your attention before you made the explanation?

A. Yes, but my recollection on the point needed no refreshing.

Q. Now, you made a contract on behalf of yourself as receiver of United Public Utilities Company with the receiver of Middle West Utilities Company?

A. As receiver of United Public Service Company I continued an arrangement with the receivers of Middle West Utilities Company which, at the beginning of my receivership, I found had been in effect between United Public Service Company and Middle West Utilities Company.

Mr. Benson: Q. Did you make any other agreement with the receivers of Middle West Utilities Company concerning services during your administration as receiver of United Public Service Company or United Public Utilities Company?

A. None that I can recall, except a verbal understanding that the services for which I had contracted on behalf of the operating subsidiaries in the United Public Service system were to be advisory rather than supervisory.

Q. Now, when you became president of United Public Utilities Corporation, did you make a service agreement between United Public Utilities Corporation and any service company to service United Public Utilities Corporation?

A. I made an agreement with Daniel C. Green, president and trustee of Middle West Utilities Company, under which—

Q. Well let us straighten out first what the form of that agreement was. Was it oral or written?

A. I believe it was confirmed by letter.

Q. Have you looked for that letter?

A. Yes, and that is also one which I haven't found.

Q. Will you ask your counsel to make a memorandum of that?

A. Yes. I recall it was a short, one page letter, because it provided solely that his accounting and statistical departments were to do the accounting work and furnish statistical information. By accounting work I mean accounting work, keep the books and prepare the monthly income accounts, the balance sheets of United Public Utilities Corporation, and to furnish to the holding company consolidated balance sheets and income statement of United Public Utilities Corporation and subsidiaries.

The Witness: Mr. Benson, I have, through oversight, made an incorrect or at least an incomplete answer to the question which you asked me as to whether or not I, as receiver of United Public Service Company, made any other arrangements with receivers of Middle West Utilities Company, the deficiency in my reply being a matter of record.

Mr. Benson: All right. Will you refer to the record?

The Witness: I refer to Defendant's Exhibit 74 which is Plaintiff's Exhibit 60 (R. p. 458, supra), page 4, starting at the middle of the page and continuing through the first paragraph on page 5. That is another arrangement which I made as receiver of United Public Service Company with

the receivers of Middle West Utilities Company, and which I unintentionally omitted from my answer to your question.

Q. Prior to your appointment as receiver of United Public Utilities Co., had the investment banking firms that you say you were connected with sold to the public securities of United Public Utilities Co.?

A. To the best of my recollection they had not. I would like to say that in the course of the utilities business, an investment banking house will occasionally acquire an odd lot of companies, but I used to do all of the buyings for the National Republic Company and I recall that, when I was first approached with respect to becoming receiver of United Public Service Company and United Public Utilities Company, that I had no conception whatever of what they were or where they were.

Q. Who first approached you?

A. I was in New York when I received a long distance telephone call from Mr. Philip Clarke, who was president of Central Republic Bank & Trust Company, with which the Central Republic Company was affiliated. Mr. Clarke told me that within a few days receivers were going to be appointed for a number of companies in the Middle West System, and for Middle West Utilities Company itself, and that the bankers in Chicago, or any group in Chicago, the personnel probably was not told and in no event do I recall it, wanted to be able to recommend to the court men for appointment as receivers, and he asked me whether I would consent to the use of my name for a recommendation for receiver of United Public Service Company. I had to defer my answer until I could scurry around and get some information about the United Public Service Company, which I acquired with great difficulty, because it was at that time eight o'clock at night. And after consulting with several of my friends in the east, by telephone, I called him back at midnight that night and told him that I was willing to have my name used.

Q. Do you know who first suggested Mr. Briggs as a member of the board? A. Yes.

Q. Who? A. Mr. Herbert L. Nichols.

Q. Is my recollection correct that Mr. Gail Belden was nominated by The Middle West Corporation, to be a

director of United Public Utilities Corporation, after the deal with reference to the sale to somebody of Middle West holdings in United Public Service Corporation had fallen through?

A. In effect that is correct, although formally he was nominated by United Public Service Corporation of which Mr. Belden was president.

Q. Mr. Gail Belden was president of United Public Service Company at the time he was elected to the board of United Public Utilities Corporation. Correct?

A. That is correct.

Q. (By Mr. Benson) In your examination you mentioned Ralph Stevenson and Ralph D. Stevenson. You were referring to the same man? A. Yes.

Q. Was Ralph D. Stevenson attorney for The Middle West Corporation? A. Yes.

Q. He has been, to your knowledge, ever since Middle West Corporation was organized?

A. I believe he has been since Middle West Utilities Company was organized.

Q. I see. Was he attorney for United Public Utilities Corporation in 1939? A. No.

Q. Was he ever attorney for United Public Utilities Corporation? A. No.

Q. Did he do any work for United Public Utilities Corporation? A. No.

Q. What is the full name of the gentleman, Peale, to whom you have made reference in your examination in chief? A. Clifford McChesney Peale.

Q. Is he a graduate of any technical school?

A. He holds an A.B and a B.S. from Washington and Lee University, and a M.B.S. from Harvard Business School. I don't know the exact significance of his B.S. degree. My judgment would be that it was not in engineering.

Q. How long has he worked for you?

A. To the best of my recollection he started to work for me in the National Republic Company about 1928, and continued to work for me in the Central Republic Company until about 1931. Then there was an interval of perhaps a year in which he was associated with some other undertaking, and in a matter of weeks or the most, say

three months, after I was appointed receiver of United Public Service Company I invited him to come over and help me, and he remained with me until about a year ago.

Q. He worked for you during the receivership, as you have described? A. Yes.

Q. And then he went to work for United Public Utilities Corporation when you became president of United Public Utilities Corporation? A. That's right.

Q. And he worked for you until about a year ago, you say? A. Yes.

Q. Where did he go then?

A. He left to take charge of the Chicago office of an industrial company, with headquarters over in Ohio.

Q. During your examination in chief Mr. Stafford read from the minutes of a regular meeting of the board of directors of United Public Utilities Corporation, held in Philadelphia on June 15, 1938, and in the portion of the minutes read by Mr. Stafford there appears the statement:

> "The president furnished to members of the board copies of a memorandum dated May 2, 1938, of the interchange capacity agreement by the three participating companies, Northwestern Public Service Company, North Dakota Power & Light Company, and Northern Power & Light Company, with the statement that the provisions of this agreement are substantially in accord with the 'survey of power requirements,' copies of which were submitted to the board in January, 1938."

Can you identify, among the exhibits that have been marked by the defendant for identification, any document which is the document called "Survey of Power Requirements" in the portion of the minutes read by Mr. Stafford?

A. I can. It is Defendant's Exhibit 24 for identification, which is Defendant's Exhibit 244 (R. p. 1144, supra).

Q. Mr. White, in Defendant's Exhibit 26-A, which is defendant's Exhibit 247-A (R. p. 1174, supra), for identification, appears the following statement: "The contract as prepared follows the arrangement which obtains for the companies in the power pool of the Chicago area." Do you know anything about the power pool of the Chicago area? You can answer that yes or no. A. Yes.

Q. Do you know what generating stations are included

in the power pool of the Chicago area? A. I don't know now. I did know at that time.

Q. On [may] 3, 1938, you knew?

A. I knew because I had a copy of the particular contract referred to in that memorandum.

Q. Referred to in Defendant's Exhibit 26-A for identification? A. Yes.

Q. You compared the contract referred to in the third paragraph of Exhibit 26-A with the Chicago power pool contract, did you? A. Yes.

Q. What was the purpose of your comparison?

A. To form an opinion as to the desirability of the form of a first draft of contract that had been prepared by Mr. Buell, and to determine whether I could suggest any other features in the Chicago Pool contract that might be incorporated into Mr. Buell's draft.

Q. Do you recall what amount Mr. Sandstedt had, if any, in that formula for the total amount to be retired?

A. Yes.

Q. You can refresh your recollection from anything you have here.

A. Yes. Well, I haven't got anything here. Yes, I do. He had $162,500, or well, being half of $325,000.

Q. Now, did you mean that he had a figure which was $325,000 in round figures in the formula that you were discussing? A. In his first suggestion, yes.

Q. And when was that first suggestion made? I don't mean the hour it was made.

A. In the early stages, in connection with the first one or two drafts of the 1941 contract.

Q. Now, you have referred to arriving at a lower figure.

A. Yes.

Q. Did you arrive at a lower figure at this meeting at Detroit Lakes?

A. That is what I was hesitating about making a definite statement on, as to just when we arrived at the lower figure. It could have been that that lower figure was arrived at after the draft of the contract was revised at Detroit Lakes, and then having subsequently agreed on a lower figure, that that lower figure was incorporated into a later draft.

Q. Do you remember who was present at the meeting when Mr. Sandstedt suggested $325,000, was it 325? A. Yes.

Q. (Continuing) The $325,000 figure?

A. The $325,000 figure—

Q. I asked you to tell me who was present, if you remember, when he suggested that figure?

A. The figure itself was not initially suggested at that meeting.

Q. Where was that figure initially suggested?

A. At the time the 1936 agreement was under discussion.

Q. That is your best recollection now, is it? A. Yes.

Q. I see. Now, who suggested that figure to you at the time the 1936 agreement was under discussion? Was that Mr. Sandstedt? A. I think it was Mr. Strike.

Q. Mr. Strike?

A. It may have been Mr. Sandstedt, or both. That was the figure that was commonly used for a number of years by them.

Q. The 325. By whom? A. By them.

Q. Who do you mean by them?

A. By Mr. Strike and Mr. Sandstedt, as their idea of the cost to Northwestern Public Service Company of those facilities.

Q. Can you take 3½ per cent for taxes, maintenance and renewals on an investment of $325,000, figure interest on the investment at 5 per cent per annum, and tell us what formula to use to determine when the $325,000 will be retired?

A. I don't know of any formula. Such a computation was made.

Q. Did you make it? A. No, but—

Q. Can you make such a computation? A. Yes.

Q. By going through it year by year?

A. Month by month.

Q. Month by month? A. Yes.

Q. Do you know a formula for doing it quicker than that? A. No.

Q. You do not? A. No.

Q. Did Sandstedt do that month by month when you were working on this problem?

A. Either he did it or his office did.

Q. Did you arrive at an agreement at the Detroit Lakes meeting cutting down the amount to be amortized according to the formula that included the 3½ per cent charge and the 5 per cent interest?

A. We had previously had nothing to cut down.

The Witness: When I said that we had previously had no figure to cut down I had in mind that a figure in any amount had not been a part of an agreement, of an effective agreement. In other words, the 1936 and 1939 interconnection agreements had not recognized any specific cost figure to Northwestern Public Service Company for the construction of those interconnection facilities.

Q. Do you recall who was responsible for the delay in the execution of the agreements between Dakota Public Service Company and Northwestern Public Service Company, embodied in the 1941 contract, while the negotiations were pending for the sale of Northwestern Public Service Company, who held up the agreement during that time?

A. To the best of my recollection the existence of those negotiations contributed directly to that delay, and I think that—I felt that the delay was desirable from the standpoint of Dakota Public Service Company, particularly as to what the general character of the contract would be, subject only to mutually satisfactory wording, and I can recall a hesitation on my part of making any commitments to Central Electric & Telephone Company as to what we would or would not do with Dakota Public Service Company in the event they bought Northwestern Public Service Company.

Q. You mean what you would do in the way of selling Dakota Public Service Company?

A. No. Operating arrangements, and joint management in particular, is what I recall, because I recall a visit from two or three, I think it was three, of the Central Electric & Telephone people in which they said in effect, If we buy Northwestern Public Service Company will you continue a joint management arrangement with us? That is as I recall it; and also, to the best of my recollection I told them that I would make no commitment and that they would have to make their decision on the purchase of Northwestern, irrespective of any, or without any indication from me as to what [out] attitude would be.

Q. Was B. P. Stevenson ever an [officers] of your United Public Utilities Corporation?

A. Yes, he has been assistant secretary and assistant

treasurer, I believe, every year since we opened an office in Wilmington, Delaware, and handled our bookkeeping.

Q. And during those years he also has been an officer of Middle West Corporation?

A. I think probably he was.

Q. And of North West Utilities Company?

A. I don't know as to that. That office in Wilmington, Delaware, is a joint office maintained by a number of holding companies, in order to locate their business situs outside of the state of Illinois.

Q. Is Gail Belden an officer of United Public Utilities Corporation?

A. Yes, he is vice president and lives in Wilmington, Delaware, and is in charge of that joint office maintained in Wilmington by several holding companies.

Q. Do you know when he became an officer of United Public Utilities Corporation.

A. I can identify that date as being between March, 1939 and March, 1940.

Q. Now, I take it from what you say, that Gail Belden is also an officer of The Middle West Corporation?

A. According to the information which Mr. Belden has furnished to us for our proxy statements in connection with the annual meetings, he is an officer and director in several holding companies whose offices are domiciled at Wilmington, and I am quite sure that he is an officer of The Middle West Corporation, and I have the impression that he is not a director.

Q. Can you tell us whether he has been such an officer since the year 1939 or the year 1940?

A. I am reasonably confident that he has been.

Q. During that same period, from 1939 to 1940 to date, has he been an officer of North West Utilities Company?

A. I have not got real information on that point, but I do recall that North West Utilities Company is domiciled at Wilmington, and I assume that he is an officer of that company.

Q. When you say "domiciled at Wilmington," you mean in the same offices with United Public Utilities Corporation and several other holding companies?

A. Yes, sir.

Q. Mr. N. P. Zech was a director of your corporation from the time of its organization, if I understand correctly, for a period of several years? A. Yes, sir.

Q. Up until the incident you mentioned, where he was succeeded by Mr. Briggs? A. Yes.

Q. You cannot state whether he was comptroller of Middle West Corporation? A. I cannot verify that, no.

Q. Can you state whether or not he was at any time a director of North West Utilities Company?

A. No, I do not know.

Q. Can you state whether or not N. P. Zech was at any time president of North West Utilities Company?

A. If he ever was, I was not aware of it.

Q. Mr. White, did you have any conversations with anybody in the joint management staff at Huron concerning the installation of transformers at Bowdle, South Dakota?

A. Well, I can recall discussions regarding the cost of a new substation at Bowdle, and while I don't recall the conversation with respect to the transformers themselves, I do recall that the conversation had to do with the installation of some expensive oil switches.

Q. Do you recall whether you got any written communications from the joint management concerning the Bowdle installation?

A. I looked for material that was mentioned in the subpoena and I brought all of the information that I could find in my files that seemed to relate to that subject. Among the communications that I found was with respect to the Venturia Ashley line, which I was also asked to produce. With respect to the Bowdle substation, the only thing that I found was a letter with respect to the transmission line between Ipswich and that substation at Bowdle. This is a copy of a letter from Mr. E. L. Bayles to Mr. Sanborn. I might add that improvements to the substation at Bowdle were listed in the budgets submitted at the beginning of the year, and as I recall appeared in more than one annual budget before the work was actually done.

Q. You said your wife had some securities in United Public Utilities Corporation. Do you know whether any of those securities which your wife held at the time came from Middle West Utilities Company or any of its affiliates?

A. Yes, there was one transaction in which she made the highest bid that could be [ovtained] for some preferred

and common stock which was owned by Middle West Corporation.

Q. How many shares of preferred were involved?

A. There was approximately eleven hundred and some odd shares of $3 [dividence] preferred stock in United Public Utilities Corporation, and about 6,000 [share] of Class A common, which represented, as I understood it, all of the stockholdings of United Public Utilities Corporation which the Middle West Corporation held. They wanted to sell it in order to be free and clear of all holding in U. P. U. My wife made a bid for 1,000 shares and Middle West shopped in the market for a better bid, weren't able to get it, and confirmed the sale of the 1,000 shares to her, and I believe that it was at exactly the same time that she bought their entire holdings of Class A common stock, because she made, also, a better bid than they were able to get anywhere else, even though she gave them three or four days or a week to try and improve on it.

Q. I thought when you told about a bid, that you might be talking about a sale that was supervised by the Securities and Exchange Commission. Is that the fact?

A. No, that was—

Q. Just an over-the-counter transaction?

A. Just an over-the-counter transaction, but it was a matter of record in writing at the time, both the bid and the acceptance of the bid.

Q. Can you give us the approximate date of the transaction in the preferred and the approximate date of the transaction in the common?

A. As nearly as I can tell from my memorandum which I prepared some time ago of her transactions in stock—and I prepared it in connection with an entirely different matter from this hearing—I note that in the first six months of 1939 she bought 1000 shares of $3 [dividence] series preferred stock and 6,918 shares of common stock. During all of 1938 she had bought only five shares of preferred stock and 395 shares of common stock, and, from that memorandum, I am deducing, without remembering, that this particular transaction took place in the first half of 1939.

Q. Now, when you say "this particular transaction" you mean the transactions involving the preferred and the common stock?

A. Yes. Although, as I recall, they took place simultaneously.

Mr. Stafford: That concludes the portion we wish to read from the cross examination.

Passing to further examination of the same witness—

(Read from deposition by Mr. Stafford.)

Q. You testified in response to an inquiry by Mr. Benson, with reference to the $20,000 per annum charge provided in the 1936 interconnection contract, Exhibit B to the complaint, and also in Exhibits D and F and the supplement thereto of the complaint, being one of the 1939 contracts, the 1941 contract, and the 1943 supplement, that you have produced here or testified concerning all facts or opinions furnished by others to you concerning that charge; with the exception of a book of memoranda made by Mr. Lakin on his inspection trips in 1936 and 1941. I show you this book and ask you whether or not that is the book of memoranda to which you referred?

A. Yes, it is.

Defendant's Exhibit 283, which is also referred to as Defendant's Exhibit 79 in White's deposition, was received for the purpose of showing information communicated by Lakin to White prior to July 7, 1936. It is as follows:

Defendant's Exhibit 284.

Q. Do you recall any particular parts that you received prior to 1941?

A. I received, on or about July 7, 1936, this particular letter from Mr. Lakin, with its attachment of curves, and prior to that date I had received that portion of his notes which referred to his inspection trip made a few weeks previously.

Q. That portion where there are included the documents now marked as Defendant's Exhibit 79 for identification and Exhibit 80 for identification? A. Yes.

Q. So that you had received that portion including these two exhibits, Defendant's Exhibits 79 and 80, prior to July 7, 1936? A. Yes.

(Read from deposition.)

Q. Now, Mr. White, you have testified previously that, I believe on my examination, you had a conversation with Mr. Lakin in Chicago, in your office, I believe on June 19, 1936, at which only you and Mr. Lakin were present, at which time he made a report to you concerning his inspection trip of the properties of your Dakota subsidiaries, prior to that date. Now, directing your attention to the time and place and that conversation, do you recall whether or not you and Mr. Lakin had any discussion concerning the figures which appear on Defendant's Exhibit 79 for identification and Defendant's Exhibit 80 for identification?

A. I recall such a discussion, but I had to refer to these exhibits to refresh my recollection on the amounts of the figures discussed.

Q. Having referred to these exhibits and refreshed your recollection, do you now recall whether you had any discussion concerning the [abount] of $284,351.72, being the total of expenditures on interconnection facilities?

A. Yes.

Q. [Will], do you recall whether that discussion included anything with reference to how Mr. Lakin arrived at that figure? A. Yes.

Q. Will you tell us what you recall about it?

A. My recollection of the discussion was that Mr. Lakin had examined the original work orders on the construction of the interconnection facilities, and that he has

been unable to prove out a cost of $325,000, which was the amount at which that cost had been stated to me by Mr. Strike. He went on to say that he had proved up the work orders on a portion of the facilities, which were exclusively interconnection facilities, and that portion proved out at an amount which, when I refer to these exhibits, I recognize as $284,351.

Q. In other words, you now have a recollection that this figure of $284,351.72 is the amount which Mr. Lakin stated to you he had proved to his satisfaction from work orders which he examined? Is that a fair statement?

A. As part of the cost of the interconnection facilities.

Q. He had proved the work orders to his satisfaction up to that figure? A. That is correct.

Q. Now, do you recall anything further that was discussed?

A. Yes. He said that in addition to that there were some portions of the facilities that were jointly used both for the interconnection and also for the separate use of Northwestern Public Service Company, and that he had not had time to check the allocation of the cost of those joint facilities as between Northwestern Public Service Company and the interconnection facilities.

Q. Now, Mr. White, looking specifically at Defendant's Exhibit 80 for identification, do you recall whether or not at that discussion with Mr. Laken there was included any discussion concerning the calculations thereon, and referring specifically to this calculation labeled: As corrected. Investment $284,351.72—and which, when carried down, results, on the [bais] of 50 per cent, $20,405. Do you recall whether you had any discussion of those figures or that calculation with Mr. Lakin? A. I do.

Q. Do you recall whether you had any discussion of those figures or that calculation with Mr. Lakin?

A. I do, to the extent of Mr. Lakin's summary statement to me that the payment of $20,000 a year would be justified on the basis of 13 per cent on that amount of the cost which he had proved up.

Q. Of the 284,000 figure? A. Yes.

Q. Do you have any further recollection specifically with reference to any discussion concerning transmission operating charges or transmission sub-maintenance, substation maintenance charges?

A. I do not. I know we went over these notes, together, and I was primarily interested in the overall figure rather than those details upon which he had based his own conclusion.

Q. Do you recall whether or not, in going over those notes, Mr. Lakin explained his calculation, or how he arrived at 20,000?

A. I recall his computation of 13 per cent.

Q. Well, as a result of that conversation with Mr. Lakin, and going over the notes, and your discussion which you just testified about, were you or were you not satisfied that the payment to Northwestern would be justified on the basis of the then value to Northern of interchange facilities?

A. I was so satisfied, in the light of the generating position of Northern Power & Light Company and my own business judgment of Mr. Lakin's report and my [believe] in his ability to appraise the situation soundly from an operating point of view.

Q. Now, Mr. White, Mr. Benson also asked you with regard to investigations if any made by you concerning certain of the personnel; that is, the operating personnel on your subsidiaries and on Northwestern Public Service Company. Among others I believe you testified you had made no investigation of William M. Dunn. Did you have any prior acquaintance with Mr. Dunn before he went on the board of the Dakota subsidiaries, and became an [officers] of those companies?

A. Yes. I had known him for several years.

Q. For several years? A. Yes.

Q. During the course of that period had you formed any opinion as to his ability? A. Yes.

Q. What was that?

A. He had been a division manager of Northwestern Public Service Company. I had met him at the annual meetings of division managers. He regularly gave talks to those meetings. I had previously inquired as to his business history, and I had a good idea of his capabilities at the time his name was proposed to me.

Q. All matters you have just testified to occurred prior to the time that his name was proposed for the position he ultimately held in your Dakota subsidiaries? A. Yes.

Q. Also, Mr. White, you were describing in some detail

during Mr. Benson's interrogation, your early history prior to the receivership and the formation of certain companies with which you were connected. Among those was Central Republic Company, which I believe you testified was formed in 1931, when the Central Illinois Company merged with the National Republic Company?

A. That is right.

Q. Is that correct? A. Yes.

Q. Do you know whether or not Central Republic Company has continued in business since that date down to the present time? A. Yes, it has.

Q. Also on your examination by Mr. Benson, when you were describing the coal rates in force at the time you were receiver, between Knife River Coal Mining Company and the Dakota utility subsidiaries of U. P. U. and Northwestern Public Service Company, I believe you stated that at that time there was an 85 cent rate on coal delivered to North Dakota Power & Light Company at Bismarck. I show you Defendant's Exhibit 3 for identification and ask you to look at the same, then state whether or not you care to make any further or other statements in regard to that instrument?

A. At the time we were talking about this exhibit, if I referred to the 85 cent price as the rate to North Dakota Power & Light Company at Bismarck, I was wrong, because obviously it states in this exhibit that the discussion was about an 85 cent rate to Northern Power & Light Company, and I believe that price refers exclusively to the Mobridge plant of Northern Power & Light Company.

Q. Well, you have referred to this 75 cent rate to Northwestern Public Service Company obtaining in 1933. Do you know whether or not that rate continued from 1933 down to 1945? A. It did not.

Q. It changed? A. Yes.

Q. Did you have anything to do with the changes in the coal rates or the lignite rates from Knife River to Northwestern Public Service Company?

A. Well, I had very much to do with one change.

Q. Which one was that, sir?

A. That was the change that, as I recall it, became effective as of January 1, 1945.

Q. What rate was put in effect on January 1, 1945, if you recall?

A. As I recall, the rate was $1.25 a ton f. o. b. mine.

Q. You would say you had considerable to do with that. Will you please tell us what you had to do with it?

A. In 1944 we were experiencing at the mine a sharp increase in mining costs, and it looked as though those costs were going to continue to [increas] in 1945. In talking with Mr. Sanborn we agreed that the price of boiler fuel to Dakota Public Service Company and Northwestern Public Service Company would have to be revised upward for 1945.

Mr. Sanborn suggested that a discussion of that revision of the price be deferred until the operating budget of the mine for 1945 had been completed, and I concurred in that suggestion, with the verbal understanding that any price change that might later be agreed on would be effective from and after January 1, 1945. After those budgets were completed, Mr. Sanborn told me that he did not care to be in the position of determining or arguing as to what a proper revised price should be, and that he was going to ask Mr. Kruesi of Middle West Service Company to represent Northwestern Public Service Company in such a discussion, and that he hoped I would represent the Knife River Coal Mining Company in that discussion. I agreed to that suggestion. Mr. Sanborn asked Mr. Kruesi to represent Northwestern Public Service Company, and Mr. Kruesi was unable to find the time to do it, but suggested that Mr. Robert Purchas act in his place, Mr. Purchas having had considerable experience in buying or contracting for the purchase of all kinds of materials and supplies for public utility companies, including fuel. By arrangement with Mr. Purchas it was agreed that he and I should go to Bismarck, where I could have the benefit of consultation with Mr. Mounts, the mine manager from [Buelah], and Mr. Solberg, who was sales manager for the Knife River Coal Mining Company. That was particularly necessary from my standpoint, because Mr. Sanborn had told me previously that in preparing the budget of Knife River Coal Mining Company for 1945, he had used some figures that were lower in some respects than the operating estimates that had been prepared by Mr. Mounts and Mr. Solberg as a basis for the budget, and I wanted to know just what those differences in opinion consisted of before I agreed to any selling price of coal. When we got to Bismarck

Mr. Purchas was very persistent in using factors for the determination of a fair selling price, and I was unwilling to admit, and when, after a discussion lasting until after midnight, we had been unable to reach an agreement, I stated to the meeting that the price on coal to Northwestern was going to be $1.25 a ton or they would have to make other arrangements for their coal supply, that I would offer them the services of Mr. Solberg, who knew every lignite mine within shipping distance, and who would go with some Northwestern Public Service representative to make every effort to buy coal for Northwestern at less than the equivalent of $1.25 a [tone] f. o. b. [Buelah], and that if they were able to contract for their required supply of coal at a price less than $1.25 a ton, f. o. b. [Buelah], I would accept that price equivalent as the fair price from January 1st to the date deliveries began, and under such new contracts as they might make; but that after a period of I think it was for six weeks the mine would not ship coal to Northwestern except under a contract at $1.25 a ton.

Q. Did Northwestern Public Service Company avail themselves of your offer to make Mr. Solberg available to them? A. They did.

Q. I think you have testified already, but was a contract entered into between Northwestern and Knife River at $1.25 a ton? A. Yes.

Q. Did Purchas or Solberg find he could buy lignite cheaper anywhere?

A. No. They could not buy it at all. The requirements of Northwestern were heavier than any other mine was willing to sell to a new customer.

Q. Was Mr. Purchas with Middle West Service Company? A. Yes.

Q. What was the coal rate to Northwestern out of the Beulah mine in 1944, if you know?

A. I think it was 95 cents a ton.

Q. It was not 75 cents a ton? A. No.

Q. In other words, there had been an intervening change since 1933? A. Oh, yes.

Q. Now, during the time when U. P. U. Corporation owned the Dakota subsidiaries, did you have any desire that the Beulah plant of North Dakota Power & Light Company, and subsequently of Dakota Public Service Company, be run at capacity or near capacity?

A. Yes. It was our desire and intention that the plant should run at as nearly full capacity as was physically possible.

Q. That was your desire, Mr. White? A. Yes.

Q. Did you ever have occasion to criticize any of the operating personnel in regard to the running of that plant at capacity or the failure to do so? Do you recall any such occasion?

A. Well, I certainly delivered very few, if any, criticisms of operating personnel to operating personnel because if I had criticisms of operating personnel I always mentioned them to the head office executives.

Q. Well, did you ever have any occasion to make any criticisms to the head office executives about the question of how the Beulah plant was being run, that you recall?

A. Well, I can recall one instance where I made an inquiry which was in the form of a criticism.

Q. May I ask when was that?

A. I directed my inquiry to Mr. Sandstedt.

Q. When, approximately?

A. On an occasion when a group of us were making an inspection trip over the properties.

Mr. Benson: When was that?

A. I would estimate that it was about somewhere from 1940 to 1942.

Mr. Stafford: Q. It was on an inspection trip? The occasion to which you refer did occur some time between 1940 to 1942, on an inspection trip by you and others over the property. Is that correct?

A. That is correct. The date is my best recollection.

Q. That is as close as you can figure at the present time?

A. Yes.

Q. Now, can you tell us where this instance occurred?

A. It occurred in the dispatcher's room at the power plant at Aberdeen, South Dakota,

Q. Do you recall who, if anybody, was present on that occasion besides you and Mr. Sandstedt?

A. There were others in the party. Some of them were in the station, and I think that there were others than Mr. Sandstedt and the dispatchers in the dispatcher's room at the time I have in mind. I don't recall just who they were.

Q. Were your remarks directed to Mr. Sandstedt privately or were they voiced so that those standing about could hear them? That's what I am trying to get at.

A. Oh, no. They were directed to Mr. Sandstedt after we got in the car to leave the station.

Q. In other words, at the time you made these remarks both you and Mr. Sandstedt were in the car. Was anybody else with you in the car that you recall?

A. Well, the particular incident was that after we had gone through the power plant, boiler room, we went into the dispatcher's room, and someone asked the dispatcher as to the amount of the load at that particular time. He stated a figure that represented a light load, and I asked how Beulah was operating. He told me, as I recall it, that Beulah was pulling about 3,000 kilowatts. Well, I had just come through the Aberdeen station and noted that one of their generators was spinning very vigorously, so I asked the dispatcher if any of the generators were down at Beulah and he said no. So after we left the station I asked Mr. Sandstedt how it could be that with Beulah having no generator down, was carrying such a small load when Aberdeen was running. He saw the point and said that he would make it his business to find out. He later told me that he had checked up on it and he found that the dispatcher had been requested by the chief engineer of the Aberdeen station to put Aberdeen on the line, even though Beulah's full capacity wasn't being taken, because the chief engineer at Aberdeen was distressed by his station's high unit cost of generation; that is, the Aberdeen station had all of its fixed expense; it had its boilers well fired, so that it was incurring practically all of the cost of generating energy, but it was not actually generating; so that when that chief engineer made his report for the month, the cost of generation, he was showing up with a very high cost figure per kilowatt hour generated, and he apparently thought that such a high cost figure would reflect on his own efficiency; therefore he wanted to average that cost figure down for purposes of his report by getting his station on the line as much as he could, and that the particular time that we were at that station the dispatcher was acceding to his request. Mr. Sandstedt told me that he

did not think that that had been the operating policy, but was a rare occurrence and that it would not happen again.

Q. You mean by "operating policy" putting Aberdeen on the line?

A. Putting any station on the line except in the order of their operating efficiency, as was agreed to be the basis of operating the generating stations for the interconnected system.

Q. Now, Mr. White, you were asked by Mr. Benson concerning the so-called amortization table which has been identified as Plaintiff's Exhibit 6 for identification, and you were asked about the origin of the 3½ per cent maintenance figures therein and the interest figures at 5 per cent. Do you recall that? A. Yes.

Q. Now, I ask you whether or not you were satisfied that the 3½ per cent charge in that schedule for maintenance and 5 per cent charge for the interest were fair, insofar as the Dakota Public Service Company was concerned? A. I was.

Q. Before I left I was just about to inquire of you, Mr. White, regarding your testimony given on Mr. Benson's examination regarding Mr. Gail Belden, being a vice president of United Public Utilities Corporation. The memorandum which I have read covering the session at which I was not present indicates that you stated that he became vice president of U. P. U. Corporation between March, 1939 and March, 1940. Do I have a correct understanding of those dates? A. That is my recollection.

Q. Can you tell us—I don't know whether you went into this at that time or not, but if you did will you tell me again why, if there was any particular reason, Mr. Belden became an officer of United Public Utilities Corporation?

A. Well, it was during that period that United Public Utilities Corporation opened an office in Wilmington, Delaware, to keep the accounts, to receive all payments of money and to make all payments of money.

Q. Was that that joint office that you testified about when Mr. Benson was examining you?

A. Yes, the arrangement whereby we arranged to participate in the operation of a joint office, to perform similar functions for several holding companies.

Q. Did you feel that the service performed at that joint

office on behalf of United Public Utilities Corporation required a vice president of that company to be at that office?

A. Yes. We required signing officers in that office to administer that part of our business.

Q. Was there any other reason why you elected Mr. Belden to the office of vice president of your corporation at that time? A. No.

Q. Now, yesterday afternoon toward the close of your testimony, Mr. Benson was inquiring with reference to the number of shares of United Public Utilities Corporation owned by your wife?

A. The facts are that in the first six months of 1939 she did buy from The Middle West Corporation 1,000 shares of $3.00 dividend series preferred of U. P. U. Corporation; and during the entire year of 1939 she bought an aggregate of 6,918 shares of Class A common stock [or] which a substantial part were acquired from The Middle West Corporation. I don't recall the amount acquired during that year in the open market, but I am under the impression that some part of that 6,918 share total was acquired in the open market.

Q. But most of it from Middle West Corporation?

A. Most of it, if not all. I merely mention incidentally that during 1938 she had acquired five shares of $3.00 preferred stock and 395 of Class A common, but no part of that stock had been bought from The Middle West Corporation. It was all bought in the open market.

Q. Well, now did [Mr.] White purchase any other shares of United Public Utilities Corporation prior to the transactions you have just testified about? A. Yes.

Q. Do you know what shares she purchased? A. Yes.

Q. Tell us the date, the approximate date, and the amounts purchased?

A. During 1935 she acquired a total of 2,028 shares of $4.00 preferred, of which she sold two shares, and she also acquired 818 shares of common.

Q. Is that A common or B common? A. A common.

Q. Thank you.

A. Also during 1935 she acquired 305 shares of $2.75 preferred, which she sold in the same year. During 1936 she acquired 215 shares of $3.00 preferred and five shares of

$2.75 preferred, and one share of Class A common stock. In 1937 she acquired 257 shares of $3.00 preferred. In 1938 she acquired five shares of $3.00 preferred and 395 shares of Class A common. In 1939 she acquired 1,000 shares of $3.00 preferred and 6,918 shares of Class A common, bringing her holdings on July 1, 1939 to 3,505 shares of $3.00 preferred and 8,132 shares of Class A common. Subsequent to that date she made no further acquisitions of stock in the company.

Q. After July 1, 1939, did Mrs. White acquire any additional shares of United Public Utilities Corporation stock of any classes? A. No.

Q. After 1939 did she continue to hold the same number of shares, or did she dispose of any?

A. She disposed of stock in 1939, 1940, 1941, 1943 and 1944.

Q. How were those dispositions made, by sale in the open market, or to any individual purchaser, or how?

A. Some by gift, and the balance through sale through brokers in the open market.

Q. Those which she disposed of by gift went to individuals, I suppose— A. Yes.

Q. (Continuing) —who were beneficiaries or objects of the bounty of Mrs. White?

A. In that particular instance, yes.

Q. Specifically, they were not Middle West Corporation?

A. No.

Q. Or any affiliated companies? A. No.

Q. Or nominees for same. Is that right?

A. They were given to members of the family.

Q. Do you have any record as to the present holdings of Mrs. White now in United Public Utilities Corporation?

A. Yes. The same memorandum that I had prepared on this subject in connection with another matter indicates that she holds 200 shares of $3.00 preferred and 500 shares of Class A common stock.

Defendant's Exhibit 285, which is also referred to as Defendant's Exhibit 91 in White's deposition, was received in evidence. It consists of a letter from White to Kruesi dated November 15, 1933, and reads in part as follows:

As you know, your companies have been receiving the services of the supervisory staff of the Middle West Utili-

ties Company, and in the last few months the Receivers of the Middle West Utilities Company have made substantial additions to the personnel of this organization. In my opinion these services are of great value to your companies, and result in savings that far exceed the fee which they regularly charge. Through a temporary arrangement that I made with the Receivers of Middle West Utilities Company, this service has been rendered to your companies during the past. The Receivers of Middle West Utilities Company now ask that your companies, as well as other operating subsidiaries of our group, pay the regular charge for this service that other operating company subsidiaries of Middle West pay.

I enclose herewith copy of their proposal, which you will note is to be made effective as of September 1, 1933.

I would recommend that your companies execute the enclosed contract, returning the two copies to me—one for delivery to the Receivers of Middle West Utilities Company and one copy for my files. I would recommend also that, at the next meeting of your Board of Directors, you have them ratify the signing of the contract on your part. If you have any reasons why the above arrangements should not be made, I would appreciate your advising me.

Defendant's Exhibit 286, which is also referred to as Defendant's Exhibit 92 in White's deposition, was received in evidence. It reads as follows:

Defendant's Exhibit 286.

Northwestern Public Service Company.

Date November 20, 1933.

Subject Supervision Contracts Middle West Utilities Co.

Location Northern and North Dakota Power & Light Companies.

Mr. S. W. White:

In accordance with recommendation made in your letter of November 15th, I have executed the enclosed contracts

covering the Northern Power & Light Company and the North Dakota Power & Light Company, and are returning both executed copies to you.

At the next Board of Directors' meeting of these companies I will request the Board to ratify the execution of these contracts.

F. E. KRUESI.

Defendant's Exhibit 287, which is also referred to as Defendant's Exhibit 93 in White's deposition, was received in evidence. It consists of a letter from White to Kruesi dated November 29, 1933, pertaining to the same matter as that in Defendant's Exhibit 286 and directing that payments be made under said contract.

Defendant's Exhibit 288, which comprises Defendant's Exhibits 94, 94-A, 94-B, 94-C, 94-E, 94-F, 94-G and 94-H in White's deposition, was received in evidence. It consists of the following letters:

Letter dated December 29, 1934 from White to Strike, which reads in part as follows:

As of the close of business December 31, 1934, the reorganization of United Public Utilities Co. will be consummated and the Company's assets will be transferred to a successor corporation called United Public Utilities Corporation.

The existing arrangement under which the organization of Middle West Utilities Company renders management supervisory services to operating subsidiaries is being continued.

In spite of the discouragements in the public utility business, I am confident that the loyal and efficient group of executives in charge of our subsidiary companies will

make possible the rebuilding of the credit of United Public Utilities Corporation, a steady improvement in the physical condition and effectiveness of our operating properties, and a creditable return to the investors whose capital is tied up in this enterprise.

Letter dated January 13, 1936 from White to Kruesi with copy to Strike. It reads in part as follows:

Herewith is a draft of one possible form of adaption of the agreement covering the allocation of expenses of the Huron central organization.

About the only thing I have done to the agreement is to make it conform to the idea that they merely agree among themselves as to the basis of dividing their expenses rather than entering into an agreement as to what sort of services are to be furnished by the central office.

Letter dated March 2, 1936 from Sandstedt to White. It states that at the last meeting of the directors the Agreement for Allocation of Joint Management Expenses (Exhibit G to the Complaint) was approved by defendant, North Dakota Power & Light Company, Northern Power and Light Company and Knife River Coal Mining Company. It points to a change suggested by Packman and asks for approval thereof by White.

Letter dated March 4, 1936 from White to Sandstedt, which approves the suggested change in answer to his letter of March 2, 1936.

Letter dated February 26, 1937, from White to Strike with copy to Kruesi. It reads in part as follows:

Sometime ago, Mr. D. C. Green, President of Middle West Service Co., informed me of his unwillingness to

have Middle West Service Co. continue to furnish Management Supervision services to operating subsidiaries of United Public Utilities Corporation at cost (which is currently at the rate of about 4/10ths of 1% of gross).

Mr. Green is of the opinion that a proper charge for such services is 8/10ths of 1% of gross, plus certain per diem charges for special services as are rendered by income tax department, travelling auditors, etc. While it is a matter of regret to me to have an increase in the charge for the services rendered by Middle West Service Co. we feel that it is desirable to have those services available to our subsidiaries and we, accordingly, recommend and request that each subsidiary execute and return to us, for delivery to Middle West, one of the attached copies of the revised contract.

Letter dated November 7, 1939 from White to Sandstedt in answer to his letter of November 4, 1939, which is Defendant's Exhibit 280 (R. p. 1300, supra), White states: "I am entirely satisfied with the form of agreement recommended by the Committee on Operations with respect to the effect on interchange capacity agreement of the installation at Bismarck of 4,000 KW. additional generating capacity."

Letter dated December 26, 1939 from McClanahan to Harper and Sanborn. It reads as follows:

We have previously requested from the auditors and treasurers of the subsidiary companies of United Public Utilities Corporation that all monthly reports, whether for this office or Middle West Service Company, be sent directly to me for distribution to the interested parties. The reason for this request is that we desire to have greater control over the number and type of reports that are being prepared by the subsidiary companies.

The balance sheet letters from your subsidiary companies are being sent directly to Middle West Service Company with a copy to this office. We will appreciate

your cooperation in sending these reports and any others which may be handled at the present time in the same manner directly to this office and we will make the proper distribution.

Letter dated August 30, 1940 from White to Sandstedt, reading in part as follows:

As I told you and Beck, last week, I did not know why Otto Stokke had increased the Bismarck capacity rating by only 3,000 K. W. upon completion of the 4,000 K. W. addition, but I was confident that he had a reason. I am glad to have that reason and the explanation sounds reasonable.

That Bismarck addition certainly accomplishes a much needed improvement in the Dakota Public Service Co. ratio of effective capacity to peak demand.

(End of Defendant's Exhibit 288.)

(Read from deposition.)

Q. When you were describing for me the makeup of the United Public Utilities Corporation board of directors, both past and present, I have forgotten whether or not I asked you whether Mr. Nichols was an engineer, so I will ask you now: Is he an engineer?

A. Yes, he is. He is a graduate of Yale-Sheffield scientific school in engineering, was in the public utility business for a number of years with one of the Byllesby companies in Wisconsin, then was in the investment banking business for a period, and has again been in the public utility business for the last several years.

Q. During the course of the operations of your Dakota subsidiaries, I take it you have been familiar with the dividends paid by those companies and received by the stockholders thereof? A. Yes.

Q. Can you state whether or not any of the Dakota subsidiaries paid substantial dividends?

A. Both the North Dakota Power & Light Company

and Dakota Public Service Company paid substantial dividends. Northern Power & Light Company paid no dividends on its stock subsequent to my appointment as receiver of U. P. U. Company on April 15, 1932.

The portions of the cross examination and recross examination by plaintiff from the deposition of White which were offered by plaintiff and were received in evidence over objection (R. 1343 to 1344, supra) are, except for deleted immaterial matters and portions printed elsewhere in this record, as follows:

Q. In your direct examination have you disclosed all of the sources of information which you had concerning facts and opinions relative to these contracts that are the subject of this litigation?

A. To the best of my knowledge, yes. I might amplify that by saying that I have not knowingly withheld any information or sources of information.

Q. You know the contracts that are in suit and are attached to the complaint, don't you? A. Yes.

Q. And in your testimony on direct-examination, have you given all the information and advices that was given to you or United Public Utilities Company, or you as receiver of that company, or to United Public Utilities Corporation, relative to these contracts, by the officers, directors, and employees of North Dakota Power & Light Company?

The Witness: Will you read that slowly?

Mr. Benson: Read that again.

(Question read).

Mr. Royhl: We object to that as indefinite, uncertain, too general, calling for the conclusion of the witness.

The Witness: As I understand that question, it asks whether I have disclosed all the information that came to me or to U. P. U., with respect to these contracts, from the officers and employees of North Dakota Power & Light Company.

Mr. Benson: And directors, was in there.

The Witness: Sir?

Mr. Benson: And directors was in the question.

The Witness: And directors, yes. To the best of my knowledge, I have. Again I will say that I have not knowingly withheld any such information that I may have had. I also might say that I was answering questions, directing my answers to those questions. They seemed to me to be very comprehensive and to cover every item or element in those contracts, and I am not aware of any omission in my answers of things that I knew or of representations that had been made to me.

Mr. Benson: Q. In preparing to testify in this case, Mr. White, apropos of what you have just said, you made a careful search of your files to get any material that you thought would bear on the issues in this litigation? A. Yes, sir.

Q. And, apropos of some of your testimony yesterday, you have attempted to have developed, by the evidence which was offered here, all such evidence and information which you could locate, which you thought had a material bearing on this litigation? I am not interested in pin point stuff.

A. I have not considered myself a competent judge on all of the things that were relevant. I think I have brought all of the stuff noted in going through a tremendous file of correspondence and files, a large amount of which I have brought, but apparently does not have a direct bearing on this case. But I have at no time advanced any suggestions as to which of that information should be developed.

Q. You left that to some one else; you left that to counsel? A. I left that to counsel.

Q. I see. A. And not to my personal counsel, either.

Q. Well, your intention was that there should be a full presentation of everything that you located or that you could think of that was material to this litigation?

Mr. Royhl: The same objection last made in full.

The Witness: That was my intention.

Mr. Benson: You disclosed, in your testimony so far, all the information and advice which you received as receiver of United Public Utilities Company and which you re-

ceived as an officer of United Public Utilities Corporation, from the officers, directors and employees of Northern Power & Light Company, concerning the rates, the rate provisions and the other provisions contained in the contracts involved in this suit, that are attached to plaintiff's complaint?

Mr. Royhl: The same objection last made in full.

Mr. Benson: I am trying to repeat the same question with reference to various companies.

The Witness: All right. Again I find that word "all" a difficult obstacle, but I can say that my answers to the questions that have been asked have been made to the best of my recollection, refreshed wherever possible from supporting material, and that in no instance have I knowingly failed to give effect to all of the advices, reports, information, observations, conversations with or from the officers and directors and employees of Northern Power & Light Company.

Q. Now, when your answer said you not knowingly failed to give effect, you meant you not knowingly failed to produce for the examination in this proceeding any of such communications or information?

A. Yes, I also mean that.

Q. Yes.

A. I have not withheld material which I have discovered in my search.

Q. Now, in talking about the officers, directors and employees of North Dakota Power & Light Company and Northern Power & Light Company, in so far as the officers and directors were concerned, during all of the period from your appointment as receiver down to the merger of North Dakota Power & Light Company and Northern Power & Light Company, those officers and directors were the same persons?

Mr. Royhl: Have you any material—

The Witness: To the best of my recollection—sorry.

Mr. Royhl: Have you any material to refer to?

The Witness: I have a large amount of minutes.

Mr. Stafford: There may have been some minor changes in there.

Mr. Benson: Do you want to answer that outside of minor changes?

Mr. Stafford: You just want it substantial, don't you?

Mr. Benson: Yes.

Mr. Stafford: There may have been one or two changes.

The Witness: To the best of my recollection the officers of North Dakota and Northern were the same and the directors were the same, although there may have been some minor variations at one time [of] another.

Q. So that when you were making the investigations of your records and stirring up your recollections with reference to the officers and directors of North Dakota Power & Light, you were dealing with reports and records and communications from the same individuals as Northern Power & Light, so that you did not have to make separate investigation for communications from Northern Power & Light as distinguished from communications from North Dakota Power & Light? A. No.

Q. You did not have to? A. I did not have to.

Q. Now, there were some—

The Witness: Although, might I add that—although I believe the people in my office did search both North Dakota Power & Light and Northern Power & Light, the files of such material as we had received or copies of those we had sent from or to those companies.

Q. Now, there was some difference in the employees of North Dakota Power & Light Company and Northern Power & Light Company, of course, wasn't there? A. Yes.

Q. The employees in the territory? A. Yes.

Q. Do you recall whether you received any communications from the employees in the territory with reference to the contract or any of the problems dealt with in the contract that are attached to the complaint in this proceeding?

Mr. Royhl: You are covering the entire span, are you, John?

Mr. Benson: Yes.

Mr. Royhl: '32 to '45—'39?

Mr. Benson: That is what I said, yes.

The Witness: Yes, I would say that all of the communications that I received from employees of those companies.

Mr. Benson: I don't know if you got exactly—I was trying to find out whether you got material from people other than the directors and the officers. Will you read the question now, in the light of Mr. White's answer and what I said?

The Witness: A. Yes, I think I did.

Mr. Benson: All right.

Q. Now you searched your records and files for any communications of employees of North Dakota Power & Light other than officers and directors?

A. Not particularly.

Q. You did not have the fact that they were employed in mind? A. No.

Q. You were searching the files for information?

A. I was searching the files for information relevant to these contracts and our relationships with those companies that might be associated with these contracts.

Q. And, if I asked you the same question with reference to communications from the employees of Northern Power & Light, other than officers and directors, your answer would be the same? A. That is correct.

Q. Now, July 1, 1939, the merger of North Dakota Power & Light Company and Northern Power & Light Company became effective, as I understand from the testimony that has been presented here? A. That is correct.

Q. And you did make a search of your files and records in your office to ascertain what communications you had received from the officers and directors and employees of Dakota Public Service Company relative to the contracts involved in this litigation? A. Yes.

Mr. Royhl: Same objection.

Mr. Benson: Q. And you made a search of your files and records in your office for communications which may have come to you from the officers, directors or employees of Dakota Public Service Company with reference to the contracts that are involved in this litigation?

Mr. Royhl: The same objection.

A. Yes.

Mr. Hastings: Could we stop there? What was the company mentioned in the preceding question?

(Record read by the reporter).

Mr. Hastings: You have asked the same question twice.

Mr. Benson: All right.

Q. Now, Mr. White, you have attempted to disclose, in your testimony heretofore given, all the information that came to you from every source, relative to the cost of the energy sold by North Dakota Power & Light Company to Northern Power & Light Company?

Mr. Royhl: The same objection.

The Witness: I have attempted to answer all the questions that were asked me, which seemed to me to have been very comprehensive in their coverage, and in phrasing my replies to those questions, I have omitted nothing material of which I was aware.

Q. Well, you did endeavor to locate everything in your files concerning the cost to North Dakota Power & Light Company of the energy it sold to Northern Power & Light Company?

A. I did. Perhaps it would be appropriate for me to detail these attempts that I have made to locate the information.

Mr. Benson: I don't think so. I am interested in whether you did make a bona fide attempt.

The Witness: All right.

Mr. Benson: And your answer is yes?

The Witness: And my answer to that is yes.

Mr. Benson: All right.

The Witness: But I was merely troubled by this word "all", which is a rather comprehensive word.

Mr. Benson: Let me put it this way then:

Q. You attempted to provide everything that you thought had any bearing on the cost of the energy sold by North Dakota Power & Light Company to Northern Power & Light Company?

Mr. Royhl: The same objection.

A. That is correct, and you have summarized my entire attempt by suggesting that I have made a bona fide attempt to produce all the information that I could find, or material.

Mr. Benson: Now, the energy which North Dakota Power & Light Company sold to Northern Power & Light Company was generated by North Dakota Power & Light Company? A. Yes, sir.

Q. In searching your files and records preparatory to testifying in this case, did you also look for any information and data in those files which you had, with reference to the cost to Northwestern Public Service Company of energy which it generated?

A. Not specifically, and I can't recall that, in giving instructions to my office force prior to the search for those files, that I mentioned Northwestern figures, although I am aware of the fact that part of the material which I have produced, and some part of which has been introduced by the defendant, there is some information on generating costs of Northwestern Public Service Company.

Q. Do you know whether you have more information on those generating costs of Northwestern? You don't recall immediately, offhand? A. I don't recall right offhand, no.

Mr. Benson: Now, I wonder whether, some time when we are in recess, some time during your examination, you might ask your office force to make a search for that?

The Witness: I will be very glad to.

Mr. Benson: All right.

The Witness: I also have in mind that some of the analyses of power costs—

Mr. Benson: Now, let us try—I am trying to speed up this examination.

The Witness: All right.

Mr. Benson: You want to get out and I want to get out.

The Witness: All right, sir.

Mr. Royhl: Did you complete your answer, Mr. White?

The Witness: I merely wanted to say that in this material I have here several of the analyses of power costs of Dakota Public Service Company or its predecessors also include similar analyses of power costs of Northwestern Public Service Company.

Mr. Benson: Yes. Now, will you read his answer, please?

(Answer read).

Mr. Benson: Q. You mean you have some analyses of costs here with reference to the generation of energy by North Dakota Power & Light Company, which have not been offered in evidence? A. I am pretty sure I have.
Q. Can you locate them, please?

Mr. Benson: We will pass that question for the time being and your personal counsel, who is here, can browse through the files in the meantime. Maybe we can shorten this up.

Q. You did not make any particular search to find in your files material concerning the cost to Northwestern Public Service Company of energy generated by it?
A. No, I did not, but I will.
Q. Have you made a careful search to locate in your files everything that you received in the way of information relative to the cost to Northwestern Public Service Company of the interconnection facilities referred to in the contract, Exhibit B to the complaint?

Mr. Royhl: Same objection as last made in full.

The Witness: A. Yes.

Mr. Benson: Q. And did you produce all that you found?
A. All that I found is here in this room.
Q. How long has it been here?
A. Since the beginning of the hearing.
Q. Do you recall whether, at the time your examination was going on, it was your thought that everything that you had with reference to costs of those interconnection facilities to Northwestern Public Service Company was going into the record?

Mr. Royhl: We object to that as calling for the opinion and conclusion of the witness, and immaterial.

Mr. Royhl: Defendant objects to this for all the reasons heretofore urged in full to this line of testimony; for the further reason that no proper foundation has been laid; the witness has not shown himself competent, and as to this defendant it would be hearsay and self-serving.

Mr. Benson: Q. You said you had some material concerning the cost to Northwestern Public Service Company of the interconnection facilities involved in the 1935 contract, Exhibit B to the complaint?
A. I believe there is in my files, among the material which I dug out, some information about the rate on interchanged energy under that 1936 agreement. Is that the question you asked me?

Mr. Benson: My question is directed to what the interconnection facilities cost Northwestern Public Service Company. Now, with that explanation of the question, I am asking you whether you made a search of your files for information which came to you from any and all sources that you could recollect concerning such cost of interconnection facilities.

The Witness: Yes.

Mr. Benson: Q. And you produced all of that information here? A. I have it here.
Q. Well, you produced it, then, didn't you? A. Yes.
Q. And did you call all of that information or any part of it to the attention of counsel for the plaintiff?

Mr. Royhl: Same objection last made in full.

A. I don't recall that I called attention to—attention of plaintiff's counsel to that information. I answered questions about material in my files.

Mr. Benson:

Q. The material which you produced at these proceedings at the beginning of the proceedings is involved in several open folders? A. Yes.

Q. Is contained in several open folders. Those open folders have been here on the desks and anybody could look at them? A. Yes.

Q. I could look at them? A. Yes, sir.

Q. And that was agreeable to you?

A. It would have been.

Q. And counsel for the plaintiff, naturally, had access to them,—or counsel for the defendant, rather, naturally, had access to them? A. Yes.

Q. Because they were in his office? A. Yes.

Q. Did you call to the attention of counsel for the defendant anything in your files relative to the cost to Northwestern Public Service Company of the interconnection facilities—

Mr. Royhl: The same objection last made in full.

Mr. Benson: Q. (Continuing:) —dealt with in Exhibit B to the complaint?

The Witness: Frankly, I don't recall just exactly what there is in my files on that subject. I know that in the material I have brought a cost of those facilities is mentioned a number of times in varying amounts. Many of those amounts, as mentioned in correspondence, are unsupported in my files and I believe that such information as there is does not give the complete story of that cost in any one place, and I don't recall that it does collectively give a complete story, and I don't recall—

Mr. Benson: Will you read the answer, please?

(Record read).

The Witness: (Continuing:) —that I mentioned that fact.

Mr. Benson: Will you read the question, please?

(Question read).

The Witness: I am sorry. I didn't mean to be evasive. Not to my recollection.

Mr. Benson: All right. Now, let us get straightened out on some of your procedure with reference to your files here.

Q. I noticed the statement was made from time to time by counsel for Northwestern that you had produced a document from your files at his request? A. Yes.

Q. Do you know, in any instance, the source of his information as to the existence of that document?

A. I think in every instance he got his information from examination of the files.

Q. When were those files examined, so far as you know, by the attorneys for the Northwestern Public Service Company?

Mr. Royhl: Objected to as immaterial.

Mr. Benson: When?

Mr. Royhl: Irrelevant.

The Witness: Prior to or during the course of the hearing.

Mr. Benson: I mean prior to the hearing.

The Witness: Some were.

Mr. Benson: Q. Some were examined prior to the course of the hearing? A. Yes.

Q. And some were examined during the course of the hearing? A. Yes.

Q. And the examination prior to the course of the hearing was made in the office of the attorney for the Northwestern Public Service Company? A. Yes.

Q. And you brought the files or sent them to the office of the attorney for the Northwestern Public Service Company?

Mr. Royhl: Objected to as immaterial and irrelevant.

The Witness: A. Neither.

Mr. Benson: Q. Well, how did they get to the office of the attorney for the Northwestern Public Service Company?

The Witness: A. They sent for them.

Q. Oh, they sent to your office for them? A. Yes.

Q. Now, do you recall what files they sent for?

A. Such files as I had pulled up to the time they sent for them.

Q. Did they describe those files by titles when they asked for them?

Mr. Royhl: Same objection.

The Witness: A. Yes, I think they did, generally.

Mr. Benson: Q. Where did they get the titles to the files?

Mr. Royhl: Same objection.

The Witness: I did not mean to say that they asked for files according to titles that were on the folders in my filing system.

Mr. Benson: Q. What do you mean by titles?

A. I mean by general classification.

Q. I see. A. A general description.

Q. Has there been disclosed in the evidence in this case all of the facts and opinions on which you based your statement, which was substantially to the effect that you thought, or you were satisfied that the $20,000 per year charge to Northern Power & Light Company for interconnection facilities was fair and reasonable?

Mr. Royhl: Same objection.

Mr. Benson: Read the question to Mr. White.

The Witness: May I have the question? I am trying to frame an answer.

(Question read).

The Witness: I can't say that everything has been disclosed, because I have been answering questions and attempting to give direct answers, but without omitting any information of which I was aware.

Mr. Benson: Q. Well, do you recall now any facts or opinions which you had received from any source, relative to the $20,000 per year charge for interconnection facilities involved in Exhibit B to the complaint, that you would like to produce here? A. No, I do not.

Q. Now, that $20,000 per annum charge, or $1,666.66 per month, is also provided for in Exhibit D to the complaint, that is the July 1, 1939 contract, between Northwestern Public Service Company and Dakota Public Service Company entitled "Interconnection contract". A. Yes.

Q. Now, do you have in mind any facts or opinions which were available to you at the time of your testimony with reference to that contract which you now desire to present?

Mr. Royhl: We object to that as incompetent, immaterial, irrelevant, not binding on the defendant, calling for the opinion and conclusion of the witness and too general.

A. I have no particular desire to introduce any information, I have offered to both the plaintiff and the defendant and have in turn been subpoenaed to produce all information which in general is relevant to these agreements, and I have attempted to produce all such information.

Mr. Benson: Well, I think you—

The Witness: I am not capable of appraising whether the material that has been brought out in the testimony so far gives a complete coverage of the facts, but I have the impression that it does, and some of my testimony has probably been based purely on my recollection, and other parts of it on my recollection as refreshed from documents that went into the record.

Mr. Benson: All right. What I am asking you now is can you now recall any information which you had with reference to the charge of $20,000 per year, or $1,666.66 per month, which you were not asked to testify to in this proceeding.

Mr. Royhl: Same objection as last made in full.

The Witness: I don't.

Mr. Benson: Q. You don't recall now any additional information?

A. I don't recall additional information which might be relevant.

Q. Now, the charge of $1,666.66 per month was referred to in Exhibit B and Exhibit D, Exhibit F, and the supplement to Exhibit F, all being exhibits to the plaintiff's complaint.

Mr. Royhl: Wait, I didn't get that question.

The Witness: Well, it is not—

Mr. Royhl: Wait a minute.

Mr. Stafford: It is not a question yet.

Mr. Benson: All right. Counsel wants to hear the beginning of this question.

(Record read).

Mr. Benson: Q. I would like to ask you whether you had any facts furnished you by others concerning that charge, or any opinions furnished you by others concerning that charge, which you have not produced here,—

Mr. Royhl: Same objection last made.

Mr. Benson: Q. —or concerning which you have not testified about here.

Mr. Royhl: The same objection.

The Witness: Will you read the question?

(Record read).

The Witness: My answer to that question is no, with the exception that I have in my files, for a number of years, a book of memoranda made by Mr. Lakin in the course of his inspection trips over the Dakota properties in 1936 and '41. That book also included some correspondence which he had direct with the operating staff of that property, and it was the basis and included part of the material of his verbal report to me and to the directors of United Public Utilities Corporation as to the desirability and attractiveness of the 1935 interconnection contract, from the

standpoint of Northern Power & Light Company and United Public Utilities Corporation.

Mr. Benson: Q. Now, are there any other sources of information, without characterizing them, that you recall?

A. No others.

Q. All right. Now, you don't know whether Mr. Lakin made this [ir] not, of your own knowledge, made the entries in that book? You don't know of your own knowledge?

A. Those that purport to be his entries I would recognize, because they are in longhand in his handwriting.

Q. You heard his testimony as to his sources of information, didn't you? A. No, I did not.

Q. Oh, you weren't here? A. I was not here.

Q. When his testimony was given? A. No, I was not.

Q. Now, Mr. White, I call your attention to Exhibit C to the plaintiff's complaint. That is a contract dated the 1st day of January, 1938, entitled Interchange Capacity Agreement. You are familiar with that agreement?

A. Yes, sir.

Q. Have you any information as to how the rate of $13.20 referred to in Article VIII was arrived and which information has not been introduced in evidence here—

Mr. Royhl: The same objection last made in full to this line of questions.

Mr. Benson: Q. (Continuing —in your testimony?

A. I have a recollection on that point, and I don't recall whether or not it has been introduced in my testimony.

Mr. Benson: All right.

Q. Was this thing that you recall a written document?

The Witness: I recall it very clearly, and I think that—strike that—and I think now that it does appear in some of the documents that were introduced, although I don't believe the specific answer to your question was—

Mr. Benson: Elicited by counsel?

The Witness: —elicited by counsel from me.

Mr. Benson: Q. That is the responsibility of counsel, isn't it? A. It certainly is, as far as I am concerned.

Mr. Benson: Now, we will show you the exhibits, which were kept by counsel for the defendant—

Mr. Stafford: And have been examined by others during the course of the hearings.

Mr. Benson: Including counsel for the plaintiff. Is there any exhibit that is not in here (indicating)?

Mr. Robinson: Exhibit 2. We withdrew that pursuant to the stipulation.

Mr. Benson: Exhibit 2, and what else?

Mr. Robinson: It starts with 3. Every one was there up to the time I turned it over to you this morning.

Mr. Benson: Now I show you all of the exhibits that have been offered to date in this hearing—now let's keep them separate from your papers there—and will you run through them and indicate the document which you had in mind when you answered my last question?

(Witness looks through the exhibits handed to him.)

Mr. Benson: Read the question, Mr. Reporter, so he can get exactly what was said.

(Record read.)

Mr. Benson: Now, read the current question.

(Question read as follows: "Now I show you all of the exhibits that have been offered to date in this proceeding, and will you run through them and indicate the document which you had in mind when you answered my last question?")

Mr. Royhl: Same objection as last made in full. Indefinite and uncertain.

Mr. Benson: Q. What is the document you had in mind?

Mr. Royhl: Same objection.

The Witness: Defendant's Exhibit 24 id.

Mr. Benson: Q. "Id" means for identification, doesn't it? A. I would judge so.

Q. Well, the "id" is one symbol, "id". A. Yes.

Q. Read the title at the top of Exhibit 24, on the first page.

A. Survey of Power Requirements, Northwestern Public Service Company, Northern Power & Light Company, North Dakota Power & Light Company.

Q. Now, in what portion of Exhibit 24 do you find what you had in mind as a statement or any representation having anything to do in any way with the rate of $13.20?

Mr. Royhl: Oh, we object to that for all the reasons heretofore urged, and an examination concerning a document not now in evidence. And the document itself is the best evidence.

Mr. Benson: Go ahead and answer.

The Witness: I find on page 11, in the fourth full paragraph, at the top of the page, being the third paragraph from the bottom of the [pages], the statement that—shall I read it?

Mr. Benson: Yes.

Mr. Royhl: We object to the reading of the exhibit in evidence, as the exhibit itself is the best evidence of what it contains; and for all the grounds heretofore urged to this line of testimony.

The Witness: (Reading:) "We believe a fair basis would be to assume an investment of $110 per kilowatt and to charge 12% on this investment.

Mr. Benson: Q. Now, Mr. White, do you have any information that is not in the exhibits and that you have not heretofore testified to, which information has to do with how the rate of $13.20 per kilowatt of firm demand per year was arrived at, for use in Article VIII of Exhibit C to the plaintiff's complaint?

Mr. Royhl: Objected to as indefinite and uncertain, and on all of the grounds heretofore urged to this line of questioning.

The Witness: I think the same basis for the $13.20 figure may be mentioned in other places in the material I have produced, and I have an independent recollection of con-

versations in which the fairness of that method of calculation was discussed.

Mr. Benson: All right.

Q. Now, with whom did you have such conversations?
A. With Mr. Strike and I think with Mr. Buell.
Q. Did you have more than one conversation with Mr. Strike concerning this charge? A. That I can't recollect.
Q. Can you recall the time of the conversation? A. No.
Q. Nor the place? A. No.
Q. Do you recall the conversation in detail or just the substance of it? A. Just the substance.
Q. What did Mr. Strike say, according to your best recollection?

Mr. Royhl: Same objection last made in full. No proper foundation laid.

A. That he had suggested a figure that was so low that I couldn't possibly disagree with it.

Mr. Benson: Q. Did you have one or more conversations with Mr. Buell?
A. I don't recall whether, in my conversations with Mr. Buell, a discussion of that item occurred more than once.
Q. Do you recall where that conversation was?
A. No, but probably in Chicago.
Q. Do you recall when it was? A. No.
Q. Do you recall the conversation in detail? A. No.
Q. Or only the substance of it? A. Only the substance.
Q. What did Mr. Buell say?

Mr. Royhl: Same objection last made in full.

A. I don't recall what he said, but I have an overall impression.

Mr. Benson: Well, we will omit that.

Q. Did you make any investigation yourself concerning what would be a fair rate to be inserted in Article VIII of Exhibit C before that document was executed,—any source other than you have disclosed in your cross-examination?
A. I don't recall whether I checked it with Mr. Lakin or not.

Q. Did you go to any other sources than you have disclosed in your cross-examination to date? That is my question.

Mr. Royhl: Go ahead and complete—

The Witness: I cannot state that I did or did not.

Mr. Benson: I see.

Q. Do you have the original Articles of Incorporation of United Public Utilities Corporation?

The Witness: Yes. They are included in our original minutes that are here.

Mr. Benson: You thought that you might be able to locate a pamphlet of the original Articles.

The Witness: I have such a pamphlet.

Mr. Benson: Have you found that?

The Witness: Yes.

(Document handed to counsel).

Mr. Benson: You have produced two copies of the Certificate of Incorporation of United Public Utilities Corporation, in a pamphlet dated on the outside January 1, 1935.

The Witness: Yes.

Mr. Stafford: These are true and correct copies of the charter, aren't they?

The Witness: Yes, just as accurately as a good printing firm could conform them.

Mr. Benson: Will you please mark this document for identification?

(The document was thereupon marked Plaintiff's Exhibit 1 for identification, of 9/19/47.)

Mr. Benson: I will ask counsel whether we may stipulate that the document marked Plaintiff's Exhibit 1 for identification is a true and correct copy of the original Certificate of Incorporation of United Public Utilities Cor-

poration and may be received in evidence in lieu of the original Certificate of Incorporation of that corporation.

Mr. Stafford: If there is any change, why, subject to change on verification.

Mr. Benson: Subject to change?

Mr. Stafford: That is agreeable subject to correction by verification with the original, also subject to the objection that it is immaterial and irrelevant.

Mr. Benson: Let me have Mr. Stafford's full statement.

(Record read as above recorded).

Mr. Stafford: All right?

Mr. Benson: Yes.

Q. You have produced a copy of all documents changing the terms of the original Certificate of Incorporation of United Public Utilities Corporation, have you?

The Witness: A. To the best of my knowledge there is only one such document or change, and I have produced a conformed copy.

Mr. Benson: Mark this Plaintiff's Exhibit 2 for identification.

(The document was thereupon marked Plaintiff's Exhibit 2 for identification of 9/19/47).

Mr. Stafford: Referring to a document marked Plaintiff's Exhibit 2 for identification, where did you receive the document from?

The Witness: I received it from Evans, Bayard & Frick, Philadelphia, general counsel for United Public Utilities Corporation, who prepared it and filed it.

Mr. Stafford: Was it conformed as to dates and signatures when you received it from those lawyers?

The Witness: Yes.

Mr. Benson: It may be stipulated, counsel, that Plaintiff's Exhibit 2 for identification is a true and correct copy of the, what you and I would call an amendment to the

Certificate of Incorporation of United Public Utilities Corporation?

Mr. Stafford: Well, I don't know that you accurately call it a certificate of amendment. It is a certificate of information.

Mr. Benson: Of information.

Mr. Stafford: Yes, we will make the same stipulation on that document as we did with reference to Plaintiff's Exhibit 1 for identification,—subject to the same objections.

Mr. Benson: Plaintiff offers in evidence Plaintiff's Exhibit 1 for identification, and asks that the same be attached to and returned with the deposition of this witness,

Plaintiff offers in evidence Plaintiff's Exhibit 2 for identification, and asks that the same be attached and be returned with the deposition of this witness.

Mr. Stafford: To which the defendant interposes the same objections heretofore stated in the stipulation, which is on the record.

(Copies of said documents offered in evidence as Plaintiff's Exhibits 1 and 2, respectively, are attached).

Mr. Benson: Will you produce the minute book of United Public Utilities Corporation containing the annual stockholders' minutes for 1945?

The Witness: These minutes run up to the meeting of November 2, 1945.

(Handing document to counsel)

I can't state definitely that there was any meeting in 1945 subsequent to those.

Mr. Stafford: We have your own copy, if you want to look at it. Give him his own there. It is the black book.

Mr. Benson: Counsel, may we make the same stipulation with reference to the introduction of the minutes and the method of introducing minutes which we had when the defendant was introducing minutes?

Mr. Stafford: Yes, so stipulated.

Mr. Benson: Now, I will read from the original minutes.

Q. Mr. White, these are the original minutes of the annual meeting of the stockholders of United Public Utilities Corporation, held at Flemington, New Jersey, on April 25, 1945? A. Yes, sir.

Mr. Benson: (Addressing Mr. Stafford): Look at those and see if you find a general resolution approving the acts of the officers and directors of the preceding year.

Mr. Stafford: Not in this one.

Mr. Royhl: You said stockholders' meeting.

Mr. Stafford: They adjourned it apparently. The action taken here is they adjourned it: "It was unanimously adopted by all stockholders to adjourn over to June 8th."

Mr. Royhl: Concerning Plaintiff's Exhibits 1 and 2 and the probable use of the minutes of April 25, 1945, and June 8th, of 1945, of the stockholders of U. P. U. Corporation, the defendant asks that the plaintiff state whether or not such testimony is intended as direct testimony by the plaintiff of this witness or intends the same to be a cross-examination of the testimony of this witness taken by the defendant.

Mr. Benson: It will be offered for each of those purposes.

Mr. Royhl: The defendant now objects and moves to strike out Exhibits 1 and 2 for the reason and on the grounds that same are not a cross-examination of this witness of any matters or things inquired into on the direct-examination of this witness, and, as cross-examination, are incompetent, immaterial, and irrelevant, and improper cross-examination of this witness.

A portion of White's cross-examination is omitted because it appears at page 1344, line 19, through page 1345, line 17th from the bottom, and 1345, lines 25 through 35; and line 11, page 1351, through line 26th from bottom, page 1352 of the record, supra.

Q. In your examination by the defendant's counsel, you made some statement about having made an investigation of Mr. Sanborn. You were referring to Mr. A. B. Sanborn, as to whom you testified in your testimony on direct-examination? A. Yes.

Q. He is the same man who is sometimes called Beck Sanborn? A. Yes, sir.

Q. By "investigation" did you mean you made [in] investigation or you had an interview with Mr. Sanborn?

A. I had an interview with Mr. Sanborn and also saw the results of some inquiry that had been made as to his record and capabilities, such inquiry having been made, as I recall, by Mr. F. E. Kruesi, from some Canadian investment banking firm which owned the control of the electric utility company in British Columbia by which Mr. Sanborn was employed immediately prior to his engagement as president of the three U. P. U. subsidiaries and Northwestern Public Service Company.

Q. Did you ever make an investigation of any kind as to Mr. C. J. Strike?

A. No. By that I mean I made no investigation outside of the organization of Middle West Utilities Company or Middle West Service Company.

Q. Do I understand that you made inquiry of Middle West Utilities Company with relation to Mr. Strike?

A. Yes. When I—

Q. Now, I am trying to get this straight as between these various organizations that we have bumped into in this record, in this testimony. Is that the only investigation you made of Mr. Strike? A. Yes.

Q. Did you make an investigation of Mr. T. T. Parker?

A. Yes.

Q. Did you make that investigation by making inquiry of Middle West Utilities Company officers?

A. Officers, yes, or department heads, capable of expressing an opinion on his capabilities.

Q. Did you make any investigation concerning Mr. C. L. Sandstedt? A. Yes, the same kind of investigation.

Q. By that last answer you mean you inquired of officers and department heads of Middle West Utilities Company?

A. Yes.

Q. Did you make any investigation of the man W. N.

Dunn or N. Dunn, mentioned in your testimony on direct examination? A. No. When he had—

Q. Well, you made no investigation concerning Mr. Dunn? A. No.

Q. Did you make an investigation concerning Mr. G. R. McArthur, concerning whom you testified in your examination on direct-examination?

A. I did, by talking with Mr. Kruesi and Mr. Strike at the time he was proposed for election as vice-president.

Q. Did you make any investigation of Mr. F. E. [Keursi] whom you mentioned in your direct-examination?

A. No, none that I can recall.

Q. Did you make these investigations for the purpose of ascertaining whether these men had a reputation for being frank?

A. I did for the overall satisfying myself as to their capabilities and dependability.

Q. Now, when you speak about dependability, you mean as to whether all facts relative to the operation of the Dakota subsidiaries of U. P. U. would be reported to you?

A. I can't recall of ever directing an inquiry along that specific line.

Q. Did you expect the officers of Dakota Public Service Company, North Dakota Power & Light Company and Northern Power & Light Company and Knife River Coal Mining Company to give you complete and accurate statements of facts when they reported any facts to you?

A. Yes.

Q. And, when they reported any opinions, did you expect them to give you complete and accurate statements of the facts upon which their opinions were based?

A. Well, I expected all representations made to me to be accurate and made in good faith, and I expected sufficient completeness in those representations to warrant me, in my particular capacity, to form an intelligent opinion of what was going on.

Q. Did you expect complete and accurate reports from the Middle West Service Company on all matters which came within their line of service for your Dakota subsidiaries?

The Witness: Read that, will you, please?

(Question read.)

A. Yes.

Q. And you expected the same type of reports from the receivers of Middle West Utilities Company when those receivers were rendering service to you under the conditions which you described in your examination in chief?

A. Yes. I might qualify that by saying that the disorganization and changes that were being made in the Middle West organization by the receivers, and the reorganization of their staff during the receivership, would not justify me in expecting at that time a flow of information in as great volume as I came to expect after that organization became stabilized.

Q. I take it, Mr. White, that you never told any of the officers or directors of your Dakota subsidiaries that they might withhold or misrepresent any facts to you?

A. That is correct.

Q. You did not? A. I did not.

Q. You expected the operating committee under the interchange capacity agreement to honestly and accurately determine the facts to be used in the use of the formula provided in the agreement for determining what the charge would be that would fall on the party or parties to the contract in the succeeding year? A. I did.

Q. And that was true in every contract that had an interchange capacity agreement in it? A. Yes.

Q. And every contract where you had these charges which were fixed at $13.20 per annum per kilowatt?

A. I expected a fair and just determination of all the factors against which the $13.20 charge was to be applied.

Q. Do you have a college degree? A. No.

Q. You went to college, didn't you?

A. Yes, for three years.

Q. What was your class? A. Class of 1908.

Q. The College? A. Harvard.

Q. Academic? A. Yes.

Q. You were asked to produce some copies of your receiver's first report, and I think yesterday some one of them went into evidence, didn't it?

Mr. Stafford: Not the first.

Mr. Benson: What?

Mr. Stafford: Not the first, though he did produce it, and it was examined yesterday. The second and third.

Mr. Benson: Do you have a copy of the first?

Mr. Stafford: No. Did we?

Mr. Robinson: I think we turned it back. I will look.

Mr. Stafford: Are there others available, I mean in the future?

The Witness: Yes.

(Discussion here not recorded.)

Mr. Stafford: I have a copy, Mr. White.

Mr. Benson: All right; I just wanted to be sure. Do you have one?

Mr. Stafford: Let me see. Is it the same thing?

Mr. Benson: Will you please mark this for identification?

(Thereupon said document was marked Plaintiff's Exhibit 3 for identification of 9/26/47.)

A portion of White's cross-examination is omitted because it appears at page 1345, line 36, through page 1346, line 12, of the record, supra.

Mr. Royhl: Objected to as self-serving, and also, as to the defendant, incompetent, irrelevant and immaterial, not proper cross-examination, and no sufficient foundation.

Mr. Benson: Does the claim as to no sufficient foundation go to the fact that this is not a true and correct copy of the receiver's report?

Mr. Royhl: No.

Mr. Benson: Or that it is not certified by the clerk of the court where it is filed?

Mr. Royhl: No.

A portion of the cross-examination of White is omitted because it appears at page 1347, line 2, through page 1347, line 14, of the record, supra.

Mr. Benson: I don't want it to appear in the record that I cut you off with reference to your college, neither do I want it to appear as though you started, and, for some reason against your [schlorship], didn't get through.

The Witness: The reason was financial.

Mr. Benson: All right, that is all I wanted to clear up.

A portion of the cross-examination of White is omitted because it appears at page 1354, line 7, through page 1354, line 36, of the record, supra.

Q. At the time you became receiver of United Public Service Company, all of the stock of that company was owned by—all the voting stock of that company, I think you said, was owned by The Middle West Utilities or Middle West Utilities Company?

A. Practically all of the common stock of United Public Service Company was owned by Middle West Utilities Company.

Mr. Stafford: Wasn't your question United Public Utilities Company?

Mr. Benson: No. The question was United Public Service Company. Read it.

(Record read.)

Mr. Benson: Q. At the time you became receiver of United Public Utilities Company you testified as to the ownership of the stock of United Public Utilities Company by United Public Service Company?

A. Yes, all of the stock of United Public Utilities Company was owned by United Public Service Company.

Q. Do you remember whether any stock other than common stock of United Public Utilities Company had voting rights at that time? A. I don't.

Q. Do you remember whether at the time of the receivership any of the stock of United Public Service Company other than the common stock had any voting rights?

A. I don't. I do recall that, regardless of whether it did or not, the voting control lay in the common stock.

Mr. Royhl: I didn't get that answer.

(Answer read.)

Mr. Benson: Q. At the time you became receiver of United Public Utilities Company did you make an investigation as to the rates then being paid by Northwestern Public Service Company to Northern Power & Light Company for electrical energy?

A. I did some months after my appointment.

Mr. Benson: Now read the question to the witness.

(Question read).

Mr. Benson: Q. The investigation which you made was initiated by the inquiry contained in Defendant's Exhibit 78 for identification?

A. Yes, that is the first investigation of which I have any recollection.

Q. I show you Defendant's Exhibit 3 for identification. Is that the only response you got to your letter of December 30, which is Defendant's Exhibit 78 for identification? A. As nearly as I can recall, yes.

Q. At that time did you make any investigation as to what the rates for such energy were in the month of November, 1932? A: No, I did not.

Q. Have you ever been advised as to what the rates for such energy were in the month of November, 1932?

A. There was a detailed study of those rates made. I don't recall whether that study was based on 1932 rates. I have no recollection of the rate, the energy interchange rate of five mills having varied as between months.

Q. Do you know where that study is that you just referred to?

Mr. Royhl: I object to this as immaterial and not within the issues, there being no inquiry of any rates prior to January 1, 1936. Wholly incompetent and irrelevant and not proper cross-examination.

The Witness: A. I believe it is included either in my files or in one of the exhibits. I think it is in one of the documents that has been introduced.

Mr. Benson: Well, I would like to show the witness all of the exhibits, so that he can take a look at all of them

(Defendant's Exhibits handed to the witness.)

The Witness: I had in mind the intercompany rate analysis which was filed as Defendant's Exhibit 4 for identification.

Mr. Benson: Q. Mr. Stafford, attorney for the defendant in this proceeding, has asked you once or twice to explain something about the coal rates, particularly with reference to the $1.40 rate charged by Knife River Coal Mining Company, per ton, for coal delivered to North Dakota Power & Light Company, and the 75 cent rate charged to Northwestern Public Service Company by the same coal mining company. That is a correct statement of the two rates that your attention was called to by Mr. Stafford's most recent question, I think. A. Yes.

Q. That is your recollection also. You meant that was your recollection also as to the two rates I was talking about? A. I thought he referred to three rates.

Mr. Benson: He did. He also referred to an 85-cent rate. Northern Power & Light Company, wasn't it?

The Witness: North Dakota Power & Light Company, at Bismarck.

Mr. Benson: Oh, at Bismarck, is that right?

The Witness: Yes.

Mr. Benson: Q. Now, getting to the $1.40 rate that we have referred to, for a ton of coal delivered in the bunker of North Dakota Power & Light Company at the Beulah generating station, the Knife River Coal Mining Company got $1.40? A. That is correct.

Q. For a ton of coal delivered in cars at the Beulah mine to be shipped to Northwestern Public Service Company, the Knife River Coal Mining Company got 75 cents; correct?

A. That was correct. I misunderstood the statement regarding the Beulah plant to the extent of saying that as nearly as I can recall the Coal Mining Company delivered that coal to a transfer point, from which the power company operated a conveyor that carried the coal into the bunkers. As I recall that was the exact arrangement. However, that amounted to one mechanical belt from the tipple to the transfer point, where the coal was picked up by another continuous belt and carried into the bunkers. If my memory serves me correctly the Coal Mining Company operated only the first of those belts, or paid the cost of the operation up to that point.

Q. How was the coal loaded into the cars that were shipped to Northwestern Public Service Company?

A. By chutes from the tipple down to the level of the track, where the coal loading machine picked it up and carried it into the cars.

Q. So, for the ton of coal delivered to North Dakota Power & Light Company $1.40 in money dropped into the pocket of the mining company? And for the coal delivered into cars for Northwestern Public Service Company, 75 cents dropped into the pocket of the mining company?

A. Yes.

Q. In your testimony, when you were under examination by Mr. Stafford in this proceeding, Mr. Stafford asked you: "With reference to that coal rate at Beulah, you testified, I believe, that the delivery was accomplished from the Knife River Beulah mine to the Beulah plant by conveyor belt. Was that continuous operation; that is, continuous in the sense that it was not seasonal?" To which you answered: "Yes."

The Witness: Yes.

Mr. Benson: Mr. Stafford then asked you, "And did that possibly have anything to do with determining the rate of $1.40?" To which you answered: "It had all to do with the rationalization of the price, and also was an actual element of additional cost, that the mine was under

obligation to operate throughout the summer, when mines ordinarily did not operate for the sale of lignite. Lignite does not store well. When stored it disintegrates because of the high moisture content, and therefore the selling season on lignite is limited almost entirely to the heating season; but this mine, with its obligation to supply fuel requirements of the Beulah generating station, had to operate during the summer, both the mine and the tipple; and when screenings were not available it had to crush coal to furnish the plant requirements."

During the summer the Knife River Coal Mining Company was furnishing, from this same mine, through the equipment which you have previously described on cross-examination, coal to the Northwestern Public Service Company?

The Witness: Did you ask that as a question?

Mr. Benson: I asked that as a question.

Mr. Stafford: Do you want the question?

Mr. Benson: Yes, read it to the witness.

The Witness: In the years when those rates were applicable I can't say for sure that they were or were not making summer deliveries from the mine to Northwestern Public Service Company.

Mr. Benson: Q. You don't know, then?
A. I don't recall.
May I supplement that answer?

Mr. Benson: You mean you have some more information that has occurred to you?.

The Witness: No.

Mr. Benson: Well then let's let it drop.

A portion of the cross-examination of White is omitted because it appears at page 1354, line 37, through line 28 on page 1355 of the record, supra.

Q. I see. So what you intended to say in the first part of your answer was that you expected that Mr. Stafford would develop that explanation further and give you an opportunity to tell what you have just told?

Mr. Royhl: That is objected to as argumentative, incompetent.

A. Not quite that, but I did not expect that my mere statement that that price was a rationalization or the basis of determining that price was a rationalization, would suffice for a thorough explanation of the subject which I expected before the hearing closed.

Q. You expected, then, some further questions on cross-examination as to that rationalization?

Mr. Royhl: Same objection.

The Witness: I did not—

Mr. Royhl: Just a minute. We object to that as immaterial, and argumentative.

Mr. Benson: No, I think this question is proper.

The Witness: I had no idea when or where, but it is perfectly obvious to me, and it has been at all times that those coal prices had sufficient apparent disparity to—

Mr. Benson: Elicit inquiries?

The Witness: To elicit inquiries.

Mr. Benson: All right.

The Witness: And I was confident that a satisfactory explanation could be made of that disparity.

Mr. Benson: Q. Now, with further reference to the $1.40 price and the 75 cent price on a ton of coal that we have been talking about, the cost to mine a ton of coal sold to North Dakota Power & Light Company was the same as the cost to mine a ton of coal to Northwestern Public Service Company?

Mr. Royhl: Objected to as not within the issues in this case, there being nothing in this case challenging the prices or rates of coal sold by one subsidiary to another, of the U. P. U., and there is no action or pleading now pending challenging the coal rates as between the U. P. U.

subsidiaries, or either of them, and the Northwestern Public Service Company. Incompetent for any purpose.

Mr. Benson: Now, will you read the question to the witness, please?

(Question read.)

The Witness: A. The mining cost would have been the same.

Mr. Benson: Q. Do you know what it costs to deliver a ton of coal to North Dakota Power & Light Company for which it paid $1.40?

Mr. Royhl: The same objection.

A. I can't recall that.

Mr. Benson: Q. Can you recall what it cost to deliver a ton of coal to Northwestern Public Service Company under the arrangement which you have described?

A. I have not described the arrangement with Northwestern Public Service Company.

Mr. Benson: Well, all right, if that is your answer to that.

Q. Do you know what the mining costs were of the coal at the Beulah mine when coal was being delivered to North Dakota Power & Light Company at $1.40 a ton and to Northwestern Public Service Company at 75 cents a ton?

Mr. Royhl: We object to that for all the reasons heretofore urged, and a misstatement on the record. There is no record or evidence that any coal was delivered by Knife River to Northwestern Public Service Company, the evidence being that it was f. o. b. mine.

The Witness: A. I don't recall Knife River Coal Mining Company's mining costs at the time the $1.40 price to the Beulah plant was in effect.

Q. You testified that you had some service contract with either Middle West Company or the receiver of Middle West Company. That is correct, isn't it?

The Witness: A. Yes.

A portion of the cross-examination of White is omitted because it appears at page 1355, lines 28 through 36, of the record, supra.

Q. Do you have a copy of that agreement?
A. I have looked for it, and I have not yet located it.

Mr. Benson: I see.

The Witness: It is in my receiver's files, which are tucked away in a storage vault.

Mr. Benson: I see.

The Witness: I might say, however, that I reported the general features of that arrangement to the court in my first receiver's report.

Mr. Stafford: Plaintiff's Exhibit 3.

The Witness: Upon examination of that report I find that that last statement of mine is not quite correct, because my description of that arrangement is not particularly comprehensive.

Mr. Benson: Q. What page of Plaintiff's Exhibit 3 were you referring to when you made your last answer?
A. Page 30, paragraph 10.
Q. Do you recall any other place where you can get us the information as to the services that were to be furnished under this contract which you say, as receiver, you continued?
A. I seem to recall having seen a letter from Middle West Utilities Company to United Public Service Company, which was dated prior to my appointment as receiver of United Public Service Company. I am still hopeful that I can find that letter in my files. And it occurs to me that the Middle West Corporation, from the files of Middle West Utilities Company, might be able to produce a copy.
I also seem to recall exchanging a memorandum or letter with the receivers of Middle West Utilities Company under which I, as receiver of United Public Service Company, undertook to continue that arrangement for a limited

period. So far I have been unable to find either of such letters, but I still hope to find them.

A portion of the cross-examination of White is omitted because it appears at page 1355, line 37, through line 2 on page 1357.

Mr. Benson: Q. Where was your office when you were appointed receiver of United Public Utilities Company?

Mr. Royhl: Objected to as immaterial.

Mr. Benson: Q. I mean your office that you were occupying the day you were appointed.

The Witness: It was at 20 North Wacker Drive, Chicago, Illinois—

Mr. Benson: No.

A. In the suite—

Mr. Royhl: Go ahead and finish your answer.

The Witness: —occupied by the receivers of Middle West Utilities Company, who—

Mr. Benson: I think you misunderstood me. Where was your office half an hour before you were appointed receiver?

The Witness: Oh,—

Mr. Royhl: Same objection.

The Witness: My office was at 134 South La Salle Street.

Mr. Benson: Q. What building is that?

A. That is the building located at the northwest corner of LaSalle and Adams Streets, and was known at that time as the National Republic Bank Building.

Q. Immediately upon being appointed receiver you gave up your connection with the company of which you were then vice-president? A. Yes.

Q. And went to the office of the receivership? A. Yes.

Q. Now, from the time you became receiver until the present time, have you maintained any offices other than the receiver's office or the office of United Public Utilities Corporation?

Mr. Royhl: Objected to as immaterial and irrelevant.

A. No.

Mr. Benson: Q. Have you been in any business other than the receivership business or the presidency of United Public Utilities Corporation since you were appointed receiver of United Public Utilities Company?

Mr. Royhl: Same objection.

A. Excluding directorships in industrial corporations, I have been in no other business.

Mr. Benson: Q. Have you been engaged in any public utility business since your appointment as receiver of United Public Utilities Company other than the business of the receivership of the three companies you have previously described and the operation of United Public Utilities Corporation and its subsidiaries? A. No.

Q. During that period did you represent any group of security holders in any other receivership of a public utility business?

Mr. Royhl: Objected to as immaterial and irrelevant.

The Witness: No.

Mr. Benson: Q. Were you a trustee of any other public utility business? A. No.

Mr. Royhl: Same objection.

Mr. Benson: Other than United Public Utilities Company, United Public Service Company, and Southern United Gas Company and their subsidiaries? A. No.

Q. During the time subsequent to your appointment as receiver of United Public Utilities Company, your experience in the public utility business had been such as you acquired as president or as receiver of United Public Service Company, United Gas Company, or other subsidiaries?

A. That is correct, as far as experience is concerned. I have done a considerable amount of reading.

Q. Well, what I am trying to get at is your business since you were appointed receiver of those three companies has been exclusively the public utility business? A. Yes.

Q. And in those several years you have picked up some information about the utility business? A. Yes.

Q. The water business? A. Yes.

Q. The ice business? A. Yes.

Q. Manufactured gas? A. Yes.

Q. Natural gas? A. Yes.

Q. And electric business? A. Yes.

Q. You made some statement in your direct examination about where Mr. Kruesi resided? A. Yes.

Q. How long have you resided at your present residence?

A. A little over twenty-six years.

Q. Where was Mr. Kruesi residing at the time you said he was living rather near, but you didn't know him?

A. In the block starting about two blocks away from my home. I don't know the house, but it was within three blocks of my house.

Q. You reside in the same residence today that you resided in about twenty-six years ago? A. Yes.

Q. You have lived there continuously? A. Yes.

Q. Where is Mr. Kruesi's present residence?

A. In Texarkana, Texas.

Q. When did he go there? A. Within the last year.

Q. Well, just prior to his moving there where did he live? A. He lived about a block from me.

Q. You mean in the twenty-six years he changed his residence? A. Yes, sir.

Q. And you did not? A. I did not.

Q. And when he changed his residence he moved closer to your residence, is that it? A. Yes.

Q. He lives right behind you now; if you walk through your back door and across the block, across the street, you would be at the house where Mr. Kruesi lives, is that it?

A. That is almost right. If you walked out my front door and through the block you would come to his back door.

Q. I see. When did you first become acquainted with Mr. Kruesi?

A. To the best of my knowledge at the time of my appointment as receiver.

Q. I don't recall whether you said what his employment was then or not. What was it?

A. He was a vice president of Middle West Utilities Company.

Q. You stated on your direct examination that the sale of power by North Dakota Power & Light Company to Northwestern Public Service Company resulted in the operation of the Beulah generating station at a high load factor. That was the essence of what you said, wasn't it?

A. Yes, sir.

Q. That is what you meant to say? A. Yes.

Q. Who told you that?

A. All of the people in Middle West Service Company who had knowledge of power plant results; all of the people in the joint management of North Dakota Power & Light Company, Northern Power & Light Company, Northwestern Public Service Company, and the load dispatchers at Aberdeen, and the plant manager at Beulah, among others.

Q. Who was the plant manager at Beulah at that time?

A. I don't recall his name at the moment, but he was there for many years both before and after my appointment as receiver.

Q. Do you know when this statement was made by the plant manager at Beulah?

A. In the course of my visits to that plant.

Q. You can't tell what year? A. No.

Q. I see. Did anybody from the office of the receiver or did the receiver of Middle West Utilities Company make any statement to you as to what the load factor of the Beulah generating station was with the load of power sent Northwestern Public Service Company, and what it would have been without power sent to Northwestern Public Service Company?

A. I don't recall right now that I ever received a statement as to what the load factor would have been without the load of Northwestern Public Service Company.

Q. Nobody ever told you that?

A. I don't recall that they did.

Mr. Benson: I see. All right.

Q. Refer to Defendant's Exhibit 6 for identification. I call your attention to the statements beginning on page 49 and running through to the bottom of page 52, those statements beginning under the bold face type on page 49, "Northwestern properties."

Do you have Defendant's Exhibit 6 for identification in your possession now? A. Yes.

Q. Can you tell us whether all of the statements of fact contained in the portion of Defendant's Exhibit 6 to which I have called your attention were furnished to you by others

(Witness looks at documents).

A. In the main, yes. I don't happen to recall the date of my first trip over those Dakota properties, and I am not sure what that—some of the general observations in the report were based on my inspection of the property.

Q. Now, referring to page 50, there is a statement in there:

> "In previous years, and during most of 1932, these United Public Utilities Company subsidiaries were not charged with their full pro rata share of management and divisional office expenses."

Was that statement a statement that someone else made to you and which you put into this report? A. Yes.

Q. But the statement which begins,

> "but, with the consent of your Receiver, these expenses are now being allocated in proportion to the gross earnings of each of the properties."

That was your own statement? Or was it? I didn't mean to put the words in your mouth.

A. That was my statement, yes.

Q. The statement on the same page, reading:

> "The revision of this arrangement will increase combined operating expenses of the three companies by approximately $1,875 a month in 1933."

Was that your own statement or a computation that came to you from the field or from the office in Huron?

A. That is a computation that came to me from the Huron office.

Q. The statement on page 50, under the caption "North Dakota Power & Light Company," with reference to the number of miles of transmission lines was information that came to you from the Huron office? A. Yes.

Q. And the statement as to the number of customers was furnished you by the Huron office? A. Yes.

Q. The statement on page 50:

> "Inter-company arrangements under which this plant supplies energy to Northern Power & Light Company on the south, and that Company, in turn, re-sells part of such energy to Northwestern Public Service Company, permit of an extremely high load factor, at the Beulah plant, thus reducing the unit cost of production and creating a benefit not only for North Dakota Power & Light Company, but, also for the other two companies which take part of the power at prices favorable to them."

Was furnished to you by someone?

A. No, I think those were my conclusions, represented my views.

Q. What facts did you have at the time you made the statement, "permit of an extremely high load factor at the Beulah plant"?

A. As I recall, I had a statement that that load factor was 85 per cent furnished to me from the Huron office.

Q. And that you characterized as stated in what I quoted? A. Yes.

Q. Did you make any audit of Northern Power & Light Company prior to filing your report, Defendant's Exhibit 6 for identification? You—

A. My auditor is Arthur Andersen & Company—

Q. No, did you? A. I personally made no audit.

Q. And had an audit made by whom?

A. Arthur Andersen & Company.

Q. Have they been your auditors continuously since your appointment as receiver, at the present time? A. Yes.

Q. Do you happen to know whether, during all that time, they were also auditors for Middle West Company?

Mr. Royhl: Objected to as immaterial and irrelevant.

A. I think they were during all of that time.

Mr. Benson: Q. Auditors for Middle West Company or Middle West Corporation?

A. Yes. I am quite sure that is correct. I shouldn't misuse the word "quite". I mean to say I am reasonably sure that that is correct.

Q. Had they been auditors for United Public Utilities Company prior to your appointment as receiver?

A. No. Nor according to that same impression of mine had they been auditors for Middle West Utilities Company or its subsidiaries.

Q. Prior to the Middle West receivership?

A. I believe Arthur Andersen & Company had not been in the picture. My only doubt is as to when they started their audit of Middle West Utilities Company and subsidiaries.

A portion of the cross-examination of White is omitted because it appears at page 1357, line 3, through page 1357, line 6th from the bottom.

Mr. Benson: Now, if I were to ask you what conversation you had with Mr. Clark, you would repeat what you said in the foregoing answer?

The Witness: That would cover--

Mr. Royhl: Same objection.

The Witness: —just about the entire conversation.

Mr. Benson: Q. That is all you remember now?

A. That is all I remember now.

Q. When you were in the investment banking business did you sell large amounts of Middle West Utilities Company securities?

Mr. Royhl: Objected to as immaterial and irrelevant.

A. No.

Mr. Benson: Q. Did you sell any of them?

Mr. Royhl: Same objection.

A. I don't recall that I did, of the top holding company, Middle West Utilities Company.

Q. Now, are you speaking as an individual or speaking of sales made by the company with which you were associated?

A. I am speaking of sales made by the company with which I was associated, and my principal reservation is with respect to the Central Republic Company. I don't recall whether that company did or didn't, in the year that it existed, prior to the termination of my association with it, handle any of the Middle West Utilities Company notes, of which I seem to recall a large amount having been issued in that period.

Q. What about the years prior to the year you have just mentioned?

Mr. Royhl: Same objection.

A. The Central Republic Company was not in existence prior to about 1931. Prior to 1931 my connection was with the National Republic Company, of which I was president. And I don't recall that we handled, except for possibly relatively small amounts, securities of Middle West Utilities Company. I do recall that we handled some of the bonds of subsidiary companies of Middle West, not including, however, the bonds of Northwestern Public Service Company.

Q. Did you produce the records showing the amount of securities of United Public Utilities Corporation which were owned by United Public Service Corporation when the two companies came out of receivership?

A. I brought a copy of the plan of reorganization of United Public Utilities Company and United Public Service Company, which was a joint plan of reorganization, and that plan shows, in paragraph 3, sub-section C,—

Mr. Benson: Well, let's see that plan, will you, please?

(Document handed counsel.)

Mr. Benson: Well, my recollection is, from reading the subpoena that was served on ~~you, you were~~ asked to bring the records showing securities of United Public Utilities

Corporation owned by United Public Service Corporation. Am I wrong in my recollection?

The Witness: I don't recall that that was in the subpoena, but, if it was, it would have been very difficult for me to produce that, because presumably that fact would be shown only on the records of United Public Service Corporation.

Mr. Benson: Q. You mean you don't keep any records showing the owners of your United Public Utilities Corporation stock?

A. A record of the owners of United Public Utilities Corporation stock is kept by Provident Trust Company of Philadelphia, transfer agents, from whom we have access once a year to check the holdings of record, of United Public Service Corporation, in the stock of our company.

Q. As I recall, on all of those checks the amount of such holdings—

Mr. Royhl: Just a minute. We object to this as not the best evidence, not proper cross examination, incompetent, irrelevant, immaterial.

Mr. Benson: Q. Is the Provident Trust Company both registrar and transfer agent? A. Yes.

Mr. Benson: All right. Of all of the stocks?

The Witness: Stocks of United Public Utilities Corporation.

Mr. Benson: Q. In your examination in chief you made a statement that, in one of the years, United Public Service Corporation declined to suggest the name of a director to be selected? A. That is correct.

Q. You said that at that time The Middle West Company, The Middle West Corporation was negotiating a sale of its holdings in United Public Service Corporation?

A. That is correct, according to their statement to me.

Mr. Hastings: Wait a minute. In which corporation?

Mr. Benson: United Public Service Corporation. That is correct, isn't it?

The Witness: That is correct.

Mr. Benson: Q. It is United Public Service Corporation, not United Public Utilities Corporation?

A. That is correct.

Q. You said in your testimony that the negotiations which the Middle West Corporation had for the sale of United Public Service Corporation common stock had fallen through. Did you mean to use that terminology or did you mean to say that the Securities and Exchange Commission had refused to permit a sale to be made?

Mr. Royhl: That is objected to as immaterial and irrelevant.

The Witness: A. As I understand it, a contract of sale had been entered into. The buyer wanted to buy, the seller wanted to sell, but the sale was subject to confirmation from the Securities and Exchange Commission and the Securities and Exchange Commission declined to confirm or approve the sale, and therefore the negotiation terminated and the contract of sale terminated.

Mr. Benson: Q. Was that for the reason that the sale was going to be made to bankers?

Mr. Royhl: We object to that as calling for the opinion and conclusion of the witness, incompetent, irrelevant, immaterial, not proper cross examination.

Mr. Benson: Q. Or don't you know?

A. As I recall the Securities and Exchange Commission —I have forgotten the basis on which the Commission turned it down.

Mr. Benson: I see. All right.

Q. Do you remember who nominated Mr. Briggs to be a director of United Public Utilities Corporation?

A. When he was first nominated he was selected by the four directors on the board that had previously been elected by Class A Common stockholders.

Mr. Robinson: By board, Mr. White, do you mean the board of U. P. U. Corporation?

The Witness: The four members of the board of directors of the United Public Utilities Corporation.

Mr. Benson: Q. Who were they? Barroll, White, Nichols, and Lakin? A. Yes, those are the four directors.

Mr. Stafford: At page 91 he says the annual meeting of April 28, 1943.

Mr. Benson: Q. When did he first go on the board?

A. April 23, 1943, he was elected.

Mr. Benson: Q. So the four men who nominated him were Barroll, Lakin, Nichols, and White? That is correct, isn't it?

A. He was selected by those four men as a result of a request of the president of The Middle West Corporation that a nominee be selected by the board to stand for election at the annual meeting of the stockholders by the vote of the holders of Class B common stock, of which United Public Service Corporation held more than 50 per cent.

Q. At the time of his election was Mr. Briggs an investment banker? A. No, he was retired.

Q. He had been? A. He had been.

Q. For many years prior to that?

A. Yes, for many years he was a top executive of the old firm of E. H. Rollins & Son, and I believe that when the control of E. H. Rollins & Son was changed he withdrew, and I recall that he was receiver of a large public utility company or a holding with headquarters in New York.

Q. Do you know whether Mr. Briggs had at any time been a director of any public utilities corporation which was an affiliate of The Middle West Utilities Company?

Mr. Royhl: Objected to as being immaterial and irrelevant, not proper cross-examination, not the best evidence.

A. I have reason to believe that he was not, but I cannot say for sure.

Mr. Benson: Q. You don't know whether he ever had any connection with Illinois Traction Company?

Mr. Royhl: Same objection.

A. Not that I know of.

Mr. Benson: Q. Do you know whether he had ever had any official connection with Illinois Power & Light Corporation?

Mr. Royhl: Same objection.

A. I don't believe he ever had an official connection with that company and I do seem to recall that E. H. Rollins & Son had to do with the underwriting of some securities of that company.

Mr. Benson: Q. Do you happen to know whether or not Mr. Briggs was at any time a director of Missouri Power & Light Company? A. No.

Q. You do not know? A. I don't know.

Q. You really don't know what position he held, if any, in the public utilities field?

A. I don't. I merely know that I have never heard him mention any of those companies which you have named, in our conversations or board discussions.

A portion of White's deposition is omitted because it appears, supra, at page 1357, beginning line 5th from the bottom through line 11 on page 1358.

Q. When United Public Utilities Corporation took over the assets of United Public Utilities Co., there were several subsidiaries of United Public Utilities Co.? A. Yes.

Q. And they then became subsidiaries of United Public Utilities Corporation? A. Yes.

Q. Do I recall that the number of subsidiaries of United Public Utilities Corporation, when it started as an operating holding company, was 21? A. That is correct.

Q. You were an officer and director of each of those corporations?

A. No, I was an officer of only United Public Utilities Corporation. I was a director in most of the subsidiaries.

Q. Now, in connection with your statement as to the scope of your business since you became the president of United Public Utilities Corporation, you have held directorships and offices in other corporations, haven't you?

Mr. Royhl: Objected to as immaterial and irrelevant, not proper cross examination. A. Yes, a few.

Mr. Benson: Q. Were any of those other corporations, corporations in the utilities business? A. No.

Mr. Royhl: Same objection.

Mr. Benson: Q. They have all been in other lines of business? A. Yes.

A portion of White's deposition is omitted because it appears, supra, at page 474, from line 9 through line 4 on page 493.

Q. I notice in Defendant's Exhibit 51 for identification there is a statement in the first line referring to a man by the name of George Davis. Can you tell me who George Davis was or is?

A. Yes. George Davis was an engineer and a member of the staff of Middle West Service Company, who specialized on rate matters but also used to have to do with matters affecting the Federal Power Commission.

Q. All right.

A. (Continuing) He is no longer in the employ of Middle West Service Company, having left there I believe about three years ago. He worked under Mr. Vennard.

Q. I am not sure that the record is clear as to what you did in the way of getting or making service contracts after Middle West Utilities Company came out of receivership.

Will you explain, first, when Middle West Utilities Company came out of receivership, the company that thereafter was called The Middle West Corporation or Middle West Corporation?

A. The Middle West Corporation.

Q. The Middle West Corporation. Now, how soon after that receivership was terminated, that is, the receivership of Middle West Utilities Company, did you make an agreement for service for U. P. U. Corporation and subsidiaries with The Middle West Corporation or some affiliated company?

A. The Middle West Corporation started business on November 27, 1935, as the successor in reorganization to Middle West Utilities Company.

The Middle West Service Company was incorporated on January 28th, 1936, and started business on January 30, 1936. Those dates were furnished to me by one of the officers of Middle West Service Company, the president in fact, upon my inquiry.

At approximately the same time that Middle West Service Company started business, or very shortly thereafter, contracts were signed between the Dakota subsidiaries of United Public Utilities Corporation and Middle West Service Company, which, as I recall, were of the same general character as the contracts that had previously been in effect with Daniel C. Green, trustee of Middle West Utilities Company. There may have been, although I do not recall it, a period in which those contracts were covered by an assignment from the trustee to Middle West Service Company, but I don't recall that there was.

Q. Now, will you tell us what other service agreements were made with Middle West Service Company by United Public Utilities Corporation and subsidiaries thereof, other than the Dakota subsidiaries you have just talked about?

A. When Middle West Service Company started business in January, 1936, United Public Utilities Corporation had been in business about thirteen months, during which period it had had an arrangement with Daniel C. Green, trustee of Middle West Utilities Company, under which the accounting work of the holding company, United Public Utilities Corporation and the treasury work and the statistical work of that corporation were being done by the staff [od] Daniel C. Green, trustee.

Mr. Benson: Just a moment.

Q. You mean that is preliminary to the answer you are going to give to my question? A. Yes.

Q. All right, go ahead.

A. The fee that was paid by United Public Utilities Corporation for those services was, as I recall it, $5,000 a year. That arrangement was continued with Middle West Service Company until December 31, 1936, at which time United Public Utilities Corporation employed Mr. R. McClanahan to take over all of the bookkeeping and

accounting work, and after that date no further services were received by United Public Utilities Corporation from Middle West Service Company except that Middle West Service Company, without charge, sent to United Public Utilities Corporation, copies of general statistical reports, which were also being sent to all companies serviced by them, including the Dakota subsidiaries of United Public Utilities Corporation.

Q. Now, one portion of my question you have not answered: Did Middle West Service Company have any agreements with any subsidiaries of U. P. U. Corporation other than the Dakota subsidiaries? A. Yes.

Q. Were those what are commonly called service agreements?

A. Those were commonly called service agreements, and included, as I recall it, all of the subsidiaries of United Public Utilities Corporation except three electric utility subsidiaries,—three gas subsidiaries in Indiana and one electric subsidiary in Indiana and Knife River Coal Mining Company.

Q. Mr. White, you stated that Mr. McClanahan took over the bookkeeping and accounting of United Public Utilities Corporation? A. Yes.

Q. About the end of 1936 or '37, beginning of 1937?

A. January 1, 1937.

Q. What is Mr. McClanahan's full name?

A. Rodman is his first name.

Q. Rodman.

A. Yes. If he has a second, middle initial, he doesn't ordinarily use it.

Q. What was Mr. McClanahan doing immediately before he came to United Public Utilities Corporation as the accountant?

A. He had been in the employ of Middle West Service Company, in charge of consolidations.

Q. Had he worked for Middle West Utilities Company prior to the receivership?

Mr. Stafford: Prior to April 15th, 1932.

Mr. Benson: Yes.

A. Yes.

Mr. Benson: Q. You mentioned Mr. Peale the other day. I took it from the substance of your testimony that Mr. Peale was now doing the work that McClanahan did.

A. No.

Q. He is not? A. No.

Q. All right. Now, is McClanahan still with you? A. No.

Q. When did he leave?

A. During the first quarter of 1945.

Q. Where did he go?

A. He left us to become comptroller or assistant comptroller of Middle West Service Company.

Q. Is he comptroller now? A. He is now comptroller.

Q. Of The Middle West Corporation?

A. Of the Middle West Service Company.

Q. Middle West Service Company, not The Middle West Corporation?

A. No. He has no relation to The Middle West Corporation.

Mr. Benson: The plaintiff offers in evidence Defendant's Exhibit 7, and asks that the same be attached to and returned with the deposition of this witness.

(A copy of Defendant's Exhibit 7 for identification offered in evidence by the Plaintiff, is attached).

Mr. Benson: Q. In Defendant's Exhibit 7 for identification, Mr. White, you expressed to Mr. Kruesi on the 10th of June, 1935, your regret that you could not attend a meeting in Rapid City. What meeting was that?

A. That was a meeting of all of the divisional managers of Northern Power & Light Company, and North Dakota Power & Light Company, and Northwestern Public Service Company, and I believe that, although only utility operating matters were discussed at those meetings, it was customary to invite the mine manager and the sales manager of Knife River Coal Mining Company, and those two gentlemen may have attended that meeting.

Q. When you said Rapid City you meant Rapid City, South Dakota? A. Yes.

Q. In your testimony you mentioned a meeting at Detroit Lakes, Minnesota, in the fall of 1941. Was that a meeting of the divisional managers of Dakota Public Service Company and Northwestern Public Service Company?

A. Yes. It was of the same type meeting that was held, as was held at Rapid City.

Q. In other words, it was customary at least once a year for the divisional managers of your Dakota subsidiaries and Northwestern Public Service Company to have a meeting somewhere? A. That is correct.

Q. That was attended also by the joint operating staff that was located at Huron, South Dakota? A. Yes.

Q. It was customary at those meetings to have people out from Middle West Service Company? A. Yes.

Q. Sometimes did you have men from The Middle West Corporation out there also?

A. I recall that at one meeting Mr. Oliver E. McCormick attended. Mr. McCormick had to do with treasury matters in Chicago, and I don't recall whether he was an officer of The Middle West Corporation or of Middle West Service Company.

Q. I see. A. He has died since.

Q. How long were these meetings, three days ordinarily?

A. Three days ordinarily, yes.

Q. Mr. White, what was your compensation the first year you were president of United Public Utilities Corporation?

Mr. Royhl: That is objected to as immaterial.

A. $20,000.

Mr. Benson: Q. What is it today? A. $20,000.

Q. What was your annual rate of compensation during the receivership?

Mr. Royhl: The same objection.

A. I have forgotten the details of that arrangement. I had a relatively nominal drawing account, and at the end of the receivership and trusteeship I think that it worked out at slightly over $40,000 a year.

Mr. Benson: Q. Since you became president of United Public Utilities Corporation have you also received, in addition to your salary, a benefit in the way of some sort of a pension or retirement fund?

Mr. Stafford: The same objection, including irrelevancy.

A. Yes. I participated, along with all other employees of the holding company, and all employees of the operating subsidiaries except Knife River Coal Mining Company, in a pension plan.

Mr. Benson: Q. I gather from what you said that the Dakota subsidiaries employees were also in the pension plan at one time? A. Yes.

Q. That same plant that you say you are a beneficiary of? A. Yes.

Mr. Stafford: I renew the objection to the whole line.

Mr. Benson: Q. That plan took in the employees of the other subsidiaries of United Public Utilities Corporation?

Mr. Royhl: The same objection.

A. Yes.

Mr. Benson: Q. Did it take in employees of any companies other than U. P. U. Corporation, the Dakota subsidiaries, and the other subsidiaries of U. P. U. Corporation?

Mr. Royhl: The same objection.

The Witness: Will you read that question, please?

(Question read).

A. The particular plant to which I refer became effective as of October 1, 1940, and included only the employees of Dakota Public Service Company. By a rider to that policy the employees of United Public Utilities Corporation were included under the plan of Dakota Public Service Company.

I believe that at the same time an identical arrangement was made with John Hancock Mutual Life Insurance Company for the employees of Northwestern Public Service Company, but as I recall, the policy or agreement with the insurance company was a separate agreement. I saw that agreement at one time.

I recall that the booklet issued to employees of Dakota Public Service Company bore an imprint to indicate that that booklet was issued only to employees of Dakota Public Service Company.

Mr. Benson: Q. You have not answered about the other U. P. U. subsidiaries.

Mr. Royhl: The same objection.

A. The Dakota pension plan to which I refer was the initial pension plan introduced by subsidiaries of United Public Utilities Corporation.

Subseqnently a similar plan was introduced by the Arkansas Gas subsidiaries of United Public Utilities Corporation, and also subsequently a similar plan [twas] introduced by the eleven Ohio-Indiana subsidiaries.

No such plan was reasonably [fessible] in the case of the ice and cold storage subsidiaries.

Mr. Benson: Q. Did Middle West Service Company handle the matter of securing a pension plan for the Dakota Public Service Company employees?

Mr. Royhl: The same objection.

A. No.

Mr. Benson: Q. Who handled that? A. I did.

Q. You did that yourself? A. Yes.

Q. Middle West Service Company had nothing to do with any of these pension plans that you mentioned?

A. A general exploration of the subject of pension plans or retirement annuities had been made several years previously by Mr. Kruesi.

Q. And what was his position then?

A. He was president of Middle West Service Company.

Q. I see.

A. And I recall that he sent copies of this study to the presidents of all the operating subsidiaries that were serviced by Middle West Service Company.

Q. You mean he sent a general outline of the pension plan? A. That was an academic study.

Q. Yes.

A. And it was prepared by Metropolitan Life Insurance Company. I don't recall that Middle West Service Company, as such, played a part in the adoption of the pension plans.

Q. Was the pension plan of Northwestern Public Service Company a plan that was worked out with the John Hancock Insurance Company? A. I don't know.

Q. You do not know?

A. I do not know what company they insured in.

Q. I see. I gathered that.

A. Many of the Middle West companies had pension plans. I think they vary in character, and I think they are with different insurance companies.

Q. I see.

A. As I recall, the first plan that was arranged with the John Hancock Company was the Dakota Public Service plan, and I had quite a lot to do with the selection that was made.

Q. You are now out of that Plan? A. Yes.

Q. And you are carried under another plan?

A. That rider, if it was a rider that represented the coverage of the United Public Utilities Corporation employees, was transferred from the Dakota Public Service Company contract with John Hancock to the contract between the eleven Ohio subsidiaries and John Hancock.

Q. Does Middle West Service Company or some Middle West organization handle certain types of insurance for your Dakota Public Service Companies?

Mr. Royhl: Objected to as immaterial.

Mr. Stafford: And irrelevant.

Mr. Royhl: Irrelevant.

Mr. Benson: Q. Is that correct?

A. There is an organization called the Bureau of Safety, which is affiliated with Middle West Service Company, which supervises the safety work and makes safety inspections and holds safety meetings of employees, for all operating companies which hold contracts, service contracts, with Middle West Service Company.

Q. Does the Bureau of Safety get compensation for its services from the utilities where it makes the inspections?

Mr. Stafford: The same objection.

A. I don't understand, that they are paid for that safety work. They do, however, handle insurance, both by placing certain policies in the open market, and then they have a small insurance fund which, as I understand, is an insurance company in itself, that carries certain portions of insurance risks.

Mr. Stafford: We renew our objections to all this line.

The Witness: (Continuing) I believe I am correct with respect to my statement that they make no charges for their safety work, unless perhaps, as is customary, they would charge their out of pocket expenses, but I am not too sure.

Mr. Benson: Q. Did you know that your Dakota subsidiaries were having certain types of insurance handled through the Bureau of Safety?

Mr. Stafford: The same objections.

A. Yes.

Mr. Benson: Q. The Bureau of Safety is a separate corporation, is it? A. I think so. I am not sure.

Q. Do you understand that that was owned by Middle West Corporation?

Mr. Stafford: The same objection.

A. That is my impression.

Mr. Benson: Q. And Middle West Corporation owned Middle West Service Company?

A. Middle West Corporation owns Middle West Service Company, and I believe both of those companies are run as non-profit institutions.

Q. Now, you said you thought the Bureau of Safety had an insurance fund which is an insurance company in itself. Do you know the name under which that fund is operated?

Mr. Royhl: Objected to as immaterial and irrelevant.

Mr. Stafford: Improper cross.

Mr. Royhl: Improper cross examination.

A. It has been operated under the name of three individuals, trustees, and those names have varied from time to time, and I don't recall exactly the names that are being used today, but it is my understanding that it has always been exactly the same fund, and that the changes in name—

Mr. Benson: Q. William C. Freeman was one of those trustees, wasn't he?

Mr. Royhl: The same objection.

A. He may be now.

Mr. Benson: Q. Was Mr. Green, who you mentioned in your testimony in chief?

Mr. Royhl: The same objection.

A. I don't recall. He may have been.

Mr. Benson: Q. To whom did you leave the question of determining the amount of insurance that should be carried by the Dakota subsidiaries of U. P. U. Corporation?

Mr. Royhl: The same objection.

The Witness: Will you read that question, please?

(Question read).

A. To the officers of those companies.

Mr. Benson: Q. To whom did you leave the determination as to what types of insurance should be carried by the Dakota subsidiaries?

Mr. Stafford: The same objections. May we have this objection to the whole line of inquiry?

Mr. Benson: Yes.

A. To the same officers, but I might add that I discussed both with the Bureau of Safety and with those officers the adoption of coverage, the necessity therefor, the types of coverage which were not being carried and which in their opinion should be carried, and the adequacy of the amounts of the several coverages.

Mr. Benson: I see.

A. (Continuing) I also had in January of each year a detailed report from the Bureau of Safety, as to the amounts and types of insurance coverage on all operating properties in the U. P. U. system, and the amounts and insurer under those coverages.

Q. During your ownership of the Dakota subsidiaries of U. P. U. Corporation was group life insurance taken out on the employees and the officers of those corporations? A. Yes.

Q. Through whom was that group life insurance arrangement made? A. Marsh & McLennan, I believe.

Q. And did you handle that or did Middle West Service Company or the Bureau of Safety or the insurance trustees that you mentioned, handle it?

A. It was handled by the Bureau of Safety, and all companies, both holding companies and operating companies, provided that group life insurance company under a single blanket contract.

Q. Did the holding company and the operating companies make contributions to the premiums on those policies? A. Yes.

Q. Were any companies included in that group life insurance arrangement other than U. P. U. and its subsidiaries?

The Witness: Will you read that?

(Question read).

A. Yes, as I attempted to state in a previous answer, it is my understanding that all of the employees of a large number of companies were included under a single blanket insurance policy.

Mr. Benson: Q. Well, you are not confusing group life with the pension plan that you talk about, are you?

A. No. That statement that I made would not be true of the pension plan.

Q. All right. Now, you say that there was a single blanket agreement of some kind for group life insurance?

A. That is my understanding, yes.

Q. Now, what were the companies whose employees were insured under that arrangement you have just described?

A. As I understand it, there was a separate subpolicy issued to each corporation, and under that sub-policy individual certificates were issued to each employee of that corporation. I don't know exactly how many corporations had those sub-policies issued to them, but it was my understanding that all or practically all of the subsidiaries of Middle West Utilities Company, or if such subsidiaries were holding companies, the subsidiaries of such subholding company.

Q. When you said Middle West Utilities Company you meant The Middle West Corporation?

A. I meant The Middle West Corporation.

Mr. Stafford: I object to the understanding of the witness, both on the ground that it is a conclusion and hearsay.

Mr. Benson: Now, Mr. Stafford, the request that your objection stand to all this line, you mean to the line of inquiry about the insurance?

Mr. Stafford: That's right; beginning with the Bureau of Safety down to the present point.

Mr. Benson: So now we start out with a new subject, so that that understanding has terminated.

Mr. Stafford: Yes. Right.

Mr. Benson: Q. Did Northwestern Public Service Company install any additional generating capacity from January 1, 1936, to January 1st, 1945?

Mr. Royhl: We object to that. No proper foundation laid, hearsay, and calling for the opinion and conclusion of the witness.

Mr. Stafford: And improper cross examination.

A. I believe they did.

Mr. Benson: Q. Do you recall where that was installed?

Mr. Royhl: The same objection.

A. I recall an installation at Armour, South Dakota, and I think there may have been an installation at Webster, South Dakota, but I don't specifically recall the date of either of those.

Mr. Benson: Q. Do you recall any installations of generating capacity by Northwestern Public Service Company after January 1st, 1945?

A. Well, I believe it was after that date that the 7500 kilowatt addition at Aberdeen was completed.

A portion of White's deposition is omitted because it appears, supra, at page 1358, line 13, through line 27 on page 1358.

Mr. Benson: Q. In your examination in chief, in referring to the minutes of the board of directors of the business that was transacted by the board of directors on June 24, 1937, you referred to a recent survey of available generating capacity of the Dakota properties.

What was the survey of generating capacity to which you were referring?

Mr. Benson: Q. You have not been able to find that?

A. No.

Q. You understood that the meeting that I was referring to as having been held June 24, 1937, was a meeting of the board of directors of United Public Utilities Corporation? A. Yes.

Q. Will you endeavor to locate the document or whatever material it was, that was described in the minutes of the board of directors of June 24, 1937, of United Public Utilities Corporation, which document or material was described as "a recent survey of the available generating capacity of the Dakota properties"? A. I will.

(Thereupon discussion was had off the record.)

A portion of White's deposition is omitted because it appears, supra, at page 1358, line 27, through line 7 on page 1360.

Q. Do you have a copy of that contract now? A. No.

Q. Do you know what has become of your copy of the Chicago power pool contract, to which you have just referred?

A. No, but I think that the copy that I saw belonged to Mr. Buell, that I returned it to him at some subsequent time.

Q. Do you have a recollection now as to the distance

between the stations, the generating stations covered by that power pool agreement? A. No.

Q. Do you recall whether they were 50 miles apart, or 60 miles apart, or a hundred miles apart?

A. No, I don't.

Q. Well, do you recall, not using those exact distances, the circumference of the circle, if a circle were drawn around all the power plants within that Chicago pool?

A. I think that the plant at Dixon, Illinois, which is about 100 miles from Chicago, may have been about the most distant plant to be covered, if it actually was covered in that pool agreement.

Q. Now, the hundred miles that you referred to is 100 miles from Dixon to what point? A. Chicago.

Q. To Chicago? A. Yes.

Q. It is your present impression that the plant in the pool which was most distant from Chicago would be the Dixon, Illinois, plant?

A. If that plant was actually included. I don't recall whether it was or not.

Q. How large a plant was the Dixon, Illinois, plant?

Mr. Royhl: Objected to as not the best evidence, calling for the opinion and conclusion of the witness, and no proper foundation laid.

Mr. Benson: I can't bring the generators into this hearing room.

Mr. Royhl: I realize that. I can't help it.

A. I don't know, but very large in comparison with generating units in the systems with which I had to do.

Mr. Benson: Q. Do you have any recollection as to the approximate k. w. capacity of the Dixon plant? A. No.

Q. Do you recall whether it was larger than 25,000 k. w.?

Mr. Royhl: The same objection.

A. Not specifically, but 25,000 k. w. would hardly be large enough to qualify for inclusion under a power pooling arrangement and to serve Chicago.

Q. What is your best recollection of the smallest generating plant in k. w. capacity that was included in the Chicago power pool?

Mr. Royhl: The same objection.

A. I really have no recollection of those capacities because I used that particular contract only to form an opinion as to the desirability of that form of agreement for our purposes.

Mr. Benson: Q. Do you recall the names of the companies that were in the Chicago power pool?

Mr. Stafford: The same objection.

Mr. Royhl: The same objection, not the best evidence.

A. Yes, I think the Chicago District Generating Company, Commonwealth Edison Company, and Public Service Company of Northern Illinois were included in it; and it seems to me that one of the companies in northern Indiana was also included. I am not too sure of that. In fact I can't be sure of those companies I have mentioned.

Mr. Benson: Q. What company owned the Dixon, Illinois generating station that you had in mind when you mentioned Dixon, Illinois?

Mr. Royhl: The same objection, and for the further reason it is not proper cross examination.

A. I think the Public Service Company of Northern Illinois owned it.

Mr. Benson: Q. Do you know the type of construction of the transmission line from the Dixon, Illinois, generating station to Chicago?

Mr. Royhl: The same objection as stated before, and for the further reason it conclusively appears that this witness has no independent recollection of the detail or facts concerning generating companies or those used incident to and a part of such Chicago pooling capacity contracts.

Mr. Benson: Will you read the question?

(Question read.)

A. No, I don't know.

A portion of White's deposition is omitted because it appears, supra, at page 1360, lines 8 to 16, inclusive.

Mr. Benson: Q. Did you make an examination of the generating station and the transmission lines covered by the contract for the Chicago Power pool? A. No.

Q. Did you ever make an examination of the transmission lines that were covered by the Chicago power pool agreement? A. No.

Q. Do you know what kind of lines they were, as to the type of construction?

Mr. Royhl: The same objection.

Mr. Benson: Q. Don't you know that they were steel tower lines?

A. I have seen some steel tower lines, which I have always assumed to be interconnecting lines between plants that are probably members or parties to the Chicago pool. I have seen steel tower lines leading into Dixon, Illinois.

Q. From Chicago.

A. I don't know where they came from.

Q. I see.

A. I have seen steel tower lines both south and north of Chicago, between Chicago and Waukegan. I know that the Public Service Company of Northern Illinois has a large power plant at Waukegan. I don't know exactly where the steel tower line that I have seen between Chicago and Waukegan, goes.

Q. Do you recall whether or not the agreement which you say you saw, covering the Chicago power pool, contained a description of the construction of the tower lines between the generating stations and the companies involved in the Chicago district pool? A. No.

Q. You say you don't know? A. I don't recall.

Q. Do you recall whether there was any description of the type of generating unit involved in the Chicago district power pool? A. No.

Q. There was no such description in the contract which you have examined? A. I certainly didn't say that—

Q. Well, I didn't mean to—

A. (Continuing) —because I have no recollection at this time as to just what was or what was not.

Q. In the contract?

A. In that contract. I did not examine the contract with any idea of forming an opinion on its desirability for the purposes for which it was written. I examined it solely to see whether or not it had any features provided in it that could profitably be [adpted] in comparable form into a power interchange agreement which was proposed for the Dakota companies.

Q. Did you call Mr. Buell and ask him to furnish you a copy of the Chicago district power pool agreement?

A. I don't recall that I got it.

Q. You reached for it when you found that Buell had followed that document or had referred to that document in his communication to you concerning the agreement which he proposed for your Dakota public service companies?

A. I don't know that I reached for it. I recall that I had it, and the purpose for which I examined it.

Q. Do you recall where you got the Chicago power pool agreement?

A. To the best of my recollection I got it from Mr. Buell.

Q. Do you recall that you returned it to Mr. Buell at any time? A. No, I do not.

Q. Oh, you do not? A. No.

Q. On Monday, September 22nd, you stated that, "At a meeting held in December, 1937, I had with me a copy of the Survey on Power Requirements, which we discussed at that meeting."

Mr. Stafford had previously said: "As a matter of fact, that meeting was held in January, 1938", and asked you would it refresh your recollection by referring to the minutes of the June 15th meeting. Do you recall the testimony?

A. Yes.

Q. What was the Survey of Power Requirements that you say was discussed at the meeting held December, 1937? Do you want to refer to the exhibit?

A. Well, without confirming the date of any meeting, I recall that I took to a meeting a Survey of Power Requirements, a copy of which has been introduced. To the best of my recollection I took it to the first meeting that

was held after I received it. Only by reference to my minutes can I fix the dates.

Q. Well, I am trying to get the Survey of Power Requirements, which you said you had at a meeting held in December, 1937.

A. As to the accuracy or inaccuracy of that statement with respect to that particular meeting, I would have to depend solely on the minutes or my agenda to confirm whether or not it was at a meeting on the date you mentioned, or at the next meeting after, or the meeting preceding it.

Q. Now, let's get this straight, Mr. White. I am not trying to trap you on the date of the meeting, or anything else. I am trying to find out what document you say you had at a meeting. Now, let's read the record.

Quoting from page 457 of the transcript, as furnished to me by the reporter, Mr. Stafford said in his question:

> "Q. As a matter of fact, that meeting was in January, 1938, wasn't it, Mr. White? Would it refresh your recollection by referring to the minutes of the June 15th meeting?"

To which you answered:

> "A. No. At a meeting held in December, 1937, I had with me a copy of the Survey on Power Requirements which we discussed at that meeting, and as a result of that discussion the directors asked me to prepare and send to each director a copy of that survey, and upon my return to the office I had the survey manifolded and sent it to each director by mail."

Now, with the understanding on your part that all I am trying to do is find out what you were talking about when you said you had a copy of the Survey of Power Requirements, can you answer in words of one syllable what document you had before you at that time?

A. The document which I had was the same as Defendant's Exhibit 24 for identification.

Mr. Benson: Q. Who told Mr. Stafford you had a cottage at Detroit Lakes in the fall of 1941?

A. I occupied a cottage for about three or four days in the course of a divisional managers' meeting there.

Q. I say who told Mr. Stafford that you occupied that cottage?

Mr. Royhl: I object to that; immaterial.

Mr. Stafford: Immaterial,

A. I must have.

Mr. Benson: Q. Do you remember when?

Mr. Stafford: The same objection.

A. As I recall, when he asked me to tell him what my participation was in the drafting of the 1941 agreement.

Mr. Benson: Q. Referring to the record of your testimony which has been furnished to the parties hereto by the reporter, Volume 5 hereof, on page 518 you made a statement reading as follows:

> "The second point that I caused to be written into that 1941 agreement was a reconsideration back to 1936 of the basis of the $20,000 annual charge for use of interconnection facilities. In the 1936 contract, interconnection contract, which was superseded in 1939—"

Thereupon Mr. Stafford interrupted with the question:

> "Q. By the 1939 interconnection contract, is that right?"

And you said:

> "A. By the 1939 interconnection contract, which was drawn to reflect the effect of the merger, it was provided that Northern Power & Light or Dakota Public Service, as the case might be, should pay an annual charge of $20,000 a year for the use of the interconnection facilities.
>
> "When Northwestern asked for a ten-year term on the 1941 agreement, I insisted that on the formula of 3-1/2 per cent for taxes, maintenance and renewals, and 5 per cent annual interest on the investment in the interconnection facilities, all balance of the $20,000 a year payable under the interconnection contract, or previously paid, subsequent to January 1, 1936, should be applied to the amortization of the 50 per cent por-

tion of the cost of those facilities, allocated to Northern Power & Light Company or Dakota Public Service Company as the case might be."

Where did the 3-1/2 per cent for taxes, maintenance and renewals originate?

A. To the best of my recollection it originated as part of a formula which was suggested by Mr. Sandstedt as a fair basis for determining how long that $20,000 use charge on those terminal facilities should be continued without reduction.

A portion of White's deposition is omitted because it appears, supra, at page 1360, lines 17 through 30.

Q. And where did he give you that figure? Was that in Detroit Lakes, Minnesota?

A. I think that it was at Detroit Lakes. I am not sure just when we arrived at a lower figure. I recall that—

Q. Well, this recollection as to Detroit Lakes, you are now referring to the meeting that you testified to on direct examination? A. Yes.

A portion of White's deposition is omitted because it appears, supra, at page 1360, beginning line 13th from the bottom, through line 21 on page 1361.

Q. Now, can you state when this 3½ per cent figure was first arrived at or first suggested?

A. At the time when we were discussing the 1941 agreement, and I believe in advance of the Detroit Lakes conference.

Q. Can you recall where that 3½ per cent figure was first suggested? A. No.

Q. Can you recall, or is your statement correct that your best recollection is that it was suggested by Mr. Sandstedt the first time you heard it? A. Yes.

Q. Do you remember who was present when he first suggested the 3½ per cent figure? A. No.

Q. Can you remember when the 5 per cent annual interest was first suggested as a part of the formula that you have described?

A. Not specifically, no, as to time or place, but I have the impression that it was suggested at the same time as the 3½ per cent figure.

Q. And is it your recollection that that 5 per cent figure was suggested by Mr. Sandstedt?

A. That is my recollection, yes.

Q. And you don't remember who was present when he first suggested that?

A. No; the circumstances under which the formula was suggested—by that I mean what the occasion was on which the matter was discussed.

A portion of White's deposition is omitted because it appears, supra, at line 21 on page 1361 through line 39 on page 1361.

Q. And when was that formula prepared, or when was that problem worked ont month by month?

A. Prior to the Detroit Lakes meeting.

Q. Do you have here a copy of the figures Mr. Sandstedt worked out for the retirement of either the $325,000 or any other figure? A. Yes.

Q. May I see it?

A. Yes (handing document to counsel).

Q. Now, you have handed me a document which says at the top, "Interchange contract," is that right? A. Yes.

Q. That deals with the retirement of a fund of $162,500, does it? A. Yes.

Q. Do you know when this document you have handed me was worked out?

A. No, but it is the best of my recollection that it was worked out prior—is there a date on it?

Mr. Benson: (Handing document to the witness).

A. (Continuing) —to the Detroit Lakes meeting, and during the summer of 1941.

Q. You discussed this document that you handed to me with Mr. Sandstedt at the meeting in Detroit Lakes, Minnesota? A. I cannot state specifically that I did.

Q. Do you remember whether you had this document at the Detroit Lakes meeting? A. No, I don't remember.

Q. You don't remember that? A. No.

Q. Well, you have examined Exhibit F to the complaint, which is the 1941 contract, haven't you? A. Yes.

Q. I call your attention to Article V, Section 3, of Exhibit F to the complaint, and ask you to read it. (Handing document to the witness.)

Mr. Robinson: Mr. Benson, for the sake of the record will you indicate whether it is Article V, Section 3, of the 1941 agreement or the 1943 supplement? They both are part of Exhibit F to the complaint.

Mr. Benson: It is the 1941 agreement.

Q. You have read that, have you? A. Yes.

A portion of White's deposition is omitted because it appears, supra, at page 1361, line 40, through line 8, page 1362.

Mr. Benson: Q. I see.

A. And in 1941 we were engaged in rewriting an agreement into which we were combining, with certain changes, into a single agreement the matters that were covered by an interconnection agreement of 1939 and a capacity interchange agreement of 1939.

Q. You testified to that on direct examination didn't you? A. Yes.

Q. Don't you recall? A. Yes.

Q. Now, I show you a document consisting of seven pages, entitled, "Interchange Contract," and marked on the first page Plaintiff's Exhibit 6 for identification. That is the document you handed to me some time ago in this hearing this morning, when we started talking about Mr. Sandstedt's method of figuring out the retirement of a

certain amount of money, employing the 3½ per cent figure and the 5 per cent interest. A. That is correct.

Q. Now, can you tell me whether Plaintiff's Exhibit 6 for identification was before you at the Detroit Lakes meeting? A. No, I cannot.

Q. You have no recollection when you first received Plaintiff's Exhibit 6 for identification? A. No.

Q. Have you any records in your files which will refresh your recollection as to when you first received Plaintiff's Exhibit 6 for identification?

A. I have nothing in my files to indicate with any degree of certainty as to just when I received this.

Q. What is your best recollection as to when you received Plaintiff's Exhibit 6 for identification?

Mr. Benson: Let the record show witness's counsel asked for the privilege of interrupting the examination.

A. My counsel has just called to my attention that there is in my files a letter dated October 16, 1941, which is a covering letter for that particular document.

Mr. Benson: May I have the letter to which you have referred?

Mark this Plaintiff's Exhibit 7 for identification.

(Said document was thereupon marked Plaintiff's Exhibit 7 for identification of 9-27-47.)

Mr. Benson: Q. I show you Plaintiff's Exhibit 7 for identification and ask you if that is the covering letter to which you just referred? A. It is.

Mr. Benson: The plaintiff offers in evidence and asks that it be returned with the deposition and as a part of the deposition of the witness now under examination, Plaintiff's Exhibit 7 for identification and 6 for identification.

Mr. Royhl: No objection.

(Copies of said documents offered in evidence as Plaintiff's Exhibits 6 and 7 are attached).

Mr. Benson: Q. In Plaintiff's Exhibit 7 the writer makes the statement, said Exhibit 7 being dated October 16, 1941:

> "I intended to go over the interchange agreement with you in Biloxi, but didn't have the opportunity."

Were you in Biloxi, Mississippi, on October 16, 1941, or thereabouts?

A. I was in Biloxi, Mississippi, attending a meeting, which Mr. Sandstedt also attended. I don't recall the date of that meeting, but after reading Mr. Sandstedt's letter I am confident it was sometime before October 16th and after the first week in September, both in 1941.

Q. What was the meeting at Biloxi?

A. The meeting at Biloxi was of all the executives of the operating subsidiaries of The Middle West Corporation.

I was also invited, and as I recall, there were several executives of large manufacturing companies, and there was a public relations man who represented the entire electric industry in the country. I believe the president of the Edison Electric Institute was there.

Q. Was there anybody down there from the joint office at Huron besides Mr. Sandstedt?

A. I think Mr. Sanborn was there, too. I don't recall any others.

Q. Did McArthur go down there?

A. I don't recall that he did.

Q. And the expenses of Sandstedt and Sanborn were paid by Northwestern Public Service Company, or were they paid by The Middle West Corporation?

Mr. Royhl: Objected to as incompetent, irrelevant, immaterial, not proper cross examination; not the best evidence, no proper foundation laid, not being shown that this witness knew anything about that detail.

Mr. Benson: Is that an objection or a suggestion?

Mr. Royhl: That is an objection, right in the record, on the ground of foundation.

A. I believe it was customary for Mr. Sanborn and Mr. Sandstedt to charge their expenses, their traveling expenses, to [joing] management expenses, and I would assume that these traveling expenses to Biloxi were so charged and prorated between the companies that were—

Mr. Benson: Q. You really don't know what happened?

A. I don't know.

Q. Now, this meeting down at Biloxi was a sort of private Edison Electric Institute meeting of the Middle West companies?

Mr. Royhl: Objected to as argumentative, and for all the reasons and grounds heretofore urged.

A. I have never been to a meeting of the Edison Electrical Institute, but I have heard about those meetings; and I believe that at this particular meeting in Biloxi the discussions and talks were very much better attended, that the conduct of those present was much more seemly than would prevail at a large national convention.

A portion of White's deposition is omitted because it appears, supra, at page 495, line 4, through line 39 on page 498.

Q. Did you state on direct examination that Central Electric & Telephone Company was at one time negotiating for the purchase of Northwestern Public Service Company?

A. Yes.

Q. I don't remember whether you stated it or whether it was in some of the minutes at your directors' meetings.

A. I am quite confident that I so stated in this hearing.

Q. During the time the negotiations were pending between Central Electric & Telephone Company and whoever proposed to sell Northwestern Public Service Company, did you have any talk with Mr. Sanborn as to what he would do if Northwestern Public Service Company was sold? A. I don't recall such a conversation.

Q. Do you know whether the negotiations concerning the sale of Northwestern Public Service Company involved any change in the status of Mr. Sanborn?

A. No. I don't know that they did or did not.

A portion of White's deposition is omitted because it appears, supra, at page 1362, line 9th from the bottom, through line 39 on page 1362.

Q. Do you remember who those men were who came from Central Telephone & Telegraph? Were they J. B. Gallagher and Judson Large?

A. Judson Large was one. I think a Mr. Phillips, who was an operating man, was another, and I think the third was the attorney of those two gentlemen in Chicago.

Q. You don't know J. B. Gallagher?

A. No. I don't recognize the name, and I don't recall the name of that particular attorney, if J. B. Gallagher is an attorney.

A. (Continuing) I do not recall the name of Mr. Gallagher nor do I recall the name of the third person who came in to see me, but to the best of my recollection there were three men who came.

Mr. Benson: Q. Did you have any talk with A. B. Sanborn about the reasons for your delaying the execution of the July 1, 1941, agreement?

A. Well, if I did I don't recall that at this minute.

Q. I will show you Defendant's Exhibits 49 and 50 for identification. I don't know that they will assist you in refreshing your recollection, but they may (handing documents to the witness).

A. I now recall this letter. That letter does refresh my recollection.

Q. Now, does that letter refresh your recollection as to any conversations or communications with Mr. Sanborn concerning delay because of the pendency of the Northwestern sale, such communications or conversations having taken place prior to January 9, 1942?

What I am trying to find out, Mr. White, is whether you had conversations with Mr. Sanborn from the time you were in Detroit Lakes in the fall of 1941, and prior to the writing of this letter, Defendant's Exhibit 49.

A. Only to the extent that such conversations are implicit in that letter.

Q. Do you recall whether Mr. Sanborn made any protest because the 1941 contract was not being signed?

A. No.

Q. Do you recall that anybody in the joint staff in Huron made any protest because the July 1, 1941, contract was held up pending these negotiations for sale? A. No.

Q. No suggestions were made by any of the general staff at Huron to you as to what situation Dakota Public Service would be in if Northwestern was sold to Central Telephone & Telegraph, and you had only the 1939 contract with the 18 months' cancellation provision in it?

A. If they were, I don't recall what those suggestions consisted of.

Q. When I have used the term, "Central Telephone & Telegraph Company" I misnamed the company in my questions. Did you understand I was talking about Central Electric & Telephone Company?

A. Yes, I thought, with the exception of this last statement of yours, you had used "Central Electric & Telephone Company."

Q. I show you Defendant's Exhibit 52 for identification. Will you please read that? (Handing document to the witness).

You have now read Defendant's Exhibit 52 for identification? A. Yes.

Q. Do you have before you a copy of the complaint in this case? A. Yes.

Q. Will you look at the 1941 contract, Exhibit F? You have located Exhibit F to the complaint, have you?

A. Yes.

Q. Defendant's Exhibit 52 for identification came into your possession about February 2, 1942? A. About, yes.

Q. I call your attention to the third paragraph of the first page of Defendant's Exhibit 52 for identification.

In that paragraph is found the following language:

"The new agreement has an added equitable provision which might become effective in the future if either party should desire to make comparatively heavy additions to its generating capacity."

Can you point out to me the added equitable provisions referred to in that language?

A. As I recall, that wording referred to the ten-year term that was provided in that 1941 agreement.

Mr. Benson: I will explain to you what bothers me, and why I asked you this question. I have examined that contract and I cannot find anything which fits in my mind the phrase "an added equitable provision which might become effective in the future."

The Witness: The added provisions of a ten-year term and the limitation to 25 per cent for billing purposes.

Mr. Benson: Q. Oh, I see.

A. The system reserve to be used was agreed to be a mutually desirable provision of that contract, to protect either party as and when they added capacity to their share of the system.

Q. All right. I call your attention to the Defendant's Exhibit 55 for identification, the last paragraph. Will you please read that (handing document to the witness)?

A. (Witness examines document.) I have read it.

Q. I take it you are no more familiar with the formula for figuring that $93,000 than you were with the formula for figuring the amortization of the $325,000 figure involved in my first question about formula.

Well, let me put it this way: Did you use any formula to verify the $93,000?

A. Presumably that $93,000 figure would have been easily and immediately verified from a schedule showing the monthly payments that were incorporated into the 1941 contract.

Q. Now, will you answer my question? Read it.

(Question read).

A. I think I have previously testified that I knew of no formula for computing the amortization of any given amount under that contract.

Q. All right. The meeting of the board of directors held November 22, 1935, was held in Boston, according to the evidence in the record.

Mr. Royhl: 1935?

Mr. Benson: 1935; it was held in Boston.

Q. What was the purpose of holding the meeting in Boston?

Mr. Royhl: Objected to as immaterial and irrelevant.

A. We had a Boston director on our board, and in agreeing in advance on a date to that meeting I personally had called attention to the fact that that date would coincide very closely with the date of the Harvard-

Yale football game, which I was very anxious to see and at company expense.

A portion of White's deposition is omitted because it appears, supra, at line 40 on page 1362, through line 2 on 1364; at line 14 on 467 through line 11 on 469; at line 3 on 1364 through line 10 on 1364; and at line 26 on 467 through line 11 on 469.

Q. Now, Mr. White, I would like you to explain to me something that sounds strange on the record.

Do you recall that on February 7, 1941, you increased B. P. Stevenson's salary from 70 to 77.50 a month, as of February 1st, 1941? A. Yes, sir.

Q. How does it happen that you increased his salary $7.50?

Mr. Royhl: That is objected to as irrelevant, incompetent and immaterial.

A. United Public Utilities Corporation paid 15 per cent of Mr. Stevenson's aggregate salary as an employee of that Wilmington joint office. The lower figure was 15 per cent on his salary before the raise. The seven dollars and some cents difference was 15 per cent of his aggregate increase.

Mr. Benson: Q. Now, do you recall that in April, 1941, you raised Gail Belden's salary from $50 to $105?

Mr. Royhl: The same objection.

A. The explanation will be the same.

Mr. Benson: Q. Did you raise Gail Belden from 105 to 116 subsequent to that, and would the explanation be the same?

Mr. Royhl: The same objection.

Mr. Benson: Q. (Continuing) We did and it is?

A. If we did, it is.

Q. Do you recall hiring a man by the name of Kenneth Oakley? A. Yes.

Q. He went to work for the United Public Utilities Corporation when? A. When Mr. McClanahan left.

Q. Well, all right. Don't bother about the exact time. Can you tell me what Mr. Oakley's previous experience had been?

A. He had been in the accounting department of the Commonwealth Edison Company; he had been with a public accounting firm and with several industrial companies.

Q. When was he with Commonwealth Edison?

A. Immediately before he came to us.

Q. Is Commonwealth Edison an affiliate of Middle West Corporation, or is Middle West Corporation an affiliate of Commonwealth Edison Company?

Mr. Royhl: Same objection as made before.

A. I believe there is no relationship between those two companies.

Mr. Benson: Q. Although they have at times in the past been officered by the same individuals?

Mr. Royhl: The same objection.

A. I cannot confirm that.

Mr. Benson: Q. Don't you remember about the Insull days?

A. Oh, yes. They did have a common officer at the top, namely, Mr. Samuel Insull.

Q. You testified concerning the maintenance by Northwestern Public Service Company of an office in Huron, South Dakota, in addition to the office occupied by the joint management. Was that what is commonly called in the utility business a division office and a store to sell merchandise? A. Yes.

Q. During your testimony you referred to periodic receipt of operating and financial reports. Those were made by members of the joint staff at Huron? A. Yes.

Q. During your testimony you told that reports, letters, communications, various documents, sometimes came directly to you and sometimes came to you through Middle West Service Company.

I don't suppose you made any examination of the files

of Middle West Service Company to ascertain that all communications which originated at Huron, relative to the business transactions between Northwestern Public Service Company and your Dakota subsidiaries came to you? A. No, I did not.

Q. I don't remember whether you were able to advise us, when I first asked you for the identification of H. Babbitt, whose name appears on Defendant's Exhibit 67 for identification? A. No, I was not able to identify H. Babbitt.

Q. Now, do you recall what H. Babbitt's business was at that time, or did you later in the examination identify Babbitt as dispatcher?

A. No. I have not identified him at all.

Q. As a load dispatcher?

A. And I don't now identify him.

Q. You do not?

A. No. If he is so identified on that exhibit, I didn't do it.

Mr. Benson: No, he is not.

Q. Do you know whether, at the time the call was made to you by the president of the Chicago bank, asking whether you would be willing to be receiver of United Public Utilities Company and the other companies, those companies were indebted to the Chicago bank with which you were then affiliated?

A. I received no intimation that they were, and I can certainly state definitely that United Public Service Company or United Public Utilities Company or Southern United Gas Company were not indebted to any bank.

Q. At the time Mr. Philip Clarke called you and asked you whether you would be receiver of United Public Utilities Company do you know whether Middle West Utilities Company was largely indebted to Mr. Clarke's bank?

A. No, I do not know.

Q. You didn't know then? A. I didn't know then.

Q. And you don't know now? A. And I don't know now.

Q. And you never did know, at any time?

A. No. I did not know about the loans at the City National Bank & Trust Company because I was neither an officer nor a director of that bank, but my connection was solely with its investment affiliate, which was located in a separate building.

I have recalled since I testified, however, that it certainly did not look very good when I couldn't remember whether or not I was a vice president of the National Bank of the Republic, and I recall now that I was a vice president of that bank subsequent to the formation of the National Republic Company, and continued in that office throughout the remaining life of that bank, having charge of the purchase of its entire bond portfolio.

Q. Were you requested in the subpoena served on you by the plaintiff to produce the document showing when control of North Dakota Power & Light Company and Northern Power & Light Company was acquired by United Public Utilities Company? Look at your subpoena if you want to make sure.

A. Before I answer that I will have to look at the subpoena.

Now, will you read the question?

(Question read).

A. Yes, I was, and I have brought a record to show the date of that transfer.

Mr. Royhl: Q. Was that the U. P. U. Company or U. P. U. Corporation? A. Corporation.

Mr. Benson: Q. Mr. White, do you have the general ledgers and other accounting records of United Public Utilities Company? A. I think so.

Q. Where are such records of United Public Utilities Company which you took possession of when you became receiver of that company?

A. They should be in my storage vault.

Mr. Benson: Well, now will you make a note of a request to get the data showing the date when United Public Utilities Company acquired the control of North Dakota Power & Light Company and Northerr Power & Light (addressing Mr. Voland)?

Mr. Voland: Yes, I will.

Mr. Benson: Q. Do you remember when United Public Utilities Corporation became a subsidiary of the Middle West Corporation? A. Yes; on July 1, 1945.

Q. That was by reason of the retirement of the United Public Utilities Corporation collateral trust bonds?

A. Yes, and the resulting change in the voting power under the provisions of the original certificate of incorporation.

Q. That is, the voting power of the Class B common stock? A. That is correct.

Q. Do you recall whether, when United Public Utilities Corporation became a subsidiary, as you have described, of Middle West Corporation, there was a change in the rate Middle West Service Company would thereafter charge United Public Utilities Corporation and its subsidiaries?

A. I do remember that a change in that charge became effective as of July 1, 1945.

Q. When you became a subsidiary of Middle West Corporation, as you have described, the Middle West Service Company was then obligated to serve United Public Utilities Corporation and its subsidiaries at cost?

A. Well, of course, it was never obligated under any arrangement, to serve—

Q. No, but I mean—

A. (Continuing) —United Public Utilities Corporation, but it was obligated to serve the subsidiaries of United Public Utilities Corporation at cost.

Q. And was it due to the fact—I don't want to get confused in the record, that somebody has to straighten out later, but was it due to the fact that United Public Utilities Corporation became a subsidiary of Middle West Corporation that Middle West Service Company was required to serve The U. P. U. Corporation's subsidiaries at cost?

A. Yes.

Q. And when that event occurred, July 1, 1945, the current charge for service to U. P. U. subsidiaries dropped from .8 of a per cent to .6 of a per cent of the gross, subject to refund upon the determination of the actual cost?

A. That is correct.

Q. Do you recall a company or a corporation called Allied Service Company? A. Yes.

Q. What was that company?

A. As I recall, Allied Service Company, with headquarters in Kansas City, Missouri, was a subsidiary of Middle West Utilities Company, and it either owned and operated

ice manufacturing plants or it owned the securities of ice manufacturing companies.

Q. When you became receiver of United Public Service Company did you find that Allied Service Company was the owner of bonds of United Public Utilities Company?

Mr. Royhl: That is objected to as not the best evidence, incompetent, irrelevant and immaterial under the [issued] in this case.

A. As I recall, it was the owner of a note of United Public Utilities Company, that was secured by first lien bonds of United Public Utilities Company.

Q. Now, did you get the bonds back? A. No.

Q. What disposition was made of the note held by Allied Service Company, and of the bonds held by Allied Service Company?

Mr. Royhl: The same objection in full, not proper cross examination.

A. Under the plan of reorganization of United Public Utilities Company, which was consummated at the close of business December 31, 1934, the note of United Public Utilities Company, payable to Allied Service Company, was cancelled, but the 451,000 first lien bonds held as collateral thereto were treated in the same manner as all other bonds of United Public Utilities Company; that is, those bonds received the same treatment under the plan that was accorded to all the rest of the outstanding bonds of United Public Utilities Company.

Mr. Benson: Q. Did Allied Service Company then receive stock of United Public Utilities Corporation?

Mr. Royhl: The same objection as last made, in full.

A. Yes.

Mr. Benson: Q. Did it receive 4,510 shares of preferred stock?

Mr. Royhl: The same objection.

A. Yes.

Mr. Benson: Q. And did it receive 4,985 shares of voting trust certificates on Class A common stock?

Mr. Royhl: The same objection.

A. No. Under the formula of the plan, it received for those bonds the same number of shares of common stock that it received of preferred stock.

Mr. Benson: Q. Well, do I understand from that, that Allied Service Company received 4,510 shares of Class A Common stock?

Mr. Royhl: The same objection.

Mr. Benson: Q. (Continuing) or did it receive voting trust certificates for 4,510 shares of Class A common stock?

Mr. Royhl: The same objection.

A. It received voting trust certificates for that amount of Class A common stock, in exactly the same manner and in the same ratio that all other bondholders received under the reorganization plan.

Mr. Benson: Q. Well, are you unable to tell me now, in view of the statement you made as to the holding of the note of $451,000?

A. No. That was in the amount of $470,000.

Q. $470,000? A. Yes.

Q. And the collateral was $451,000 of bonds of United Public Utilities Company?

Mr. Royhl: Same objection.

A. That is correct.

Mr. Benson: Q. Did Allied Service receive 4,510 shares, or voting trust certificates for 4,510 shares of the Class A common stock of United Public Utilities Corporation?

Mr. Royhl: The same objection.

A. Yes, if it held onto its bonds—

Mr. Benson: Q. That is—

A. (Continuing) those $451,000 of bonds, which they held—

Q. It would have entitled them to one share of preferred and one—

A. Would have entitled them to ten shares of preferred stock and ten shares of Class A common stock in the form of voting trust certificates, for each $1,000 bond.

Q. Did Allied Service Company, in the reorganization of United Public Utilities Company, receive any other securities—

Mr. Royhl: Same objection.

Mr. Benson: Q. (Continuing) —than the voting trust certificates and the preferred stock? I am trying to ascertain whether Allied Service Company received some collateral trust bonds—

Mr. Royhl: The same objection.

Mr. Benson: Q. (Continuing) —or was there nothing like that issued by U. P. U. Corporation?

A. Yes. Under the plan of reorganization of United Public Utilities Company, a holder of a first lien bond of that company of say $1,000 par value, received $500 of new collateral trust bonds of United Public Utilities Corporation, a 5 per cent ten year interest script certificate in the amount of 15 months interest on the old prior lien bond of United Public Utilities Company, which he had held, and also ten shares of preferred stock of United Public Utilities Corporation, and ten shares of common stock of the United Public Utilities Corporation, in the form of voting trust certificates.

Q. Did Allied Service Company [received] $225,500 par value of the collateral trust bonds of United Public Utilities Corporation?

Mr. Royhl: The same objection as last made, in full.

A. They did if they presented those bonds; that is the amount of bonds, of new bonds, that they would have been entitled to receive if they retained the ownership of their old bonds and presented them for exchange, under the plan.

Mr. Benson: Q. Do you have a final or interim report of your receivership showing the court what you distributed to Allied Service if anything? A. No.

Q. I don't mean [to] you have it here before you.

A. No, I don't have it, because the court appointed a bank to make those exchanges.

Q. What bank?

(Thereupon discussion was had off the record.)

Mr. Royhl: May I have the same objection to all this line of questioning?

Mr. Benson: Yes.

(Record read.)

A. To the best of my knowledge, Allied Service had never deposited any of its bonds with a bondholders protective committee, and on that assumption its bonds would have been presented to City National Bank & Trust Company of Chicago for exchange, under the plan.

Mr. Benson: Q. Mr. White, during the administration of your receivership was some arrangement made with City National Bank & Trust Company of Chicago for creditors to deposit evidences of indebtedness against United Public Utilities Company, with that bank?

A. I recall that an arrangement was made for the deposit with that bank of stocks, preferred stock of our company, to be represented by the so-called Bard Committee, and that a similar arrangement was made for the Provident Trust Company of Philadelphia to receive deposit of bonds, to be represented by a bondholders protective committee that was entirely separate and distinct from the Bard Committee.

Q. Some time ago, in the examination, I asked you whether you made any distribution of securities of United Public Utilities Corporation to Allied Service Company, and you said that you did not, as receiver.

A. I did not make the distribution directly to them. To make it still clearer, I might add—

Mr. Benson: Just a moment.

Q. Was there a bank in Chicago from whom Allied Service Company could have secured securities of United Public Utilities Corporation in return for the obligations of United Public Utilities Company? A. Yes.

Q. What bank?

A. City National Bank & Trust Company.

Q. You don't know whether Allied Service Company presented any obligations of United Public Utilities Company to that bank? A. No.

Q. You have testified that Herbert L. Nichols, or H. L.

Nichols was a member of the board of United Public Utilities Corporation? A. Yes.

Q. And he has been, continuously since its incorporation? A. Since January 1, 1935.

Q. Did you know Mr. Nichols before he became a member of your board of directors? A. Yes.

Q. Was he associated in business with you? A. No.

Q. Did you testify on direct examination concerning his business in the City of Chicago? A. Yes.

Q. Mr. Nichols is now chairman of the board of Southwestern Public Service Company? A. Yes.

Q. With his office at Dallas, Texas? A. Yes.

Q. Do you know whether Southwestern Public Service Company was created to take over properties that belonged to, any properties that belonged to a subsidiary of Middle West Corporation?

Mr. Royhl: Objected to as incompetent—

Mr. Benson: Q. (Continuing) Or Middle West Utilities Company?

Mr. Royhl: Objected to as incompetent, irrelevant and immaterial, and not proper cross examination, and not the best evidence.

A. To the best of my understanding it was created to take over properties that formerly belonged to Community Power & Light Company, which I believe had no relationship to the Middle West Utilities Company system or the system of Middle West Corporation.

Mr. Benson: Q. That was a Hulswith Company?

A. I cannot say.

Q. Or a Fitkin Company?

A. I don't recall that it was either.

Q. Did Southwestern Public Service Company buy utilities from Middle West Corporation or a subsidiary of Middle West Corporation?

Mr. Royhl: The same objection.

A. I know of one instance in which Southwestern Gas & Electric Company has recently purchased some isolated [propertties] which the Securities and Exchange [Commissioned] ordered one of the subsidiaries of Central & Southwest Corporation to dispose of.

Mr. Benson: Q. Do you know of an instance where Southwestern Public Service Company bought operating utilities from West Texas Utilities, which was a subsidiary of Central & Southwest Utilities?

Mr. Royhl: The same objection.

A. I think that that was the name of the subsidiary that was the seller to Southwestern Public Service Company.

Q. You paid Mr. Nichols a salary? A. We did.

Q. As an officer of—

A. (Continuing) We did for a while pay him a salary of $50 a month as vice president.

Q. Was that under some arrangement for splitting joint office expenses in Wilmington, Delaware?

A. No. It was a straight salary, and in the same amount that we paid to Mr. Barroll as secretary of the company.

Q. Do you have the by-laws of United Public Utilities Corporation here? A. Yes.

Q. Are they the originals?

(Thereupon discussion was had off the record).

Mr. Benson: May we have the same stipulation as to the by-laws that we have as to the minutes?

Mr. Robinson: Yes.

Mr. Benson: I will read from the minute books, from that portion thereof entitled, "United Public Utilities Corporation by-laws", paragraph numbered 17 thereof, reading as follows:

"President"

"17. The president shall be the chief executive officer of the corporation. He shall preside at all [meeting] of the stockholders and, unless a chairman of the board of directors shall have been appointed, he shall preside at all [meeting] of the board. Subject to the control of the board of directors, he shall have the general powers and duties of supervision and active management of the business of the corporation usually vested in the office of president of a corporation. He shall see that all orders and resolutions of the board are carried into effect, subject, however, to the right of the directors to delegate

any specific powers, except such as may be by statute exclusively conferred on the president, to any other officer or officers of the corporation. He shall be ex-officio a member of the executive committee. He shall execute bonds, mortages and other contracts requiring a seal under the seal of the corporation. He shall have superintendence and direction of all other officers of the corporation, other than chairman of the board of directors, if any, and shall see that their duties are properly performed, and shall have the power to select and appoint such other agents and servants of the corporation as in his discretion are necessary in addition to those selected by the board of directors, and to remove all such additional [agent] and servants and make new arrangements to fill the vacancies. He may delegate any of his powers to a vice president of the corporation."

I offer in evidence the quoted portion from the by-laws.

Mr. Royhl: Objected to as immaterial and irrelevant.

Mr. Benson: Q. Mr. White, have you submitted, and has there been introduced in evidence, all reports made by Major Buell concerning the generating capacity and additions required to generating capacity of the Dakota subsidiaries?

A. In so far as I am aware of such reports, yes.

Q. That is, you intend that they should be introduced?

A. Yes, and I am quite sure that all reports that he issued are included.

A portion of White's deposition is omitted because it appears, supra, at page 1364, line 11, through line 36 on page 1364.

Mr. Benson: Q. Do you have any of those budgets here—

A. No.

Q. (Continuing) —that would have reference to the Bowdle transformer station? A. No.

Q. Do you remember anything about the type of construction of the line from Barnard to Leola, when you

took possession of the Northern Power & Light Company, at the time of the receivership?—

The Witness: Will you read the question?

(Question read)

Mr. Benson: Q. (Continuing) Of the United Public Service Company? A. No.

Q. Have you ever known what the type of that line was, the type of construction?

A. I recall going to Barnard. I don't recall going west from Barnard to Leola or Wetonka. I knew that there was a line out there, but I cannot recall whether I ever drove along it or not.

Q. So you do not know that you ever knew what the size of the wire was on that line? A. No.

Q. And to the best of your recollection now you never have known anything about how heavy the insulation was on that line? A. No.

Q. Did you ever know anything about the size of the poles on that line? A. No, not that I can now recall.

Q. Under Exhibit C to the complaint and under Exhibit E to the complaint, which are the two interchange capacity contracts, there is a provision in Exhibit C, Article I, Section 8, reading as follows:

"The term 'Company system maximum demand,' with respect to any party, for such month as hereinafter designated shall mean the demand (in kilowatts) made upon the system of such party during that half hour in such month in which demand was greater than in any half hour previously recorded."

Do you want to read that Section 8? Right here (Indicating). (Handing document to witness.)

Did you individually select the half hour interval mentioned in Section 8? I assume you did not. A. I did not.

Q. Now, did anybody explain to you how the determination would be made during a half hour interval?

Mr. Royhl: We object to this, for the reason that the contract specifically provides for such maximum demand period; incompetent, irrelevant and immaterial.

A. I can recall that in one of the drafts of those contracts it had been suggested that a 15 minutes demand

be used, and that there was some discussion between Mr. Buell and Mr. Stokke as to whether a 15 minute demand or a 30 minute demand was the more appropriate.

Mr. Benson: Q. What do you mean by the word "appropriate"?

A. More representative as a basis for determining the demand that was to be used for calculating the system demand or the demand of either party in the system, and that I had a talk with Major Buell on that subject. That seems to be about the extent of my recollection.

Q. Now, when you said "In the preparation of those agreements", did you mean that there was a discussion during the preparation of Exhibit C or during the preparation of Exhibit E, or did you mean somewhere in the discussion of both of them, and you cannot state where or when, there was that discussion with reference to the time when either one of those contracts was made?

A. That is correct; the latter one of those two.

Q. You cannot place it?

A. I could not place the time or the place, whether it was over the telephone, between Major Buell and me. My impression is that a discussion of the point was conducted between Mr. Buell and Mr. Stokke, and that Mr. Buell was taking exception to Mr. Stokke's idea, that in the course of taking exception to it he told me that he was taking exception to it and told me the reason for it. That is my impression, but whether that was just an isolated point that was under discussion at the time, or whether it was part of a general discussion of the whole contract, I could not say.

Q. When you finally came to execute or enter into Exhibit F, the interval changed from 30 minutes to 60 minutes. Do you recall anything about the reason for changing from the 30 minute interval in the prior contracts to the 60 minute interval in Exhibit F?

Mr. Royhl: Will you refer to the section? Section 7.

Mr. Robinson: Section 7.

Mr. Benson: What?

Mr. Robinson: It is Article I, Section 7, Exhibit F.

Mr. Benson: Article I, Section 7.

A. I don't recall discussions in which I participated nor do I recall discussions out of which that hourly period resulted.

Q. Now, when you said, "That hourly period, you are referring to the hourly period which you have just read in Section 7 of Article I of Exhibit F? A. Yes.

Q. Now, to quote exactly from the exhibits to the complaint, I will quote from Exhibit C, Article I, Section 8:

"The term 'Company system maximum demand', with respect to any party, for such month as hereinafter designated shall mean the demand (in kilowatts) made upon the system of such party during that half hour in such month in which demand was greater than in any half hour previously recorded."

I will now quote from Section 9:

"The term 'interconnected system maximum demand', with respect to any party, for such month as hereinafter designated shall mean the arithmetical sum of Company system maximum demand during that half hour in such month in which such combined demand was greater than in any other half hour."

Then I will call your attention to Section 8 and 9 of Article I of Exhibit E to the complaint.

(Witness examines document).

You have examined those Sections 8 and 9? A. Yes.

Q. Now, I refer to Exhibit F to the complaint, Article I, Section 7, and ask you to read that section 7. (Handing document to the witness.)

(Witness examined document).

Q. You have read that Section 7, have you? A. Yes.

Q. Can you tell us why in Exhibit F, in Section 7 of Article I, the interval mentioned in each instance where any interval is mentioned is an integral hour or refers to an integral hour— A. No.

Q. (Continuing) —instead of the interval in Sections 8 and 9 of Article I of Exhibit C, and Sections 8 and 9 of Article I of Exhibit E to the complaint?

A. I have no further recollection on that, no.

Q. Mr. White, I interrogated you previously about whether you had any connection with the reorganization

of any public utilities other than the companies of which you were receiver. Did you have some connection with a public utility or an ice company in the south for which Mr. Young of Chicago was the attorney in reorganization? I am trying to refresh your recollection and see whether that brings up anything? A. It does not.

Q. You did not represent any committee or security holders? A. No.

A portion of White's deposition is omitted because it appears, supra, at page 1347, lines 15 through 26.

Q. Do you recall anybody in the joint management at Huron telling you how the 30 minute or half hour—I say "half hour"—I don't know whether I am technically correct when I say "30 minutes"—maximum demand of the companies and the maximum system demands of the companies, under Exhibits C and E to the complaint, were determined; by what devices or arrangements?

A. I don't recall.

Q. You do not recall that anybody ever discussed that with you from the joint management? A. No, I don't.

Q. Mr. White, will you produce the exhibit which shows several ink notations on one of the contracts between Northwestern Public Service Company and one or both of your Dakota subsidiaries?

Mr. Royhl: Exhibit 47.

(Document handed to counsel).

Mr. Benson: Q. You have now handed me Defendant's Exhibit 47 for identification? A. Yes.

Q. I don't recall whether the examination in chief shows where you got this Exhibit 47, where this Exhibit 47 came from when it came to your hands.

Mr. Royhl: He testified that he received those from Buell. No,—47 came from Sandstedt.

Mr. Stafford: He said on chief, John, at page 505 that he received 47 from Sandstedt, but he can't recall the date.

Mr. Benson: Where is page 505? Volume 5?

Mr. Stafford: Volume 5, yes.

Mr. Benson: It now appears, Mr. White, from the statement of counsel, that you have testified that you got Exhibit 47 from Mr. Sandstedt.

Mr. Stafford: That is at page 505 of the transcript.

Mr. Benson: Q. In response to some one of my questions when I was asking where your office was before you became receiver, you made reference to an address 20 North Wacker Drive. What was it you were about to tell me about where your office was located, as receiver?

A. When I went over to pick up my duties as receiver of United Public Service Company, the receivers of Middle West Utilities Company—or, rather, the management of Middle West Utilities Company, immediately prior to the appointment of receivers for Middle West Utilities Company, had trimmed down their organization very substantially and they had a large amount of vacant office space under lease. I was invited to use one of those vacant rooms until I could make arrangements for quarters of my own, and my secretary and I, and a little later Mr. Peale, occupied a two-room suite,—well, as I recall it, for two or three months. Shortly after their appointment, the receivers of Middle West Utilities Company cut down on the space occupied by their staff, readjusted their leases, and I had to move. So I leased, from the 20 Wacker Drive Building Corporation, a small suite in the same building, where I could have ready contact with the Middle West staff members for [operatin] information on our subsidiaries.

Q. Was that small suite on the same floor or floors as the Middle West Receiver's offices?

A. No, Middle West receiver's officers were at the south end of the 21st floor and I was at the north end of the 22d floor.

Q. Have you continued to occupy that same space from the time you moved into this office at the north end of the 22d floor to date?

A. Yes, I have continued to occupy mine. There have been some changes in the Middle West.

Q. Has the Middle West Service Company continued to occupy offices on the 21st floor of 20 Wacker Drive from the time you have described to date?

A. No. During the war the army had all of the 21st floor and several floors below that.

Q. Where did Middle West Corporation have their offices during the time the army was in the building?

A. Well, I think the Middle West Corporation had their offices on the—Middle West Corporation had their offices on one floor of the tower and Middle West Service Company had their offices on two other floors of the tower. I think together they covered a range of ten or twelve floors, or more.

Q. You mean the Middle West offices were spread on ten or twelve floors, or more?

A. What I meant to say is that there were ten or twelve or more floors intervening between the top and the bottom office of Middle West or Middle West Service Company.

Q. I see. Did you make any other joint arrangements with Middle West Utilities Company or its receivers at the time you moved into the suite which you rented from the Middle West Utilities Company?

Mr. Royhl: Objected to as immaterial and irrelevant, and for the further reason that it assumes that there were joint arrangements and there is a misstatement of the record and fact.

Mr. Benson: Q. Well, Mr. White, did you have some agreement with the Middle West Utilities Company concerning use of their telephone number when you went in and rented space from them?

Mr. Royhl: Same objection last made in full.

A. Yes. Yes, the use of their telephone number, which were merely an incident to the use of their telephone switch board and interconnecting system, which interconnecting system gave me a direct contact with the operating men who were serving in an advisory capacity on the operations of our subsidiaries.

Mr. Benson: Q. How long, after you began this use of Middle West in reconnecting telephone system and switch board, for how long a period after you began that did you continue to use the same switchboard?

Mr. Royhl: Objected to as immaterial and irrelevant.

A. I have continued it up to the present time.

Q. Did you say, in your testimony in chief, that you were acquainted with William C. Freeman?

A. If I was asked that question, I did.

Q. All right, are you acquainted with William C. Freeman? A. Yes.

Q. Do you know what position he had with The Middle West Corporation before he became president?

A. I believe he was vice president.

Q. Were you ever [association] in business with William C. Freeman?

A. Yes. Mr. Freeman was a vice president of the National Bank of the Republic when I became associated with that bank in July, 1922, and was at that time either an assistant cashier or assistant vice president, he having been in the employ of the bank for a number of years. He later became vice president of the bank and, at my request, he was transferred to the National Republic Company, of which I was president, and became a vice president of the National Republic Company.

Mr. Royhl: I move to strike this out as incompetent, and irrelevant for any purpose.

The Witness: He continued as vice president of the National Republic Company for several years, when, upon merger of the National Republic Company with the Central Illinois Company, he did not continue his connection with that merged investment subsidiary, but went with the Central Republic Bank and Trust Company as a trouble shooter on messy loans.

Mr. Royhl: I move to strike out the answer of the witness as incompetent, irrelevant and immaterial.

Mr. Benson: Q. Did Mr. Freeman become an officer of the Central Republic Bank and Trust Company?

Mr. Royhl: Objected to as incompetent, irrelevant and immaterial; not the best evidence; not within the issues of this case, no foundation laid.

A. To the best of my recollection, he did.

Mr. Benson: Q. Do you know what his duties were with the Central Republic Bank and Trust Company?

Mr. Royhl: Same objection.

A. I was not an officer, director or employee of that bank, but in various casual conversations with Mr. Freeman at that time—

Mr. Royhl: And for the further reason that it is self-serving and hearsay.

The Witness: (Continuing) I understood that he was working on loans of the bank where the borrower was having difficulty meeting his obligations, the time having been along in 1931.

Mr. Benson: Q. The Central Republic Bank and Trust Company came into existence about 1931?

A. That is my recollection, yes.

Q. Do you know when Mr. William C. Freeman left the Central Republic Bank and Trust Company?

Mr. Royhl: Same objection last made in full to this line of testimony.

A. I don't recall the date. I could make a rough estimate.

Mr. Benson: Q. Well, do you know where he went when he left the Central Republic Bank and Trust Company?

Mr. Royhl: Same objection last made in full.

A. Yes.

Q. Where?

A. He was assigned by several of the Chicago banks to represent those banks in finding out just what was going on in Middle West Utilities Company and to protect the interests of those banks as represented by the loans which they had to Middle West Utilities Company. That was my understanding of it at the time, as to the reason why he came over and took an office in the Middle West offices. I recall that subsequently, at the request of those banks, he was elected an officer of the Middle West Corporation.

Mr. Royhl: I move to strike out the answer of the witness for all the reasons urged in the objection itself, and for the further reason that it is not responsive.

Mr. Benson: We will resist the motion. May it be understood that we resist all motions you make in this deposition?

Mr. Royhl: I will readily concede that, for the record.

Mr. Stafford: We have the same understanding?

Mr. Benson: Correct.

Q. Mr. White, will you state whether, to the best of your recollection, there has not been offered in evidence in this case all of the preliminary drafts of the interconnection contract between Northwestern Public Service Corporation and Northern Power & Light Company, which contract is dated the 7th day of October, 1936, which preliminary drafts came to your attention, or the attention of United Public Utilities Corporation?

Will you read the question, please?

The Witness: I understood it.

Mr. Benson: Oh, you got it?

The Witness: No, I can't state specifically that all of the preliminary drafts of those contracts have been introduced.

Q. You mean of that contract, don't you?

A. Of that contract.

Q. All right. Have you been able to locate any other preliminary drafts in addition to those that have been introduced? A. No.

Q. Now will you state whether, according to the best of your information and belief, all preliminary drafts of the interchange capacity agreement dated the 1st day of January, 1938, between Northwestern Public Service Company, North Dakota Power & Light Company, and Northern Power & Light Company, which contract is Exhibit C to the complaint, and which came to your attention or to the attention of United Public Utilities Corporation, have been offered in evidence in this proceedings?

A. I have brought all of the preliminary drafts that I was able to find in my files.

Q. That is not quite the answer to my question. Are there any preliminary drafts of the interchange capacity agreement which have not been put in evidence?

A. I believe there are here some additional copies of preliminary drafts, but I also believe that they are unmarked or unedited copies of the same draft which has been introduced, with interlineations and changes.

Mr. Benson: All right. May I see the exhibits, Mr. Robinson?

Mr. Robinson: Surely. ([Handling] documents to Mr. Benson.)

Mr. Benson: Will you mark the letter one number and the attached document another number?

(Thereupon said documents were marked, respectively, Plaintiff's Exhibits 8 and 9, each for identification, of 9/29/47.)

Mr. Benson: And will you also mark these?

(Thereupon said documents were marked, respectively, Plaintiff's Exhibits 10, 11 and 12, each for identification of 9/29/47.)

Q. I show you Plaintiff's Exhibit 12 for identification and Plaintiff's Exhibit 9 for identification, and ask you whether those are all of the preliminary copies of the 1938 interchange capacity agreement between Northwestern Public Service Company, North Dakota Power & Light Company, and Northern Power & Light Company which you have been able to find in your files?

A. Yes, they are.

Q. Except for the reporter's identification marks on Plaintiff's Exhibit 12 for identification, that exhibit is in the same condition as when you received it, is it?

A. It is with the exception that on page 8, Article VIII, Section 1, line 5, the Arabic numerals 15 as originally mimeographed have been changed to 10, in blue pencil, and in the righthand margin also appears, in blue pencil, the amount $1.10, both of which are in my handwriting.

Recross Examination.

By Mr. Benson:

Q. What was the bank with which you were first associated?

A. The bank was the National Bank of the Republic, with which I became associated in July, 1922.

Q. Was Herbert L. Nichols ever a vice president of any bank with which you were associated or your security company affiliated with?

A. No. To the best of my knowledge he was never associated with a bank.

Q. He was with Sargent & Lundy for awhile?

A. Not that I know of.

Q. Now, what was the first company you say you knew he was connected with in the utility business? Did you say Community Power & Light Company? A. No.

Q. You know he was associated with that company?

A. I know that when he was in the investment banking business he had considerable to do with the formation of that company.

Q. That company went into receivership?

A. Yes, or went into reorganization of some kind.

Q. Was that company a subsidiary of the American Commonwealth Power Company? A. I cannot tell you.

Q. You don't remember the history of the American Commonwealth? A. No. I think that—

Mr. Benson: All right. Never mind.

Q. You mentioned a memorandum that you said you had had concerning your wife's securities transactions in United Utilities Corporation securities. A. Yes.

Q. That memorandum was on the desk in front of you beginning the first day you were called for examination in these proceedings? A. Yes.

Q. During the course of your examination, both by attorneys for the defendant and attorneys for the plaintiff, in answer to questions, you often produced from your files material that had not previously been called to your attention by counsel for either of the parties, isn't that right?

A. Yes.

Q. Excluding six volumes of minutes of the meeting of the United Public Utilities Corporation and the—

Mr. Stafford: He didn't produce those.

Mr. Benson: What?

Mr. Stafford: He didn't produce those volumes for us.

Mr. Benson: Q. (Continuing) —and the copy which you had of the minutes of those meetings, and the ledger of United Public Utilities Company which you produced, and the transcripts of testimony before the Securities and Exchange Commission, if you pile up the material that you say you had in this room out of your files, one folder on top of the other, about how many inches of material is there, in [heighth]?

A. I would say that including six inches occupied by the annual audit reports, which were never used or referred to, and a book on reorganization proceedings, that the aggregate [heighth], including folders and empty envelopes, is about 18 inches.

Q. In your conversation with Mr. Charles Rundall, to which you have referred here, being the one you had with Mr. Rundall, and not referring to the time Mr. Rundall and Mr. Hastings were in your office, you exhibited to Mr. Rundall no records of your corporation, did you? A. No.

Q. You just gave him a narrative story of your recollection of various events? A. That is correct.

Q. When Mr. Rundall and Mr. Hastings were in your office the only records that were submitted to them were your carbon copies of the minutes of the corporate proceedings? A. That is correct.

Q. And did you say that you requested them to not make complete and verbatim copies of the proceedings?

A. I had not previously so stated, but at that particular time I had no clear idea of what was ahead, and I had reservations in my own mind as to the corporate propriety of allowing other people to examine our minutes. Up to that time I had not consulted personal counsel about any of this, and I merely told Mr. Rundall that without knowledge as to the proprieties in that direction, while I was very glad to have him get an idea of what was in there, and take notes on those minutes, that until I could get some advice on the subject I would prefer that he do not make verbatim copies.

Q. You were absent from the hearing room when Mr. Lakin testified? A. Yes.

Q. Did Lakin ask you for this book that has been talked

about as his memorandum or booklet or folder, or did you produce it for him?

A. As I recall it, when Lakin was first asked to testify, he told me over the telephone that he was having some difficulty collecting the records and files together.

Q. Well, what I am getting at is: Did he ask you for the booklet? A. I told him that I had it.

Q. When he came to Chicago he asked you for it, was that it? Do you recall anything about what happened?

A. I cannot recall specifically that he did ask me for it. It was on my desk when he came in.

Q. Counsel made reference to a figure in Mr. Lakin's book, extracted two pages. I am referring to Defendant's Exhibits for identification 79 and 80. Counsel made reference to a figure of $284,351, on Defendant's Exhibit 80.

Mr. Stafford: And some cents.

Mr. Benson: Did you mention the cents?

Mr. Stafford: I think so.

Mr. Benson: All right, $284,351.72.

Q. Do you recall that? A. Yes.

Q. Now, when you testified concerning that figure, you were looking at Defendant's Exhibit 80 for identification, weren't you? A. Yes, I think so.

Q. Referring to Defendant's Exhibit 80 for identification, and looking particularly at the side of that sheet, on which the reporter's identification numbers appear, the figures on that sheet and the writing on that sheet are not in your handwriting, are they? A. No.

Q. The sheet, I believe you testified, is in the same condition as when you first saw it?

A. As far as I recall. I am not aware of any changes that have been made on it since it came to me.

Q. I call your attention to the initials "O. K." on that sheet. Are those initials in Mr. Lakin's handwriting?

A. I think—yes.

Q. You have seen his writing for a good many years?

A. Yes.

Q. And they were on there the first time the sheet came into your possession? A. To the best of my knowledge, yes.

Q. When you raised the coal rates to Northwestern Pub-

lic Service Company they were also raised to Dakota Public Service Company and to others to whom Knife River was selling coal, were they not? A. Yes.

Q. And when the rate was raised in the forepart of 1945, you raised the rate to all customers, didn't you?

A. Well, there had been some rate changes, but I believe part of those raises were subject to regulatory ceilings.

Q. Well, I think that is a matter of common knowledge; but you did not go to the ceiling on the price to Northwestern Public Service Company, did you?

A. I believe the point was made by Mr. Purchas in the course of those discussions, that we went above the price that was permitted under the then existing regulations, and we had considerable discussion as to the propriety of their paying such a price, and it was part of the discussion that the price of $1.25 had to be cleared with the regulatory authorities.

Q. Your intention in putting load on the [Buelah] plant was that you would put load on for the purpose of making money? A. Yes.

Q. And you stated something about a generator spinning vigorously in the Aberdeen plant, the time when you were out there? A. Yes.

Q. I wonder if you can describe what you mean by that?

A. Well, I mean that the generator was in operation.

Q. Can you tell by standing in the Aberdeen plant when the generator is running, whether it is generating a heavy load or whether it is not?

A. No, I cannot. I don't know whether it is generating a load. I can tell whether it is generating.

Q. You can tell whether it is generating? A. Yes.

Q. It always revolves at the same rate, doesn't it?

A. When it is operating I believe it does.

Q. Well, you are not sufficiently experienced in power plant operation to know whether a generator is carrying a load or not, just by looking at the generator, are you?

A. No.

Q. Nor by any other observation of the generator, nor by any of your senses? You would have to ask somebody, wouldn't you?

A. Normally, although I could go to the switchboard and look.

Q. You wouldn't be sure then that you knew what the particular generator in Aberdeen was doing, would you?

A. I might be very much at sea.

Q. Mr. Belden has been secretary of Middle West Corporation for some years prior to going to the joint office at Wilmington, Delaware, hadn't he?

A. Well, he had been an officer of that company. I do not specifically recall what it was. He had been in the Chicago office for some years.

The court received in evidence testimony offered by defendant from the Official Report of Proceedings before the Securities and Exchange Commission, Docket No. 59-38, entitled "In the Matter of United Public Utilities Corporation et al.", being a record of evidence taken at Philadelphia, Pennsylvania, on May 15, 1942, before William W. Swift and on May 16, 1942, before Richard Townsend, Trial Examiners of the Securities and Exchange Commission, which testimony together with the page references to said Official Report are as follows:

(Page 389.)

Direct Examination,

By Mr. Scheetz:

Q. Mr. Sandstedt, what is your position with the Dakota Public Service Company and Knife River Coal Mining Company? A. Vice President and treasurer.

Q. Of both companies? A. Yes, sir.

Q. How long have you been in the employ of those companies? A. Approximately 13 years.

Q. And in what capacities?

A. For the past four years I have been vice-president and treasurer. Before that I was secretary and treasurer. During the entire period of my employment with those companies I have had a general knowledge of all of the operations and I functioned in the capacity of assistant general manager.

Q. At the present time what is the scope of your duties, besides your ordinary executive duties as vice-president and treasurer?

A. Well, I generally supervise all of the operations under the president.

Q. You are also an officer of Northwestern Public Service Company, are you not?

(Page 390):

A. Yes, sir. I hold that same office with Northwestern Public Service Company, the office of vice-president and treasurer.

Mr. Davis: May the record at this time show that the Northwestern Public Service Company is not part of the United Public Utilities Corporation system but is a subsidiary in the Middle West Utilities Corporation system.

Mr. Scheetz: That is correct.

The Witness: Yes, sir, that is correct.

By Mr. Scheetz:

Q. Now, I show you Respondents' Exhibit No. 57 and ask you to explain what that is and also how it was made up, and give the mileage scale which is now applicable to the map.

A. Exhibit 57 is a one-line diagram of the combined systems of the Dakota Public Service Company and Northwestern Public Service Company.

The exhibit shows a line extending from Gettsyburg in a northeasterly direction to Frederick. The territory north of that line is the territory served by Dakota Public Service Company. The territory south of that line is the territory served by Northwestern Public Service Company.

This exhibit is a photostatic copy of a one-line diagram that has been reduced to one-half size. Therefore, the scale of miles on the exhibit is incorrect and instead of one inch to 20 miles this exhibit should be corrected

(Page 391):

to one inch to 40 miles.

Mr. Scheetz: I will offer Respondents' Exhibit No. 57.

The Examiner: All right, let it come in.

(Respondent's Exhibit No. 57 was received in evidence.)

Notice of Appeal and Recital of Mailing of Copy to Counsel for Plaintiff 1979
Application of Appellant for an Order of Leave not to print certain exhibits, etc. 1980
Order of United States Court of Appeals granting Application of Appellant for leave to omit certain exhibits from printed record, etc. 1983

Mr. Scheetz: Now, Mr. Examiner, having introduced that map to show the electric system of the Dakota Public Service Company, I am going to digress to present testimony on the Knife River Coal Mining Company, which operates a coal mine at Beulah, North Dakota.

By Mr. Scheetz:

Q. Mr. Sandstedt, give briefly the history of the Knife River Coal Mining Company.

A. The Knife River Coal Mining Company was organized in 1922. At approximately the same time the power plant of the Dakota Public Service Company at Beulah was constructed. It is my understanding that the then owner of the Knife River Coal Mining Company and the Dakota Public Service Company, which was then the Hughes Electric Company, entered into the coal business for the principal purpose of supplying the power plant of Dakota Public Service Company with fuel.

Mr. Davis: I think the record might well show that there were two predecessor companies to the Dakota Public Service Company.

(Page 405):

Q. Will you proceed with your description.

A. Most of the capacity, generated capacity of the Dakota Public Service Company is located at the extreme north end of the system. The only reason for locating such a high percentage of the generating capacity at Beulah was the location of the mine in relationship to the power plant, and of course, that provides a very low cost of fuel.

By reason of this joint operation the mine has been free, entirely free of labor troubles that are generally associated with the mining industry. We have a very low labor turnover at the mine. in fact, it is lower than for the electric company.

The miners receive annual vacation with pay on exactly the same basis as the electric company employees. They receive group insurance.

(Page 412):

Q. I wanted to know the answer to such a question, we will let that stand.

Consider the situation where the mine was in the hands of foreigners.

A. Well, I don't think the arrangement would be nearly as satisfactory as it is at the present time. I think the owner of the mine would have the natural incentive to charge the Beulah plant as much as the traffic would bear, and I can't see any alternative except Beulah would have to pay the freight as long as it was under the cost of delivering coal from some other location which would be Zap, and possibly you would get your coal somewhat cheaper than it could be delivered from some other location, but there would be that to consider, and I also feel that the hazards of interruption would be greatly increased.

For that particular power plant, an uninterrupted supply of coal is absolutely essential because a high per centage of the generated capacity of the entire system is installed in that power plant and we don't have adequate storage capacity to protect the power plant in case of an interruption to the coal supply for any length of time.

(Page 432):

Q. Now, turn to joint stipulation, page 100. I direct your attention to the substantial increase in energy generated at the Bismarck plant in 1941 as compared with the amount generated in 1940. Will you please explain that increase?

A. In 1941 there was installed—in 1940 there was installed in the Bismarck plant a 4,000 kw turbo-generator unit. This unit went into service in the latter part of 1940 and for that reason there has been a substantial increase in the kilowatt hour output of that plant in 1941 as compared with 1940.

Q. Did the increased use of Bismarck have any effect on the Dickinson plant?

A. In 1940, the Dickinson plant, the Dickinson internal combusion engine plant, generated 580,000 kilowatt hours. In 1941 the generation at this plant was reduced to 204,000 kilowatt hours. The Bismarck plant is a more economical unit than is the Dickinson plant, and for this reason part of the load was transferred from Dickinson to Bismarck.

Q. Now, will you state whether the data set forth on Exhibit No. 62 is accurate?

A. Yes, the data set forth on Exhibit No. 62 is accurate.

Mr. Scheetz: I offer Exhibit No. 62 as supplemental to the information appearing in joint stipulation under the caption, "Generating plant" beginning on page 99.

The Examiner: Any objection?

Mr. Davis: No objection.

The Examiner: Without objection, the description of the property just identified by the witness will now come in as Respondent's Exhibit No. 62.

(Respondent's Exhibit No. 62 received in evidence.)

By Mr. Scheetz:

Q. Now, I show you a document captioned "Dakota

(Page 434):

Public Service Company," consisting of four pages, and designated Respondent's Exhibit 63. It may be noted that this exhibit carries in the upper righthand corner a reference to the corresponding page of the joint stipulation to which the data refers, and bears on material appearing in the joint stipulation, commencing with page 100 through page 106.

The classification of data in the joint stipulation on those pages falls into the divisions:

(1) Generating plants, beginning at the foot of page 99.

(2) Production and disposition of electric power, at the top of page 102.

(3) Power generated and interchanged, beginning at the foot of page 102.

(4) Relating to the material captioned, "Electric rates," beginning at the foot of page 104 and more particularly to the ratios of expense on page 106.

Now, turning to page 100 of the joint stipulation, will you explain the material on the corresponding page of Exhibit No. 63 which relates to the 1940 data set forth in the joint stipulation?

A. The exhibit shows the 1941 next kwh generated, cost of generation and the cost in mills per kilowatt hour in comparison with the year 1940. It will be noted that

(Page 435):

approximately 8,700,000 kilowatt hours were generated. The average cost per kilowatt hour was decreased from 6.23 mills in 1940 to 5.14 mills in 1941. The installation of the new turbo-generator in the Bismarck plant made possible this increased system generation at a lower cost per kilowatt hour.

Q. Will you turn to page 101 in the joint stipulation and explain the data on the corresponding page of Exhibit 63?

A. The tabulation on page 101 of the joint stipulation shows comparative generating costs for the Beulah plant, the Beulah and Bismarck plants of Dakota Public Service Company, the Aberdeen and Mitchell plants of Northwestern Public Service Company, and the Kidder and Washburne plants of the Otter Tail Power Company.

Page 101 of Exhibit No. 63 shows the 1941 statistics in comparison with 1940. It will be noted that the generation at the Beulah station has been slightly decreased while the generation at the Bismarck station has been approximately doubled.

I also wish to call your attention to the fact that no adjustment was made for steam sold in 1940, and no figures showing the average B. T. U. per kilowatt hour.

In 1941, this is just what has been made, and the average B. T. U. per kwh output has been decreased from 51,300 in 1940

(Page 436):

to 23,800 in 1941. Part of this decrease is due to the increased efficiency of the Bismarck station, but a substantial portion of the decrease is due to the different bases of comparison.

Q. Is there anything more you wish to add to your comments as to page 101?

A. I might add that the 1941 figures for Northwestern Public Service Company were obtained from the company's records and the 1941 figures for the Otter Tail Power Company were obtained from the records filed with the Public Service Commission of the State of North Dakota.

Q. Now, will you turn to page 102 and make a similar explanation of the material?

A. Page 102 of the joint stipulation shows kwh generated and interchanged energy received and the disposition of that energy for the year 1940.

Page 102 of Exhibit 63 shows comparative figures for the year 1941.

It will be noted that total generation has been increased approximately 8,700,000 kilowatt hours, while interchanged energy received has been decreased approximately 600,000 kilowatt hours, making an increase in the total kilowatt

(Page 437):

hours to be accounted for of approximately 8,000,000 kilowatt hours.

It will also be noted that energy transferred to Northwestern Public Service Company increased from approximately 7,000,000 kilowatt hours to 11,300,000 kilowatt hours.

The reason for this increase in transferred energy is due to the increased capacity in the Bismarck generating station.

Q. Now, will you explain page 103 of Exhibit 63?

A. I believe this exhibit speaks for itself. It merely shows the interchange of energy between Northwestern Public Service Company and Dakota Public Service Company, and the cost.

It will be noted, however, that there is a change in the firm capacity charge, from $12,685 in 1940, to $4,277 in 1941. This item is covered by the firm capacity and interchange agreement between the two companies, and that difference is due partially to the increase in generating capacity in the Bismarck plant, and partly due to the difference in the peak demands of the two systems in 1941 as compared with 1940.

Mr. Scheetz: Will you mark this Exhibit 64?

By Mr. Sheetz:

Q. Addressing your attention to page 103, you will

(Page 438):

note in the third whole paragraph the statement that under the agreement—referring to the interchange agreement

of 1940—each company provides effective generating capacity in the same ratio to its peak annual 30-minute demand.

Am I correct in my understanding that that contract has been changed and that 1941 it would be in the ratio to the peak annual 60-minute demand?

A. That is correct, yes. That contract was revised as of July 1, 1941.

Q. Now, I show you a document captioned "Northwestern Public Service Company, Dakota Public Service Company," dated July 1, 1941, and designated Respondent's Exhibit No. 64, and ask you whether that is the contract in effect for 1941 corresponding to the contract referred to on page 103 under joint stipulation for 1940?

A. That is correct.

Q. Before I ask you to explain the operation of that contract will you turn to page 106 of Exhibit 63, and explain that data in relation to the 1940 data on page 106 of the joint stipulation?

A. On page 106 of the joint stipulation the operating ratios for the various activities are shown for Dakota Public Service Company, Northwestern Public Service Company, and Otter Tail Power Company.

Page 106 of Exhibit 63 shows the 1941 ratios of operat-

(Page 441):

[——].

The Examiner: That is the annual average use, is it?

The Witness: That is the annual average use, yes, sir.

The Examiner: Well, why is it so low?

The Witness: Well, that development is low in comparison with Otter Tail, but considering the type of territory we serve and the fact that we have natural gas competition in most of our territory, we think that development is fairly good, and taking those facts into consideration our development is probably just as good as Otter Tail's.

By Mr. Sheetz:

Q. Is the eastern end of North Dakota a richer farming territory than your territory?

A. The east part of the State of North Dakota—and Otter Tail's territory is in that section of the state—is located in the Red River Valley, and while they have been affected by drought during the past eight or ten years, to some extent they have not been nearly as seriously affected as the territory served by Dakota Public Service Company, which is further west.

Q. Will you refer again to Exhibit 63 and state whether the information set forth in that exhibit is accurate, subject to the right of Commission counsel to verify data taken for the Otter Tail Power Company?

A. The 1941 figures on this statement were prepared by me personally, and to the best of my knowledge and belief

(Page 442):

they are correct. For Dakota Public Service Company and Northwestern Public Service Company these figures were taken from the company's records, and for Otter Tail Power Company these figures were taken from records on file with the Public Service Commission of North Dakota.

Mr. Scheetz: I offer therefore supplemental to the Joint Stipulation Exhibit No. 63, subject to the right of verification already mentioned, and also the respondents' Exhibit No. 64.

The Examiner: Any objection?

Mr. Davis: No objection.

The Examiner: The four sheets heretofore identified as Respondents' Exhibit 63 will now come in as Respondents' Exhibit No. 63 and the copy of the interchange agreement will come in as 64.

(Respondents' Exhibits 63 and 64 received in evidence.)

By Mr. Scheetz:

Q. Now, will you describe the operation of the electric system of the Dakota Company, and the Northwestern Company in combination under the contract introduced as Exhibit No. 64?

The Examiner: What is the difference, first, between the 30-minute peak and the 60-minute peak? When does the

30-minute peak occur. When did it [accur] for the year 1941,

(Page 443):

and when did the 60-minute peak occur?

The Witness: The reason for the change, Mr. Examiner, was due to the fact that we could not accurately determine the 30-minute peak for the two systems, and it was necessary to locate employees at various points of interchange and we had to guess as to the day and the hour when that peak might occur, and as a result we often missed the boat. However, in our power plants, we do measure the 60-minute peaks, and it is a matter of record on our log sheets, and as long as the characteristics of the two systems are the same, the same type of territory and approximately the same kind of town, it was considered fair to both companies to change to the 60-minute basis.

The Examiner: Does the 60-minute peak occur on the same day for both companies?

The Witness: We didn't try to determine the date that the 30-minute peak occurred last year; however, the 60-minute peak occurred on December 15 between the hours of five and six p. m., and that became the basis of billing under this contract for the year 1942.

The Examiner: And December 15, the peak was on the system at the same time, between 5 and 6 p. m.?

The Witness: No, that December 15 date was the peak hour—strike that, please.

On December 15, between 5 and 6 p. m., the peak for the

(Page 444):

combined systems.

The Examiner: The joint systems?

The Witness: The joint systems.

The Examiner: The system peak?

The Witness: The system peak.

The Examiner: You don't have any diversity of any magnitude between the two systems?

The Witness: Well, there probably is some diversity, yes, because the diversity between the two systems is one of the things that makes it economical and feasible to operate the systems, the two systems as a joint system, but for the purpose of billing under the contract, I don't think diversity would be any factor.

By Mr. Scheetz:

Q. Has this agreement, Exhibit No. 64, been filed with the Federal Power Commission?

A. Yes, that agreement was filed with the Federal Power Commission, and it has been approved by the Commission as a rate schedule.

Q. Will you proceed to describe the operations?

A. The systems of Dakota and Northwestern are connected at three points. They have been operated as an interconnected system since 1930. The interconnection facilities consist of a line from Highmore to Gettysburg, approximately 62 miles, 38 kv line from Aberdeen to

(Page 445):

Ipswich, a distance of approximately 28½ miles, a 38 kv line from Aberdeen to Barnard, a distance of 20 miles, with substations and switching facilities at Aberdeen and substation and switching facilities at Gettysburg.

The total investment in these facilities was approximately $303,000, and the entire investment was made by Northwestern Public Service Company. Under the agreement it was assumed that one-half of that investment, or $151,724, is chargeable to Dakota, and the contract provides that Dakota will pay Northwestern $20,000 a year and that is payable on a monthly basis, $1,666.66 per month starting January 1, 1936.

Prior to January 1, 1936 there was no written agreement in effect, and therefore this charge started as of that date. This monthly payment of $20,000 covers—I mean this annual payment of $20,000 covers maintenance, operation and taxes at the rate of 3½ per cent of Dakota's portion of the investment, and also interest at the rate of 5 per cent. The balance of the $20,000 under the present contract applies against the amortization of the principal, and on this basis the entire principal will be amortized in July 1950.

After that date, the monthly charge will be reduced to $442.53 which covers one-half of the operation, maintenance and tax item. I might add at this point that the

(Page 446):

contract that was in effect prior to July 1, 1941, provided the same annual charge of $20,000, but there wasn't any termination date provided and no portion of that item applied against the amortization of the principal.

We feel that this agreement is advantageous to both companies.

The Examiner: You are speaking for both companies, are you, I mean you are vice president of both?

The Witness: I am vice president of both companies, yes.

Mr. Davis: Mr. Examiner, it was pointed out this morning before you came that these two companies are not associated companies, and this gentleman is vice president of both companies.

The Examiner: They don't have a common parent then?

The Witness: No, Northwestern Public Service Company is a subsidiary of Middle West Utilities, and Dakota Public Service Company is a subsidiary of United Public Utilities Corporation.

Mr. Davis: Could you have arms' length bargaining under those circumstances?

Mr. Scheetz: I will ask him all those questions in due course, Mr. Davis. He is now describing the operations.

The Witness: We feel that this agreement, and this method of operation is advantageous to both companies. The Dakota Company has a power plant at the mouth of the

(Page 447):

mine which is owned by Knife River Coal Mining Company, and for that reason fuel costs are comparatively low. On the other hand, Northwestern Public Service Company's fuel costs are quite high. This interconnection

makes it possible for the Dakota Company to operate that plant at a high capacity, or a high load factor. It is normally operated at approximately 85 per cent of its capacity on an annual basis.

The fuel costs at the Beulah station are approximately 2.2 mills per kilowatt hour, and this energy is sold to Northwestern at 5 mills per kilowatt hour. There is considerable profit in that transaction to the Dakota Company and the 5 mill rate makes it practicable and profitable for the Northwestern Company to buy that energy.

I might add that the flow of energy from Dakota to Northwestern is on an off-peak basis. I mean by that that during off-peak hours this Beulah station is operated at a high load factor and the energy is transferred to Northwestern.

Mr. Davis: Not firm power?

The Witness: No, that is dump power. On the other hand, Dakota has very little reserve capacity, and during peak periods, the movement of energy is from Northwestern into Dakota; however, the rate is still 5 mills per kilowatt hour.

(Page 448):

Mr. Davis: In other words you buy firm power from Northwestern, Northwestern only buys dump power from Dakota.

The Witness: Well, the combined systems are operated as a single system, and the generation is at the most economical plant regardless of ownership. This 5 mill rate was adopted after a careful study as a means of allocating the savings to both of the companies and in times of emergency the flow of energy might be from Dakota to Northwestern, but it is normally the other way, from Northwestern to Dakota during peak periods, but the contract doesn't provide—it just provides a single rate, whether it is firm power or dump power.

Ordinarily the energy transferred from Dakota to Northwestern we consider dump power, and the energy transferred from Northwestern to Dakota would be considered firm power because it is usually over the peak.

The Examiner: The power that Northwestern generates and that you buy, do they get their increment cost of that?

The Witness: Yes, they get considerably more than their increment cost out of that power. The increment cost would be approximately the fuel cost, or 2.2 mills per kilowatt hour. Of course, there would be the line losses to consider, but even after taking those line losses into consideration they would not.

The Examiner: (Interrupting) The Northwestern fuel

(Page 449):

costs are as low as 2.2?

The Witness: The fuel costs in Dakota's Beulah plant are 2.2 mills per kilowatt hour.

The Examiner: And what were the fuel costs of Northwestern?

The Witness: Well, they will vary by plants. The fuel costs would be approximately 6 mills per kilowatt hour.

By Mr. Scheetz:

Q. Mr. Sandstedt, this contract is also a capacity contract, as I understand it, and I wish you would elaborate on the feature of pooling of reserves afforded by the contract. A. I will do that.

In addition to providing an interchange of energy between the two companies, this contract also provides for pooling the generating capacity. By reason of this arrangement, less reserve capacity is required for the combined system than would be the case if each of the companies were operated independently and they pro ded their own reserves.

I might explain that by stating that it is normally assumed that a company requires reserve capacity equivalent to the largest unit. In other words, if the largest unit on the system is out of service, provision must be made to take care of operations during that period.

(Page 450):

Dakota Public Service Company have 13,955 kilowatts of effective capacity. Their system peak for the year 1941

was 12,850 kilowatts. Their largest unit is a 3,500 kilowatt generating unit in the Beulah plant, so it can be seen that if it was not for this interchange agreement Dakota would not have sufficient reserve capacity to carry the system in the event of emergency.

Another big advantage to Dakota is due to the fact that most of Dakota's generating capacity is located at the extreme north end of their system. The points of interconnection with Northwestern Public Service Company are at the extreme south end of their system.

The Examiner: A distance of how far, would you say?

The Witness: The distance from Beulah to Aberdeen is approximately 280 miles.

Now, if Dakota Public Service Company operated independently it would be necessary for them to install some generating capacity in the south end of their system, and of course, by doing that their generating costs would be substantially increased because that is a considerable distance from any fuel supply.

By Mr. Scheetz:

Q. Mr. Sandstedt, were not you in error when you said that the largest unit of the Dakota system was 3,500?

A. I was in error. The largest unit is a 4,000 kw

(Page 451):

unit at Bismarck. That is a new unit that was just installed last year.

The largest unit on Northwestern's system is a 5,000 kilowatt unit, and if Northwestern did not have an interchange agreement it would be necessary for them to carry at least that much reserve capacity and possibly more.

By Mr. Davis:

Q. You mean the difference, that is, 1,000?

Mr. Scheetz: No.

The Witness: No. You would have to provide enough reserve to carry the system in case the largest unit of 5,000 kw was out of service, so you would have to provide a minimum of 5,000 kilowatts of reserve capacity.

However, by operating the two systems as a single interconnected system, the 5,000 kilowatt reserve would take care of both systems. If they were operated independently on that basis, 9,000 kilowatts would be required.

By Mr. Scheetz:

Q. Mr. Sandstedt, can you translate that into the cost per kilowatt of installed capacity?

Mr. Davis: You mean the necessary reserve?

Mr. Scheetz: No; the additional investment necessary to carry that reserve capacity.

The Witness: Well, if Dakota were operated independently, a minimum additional capacity of 3,000 kilowatts

(Page 452):

would be required.

Mr. Davis: How many?

The Witness: A minimum of 3,000, and that additional capacity would have to be located at the south end of the system. The investment would probably be in the neighborhood of $150 to $170 per kilowatt. I would estimate the investment to be approximately $500,000.

Mr. Scheetz: Mr. Reporter, will you please mark these Exhibits 65 and 66.

(The documents referred to were marked as Respondents' Exhibits 65 and 66 for identification.)

By Mr. Scheetz:

Q. Mr. Sandstedt, briefly, what is your basis for the estimate you just gave? Have you had any recent experience with that very question?

A. Well, yes. We recently installed a 4,000 kilowatt unit with boiler equipment in Bismarck. The installation cost was something in excess of $150 per kilowatt. Our average for the entire system is in excess of $150 per kilowatt.

By Mr. Davis:

Q. Who installed that for you?

(Page 453):

A. Sargent & Lundy, of Chicago.

By Mr. Scheetz:

Q. In your opinion, would that additional investment on the Dakota system be able to earn a return, and if so, what would be your estimate?

A. No, sir. In my opinion, the return would be less than it is at the present time for the reason that regardless of the efficiency of that unit the costs would not compare with the present costs at the Beulah plant, and in order to protect service it would be necessary to generate a considerable proportion of the energy in that plant that is now generated in the Beulah plant.

Q. I show you an exhibit captioned, "Dakota Company, hourly generation by plants and hourly flow of power between Dakota Company and Northwestern Company on a typical day in 1941", designated Exhibit No. 65. and also a graph captioned, "Annual production costs, net kwh output, Dakota Public Service Company", designated Exhibit No. 66.

Will you take those two exhibits and explain what they are and make such comments as you have to make?

A. Exhibit No. 65 was prepared from our log sheets to show the movement of energy between the Dakota Company and Northwestern on a typical day.

On the day in question, 30,900 kilowatt hours were transferred from Dakota to Northwestern and 700 kilowatt

(Page 454):

hours were transferred from Northwestern to Dakota.

The flow varied from 2,300 kilowatt hours, from 2:00 to 3:00 p. m., from Dakota to Northwestern, to 200 kilowatt hours from Northwestern to Dakota between the hours of 5:00 and 6:00.

Mr. Scheetz: I offer Respondents' Exhibit No. 65.

The Examiner: Any objection?

Mr. Davis: No objection.

The Examiner: The tabulation for the typical day will come in as Respondents' Exhibit 65.

(Respondents' Exhibit 65 was received in evidence).

Mr. Davis: May I ask a couple of questions here, or would you rather wait until we are finished?

Mr. Scheetz: Well, I guess we are almost through with this part of it. However, if you have got something you want to ask on this, go ahead.

Mr. Davis Yes, I have a question or two on this Exhibit 65.

By Mr. Davis:

Q. This Exhibit 65, if I understand it correctly, would indicate that for only three hours on this typical day did the Dakota system receive energy from the Northwestern sy m is that right?

A. Yes, sir, that is correct.

(Page 455):

Q. When you say "a typical day in 1941," does that mean typical throughout the year?

A. Well, we tried to pick a day when conditions were normal. There wasn't any equipment out of service on either system, and there weren't any lines out of service.

Q. Would you say this represents a flow chart that would be fair to both companies?

A. Yes, that was our intention to, in making up that chart, pick a day when no unusual conditions existed.

Q. And if I understand this flow chart correctly, it would seem to me that if anything, the Northwestern system is relying on you much more than you are relying on them for power?

The Examiner: Let's get that. What was your highest intake from Northwestern on any day in 1941?

Mr. Davis: He hasn't got it on any day. He says this is a typical normal day, and he has got it here that three hundred was the highest at any particular hour, 300 kilowatts, so if you look at this typical day flow chart, it would seem that whereas Dakota sends into the North-

western system 2,300 kilowatts as a maximum for any one day—

The Witness: One hour.

Mr. Davis: One hour, the maximum of any one hour you receive from Northwestern is only 300 kilowatts.

The Witness: That is true. As I previously

(Page 456):

stated, we operate both systems as a single integrated system, and the most efficient power plants are operated that way. Dakota Public Service Company does have a deficiency in generating capacity.

Mr. Davis: But you go on with that. Let's look at this contract which is Exhibit No. 64. Now, some place in here you provide for this capacity charge where Dakota is paying Northwestern a capacity charge of a certain figure for firm power.

For the year 1942, that charge will be $17,199.70.

The Witness: That is correct.

Mr. Davis: All right. In the year 1941, it was $12,685.

The Witness: I believe that is correct, yes.

Mr. Davis: All right. And yet it seems from your flow charts that the advantage of anything is all with Northwestern Public Service.

The Witness: I don't see how you—

Mr. Davis: (Interrupting) They rely on you for much more power—I can't use the word "you" because he is sitting on both sides of the table when he buys and sells power.

Now, isn't the advantage all with the Northwestern system in so far as this interchange contract is concerned, when Dakota agrees to pay Northwestern a firm charge and yet

(Page 457):

your flow chart indicates, if anything, Northwestern relies more strongly on Dakota than Dakota relies on Northwestern?

The Witness: That is not true. You have drawn an entirely wrong conclusion from that chart. If you will notice that the flow of energy during off-peak periods, the flow was from Dakota to Northwestern, while during the peak periods of the day the flow was from Northwestern to Dakota; in other words, Northwestern Public Service Company carried part of Dakota's peak on that typical day.

Mr. Davis: Let's look at the chart for a minute.

Mr. Scheetz: Let him [furnish] the answer. He can not answer that question in a minute. He has answered it already in his direct examination, and he will answer it again.

The Witness: This contract provides that the two systems will pool their generating capacity and the company with the deficiency of generating equipment will pay the company with an excess of generating equipment a firm capacity charge of $13.20 a year per kilowatt.

For the year 1941 Dakota Public Service Company had a deficiency of 1,303 kilowatts and paid Northwestern a charge of $17,199.60, but that charge has nothing whatever to do with the energy charge of 5 mills per kilowatt hour.

As I stated two or three times, the two systems are operated as a single system, and it is economical for

(Page 458):

Northwestern Public Service Company to buy energy from Dakota at 5 mills per kilowatt hour and it is economical for Dakota to sell energy to Northwestern for 5 mills per kilowatt hour; in other words, on that basis there is a profit to both parties; however, it isn't economical for Northwestern to sell energy to Dakota for 5 mills because their fuel costs are more than 5 mills.

Mr. Davis: Neverthless, doesn't the contract provide for some adjustments in the light of experience, the experience record of interchange regardless of the demand available if the two systems are operated as one system, and if you are attempting to work out a very equitable basis for your interchange agreement, there should be some basis for adjustment on the experience records?

The Witness: We never thought it was necessary to make any adjustment on an experience basis for this reason: In order to operate under this contract it is necessary to have free interchange of energy. Northwestern Public Service Company can't take energy from Dakota if the cost was more than their fuel cost in their own plants.

Mr. Davis: You have already told us that the two systems were operated as one, that that had been your basic premise.

The Witness: That's right, as far as these power plants and transmissions lines are concerned.

(Page 459):

Mr. Davis: Let us assume that the two systems were owned by one company. There wouldn't be any provision for a demand charge between the divisions, would there?

The Witness: It wouldn't be necessary if it was owned by one company.

Mr. Davis: All right, if they are operated by one division, why should there be any difference? Why should there be any difference?

The Witness: That happens to be two corporations.

Mr. Scheetz: Wait a minute.

Mr. Davis: Let me ask one more question. I wish you wouldn't interrupt me. I want to get something down in the record. You said you were finished with this phase of it. Mr. Examiner, I submit it is my privilege to cross examine at this point.

Mr. Scheetz: Mr. Examiner, first of all, this is still direct examination and it is true I have invited Mr. Davis to ask questions as he will. The reason I want to object to this question, or at least I want to hear it, is because I think it makes an assumption which is not appropriate to the facts.

The Examiner: Let him start over again.

Mr. Davis: Who negotiated this contract, Exhibit No. 64?

The Witness: This contract was negotiated by

(Page 460):

Northwestern Public Service Company and Dakota Public Service Company.

Mr. Davis: All right, let's get down to parties—who were the people negotiating?

The Witness: However, before this contract was signed, it was submitted to the directors of United Public Utilities Corporation and the directors of Middle West Utilities Company.

Mr. Davis: All right, I am still asking you, who were the persons, the principal living persons who negotiated the contract. I see it is signed by Mr. Sanborn as president of Northwestern Public Service Company and yourself as vice president.

The Witness: That is correct. It would be necessary for officers of a company to sign such contract.

Mr. Davis: Of course. Will you tell me, then, the same two men, the living persons who negotiated the contract?

The Witness: Mr. Sanborn and myself, of course were involved in the negotiation of this contract.

Mr. Davis: What do you mean "involved"? Actually you two men negotiated the contract between yourselves?

The Witness: That was a matter of negotiation between ourselves and between the officers and directors of the Middle West Utility Company representing the stockholders of that company, and between the officers and directors of

(Page 461):

the United Public Utilities Corporation representing that company.

Mr. Davis: All right. Now, who were the attorneys that drafted the contract, attorneys for Middle West Service Company, weren't they? They are your common service company?

The Examiner: Wait just a minute now. You have given him a question.

Mr. Scheetz: You are so eager to prove they have got a common directorship. I would like to make a statement at this point.

The Examiner: Just a minute. There are two questions to the witness. Let the witness answer them.

Mr. Scheetz: I plan to cover this whole subject when we get to it.

The Examiner: We are in it now, I guess. Would you like to have those two questions, Mr. Witness?

(The question was read.)

The Witness: Well, the contract was drawn up in rough form by Mr. Sanborn and myself. After several discussions with Mr. White, the president of United Public Utilities Corporation, and Mr. Buell of Middle West Service Company was also in the negotiations of this contract.

Mr. Davis: Who?

The Witness: Mr. Buell.

Mr. Davis: Who is he?

(Page 462):

The Witness: The engineer with the Middle West Service Company.

Mr. Davis: Service Company?

The Witness: Yes. And the contract as to legal form was checked first by our company attorneys, and I believe it was checked by the legal department of the Middle West Service Company representing the Middle West Utilities Corporation, and I believe it was also checked, I know it was checked by Mr. White, and I believe it was checked by Mr. Scheetz.

Mr. Scheetz: That is entirely correct.

Mr. Davis: Has the Federal Power Commission a proceeding pending regarding the question of interlocking relations between the two companies?

The Witness: Not that I am aware of, no.

Mr. Davis: Have you received any information which would put you on notice that an inquiry on that score is being made?

The Witness: No, sir, I haven't seen any information to that effect.

Mr. Davis: Has the Federal Power Commission ever questioned the arrangement of interlocking officers between the two companies?

The Witness: They have never questioned me, no.

Mr. Davis: Have they ever questioned anyone to your

(Page 463):

knowledge in the two systems?

The Witness: Not to my knowledge.

The Examiner: Will you tell the Examiner why this was not a direct interchange of power on an increment cost, or on a savings of increment cost of the two companies?

The Witness: Well, that is the basis of the contract, on the basis of savings to the two companies. That 5 mill rate was not grabbed out of the air. That 5 mill rate was adopted after a careful study.

The Examiner: You told us about the increment cost at Beulah, the fuel cost, 2.2 mills.

The Witness: Yes.

The Examiner: What was the increment cost of power generated by the Northwestern?

The Witness: About 6 mills.

The Examiner: About 6 mills?

The Witness: Yes. It is economically feasible for Northwestern to buy power at 5 mills rather than generate at a fuel cost of 6 mills.

The Examiner: Exactly.

The Witness: And it is economically feasible for Dakota Public Service Company to sell power to Northwestern for

5 mills that they generate at 2.2 mills. There is a profit for both companies, and the whole purpose of this contract was to distribute the benefits on an equitable

(Page 464):

basis.

The Examiner: For instance.

The Witness: They used their best judgment in drawing the contract on that basis.

The Examiner: Are you familiar with the Ring interchange agreement?

The Witness: No, sir, I am not.

The Examiner: That was on a straight increment cost. Would not an interchange agreement based on straight increment cost rather than on any demand charge or capacity such as you have in this contract be fair for both companies?

The Witness: Well, we do not think so because as far as capacity is concerned it is necessary to install capacity in quite large blocks. At times the system might be in balance and at other times one company will have more capacity than the other company, and the whole purpose of this contract was to make a savings for the two companies and the contract was drawn on the basis of allocating that savings on an equitable basis between the two companies.

The Examiner: I cannot quite follow you, inasmuch as you have testified there was no diversity between the two companies.

The Witness: I did not testify there was no diversity. I said there was a diversity between the two companies.

The Examiner: Well, I did not understand.

The Witness: And that was one of the reasons that made it feasible and practical to operate the two systems as a joint system, in order to take full advantage of that diversity.

However, I cannot see that the diversity has any effect on either the capacity charge or the energy charge under

the contract because both companies will benefit by utilizing that diversity factor.

The Examiner: Now will you state for the record just why you think a capacity charge is fair and reasonable to both companies.

The Witness: Well, I would be glad to do that. I think the easiest and clearest way to state that is to give our 1941 figures, which will be the basis of billing in the year 1942.

The installed generating capacity at December 31—and this is effective capacity—for Northwestern Public Service Company was 20,290 kilowatts. For the Dakota Company it was 13,955 kilowatts. The total for the system was 34,245 kilowatts.

The maximum demand for the year 1941 was 15,990 kilowatts for Northwestern, and 12,850 kilowatts for Dakota. The combined demand was 28,840 kilowatts. The difference

(Page 466):

between the demand and the installed capacity is the reserve of each system. Northwestern had 4,300 kilowatts reserve; Dakota had 1,105 kilowatts reserve. The combined reserve for the two systems was 5,405 kilowatts. That reserve is 18.741 per cent.

Now, the assumption is that if the combined systems need that reserve of 18.74 per cent, that each company should provide their proportion of that reserve. Northwestern Public Service Company had a reserve of 26.89 per cent. In other words, they had quite a high reserve. The Dakota Company had a reserve of 8.6 per cent. The required reserve for Northwestern would be 18.74 per cent, which is the actual reserve for the system. On that basis, Northwestern [have] an excess of 1,303 kilowatts. They have provided 1,303 kilowatts more than their share of the reserve.

Well, if Northwestern provides 1,303 kilowatts more than their share, Dakota would have a deficiency of 1,303 kilowatts. Therefore, Dakota pays Northwestern a firm capacity charge of $13.20 per kilowatt per year, which is our estimate of the carrying charges.

The Examiner: You mean $10 a year per kilowatt; is that it?

The Witness: $13.20 per year per kilowatt of reserve.

(Page 467):

The Examiner: I see.

The Witness: That happens to be the situation at this time.

However, if Dakota installed more capacity or, on the other hand, if their peak demand decreased, their picture would change. The contract provides that that charge be changed each year and it be based on actual conditions existing. In other words, it is based on the installed capacity and the demand of each system.

Does that explain it satisfactorily?

By Mr. Davis:

Q. But still and all, the contract does not provide for any adjustment for actual use by each system, actual delivery of power by each system?

A. Yes, at the rate of 5 mills per kilowatt hour. The system that delivers energy to the other system receives 5 mills per kilowatt hour for that energy, but that is entirely separate from the firm capacity charge.

Q. For the year 1941 I observe that Dakota delivered 11,314,400 kwh to the Northwestern system?

A. That is true.

Q. While Dakota received only 1,380,684 kilowatts from the Northwestern system?

A. Yes. We try to operate the Beulah station at maximum capacity because it is profitable for Dakota to

(Page 468):

generate the maximum in that station and to transfer any excess over their own requirements to Northwestern Public Service Company at 5 mills per kilowatt hour. That is a profitable arrangement for Dakota.

Q. Was not any consideration given to adjusting that capacity or demand charge in the light of the experience record as to the amount of energy delivered or received?

A. Well, the amount of kilowatt hours received has nothing to do with the reserve capacity requirements of

each party. The energy transferred is an entirely different proposition.

Q. Is that open to question or is that a very settled scientific principal?

The Witness: I do not think I would attempt to answer that question.

By Mr. Davis:

Q. Well, when you enter into a contract of this kind you must have some idea as to what is done in other similar situations throughout the country or throughout the industry?

(Page 469):

A. We are familiar with some power contracts, but I think in operating under a contract of this kind and under this kind of arrangement there are so many problems that are not common to any other contract or any other system—

Q. (Interposing) Well, power pools are a common thing throughout the country, are they not?

A. That is probably true, and the power pools that you have in mind are probably cases between larger companies or companies with approximately the same power costs. Here, however, is a case where the cost of generation is entirely different. Dakota has lower power costs; Northwestern was high costs, and this contract was designed to operate the combined systems at the maximum efficiency and to allocate any savings in that kind of operation equitably between the two parties.

The Examiner: Let me ask you there: Do you have one load dispatcher?

The Witness: We have two load dispatchers.

The Examiner: You mean each company has a load dispatcher?

The Witness: No, sir. There is one load dispatcher; that is, there is a common load dispatcher for both systems who takes care of the combined system.

The Examiner: Is there one fellow that says, Beulah is going to shut down now and tells somebody down at—

(Page 470):

Mr. Davis: (Interposing) Aberdeen.

The Examiner: (Continuing) Aberdeen to come in?

The Witness: Yes, sir.

The Examiner: And who is that man?

The Witness: Well, he is a joint employee.

The Examiner: Paid by both companies?

The Witness: Yes, he is paid by both companies.

The Examiner: And where is he located?

The Witness: He is located at Aberdeen, which is the point of interchange. He does the dispatching for the entire system.

The Examiner: He is the man who can say, "Aberdeen come in and Beulah shut down"?

The Witness: Yes, sir.

The Examiner: And does he figure the increment costs at all?

The Witness: No, sir.

The Examiner: He does not do that?

The Witness: No.

The Examiner: In other words, he is bound by the contract?

The Witness: He is bound by the contract, although he is familiar with the contract and he is familiar with the operating costs of each power plant and he is instructed to operate the most efficient power plants regardless of

(Page 471):

ownership, taking into consideration protection to service. Sometimes it is necessary to operate inefficient plants in order to protect the service, but the load dispatcher usually will operate the most efficient power plants and operate them at maximum capacity regardless of ownership.

By Mr. Davis:

Q. How much salary are you paid by Northwestern Public Service Company?

A. Well, that depends on the gross revenues. My salary is allocated on the basis of gross revenue and that would fluctuate depending on the company's gross revenues.

Q. What percentage of your salary is received from Northwestern Public Service Company?

A. Well, I can give it to you for last year.

Q. All right, and similarly the percentage received from the Dakota Public Service Company.

The Examiner: Do you object?

Mr. Scheetz: Yes, sir.

The Examiner: I will sustain the objection.

Mr. Davis: Do I have an opportunity to be heard?

The Examiner: You will have plenty of opportunity to cross examine the witness, but not to be heard on this point.

All right, proceed, Mr. Scheetz:

(Page 472):

Mr. Scheetz: I think Exhibit 65 had been received.

The Examiner: Yes, Exhibits 65 and 66 were received in evidence.

The Examiner: Very well.

By Mr. Scheetz:

Q. Now, Mr. Sandstedt, will you explain Exhibit 66?

A. Exhibit 66 is a chart showing the kilowatt hours generated, the total production costs, fuel costs, power plant labor costs, power plant maintenance, and miscellaneous power plant expenses for the Dakota Company for the period 1931 to 1941, inclusive.

That chart shows that the generation of that plant has increased from approximately 30,000,000 kilowatt hours in 1931 to 60,000,000 kilowatt hours in 1941. The total production cost per kilowatt hour has decreased from approximately 8 mills to approximately 5 mills per kilowatt hour in 1931 to 1941. Fuel costs have decreased from 4½ mills to 3.8 mills during this period.

One of the principal reasons for the decrease in cost of power for the Dakota Company is the operation under this joint agreement. In other words, the Beulah plant operates at a high percentage of its capacity and is a low cost plant and that reduces the system power costs substantially.

(Page 473):

The interconnection with Northwestern Public Service Company at the south end of Dakota's system makes it unnecessary for Dakota to operate inefficient and high cost equipment, except in emergencies.

Of course, if you have a sleet storm you will operate any of your equipment, but if it was not for this interconnection the Dakota Company would have to operate some of their higher cost equipment a greater percentage of time and their total power costs would be increased by reason of that.

Q. Are you able to vouch for the accuracy of the data set forth on Exhibit 66? A. I am, yes

Mr. Scheetz: I offer Respondents' Exhibit No. 66.

The Examiner: Any objection? (No response.)

Without objection, the chart will now come in as Respondent's Exhibit No. 66.

(Respondents' Exhibit No. 66 was received in evidence).

By Mr. Scheetz:

Q. Mr. Sandstedt, will you turn to page 107 of the Joint Stipulation and address your attention to the material captioned "Steam heating". The Dakota Company is in the business of furnishing steam heating to customers in that territory?

(Page 475):

Mr. Scheetz: Mr. Davis and I have gotten along very well as long as we have kept our examination to the topic under consideration, but he is a little over anxious on this question of interlocking arrangements.

The Examiner: I take it that the new Examiner coming in has not caused all the strife?

Mr. Scheetz: No, I do not think so, but we have not had the same over-anxiousness in the previous testimony.

Mr. Davis: The occasion has not presented itself.

The Examiner: Supposing you go ahead and cross-examine him with reference to power, Mr. Davis.

Mr. Davis: All right.

By Mr. Davis:

Q. Now, earlier in your direct testimony you mentioned something about a contract providing for the payment of $202,000 a year. What was that in regard to, again, to refresh my memory?

A. Well, that is the contract that is on file as an exhibit. What is the exhibit number of that?

Mr. Appel: 64.

By Mr. Davis:

Q. Oh, yes, it concerns this line [what] was built between Gettysburg and—what is the other end of that line?

(Page 476):

A. Highmore. That is covered under Article 5, Section 3, of the agreement.

Q. All right.

Now, I believe you testified that Northwestern Public Service Company constructed the line.

A. That is true, the line and all of the interconnection facilities.

Q. When you say they constructed, you mean they paid for the construction?

A. They paid the cost of all of the interconnection facilities. That line was constructed back in 1931.

Q. All right.

Now, what is the basis, again, for the payment by Dakota for the use of those facilities?

A. Well, Dakota paid Northwestern $20,000 a year. The basis of that is 5 per cent interest on the unpaid portion of Dakota's share of the investment—

Q. (Interposing) What was the total investment, first?

A. $303,449.26.

Q. All right. Will you go on from there, Mr. Sandstedt?

A. Well, it was assumed that Dakota's portion of that investment was $151,724.63.

Q. You mean exactly 50 per cent?

(Page 477):

A. Exactly 50 per cent.

Q. Why was it computed to be exactly 50 per cent?

A. Well, it was assumed that the benefits to the two companies were equal and both companies should pay their proportionate share of the cost of the interchange facilities.

Q. Regardless of which company receives more power from the other?

A. Well, that does not have anything to do with it, I do not think, as far as the number of kilowatt hours received from one company to another is concerned.

This contract, as I previously stated a number of times, was to provide an efficient and economical operating arrangement for both companies.

Q. So the whole thing could operate as one system?

A. From a power pool standpoint, yes.

Q. All right. So the Dakota Company is to share the cost 50-50? A. Yes.

Q. All right.

Now let us hear what the $20,000 a year is for.

A. The $20,000 a year that Dakota pays Northwestern includes maintenance, operation, and taxes, on that line and that is computed at the rate of 3-1/2 per cent per annum and interest at 5 per cent per annum. That interest is computed on the unpaid balance, and that was worked out on

(Page 478):

amortization basis. The balance of the $20,000 that is not required for interest, maintenance, operation, and taxes, goes against the amortization of the investment, and in working that out on an amortization basis the investment is decreased each month; therefore the amount of the interest is decreased each month and that investment is completely amortized in July, 1950. Thereafter, the Dakota Company will pay Northwestern only the operation, maintenance, and tax, charges.

Q. The 3-1/2 per cent? A. The 3-1/2 per cent.

(Page 479):

Q. Three and a half per cent computed on half of the total investment, $150,000? A. Yes.

Q. Now, then, about operating expenses. Did the Northwestern Public Service pay all the operating expenses on the line?

A. Yes, sir, that is correct. Northwestern Public Service Company paid all operating expenses, taxes, and takes care of all maintenance costs.

Q. Has there ever been an attempt to compute how close that three and a half per cent comes to the actual expenses for those various items I have mentioned, maintenance, taxes, and so forth?

A. That three and a half per cent was based on our actual operating expense. It was not subject to revision in the contract at the time that charge was fixed. It approximated the actual operating expenses for this kind of investment on a mileage basis, and considering the amount of the investment on the sub-station; in other words, a study was made at that time to determine the approximate operating cost.

Q. I would like you still to answer my question—has any attempt ever been made since the date the contract was entered into to find out how close the three and a half per cent charge is to the actual cost by the Northwestern

(Page 480):

Public Service of maintaining that line.

A. I don't recall that this study had been made, although it might have been.

Q. You never thought of attempting to make it?

Mr. Scheetz: This contract was dated July 1, 1941, and the year hasn't run yet.

Mr. Davis: The same contract has been in effect since 1930 or '31?

The Witness: No, the original contract, up until last year, the contract did not provide amortization of the investment. It merely provided a flat $20,000 per year charge to cover fixed charges, operating expenses, taxes, and all items, but in negotiating this new contract it was con-

sidered equitable to amortize that investment. In other words, instead of letting it run forever, to amortize it on some sort of a basis, and this new contract was—that basis was made retroactive to the date of the original contract which was January 1, 1936, and I might add right there that prior to January 1, 1936, Dakota Public Service Company did not pay any of the cost, interest, operating charges, or anything else on this line.

By Mr. Davis:

Q. Well, what was the date the line went into operation? A. 1930.

(Page 481):

Q. Well, between 1930 and 1936, Dakota Public Service Company had a free ride? A. That is right.

Q. How come Northwestern was so magnanimous with their facilities?

A. Well, Northwestern Public Service Company entered into this thing under the assumption a contract would be negotiated, and in those days there wasn't as much thought paid to matters of that kind as now is the case.

Q. As a matter of fact, the two companies were in the same system at that time which probably explains the reason for it, both had a common parent at the time, didn't they?

A. I don't recall whether the control of United Public Utilities was at that time in—

Q. You know it was under United Public Service Company, which was a subsidiary of Middle West Utilities, don't you? A. Yes, that is probably true.

Q. So the contract of 1936 was entered into after the receivership of the old United Public Utilities Company, and the reorganization which followed in 1936?

A. That is true, yes. For a period there both companies, Middle West and United Public Utilities were in receivership.

Q. Do you know specifically how much of the $20,000

(Page 482):

per year applies to amortization?

A. Well, that changes each month.

Q. All right, how much does it start out to be?

A. I don't recall. That was worked out on an amortization statement, and I do not have that paper with me.

Q. You didn't start from 1930, though?

A. No, it started January 1, 1936.

Q. How was the 5 per cent interest rate determined?

A. That was determined to be the reasonable interest rate for that kind of an investment in that territory.

Q. You are vice president of Northwestern Public Service Company? A. That is correct.

Q. What is the funded debt of the Northwestern Public Service Company? A. $6,000,000.

Q. And what interest coupon does the debt bear?

A. Four per cent. However, we have six and seven per cent preferred stock outstanding, and it averages about five per cent.

By Mr. Scheetz:

Q. I asked a question that was lost somewhere in the shuffle about steam-heating. Addressing your attention to page 107 of the joint stipulation, will you describe the steam-heating business conducted by the Dakota Company, first describing the facilities and the manner of their use, and second, describe the operation in the business.

Mr. Scheetz: Mr. Reporter, will you mark this Exhibit Number 67?

By Mr. Scheetz:

Q. In this connection, I show you a document captioned "Dakota Public Service Company, steam-heating system,"

(Page 498):

Proceedings.

The Examiner: All right, let us proceed.

Whereupon—

C. L. SANDSTEDT,

previously sworn, resumed his testimony.

Direct Examination—Resumed.

By Mr. Scheetz:

Q. Mr. Sandstedt, have you anything more that you would like to say about the interchange agreement?

A. Well, yesterday when we adjourned I had the impression that there might be some misunderstanding with respect to this agreement.

I might add this, that this is a three part agreement. It covers kilowatt hours, kilowatts, and interchange facilities.

When you speak of kilowatt hours you are speaking of the use of kilowatts of capacity, and the selling company is selling labor, coal and operating expenses.

Kilowatts is installed capacity. That is investment. I believe the record shows that I estimated in our territory that the investment in power plant capacity to be in the neighborhood of $150 per kilowatt. The company with a deficiency of capacity pays the company with an excess carrying charges on the kilowatts of capacity.

The interconnection facilities are an entirely

(Page 499):

different matter. These facilities were provided by Northwestern Public Service Company and Dakota merely pays rental on those facilities, consisting of interest and carrying charges and operating expenses.

Q. Now will you describe the functions of the engineering committee under the interchange agreement. First state its composition.

A. This agreement is administered by a committee designated as an operating committee. It consists of two people—one member who is representing Northwestern Public Service Company and the other member representing the Dakota Public Service Company.

In case the two members are unable to agree, they will select a third party who shall be mutually agreeable to them, and the decision of the third party is considered final and binding.

The Examiner: Has there ever been a disagreement?

The Witness: No, sir.

By Mr. Davis:

Q. But the contract does not say whether or not they could select a representative of the Middle West Service Company?

A. No, it does not specify who that third party shall be.

Q. I suppose they might?

(Page 506):

And I think if you have any further cross-examination on the power pool or any other matters relevant to the examination so far, you can cross-examine if you care to.

Mr. Davis: I would like to defer my cross-examination until he completes the rest of the story.

Mr. Scheetz: Mr. Examiner, the next testimony will be addressed to the subject of management and supplements the material set forth under the caption "General and Management" on page 111 of the Joint Stipulation.

First I would like to have incorporated by reference Item 16 of 1941 U-5-S to the extent necessary to show the names of the directors and officers of Dakota Public Service Company and Knife River Coal Mining Company, and also to show their addresses.

By Mr. Scheetz:

Q. Mr. Sandstedt, am I correct in stating that of those directors and officers, Messrs. Sanborn, Sandstedt, and McArthur are directors of the Dakota Company, Knife River Company, and also Northwestern Company? A. Yes, sir.

The Examiner: They are the only common directors?

Mr. Scheetz: Yes.

By Mr. Scheetz:

Q. Are they also officers of those three companies?
A. Yes, sir.

(Page 507):

Q. They hold the same corresponding offices?
A. The same office in each company, yes.
Q. Now, am I also correct in saying that Mr. Buckmier is a common director in Northwestern and Dakota?
A. Yes, sir.
Q. Does he also hold a corresponding office in both companies? A. Yes, sir.
Q. Now, Mr. Sandstedt—
A. (Interposing) Mr. Buckmier is also an officer of Knife River Coal Mining Company, but not a director.
Q. Now, am I correct in stating that none of the other

directors of any one of those companies is a director of any other company in the group? A. Yes, sir.

Q. Now, how many directors does Northwestern have?

A. Seven.

Q. And how many directors does Dakota have? A. Five.

Q. And is Samuel W. White a director of the Dakota Company? A. Yes, sir.

Q. How many directors does Knife River have?

A. Three.

Q. And they are Messrs. Sandborn, McArthur and Sandstedt? A. Yes, sir.

Q. So then, the entire Board of Directors of Knife River are included in the directors of Dakota and Northwestern?

A. Yes, sir.

Q. Of the five directors of Dakota Company, four of them are directors of Northwestern? A. Yes, sir.

Q. How many directors does Northwestern have?

A. Seven.

Q. Four of whom are directors of Dakota? A. Yes, sir.

Q. So that the majority of the Board of Northwestern and of Dakota are common directors? A. Yes, sir.

Mr. Scheetz: Mark these exhibits 68 and 69, please.

(The documents referred to were marked as Respondents' Exhibits 68 and 69 for identification.)

Mr. Scheetz: May the record incorporate by reference Exhibit H-1 1939 U-5-S, which is a document entitled, "Agreement for Allocation of Joint Management Expenses", and is the document paraphrased on page 112 of the Joint Stipulation?

(Page 509):

The Examiner: And is now on file in Docket 30-7—

Mr. Davis: (Interposing) Hyphen 2.

The Examiner: (Interposing) Hyphen 2.

By Mr. Scheetz:

Q. Mr. Sandstedt, the Dakota Public Service Company and Knife River Coal Company have a joint office with Northwestern Company at Huron, South Dakota, is that correct? A. Yes, sir.

Q. Now I show you a document entitled "Organization

Chart, Dakota Public Service Company, Knife River Coal Mining Company", designated Exhibit 68, and a second document captioned, "Dakota Public Service Company, Divisional Organization Chart", designated Exhibit No. 69.

Will you explain these charts?

A. It would possibly be a little clearer if I explained Exhibit 69 first.

The property of Dakota Public Service Company is operated on a division and a district basis. It is subdivided into three operating units, consisting of the Bismarck Division, Dickinson Division, and the Mobridge Division.

Under these division offices, district offices are also maintained and operated.

Exhibit 69 shows the division and district setup.

(Page 536):

Q. Now, Mr. Sandstedt, are there not times when the executive staff is confronted with problems affecting the interests of all three companies or just Northwestern and Dakota Company?

A. Yes, that is probably true to a certain extent in an arrangement of this kind. However, most of these items of a routine nature are taken care of by the joint office agreement and the interchange capacity and energy contract.

However, there are times when matters do come up that affect the interests, where there might possibly be a conflict of interest between the three companies.

Q. Well, in such situations where you are acting in a multiple capacity, your obvious problem is to see that the several interests are fairly treated?

A. That is true, yes, sir.

Q. And you, for example, are on both sides of the fence in such situations?

Mr. Davis: Will he answer that question.

(Page 537):

The Witness: Yes, sir.

By Mr. Scheetz:

Q. Now, what is the procedure followed by the management when you have problems affecting the several com-

panies, first taking for illustration a major problem like the interconnection agreement and the interchange agreement about which you testified yesterday?

A. This agreement came up for revision last year. A revised agreement was entered into on July 1, 1941. The reason for the revision of the agreement was due to the fact that it was necessary to install additional capacity somewhere on the system, and by reason of this fact the entire agreement was studied and whatever other adjustments that were considered feasible were made.

Q. Well, now, who made the study?

A. The study was originated by the executive officers of the operating companies. This study consisted of a forecast of power requirements and that presented the problem as to which company should make the investment, where the power plant capacity should be located, the size of the power plant, and other problems in connection therewith.

After our original forecasts were prepared, we presented the problem to the officers of United Public Utilities Corporation and also to the Middle West organization. The engineering staff of Middle West Company went

(Page 538):

over the problem with us and it was finally agreed that the capacity would be located in Aberdeen.

Under the terms of the original contract it seemed that certain inequalities would develop if this capacity were located in Aberdeen without making some adjustment.

Northwestern Public Service Company sold its electric properties in Nebraska in 1940 and that year the bonds of Northwestern were refunded and part of the proceeds of that sale were absorbed in the bond refunding, that is, the process from the sale of the Columbus property.

A short time after the refunding, it was considered advisable to also sell the North Platte electric property. The sale price was $1,550,000, and part of the proceeds of that sale were used to purchase the gas properties in Grand Island and Kearney, Nebraska, from the Central Power Company, who had recently sold their electric properties to the Public Power district.

Northwestern, however, had a substantial amount of cash on hand which was on deposit with a trustee, and

considering the fact that additional generating capacity had to be installed some place on the system it was finally decided that the feasible location for this generating capacity should be at Aberdeen for the reason that Aberdeen is approximately the center of the electric system of the two companies and Aberdeen is also the principal point of

(Page 539):

interconnection between the Dakota Company and Northwestern.

Q. Well, Mr. Sandstedt, then the agreement was referred to the officers of the holding companies? A. Yes, sir.

Q. And was the agreement approved by the holding companies prior to its execution?

A. Yes, sir. It was not approved in the form originally submitted, however.

Q. It came back in different form?

A. It came back several times before it was finally approved.

Q. But after a period of consideration and negotiation, it was finally approved? A. Yes, sir.

Q. Now, is that the procedure which is generally followed in the negotiation of contracts between the companies?

A. Yes, sir, in the negotiation of contracts and other important matters that might develop.

Q. And, of course, as an officer of these companies you have the problem of considering such situations and deciding about their reference to the holding companies?

A. Yes, sir.

Q. And that involves a question of judgment as to the degree of the problem?

(Page 561):

It seems to me that the owner of the Knife River Mine would have an incentive to charge the power plant as much as the traffic would bear. The Zap Mine being the closest competitive point of obtaining coal, the price would probably be somewhere between the present price and the price that coal could be obtained for at Zap.

The Examiner: That is assuming that the mine is no longer a captive mine and that the Knife River Mine and the Zap Mine prices were both regulated by the Bituminous Coal Division?

The Witness: The Bituminous Coal Division does not regulate prices on lignite coal.

The Examiner: That is exempt?

The Witness: Lignite coal does not come under the Guffey Act.

By Mr. Davis:

Q. Now, Mr. Sandstedt, let us come down to the organization which you have at Huron for the combined operation of the three companies.

Tell, us, if you can, to what extent you feel that that organization is adequate for all of the problems which you are obliged to contend with from time to time for that combined operation.

A. Within the past few months we have lost several of our key employees of the organization, and due to the

(Page 562):

increasing number of reports by various governmental bodies that is required we find that our present force is strained to complete all of its normal functions.

Q. By that you mean that you are carrying a larger burden than you normally should?

A. We probably are understaffed at the present time because we have replaced some of our men with girls just recently. The men either went to join the armed forces or went to the defense jobs.

Q. All right.

Now, to what extent does that organization at Huron rely on the services of the Middle West Service Company?

A. We feel free to call upon members of the Middle West Service Company whenever in our judgment we feel that we need outside assistance. That might be in rate matters, it might be construction, location of equipment, and matters of that kind.

By Mr. Davis:

Q. What I am trying to find out, Mr. Sandstedt, is how much you rely on the services of the Middle West Service Company?

A. That, of course, depends on the problems. During some periods we have a number of problems coming up. During

(Page 563):

other periods we get along without their services. That would vary by years considerably.

(Page 564):

By Mr. Scheetz:

Q. Be a little more specific, if you can. Take, for example, the location of the new capacity. Did you use the services of Middle West on that?

A. I assume you refer to the capacity that was recently installed in Bismarck?

Q. That is right.

A. Yes, we did use the services of Middle West Service Company on that job.

Q. Who in particular?

A. Principally Mr. Buell, who is the chief engineer of the service company, and Mr. Gazin, his assistant. They made several trips to the property during the course of that installation.

By Mr. Davis:

Q. Well, in your opinion, is there any duplication of functions between the staff which you have at Huron and the services which allegedly are furnished by the Middle West Service Company?

Mr. Scheetz: I object to the form of the question.

Mr. Davis: If I strike "allegedly" will you withdraw your objection?

Mr. Scheetz: Well, you use your own judgment. Certainly.

Mr. Davis: All right, strike "allegedly", and then see if you can answer it.

(Page 565):

The Witness: Will you repeat the question?

(Pending question read.)

The Witness: I will qualify my answer, or rather, elaborate on it. We have one man in the central office who is in charge of all power plants, and he is capable and qualified but he just does not have the time to take care of major construction problems along power plant lines.

By Mr. Davis:

Q. What is that man's name?

A. Mr. Stokke, production superintendent. He is responsible not only for the electric power plants, but also all gas plants and all gas distribution systems.

The matter of rates happens to be under my supervision. I am also quite busy and when rate matters come up I feel free to call on the services of the Middle West Service Company because they have qualified rate experts.

The Examiner: Well, you were talking about this man Stokke not being competent on major new plant construction and in that instance you go to the Service Company.

The Witness: I did not mean to infer that. I think Stokke is competent, but he just does not have time to get into major construction work.

The Examiner: All right. On major construction, then, you go to the Service Company?

The Witness: Yes.

(Page 566):

The Examiner: But you also go to an independent firm of engineers in Chicago, or at least you did in one instance?

The Witness: Yes.

The Examiner: Well, why did you do that?

The Witness: The Service Company assists us in making the original layout. They advise us as to the type of plant we should build and the location of that plant. After that decision is made a consulting engineer is usually re-

tained and the actual construction of the plant is turned over to a consulting engineer or to architects and contractors.

The Examiner: Well, the independent engineer in Chicago that you retained, on what basis was that—6 per cent of cost, or something of that kind?

The Witness: I am not sure of the exact basis, but I think it was probably somewhat higher than 6 per cent.

I might add there that the Middle West Service Company, that is, the engineering department of the Middle West Service Company, do not have a staff of sufficient size to handle the construction problems of all of the companies in the Middle West system.

The Examiner: Well, now, on this new plant that you recently built, you engaged the firm in Chicago and you paid them something over 6 per cent of the cost for supervision and the building of the plant. How much did you pay the Middle West for selecting the location?

(Page 567):

The Witness: Well, their fee is on a revenue basis. They get the same fee regardless of what they do.

The Examiner: Whether they do the building or not?

The Witness: Yes, sir.

Mr. Scheetz: Mr. Examiner, there is in the testimony the Middle West Service contract, which was testified to yesterday extensively by Mr. White as to its origins, and that covers all the operating subsidiaries in this holding company's system except Knife River, and the compensation is based on a percentage of revenue.

Is that correct, Mr. White?

Mr. White: That is correct, adjusted revenue.

Mr. Scheetz: Adjusted revenue, yes.

The Examiner: Go ahead, Mr. Davis.

By Mr. Davis:

Q. If you had not contracted with the Middle West Service Company, what would you be obliged to do under the

circumstances where you consult the service company at the present time?

A. That would be a matter of judgment when some particular occasion arose.

Under the present arrangement we feel free to consult the Service Company staff on most any problem that comes up, and in certain instances we could probably rely on our own judgment in case we had no connection with the Service Company.

(Page 568):

In other words, if they were of sufficient importance, I assume that we would hire outside expert advice.

(Page 569):

Mr. Davis: Proceed with the cross.

Thereupon—

C. L. SANDSTEDT

resumed the witness stand and testified further as follows:

Cross-Examination (Cont'd).

By Mr. Davis:

Q. Coming back, Mr. Sandstedt, to Exhibit 64—

A. That is the interchange capacity contract?

Q. Yes. A. Yes.

Q. On the past page of that exhibit it indicates that the operating committee for the two companies are respectively Mr. C. C. Stokke of Northwestern Public Service Company and J. W. Chesire for the Dakota Public Service Company. Are both of those men joint employees of both companies?

A. Mr. Stokke is a joint employee. Mr. Chesire is an employee of the Dakota Public Service Company.

Q. Now, what are Mr. Stokke's duties on the organization chart; in other words, is he a superior of Mr. Chesire as far as operating authority is concerned?

A. Yes. Mr. Stokke is in charge of all the power plants

(Page 570):

and Mr. Chesire is the chief engineer at the Bismarck, North Dakota, plant.

Q. Am I correct, then, if I say that Mr. Stokke is the man

who fills the position of production superintendent on Exhibit 68? A. Yes, sir.

Q. And Mr. Chesire comes in what position?

A. He is the chief engineer of the Bismarck power station. That is the lefthand column of that organization Chart.

Q. That is the second box from the left in the first column of the lefthand side of the chart under the field organization of Dakota Public Service Company? A. Yes, sir.

Q. Do you have any difficulty with the fact that you have a superior and a subordinate appearing on the same committee for two different companies in a situation of this kind?

A. Well, we have not had any difficulty. Of course, we do have a comparatively small organization and those two men seem to be the best qualified in the entire organization to prepare an exhibit of this kind.

Mr. Chesire was formerly the chief load dispatcher of the system, and of course Mr. Stokke is familiar with all the requirements. The preparation of this exhibit is more or less a mechanical detail.

(Page 574):

A. I am referring to the company's log sheets showing the hourly generation in each plant.

Q. You are not referring to charges which are already on the books of account?

A. No, sir. I am referring to power plant records.

Q. So if any question arose as to the accuracy of the power plant log records on that, would it come under the jurisdiction of this committee? A. Yes.

However, those records are prepared on a daily basis by the engineer in each power plant and if there was some question in regard to those records it would come under the jurisdiction of this committee and they would decide the matter if they felt that any mistake was made.

Q. If the gesture has any emptiness it is because of the mechanical operation of those records in that respect, is it not? A. Yes, sir.

By Mr. Davis:

Q. Now, Mr. Sandstedt, will you look at page 4 of Exhibit 64, and also at the same time at page 1 of Exhibit 63?

You will observe that in the column describing the station generating capacity rating under Dakota Public Service Company, that Beulah has a rated capacity of 6000 k. w.?

(Page 575):

A. Yes.

Q. And Bismarck 5250 k. w.?

A. You are referring to Exhibit 63, now?

Q. No; I am referring to Exhibit 64, page 4 of the exhibit. That is correct, is it not? A. Yes.

Q. All right.

Now, on page 1 of Exhibit 63, under 1941, you will observe that under the column entitled "peak load kw.", that the Beulah station actually delivered 6500 kw. and the Bismarck station delivered 6000 kw.

Now, if that is supposed to represent the effective capacity of those respective stations then what credit if any was given to the fact that the Beulah and Bismarck stations actually delivered the equivalent of 6500 and 6000 kw. respectively, of capacity?

A. All of these stations will carry some overload. I think that the Beulah station is capable for short periods of carrying probably a 20 or 25 percent overload, and at some time during the year the station will probably carry an overload.

However, this interchange agreement provides that the stations will be rated at their effective capacity, but that effective capacity will never be more than the name-plate rating.

(Page 576):

Now, if you will read paragraph B—

Q. Well, I am reading the last sentence, which reads: "In case the operating committee shall determine, however, after fully investigating and by unanimous agreement that a generating station should be rated on some basis other than the sum of the manufacturer's name-plate ratings, such other ratings shall be used for the purpose of this agreement."

A. Now, if you read the next paragraph—

Q. "For the purpose of this agreement and until such

time as there has been a change in station or company generating capacity that may warrant a change in rating of any individual station or the total 'company generating capacity', it is agreed by the parties hereto that the 'station generating capacity' and the 'company generating capacity' of each party shall be as hereinafter set forth."

A. And then the company generating capacity for each company is set forth and that becomes the basis of billing under this contract, until some change takes place, and at that time if a change did take place then the operating committee would determine a new rating for the power plant in question.

Q. Well, does that imply that because these two plants that I have mentioned, namely, the Bismarck and Beulah plants, delivered a higher amount of kw. capacity than the contract

(Page 577):

gave as their respective ratings, that an adjustment would follow with respect to the so-called reserve capacity provision?

A. No, that does not follow because the Aberdeen plant or the Mitchell plant might carry a heavier load for a short period of time than the name-plate rating.

However, that would not have any effect for billing under this contract.

Q. Well, do not you think it would be more fair if some balancing of this whole arrangement with respect to the actual peak load delivered by the respective plants would be called for?

A. The basis of billing under this contract depends on the total system peak demand of each of the parties. That does not mean a single power plant; that means the demand that that system places on the interconnected facilities of the entire system, and the rated capacity of each of the parties is to determine the reserve equipment that each of them have and the generating capacity, that is, the effective generating capacity is set forth on page 4 of this exhibit.

Q. That is what I have been looking at all the time, namely, page 4.

A. That is true. That is the effective generating capacity.

Q. All right.

A. And that does not change except as some change in

(Page 578):

the physical equipment is made. If new equipment would go in service for either of the companies or should be taken out of service, then there would be a change, but otherwise this company generating capacity would be constant.

Q. Well, is that the fact? Is not the effective generating capacity determined by the capacity delivered? A. No.

Q. Well, that is only because of the arbitrary definition in this contract. How about as a matter of fact?

A. As a matter—

Q. I mean without regard to your definition, is not the full effective capacity of a particular station what it actually delivers over a period of time by experience?

A. No, that would not be considered the effective capacity of that plant. Most any plant will carry an overload for short periods of time.

As I previously stated, the Bismarck plant might be capable of carrying a 25 per cent overload for a day or so, but that would not mean that the effective capacity of that power plant would be 25 per cent more than its rating because the plant could not be operated on that basis continuously.

Q. Then, how did you arrive at this particular rating of effective capacity on page 4? A. The contract provides—

Q. I wish you would not rely so much on what the contract

(Page 579):

provides, as to how you arrived at the basis for the terms of the contract. I know what the contract provides, as I can read it.

A. I am going to explain that right now, in my own words. The contract provides that the name-plate rating will be used except as there is some reason for using something less than the name-plate rating, and I think that it is customary practice to use the name-plate rating for the generating capacity of a station, except as there is some reason for using a lesser rating.

In the case of Beulah—

Q. Lesser or higher, for that matter? A. Never higher.

Q. Never higher? A. No, sir.

Q. Mr. Fornili, my [coleague] here, who is an engineer, says there are many instances where they can very well assign a higher rating than the name-plate rating.

A. We could probably have done so in this case. We could have rated all of the power plants 25 per cent over their name-plate rating, and even if that was done consistently the answer would not be any different than it would be using the name-plate rating.

Q. Well, if you did it for all the plants on both sides of the system of course it would not be any different.

(Page 580):

A. Well, if the Beulah plant is capable of carrying a 25 per cent overload for a short period of time, the Aberdeen plant would be equally capable of carrying an overload, providing they had sufficient boiler capacity. Also, the Mitchell plant would be capable of carrying an overload.

Now, I did not complete my answer to your last question, and if you do not mind I will continue.

The Bismarck plant is rated at 5250 kilowatts for the purpose of this agreement. The name-plate rating of that power plant is 6250 kilowatts. It is rated at 1000 kilowatts less than the name-plate rating. The reason for that is that the Bismarck plant does not have sufficient boiler capacity to carry the entire load.

Q. But it actually did carry 6000, according to this Exhibit 63, so apparently the boiler capacity was sufficient to carry 6000.

A. That might be true for short periods of time, but the steam heat system requires part of that boiler capacity and we just do not have steam capacity in that station to carry the full load of those generators 365 days a year for 24 hours a day. There are certain times that that plant cannot carry the full load.

Q. In other words, in the summer months, when there is no steam load, you would have no difficulty at all in carrying that extra load; in the winter you might have some trouble.

(Page 581):

is that it?

A. Well, you would have trouble at any time.

If you will notice on Exhibit 63, the peak load carried on that plant was 6000 kilowatts, while the rated capacity is 6250 kilowatts. It is my impression that that was a test run, because that plant normally carries about between 4000 and 4500 kilowatts.

However, the same thing is true of the Aberdeen plant. For that purpose of this agreement, the Aberdeen plant is rated at 6250 kilowatts. The installed capacity nameplate rating is 7750 kilowatts.

Q. By the way, do you happen to have available the same information with respect to the peak loads of the Northwestern Public Service Company generating stations?

A. No, I do not have that available, but the peak load carried as shown by Exhibit 63 does not necessarily mean that that load was carried during the system peak period. That load might have been carried on a power plant in the summertime, and the system peak load did occur in December.

Mr. Davis: I am going to let Mr. Fornili ask this question because I am not sure whether I understand.

By Mr. Fornili:

Q. Does the capacity of the various plants depend upon their ability to deliver that capacity at the time that the system peak generally occurs?

(Page 582):

A. Yes, that is generally true. It depends upon their ability to deliver that capacity on an uninterrupted basis.

Q. I see—continuously?

A. Continuously.

Q. And is that the function of this operating committee, to exercise a judgment as to the ability of these plants to deliver that capacity continuously?

A. Yes, sir, that would be the function, although the capacity of these plants was determined at the time this agreement was negotiated and there would be no reason

to change that except as some change occurred in the physical characteristics of a plant, either equipment being taken out of service or other equipment being put into service.

By Mr. Davis:

Q. Now, in this situation were you and Mr. Sanborn and the several other persons who are joint employees of the two companies, Dakota and Northwestern, respectively, serve, what would you say with respect to the general proposition as to whether or not you have any difficulty serving two masters? In other words, do not occasions arise when the loyalties might require some conflict of judgment or decision with respect to your duties?

A. That is true to a certain extent and on some occasions.

In the administration of the ordinary problems, however,

(Page 583):

of the companies, those occasions do not arise very often. There are certain duties that must be performed for each of the companies. There might be accounting duties, there might be engineering duties, billing, duties of the commercial manager or others in the organization, and it might be possible to neglect one company and the employees spend a greater amount of time on the other property. If that was done to any great extent, however, it would be reflected some place, either in the lack of development or increased expenses or loss of efficiency some place.

Ordinarily, there is not any incentive for either the officers or the employees to neglect one company and favor the other company. Certainly there is not any financial incentive and there is no pressure on the part of either group for such a program.

The Examiner: Well, take your own salary, Mr. Sandstedt, you are down here today testifying and have been for a week. Your salary is divided as to gross revenues, is it not?

The Witness: Yes, sir.

The Examiner: Between the two companies?

The Witness: Yes, sir.

The Examiner: Now, you might be down here 30 days out of a year testifying exclusively on various applications that Dakota might have with this Commission and never down here on Northwestern. Nevertheless, the allocation is as to gross

(Page 584):

revenues, rather than time, is it not?

The Witness: Yes, that is true. If you take a short period of time there might be some criticism for allocating my salary on the basis of gross revenues, but if you take it over a matter of time, a matter of years, the basis usually works out to be equitable.

For instance, I am spending some time here on Dakota and probably Northwestern is suffering. On the other hand, we had a bond refunding, that is, Northwestern Public Service Company had a bond refunding, and I spent considerable time on that matter. I think over a period of time an allocation on that basis works out equitably.

Outside of the officers, that problem does not arise very often. The accounting department staff and the billing department staff and most of the other employees have certain duties to perform, certain functions to perform, for each of the parties and they do their job, and I think the gross revenue basis is equitable.

The Examiner: Now, of course, when you come down here for Dakota your traveling expenses are paid entirely by Dakota?

The Witness: No, sir, they are allocated.

The Examiner: They are divided?

The Witness: Yes.

Now, I admit that there is some criticism if you take a short period of time in allocating salaries and expenses on

(Page 585):

that basis, but over a period of time I think it is fairly equitable.

The Examiner: Well, now, take an item like telegrams and telephone. Is that divided as to gross revenue, or is there any distribution made between the two companies?

The Witness: No, that is divided on the basis of gross revenues, and one of the reasons for dividing it on that basis is that we feel that the property [furthest] removed from the central office should not be penalized merely because the general office is located a considerable distance away from the center of operations. The same thing would be true of traveling expenses.

For example, in supervising our Huron Division, no traveling expenses are required. In supervising Bismarck and Dickinson, considerable traveling expenses are required. In spite of that, the Huron Division is on a revenue basis and stands a part of the traveling expenses, telephone, salaries, and all other expenses on the same basis that Bismarck and Dickinson do.

By Mr. Davis:

Q. You still [——] that you can sit on one side of the table as vice president of one company and face the president of your company who is acting for another company and arrive at a perfectly arm's length transaction?

Mr. Scheetz: He never testified to any such thing.

(Page 586):

Mr. Davis: Well, his name is on this thing—

Mr. Scheetz: That is right, but you said "do you still feel".

Mr. Davis: I think the substance of all his testimony has been that he can act in a dual capacity here.

Mr. Scheetz: But if you followed his direct testimony carefully, he then pointed out that he always had the question of deciding when his conflict of interest was such that the problem should be referred to other persons on the staff.

Mr. Davis: That is beside the point.

Mr. Scheetz: It is not beside the point at all. I am talking about his testimony.

Mr. Davis: His testimony, nevertheless, is and the exhibit in evidence is that he signs as a vice president of one company and the president of another company of which he is vice president signs the same document.

Mr. Scheetz: Well, Mr. Davis, he probably has the same difficulty you have in protecting the consumer and the investor at the same time.

Mr. Davis: We do not have any difficulty on that score.

Mr. Scheetz: That is the answer.

(Page 587):

The Witness: I have tried to explain that as far as the regular routine matters that come up, in administering the affairs of each company there is not any conflict. When matters of importance such as this interchange contract come up, I do not feel that we are in a position to pass final judgment. In those cases I think there possibly is a conflict that might affect my judgment or Mr. Sanborn's judgment, and we have always referred matters of that kind to the respective holding companies and they finally pass judgment on the matter.

By Mr. Davis:

Q. In other words, you sought authority from the officers of the holding company to direct you to enter into this contract? A. Yes, sir.

The [Eaminer]: That is not localized management, then, is it, if you seek the remote control of the holding companies?

The Witness: We probably could operate the property and enter into contracts, but personally as long as we do have this arrangement I would rather refer matters where a conflict might arise to someone else and as long as we have our present arrangement we can do that very easily and without any trouble or any embarrassment, as far as we are concerned.

Mr. Davis: That is all from Mr. Sandstedt.

(Page 588):

(Witness excused.)

Mr. Scheetz: Mr. Sanborn.

The Examiner: Has Mr. Sanborn been sworn?

Mr. Scheetz: Yes.

Thereupon—

A. B. SANBORN

was called as a witness for and on behalf of the respondents and, having been previously duly sworn, was examined and testified as follows:

Direct Examination.

By Mr. Scheetz:

Q. You are president of the Dakota Company, Knife River Company, and Northwestern Company? A. I am.

Q. How long have you been president?

A. Since July 1, 1938.

Q. And you are also a common director of those three companies? A. I am.

Q. Did you make application of the Federal Power Commission for permission to serve in those capacities on the two utility companies? A. I have.

Q. And have you approval of that Commission?

A. I have.

(Page 589):

Q. Now, you heard Mr. Sandstedt's testimony regarding the position that common officers and common directors are in. I suppose you are aware of the same problems as he is?

A. I am aware of the problems, and also aware of the responsibilities, chief among which, it seems to me, is the responsibility of determining where the conflict of interest occurs.

I also believe that the directors of the companies and the officers acting for the companies should have and do

have recourse to the owners, the common stockholders of the company.

In this case it is so, and wherever a conflict of interest occurs, which is seldom, we exercise that recourse to the owners of the company.

The Examiner: Well, Mr. Sanborn, in the event of a conflict between the two companies, as I understand your testimony, you submit it to the controlling common stockholders. Now, does not that ignore the rights of the bondholders and any preferred stockholders of the two companies, if you submit it entirely upstairs to the controlling stockholders?

Mr. Scheetz: Well, Mr. Examiner, the responsibility of the officers of the company is to the stockholders, that is, to the common stockholders.

The Examiner: And not to the preferred; is that your point?

Mr. Scheetz: Well, of course not.

(Page 590):

The Examiner: Or to the bondholders?

Mr. Scheetz: Of course, they have a responsibility to their creditors, but in an effort to see that independent judgment is brought to bear on a problem it is referred to the common stockholders, who is on top of the heap. I would say in seeking out the common stockholders they certainly sought independent judgment.

The Examiner: Well, I was merely trying to get the witness's attitude. As a matter of fact, that is what you do in the event of any conflict between the Northwestern and the Dakota; that is, you submit it to the common stockholders for their judgment?

The Witness: That is exactly so.

Of course, in the case of the Dakota Company, the common stockholders and the security holder are synonymous.

By Mr. Scheetz:

Q. Now, have you ever, to your knowledge, been asked by the United Public Utilities Corporation or by Middle

West Corporation to put your name to a contract that did not have the approval of your own judgment?

A. I never have.

Q. And have you ever put your name to a contract that did not have your approval? A. I have not.

Q. And, of course, your position as president is

(Page 591):

dependent on satisfying your owner, is it not?

A. That is exactly so. I would not be president five minutes if I did not satisfy the owners of both companies.

Q. Now, have you been in the hearing room during the time Mr. Sandstedt was on the witness stand? A. I have.

Q. And have you heard his entire testimony?

A. I have, and followed it carefully.

Mr. Scheetz: Now, I am not going to ask this witness the general question as to whether he corroborates all that testimony, but I am going to ask him whether there is anything he wishes to add to it.

The Witness: I think Mr. Sandstedt in his testimony covered the matter as fully as it can be covered, and I cannot think of anything at the present time that I could add either in clarification of it or in bringing out any points that he has missed.

Mr. Scheetz: Cross-examine—well, I will say more than cross-examine. I invite any questions that you care to ask.

Cross-Examination.

By Mr. Davis:

Q. What have you to say, Mr. Sanborn, in your capacity of president of the two companies, on this question of serving two masters?

A. Well, sir, I realize the possible ambiguity of the

(Page 592):

position.

On the other hand, my feeling is that the two companies do not compete. They are, on the other hand, helpful to each other, and my duties in relation to the two companies are so circumscribed by contracts that have been entered

into through the negotiation of the owners of the companies that the chances of a conflict of interest and the chances of my possibly carrying water on both shoulders are not nearly as great as you seem to think they might be.

On the other hand, I recognize that they might and do exist, and one of my first responsibilities is to attempt to recognize them when they do come up.

Does that answer your question, sir?

Q. Do you recall any occasions since you have been president of the two companies where you have had a conflict of loyalties, shall we call it, in so far as your duties to the companies were concerned?

A. Not of loyalties, no. There have been occasions when I found it necessary to refer to the owners to either establish a contract or a policy that I did not feel—

The Examiner: Will you tell us a little bit about the time that you have gone to the owners?

The Witness: Particularly in regard to the fundamental contract of interchange of capacity and interchange of energy.

The Examiner: Which is in evidence here.

(Page 593):

The Witness: It is in evidence before this Commission.

The Examiner: Have there been other instances where you have gone to the owners?

By Mr. Scheetz:

Q. Were you president when the joint office allocation agreement was entered into? A. I was not.

Q. Mr. Sandstedt would know about that? A. Yes.

My service with those companies has only been in the last four years. This one particular case, which seems to me to be fundamental and one of the utmost moment to both companies—

The Examiner: Well, as I understand Mr. Sandstedt's testimony, the two companies worked out what they thought was a fair working agreement. It was submitted to the owners and the owners made substantial changes. Will you tell us what the changes were?

The Witness: Well, as a matter of fact, the operating staff in Huron, which operate both companies, drew up an agreement in rough and sent the agreement to the owners of the property and those owners, by negotiation between themselves and by calling in such engineering advice as they thought was necessary, boiled the contract down not once but half a dozen times, and it was returned to us for our judgment as to the change.

It went back to Mr. White and the members of the owners of Northwestern for their further consideration, and the result of that is the contract which has been talked about here.

Now, to ask me to state in what form that started and just what the steps were through it would be something I am not capable of doing because it was changed as to phrases, as to wording, and legal advice was taken on it I suppose at least a half dozen times, and it was finally passed in its present form, I believe, by the board of the United Public Utilities Company.

Mr. Scheetz: That is correct.

The Witness: And it certainly was passed by the executive staff of the Middle West Corporation.

By Mr. Davis:

Q. Can you recall by which particular board you were asked to come and serve as president of the two companies?

A. I was asked to accept the job as president of the two companies by the representatives of the boards of both companies.

Q. Simultaneous offer?

A. No, not a simultaneous offer. The Dakota Company and the Northwestern Company both have service contracts with the Middle West Service Company and I believe that one part of that service contract is to provide executive officers for the subsidiaries or for the companies with whom they have

(Page 595):

the service contract, and acting in that capacity the president of the Middle West Service Company asked me to

come in and see him, which I did, and almost immediately I went up to call on Mr. White.

Q. Can you tell us something about your background and the different companies you were connected with before you came with these two companies?

A. Yes, I will do that.

I was born in Stevens Point, Wisconsin. I went to public school in Ashland, Wisconsin.

I graduated from the United States Naval Academy in 1912. I resigned my commission as a Lieutenant Commander in the Navy in 1920.

I immediately went to Canada to act as general manager of the East Cootenay Power Company, which was then a prospect. I was with that company for 18 years—

Q. By "prospect", you mean a mining company?

A. A power company. It was just then on paper. There was not anything there.

I was with that company 18 years, acting as general manager.

During that time the company built—

Q. Excuse me. Was that company in any way affiliated with any of the predecessors of the Middle West Utilities Company?

A. No, sir. That company is a Canadian company and is

(Page 596):

a subsidiary of the Power Corporation of Canada.

During the 18 years I was general manager, we built two hydro plants and one steam plant and brought our power production up to approximately 100,000,000 kilowatt hours a year.

In 1938 I resigned my position with the East Cootenay Power Company and came to Huron, South Dakota, to accept the position which I am now fulfilling.

Q. So during your entire professional career you have had no former affiliations with any of the predecessors of the present Middle West Company?

A. No. This is my first job with an American Company.

Mr. Scheetz: Mr. White, will you resume the stand, please?

The Examiner: He has been sworn?

Mr. Scheetz: Yes.

Thereupon—

SAMUEL W. WHITE

was called as a witness for and on behalf of the respondents and, having been previously duly sworn, was examined and testified as follows:

(Page 597):

Direct Examination.

By Mr. Scheetz:

Q. Mr. White, in your earlier testimony you testified at length about the negotiation of the present contract with the Middle West Service Company, which applies to the various subsidiaries other than Knife River Company.

Your testimony then was directed particularly to the Indiana-Ohio companies.

Now, Dakota Public Service Company is within the purview of that contract, and in view of the extent of the inquiry made about the Middle West Service Company in connection with Dakota, would you care to extend your remarks to the negotiation of that contract as it bears on Dakota Public Service Company?

A. Various discussions which I had with Mr. Daniel C. Green, the receiver of Middle West Utilities Company, were on the general subject of a management contract under which the services of the technical men on Mr. Green's staff would be available to the operating subsidiaries of the United Public Utilities Corporation, and those conversations were on the basis of a standard contract for all companies, and from my point of view the decision that I had to make for myself was whether I was going to provide the equivalent of those technical services either in an organization of my own or on a consulting basis or from some other service company, or whether I was going to get those services for our subsidiaries from Mr.

(Page 598):

Green's organization.

That discussion was on the basis of all of our subsidiaries, and according to Mr. Green's idea at that time was also to include Knife River Coal Mining Company. I took exception to the inclusion of Knife River Coal Mining Company on any fee basis because, as I pointed out to Mr. Green, his organization had nothing to offer us in the way of assisting a coal mine because they had no technical ability in their organization that could be of value to our coal mine operation.

Before those contracts were signed, I talked with our operating men about it and my agreement with Mr. Green then was that with the exception of our Indiana companies and of the coal mine, that our subsidiaries would receive services from the Middle West organization, and this present standard service company contract is an outgrowth of that original arrangement, which I made in the early days of the receivership.

Q. Now, there was a reference made to the engineering firm of Sargent & Lundy in connection with the construction of the Bismarck station. What had you to do with that?

A. Well, I was the first one to insist that there be an outside engineer employed to design that station. I had some question in my own mind as to whether we wanted to confine ourselves to the standard type of design that might obtain in Middle West properties, which would be the result if it were designed only by the Middle West Service Company.

(Page 599):

We had no argument on that point except, I believe, on the operating property, where the management did not want to spend the money for those consulting services. However, inasmuch as we were providing the money, our idea prevailed there as to the advisability of having outside advice on that construction.

I might say that the Middle West Service Company readily agreed to this suggestion.

Now, this gives me an opportunity to develop one

thought that was not brought out this morning.' After it had been agreed to have them design that plant, Sargent & Lundy engineers went out there on an inspection trip and I insisted that they make, especially for me, a report on the relative merits of each of the locations that were under consideration—

By Mr. Davis:

Q. As a construction site, you mean?

A. As the point at which the additional capacity should be located on our end of the system.

There had been a great deal of discussion on that point as to whether we should take advantage of the cheap fuel at the north end of the line or balance off the system by putting additional capacity at the south end of the line.

Sargent & Lundy reported on each of the locations that had been suggested, which included all of the reasonably conceivable locations, there being about three, as I recall it, and came

(Page 600):

back and recommended Bismarck. That recommendation was shared by the Middle West Service Company. It coincided with their own view, that is, the engineering staff of the Middle West Service Company, who had given us their report on it, and so we located it there.

We did have more than the location of a plant to decide at that time. Even if located at Bismarck, we had to decide whether we would expand the plant which we already had there or whether we would abandon that plant and start in an entirely new development over on the Missouri River, a short distance out of town, which would have been a splendid idea if we already did not have a plant in Bismarck, but we had to weigh the advantages of junking the power plant investment that we already had as part of a long time program, and that idea we finally abandoned.

By Mr. Scheetz:

Q. Now, Mr. White, I think you heard the Examiner's question to Mr. Sanborn as to whether the reference of contracts to the holding company was localized management.

Did you as the executive head of the owner of the securities of the Dakota Company consider that you had any interest in the interconnection and interchange agreement, and if so, what?

A. Well, I considered that I had a very substantial interest in that interconnection agreement and in this joint

(Page 601):

management arrangement.

I also feel that I carried the responsibility of continuing that arrangement. In fact, when I first came into this picture, in 1932, everyone of these subsidiaries—20 at that time; 19 today—of United Public Utilities Corporation were operated under a joint management arrangement with some other company that either belonged to or was affiliated with Middle West Utilities Company, and I have discontinued every joint management arrangement which I found at that time, with the exception of these three companies in the Dakotas.

In the case of this particular interconnection contract, I would have insisted on having some finger in the pie or being consulted on a long-term arrangement which involved our whole future operating policy as to any plans that we might have for the expansion of our generating system in that largest of our subsidiaries.

I also recognized that that joint management out there had a perfect right to pass on to me the responsibility of satisfying myself and the investors that I represent that their interests were being adequately protected under that contract, and the length of time that it took to negotiate that contract in is final form was primarily due to the difficulty that I had in making up my mind on its sufficiency and adequacy.

Mr. Scheetz: Cross-examine.

(Page 602):

Cross-Examination,

By Mr. Davis:

Q. Mr. White, have you ever had occasion to check the extent to which there is any common identity between the stockholders of United Public Utilities and Middle West?

Mr. Scheetz: Would you like to have it noted of record that the Middle West Corporation owns two-thirds of the Class B common stock of United Public Utilities Corporation, which stock has the voting right to elect one director?

The Examiner: Out of how many?

Mr. Scheetz: There are five at the present. There have been more in the past.

The Witness: It has run up to seven at one time.

May I amend your statement slightly? Out of our total common stock, 40 per cent is in the form of Class A common stock and the remaining 60 per cent is in the form of Class B common stock. The Class A stock was given to the bondholders in the reorganization and has full voting power, except for the voting power which Mr. Scheetz has just mentioned which attaches exclusively to the Class B common stock.

Of the total issue of Class B common stock, two-thirds, which means two-thirds of 60 per cent of our total common stock issue, is owned by United Public Service Corporation and slightly over 50 per cent of the capital stock of the United Public Service Corporation is owned by the Middle West Corporation.

(Page 603):

By Mr. Davis:

Q. How about the Class A common stock of United Public Utilities?

A. The Class A common stock of United Public Utilities, which is issued at the rate of 10 shares for each $1000 bond—

Mr. Scheetz: Mr. White, if I may interrupt.

By Mr. Scheetz:

Q. Do any of these companies in the Middle West system own any of your Class A common stock?

A. That question covers a lot of territory. It covers my whole list of Class A common stockholders. I will have

to answer the question in a roundabout way, not to be evasive but not to state something specifically that I do not know to be a fact.

Mr. Davis: Just a minute. Maybe I can help you.

Off the record.

(Discussion off the record.)

The Witness: To no appreciable extent does any company in the Middle West system own any of our Class A common stock.

The Middle West Corporation or some of its subsidiaries did hold some of the bonds of our predecessor company, and they received some Class A common stock in the reorganization. I happen to know that every share of that stock was sold.

By Mr. Scheetz:

Q. How about preferred stock which has voting rights at

(Page 604):

the present time?

A. The same statement would apply exactly the same.

Mr. Scheetz: Might I suggest that if the subject is of any further interest to you, I suppose it can be supplied.

Mr. Davis: Yes.

By Mr. Davis:

Q. To clear up one other point, am I correct in my understanding that there are four common directors on both boards of Northwestern Public Service Company and Dakota Public Service Company?

A. Four directors are common. That is shown on the exhibit that was introduced by the company.

Mr. Davis: I think that is all.

(Witness excused.)

Mr. Scheetz: Mr. Armbruster, take the stand, please.

The court received in evidence testimony offered by defendant from the Official Report of Proceedings before the Securities and Exchange Commission, Docket No. 43-185, entitled "In the Matter of North Dakota Power and Light Company et al.", being a record of evidence taken at Philadelphia, Pennsylvania, on May 8, 1939, before James G. Ewell, Trial Examiner, which testimony together with the page references to said Official Report are as follows:

(Page 47):

of 34,819, with 8,242 electric customers.

The Examiner: Which company is that?

The Witness: This is the North Dakota Power and Light Company.

The Examiner: With a total population of 34,000?

The Witness: 34,000 total population in 35 towns.

By Mr. Scheetz:

Q. Are the operations of the Dakota Company confined entirely to North Dakota?

A. Yes.

The Dakota Company has 472 miles of transmission line of over 6,600 volts; 9,960 kilowatts of generating capacity located in four plants, the largest of which is the Beulah station, containing 6,000 kilowatts, or approximately two-thirds of the total generating capacity. I will correct that figure. That 9,960 kilowatts is in steam capacity. In addition to that, we have 956 kilowatts of internal combustion capacity located in two plants.

The Examiner: Do you have any water power?

The Witness: We have no water power.

By Mr. Scheetz:

Q. Will you describe the Beulah plant?

A. The Beulah plant is located at Beulah, North Dakota,

at the mouth of a mine that is also owned by the United Public Utilities Corporation. The location of the plant

(Page 48):

makes very low generation cost.

Q. When you say a mine owned by United Public Utilities Corporation are you not mistaken? What corporation owns the coal mine? What is the name of the subsidiary corporation owning the coal mine?

A. The Knife River Coal Mining Company.

Q. How does the capacity, generating capacity, of the Beulah plant compare with the needs for the Dakota system?

A. There were 6,000 kilowatts of generating capacity in the Beulah plant and the total peak demand of the Dakota system was 7,638 kilowatts in 1938.

Q. What happens to the excess energy?

A. The output and the demands of the system vary considerably during hours of the day, and also during months of the year. The peak hours usually occur along about dusk, in the evening, and later on there is a sharp drop off in that peak. During the time of that drop off the energy is transmitted to the south end of the system, and during certain hours of the day this energy passes through the Northern system and into the Northwestern Public Service Company. At other hours during the day the flow of energy is northward from the Northwestern Public Service Company system to the Northern Power & Light Company system; and during emergencies, such as breakdown of the Beulah plant or during times when the lines might be out of service, it is

(Page 49):

possible for the Northwestern Public Service Company to supply energy to the Dakota Company.

Q. So that there is an exchange of power between the system comprised on the one hand of the Dakota Company and the Northern Company, and the Northwestern Public Service Company on the south, on the other hand.

A. There is a constant interchange of power.

The Examiner: Is this Northwestern Public Service Company either a subsidiary or an affiliate of the top holding company?

The Witness: No. There is no connection between the Northwestern Public Service Company and these two companies or between the Northwestern and the United Public Utilities Corporation.

By Mr. Scheetz:

Q. Does energy from the Northwestern source flow through to the Dakota system and is it used by the Dakota system?

A. During times of emergency, yes; ordinarily, no.

Q. In normal times that energy coming from the Northwestern would be used by the Northern Company? A. Yes.

Q. You were describing the terrain in which the Dakota Company operates. I think you gave the mileage of the transmission lines. What are the principal load centers in the Dakota Territory?

(Page 50):

A. Bismarck, Mandan and Dickinson.

Q. All in North Dakota? A. All in North Dakota.

Q. What is the distribution of population and area of the Northern Company's territory?

A. The Northern Company operates in both North and South Dakota, as is shown by the map. The transmission lines cross the state line at six different points. There are three points of interconnection between Northwestern Public Service Company's system and two points of interconnection with the Dakota System.

The Northern Company's territory is considerably more sparsely settled than that of the Dakota Company. The total population is 28,917, located in 56 towns, the largest town being Mobridge, South Dakota, which has a population of approximately 3,000. There is a total of 5,676 electric customers located in these 56 towns.

Q. What problems are created for these two companies by the weather conditions which prevail in the territory? First, describe the general conditions, briefly.

A. During the past seven or eight years we have had a period of extreme drouth. During those years there has been very little cash income produced in the territory. And we have also had sleet storms from time to time.

Q. What is the problem created in servicing your trans-

(Page 51):

mission lines during the winter in connection with the sleet?

A. That, of course, necessitates the location of our plants at points that will protect the service to the principal load centers of both companies.

Q. What problem does that make in zoning your district offices?

A. The problem of zoning our district offices is, of course, partly dictated by weather conditions, but on account of the number of miles covered by the territory, geographical location is also necessary. By that I mean we have to have offices located in some of the larger towns in order to adequately take care of the service of these towns and the smaller surrounding communities.

The Northern Company has seven district offices, in addition to the main office which is located at Mobridge. In each one of these offices is located a service man, usually a service man and an office girl, to take care of the customers' service; and in Mobridge we have a line crew which takes care of the service for the entire territory.

Q. If it were not for the fact that you have two different corporations here what changes would you make in the handling of your zoning of your district offices?

A. We would probably do some rezoning. For example, it is approximately 200 miles from our Mobridge office, which is our division office, to Steele, which is the farthest—

(page 52):

district office, and there are no railroad connections, or very few rail connections north and south in either of the Dakotas, and in the movement of mail it is sometimes necessary in some of the towns for it to go into Minneapolis and come out again, and sometimes it takes two or three days to get mail service. The Steele District could be much more advantageously operated out of the Bismarck office, because they are both on the main line of the Union Pacific, and Steele is only about 50 miles from Bismarck.

Q. In other words, if you had a free hand now you would hitch the Steele area to the Bismarck office as the principal office of the Dakotas? A. Yes.

Q. At the present time how does your reserve capacity in the system for the two companies compare with present needs?

A. By referring to Exhibit K you will notice that we have very little reserve for the two companies. The system peak in 1938 was approximately 11,000 kilowatts, while the installed capacity for the two companies was approximately 12,800 kilowatts. This capacity is located in ten different plants, and it is not possible to utilize the rated capacity of these plants on account of their size and the difficulty of keeping them on the line, and from a practical standpoint we depend largely on the Beulah plant, together with the tying in with the Northwestern Public Service Company.

(Page 53):

Q. When it comes to placing additional reserve capacity for the system, if these two companies are merged am I correct in my understanding that that will give you a free hand to place your additional capacity in the most efficient places and where it is needed in the system as a whole?

A. Yes.

Q. Otherwise, you would have to pay your respects to the separate corporate identities and have regard for that in placing?

A. That is true. That would be particularly true if the present arrangement was discontinued, and we always have to keep that in mind, and always have had as long as there were separate corporations which may not be as closely associated as they are at the present time.

Q. In the interchange of power between the Northern Company and the Dakota Company there is a charge made between the two companies for energy furnished in either direction? A. Yes, sir.

Q. And as long as these two companies are separate you will always have the problem of determining the intercompany price? A. That is true.

Q. In this connection, am I correct in saying that the

Northwestern as a source of energy is in the nature of a standby to the Dakota Company?

(Page 54):

A. The three companies have pooled their power resources. The company with a deficit of generating capacity pays a rental charge to the company with an excess, and that deficit or excess is determined once a year. We also have an interchange power agreement that covers energy only. Under this agreement the Beulah plant, which is the most efficient plant of any in the three systems is operated at maximum capacity. During peak hours the movement of energy is south through the northern system, and during the graveyard period considerable quantities of this energy are transmitted to Northwestern Public Service Company. This energy rate is worked out on a basis to allocate the savings and the benefits to the three companies. Of course, if the Northern Company and the Dakota Company were merged there would be less of a problem in the matter of allocation of savings, as well as in the allocation of rental charges.

The Examiner: When you talk about pooling your capacities did you refer to pooling with the Northwestern Company to the south?

The Witness: Yes, sir.

By Scheetz:

Q. Have you made a computation of the number of reports which the two companies are making, in the aggregate, to various arms of the State and Federal Government, that is, both North Dakota, South Dakota, and the Federal Government?

(Page 69):

Q. What effect will this merger have, if any, upon the subjection of the operations of the two companies to state regulation? That is to say, will it all be brought under the North Dakota Railroad Commission?

A. It will have no effect whatever. South Dakota does

not have a regulatory body at the present time, and all of the property in North Dakota is now subjected to the regulation of the North Dakota Railroad Commission.

Q. So there will be no division of authority over one company's operations— A. No, sir.

Q. —tc the extent that South Dakota continues to have no regulatory body? A. Yes; that is right.

Q. Are these two companies, namely the North Dakota Company and the Northern Company, being operated now under a management or service contract?

A. Yes, they are being operated under a service contract with the Middle West Service Company.

Q. Are any other companies also being serviced under that contract or operated under it?

A. I believe all the companies in the Middle West System are under similar contracts.

The Examiner: Is that service company a subsidiary of the parent holding company?

(Page 70):

The Witness: No, it is not. It has no connection whatever with the parent holding company.

By Mr. Binford:

Q. Is this a management contract of which you are speaking? Isn't there a joint management contract with the four companies of which the North Dakota Company and the Northern Company are two?

A. Yes, there is a management contract between the four companies.

Q. Those four companies are what companies?

A. Northwestern Public Service Company; the Northern Company, the Dakota Company, and the Knife River Coal Mining Company.

Q. The Northwestern Public Service Company is a company of which you are also an officer. Is that true?

By Mr. Scheetz: (Interposing).

Q. Are you not wrong about the Knife River Coal Mining Company being under that agreement?

A. I was not speaking of the service agreement. I was speaking of our general office agreement. It is not in writing. We merely allocated the expenses between the four companies. Our general office expenses are allocated between the four companies. I was not speaking of the service agreement at this time with the Middle West Service Company.

By Mr. Binford:

(Page 71):

Q. Those are two separate agreements, one agreement being oral and the other in writing? A. Yes.

Q. The management agreement being oral? A. Yes.

Q. Are you an officer of Northwestern Public Service Company? A. Yes, sir.

Q. That company is a subsidiary of what utility system?

A. It is a subsidiary of Middle West Utilities Corporation.

Q. What is your position with that corporation?

A. Vice president, treasurer and director.

Q. Is this management agreement under which these companies are being operated proposed to be continued after this merger as before?

A. When you speak of the management agreement—

Q. I am speaking of the oral understanding of which you spoke? A. Yes.

Q. What about the service contract which is written?

A. That will continue.

Q. There will be no change in either one of those arrangements? A. No, sir.

(Page 72):

The Examiner: What will these companies' own officers do if the management is contracted out or farmed out? What offices will there be left for them to perform, or rather, what services?

The Witness: The only services that we now receive from the Service Company, are in the nature of expert advice along technical lines, and I can not imagine the management of the properties being released or farmed out off

the territory. I don't know whether that answers your question or not.

Mr. Scheetz: Maybe I can clear this up.

By Mr. Scheetz:

Q. When you speak of a management agreement, which is the oral agreement, as I understand it, that is an agreement whereby you pool your management expenses in a central office in Huron. Is that correct? A. Yes, sir.

Q. I do not understand by management agreement you mean that the officers are delegating their duties away to some other unit to manage the operating company?

A. No, sir. I did not want or intend to leave that impression. We merely take care of the same functions for the four different companies.

Q. All of those operations are centralized in an office in Huron. Is that correct?

(Page 73):

A. Yes, sir.

The Examiner: By my question I simply wanted to bring out or to find out the extent of this management contract.

By Mr. Binford:

Q. I show you Exhibit H-1 to the registration statement, supplement U-5-S, of United Public Utilities Corporation, entitled, "Agreement for Allocation of Joint Management Expenses." You stated that the management agreement, as you have identified it, was oral. As a matter of fact, isn't the agreement in written form?

A. I was mistaken in that. That was reduced to writing for the purpose of this filing.

Q. Then that agreement to which you have been testifying as a management agreement, is the same as the exhibit which I have just shown you?

A. Yes. That is identified here as agreement for allocation of joint management expenses.

Q. That agreement, in the form which you just identified is to be continued after this merger the same as before? A. Yes, sir.

The Examiner: Did I understand you correctly to say that you are an officer of this service company?

The Witness: No, sir. I am an officer of the four operating companies. I have no connection whatever with the Service Company.

(Page 74):

The Examiner: What are the companies with which you said you are connected? I understood one was a subsidiary of the Middle West Corporation.

The Witness: Northwestern Public Service Company is an operating company, and it is a subsidiary of the Middle West Corporation. I am an officer of that company.

The Examiner: That is an operating company?

The Witness: That is an operating company, yes, sir.

The Examiner: Where are they located?

The Witness: Their headquarters are in Huron, South Dakota. They operate in South Dakota and Nebraska.

The Examiner: Is that contiguous territory to this?

The Witness: Yes, sir.

By Mr. Binford:

Q. What do you consider the present prospects for future earnings of the North Dakota and Northern Companies, that is to say, do you expect increased earnings in the near future, or do you think the earnings will decline? Can you make any reasonable prophesy in that respect?

A. Of course, in our territory it is strictly agricultural, and a great deal will depend upon agriculture and weather conditions. We have gotten along extremely well, considering conditions under which we have operated in the past few years, and I do not anticipate any change for the worse, but if we get the rainfall that we hope to get we can probably anticipate

The court received in evidence testimony offered by defendant from the Official Reports of Proceedings before

the Securities and Exchange Commission, Docket No. 59-38, entitled "In the Matter of United Public Utilities Corporation, et al.", being a record of evidence taken at Philadelphia, Pennsylvania, on May 13, 1942, before William W. Swift, Trial Examiner, and Docket Nos. 54-97, 59-38, 59-73 and 70-1110, entitled "In the Matter of United Public Utilities Corporation, et al.", being a record of evidence taken at Philadelphia, Pennsylvania, on October 9, 1945 before Willis E. Monty, Trial Examiner, which testimony together with the page references to said Official Reports are as follows:

(Page 239):

Citizens Company.

Q. The reason I asked that question was, since these contracts were originally concluded, have you kept in close contact with their operations? A. Yes.

Q. Have you had any reason to change your mind over the course of time as to the merits or demerits of that servicing?

A. I would like to say that I have no particular illusions with respect to the value of mutual service company services to holding companies, and for our purposes I have scrutinized the value of those services rather carefully and rather continuously ever since the contracts have been in effect, and it is my judgment that an adequate substitute for those services cannot be provided at the cost that we are subjected to, and that if we did not have this particular arrangement with Middle West Service Company, we would have to make some sort of a substitute proposition for service and advisory services that would cost us probably more than we are now paying.

(Page 240):

Q. What do you base that statement on?

A. I base it on the range and diversity of experts that are available to our companies in the Middle West Service Company, and in building up the cost of providing a substitute I do not assume that the substitute would have as many different experts in it but rather that the advisory service would have to be provided by combination men. Even with combination men I cannot build a supervisory

organization for our group of operating subsidiaries for an overall cost of $35,000 a year.

By Mr. Davis:

Q. That is what you are paying Middle West now?
A. Correct.

By Mr. Scheetz:

Q. Well, of course, the amount of service required by these subsidiaries at any one time or even in any one year is not wholly predictable, is it?

A. Definitely not. The value of these advisory services is in their availability when needed, without paying a heavy overhead to keep them available.

We participate under a joint arrangement with a lot of other public utility companies which collectively provide a higher load factor for that service organization than would be attainable if the number of participating companies were smaller.

(Page 241):

Q. Would you care to comment on the advantages or disadvantages of continuity?

A. It of course has been distinctly to our advantage that the men who were furnishing advisory services to our subsidiaries have an intimate knowledge of the history and of the past developments in the areas that we serve, and it would of course require time and therefore effort and cost to establish that same historical knowledge with any new agency that might give us advisory services.

Q. But, again, that is a price consideration, is it not?

A. I fail to see where it enters into a price consideration.

Q. Well, I mean that if instead of this arrangement you were picking consultants and experts from time to time as you happened to need them, then there is always the question of the cost of educating new men, is that correct?

A. I missed your point when you asked the other question. In making comparative costs up to that time I had in mind only the cost of the Middle West service as service company facilities, as compared with the same type of service which might be furnished by some other comparable organization.

Q. Mr. White, one of the things I wanted to bring out was the history of this arrangement, because it might be

(Page 242):

suggested that the arrangement was purely the result of its history and not the result of a careful study of the situation, and I want to have any comments you are to make on that.

A. Well, I would like to say that as receiver I took particular pains that that should not be the case because I felt and still feel that it is incumbent on me as the head of this reorganized company to justify the retention of practices of the past just as much as it would be to justify a change in those practices.

By Mr. Davis:

Q. Mr. White, I gather from what you have told us in the last 10 or 15 minutes that you are intimately familiar with the staff of the Middle West Service Company.

A. I am reasonably familiar with the heads of departments in Middle West Service Company.

Mr. Scheetz: Mr. Davis, when you say familiar, are you meaning in a social sense or in a professional sense?

Mr. Davis: Professional sense, of course.

The Witness: I would like to say that my contacts with the staff on matters affecting our operation are less frequent than are the contacts of men like Mr. Lakin and other subsidiary heads who are concerned with the details of operation, although I do use those men myself for consultation on problems that come up to me from the

(Page 243):

subsidiary heads.

By Mr. Davis:

Q. Well, in fact, your office in Chicago is in the same office as Middle West Service Company, is it not?

A. No, sir.

Q. That is where I thought it was.

A. That just does not happen to be the fact.

Q. Will you straighten me out on that, please?

A. Well, it is not the fact.

Q. Well, you may not share the same office, but you are in the same building? A. Oh, yes.

Q. And in certain respects you share some of the same services with that company?

A. We have a connection through their switchboard.

Q. Yes.

A. Which saves us the expense of a telephone operator.

Q. Is your suite on the same floor? A. No.

Q. Well, do you use some of their office facilities in some respects? A. No, outside of the switchboard.

Q. The only thing you use is the switchboard?

A. That is right.

Q. None of their accounting facilities?

(Page 244):

A. None.

Q. Or so-called general office facilities? A. None.

Q. Just for the sake of clearing up the record so that I do not gain a false impression—

Mr. Scheetz: (Interposing) It strikes me the record is very clear, Mr. Davis.

By Mr. Davis:

Q. I know every time I try to get you on the telephone I have to reach you through the Middle West Service Company. I can never reach you in care of United Public Utilities Corporation. That is the reason I was led to the conclusion that you shared the same office with them.

A. You could reach me in my own name.

Q. In Chicago? A. Yes.

Q. Well, coming back to the question of your knowledge of the staff of Middle West Service Company, how many engineers have they got on the staff?

A. Of Middle West Service Company?

Q. Yes. A. I would say 12 to 15.

Q. And how many so-called financial, tax, or other corporate experts on the staff?

Mr. Scheetz: Mr. Davis, if you want to know what kind

(Page 245):

of a staff Middle West has, I suppose we could produce a Middle West witness.

If you are trying to ascertain Mr. White's knowledge of the staff of that company to see his ability as a negotiator—

Mr. Davis: (Interposing) No; I am just trying to find out what Mr. White's own knowledge is of the staff of the Middle West Service Company.

Mr. Scheetz: [Al] right. I just wanted to be sure.

Mr. Davis: There was one question that was left unanswered.

The Witness: Yes. I believe it referred to the staff of their tax department.

By Mr. Davis:

Q. Well, their tax, corporate or financial experts.

A. I do not know just how many people there are in their tax department. I have never talked with but one man, who is the head of their tax department, and I believe he has a staff under him. I do not happen to have been in his office, although he has been in mine.

Q. And how about the rest of it?

A. The corporate and financial department—I know those men. However, we do not use their services.

Q. Now, how much of a turnover has there been in that staff in the last 10 or 12 years, since it was formerly the

(Page 246):

staff of the old Middle West Utilities Company.

A. From the time that I first had occasion to observe it, in April, 1932, up until the present time there has been a very drastic revision of the personnel of that staff, and in the key positions I believe there are only one or two—I think offhand of only two—who—

Q. (Interposing) Still remain?

A. (Continuing) Were with the old Middle West organization.

In the minor jobs, there undoubtedly are a number.

Q. So that this historical familiarity which you described with the operating phases or features of the subsidiaries in your company now would not really add up to very much?

A. I so appraise it. I appraise it at considerable value in my own case, and mine only dates back to 1932.

Q. I am not sure that I understand that answer.

A. I set considerable store by my own historical knowledge of the affairs of these companies, and yet mine only goes back to 1932.

Q. But you have already stated that there has been a very substantial turnover in the key men in the Middle West Service Company. A. That is right.

Q. So that except for the fact that a compilation of

(Page 247):

the historical records are in the same office, the familiarity of the key men really does not amount to very much?

A. That statement of yours does not stand up, Mr. Davis, because—

Q. (Interposing) I am just asking the question. I do not know. A. Well, you made it as a statement.

Q. No. I am asking the question. If I said "Does it" you would have the complete question.

A. Yes, that would be a question.

Q. All right.

A. If there should be a complete revision of the Middle West staff in a period of a few weeks or six months' time, the carryover to the new organization from the old organization would be virtually nil, but where that staff is revised in stages over a period of years the continuity of the knowledge of the affairs of subsidiaries within that service organization is not materially impaired even though the organization itself is in a mild state of flux.

Q. Would you concede that in the face of the almost complete turnover? I believe you said there were only one or two men left from the original organization.

A. No, I did not quite say that.

Q. Key men, I mean.

(Page 248):

A. I said in the key positions, that of the men that were in the old Middle West Utilities Company I recall only

two who are members of the staff there today but that I thought that in the minor capacities there were a number of employees who had been retained right through.

Q. Well, would you concede that to a certain extent at least, which might be open to question as far as a scientific gauging of the extent is concerned, the historical association of the old Middle West Service men is of a substantial lesser importance today than it was at some time in the past? A. No, I would not be willing to concede that.

Mr. Davis: All right.

Mr. Scheetz: Before you leave that, Mr. Davis, let us understand this.

By Mr. Scheetz:

Q. Mr. White, Mr. Davis asked you about a turnover in the key men, which you commented on, and then you made a comment on the minor men.

Coming down to the men who have been used on these properties, if you know, what has been the rate of turnover as to them? If you do not know, I will ask the operating men to tell me.

A. Just a moment. I will be very glad to answer that. Of course, your question has just refreshed my memory on a

(Page 249):

third man who is a holdover from the old organization and has been with Middle West for many years and happens to be a man in a key position that we use very frequently indeed, and that is Mr. Buell, the chief electrical engineer, which is a flagrant omission on my part in view of the frequency with which we use his services, and I daresay there might be another just as good that does not occur to me at the moment.

The turnover in that organization has not impaired the value of their services to our operating companies, according to my best judgment.

I would like to repeat, Mr. Scheetz, if it is appropriate, that I have no inclination whatever to sell Middle West Service Company. To me, they mean a benefit to our operating companies and that is all they mean, and my inter-

est in them consists only of a desire to conduct these utility businesses just as efficiently and as profitably as we can. I have no further interest.

By Mr. Davis:

Q. You testified that when Mr. Lakin became president of all these companies you instructed him to build up a new staff to take over these various functions and duties which were formerly performed by the staff of one of these

(Page 35):

Dakota and UPU or the Dakota Public Service and Knife River? A. No.

Q. Is there anything in this picture that has come to your attention at any time since the conversations and negotiations with the representatives of Montana-Dakota were commenced, which would indicate to your mind an absence of arm's-length bargaining? A. No.

Mr. Scheetz: Cross-examine.

(Witness excused.)

Mr. Scheetz: Mr. Examiner, before Mr. Oakley begins his testimony I would like to incorporate by reference in the notes of this proceeding the testimony appearing in other files of the Commission, namely, File No. 43-185, hearing May 8th, 1939, Notes pages 1 to 113 inclusive and 142 to 145 inclusive. File No. 59-38, hearings on May 15, and 16, 1942, notes pages 388 to 604, inclusive, File No. 54-121, hearing April 23, 1945; notes, pages 31 to 35 inclusive, 37 to 38, 42 to 53 inclusive.

(Page 36):

These references include a description of the systems, properties of the Dakota Service Company and the Knife River Coal Mining Company, the data on original cost findings of the two companies, depreciation studies, questions of management, an elaborate description of the interchange capacity arrangement with Northwestern and of the joint management agreement between the Dakota-Public Serv-

ice Company, Knife River and Northwestern. Those are only some of the items included there. Also, Mr. White in his testimony referred to testimony taken in proceedings docketed as numbers 54-97, 59-73, 59-38, notes of testimony of August 8, 1944, at pages 1172-3, 1176-8 and UPU P-9. I ask that that testimony and exhibits be incorporated by reference.

Mr. Sweetwood: No objection.

The Examiner: Then the record may show that the testimony which has been identified and referred to by counsel for the applicant may be incorporated by reference in these proceedings, there being no objection to such incorporation.

(The incorporation by reference is noted.)

Whereupon:

KENNETH E. OAKLEY,

a witness produced by and on behalf of the Applicant, and having been first duly sworn, was examined and testified as follows:

(Page 94):

Q. I call your attention to the Day & Zimmermann report in evidence as Montana-Dakota Utilities Company Exhibit No. 15 and ask you if you would care to comment on the portion thereof commencing on page 8, entitled "Economies of Combined Operations"?

A. Montana-Dakota Utilities Company employed the services of Day & Zimmermann, for the purpose of making a physical survey of the operating plant and facilities of Dakota Public Service Company with a view to determining possible economies to be effected in the proposed acquisition.

In the report of Day & Zimmermann, beginning on page 8, there is set forth the economies to be expected. One is power supply. The Day & Zimmermann report speaks for itself, but in general concludes that very substantial economies will be effected as the result of the interconnection of the two properties and the rearrangement of certain

power requirements now in effect on the properties of Dakota Public Service Company.

The report on page 10 sets forth advantages to be gained by the elimination of an interchange power contract between Dakota Public Service Company and Northwestern Public Service Company. On page 10 of the Day & Zimmermann report there is set forth the opportunity for the elimination of transmission line charges now being charged Northwestern Public Service Company by Dakota Public Service Company.

(Page 95):

On page 11 of the Day & Zimmermann report it is pointed out—is pointed out the considerable advantage to be gained in the elimination of reserve capacity charges now made necessary by reason of the power facilities of Dakota Public Service Company which will be considerably altered upon interconnection with the properties of Montana-Dakota Utilities Company.

There is also set forth on page 11 certain charges resulting from so-called interchange of power, the paragraph being identified as "Energy charge."

On page 13, under "Transmission system improvements" there is set forth certain advantages to be gained in improvement of the transmission systems.

On page 14 there is set forth savings to be effected by the elimination of duplicate office expenses.

The total of these savings set forth in the report is considerable.

On page 16 of the report there is set forth savings to be made by the elimination of a management service contract with the Middle West Service Company of Chicago.

Q. Mr. Gamble, it is understood from the report that Dakota Public Service Company has a management service contract with Middle West Service Company. Would you intend to continue or cancel that contract?

A. We would cancel that contract.

(Page 96):

Q. It is also understood that Dakota Public Service Company has a joint management contract with Northwestern Public Service Company providing for mainte-

nance of a joint office at Huron. Would you continue or terminate that arrangement?

A. That arrangement would be terminated as rapidly as the office and other parts of the company carried at Huron could be transferred and consolidated with the present operations of Montana-Dakota Utilities, I might conclude by referring to page 23 of the Day & Zimmermann report wherein is summarized the annual savings to be made by the various recommendations contained in the Day & Zimmermann report as set forth on page 23. As set forth on page 23, the annual savings would amount to approximately $164,000.

Q. I call your attention to page 21 of the Day & Zimmermann report with respect to rates showing that there is a considerable difference between new Montana-Dakota Utilities Company rates now in effect and present Dakota Public Service Company rates. For example, the customer's bill consuming 181 kilowatt hours per month in the largest communities served by Montana-Dakota Utilities Company is charged $5.10, whereas the same customers in the Dakota Public Service Company communities are charged $6.45.

Will you make a statement as to what your rate policy will be when you acquire—in the event you acquire ownership of Dakota Public Service properties?

(Page 97):

A. The present plan of Montana—it is the present plan of Montana-Dakota Public Utilities Company to reflect immediately in rate reduction all possible savings as the result of this merger of the properties. It is the further plan of the company to make further reductions as fast and as rapidly as the development of business will warrant and as further savings can be effected.

I might point out at this time that the policy of Montana-Dakota Utilities Company in the matter of rates has been for many years a standardization of rates throughout the territory on a uniform basis to as nearly a single rate as is possible. At the present time there is a difference in the rates as between the largest communities served by Montana-Dakota Utilities Company and the smaller communities served for residential service of not

to exceed 50 cents on any amounts of electricity consumed by the customer.

Q. That is 50 cents per month?

A. 50 cents per month. It will be the policy of Montana-Dakota to work toward a uniform rate in the territory of the proposed acquisition as rapidly as possible so that within such times as earnings and economic conditions present, the entire service area of Montana-Dakota including the service area to be acquired will have substantially uniform rates.

(Page 98):

Q. Are you able to state what action Montana-Dakota Utilities Company will take with respect to the present interchange contract with Northwestern Public Service Company?

A. It will be necessary to continue the present interchange contracts until such time as Montana-Dakota can build its interconnections and determine the exact power requirements and the power available in the territory. It will be our endeavor, however, to as rapidly as possible reach a satisfactory basis of interchange with Northwestern Public Service Company.

Mr. Christopherson: Mr. Examiner, I ask leave to reserve as Montana-Dakota Utilities Exhibit No. 17 a number for the order to be issued by the Federal Power Commission in Docket No. IT-5958 in the event an order is issued by this Commission.

Mr. Sweetwood: No objection to that.

Defendant's Exhibit 296 was received in evidence. It consists of a letter from Leon M. Fuquay, Secretary of the Federal Power Commission, to John C. Benson dated October 22, 1946, re: Docket No. IT-6004 Montana-Dakota Utilities. It states in part as follows:

This is to acknowledge your letter of October 11, 1946 relative to reception by the Montana-Dakota Utilities Company of communications from the Commission authorizing Mr. Clarence M. Alliman to make certain field investigations and calling the Montana-Dakota Company's

attention to the fact that that Company failed to file a notice of succession as required by the Commission's rules and in which you state that it "would seem inadvisable for Montana-Dakota Utilities Company to file a notice of succession" at this time.

The Company has been in default and has violated the Commission's rules since thirty days after the purchase of the Dakota Public Service Company assets. A notice of succession should be filed immediately referring back to the original date of succession. However, the filing of the notice of succession will not jeopardize Montana-Dakota's rights in the present complaint before the Commission in Docket IT-6004.

Defendant's Exhibit 297 was received in evidence. It reads as follows:

MINNEAPOLIS 2

October 11, 1946.

Leon M. Fuquay, Esq.,
Secretary
Federal Power Commission,
Washington, D. C.

FED. P. C. ..OCT.14 1946.

Dear Mr. Fuquay:

100-2 CORRES

In re: Docket No. IT-6004
Montana-Dakota Utilities Co.

We have received from Montana-Dakota Utilities Co. copies of your undated communications to that Company advising of the authorization to Mr. Clarence M. Alliman to make certain field investigations and calling that Company's attention to Sections 35.6 and 200.51 of the Rules of Practice and Regulations of your Commission and the fact that that Company has filed no notice of succession to Dakota Public Service Company Rate Schedule F.P.C.No.4 or Supplement No.1 to Rate Schedule F.P.C.No.4.

We have examined the order of the Commission with reference to the acquisition of the Dakota Public Service Company properties by Montana-Dakota Utilities Co. and we have examined Sections 35.6 and 200.51. Passing for the time being the question of the applicability of the aforementioned sections to the purchaser of the assets of Dakota Public Service Company, we find ourselves faced with a very practical problem. Section 200.51 contains language to the effect that the utility filing the notice of succession provided for in said section "adopts, ratifies and makes * * its own, in every respect" the rate schedules listed in the notice. There is pending before your Commission at the present time a complaint objecting to the rate schedules referred to in your letter on various grounds. Under the circumstances, it would seem inadvisable for Montana-Dakota Utilities Co. to file a notice of succession.

We shall be pleased to discuss this matter further with you or with the Commission in the event that it is the opinion of the Commission that some form of notice of succession should be placed in your files, although it seems to us that your record is complete at the present time.

Very truly yours,
FAEGRE & BENSON,
By Benson

JCB:FH.

Defendant's Exhibit 297.

Defendant's Exhibit 298 was received in evidence. It consists of certain correspondence, including:

Letter from Fuquay to plaintiff dated October 4, 1946, re Docket No. IT-6004 with reference to the complaint filed by plaintiff against defendant with the FPC. It advised that Mr. Clarence L. Alliman, who was at that time a member of the staff of the Commission, had been authorized by the Commission "to make certain field investigations, including an inspection of your properties and to collect data pertaining to the utilization of the interconnection facilities". It further requested that data relating, among other things, to production and fuel costs at the generating stations of Beulah and Bismarck, to estimate of losses in transmission of blocks of 1,000 to 5,000 KW from Beulah to defendant, and to loads for 1946 and 1947 in the area formerly served by Dakota Public Service Company be made available to Alliman.

A similar letter by Fuquay to defendant under the same date, requesting that there be made available to Alliman by defendant, among other things, data relating to production and fuel costs by generating stations, to interconnection facilities including the investment therein and annual operating costs, receipts and deliveries of energy over the same from 1930 to 1946, and log sheet records of loads from 1930 to 1947, and also records of Operating Committee meetings.

Defendant's Exhibit 299 was received in evidence. It reads as follows:

100-2 FORMAL

Northwestern Public Service Co.

Montana-Dakota Utilities Co., 831 Second Avenue South, Minneapolis, Minnesota, on this 5th day of November, 1946, hereby ratifies, adopts and makes its own in every respect all applicable Rate Schedules and Supplements thereto listed below, heretofore filed with the Federal Power Commission by Dakota Public Service Company, effective October 19, 1945, to-wit:

Dakota Public Service Company
Rate Schedule FPC No. 4

Supplement No. 1 to
Rate Schedule FPC No. 4;

subject, however, to all exceptions, objections and complaints heretofore filed with the Federal Power Commission in Docket IT-6004.

MONTANA-DAKOTA UTILITIES CO.,

By Odell W. Smith
Vice-President

FEDERAL POWER COMMISSION
DOCKETED
NOV 12 1946

FEDERAL POWER COMMISSION
NOV 12 1946
RECEIVED

47 (1) D

1581

Defendant's Exhibit 299.

Defendant's Exhibit 300 was received in evidence. It consists of a certification by Fuquay dated December 12, 1947 that in the files of FPC there is no record of any notice given by plaintiff of the termination of defendant's rate schedule FPC No. 6 and supplement No. 1 thereto.

Defendant's Exhibit 313 was received in evidence. It consists, among other documents, of the following:

Excerpts from the minutes of a meeting of the Federal Power Commission held January 14, 1936, showing, among other things, that the time within which North Dakota Power & Light Company, Northern Power and Light Company and defendant should file rate schedules under FPC Order No. 36 had been extended to January 31, 1936.

Letter from Francis H. Scheetz to the Federal Power Commission dated November 22, 1939, in which he advised the Commission concerning the merger of North Dakota Power and Light Company and Northern Power & Light Company into Dakota Public Service Company, and which reads in part as follows:

> "Entirely through my oversight as counsel, the officers of Dakota Public Service Company were not advised to file Notice of Succession as prescribed by Section 200.51 of the Regulations of your Commission."

Letter from Federal Power Commission to said Scheetz dated December 7, 1939, replying to the aforesaid letter of Scheetz, in which the Commission, among other things, requested that Certificates of Concurrence in defendant's rate schedules FPC Nos. 3 and 4 be filed by Dakota Public Service Company.

Letter from said Scheetz to the said Commission dated December 8, 1939 advising that its letter of December 7, 1939 had been referred to "our correspondent, Karl Goldsmith, Esq., of Pierre, South Dakota, who is local counsel for the Company" and that Scheetz had asked him to have the requested documents executed and forwarded directly to the Commission.

Letter from Karl Goldsmith, of Martens & Goldsmith, to the Commission dated December 26, 1939 enclosing the above requested Certificates of Concurrence and asking that the Commission enter an order making said certificates effective as of July 1, 1939.

Letter from the Commission to Martens & Goldsmith dated January 6, 1940 acknowledging receipt of the aforesaid Certificates of Concurrence and applications for retroactive effective dates thereof and advising, among other things:

> "It will not be necessary for the Commission to issue orders allowing the Certificates of Concurrence to become effective on July 1, 1939."

Defendant's Exhibit 316 was received in evidence. It reads as follows:

Defendant's Exhibit 316.

United States of America
Federal Power Commission

Commissioners { Claude L. Draper, Acting Chairman, Basil Manly, John W. Scott and Clyde L. Seavey. Leland Olds not participating.

September 30, 1941

In the Matter of
Montana-Dakota Utilities Company }

Order Allowing Supplemental Rate Schedule to Take Effect.

It appearing to the Commission that an application has been filed by the Montana-Dakota Utilities Company, requesting that Montana-Dakota Utilities Company Supplement No. 1 to Rate Schedule FPC No. 1, providing for the sale of electric energy to Mountain States Power Company,

be allowed to take effect as of January 1, 1941; and the Commission having considered the same;

It is ordered that:

(A) The aforesaid supplemental rate schedule be and it is hereby allowed to take effect as of January 1, 1941;

(B) The aforesaid supplemental rate schedule shall be deemed to have been filed and published in compliance with the Federal Power Act;

(C) Nothing contained in this order shall be construed as constituting approval by this Commission of any service, rate, provision, or condition contained in the contract referred to herein;

(D) This order is without prejudice to any findings or orders which may be made by the Commission in any proceedings now pending, or hereafter instituted, against the applicant.

By the Commission.

LEON M. FUQUAY,
Secretary.

(Seal)

Defendant's Exhibit 317 was received in evidence subject to the objection of plaintiff that the exhibit referred to the plaintiff and Mountain States Power Co., a matter not in any way involved in the instant controversy. It consists of a letter dated September 9, 1941 from plaintiff to FPC, which was marked as received by FPC on September 11, 1941. It contains information regarding plaintiff's Supplement No. 1 to its Rate Schedule FPC No. 1, and includes among others the following statement: "It is proposed to make the amended rate effective as of January 1, 1941."

The following testimony offered by defendant was received in evidence:

(Read from deposition of LEON M. FUQUAY:)

Q. Can you state, Mr. Fuquay, whether that folder contains all the communications and all the information which was before the Federal Power Commission when it entered the order to which I have directed your attention?

A. No, sir, I cannot.

Q. Is that folder the only folder containing relevant matters as to the application and orders to which I have been referring, and about which I have been inquiring?

A. I do not know whether even this folder contains rele-

vant matter. I am not in a position to pass upon that.

Q. Have you ever been a member of the Federal Power Commission? A. No, sir, I have not.

Q. If the testimony you gave yesterday or today in reply to any inquiry by Mr. Benson, reads to the effect that you are stating that the information or material on which the Federal Power Commission acted in a given or particular matter, would you care to add anything to that testimony?

A. I do not recall the testimony given, but when I attempt to say that I have had a search made of the files of the Commission, I meant those files relating to the particular subject matter which we were able to locate which were in the possession of the commission.

I do not think that I stated what constitute the whole records before the Commission, but merely that we had made a search of the records which are official public records, and that I brought down with me all such records we could find, that were in the Commission's possession, not before the Commission or considered by the Commission: I do not know what the Commission considered when it took its action; the action speaks for itself.

Q. And this is the only folder under the caption contained on the face thereof, which the files of the Federal Power Commission contain under that caption?

A. I do not think this is the only folder before the Federal Power Commission with this caption.

Q. Well, may I have the other folders made available, then?

Mr. Fuquay, by "any other folders" I meant any other folders available to the public.

A. I have had a check made, and am advised that this is the only folder containing the formal official public records in this docket.

Q. Well, Mr. Fuquay, Mr. Benson inquired of you as to Northwestern Rate Schedules FPC Nos. 3, 4 and 6, and asked you in substance, I think, whether you had produced all the evidence, testimony and records which were before the Commission in the entry of orders relating to those rate schedules. Does your answer to my last question stand? A. It does.

Q. As to the orders covering Northwestern Rate Schedule FPC No. 3, 4 and 6?

A. I do not recall the testimony, if any, which I gave in response to the question by Mr. Benson, but you see, even

if there were such testimony, it related to my efforts to find among the official public records of the Commission all documents which were in the possession of the Commission and filed in the proceeding involved, which were received, according to the [Commiss's] "Received" stamp prior to a certain date. At no time have I stated, as I recall, that the documents which I produced here were all the documents before the Commission. I stated that I had a diligent search made of the public records of the Commission, and those were the only documents that I could find in the Commission's possession on the particular subject matter.

Q. Do you know of your own knowledge all of the evidence, testimony and records received by the Commission before acting upon that application of any rate schedule?

A. No, sir, I do not.

Defendant's Exhibits 318 and 319 were received in evidence. They are, respectively, copies of the complaint and of the amendment and supplement to complaint filed by plaintiff with the Federal Power Commission and are the same, respectively, as Defendant's Exhibits 4 and 5 to its answer herein (R. pp. 149 and 163, supra).

(Read from deposition)

Q. Now, Mr. Fuquay, in accordance with my request, have you caused a search to be made of the official files of the Federal Power Commission to ascertain whether or not any [application] have ever been filed by R. M. Heskett, F. R. Gamble, Cecil W. Smith, or H. N. Elvig, to hold interlocking positions as directors or officers pursuant to the provisions of the Federal Power Act?

A. Yes, I have had a check made of that.

Q. And did you find any applications to hold such positions? A. No, I was not able to find any.

Q. Now, Mr. Fuquay, in accordance with my request, did you cause a search to be made of the official public files and records of the Federal Power Commission to ascertain whether the Commission has ever instituted any complaints on its own motion against Northwestern Public Service

Company, Northern Power and Light Company, North Dakota Power and Light Company, or Dakota Public Service Company?

A. I have caused such a search to be made, yes.

Q. And did you discover in the files, official files and records of the Commission any such complaint instituted by the Commission against any one of those four companies? A. No, I did not.

Q. And in accordance with my request, did you also cause a search to be made of the official public files and records of the Commission to ascertain whether or not a complaint had been filed, a formal complaint has been filed by anyone against Northwestern Public Service Company, Northern Power and Light Company, North Dakota Power and Light Company or Dakota Public Service Company prior to the filing of the formal complaint by Montana-Dakota Utilities Company in August of [illegible]?

A. I have had such a search made, yes.

Q. And did your search reveal any such complaint, disclose any such complaint having been filed?

A. No, it did not.

By Mr. Benson:

Q. What I am trying to find out is, in my examination before, I asked you for the communications concerning the application to make Northwestern Public Service Company's Rate Schedule FPC No. 3 effective retroactively, and I want to ask you now whether, if I asked you for all of the rate correspondence file with Northwestern Public Service Company concerning the application to make Northwestern Public Service Company's Rate Schedule FPC No. 4 effective retroactively, you would produce this same file No. 100-2 entitled Northwestern Public Service Company Rate Correspondence, Part I?

A. Yes, I would produce this same file folder, but without any representation whatever that I know of my own knowledge that these are the only documents or correspondence between Federal Power Commission and Northwestern Public Service Company.

Defendant's Exhibits 320, 322 and 324 were received in evidence. They consist of certified copies of applications

to the Federal Power Commission for authority to hold interlocking positions in plaintiff and other companies by C. C. Yawkey, Ben Alexander, and Aytch P. Woodson, respectively, giving in general the same kind of information as that set forth in Plaintiff's Exhibit 38 (R. p. 324, supra).

Defendant's Exhibits 321, 323 and 325 were received in evidence. They are certified copies of orders of the Federal Power Commission authorizing the aforesaid applicants to hold the interlocking positions for which authorization had been sought, respectively, and are identical with Plaintiff's Exhibit 204 except for the different names and docket numbers of the applicants.

There were offered by defendant and received in evidence portions from the deposition of FREDERICK R. GAMBLE on adverse examination which are as follows:

The witness testified that his name was Frederick R. Gamble, residing in Minneapolis, Minnesota; that he was Treasurer, Assistant Secretary and Director of plaintiff; that he had been a Director for 7 or 8 years, Treasurer continuously since 1931 or 1932 and Assistant Secretary since 1925; that he was a stockholder of plaintiff holding approximately 3,200 shares of common stock, which was substantially the same amount as he held during 1945.

Q. When is the first time, Mr. Gamble, that you recall that the Montana-Dakota Utilities Co. became interested in acquiring the properties of Dakota Public Service Company?

A. Well, I am not sure but my best recollection would be some time in 1944.

Q. And that price was agreed upon prior to the investigations made by Montana-Dakota of the properties and the physical properties and the records and so forth of the Dakota Public Service Company?

A. Well, I can't say it with a certainty, but that's my recollection.

Q. I say that's your best recollection? A. Yes.

Q. In any event that's the one that was put in the contract? A. That's correct.

Q. What, if anything, did you have to do with those investigations. First let us find out whether Mr. Heskett did give you any instructions on that?. A. He did.

Q. Did Montana-Dakota Utilities Co. at that time want to buy Dakota Public Service Company and the Knife River properties without regard to the result of your investigations?

A. No, I would say if there was any alarming difference between the representations of Mr. White and the actual conditions as we found them, it would be a matter to consider at that time.

Q. It would be a fair statement to say that the investigations, at least in part, were made to satisfy yourself that the things which he had told you were true and correct?

A. Yes.

Q. Do you know how long these investigations continued, approximately? A. Several months.

Q. They were not a perfunctory thing? A. No.

Q. Now, was there any examination made by engineers in connection with this investigation and examination of the properties and records of the Dakota Public Service Co.? A. Yes.

Q. That was handled, was it, by someone on the outside, some engineering firm? A. Yes.

Q. Was that Day & Zimmerman, Incorporated? A. Yes.

Q. Who engaged Day & Zimmerman [Incorporation] for that purpose? A. I did.

Q. When did you engage them, approximately?

A. In the spring of 1945.

Q. Did you have any prior experience with Day & Zimmerman in connection with engineering studies, Montana-Dakota? A. Yes.

Q. How long had they rendered service to you in an engineering capacity? A. Oh, fifteen or eighteen years.

Q. What was the occasion for rendering that service?

A. Oh, there were a number of occasions, purchase of property, the issuance of bonds.

Q. You mentioned the purchase of properties. Is that electric utility properties?

A. No, I believe the purchases I had in mind were gas properties.

Q. Gas properties, but utilities? A. Yes.

Q. Now, was Day & Zimmerman [Incorporation] to render any report? A. Yes.

Q. Did they render a report? A. Yes.

Defendant's Exhibit 326, which is also referred to as Defendant's (Minneapolis) Exhibit 4, was received in evidence. It consists of a 26 page report by Day & Zimmerman, Inc., dated October 8, 1945, received by plaintiff on or about the date thereof. It states, among other things: "In accordance with your request, we have made a study of the advantages to be expected as a result of combined operation of the properties and business or Montana-Dakota Utilities Co. and Dakota Public Service Company. * * * Our investigation and study is based on first-hand contact with and observation of the developments and accomplishments" of plaintiff "over the past twenty years, and field and office studies of the property and business of Dakota Public Service Company in May and June of this year [1945]. It is our opinion that the physical integration of these properties is both possible and desirable and that combined operation of the property and business offers immediate advantages to both companies and tangible benefits in the near future to the general public in the territory now served by Dakota Public Service Company." It sets forth the total net effective plant capacity, expressed in KW, for each of the generating plants of Dakota Public Service Company. The aggregate effective plant capacity for the four principal plants was stated to be 12,950 K. W. and for the six small standby stations, 1,005 K. W. The report sets forth the maximum demand of Dakota Public Service Company's system in 1944 at 13,230 KW. The report sets forth production statistics of the 4 principal generating stations of Dakota Public Service Company and also the following tabulation in reference to the six standby stations:

	Stand-By Generating Stations						
	Dickinson	Mandan	Ellendale	Gettysburg	Lemmon	Mott	Total
Peak Demand—kw.....	300	.....	150	110	225	200	985
Net kwhr Generated....	12,900	65,944	45,080	2,240	9,237	3,996	82,651
Total Production Cost..	$11,139	$ 9,991	$11,488	$ 1,461	$ 2,424	$ 2,040	$38,543
Cost per kwhr.....	.8634	....	....	.6522	.2635	.5105	....
Kind of Fuel.....	Coal	Coal	Coal	Oil	Oil	Oil	
Unit	Ton	Ton	Ton	Gal.	Gal.	Gal.	
Quantity	5,260	7,407	2,342	561	2,053	605	
Avg. Fuel Cost per Unit	$2.74	$2.22	$3.25	$.0990	$.0940	$.0870	
Avg. Fuel Cost per kwhr	$1.1172	....	....	$.2479	$.2089	$.1316	

The report also states as follows:

> "The elimination of the net interchange sale of 10,000,000 kwhr to Northwestern Public Service Company from the estimates for Dakota Public Service Company can only be considered feasible because of the possibility of physical interconnection with Montana-Dakota Utilities Co. and the resultant availability of Fort Peck power. In order for Dakota Public Service Company to terminate the interchange power agreement independently of integration, it would be necessary for that Company to secure additional generating capacity, probably to the extent of 5,000 kw."

The report also reviews separately the transmission line charges ($1,666.66 per month), the reserve capacity charge ($13.20 per year per kw) and the energy charge (5 mills per kwh).

The report concludes:

> "We believe that all the foregoing factors indicate the possibility for advantages, as a result of integration, in the form of savings in operating cost to the company and improved electric service at decreased cost to the consumers."

Q. You mentioned conferences with various personnel of Day & Zimmerman, Inc., during the course of this study; at any time during any of those conferences did anyone

from that organization complain to you or report to you that they were denied access to any record or property or facility on the part of the Dakota Public Service Company which they desired to examine?

A. No, I can't recall any complaints.

Q. So far as you know they were afforded complete access to whatever information they desired?

A. As far as I know.

Q. Now, diverting for a minute to another line of inquiry. You testified, did you not, before the Securities & Exchange Commission on October 9, 1945? A. Yes, I did.

Q. And in proceedings entitled, "The matter of United Public Utilities Corporation, et al., Docket No. 54-97, 59-38, 59-73, and 70-1110? A. Yes.

Q. All right, you were sworn before you testified before the S. E. C. on October 9, 1945? A. Yes.

Q. Your testimony as given on that date appears in the transcript beginning at Page 71, does it? A. Yes.

Q. Now, I want to refer for just a few minutes to that Day & Zimmerman report of October 8, 1945.

A. Is that the certificate of value or the integration report?

Q. The integration report number 4357. Have you been over this report recently? A. Not recently.

Q. Does that refresh your recollection with reference to any recommendation that the Day & Zimmerman people made with reference to terminating the 1941 interchange contract? A. Yes.

Q. Did they recommend termination of it?

A. I believe they did.

Q. Well, do you recall testifying about this report before the S. E. C. on October 9, 1945? A. Yes.

Q. Now, Mr. Gamble, you have heard what I have just read into the record. You did refer to the Day & Zimmerman report at that time before the S. E. C., did you?

A. Yes.

Q. And you were at that time aware of the recommendations contained in that report, Defendant's (Minneapolis) Exhibit 4? A. Yes.

Q. I believe you mentioned that you retained outside help to make some of those examinations. Did you retain Arthur Young & Company to make any investigation or

examination of the books, records and properties of the Dakota Public Service Company? A. Yes.

Q. When did you retain that firm to do that work?

A. I am not certain of the date.

Q. Approximately? A. Approximately May of 1945.

Q. Sometime during May of 1945? A. Yes.

Q. What was the purpose of their retainer?

A. To make an examination of the books and accounts of the Dakota Public Service Company, with a view to preparing such information in their official form for use with our application to Federal Power Commission and to the Securities & Exchange Commission.

Q. Were they to make a report to you, to Montana-Dakota? A. To Montana-Dakota, yes.

Q. Did they make such a report? A. Yes.

Q. Anybody from Arthur Young & Company ever state to you that they were refused examination of any document, records [of] book which they requested? A. No.

Q. Never made any complaint on that score? A. No.

Q. As far as you know they did have complete access to the books and records that they desired to examine?

A. Yes.

Q. Had you had occasion to retain or employ Arthur Young & Company for Montana-Dakota Utilities Co. on prior occasion? A. Yes.

Q. Were they your regular auditors? A. Yes.

Q. How long were they the regular auditors of the Montana-Dakota prior to May of 1945?

A. I believe I first employed Arthur Young in 1925 or early 1926.

Q. And were they the regular auditors of Montana-Dakota through all of the intervening years after 1925?

A. Yes.

Q. And are they the auditors of that company at the present time? A. Yes sir.

Q. During the course of their examination did Arthur Young & Company also review information in Mr. White's office in Chicago? A. Yes, I believe they did.

Q. As a matter of fact, didn't you request Mr. White to make certain information available to them in connection with that examination? A. Yes.

Q. And did Mr. White comply with your request?

A. Yes.

Q. And there was never, I take it, any occasion in which you requested any such information that it was not forthcoming to Arthur Young & Company? A. That is correct.

Defendant's Exhibit 327, which is also referred to as Defendant's (Minneapolis) Exhibit 45, was received in evidence. It consists of the report by Day & Zimmerman, Inc., dated October 23, 1945, concerning the fair value to plaintiff of the electricity utility system of Dakota Public Service Company in connection with the acquisition thereof by plaintiff. It was received by plaintiff on or about the date thereof. It reads in part as follows:

> "Based upon our investigation of the gross electric utility property additions so acquired from Dakota Public Service Company, consisting of electric utility system formerly owned by that Company, we are of the opinion that the fair value of those properties to Montana-Dakota Utilities Co. as of April 30, 1945, as of August 31, 1945, and as of the present date, is substantially more than the amount of $5,208,818.14, which was the depreciated original cost thereof at August 31, 1945, and is not less than $6,600,000."

Q. I asked you yesterday afternoon, Mr. Gamble, about the work done by Arthur Young & Company and the reports rendered by them, and also with reference to the work done by Day & Zimmerman, Inc., in the two reports which were rendered by them, being Defendant's Exhibit 4 and Defendant's Exhibit 45, which is their certificate of valuation, and I will ask you now whether you were familiar with both of those reports? A. Yes.

Q. Did you read that at about the time they were rendered? A. At about the time we received them.

Q. That's both Arthur Young & Company and the Day & Zimmerman reports? A. That is correct.

to be paid to Northwestern Public Service Company by Northern Power & Light Company, and my oral report on that was that in my opinion the $20,000 charge was very reasonable from the standpoint of Northern Power & Light Company.

Q. Did you make any recommendations at that conversation with Mr. White in connection with your report as to what would be necessary, in your judgment, to put on the properties of the Dakota subsidiaries of United Public Utilities Corporation, if the interconnection facilities were not in existence or were discontinued? Did you do that?

A. Yes, sir.

Q. Will you please tell us what you said, in substance?

A. I reported that it would take additional firm capacity on the properties of Northern Power & Light Company in the southern and southeastern portion of the interconnected Dakota system of Northern Power & Light Company and North Dakota Power & Light Company; that it would require a minimum of 1,000 k. w. in the Ellendale section, 1,000 k. w. in the Mobridge section, and 500 k. w. at Gettysburg.

Q. By kilowatts you mean additional generating capacity? A. Yes.

Q. Did you have in mind or recommend to Mr. White any particular type of generating capacity?

A. I had suggested it would probably be most practical for the installation of Diesel generating units at those points, and, in addition, the construction of an interconnecting line from Ipswich to Barnard.

Q. And did you have any opinion as to the approximate cost at that time of those units and transmission line, which you talked about and recommended to Mr. White?

A. Approximately $480,000 for the additional generating units and the transmission tie line from Ipswich to Barnard.

Q. And did you report that to Mr. White, that that was your estimate of the cost? A. Yes sir.

Q. Well, while you were making your report to Mr. White, did you have any discussion with him as to any particular advantages or benefits which you deemed to flow to Northern Power & Light by reason of the interconnections? A. Yes sir.

Q. Will you please tell us what that discussion was, in substance?

A. I reported to Mr. White that the interconnection facilities with Northwestern Public Service Company in fact provided firm power in the eastern and southern section of the interconnected transmission system of Dakota. That this interconnection regulated the voltage in the eastern and southern section of the transmission system. It provided ample power for the operation of oil switches for isolating sections of the line which might be in fault.

Q. What do you mean by regulated the voltage?

A. The power supply coming from the northern part of the interconnected transmission system of Dakota into the southern portion of the transmission system would have a very wide voltage regulation during a large part of the time, a voltage regulation which was too wide for practical operating purposes.

Q. When you say "regulate the voltage", is that synonymous with the term "stabilize the voltage"? A. Yes.

Q. Did you have any discussion in that report as to whether or not the interconnection facilities gave any standby capacity for the Dakota properties or their system?

A. Yes, at that time the peak load of the interconnected Dakota system was—oh, would have been about 2,000 kilowatt low with a 3500 kilowatt unit out of service at the [Buelah] plant.

Q. By the Dakota system, do you mean the North Dakota Power & Light Company and Northern Power & Light Company combine? A. That is what I intended, yes.

Q. How about duplicate service? Was there any discussion about that?

A. Yes, I reported to Mr. White that the interconnection at Gettysburg provided duplicate service for that town as well as many of the other towns through the eastern and southern part of the system.

Q. Now, if I remember correctly, you testified that when you were out there Mr. White asked you to look into, generally, the question of this five mill energy interchange rate. Did you make any report to Mr. White during this conversation you are just testifying about with reference to that question? A. Yes sir.

Q. Will you please tell us what you said touching on that point?

A. The information which I secured on the property indicated that Northern Power & Light Company sales of power to Northwestern Public Service Company as dump power provided a margin of profit to North Dakota Power & Light Company and Northern Power & Light Company.

Q. That rate to Northwestern at that time was five mills per k. w. h.? A. Yes.

Q. Were you satisfied, Mr. Lakin, from your investigation and the matters which you learned during the course thereof, that the five mill rate was fair insofar as Northern Power & Light and North Dakota Power & Light Company were concerned? A. Yes sir.

Q. Did you tell Mr. White that you considered it fair? A. Yes sir.

Q. Does that pretty well cover the report you made to Mr. White, or is there anything you care to add?

A. I believe that covers everything.

Q. Mr. Lakin, did you attend a meeting of the board of directors of United Public Utilities Corporation on or about June 30, 1936, in Philadelphia, Pennsylvania?

A. Yes sir.

Q. You were not a director of that corporation at that time, were you? A. No sir.

Q. Who invited you to attend that meeting, if anyone?

A. Mr. White.

Q. Was Mr. Scheetz also present? A. Yes sir.

Q. Who is he?

A. He is general counsel for United Public Utilities Corporation.

Q. Was he general counsel at that time? A. Yes sir.

Q. At that meeting did you make a report to the directors of United Public Utilities Corporation? A. Yes sir.

Q. What was the subject matter of your report?

A. The subject matter was the interconnection agreement between Northern Power & Light Company and Northwestern Public Service Company.

Q. Do you recall in substance what you reported to the board? A. Yes.

Q. Was that report oral or written?

A. The report was oral.

Defendant's Exhibit 328 was received in evidence subject to plaintiff's objection that it was immaterial. It reads as follows:

Defendant's Exhibit 328.

At your request we have made an examination of Knife River Coal Mining Company for the purpose of determining the fair value to you of the outstanding securities of that company consisting of 673 shares of common stock and $205,746.17 of notes to be purchased by you for a base price of $547,461.57, being the net book value at April 30, 1945 of the securities to be purchased, such securities to be purchased from the United Public Utilities Corporation simultaneously with your purchase of the outstanding securities of Dakota Public Service Company.

We are of the opinion that the outstanding securities of Knife River Coal Mining Company had a value to you at April 30, 1945 of approximately their net book value.

In arriving at our judgment in this matter we have examined and accepted as correct the various data in the Company's possession dealing with the description of the property, ownership, leases, contracts and the extent of recoverable coal reserve. We have also examined and accepted as correct the financial report of the Company dated April, 1945, containing the balance sheet and comparative income schedules; a detailed schedule of operating revenues, expenses and income for the five years 1940 to 1944, inclusive, and the four months ended April 30, 1945; and the record of dividend payments for the past five years and various other pertinent data.

This Coal Company was developed primarily to furnish coal to the Beulah generating plant which is immediately adjacent to the mine. At the present time coal is supplied by the Coal Company to other generating plants of Dakota Public Service Company, in addition to the Beulah plant, and also to generating plants of Northwestern Public Service Company, whose electric property is interconnected with the Dakota Public Service Company system. The Coal Company also sells coal to the general public. For the past five years, 1940 to 1944 inclusive, the annual sales to the

Q. Give us the substance of that report?

A. The report was substantially the same as the report which I had given to Mr. White on June 19, 1936.

Q. Which you have just previously described to us in your testimony this morning? A. Yes sir.

Q. And did it cover the $20,000 rate charge? A. Yes sir.

Q. Did it cover also your recommendation if interconnection facilities were discontinued? A. Yes sir.

Q. And also covered the advantages as you saw them to Northern Power & Light Company, which you described?

A. Yes sir.

Q. And also covered the five mill rate for the interchange of energy? A. Yes sir.

Q. And in substance your testimony is that you told the directors substantially what you told Mr. White, as testified here this morning? A. Yes sir.

Q. That is your recollection? A. Yes sir.

Q. Specifically, Mr. Lakin, do you recall whether Mr. White reported to the board of directors at that meeting that the use of the interconnection facilities with Northwestern Public Service Company, at an annual charge of $20,000 a year, under a five year contract, effective from January 1, 1936, terminable on 19 months' notice by either party, would be advantageous to Northern Power & Light, even without firm power?

A. He did recommend to the board of directors such a contract be executed.

Q. Did you concur in that recommendation?

A. Well, I merely made my report, and how they interpreted my report I have no way of knowing, except that I did know that they did vote or agree that such contract should be signed.

Q. Do you recall whether at that meeting there was any discussion of a survey which you had made of the Dakota subsidiary property and discussion whether or not there was any shortage of reserve generating capacity on those properties?

A. The subject was quite fully discussed on all of the items I reported.

Q. You reported on that as well? A. Yes sir.

Q. Did you feel at that time that the Dakota properties might be seriously embarrassed by failure of any one of those generators? A. Yes sir.

power companies have averaged around 186,500 tons and the annual sales to the general trade have averaged around 157,000 tons. The average price received by the Coal Company was $1.06 and $1.45 per ton respectively. During the total five year period the sales of coal and revenue received have been distributed approximately as follows:

	Sales in Tons	Revenue
Power Companies	54%	47%
General Trade	46	53
Total	100%	100%

If the Knife River Coal Mining Company was to be acquired and operated by an owner entirely independent of power company affiliations, its value from an earnings standpoint might be somewhat higher than its value to your Company, assuming, of course, that the reserve of recoverable coal has been correctly estimated and that the present contracts and markets for sale of coal will continue. An independent owner might also have the opportunity to increase earnings by means of an increase in the price of coal to the power companies.

In acquiring the stock of Knife River Coal Mining Company, as a part of the possible acquisition of Dakota Public Service Company, however, Montana-Dakota Utilities Co. would no doubt continue to operate the coal company on much the same basis as it is presently being operated and the price of coal for use in generating plants, which is practically at cost, would probably not be substantially increased.

In view of all of the foregoing facts and as a result of our analysis of all the data examined by us, we are of the opinion that the outstanding securities of Knife River Coal Mining Company had a fair value for purchase by your Company of approximately their net book value of $547,461.57 as of April 30, 1945.

(Read from deposition.)

Q. Well, now, let's go back to July 2, 1945—that is the date of your contract with United Public Utilities Corporation—did you have any discussion with Mr. Heskett or others at that time in which there was included the subject of a claim against Northwestern Public Service Company?

A. When you limit it to a claim I am unable to answer you. We realize that there has been a number of transactions between Northwestern and Dakota. We have knowledge of contracts between the company, but the matter hadn't crystallized at that time into the form of a possible claim.

Q. I am just talking about discussion—whether the matter was discussed?

A. Well, the matter of charges had been discussed, and, from the meager information we then had, it appeared that there were excessive charges by Northwestern to the company.

Q. On July 2, 1945? A. Yes.

Q. You referred, I believe, to discussions about the charges between the two companies under contract and I believe you used the word "Excessive"?

A. Yes, appeared to be excessive.

Q. Did you have in those discussions anything, in consideration of those charges, as to whether they were unjust? A. They appeared to be excessive to us, yes.

Q. What do you mean by excessive?

A. More than reasonable.

Q. High? A. High.

Q. Did you have any discussion at that time as to whether they were unfair? A. Yes.

Q. Did you have a discussion at the time as to whether they were fraudulent? A. Yes.

Q. You did. Now, can you tell me what the subject of those discussions was—I am referring again back to the July 2nd date, or in that period?

A. We had realized that the properties of Dakota and Knife River had been under the management of Northwestern and Middle West, extending back over a considerable period of time, and I personally was intimately ac-

Q. Did you so report that to the board of directors?
A. Yes sir.
Q. Do you recall making any statement to the board as to whether such embarrassment might well develop, in the reasonably near future, through increasing the load of the Dakota property system? A. Yes, I believe I did.
Q. You made such statement in your report to the board?
A. Yes sir.
Q. Mr. Lakin, are you a director now of United Public Utilities Corporation? A. Yes sir.
Q. When did you go on the board? A. January 30, 1940.
Q. Did you succeed any particular prior director?
A. Mr. Arhard.
Q. Were you present, Mr. Lakin, at a meeting of the board of directors United Public Utilities Corporation, held at Jersey City, New Jersey, on April 30, 1941, which was an organization meeting of that board of directors?
A. Yes sir.
Q. At that meeting, Mr. Lakin, do you recall whether or not there was any discussion of a proposed ten year contract between the Dakota Public Service Company and Northwestern Public Service Company? A. Yes sir.
Q. Do you recall whether any action was taken at that time?
A. I do not remember whether the action was taken at that meeting or a later meeting.
Q. Do you recall whether any action was taken with regard to that proposed contract? A. Yes sir.
Q. What was the action taken by the board?
A. The action taken by the board was that the president be authorized to advise the officers of Dakota Public Service Company to sign the contract.
Q. Did you vote in favor of that recommendation?
A. I did.
Q. Mr. Lakin, were you present at the regular meeting of the directors of United Public Utilities Corporation in Philadelphia on February 3, 1943? Would you care to refresh your recollection by looking at the minutes? Let the record show I am showing the witness the original minutes which have been previously identified. A. Yes sir.
Q. And you were present? A. Yes sir.
Q. Do you recall whether at that meeting the president

of the company, Mr. Samuel W. White, read to the directors a proposed supplemental agreement to amend the then existing 1941 agreement between Dakota Public Service Company and Northwestern Public Service Company?

A. Yes sir.

Q. Do you recall whether or not the president explained that contract to the directors? A. Yes, he did.

Q. Do you recall the basis on which that proposed amendment to the 1941 contract was founded?

A. Well, it was generally because of the fact that Northwestern Public Service Company could not carry through with provisions of the 1941 contract, because of restrictions of the War Production Board.

Q. Do you recall whether or not the president stated at that meeting anything with reference to the manner in which officers of Northwestern Public Service Company and Middle West Corporation regarded that proposal?

A. It was satisfactory to both companies.

Q. Do you recall, Mr. Lakin, whether or not any resolution was adopted at that meeting with reference to that proposed amendment to the 1941 contract?

A. Yes, there was a resolution passed.

Q. Do you recall what the resolution authorized?

A. It authorized the president of U. P. U. to recommend to the officers of Dakota Public Service Company that the supplemental contract should be signed.

Plaintiff offered the following testimony from the deposition of Lakin, which was received:

Examination, by Mr. Benson.

Q. You made some statements about the interest of yourself, your wife, or your family, in various securities of various companies. Did you or your wife or any member of your immediate family own any securities of any Middle West subsidiaries?

The Witness: Will you be more specific on the time, please?

Mr. Benson: In 1936, from January 1st to December 31st.

quainted with all of the personnel of Dakota Public Service, all the property, and also with the operating personnel of Northwestern, and realized then that management decisions were being made by the Northwestern employees, because I know that on the properties there were no top level management employees of Dakota.

Q Was that the extent of your information at that time?

A. No, it wasn't

Q. Did you have other?

A. Yes, I knew that Middlewest had acquired the control of the U. P. U. Company from the Thompson-Ross interests.

Q. When?

A. In the early thirties, as I recall. It was about the time of the crash. They got into financial difficulty.

Q. All right.

A. And I knew that that arrangement had continued on through and it—

Q. Down to 1945 when we are talking—

A. I realized that the U. P. U. had gotten into financial difficulties in '31 or '32, and that there was some question as to the status of Middlewest at that time, but from all the knowledge I had, the property continued to be managed by employees of subsidiaries of Middlewest Utilities.

Q. If I understood you correctly—and if I misstate you, you correct me—that Middlewest was in a position at that time in 1945 of controlling of Northwestern and, in turn, through them, controlling Dakota Public Service?

A. No, I didn't say that.

Q. Well, that's what I want to know. I understood you to say that Northwestern was running Dakota Public Service and Middlewest was running Northwestern.

A. That is correct.

Q. Well, now, what did you deduce from that—that Middlewest was running Dakota Public Service Company?

A. I knew that Middlewest employees were furnishing services to Dakota through Northwestern and probably directing.

Q. Employees of the Middlewest Corporation? A. Yes.

Q. Or employees of Middlewest Service Corporation?

A. I believe the Service Corporation, and the corporation, both.

Q. Both of them. You knew that as a fact? A. Yes.

Q. In July, 1945? A. Yes.

Q. All right, you mentioned awhile back the relations between the company. What do you mean by relations—the contract relations or what you just referred to about the fellows out in the field—the men at Huron and the operating management, and so forth?

A. I mean the contractual relations and the management relations.

Q. Management. Did you know who was on the board of Dakota Public Service at that time?

A. Yes, I believe I did.

Q. Do you know who was on the board at Northwestern Public Service? A. Yes.

Q. This was in July of 1945? A. Yes.

Q. You have related in some detail, Mr. Gamble, about your own knowledge about the affairs of Dakota Public Service Company and Northwestern Public Service Company, Middle West Corporation, Middle West Service Company, and your view on that. Now, can I ask you at this time whether any of your co-officers or co-directors in Montana-Dakota Utilities Co. shared the same views at that time? A. I think they did, yes.

Q. Did they have the same knowledge that you have or was that after discussion with you?

A. Well, they had some knowledge. I don't believe any of them had as complete a knowledge of the relationship as I had.

Q. This letter here, Defendant's Exhibit 26, is February 27, 1946, which is included in Plaintiff's Exhibit 22 (R. p. 263, supra). Defendant's Exhibit 28 is July 8, 1946. Can you fix a time when you came to that determination of the position charged in the Federal Power Commission complaint in that period?

A. Well, I might explain part of the reasons, at least, why it is difficult to fix an exact time. We were dissatisfied with the contract for a considerable period of time before those letters were written, but because of the—

Q. Now, you mean the February 27 letters?

A. Both the February and the July letters, but, because of the physical problems involved in the operation of the Dakota properties until we could establish our-

The Witness: A. No, sir.

Mr. Benson: Q. Did you subsequent to December 31, 1936? A. No, sir.

Q. How long prior to January 1st, 1936, had you held Middle West securities?

A. I held no Middle West securities.

Q. Or securities of subsidiaries that your were thinking about when you asked me as to the time?

A. 1932 or '33, I believe.

Q. What became of these properties which you worked on, which were Albert Emanuel's properties? [There] did they finally wind up in these various holding company settlements?

A. They finally wound up in the National Electric Power when it was formed.

Q. What became of National Electric Power Company?

A. It went into receivership.

Q. Well, who acquired control? Did the Insull interests acquire any control of National Electric Power Company?

A. The Middle West Utilities Company acquired control of National Electric Power Company, in, I believe, it was 1928.

Q. You stated you worked for National Electric Power Company and I think Kansas Electric Power Company. Correct? A. Yes, sir.

Q. And who controlled that?

A. National Electric Power Company.

Mr. Benson: Q. What I am trying to ascertain from you is whether your employment, up to the time that you went to work for U. P. U., was always with subsidiaries of National Electric Power Company?

A. Always subsidiaries of National Electric Power Company or their predecessors.

Q. Well, for the ten years prior to the time that you went with the United Public Utilities Company, which I think was the company you first went to— A. Yes.

Q. Had you been continuously with National Electric Power Company subsidiaries? A. Yes.

Q. So that is from 1922 on up until 1932? A. Yes.

Q. Now, in order to be sure that I didn't misunderstand this work you said you did on transmission lines of North-

western Public Service Company, that was not on any of these lines that are known as the interconnection facilities and described in the contracts between Northwestern Public Service Company and Northern Power & Light Company? A. No. I did no work on those whatever.

Q. Now, in order that we can be sure as to what you are saying—when you said you did some work on lines of Northwestern Public Service Company you were not talking about work on a 22/38 kilovolt transmission line from Aberdeen to Barnard? A. No, sir.

Q. Nor from Barnard to Ipswich? A. No, sir.

Q. And you were not talking about and you did not do any work on a 33 kilovolt transmission line from Highmore to Gettysburg? A. No, sir.

Q. Did you do any work on a transmission line from Ree Heights to Highmore, or don't you remember?

A. Yes, I did do some work, I am quite sure on that short section.

Q. When was that done? A. 1926. 1927.

Q. And when you talk about working on the lines of Northwestern Public Service Company during the period you have referred and the period you referred to in your examination in chief, did you mean to imply that you did any work on the portion of Aberdeen's interconnection substation and control equipment used for interconnection with Northern Power & Light Company?

A. I did not do any work on that.

Q. And you did not do any work on the Gettysburg substation used for interconnection with Northern Power & Light Company? A. I did not.

Q. Or the substation portion serving Gettysburg?

A. I did not.

Q. You used the term "Sponsor" with reference to the Ohio Electric Company and the Michigan Public Service Company. Did you say that those properties, Michigan Public Service Company, were sponsored by Ohio Public Service Company? A. No, sir.

Q. What did you say?

A. I said I acted generally as sponsor for the three companies mentioned.

Q. What does that mean, "sponsor" for them?

A. It was general supervision of all operation and construction items.

selves in a manner to take care of the business of those properties, we had to continue whatever arrangements then existed, whether we liked it or not. Now, we may have an earnest desire to cancel those agreements some time prior to the date of the cancellation, but because of the practical problems involved the company's operation, we could very well have delayed writing the letters until we had at least some assurance that upon the termination of the agreements we would be in a position to render service.

The following testimony by deposition of C. E. LAKIN offered by defendant was received in evidence. It is as follows:

Q. Will you state your name and address, please?

A. C. E. Lakin, Greenville, Ohio.

Q. What is your present business and occupation?

A. President and general manager of the Indiana-Ohio subsidiaries of the U. P. U.

Q. What kind of business are the Indiana-Ohio subsidiaries of the U. P. U. in?

A. Electric utility business, gas utility business, and water utility.

Q. How long have you had experience in the electric utility business? A. 34 years.

Q. Calculation makes that commence in about 1913?

A. Yes sir.

Q. Will you please tell as briefly as possible what your connections have been and your experience from 1913 down to the present time?

A. I started with the Union City Electric Company in Union City, Ohio, as a meter and distribution engineer and later transferred to the Sidney office of the Albert Emanuel Company, which was then a holding company, where I had charge of meters and distribution engineering work for some of the companies. Then spent a little over a year in the U. S. Army, Department of Military Aeronautics, and, after returning from the army I was located in Kansas City, Missouri, which was then the operating office of the Albert Emanuel operating proper-

ties, which later became the National Electric Power Company.

Q. What services did you perform there, generally?

A. In general, meter and distribution engineer and with general inspection of various other things other than meter and distribution work.

Q. What time does that bring us to?

A. That brings us down to 1921.

Q. All right, will you continue?

A. At that time the Kansas Electric Power Company was formed by merging a group of several properties in the state of Kansas, and I was general superintendent of the Kansas Electric Power Company.

Q. Was that a fairly large company or a small company?

A. It was a relatively small company having about 40,000 customers.

Q. What were your duties there, just generally?

A. Everything relating to operations and construction.

Q. Does that include power plants? A. Yes sir.

Q. All right, sir, how long were you at Kansas Electric Power Company?

A. Until the early part of 1926.

Q. Where did you go then, sir?

A. I went to the New York office of the National Electric Power Company, which is a holding company for properties over about thirteen states.

Q. And how long were you with National Electric Power Company in the New York office? A. About six years.

Q. Until about 1932? A. Yes sir.

Q. During that period of time, Mr. Lakin, did you have occasion to go over the properties of the Northwestern Public Service Company? A. Yes sir.

Q. Will you tell us briefly the circumstances about that?

A. My first occasion to visit the Northwestern Public Service Company was in 1925, while I was still located with the Kansas Electric Power Company, and that continued on through until the latter part of 1927 or early part of '28. I did general engineering work on the Northwestern Public Service Company and did engineering work particularly on transmission lines which connected the various districts of the Northwestern Public Service Company which were not then connected.

Q. You mean that was the term that was used in the organization set-up of National Electric Power Company to designate the type of service that one of the officers or employees rendered?

A. We never used such a term at National Electric Power Company.

Q. Well, did you just employ it this morning for the first time?

A. No. It is a term generally used by large holding companies that had sponsors for certain groups of companies, certain geographical groups.

Q. That designated certain executive and administrative and supervisory effort over those groups, is that what it means?

A. Yes, and our company never had sponsors as such. We were, some of us, spending a great deal of our time on certain companies, carrying through on the operation and construction.

Q. Do you mean the term "sponsor" was improperly applied to the work you were doing, then? A. No, sir.

Mr. Benson: I still don't follow, because I am not familiar with the terminology. Why did you use the term this morning when you say you sponsored?

A. Well, it is a term that is generally used for that kind of work.

Mr. Benson: Oh. But you mean, in your National Electric Power Company, which you were working for at that time, I take it— A. Yes.

Q. They did not use the term "sponsor"? A. No, sir.

Q. But you used it this morning? A. Yes, sir.

Mr. Benson: I see.

Q. Now you say you handled some negotiations for the sale of firm power, in response to a question counsel asked you. Were you talking about firm power to customers who utilized that power in other than utility business or customers who were in themselves utilities and bought firm power?

A. That included both. Large blocks of power to individual non-utility corporations, usually worked on—

Q. The non-utilities? A. As well as utility sales.

Q. I take it, then, you went over the properties several times during this period of 1925 to late 1927 or early 1928? A. Yes sir.

Q. At whose direction did you go over the properties? Was it in the line of your employment with Kansas Electric Power Company, before 1926, and with National Electric Power Company thereafter?

A. Generally, that is correct.

Q. Do you know who owned or controlled Northwestern Public Service Company at that time?

A. National Electric Power Company.

Q. Do you happen to know, Mr. Lakin, how long National Electric Power Company continued to own or control Northwestern Public Service Company?

A. It was either the last part of 1927 or the first part of 1928.

Q. Then what did they do? Divest themselves of their ownership?

A. That was sold to Northwest Utilities Company.

Q. Now, Mr. Lakin, you told us you were with National Electric Power Company, in New York, between 1926 and 1932, that during part of that time at least you had occasion to go over the Northwestern Public Service Company property. Can you tell us, in a general way, what your duties or other activities during that period were for National Electric Power Company?

A. My title was Electrical Engineer and I had supervision of all electrical operation and construction on all the subsidiary companies of National Electric Power. In addition to that I acted more or less as sponsor for the Ohio Electric Power Company and Michigan Electric Power Company and Michigan Public Service Company.

Q. Did your duties include any work or activities in connection with interconnection or power contracts?

A. Yes.

Q. Can you describe briefly for us what those activities consisted of or what contracts you worked on, and about how many of them?

A. The activities were negotiating for sales of firm power or purchase of firm power and for interconnection agreements where the flow of power was from one company to the other. There were a large number of those and

Q. Did you make any investigation of charges for firm power in North and South Dakota in the year 1936?

A. There were no such charges, to my knowledge.

Q. And is that same period the period you were talking about with reference to firm power that Ottertail dealt in with other utilities? A. Yes, that is correct.

Q. So, since 1926 or '27, you knew nothing about the prices of firm power in North and South Dakota?

A. That is correct.

Q. Now, you made a statement or used a term in each of your answers to counsel, where you said you made a general inspection or you inspected generally, always using the word "generally". What did you mean by that?

A. I meant by that that I did not inspect every bit of property owned by the companies referred to.

Q. Well, how many trips have you made to the Northwestern Public Service Company property since 1925 or '26, the first trip you mentioned? A. Two.

Q. When was the first one after 1925 or '26?

A. In—I will refresh my memory—in June of 1936 and May of 1941.

Q. Those are the only trips you made? A. Yes.

Q. Now, in June of 1936 you say you were in the City of Minneapolis? A. Yes, sir.

Q. Were you attending a meeting or were these Northwestern Public Service Company managers attending a meeting of the North Central Electrical Association?

A. Well, it included the managers of Northwestern Public Service Company, of Northern Power & Light Company, and was, I believe, referred to as a managers' meeting of only those companies.

Q. Only those companies. And who went to the meeting? I mean, classifying the employees, who went to that meeting?

The Witness.: I cannot answer that.

Mr. Benson: No, I don't mean by names, I mean classification of employment.

The Witness: Well, I—

Mr. Benson: Q. You have used the term "managers." Now who else?

there were about 16 or 18 that were finally completed into a contract.

Q. Well, will you tell us something about these interconnection and power contracts, as to their size?

A. These vary in size, a few hundred kilowatts of power sales to relatively large interchange power. One of the last ones which I worked upon was with the Jersey Central Power & Light Company, who built an interconnection with the Public Service Gas & Electric Company, which was for a 20,000 k. w. interchange agreement.

Q. Was Jersey Central Power & Light a subsidiary of National Electric Company? A. Yes.

Q. Did you conduct negotiations in connection with that contract? A. Yes sir.

Q. All right, Mr. Lakin, you say you were with National Electric until 1932. What did you do then?

A. I then went to the management of the Indiana-Ohio properties of U. P. U.

Q. That was in 1932? A. Yes sir.

Q. By U. P. U., you mean United Public Utilities Company? A. Corporation.

Q. In 1932? A. Company is right.

Q. In what capacity did you go with those Indiana-Ohio subsidiaries? A. As president and general manager.

Q. How many subsidiaries were in Ohio? A. Seven.

Q. How many in Indiana? A. Four.

Q. Did you make any changes after that or are you still in that capacity? A. Still in that capacity.

Q. With the same subsidiaries? A. Yes, sir.

Q. But they are now subsidiaries of United Public Utilities Corporation? A. That is correct.

Q. Mr. Lakin, do you now have or have you ever had any connection with Northwestern Public Service Company except as you have testified, of going on its properties during the time you were with the National Electric Power Company and Kansas Electric Power Company? A. No, sir.

Q. Never been employed by that company? A. No, sir.

Q. Did you ever own any stock, any securities, in that company? A. No.

Q. Any members of your immediate family own any stock or securities in that company? A. No, sir.

A. District managers.

Q. So far as you know nobody else but district managers? A. Commercial managers.

Q. Commercial managers.

A. And engineers from the general office. Also the officers of the general office at Huron and department heads at Huron, I would say composed at least the majority of the attendance at that meeting.

Q. The first point at which you touched the properties of North Dakota Power & Light Company, Northern Power & Light or Northwestern Public Service Company, after you left this managers' meeting in 1936, was where?

A. Ipswich, South Dakota.

Q. How did you get out there from Minneapolis?

A. By train to Aberdeen.

Q. To Aberdeen?

A. And by automobile from Aberdeen to Ipswich.

Q. What time did you arrive in Aberdeen?

A. I don't know. It was quite early in the morning.

Q. Did you immediately leave for Ipswich after breakfast? A. Yes, sir.

Q. You did not inspect any property at Aberdeen at that time? A. No sir.

Q. Who went with you from Aberdeen to Ipswich?

A. Mr. Strike, Mr. Kruesi and Mr. White.

Q. Did you inspect any property on the way from Aberdeen to Ipswich? A. Yes, sir.

Q. What property?

A. Transmission line from Aberdeen to Ipswich.

Q. When did you arrive at Ipswich? A. I don't know.

Q. Well, was it before luncheon? A. It was after lunch.

Q. Where did you have lunch?

A. I don't remember. I believe it was in Mobridge.

Q. What day did you complete your inspection trips?

A. I can't answer that definitely.

Q. Have you a memorandum book before you, where you made notes concerning this trip?

A. I have a memorandum book containing part of the information.

Q. What day did you arrive at Aberdeen on this trip?

A. The morning of the 13th or 14th of June, 1936.

Q. Now, when did you get to Huron?

Q. Have you ever been connected with or employed by or in any capacity with Middle West Utilities Company?

A. No, sir.

Q. Or the Middle West Corporation? A. No, sir.

Q. Middle West Service Company? A. No, sir.

Q. Have you ever owned any stock or other securities of any of those corporations? A. No, sir.

Q. Have any members of your immediate family owned any stock or other securities of any of those corporations?

A. No, sir.

Q. That includes down to the present time? A. Yes, sir.

Q. Mr. Lakin, are you familiar with the company known as Insull Utilities Company?

A. I was when it was in existence.

Q. That was a different company from any of the ones I have just interrogated you about? A. Yes, sir.

Q. Are you a member of any engineering professional association or institute?

A. I am a member of the American Institute of Electrical Engineers, with the grade of Fellow.

Q. Have you ever had occasion to make any trips over the properties of the Dakota electric utility subsidiaries of United Public Utilities Corporation, namely, North Dakota Power & Light and Northern Power & Light Company? A. Yes, sir.

Q. Have you made any such trips? A. Yes, sir.

Q. When was the first of those trips, Mr. Lakin, if you recall?

A. In the spring of 1936.

Q. At whose request, if anyone's, did you make that trip? A. Mr. Samuel W. White.

Q. That was in May of 1936? A. Yes, sir.

Q. Mr. White, at that time, was president of United Public Utilities Corporation? A. Yes, sir.

Q. And I believe you testified at that time you were president of the Indiana-Ohio subsidiaries of that company? A. Yes, sir.

Q. Will you please explain to us the circumstances under which Mr. White asked you to go out to those properties to make that inspection?

A. He had told me that they were considering a contract between Northwestern Public Service Company and Northern Power & Light; that he would like for me to

A. I believe I arrived in there on the morning of the—or the afternoon of the 17th day of June, 1936, I believe.

Q. And after you got to Huron, you did not make any further trips out over the property, did you? A. No, sir.

Q. Your time was then spent in the office at Huron?

A. Yes, sir.

Q. When did you leave Huron?

A. On the night of, I believe it was on the night of June 18th.

Q. You went from Aberdeen to Ipswich and where did you finish your first day's trip?

A. At, I believe that was at Dickinson.

Q. So on the evening of the 13th, you were in Dickinson, North Dakota, correct?

A. I would say that is approximately correct.

Q. All right. Now, let's take the 14th. Do you want to look at this map? A. Yes.

Q. So on the 14th did you have any meetings in Dickinson? A. No particular meetings.

Q. I see. What did you do in Dickinson?

A. We inspected the substations and power plant.

Q. When did you leave Dickinson?

A. I believe we left Dickinson early the next morning.

Q. That is the morning of June 15, 1936?

A. Yes, or about then. I can't say as to the exact date.

Q. You cannot say as to the hour or the date? A. No.

Q. Well, you say you went to Dickinson and arrived there on the evening of the 13th day of June, 1936?

A. I believe that is correct.

Q. You don't know whether you spent more than the 14th in Dickinson?

A. No. It was relatively late when we got into Dickinson, at the power plant, it was dark when we were there. I don't know what time.

Q. You got into Dickinson late on the 14th and it was dark when you got to the power plant?

A. Yes. The 13th.

Q. It was dark when you got to the power plant?

A. Yes.

Q. Then on the 14th, what did you do, the 14th of June, 1936?

A. We proceeded from Dickinson along the transmission lines to the east, over as far as Glen Ullen, went north over the transmission line into Beulah, and from Beulah—

go over the interconnection facilities to determine, in my own mind, what value they were to Northern Power & Light, and to also make a general inspection of the facilities on both Northern Power & Light and North Dakota Power & Light.

Q. Did he at that time say anything to you concerning the rates at which those companies were interchanging electric power, electric energy? A. Yes, sir.

Q. Did he ask you to do anything in regard to that?

A. Make a general check to determine if that cost was reasonable.

Q. Reasonable from what standpoint?

A. Reasonable from the standpoint of Northern Power & Light.

Q. Did you make such inspection trip? A. Yes, sir.

Q. Do you recall approximately when you made it?

A. It was about, sometime before the middle of June, 1936.

Q. Where did you leave from for that trip?

A. We started from Aberdeen.

Q. No, I mean—

A. Oh, we left from Minneapolis to Aberdeen in company with Mr. White, Mr. Kruesi and Mr. Strike.

Q. Let me back up just a minute. What were you doing in Minneapolis, if I may ask?

A. I was invited to attend the annual managers' meeting of the Northwestern Public Service Company, Northern Power & Light and North Dakota Power & Light Company, which was being held in Minneapolis.

Q. Did you attend that managers' meeting at Minneapolis? A. Yes sir.

Q. All right. What did you do after that meeting was over? A. We then proceeded to Aberdeen by train.

Q. Did you go with anybody else?

A. With Mr. White, Mr. Kruesi and Mr. Strike.

Q. Now, Mr. Lakin, if you will please tell us in your own words the portions of the properties you visited and the facilities and operations which you inspected?

A. We started from Aberdeen by automobile, travelling west, inspecting the properties generally, proceeded to Mobridge, to Lemmon, to Mott, to Dickinson and to Bismarck. At that point Mr. Strike, Mr. White and Mr.

Kruesi parted from the party. The following day I, in company with Walt Renden made inspection trips from Bismarck up to the [Buelah] Power station of North Dakota Power & Light Company and over the transmission lines generally in the Bismarck district.

Q. At [Buelah], while you were at [Buelah], did you examine any particular facilities?

A. I investigated the plant capacities, the operating conditions generally, with regard to breakdowns, carrying capacities in the summer and winter. I talked with the operating men in the power plant at [Buelah].

Q. Did you make any investigation with reference to the fuel supply at that particular plant? A. Yes sir.

Q. Will you tell us about that, please?

A. The fuel supply was received from the Knife River Coal Mining Company, which is located adjacent to the [Buelah] plant.

Q. Is that what you engineers call a mine mouth plant?

A. Yes sir.

Q. You mentioned a Mr. Walt Renden. Do you know who he is?

A. Well, I guess his name is Walter Renden, and he was then district manager of the Bismarck district of North Dakota Power & Light.

Q. Well, I think on your itinerary, as you were describing it, you had been inspecting the transmission lines in the Bismarck area. Where did you go from there on your trip, if anywhere?

A. Proceeded from there over the transmission lines which terminated in Wishek, North Dakota, and from Wishek we inspected the electric line into Ellendale, North Dakota, and from Ellendale inspected the lines on into Aberdeen substation.

Q. Now, where is Aberdeen, Mr. Lakin? Is that in North Dakota? A. Aberdeen is in South Dakota.

Q. Well, are the Northern Power & Light lines located at Aberdeen? A. No sir.

Q. On what properties are the Aberdeen stations located? A. Northwestern Public Service Company.

Q. On your trip did you go through Barnard?

A. Yes sir.

Q. Did you observe any interconnection facilities along any points on that itinerary between Northern Power & Light and Northwestern Public Service Company?

A. That was an interconnection point between Northern Public Service Company and Northern Power & Light Company.

Q. You mean Barnard? A. Barnard.

Q. How about Aberdeen?

A. That was not an interconnection point.

Q. What was located at Aberdeen?

A. The substation facilities, including transformer to change the voltage from 33,000 to 22,000, for supply to Northern Power & Light Company, together with oil circuit breakers and auxiliary equipment, with a steel tower structure, making a complete substation.

Q. Did you also, in that journey, visit Ipswich? A. Yes.

Q. At Ipswich did you observe any interconnection facilities?

A. That was the interconnection of the facilities of Northwestern Public Service Company with Northern Power & Light Company.

Q. And did you observe them? A. Yes.

Q. All right, sir. Did your inspection trip terminate there, or was there any more?

A. Proceeded from Aberdeen on to Huron, the location of the general office of the Northwestern Public Service Company and the subsidiary companies in Dakota of United Public Utilities Corporation.

Q. Will you tell us in your own words, generally, what you did in Huron, if anything?

A. At Huron checked on the service that had been rendered, that was being rendered to Northern Power & Light Company from Northwestern Public Service; checked on the cost of the interconnection facilities; also [check] on the reason why the interconnection facilities had originally been made; and also checked production costs in some of the various plants.

Q. Did you make inquiry of any persons during this trip you just described, concerning facilities you were observing and were investigating?

A. I made inquiries of E. K. Albert.

Q. Who was he?

A. He was electrical engineer in charge of electric operation and construction in the general office in Huron.

Q. Anybody else? A. I [check] further with Mr. Stokke.

Q. Who was Mr. Stokke?

A. Mr. Stokke was then superintendent of production in the general office at Huron.

Q. Anybody else? A. Talked with Mr. Sandstedt.

Q. Who was he?

A. He was treasurer of Northwestern Public Service Company and the Dakota properties of U. P. U.

Q. By that don't you mean Northern Power & Light and North Dakota Power & Light? A. Yes sir.

Q. Anybody else that you recall?

A. That is all that I remember in particular.

Q. Did you talk with other people that you cannot remember the names of now or were they the only three you talked to?

A. I don't particularly remember talking with [other].

Q. Did you talk with the load dispatchers at Aberdeen?

A. Yes sir.

Q. By the way, while you were at Aberdeen did you check any of the logs? A. Yes, sir, I did.

Q. Well, does that terminate your inspection trip or was there any further inspection of the properties?

A. That terminated the inspection trip.

Q. All right. What did you do after you were through at Huron?

A. I proceeded to Chicago, to the office of Mr. Samuel W. White.

Q. What did you do when you reached Mr. White's office? Did you have a conversation with him? A. Yes sir.

Q. Do you recall the approximate date?

A. It was June 19th, 1936.

Q. During that conversation with Mr. White did you make any report to him concerning your inspection?

A. I did.

Q. Will you please tell us what you told him concerning that subject matter?

A. I first answered the principal question that he had asked me to check.

Q. And that was?

A. Which was the annual charge of $20,000 which was

A. I believe Mr. Albert was present at the time.

Q. Albert, not Sandstedt?

A. Albert was present with me at the time we were looking over the records.

Q. Do you remember the date or number of the work order on the Aberdeen substation?

A. I would have to guess, and I would say it was work order No. 420. That is merely a guess.

Q. Do you remember the date? A. No, I don't.

Q. Did you make a division of the structure as between the Northwestern's use of the substation and the interconnection with Northern Power & Light?

A. Yes, there was.

Q. Who gave you that division?

A. I think that came from both Mr. Albert and Mr. Sandstedt.

Q. And then who gave you the figures as to the division of labor? A. Division of labor?

Q. There was labor shown on these charges against that work order, wasn't there? A. Yes, sir.

Q. And who gave you the distribution of that labor to apply to the portion of that substation, construction labor and installation labor? A. I don't remember that.

Q. Well, somebody in the office there in Huron gave you that distribution?

A. I believe so, because I arrived at a definite figure for that portion of the interconnection.

Q. Now, did you call for the work order or work orders on the Gettysburg substation? A. Yes, sir.

Q. Who produced those for you? A. Mr. Sandstedt.

Q. Did you call for the accounting records showing the charges against that work order? A. Yes, sir.

Q. Do you remember the number of the work order?

A. No, sir.

Q. The date. A. No, sir.

Q. Are you able to give us the same sort of a description of that work order that you gave of the other one on Aberdeen? A. Yes.

Q. It was a book? A. It was a book.

Q. Who gave you the portions of the equipment of the Gettysburg substation used exclusively for interconnection with North Dakota Power & Light Company?

A. I don't remember.

Q. Someone in that office pointed them out to you?

A. Yes, sir.

Q. And they pointed out to you the charges on those records representing the cost of the material of that portion of the Aberdeen substation?

A. Yes. I satisfied myself that the charges, total charges, were within reason.

Q. Referring to the Gettysburg substation, did anybody point out to you the items of cost of specific items of equipment that appeared in that record and which were applicable solely to the portion of the Gettysburg substation used exclusively for interconnection with Northern Power and Light Company?

The Witness: A. I don't remember that anyone pointed out all the specific items. As I remember the situation, the Northwestern Public Service Company built the line into Gettysburg and constructed the 600 KVA stepdown transformer installation.

Mr. Benson: Q. How many banks of transformers were there in that substation? A. Two.

Q. I gather from what you said—and correct me if this is not correct—that you took the entire cost as recorded on the records which showed charges against the work order for this substation, and, in your figures, allocated the entire cost of the Gettysburg substation to interconnection facilities for the benefit of interconnection with Northern Power & Light?

A. As I remember, Mr. Benson, one bank of 600 KVA transformers, 22 KV, 2300 volts, was the property of Northern Power & Light Company.

Q. So in your figures you took one bank of transformers?

A. I believe that is correct.

Q. Now, how much of the structure did you allocate to the interconnection facilities? A. That I do not remember.

Q. Well, did somebody point out a figure on the charge sheet? A. Yes, sir.

Q. That you talked about? A. Yes, sir.

Q. And you took the figure that that person designated as the allocation?

A. I took the figure and the figure that was given me looked within reason.

Q. Did you find any overheads in the construction of the Aberdeen substation? A. Yes, I am quite sure I did.

Q. Did you take the overheads as shown on the records of the charges to the work order or work orders for the Aberdeen substation?

A. I believe I took the overheads as applied.

Q. And you put them into your computation?

A. Yes, sir.

Q. Did you do the same at Gettysburg? A. Yes, sir.

Q. So the overheads that you used in the figures that you used, when you talked to Mr. White and to the Board of Directors, included the overheads as allocated on the document or accounting record showing the charges to the work order on the Gettysburg substation?

A. On that particular thing, while I checked up the individual charges as they were able to put them together from their work orders, there were overlapping work orders and there were some that were definite work orders for the particular facilities for the interconnection, and I forgot that part of it, and made an estimate, a quick estimate of my own, to determine the approximate value of the facilities.

Q. Well, by your estimate, you mean based on past experience? A. Yes, sir.

Q. You mean you make a rule-of-thumb quick estimate?

A. Well, I would say it was an intelligent estimate.

Q. Yes, but I mean still a rule-of-thumb proposition,—not as a layman would do it, but as an engineer would do it?

A. Well, I don't know your definition of rule-of-thumb.

Mr. Benson: All right.

Q. What did you do with that estimate?

A. I used that estimate to form my opinion on the charges that were being considered, the charges of $20,000 from Northern Power & Light and Northwestern Public Service Company, as charges on the interconnection facilities owned by Northwestern Public Service Company.

Q. Where did you get your figures as to cost of the transmission line from Aberdeen to Barnard?

A. From Mr. Sandstedt.

Q. From this same work order record that you testified to as to where you got the cost of the Aberdeen substation?

A. Yes.

Q. And he pointed out what charges on that sheet, book record, were, according to his statement, chargeable entirely to the line from Aberdeen to Barnard?

A. There was a bit of conflict there, I remember, due to the fact that there was a line already constructed there.

Q. That is correct, but I am saying he pointed out what he charged as chargeable against the interconnection facility line? A. He pointed out the charges, yes.

Q. And was it on the same accounting record that you found the charges to the line to Ipswich?

A. I don't remember.

Q. Well, did anybody produce a record showing the charges against the work order for the construction of transmission line to Ipswich? A. Yes.

Q. And was it Mr. Sandstedt that pointed out, on that accounting record, which items were chargeable to the transmission line running from Aberdeen to Ipswich and interconnecting with Northern Power & Light?

A. Yes. I would like to say either Mr. Sandstedt or some one in his department.

Q. Yes. A. I am quite sure it was Mr. Sandstedt.

Q. What procedure did you follow to get the cost of the line from Highmore to Gettysburg?

A. That figure was received, or produced, produced, rather, by Mr. Sandstedt's office.

Q. The figure was produced by Sandstedt's office. You mean they did not bring any accounting record out on that one? A. Yes, they did.

Q. What was the nature of those accounting records?

A. Similar to the others.

Q. It was a book, a big sheet? A. Yes, sir.

Q. And he pointed out on that accounting record, or someone under his supervision pointed out to you the items on there chargeable to the work order covering the construction of the high tension line from Highmore to Gettysburg? A. Yes, sir.

Q. Did you ever check the material in place against any of these work orders?

A. The material in place was not checked. There was some discussion on the Gettysburg-Highmore line because of the fact that—

Mr. Benson: No question has been asked. No question has been asked.

Q. You left Huron on the 18th of June, 1936?
A. That is correct.
Q. What time? A. It was in the evening, I believe.
Q. You talked about building a line from Barnard to Ipswich? A. Yes, sir.
Q. Your talk was with Mr. White about that? A. Yes, sir.

Mr. Benson: I am referring to the conversation that you mentioned on direct examination.

Q. Was there a line from Barnard to Leola at that time?
A. A low voltage line, yes.
Q. Did you look at the [insullation] on that line?
A. I don't remember the particular line now.
Q. What was the type of construction? Flat?
A. As I remember, the type of construction was triangular.
Q. When did you go over that line?
A. I didn't go over all of it, just a portion of it.
Q. From where to where? A. Just out of Barnard.
Q. Who told you about the rest of the construction?
A. I believe that was Mr. Albert.
Q. Do you have the figures showing what you estimated would be the cost from Barnard to Ipswich?
A. It would be approximately $150,000.
Q. What type of construction?
A. That would be with 45,000 volt insulators, with a ridge pin supporting the upper wire, cross arm supporting the other two phase wires, with a neutral carried below the cross arm.
Q. How many miles between Barnard and Ipswich for that line? A. It was fifty plus or minus.
Q. Well, do you mean fifty plus or minus a fraction of a mile or fifty plus or minus one or several miles?
A. I believe the map indicated forty-seven miles.
Q. Which map?

A. The road map of the states of North and South Dakota.

Q. And that was your method of determining what the mileage would be?

A. I used a round figure of $150,000 as an estimated cost of that interconnection.

Q. Yes. What I asked you, your round figures as a mileage, you got that off the road map? A. Yes, sir.

Q. I see. Now, will you tell us what estimate you made of the cost of the 1,000 kilovolts which you said you told Mr. White would be installed at Ellendale, according to your alternate plan you were discussing? A. $130 per kw.

Q. And that was really a round figure? No examination into details of construction? A. No, sir. That is correct.

Q. I mean, that is what you figured it would cost, $130 a kw.? A. Yes, sir.

Q. Is that what you figured for Mobridge?

A. That is correct.

Q. Is that what you figured for Gettysburg? A. No, sir.

Q. What did you figure for Gettysburg?

A. $140 per kw.

Q. $140 per kw. A. Yes, sir.

Q. How much did you figure in for station construction at Ellendale? A. You mean building?

Q. Yes. A. I did not use any figure for station.

Q. In any of these figures, Ellendale, Mobridge, or Gettysburg? A. No, sir.

Q. But that is lumped in your estimate of $140 a kw, or $130? A. That is correct.

Q. So that time when you said $130, that really covered a complete station from the ground up?

A. That covered a station in addition to the station existing, assuming it would go in an adjacent location to the existing power plant at those points.

Q. How did you determine the necessity of 1000 kilowatts at Ellendale, 1000 at Mobridge, and 500 at Gettysburg?

A. That was the approximate amount that the system was shy of firm capacity with the loss of the large generating [unti] in Beulah power plant.

Q. Diesels located at Ellendale, Mobridge, and Gettysburg would give you the same voltage regulation as the

power coming up from the Northwestern Public Service Company system would give you?

A. Provided they were on the line operating.

Q. And if they were on the line operating they would give you a little better regulation?

A. Depending on how much load they were carrying.

Q. I believe you stated, in connection with your discussion of the five-mill rate, on direct examination, that the information which you had indicated that Northern Power & Light was selling dump power. Correct? A. Yes.

Q. How do you define dump power?

A. Power that is available when they have no other use for it on their system.

Q. Now, you talked about firm power in your examination. Will you give us your definition of firm power?

A. Firm power is that power which is available at all times.

Q. To whom?

A. Speaking as a general definition, we say firm power.

Q. Having in mind a buyer and a seller, what is the buyer's definition of firm power?

A. The buyer's definition is that power is available to him at any time.

Q. That he can take it at all times? A. Yes, sir.

Q. In any amount? A. No, sir.

Q. In any amount up to the contract limitation as to what he can take at any time? A. Yes, sir.

Q. You expressed various opinions here as an engineer. Can you tell us your understanding of what constitutes firm capacity of a power plant?

A. That capacity which is capable of generating power at any time.

Q. And what is firm capacity of a system?

The Witness: Your question is not plain, Mr. Benson.

Mr. Benson: You cannot understand what firm capacity of a system would be to a buyer who was buying from a system?

The Witness: Firm capacity of a system—buying from a system would be that capacity specified by one to the other.

Mr. Benson: Q. And the buyer would have the right to take energy at any time up to the amount specified as firm capacity? A. Yes, sir.

Q. Where did you get the information which you say was given to you which indicated that Northern Power & Light Company sales were dump power?

A. Because of the fact—

Mr. Benson: No, I say where did you get the information? I am not asking your conclusion.

The Witness: I got the information primarily from the dispatcher in the Aberdeen power plant and from Mr. Huychke, who was chief engineer of the Aberdeen power plant.

Mr. Benson: Q. Did you ever make a computation of the transmission losses from Beulah to Aberdeen? A. Yes.

Q. What were they?

A. The regulation was up to as high—up into 30 per cent without the interconnection.

Q. By that you mean there was a loss in transforming, in addition to the 30 per cent?

The Witness: No, sir.

Mr. Benson: Q. In normal operation what percentage of power would be lost in shipping it over those lines from Beulah and getting it into Aberdeen?

A. That power would flow in at the low periods, the low points of the load on the system.

Q. No, I asked you what percentage. I did not ask you to explain what you are going to say.

A. Between 15 and 20 per cent.

Q. And what information did you have on which you based that statement?

A. By calculation on assumed loads.

Q. I see. Where did you get the information on the wire size that you used?

A. I secured those from the map of the company.

Q. Who gave it to you? A. Mr. Albert.

Q. Who prepared the map, do you know? You did not prepare it? A. I did not.

Q. Something they had in the office when you got there, is that correct?

A. I find, by referring to a map which I had in my possession, that I have marked down the sizes of the conductors in several different locations, particularly those locations making up the main transmission feeds from the Beulah station into the interconnection points.

Q. Who made the map that you say Mr. Albert gave you?

A. Apparently the man who made it was ashamed of it and didn't put his name on.

Q. Then my question, that that was a map which they had there when you got there for the inspection trip, is correct, is that right?

The Witness: I would ask permission to refer to another map.

I do not have the information as to who prepared the map, and the ones on which I made notes regarding the size of the conductors or the maps on which I made notes regarding the size of the conductors.

Q. Who gave you the size of the conductors?

A. I do not remember exactly who gave them to me. I observed the sizes of the conductors generally.

Q. Who gave you the sizes of the wires?

A. Various people in the organization, including Mr. Renden, and I believe Mr. Stokke, Mr. Albert, and I was able to observe the approximate size.

Q. Observe that from where? A. From the ground.

Further Examination by Mr. Stafford.

Q. Mr. Lakin, did you keep a diary? A. No, sir.

Q. Did you keep a diary in 1936? A. Not as such, no.

Q. Are you [faimilar] with the term "surplus power"?

A. Yes, sir.

Q. What is surplus power?

A. Surplus power is that power which is available and can be used for some other purpose than the purposes of the company having such surplus power available.

Defendant offered the following testimony from the deposition of FRANCIS H. SCHEETZ, which was received in evidence except as otherwise noted:

Q. Will you state your full name and address, please?

A. Francis H. Scheetz, S c h e e t z, 15 old Gulph Road, Ardmore, Pennsylvania.

Q. What is your profession, Mr. Scheetz? A. Lawyer.

Q. Where is your office located? A. Philadelphia.

Q. What is the address in Philadelphia?

A. 1335 Land Title Building.

Q. Are you associated with a firm, Mr. Scheetz?

A. I am a partner in the firm of Evans, Bayard & Frick.

Q. How long have you been practicing law?

A. Since September, 1921. I became a partner in the firm in 1930.

Q. Of what bars are you a member?

A. Member of the bar of the Supreme Court of Pennsylvania, and the United States Supreme Court, and intervening federal courts.

Q. Mr. Scheetz, did you or the firm in which you are a partner represent the United Public Utilities Corporation, that is, is the United Public Utilities Corporation a client of yours, or your firm?

A. We do represent that corporation and have represented it since it was formed in late 1934. It became active, an active enterprise on January 1st, 1935.

Q. Have you been actively engaged in representing United Public Utilities Corporation throughout that period? A. Yes, sir.

Q. Mr. Scheetz, did you or your firm represent United Public Utilities Corporation, or any bondholders committee while that corporation was in federal receivership in 77B proceedings?

A. Our firm was counsel for a committee known as First Lien Bondholders Committee, for the first lien bonds of United Public Utilities Company. Mr. Ralph B. Evans of our firm was the attorney who did the legal work up until late May, 1934, when I came into the situation for the first time. About that time there was created a joint organization committee, the exact title of which I forget, and we became counsel for that also, in association with the firm of Pam & Hurd.

Mr. Benson: Just a moment. Oh, this is all on the 14th, is it?

The Witness: Yes.

Mr. Benson: All right.

The Witness: From Beulah into Bismarck, along the transmission lines extending between Beulah and Bismarck.

Q. On the 15th, what did you do?

A. I can't state definitely that this was on the 15th, but the next day we left from Bismarck—when I say "we" I mean Mr. Renden, who was then district manager of the Bismarck district—and I went over the transmission line back to the Beulah station to secure further information.

I then proceeded on down to Glen Ullen and over the transmission line from Glen Ullen and went on through over to Wishek, to Ellendale, and to Aberdeen.

Q. Did you follow the transmission lines that you talk about, or did you just look at them from a distance?

A. Generally, we followed the transmission lines.

Q. Did you get off the highways? A. I don't remember.

Q. Well, now, let's get this straight. You said you left Aberdeen the morning of the 14th day of June, 1936?

A. It was either the 13th or 14th.

Q. But you left Aberdeen in the morning? A. Yes, sir.

Q. And the day after you left Aberdeen you went as [——] Dickinson? A. Yes, sir.

Q. And where else on that day?

A. Generally, well, from, I think I described the trip from Aberdeen into Mobridge,—we then followed generally the line from Mobridge to Lemmon, then we cut cross country to the town of Mott and cross country to Dickinson.

Q. All right. That was all done in one day, is that correct? A. Yes.

Q. Then the next day, the second day out of Aberdeen, tell us what you did.

A. We left Dickinson early in the morning, I remember, and followed the line through to Glen Ullen, from Glen Ullen over the line to Beulah and from Beulah followed

the line into Bismarck, and there Mr. Strike, Mr. Kruesi and Mr. White—Mr. White, I think, left for Chicago.

Q. Now, on the third day what did you do?

The Witness: In company with Mr. Renden we drove back over the line generally extending between Bismarck, Mandan, on up to Beulah and back to Glen Ullen and into Bismarck, and over through Wishek and into Aberdeen, from Ellendale into Aberdeen,—as my memory serves me.

Q. Now, the fourth day, what did you do?

A. I proceeded on to Huron, to the general office.

Q. And did you do any work in Huron on that fourth day? A. Yes, sir.

Q. What time did you arrive in Huron?

A. I don't remember.

Q. And how many days did you stay in Huron?

A. I believe it was one day.

Q. What did you do while you were in Huron?

A. I checked on the costs going to make up the charges into the transmission lines interconnecting North Dakota with Northern Power & Light, primarily, and to secure information—well, strike that last part.

Q. You did not do anything else?

A. Nothing in particular. I believe Mr. Albert met me at Aberdeen and took me on down to Huron.

Q. Did you count the poles on the trip? A. No, sir.

Q. What? A. No, sir.

Q. What detailed examination did you make of the substation at Aberdeen, South Dakota?

A. General inspection regarding capacities and what was included in the substation.

Q. All right. Did you make a detailed record of what was included in the substation at Aberdeen? A. No, sir.

Q. Did you make a detailed record of what was included in the substation at Gettysburg? A. No, sir.

Q. Where did you get the information as to what was in the Gettlsburg substation?

A. I got the information from Mr. Albert, from photographs, from some information on the work orders in the Huron office.

Q. Do you know who made the photographs?

A. I do not.

Q. Who gave them to you?

A. I didn't have the photographs in my possession, except to look at them.

Q. You mean you know nothing about the source of the photographs? A. No, sir.

Q. I see. Were they pictures of the outside of the structure or the inside of the structure?

A. They were pictures of the structure.

Q. Who told you the pictures you were looking at were the Gettysburg substation? A. Mr. E. K. Albert.

Q. Where did you get the details as to what was in the Aberdeen substation?

A. From general observation of the major items making up the substation.

Q. Wait a minute. From general observation where?

A. At Aberdeen.

Q. At Aberteen. All right.

A. Of the major items in the substation, such as steel structures, switches, sectionalizing switches, oil circuit breakers, transformers.

Q. Where did you get the details?

A. I surveyed the details in Mr. Sandstedt's office at Huron.

Q. What documents were those details contained in?

A. Those were charges to the work orders for that particular work order involved.

Q. How many work orders did you examine on the Aberdeen substation? A. I don't remember.

Q. One or more? A. There may have been more than one.

Q. How many work orders did you examine on the Gettysburg substation or did you examine any work orders? A. I did examine work orders.

Q. How many did you examine?

A. I don't remember how many were involved.

Q. Did you say you made an investigation as to the cost of construction of the Aberdeen substation? A. Yes, sir.

Q. How was that investigation made and what documents did you have access to?

A. From the details of charges to the work orders.

Q. You stated completely the sources of your information? A. I beg your pardon?

Q. You have stated completely the sources of your information, have you? A. Yes, I believe so.

Q. Where did you get your information as to the cost of the Gettysburg substation?

A. From the details of charges to the work order or orders for that work.

Q. Who brought those charges to you? A. Mr. Sandstedt.

Q. When he brought you the documents or records containing the charges to the work order or orders, whichever it may have been, for Aberdeen substation, did he tell you what records they were? A. Yes, sir.

Q. Do you remember what they were?

A. I don't remember exactly what they were, no, sir.

Q. Well, can you describe them?

A. It was a book listing all the items and charges to the particular job.

Q. You mean to a particular work order?

A. Yes. And that is what I asked him to see on the Aberdeen substation.

Q. Did he explain to you which of the items were charges to that portion of Aberdeen's interconnecting substation and control equipment used for interconnection with Northern Power & Light Company? A. Generally.

Q. He pointed out the distinction as to the items charged in that account to that particular description of property, did he?

A. I, in some notes that I made arrived at a net figure for the interconnection to Northern.

Q. Where did you get the information to arrive at the net figure for the interconnection with Northern?

A. By general discussion with Mr. Sandstedt.

Q. So what I asked you before really should be answered yes. That is, he took these accounts that you are talking about and he told you the items that should be charged to that portion of the Aberdeen substation used solely for interconnection with Northern Power & Light Company?

A. I cannot answer that as a yes or no, but I can answer it by saying that I took off some charges from the particular work order which were either common to both Northern Power & Light or Northwestern Public Service Company, or which could be considered entirely Northwestern Public Service Company.

Q. And he told you which were exclusively for this interconnection service?

Mr. Morrison: Each of these exhibits we object to separately for the reason they prove or establish no issue in this case; they are irrelevant and immaterial. We make no objection to the foundation of the exhibits.

Mr. Stafford: One of the charges is the 1936 contract was not filed in compliance with the Federal Power Commission rules, and the charge is made with reference to the defendant, Northwestern Public Service Co. These letters show that that question was raised by the operating personnel and it was submitted back to Mr. Scheetz as general counsel of the sole stockholder to get his determination on it.

Mr. Fellows: And Scheetz as a lawyer sitting down there in Philadelphia made some advice which would overcome the terms of a statute of the United States. Does that prove that the dealing was legal because he gave it some opinion?

Mr. Stafford: It does prove that it was not our fault out here, or the fault of Northwestern Public Service Company.

The Court: If the law requires a contract to be filed and it was not filed, the action of somebody in the east or out here would not change the situation at all.

Mr. Stafford: I agree that would establish whether 205-D was violated or not, but it does show that Northwestern Public Service Co. was not running these companies in connection with this 1936 contract.

Mr. Morrison: They are usual written contracts. They bear the signature and they are the act of this joint board. That is what we are relying upon, and upon written contract, and upon that written contract rely. We went in here and paid a little more than seven million dollars for this property. Now, are they going to say the contracts amount to nothing?

The Court: The approval of some attorney—

Mr. Stafford: This is not the approval. It is a request for approval.

The Court: A request for approval does not prove ownership or management. I am asking a lawyer whether it is wise for me to do something. It doesn't prove I am owning

anything, or managing it, or anything of the kind. It is wholly immaterial. It doesn't add one iota to the evidence upon which this case has to be determined.

Mr. Stafford: Except it is direct proof of the matter here submitted.

The Court: It is proof that someone down there talked to someone in Philadelphia. It does not prove anything.

Mr. Stafford: It shows the people in South Dakota did talk to these stockholders instead of [decidint] the matters themselves.

The Court: Objection sustained.

Mr. Woods: For the purpose of making an offer of proof we offer in evidence Defendant's Exhibit 289 previously described.

Mr. Morrison: The offer is objected to on the same grounds.

The Court: Objection sustained.

Defendant's Exhibit 290, which is also referred to as Defendant's Exhibit 28 in the Scheetz deposition, was received in evidence. It consists of a letter from Scheetz to Peale dated August 12, 1936 responding but not replying to Peale's letter of July 16, 1936, in which Scheetz requests information concerning the transfer of energy by defendant and North Dakota Power & Light Company and the points at which such energy passes from one company to the other.

Defendant's Exhibit 291, which is also referred to as Defendant's Exhibit 29 in the Scheetz deposition, was received in evidence. It consists of a letter from White to Scheetz dated August 14, 1936, in answer to Scheetz' letter of August 12 to Peale. Among other things White states that defendant "has not admitted to the Federal Power Commission that they are engaged in interstate business". It further says:

North Dakota Power & Light Company does not deal with nor have a contract with Northwestern Public Serv-

ice Company; sells no energy to Northwestern and buys no energy from any one. It is, of course, conceivable that in case of a very bad breakdown in North Dakota Power & Light Company's plants, it might buy power in such an emergency from Northern which the latter would have to buy from Northwestern.

Northern has no excess power of its own; and, in fact, must necessarily buy every day from North Dakota or from Northwestern. It takes from North Dakota all of the excess energy that North Dakota can make. If that is not enough, it buys the deficiency from Northwestern. If that is too much, it sells the excess to Northwestern.

Defendant's Exhibit 292, which is also referred to as Defendant's Exhibit 30 in the Scheetz deposition, was received in evidence. It consists of a letter from White to Scheetz dated August 15, 1936 and reads as follows:

Attached please find copy of form of contract which is proposed to be executed between Northern Power & Light Company and Northwestern Public Service Company. Will you please read this over and let me know if you detect any dangers or weaknesses in the form?

As you will note, it is the underlying idea that surplus power of either company may be dumped onto the other fellow when the other fellow is willing and glad to get it, but not otherwise. Anything realized by the seller for such surplus power is practically so much velvet. Therefore, a low price is warranted. If, however, the buyer has an emergency requirement for additional energy which the seller really does not care to make and sell at the regular bargain price, and if the seller has to start up some of his high-cost standby plants just to fill the requirement of the buyer, then an additional charge will be made which will reimburse the seller for the extra expense to which he has been put in helping out the buyer in his emergency.

Defendant's Exhibit 293, which is also referred to as Defendant's Exhibit 31 in the Scheetz deposition, was received in evidence. It consists of a letter from White to Scheetz dated August 31, 1937 and reads as follows:

Regarding rough draft of Minutes of June 24th Meeting, I think the middle paragraph of two lines on page 3 should either be changed or deleted.

If I painted the picture correctly, I think it should be the [concensus] of the Board's opinion that we are continuously faced with a critical power situation on our Dakota properties and that a major step must be taken within the reasonably near future to relieve the pressure.

As matters now stand, I realize a need for action but, on account of the substantial amount of money involved, I have hesitated to recommend that we take such action immediately in the hope that we can get by safely at least through the December 1937 peak, and, as a result of that experience, make a little better guess as to the nature of the remedy which will be best for us.

Also, I have in mind that the postponement of any such expenditure into 1938 may enable us to accumulate the necessary cash.

On the next to the last page of the Minutes, in the last line, "four months" should read "five months".

Defendant's Exhibit 294, which is also referred to as Defendant's Exhibit 34 in the Scheetz deposition, was received in evidence. It consists of a letter from White to Scheetz dated June 11, 1941. It reads as follows:

As I believe you know, Dakota Public Service and Northwestern have been operating under a capacity and power interchange agreement, which was cancellable on one year's notice. As a background for their proposed expenditure of $750,000 for a new power plant at Aberdeen, Northwestern very properly insists that a mutually satisfactory long-term agreement should be executed. Such an agreement offers advantages to both companies but, in view of the possibility that one or both of these

companies might have new owners, with unknown sense of fairness, it is desirable that the proposed ten-year contract be drawn with provisions sufficiently comprehensive and concise to minimize the possibilities of arguments.

I enclosed draft of a proposed contract for which I shall ask consideration at the Directors Meeting, next Tuesday, in anticipation of which I will welcome your criticisms and suggestions.

I have in mind that the provision for installation of additional capacity can be made (and included under the contract) only by mutual consent of the contracting parties theoretically, offers room for bickering. For instance, if Dakota should want to install an oil engine plant or a gas engine plant, in 1944, at Dickinson, Northwestern might object on the ground that the system did not need additional capacity because there still would be an excess of reserve on account of the new addition at Aberdeen. The real reason for the Dickinson addition, however, would be to protect local service against transmission failures, and we actually plan to make that addition even though we anticipate that the joint system reserve capacity will be adequate. I think a provision for cases of this kind can be inserted in the preamble. In the main, I think the interchange arrangement is so desirable for both parties that, in actual practice, the contract would probably be made to work in order to maintain its advantages.

The balance of the Scheetz deposition was received in evidence and reads as follows:

Mr. Robinson: Let me state it this way, Mr. Scheetz,—whether Defendant's Exhibit 19 is the letter you sent to Mr. White in response to his letter of August 15, which is Defendant's Exhibit 30?

A. Yes, it is in response to his letters of August 14th and 15th, 1936.

Q. I also ask you whether Exhibit 19-A is the copy of the agreement referred to in Exhibit 19?

A. Well, I would say yes, because I find, on the next to

the last page, page 6, a circle around the word "other" with a question mark in the margin which is in my handwriting.

Mr. Robinson: Q. Mr. Scheetz, I note in Exhibit 19 for identification the first sentence reads:

> "Responsive to your letters of August 14th-15th, 1936, on the interchange of power between Northern Power & Light Company and Northwestern Public Service Company, I think the form of agreement submitted affords an adequate basis for spelling out details of administration."

Would you state, please, what you mean by the "form of agreement affords an adequate basis for spelling out details of administration"?

The Witness: A. My thought was not happily phrased. I meant that the agreement adequately stated the terms with sufficient clarity to make administration feasible.

Mr. Robinson: Q. Mr. Scheetz, were you present at a meeting of the Board of directors of United Public Utilities Corporation held August 28th, 1936, in Philadelphia?

A. I was.

Q. Mr. Scheetz, do you recall whether a resolution was adopted at that meeting expressing the concurrence of the Board of directors in the recommendation contained in the memorandum of August 14, 1936, for the installation of a new boiler at Beulah station of that company, together with the necessary changes in the walls and piping system of that station incidental to the installation, at a total cost estimated at $150,000? A. I do.

Q. And was such a resolution adopted (showing document to the witness)?

A. Yes, and I was responsible for the particular phrasing of the thing as a recommendation in line with my previously expressed legal opinion that these things should go to the operating companies as a recommendation.

Q. Were you present at the organization meeting of the board of directors of the United Public Utilities Corporation held in Philadelphia on March 17th, 1937? A. Yes.

Q. Do you recall whether the president reported to the board of directors of United Public Utilities Corporation

at that meeting the execution of contracts cancellable on ninety days notice, between subsidiaries of that corporation and The Middle West Service Company, for services to be rendered by The Middle West Service Company to the subsidiaries, at an annual cost of eight-tenths of one per cent of the gross earnings from merchandise and the sale of coal, the aggregate cost to such subsidiaries being estimated at thirty thousand dollars per annum?

A. I recall that Mr. White reported the execution of the contracts referred to. I recall the whole topic generally, and that it had been a matter for discussion, and, by refreshing my recollection here, I now recall that it was done at the meeting on March 17th, 1937.

Mr. Robinson: Pursuant to stipulation heretofore entered herein, I will now read, from page 13 of the minutes of the organization meeting of the board of directors of United Public Utilities Corporation held at Room 1335 Land Title Building, Philadelphia, Pennsylvania, on March 17th, 1937, at 10 A. M. (Reading):

> "The president reported the execution of contracts cancellable on ninety days notice, between subsidiaries of the corporation and The Middle West Service Company, for services to be rendered by The Middle West Service Company to the subsidiaries, at an annual cost of eight-tenths of one per cent of the gross earnings of such subsidiaries, excluding therefrom earnings from merchandising and the sale of coal, the aggregate cost to such subsidiaries being estimated at thirty thousand dollars per annum.
>
> "Upon motion duly made and seconded the following resolution was unanimously adopted:
>
> "Resolved, that the execution of contracts referred to above between subsidiaries of the corporation and The Middle West Service Company, be and they are hereby approved."

The foregoing portion of minutes was received in evidence.

Q. Mr. Scheetz, were you present at a regular meeting of the board of directors of United Public Utilities Corporation held in Philadelphia on June 24, 1937? A. Yes.

Mr. Robinson: Q. Were you present at a regular meeting of the board of directors of United Public Utilities Corporation held on December 21, 1937, in Philadelphia, Pennsylvania? A. Yes, sir.

Q. Were you present at a regular meeting of the board of directors of United Public Utilities Corporation held in Philadelphia on January 20th, 1938? A. Yes.

Mr. Robinson: Were you present at a regular meeting of the board of directors of United Public Utilities Corporation held in Philadelphia on June 15th, 1938? A. Yes.

Q. Do you recall whether the president made a report to the directors at that meeting that Mr. C. J. Strike has resigned as President of North Dakota Power & Light Company, Northern Power & Light Company, and Knife River Coal Mining Company, and that on July 1, 1938, Mr. A. B. Sanborn, formerly general manager of East Kootenay Power Company, Fernie, British Columbia, will become president and chief operating executive of these subsidiaries?

A. I have a definite recollection of Mr. White's having made that report to the directors. The fact that it was made at this particular meeting comes to me by refreshing my recollection from the minutes. I also recall that there was a memorandum, and I have one in my files somewhere, of description of Mr. Sanborn and his background. I don't find it at the moment. I had it here yesterday.

Q. I show you document marked Defendant's Exhibit 32 for identification, purporting to be a report to the directors of United Public Utilities Corporation, dated June 9, 1938, consisting of seven pages. I will ask you if that is the document to which you just referred.

A. This is the document to which I referred. It is a letter from Samuel W. White to the directors, dated June 9th, 1938, and deals not only with that subject, but also with an evaluation by the North Dakota Railroad Commission of the properties of North Dakota Power & Light Company and Northern Power & Light Company. A copy was given to me.

Q. Who gave you the copy? A. Mr. White.

Mr. Robinson: Q. Do you recall whether the president reported to the directors at that meeting that an appraisal

of the properties of North Dakota Power & Light Company and Northern Power & Light Company was completed by the North Dakota Railroad Commission about June 1, 1938, that the amounts of these appraisals, the possibility of the amounts being increased on later argument, and the possible effect of the final figures upon the rate structure and earnings of the two companies, were discussed?

The Witness: I definitely recall that Mr. White had that report at the meeting and commented on it and that discussion ensued. I think our information was that it had been completed, but, on refreshing my recollection further from the minutes, that the report did not come out until later in the year.

Mr. Robinson: Q. Do you recall whether a discussion was had at that meeting of the best methods of effecting a merger of the two companies should a merger be found desirable?

The Witness: Yes, the question of that merger had been under study for some time and was being held up for a number of reasons, including this valuation.

Mr. Robinson: Q. Mr. Scheetz, was Exhibit C to the complaint in this proceeding, that is the interchange capacity agreement between Northwestern Public Service Company, North Dakota Power & Light Company, and Northern Power & Light Company, dated January 1, 1938, presented to you for approval, by Mr. White?

A. Mr. White presented to me a draft of agreement which had emerged from the discussions and negotiations leading up to the execution of that agreement. To the best of my recollection he did that while I was here in Chicago in the latter part of 1938, and I remember studying it. It was complicated, for me, in some of the technical aspects—and of advising him orally. I do not think that he submitted to me the re-write following those comments before the ultimate execution.

Q. After Northern Power & Light and North Dakota Power & Light Companies were merged and Dakota Public Service Company came into being, did you have occasion to consider the advisability or necessity of executing

new contracts between Dakota Public Service Company and Northwestern Public Service Company, covering the matters of interconnection and interchange of capacity?

A. I did.

Q. Will you relate for us, please, what considerations you gave to this problem?

A. The merger raised again the question of the jurisdiction of the Federal Power Commission over these companies. Also, since Northern Company had been absorbed, by merger, by North Dakota Company, all of the provisions of the interchange and interconnection agreement were released, in so far as they dealt with the provisions between North Dakota Power & Light Company and Northern Power & Light Company. Dakota Public Service Company, the surviving corporation, succeeded to all the rights and assumed the obligations of Northern Company under those agreements.

The question of whether North Dakota Power & Light Company was subject to the Federal Power Act had given me a good deal of trouble, and, with the evolution of the law on it, I had come to realize that was a rear guard action and that, when the merger was completed, we would probably be in a situation where we would become subject to it.

Mr. Goldsmith raised—

Mr. Robinson: Who is Mr. Goldsmith, please?

The Witness: Karl Goldsmith is a lawyer practicing in Pierre, South Dakota, and he had acted as our correspondent in attending to local matters related to the merger in South Dakota. Another firm acting in the same capacity with respect to local matters in North Dakota was O'Hare, Cox Cox, of Bismarck, North Dakota.

The North Dakota and South Dakota counsel and Mr. C. L. Sandstedt, Vice-President and Treasurer of Dakota Public Service Company, had raised with me the question as to whether there should be a formal assignment by Northern Company of its rights and subject to its liabilities, under the two agreements with Northwestern. This led to an exchange of correspondence and discussion about it.

We then proceeded to prepare certificates of succession for filing. Ultimately they were filed. I was informed that Northwestern had filed the contracts as rate schedules.

Mr. Robinson: Q. Which contracts are you referring to there? A. Referring to energy contracts.

Q. Do you mean the contracts with Dakota Public Service or with its predecessors?

A. With its predecessors.

Where was I before that?

(Record read by the reporter as above recorded.)

The Witness: As this correspondence will show, the Federal Power Commission requested cancellations of those schedules, in so far as they related to Northern Company.

Then the Federal Power Commission asked for certificates of concurrence in the rate schedules from Dakota Public Service Company, and at that stage, in order to simplify matters, we decided that Dakota Public Service Company and Northwestern Public Service Company should execute new contracts on the same terms as the existing contracts, but drop out the portion that related to Northern. And such contracts were prepared locally and executed. They were not submitted to me, as I entrusted that work to Mr. Goldsmith. It was simply a copy job.

Mr. Robinson: Q. And do you recall, Mr. Scheetz, whether the contracts which you have just stated were prepared by Mr. Goldsmith and were executed locally were filed with the Federal Power Commission?

A. I was so advised. I was furnished with a copy of a letter from Martens & Goldsmith to the Federal Power Commission, dated January 5th, 1940, which is part of this Defendant's Exhibit 33 and which is included in Plaintiff's Exhibits 27 and 34 (R. p. 265, supra).

Q. Mr. Scheetz, will you tell us, please, over what period of time these negotiations that you have just been testifying to took place?

A. I am not sure I understand what you mean by nego-

Q. Mr. Scheetz, have you ever had any connection with Middle West Corporation, Middle West Service Company, or Northwestern Public Service Company?

A. I have had no connection of any kind with any of the corporations, except since February 11, 1947, I am the owner of 300 shares of common stock of Northwestern Public Service Company.

Q. Mr. Scheetz, who prepares the minutes of United Public Utilities Corporation, if you know?

A. From the outset—

Q. That is, the minutes of stockholders and directors?

A. From the outset we followed the practice of having the final minutes transcribed in our office. The preparation generally followed this course. The secretary would prepare his notes of what transpired in the meeting and I would also make notes, principally with regard to those things that had legal import or were of major importance. Usually the secretary prepared a draft and sent them to me and I reviewed them, edited them with regard for my own notes and recollection of what transpired in the meetings. I might say that, with very few exceptions, I attended all the meetings. Then the draft was usually sent to Mr. White for his criticisms, I would say invariably sent to Mr. White for any criticisms that he might have, to be returned to me, transcribed in our office, checked by me. Sufficient copies were made to furnish every director with a copy and they were invariably furnished, put in the hands of the directors usually at the opening of the meeting. The minutes themselves have been lodged in our office through the entire period, except on occasions when they were needed elsewhere.

Q. Mr. Scheetz, did the directors of United Public Utilities Corporation follow the practice of having the minutes read and approved, that is, the minutes of the previous meeting, read and approved at a subsequent meeting?

A. I would say invariably and I think that is reflected in the minutes.

Q. Were the minutes approved as written or as corrected?

A. Well, there were occasions when there were cor-

tiations. The consideration of the question of filing with the Federal Power Commission?

Q. And the possible execution of new contracts.

A. The whole matter was covered in a period from approximately August 21, 1939 to January 5, 1940. The decision to go ahead and execute new contracts, of course, was made earlier, and that is the time it took to complete it.

Mr. Robinson: Q. Were you present at a regular meeting of the Board of Directors of United Public Utilities Corporation held in Philadelphia on January 30, 1940, at which time you were appointed to record the minutes in the absence of the secretary?

The Witness: A. Yes.

Q. Do you recall whether, at that meeting, the president made a report to the directors with respect to Dakota Public Service Company, that the capacity charge payable to Northwestern Public Service Company under the interchange capacity agreement, will be at the rate of $20,433.60 until completion of the new unit at the Bismarck station? A. Only by refreshing my recollection.

Q. Will you do so, please? I will show you the minutes of that meeting, Mr. Scheetz, and ask you to refresh your recollection.

A. It does refresh my recollection and he did so report.

Q. And you have a present recollection that he did so report?

A. By refreshing my recollection from the minutes.

Q. Were you present at a regular meeting of the board of directors of United Public Utilities Corporation held in Philadelphia on September 25, 1940? A. Yes.

Q. Do you recall whether the president made a report to the directors at that meeting advising that a 4,000 kw addition to the Bismarck plant had been in operation since September 1, 1940, and that he at that time discussed the effect of such addition to the effective capacity of the company's generating facilities?

A. I recall generally that Mr. White reported the progress of the Bismarck installation to the board, and, by refreshing my recollection from the minutes, I can say

rections and approved as corrected. I am not sure that in the statement in the minutes where they say the minutes were approved it is always spelled out that they were approved as corrected. Mr. Robinson, may I add something to my statement about the method of taking the minutes in my presence at the meeting? I said that I was present at practically all the meetings. It is true that on occasions I would be called out of the meeting, in the office. I think it is equally true that that would be only for short intervals and that where important matters were before the board I did not leave the meeting. Naturally, it was over a long period of time and I would not want to have everyone think I was there every minute, but I was there usually throughout the whole meeting and seldom absent for any long interval.

Q. Mr. Scheetz, as counsel for United Public Utilities Corporation, when did you first give attention to the problem of the dealings of that corporation's subsidiaries, that is, Northern Power & Light Company, North Dakota Power & Light Company, Knife River Coal Mining Company, in their relationships with the defendant, Northwestern Public Service Company?

A. Mr. Robinson, I think you may have some of my letters. I don't know whether you have any that I need here or not. My recollection is that this question came up first early in 1936. At least by that time there had been referred to me the question of the sale of property at Blunt, South Dakota, by Northern Power & Light Company, to Northwestern Public Service Company. That property was in Northwestern's territory and leased to Northwestern. Recognizing that Northwestern and Northern—

Q. Mr. Scheetz, after having the problem of the relationships between the Dakota subsidiaries of United Public Utilities Corporation and Northwestern Public Service Company brought to your attention, did you render any advice to Mr. White as president of United Public Utilities Corporation, and to the directors of that corporation, with respect to the intercompany dealings between the Dakota subsidiaries and Northwestern Public Service Company?

A. Yes.

Q. Mr. Scheetz, will you please state what advice or opinions you rendered to Mr. White or the directors of United Public Utilities Corporation, with respect to the matter of supervising the dealings of that corporation's Dakota subsidiaries with Northwestern Public Service Company, if any?

Mr. Fellows: Objected to as incompetent, irrelevant and immaterial; no foundation laid.

Mr. Stafford: We think it is material what counsel advised these directors and the sole stockholder of these subsidiaries.

The Court: What difference does it make. Suppose he had advised him directly opposite to what he did, would that make any difference in the history of this case? If you are going to carry this case to what advice these men took or what advice they received—I don't care what some engineer or some attorney told these men. What I am interested in is what they did, not what somebody told them. It is wholly immaterial and the objection is sustained.

Mr. Woods: We will have to make an offer of proof. We offer to show the answer to that question as follows: "Answer: About the same time the Blunt transaction which I previously mentioned was under consideration, there was presented to me a question of the sale of coal from Knife River Coal Mining Company to North Dakota Power & Light Company, Northern Power & Light Company and Northwestern Public Service Company. I had to consider it under the Public Utility Holding Company Act of 1935. Also, because of the common directors and officers, I considered it from the standpoint of the principles of common law applicable in such a situation. I incorporated some of that in a letter to Samuel W. White, president of U. P. U. Corporation, a letter dated May 22nd, 1936. My [advise] was that, for the proper supervision of the relationships and for the protection of the officers and directors of those companies, of which Mr. White was one, that inter-company transactions should be referred to the board of directors of United Public Utilities Corporation as the owner of all the outstanding stocks and debt securities of those corporations, for consideration and action; that if

they approved a proposed action, they should make their recommendations to the board of directors of the operating companies to carry out the transaction, or, if they disapproved it, to record their disapproval or changes which they thought should be made. Another aspect of that problem which concerned me was the provisions of the Public Utility Holding Company Act, which might, under the circumstances make it possible for the Securities and Exchange Commission to find that the Dakota subsidiaries of U. P. U. Corporation would be found to be subsidiaries or affiliates of Northwestern Public Service Company, because of the common directors. I was concerned that the situation be handled in such a way as to avoid any such result."

Mr. Fellows: We make the same objection to the offer that was made to the question itself, with the further objection that no qualification is shown on the part of this witness to give any such advice; no foundation laid showing he had any knowledge or information which would enable him to give advice.

The Court: Objection sustained.

(Read from deposition)

Q. Mr. Scheetz, I show you Exhibit B to the complaint filed in this proceeding by Montana-Dakota Utilities Company, purporting to be a contract, an interconnection contract between Northwestern Public Service Company and Northern Power & Light Company, dated October 7, 1936, and ask you whether you have ever seen that contract?

A. Yes, [may] times.

Q. Mr. Scheetz, during the period in which the interconnection contract dated October 7th, 1936, was being negotiated, did you have occasion to discuss the problems arising in connection with the terms and provisions of that contract, with Mr. White?

A. I had occasion to review it and write an opinion to Samuel W. White, as president of U. P. U. Corporation, on August 21, 1936. Prior to that time I had discussions with Mr. White about the problem leading up to the ultimate contract.

Defendant's Exhibit 289 was marked for identification and offered in evidence by defendant. It is as follows:

Defendant's Exhibit 289.

United Public Utilities Corporation
Twenty North Wacker Drive - Chicago

July 16, 1936.

Mr. F. H. Scheetz,
Evans-Bayard & Frick,
1335 Land Title Bldg.,
Philadelphia, Pa.

Dear Mr. Scheetz:

I am enclosing herewith copy of Mr. White's letter of July 10th, to Mr. C. L. Sandstedt, regarding approval of the Federal Power Commission of any inter-company contracts that have been executed by the Dakota companies, together with Mr. Sandstedt's reply, dated July 14th.

Very truly yours,

C. McC. PEALE,
Treasurer.

Enclosures—2.

Northwestern Public Service Company
General Offices
Huron, South Dakota.

July 14, 1936.

Mr. S. W. White, President,
United Public Utilities Corporation,
20 North Wacker Drive,
Chicago, Illinois.

Dear Mr. White:

This will acknowledge receipt of your letter of July 10th in regard to submitting inter-company contracts to the Federal Power Commission for their approval.

From time to time I have thought of this but in reading over the Act I decided that it was not necessary. The part

of the Act dealing with rates and contracts of this nature is rather vague and I assumed that the Power Commission could take jurisdiction if they wished to, but that some affirmative action would be necessary on their part.

We have never obtained a legal opinion on this matter and it occurs to me that possibly the Chicago legal department might have passed an opinion on similar contracts. We did not intend submitting these contracts to the Federal Power Commission but if you feel they should be submitted or that we should obtain a legal opinion as to the necessity of doing so will you kindly advise.

Yours very truly,

C. L. SANDSTEDT,
Secretary & Treasurer.

CLS/f

CC:CJS
FEK

July 10, 1936.

Mr. C. L. Sandstedt, Secy.,
c/o Northwestern Public Service Co.,
Huron, So. Dakota.

Dear Mr. Sandstedt:

Will you please advise me whether you have applied for, or received, approval of the Federal Power Commission of any of the inter-company contracts that have been executed by the Northwestern companies under the jurisdiction of your office. I have the impression that you registered your three utility companies as "public utilities" (doing an inter-state business) and, therefore, I assume that the Federal Power Act as amended by the Public Utility Holding Company Act is applicable to their contracts.

Very truly yours,

.....
President.

(End of Defendant's Exhibit 289).

A. C. O. Sandstedt, A. B. Sanborn, Samuel W. White, R. McClanahan.

Q. In 1945 did the Securities and Exchange Commission hold hearings with respect to the sale of the securities of Dakota Public Service Company by United Public Utilities Corporation to Montana-Dakota Utilities Co.? A. Yes.

Q. Were you present and representing United Public Utilities Corporation in all of those hearings, as its counsel?

A. There was only one hearing, on October 9, 1945. I was present and conducting the hearing on behalf of U. P. U. Corporation.

Q. What witnesses were present at that hearing?

Mr. Benson: Was this in the same 11-B proceeding?

The Witness: This hearing was a consolidated hearing on four proceedings: On the application of U. P. U. Corporation to sell, which was file No. 54-7; on the Section 11-B (1) proceedings against United and its subsidiary companies, under file 59-38; and there are two other proceedings, one file 59-73, United Public Utilities Corporation and its subsidiary companies which—the file number, that is my present recollection, the file number on the subsequent proceeding initiated by the Commission under Section 11-B (2), but I can verify that. And there is also another file number, 70-1110, involving United Public Utilities Corporation, which I would have to check to identify.

Mr. Robinson: Will you repeat my question?

(Question read as follows: "What witnesses were present at that hearing?")

The Witness: A. Samuel W. White and Kenneth E. Oakley, witnesses produced by me; Frederick R. Gamble, a witness produced by Paul Christopherson, Esq., counsel for Montana-Dakota Utilities Co.

Mr. Robinson: Q. And did Mr. Christopherson enter his appearance in these proceedings on behalf of Montana-Dakota Utilities Co.?

A. Yes, for a limited purpose, for the purpose of offering such evidence as the staff of the Commission desired, with respect to purchase.

Mr. Robinson: Q. Mr. Scheetz, did you cause the proceedings on 59-38 to be incorporated by reference in the hearings on the sale proceeding?

The Witness: At that hearing I moved the trial examiner to incorporate by reference in the notes of the proceeding the testimony appearing in the files of the commission as follows:

File No. 43-185, the hearing of May 8, 1939, which was the hearing on the merger of Northern Power & Light Company and North Dakota Power & Light Company, notes pages 1 to 113, inclusive, and 142 to 145, inclusive.

File No. 59-38, hearings on May 15, 1942, and May 16, 1942, notes of testimony pages 388 to 604, inclusive.

File No. 54-121, hearing of April 23, 1945, notes of testimony on pages 31 to 35, inclusive, 37 to 38, and 42 to 53, inclusive.

Files Nos. 54-79, 59-73 and 59-38, notes of testimony of the consolidated hearing of August 8, 1944, at pages 1172-3 and 1176-8, United Public Utilities Exhibit E-9.

In File 49-97, which was a consolidated hearing with other files, notes of testimony, pages 1141 to 1144, inclusive, the trial examiner ruled on that request and directed the incorporation.

Q. And was an order entered permitting that incorporation? A. Yes.

Mr. Benson: You mean the examiner made an order, then?

The Witness: Yes.

Mr. Benson: You mean the examiner dictated to the reporter in the room at that time?

The Witness: The examiner ruled on it, and the official stenographer took the ruling down and recorded it in the official notes of testimony.

Mr. Benson: So what you are stating here appears in the official notes?

The Witness: That is correct.

Mr. Benson: Is it a summary made by you?

that this report was made at this meeting, the substance of which is reflected in the minutes.

Q. Do you recall that such report of the president also stated to the directors that, beginning September 1, 1940, Dakota Public Service Company would collect capacity charges at an annual rate of $2811.60?

A. Yes, by refreshing my recollection from the minutes as to the details.

Q. Were you present at a regular meeting of the board of directors of United Public Utilities Corporation held in Philadelphia on February 7th, 1941? A. Yes.

Q. Do you recall whether at that meeting the president reported to the directors the amount of the final cost of the new 4,000 kw addition to the power plant at Bismarck?

A. Again I will say that I recall generally that the president was making periodic reports on the subject, but for the details of the report and the time of the report I must refresh my recollection from the minutes, which I do, and say on that basis he did so report.

Q. Do you recall whether the president brought to the attention of the board the fact that Northwestern Public Service Company would be entitled to collect monthly capacity charges from Dakota Public Service Company at the annual rate of $4276 beginning January 1, 1941?

A. I thought I had covered that by my previous answer, but if not I will make the same statement as to that question.

Q. Were you present at an organization meeting of the Board of Directors of United Public Utilities Corporation held at the office of the corporation at 15 Exchange Place, Jersey City, New Jersey, on April 30, 1941? A. Yes.

Q. Do you recall whether a proposed ten year contract for the pooling of electric generating capacity and interchange of energy between Dakota Public Service Company was discussed at that meeting?

A. I recall that such a proposed contract was discussed at a meeting of the board of directors and the minutes refresh my recollection that it occurred at that meeting.

Q. Do you recall whether the management was instructed by the board of directors at that meeting to

recommend to Dakota Public Service Company that such a long-term contract be negotiated, in order to assure that company of an adequate source of energy to meet its increasing requirements?

Mr. Benson: That is objected to on the ground that it is not competent proof, it is not the proper method of proving corporate transactions and actions and irrelevant and immaterial, and this entire method of reading counsel's conclusions is objected to.

The Witness: I recall that the board decided to make such a recommendation. I recall that I advised them to put it in the form of a recommendation, but I have to refresh my recollection to fix the date at this meeting.

Mr. Robinson: Q. Mr. Scheetz, do you have with you a memorandum prepared by you for your files dated June 17th, 1941?

A. I do. This memorandum was dictated by me to my secretary and it bears the date June 17th, 1941, and from that I deduce that I dictated it on that date, but if I did not it was the next day, referring to the date on which Mr. White was there. Perhaps I should say "shortly thereafter" instead of the next day.

Mr. Robinson: I now offer in evidence Defendant's Exhibit 36 for identification, both generally and for the specific purpose of establishing the fact that Mr. Scheetz and Mr. White did, on June 17th, 1941, discuss the Dakota interchange agreement, with particular respect to the variances in definitions and to the definition of, "Company's Maximum Demand", and for the fact that Mr. White made notes of all the suggested improvements and advised Mr. Scheetz that it was unnecessary for him to reply to Mr. White's letter of June 11th, 1941.

Mr. Robinson: Q. Mr. Scheetz, did you discuss with Mr. White, on June 17th, 1941, the Dakota interchange agreement, and did he make notes of all suggested improvements which you made and did he advise you that it was unnecessary for you to reply to his letter of June 1th, 1941? A. Yes.

Mr. Robinson: Q. Mr. Scheetz, I show you a portion of Exhibit F to the plaintiff's complaint in this proceeding, purporting to be a copy of a supplemental agreement made March 13, 1943, between Northwestern Public Service Company and Dakota Public Service Company, and ask you whether you prepared the original of that supplemental agreement? A. I did.

Q. Mr. Scheetz: Were you present at the regular meeting of the directors of United Public Utilities Corporation held on February 3, 1943? A. Yes.

Q. Do you recall whether he made any further explanation as to the necessity of abandoning that proposed installation by Northwestern Public Service Company of the Aberdeen plant and that such abandonment made preferable the proposed amendment?

The Witness: A. I know that the matter was gone into extensively in the board meeting and that Mr. White made an exposition of it. By refreshing my recollection from these minutes I can see that this is the substance of the exposition. It is a brief statement of the exposition.

Mr. Stafford: Q. And you prepared this brief statement of the exposition?

A. I did, and also prepared the resolution.

Q. Did you, subsequent to that date, consider any proposed modifications of the then proposed amendment of the 1941 contract, which modifications emanated from other persons? A. Yes.

Q. Will you describe what they were, please?

The Witness: Mr. White had furnished a copy of the memorandum of Mr. Ralph Stevenson to Mr. Kruesi dated February 11th, 1943.

Mr. Stafford: Q. Who is Mr. Ralph Stevenson?

A. I have always understood him to be counsel for Middle West Corporation, and I don't know whether he is counsel for Middle West Service Corporation but I have always understood him as acting for Middle West Corporation. As a result of that memorandum I recognized his point and advised Mr. White by this letter that I accepted the point, and sent five copies of the revised agreement to

Mr. White and returned the memorandum, and I also see, from my postscript, that I had a copy of Mr. White's letter of January 25, 1943, to Mr. Kruesi, which I returned to Mr. White.

Q. Mr. Scheetz, in 1942 did the Securities and Exchange Commission institute integration proceedings against United Public Utilities Corporation?

A. It was on November 3, 1941,—

Mr. Benson: Just so we understand at the inception what we are talking about, are you talking about proceedings under Section 11 of the Holding Company Act?

The Witness: Section 11-B (1) proceedings were instituted against the United and its subsidiary companies.

Mr. Benson: O. K. What was the date?

The Witness: Let me correct the date. The proceedings were ordered October 31, 1941, and the order was marked for release November 3, 1941.

Mr. Robinson: Q. Were you counsel representing the United Public Utilities Corporation and its subsidiaries in that proceeding? A. I was.

Q. Did that matter move to a hearing? A. It did.

Q. Do you recall on what date or dates that hearing or hearings were held?

A. The matter proceeded to hearing in several stages. The first stage was confined to the status of the ice companies and to gas companies in Arkansas, and resulted in the issuance of an order of divestment.

The next stage involved hearing on the integration status of all the other subsidiaries, and the hearings began on May 12th, 1942, continued through May 16, 1942, when they adjourned, to reconvene subject to the call of the trial examiner.

Mr. Robinson: Q. Were you present representing United Public Utilities Corporation and its subsidiaries in all of these hearings? A. Yes.

Q. That is, all of its subsidiaries? A. Yes.

Q. What witnesses were present on behalf of United Public Utilities Corporation and its Dakota Public Service Company subsidiary in these hearings, if you know?

The Witness: No, I have stated it exactly as I am reading it from my copy of the notes obtained from the Alderson Company, the official reporters for the commission.

Mr. Benson: But these numbers and pages and each of them which you moved be incorporated in the record were not read in the presence of Mr. Gamble or Mr. Chrostopherson?

The Witness: They were not.

Mr. Stafford: Q. Was any objection interposed by any party to that proceeding to your motion for the incorporation by reference of the testimony of preceding causes and the order entered thereafter under your motion?

The Witness: A. No.

Q. Mr. Scheetz, aside from the proceedings before the Securities and Exchange Commission, did you have any dealings with Mr. Christopherson in connection with the sale of the stock of Dakota Public Service Company by United Public Utilities Corporation to Montana-Dakota Utilities Co.?

The Witness: I had correspondence with Mr. Christopherson and I also was present at one meeting in Chicago with Mr. Christopherson and Mr. White in which certain terms of the proposed contract were under discussion.

Q. And Mr. Christopherson was representing Montana-Dakota Utilities Co. in these discussions? A. Yes.

Q. Did you ever invite Mr. Christopherson to look at the integration proceedings and the hearings thereon, that is 59-38?

The Witness: To the best of my recollection I suggested to Mr. Christopherson at one time, when we were preparing for the proceedings, that he read the testimony. I do not think that I directed his attention to any particular portion and I don't think that he ever accepted the invitation. I must confess that my recollection on it is hazy, but it is my best recollection that I went that far and no further.

I can give you the reason as to why I did it, but I don't know that I communicated that to him.

Mr. Robinson: What was that reason?

Q. Well, it had been my practice in all the situations where acting as counsel for holding companies on sales of subsidiaries to ask the counsel for the purchasing party to review the testimony which we had furnished to the commission, so that they could compare any presentation which they were making with regard to the companies, with that which we had made. And in this case I had just finished such an experience with counsel for Potomac Edison and American Gas & Electric Company, and, having it so strongly in my mind, that aids me in my present recollection in believing that I invited Mr. Christopherson to do the same thing.

Q. Mr. Scheetz, you testified that in the 1942 proceedings before the Securities and Exchange Commission, Nos. 59-38, you appeared for both United and all of its subsidiaries and was present throughout those proceedings; is that correct? A. That is.

Q. In those proceedings do you recall whether or not any of the contracts between the defendant in this case, Northwestern Public Service Company, and the Dakota subsidiaries of United Public Utilities Corporation were involved?

A. I do recall.

Q. Were they inquired into, in those proceedings?

A. Yes.

Q. Do you recall which of said contracts was inquired into?

Mr. Benson: We renew our objection to all this. Well, I guess we have a general objection. That stands, is that right counsel?

Mr. Stafford: To the whole thing.

The Witness: I would have to check the record to see how many of the contracts under which energy was exchanged between Northwestern and Dakota Public Service Company, or the predecessor subsidiaries, were explored, but I now recall that those which were currently in effect in May, 1942, were the subject of inquiry. The operations of the Dakota Public Service Company and Northwestern under the contracts were explored and the agreement which is familiarly referred to as the Central Office Agreement

was the subject of inquiry, and its operation. By Central Office Agreement I mean the agreement under which Northwestern Public Service Company and Dakota Public Service Company operated a joint office on a sharing of expense basis.

Mr. Benson: Was that called the joint management expense contract?

The Witness: The one I have, Mr. Benson, is called Agreement for Allocation of Joint Management Expenses.

Mr. Benson: When was it dated?

The Witness: Agreement dated July 1, 1939, between Northwestern Public Service Company, Dakota Public Service Company, and Knife River Coal Mining Company.

The Witness: There was another contractual arrangement which was explored, and that was the arrangement under which Knife River Coal Mining Company sold coal to Northwestern Public Service Company.

Mr. Stafford: Q. Did you, as counsel for United Public Utilities Corporation, take any position or advance any contentions in regard to the inquiry into those matters?

The Witness: A. It was not necessary to advance any contention. We were engaged in hearings to examine the integration status of United Public Utilities Corporation and its subsidiaries, and it was a question of bringing out the facts bearing on that problem. The hearings were adjourned before the cross-examination was completed and have never been reconvened so far as the residual of United Public Utilities is concerned.

Mr. Stafford: Q. Testimony was given and received, was it, with regard to these contracts about which you have testified? A. Yes.

Q. Did the Securities and Exchange Commission examiner and counsel cross-examine with reference to them?

A. Counsel for the staff of the Commission was Louis Davis, and he conducted an extensive examination of Mr. Sandstedt, Mr. Sanborn and Mr. White, on the relationships between the subsidiaries of United Public Utilities

Corporation and Northwestern Public Service Company, and the common directors and common officers.

Q. That was all gone into by Mr. Davis on cross-examination of the witnesses?

A. He cross-examined the witnesses extensively.

Q. There were three witnesses to whom you have alluded called on behalf of United Public Utilities Corporation?

A. Yes. I mentioned that Mr. McClanahan had been called on by United Public Utilities Corporation on accounting data. I don't recall at the moment—I would have to check the record and see whether he examined Mr. McClanahan on that phase of it. It did involve accounting matters.

Q. You mentioned just Mr. Sanborn, Mr. Sandstedt and Mr. White.

A. I may amplify that,—that I had Mr. Lakin present as a witness. He was present throughout the proceeding and I had him there not only for his testimony on the Ohio-Indiana properties, but anything I might need, of his knowledge on those other properties. At the moment I don't recall whether he was questioned on the subject of the other subsidiaries.

Unless Mr. Benson objects, there is one other point,—the question of the relationship of the subsidiaries of U. P. U. to Middle West Corporation was also explored.

Examination by Mr. Benson.

Q. Do you or your wife have any securities in the Middle West Corporation or any of its subsidiaries?

A. None whatever. For two days, about, I owned some stock in Middle West Corporation. I was running my sister's account.

Mr. Benson: Well, I am not interested, unless you had a real interest.

The Witness: I was in and out. As soon as I thought about it I realized I should not own any stock.

Q. Were you attorneys for any of the underwriting bankers in the sale of any United Public Utilities Company's securities?

A. We rendered legal services to Baker, Young & Company in particular matters, though not their general counsel, and I think that Baker, Young & Company dealt actively in the securities of United Public Utilities Company. I don't recall whether they participated in the underwriting, but we never represented them in connection with any underwriting.

Q. Who selected you as counsel for the committee that you testified to a little while ago?

A. I was not in the picture at that time. I can give you my understanding. Mr. Joseph Swain, of Baker, Young & Company, which later became Swain & Company,—it may have been Swain & Company at that time,—used our office on various matters, was a friend of Ralph B. Evans, who was then head of the firm, and I think it was on the recommendation of Mr. Swain that our firm was asked to be counsel for the First Lien Bondholders Committee.

Q. Were any of the members of that Committee members of Mr. Swain's firm? A. None other than Mr. Swain.

Q. When did you first take a part in these proceedings of the receivership of United Public Utilities Company?

A. The latter part of May, 1934.

Q. Will you refer to the board of directors' meeting, the minutes of June 24, 1937?

The Witness: I have it.

Mr. Benson: Q. Do you know who made that survey?

A. I have no present recollection.

Mr. Benson: I believe in your testimony on direct examination you made some statement as to North Dakota Power & Light Company succeeded to all the rights and obligations of Northern Power & Light Company?

The Witness: A. I did.

Q. And you meant to say that was under and pursuant to the provisions of the Delaware statutes?

A. And to the merger agreement itself.

Q. But also under the Delaware law?

A. That will be right.

Q. The integration proceedings before the Securities and Exchange Commission are still open?

A. That is right.

Q. There has been no 11-B(1) order issued?

A. There was an 11-B(1) order issued with respect to the ice company and the two Arkansas subsidiaries.

Q. That is the order you said required you to divest yourselves?

A. Yes. Now, when the time comes to approve the sale of the Dakota subsidiaries, the Commission noted the requirements of Section 11-B(1) with respect to that, because the Commission had always been trying to get U. P. U. Corporation to choose between its principal systems, so that the order on the sale was also under Section 11-B(1).

Q. Well, the order itself would show just how it was issued, wouldn't it? A. Yes.

Q. Did you furnish a copy of that to Mr. Christopherson?

A. Oh, I am sure he had one. He needed one for his own opinion on the underwriting. I am sure he got one direct. I may have a letter here sending him one.

Mr. Benson: Well, I am not interested. I just thought you might recall.

Q. Now, you did not mean to create the impression that the only transactions which were inquired into, in the integration proceedings, were the transactions between Northwestern Public Service Company and the North Dakota subsidiaries of United Public Utilities Corporation?

A. Of course not.

Q. And in those proceedings inquiry was also made into your relations with Middle West Service Company and the amount that was paid? A. That is correct.

Q. And you offered testimony on that?

A. That is correct.

Q. In other words, this proceeding was the same as in the integration proceeding of any other holding company; it went just as far as the commission wanted it to go, inquiring into all of the business of the holding company and the subsidiaries, as far as the commission wanted to go?

A. That is correct. Other than that I conceived it my duty to present to the Commission all the facts which

would be necessary for determination of the issue, and the Commission, of course, approached it from the same viewpoint, so the effort between the two of us was to get the complete picture.

Q. So this went into all the inter corporate relationships of the holding company and its subsidiaries?

A. That is right.

Q. And the relationship of the holding company and its subsidiaries with Middle West Service Company?

A. That is correct.

Q. And the relationship of the U. P. U. Corporation with United Public Utilities Company?

A. That is correct.

Q. And the interest of Middle West Corporation in U. P. U. Corporation?

A. That and United Public Service Corporation.

Q. Yes. How many hundred pages did you [way] there was in the entire record in the 11-B (1) proceeding?

A. I did not say.

The notes of testimony under the proceedings on Section 11 run to through page 1378. Thereafter there were other hearings, the volumes beginning with new numbering, and that must add about 300 pages.

STANLEY J. SICKEL was called as a witness by the defendant, and sworn, and testified as follows:

Direct Examination, by Mr. Royhl.

Q. Will you state your name to the record?

A. Stanley J. Sickel.

Q. You have been on the stand before during the trial of this action? A. Yes.

Q. I think you gave some of your history and associations. How old are you? A. I am 37.

Q. What is your business or profession?

A. Electrical engineer.

Q. When and where were you graduated, if you graduated?

A. I graduated from South Dakota School of Mines, in Rapid City, in 1931.

Q. Had you done any utility work prior to that time?

A. Yes, I was employed by Northwestern Public Service Company in summers of 1927, 1928, 1929. Employed by American Telephone and Telegraph Company in the summer of 1930.

Q. What were your duties during those years under that employment?

A. Line construction, surveying, maintenance work.

Q. I take it that was just during the school vacation?

A. That is correct.

Q. After 1931, what did you do?

A. I got out of school in the spring of 1931. I had various jobs until early in 1932. Occasional work that I could pick up. I operated a radio station in Mitchell from early in 1932 until some time in 1933. Shortly afterwards I went back to work for Northwestern.

Q. In what capacity?

A. My first job in 1933, labor in the Mitchell power plant.

Q. How long were you in that work?

A. I was in the plant from 1933 to 1936, as I recall it. I worked as helper for about six months, as fireman for perhaps a year, and as switchboard operator for the balance of the time.

Q. At that time was the dispatcher's office located in Mitchell?

A. No, it was not. It had been moved slightly before that. I think the Mitchell plant did do the dispatching on one shift for the south end of the system.

Q. You were there you say, until 1936, as an engineman. What then did you do?

A. As I recall about the first of January, 1936, I transferred to the Mitchell Division office as foreman in the service department. I was there for about a year.

Q. What were your duties in that department?

A. Maintenance for the distribution system, transmission line. Assisting the electric superintendent in routine operation and maintenance.

Q. That would be what district?

A. On the Mitchell division.

Q. What then did you do?

A. I was transferred then to the district office at Clark,

South Dakota, where I was superintendent for about three years.

Q. That took you up to 1939? A. To the middle of 1940.

Q. What were your duties there as district manager?

A. We operated eleven small towns out of the Clark district and I was in charge of maintaining service, maintenance of lines, reading meters, collecting bills, all of the operations of the utilities in this group of towns.

Q. Then what did you do?

A. Then I was transferred to Huron as assistant to the man who was then superintendent of transmission and distribution, who was Mr. Bayles.

Q. Is that the same Mr. Bayles whose name appears here on some of these exhibits? A. That is the man.

Q. How long did you act in that capacity as assistant to Mr. Bayles?

A. I was his assistant until he was called into the service in the fall of 1942, at which time I became acting superintendent.

Q. Before you were taken into the Huron office you were an employee of the Northwestern, the defendant, were you? A. That is correct.

Q. Now, did you become a part of the joint management staff after you were taken into the Huron office?

A. Yes, my duties took me all over the entire property.

Q. That would be North Dakota and South Dakota, would it? A. Yes.

Q. That was following the merger of the North Dakota corporation or companies up there, into Dakota Public Service Company?

A. It was at the time I went to Huron, yes.

Q. And afterwards?

A. The Knife River Coal Mining Company, of course, was included.

Q. The Knife River Coal Mining Company. From that time on you say you acted as assistant until Mr. Bayles went into service, and then you were acting superintendent of distribution and transmission. A. That is correct.

Q. And still a part of the inter-management staff, were you, joint management staff? A. Yes.

Q. What were your duties as assistant in that department?

A. I had charge of the safety and accident prevention

program. I assisted in preparing work orders. I assisted Mr. Bayles in the supervision of the line and service crews operating in the various divisions. I did drafting and engineering work on substation and transmission line design, and supervisory work in connection with construction as it was done, as it passed from the design stage into the construction stage.

Q. Do you know what the practice and policy of the joint management staff was concerning originating work orders? Are you familiar with that? A. Yes.

Q. If such an order would originate in your department did you prepare the work orders?

A. The work orders did not customarily originate in the joint management office. They originated on the division and were submitted first to the joint office for approval, and if approved were then submitted to the proper party in Chicago for approval.

Q. Following out that plan, do you know whether or not it was the practice that you, as chief of your department, would approve any work order originating in your department?

A. Yes. Those would not be built without our approval.

Q. Do you know what the practice was concerning the submitting of these work orders to the Chicago owners before they were acted upon in the field? A. Yes.

Q. What was that practice?

A. After approval in our office, the construction or retirement work order was then forwarded to Chicago for approval by the appropriate party. If it were a work order that originated in the Dakota companies or Knife River Co., it was approved by Mr. White.

Q. Samuel W. White?

A. Yes. If it were to do with the Northwestern Public Service Co. it was approved by Mr. Kruesi, and I believe in either case it was also approved by Middle West engineering staff, as to engineering.

Q. And that practice was followed out during the period these companies were interconnected?

A. That was the practice, yes.

Q. You say you got a degree in electrical engineering from the School of Mines? A. Yes.

Q. As of 1931? A. That is correct.

Defendant's Exhibit 329 was received in evidence. It reads as follows:

Defendant's Exhibit 329.

Original Cost Tabulation.

Interconnection Facilities.

I. A portion of the Aberdeen Substation.....	65,864.84
II. The Aberdeen-Barnard and Aberdeen-Ipswich Lines	105,337.65
III. The Gettysburg Substation	20,420.62
IV. The Highmore-Gettysburg Line.....	106,158.78
Total to Interconnection as of July 1, 1941..	297,781.89

S. J. SICKEL

2-28-47

I. Aberdeen Substation.

The Aberdeen sub consists of a six-bay steel structure with equipment as follows:

First Bay—Oil circuit breaker and accessories to control 38000 volt line to Barnard.

Second Bay—Oil circuit breaker and accessories to control 38000 volt line to Ipswich.

Third Bay—Step-up transformers 33000 to 38000 volts to match N. W. P. S. 33000 volt system and DPS 38000 volt system.

Fourth Bay—Oil circuit breaker and accessories to meter and control power through transformer in #3 bay.

Fifth Bay—Oil circuit breaker and accessories for Webster line.

Sixth Bay—Oil circuit breaker and accessories for Redfield line.

The first four bays are used in the interconnection; the fifth and sixth are for N. W. P. S. Co.'s own use.

Tabulation of Costs—Aberdeen Sub.

Structure $17,013.85—Charge four bays or 4/6 this item	$11,342.57
Foundations—Charge 4/6 of $3,016.52	2,011.01
Control and Metering on switchboard—three out of five circuit breakers—Charge 3/5 of 3,078.74	1,847.24
Control cables to circuit breakers—Charge 3/5 of 498.89	299.39
2—Arresters 37/50 KV Oxide Film Type	3,169.24
2—Oil circuit breaker 50 KV	4,770.29
1—Oil circuit breaker 37 KV	2,239.91
4—Potential transformer 22 KV	2,470.23
6—Current transformer 50 KV	2,653.17
1—Potential transformer 34.5 KV	438.60
From W. O. 404—Total Material	$31,241.65
Substation Labor—Charge 4/6 of 5,352.61	3,568.41
Total	$34,810.06
Incidentals	3,550.63
Total Direct Charges	$38,360.69
Supervision @ 9.6 %	3,682.63
Interest @ 3.12%	1,227.54
Total from W. O. #404 to Aberdeen Sub.	$43,270.86

Besides the primary work order, additional chargeable items were installed from various sources as indicated:

3—Current Transformer 37 KV from original sub	$ 1,314.18
1—Autotransformer 3750 KVA on W. O. #1081	5,165.00
Labor	100.41
Incidentals	116.00
Supervisions and interest	835.98
1—Potential transformer 22 KV (PWO)	703.26
1—Bus-tie transformer 5000 KVA W. O. #2127	13,761.04
2—Sets ground relays—W. O. #2129—Half of $1196.22	598.11
7/1/41—Total Aberdeen Sub to Interconnection	$65,864.84

II. Aberdeen-Barnard and Aberdeen-Ipswich Lines.

III. Gettysburg Substation.

The Gettysburg sub was built to make possible joining the 22000-volt system of N. P. L. Co. with the 33000 volt system of NWPSCo. to meter the flow of power either way over the interconnection and to serve as step-down to supply the local loads of the town of Gettysburg. It was constructed on W. O. #420, started in 1929 and completed in 1930. Original cost items from W. O. #420 were:

Steel sub structure complete	$ 1,284.70
Circuit breaker & metering equipment	3,328.24
2—voltage regulators	2,319.93
Foundations	314.70
High voltage arresters—2 sets	2,141.34
Labor	1,796.17
Incidentals	1,872.54
Supervision	1,801.17
Interest	432.21
Subtotal from #420	$15,291.00

Added by transfer were:

Fence—auth N-254	214.17
Overheads	42.83
3—Transformers—200 KVA auth N-18	3,126.50
Overheads	357.00
2—Transformers, from stock	97.30
Original cost at time of construction	19,128.80

Subsequently metering equipment was added:

1936—Meter	38.10
Overheads	1.14
33000 volt CT & PT	1,000.00
Overheads	30.00
1938—2 Combination demand meters	197.07
Installation	57.12
Overheads	7.63
Retired—1936 meter Deduct	(38.10)
Overheads "	(1.14)
Total original cost as of July 1, 1941	$20,420.62

IV. Highmore-Gettysburg Line.

From N-138:

Charge additional 5' height of 327 poles Highmore to Harrold			$ 1,800.03
Additional labor @ $1.00 per pole estimated			327.00
Subtotal from N-138			$ 2,127.03

From W. O. #397:

Charge half of material for 26 miles:

Half of:	799 crossarms	$ 1,352.79	
	628 braces	556.71	
	1608 carriage bolts	72.09	
	642 10" M. bolt	48.15	
	182 14" M. bolt	10.98	
	48 16" DA bolt	7.20	
	1205 insulator pins	348.84	
	689 45 KV insulator	939.88	
	19,500# ACSR wire	13,788.83	
	227 tie wire	70.69	
	43 strain insulator	236.85	
	Labor on conductors	2,669.65	
	Incidentals	2,992.00	
	Supervision	2,142.61	
	Interest	421.16	
Subtotal to Interconnection		½ × $25,681.04 =	$12,840.52
Additional height on 366 poles			1,991.45
Additional labor for erecting taller poles	@ 1.00 est.		366.00
Labor to mount crossarm and braces	@ .80 est.		292.80
Subtotal from W. O. #397			$15,500.77

From W. O. #420:

29—30' Poles		159.00
596—35' "		7,577.95

107—strain unit		742.64
Material subtotal		$63,572.61
Labor on Structures @ 90% of Total		$ 5,986.30
Labor on Conductors @ 78.1% of Total		3,664.95
Incidentals — prorata)		7,050.00
Supervision ") @ 72.6% of total)		6,770.00
Interest ")		1,627.00
Total from W. O. #420		$88,670.86

Summarized: Highmore to Gettysburg line allocated to interconnection:

From auth. N-138		$ 2,127.03
From W. O. #397		15,500.77
From W. O. #420		88,670.86
Subtotal—Original Cost		$106,298.66
Subsequent changes to July 1941:		
Misc. minor additions	$ 470.71	
Misc. minor retirements	610.59	
Net ret.	$ 139.88	(139.88)
Original Cost as of July 1, 1941		$106,158.78

Q. Did you prepare that? A. I did.

Q. From what source did you prepare this tabulation, Defendant's Exhibit 329?

A. These are in most cases figures taken from the final return sheet, which is the permanent record and is found attached to the construction work order. In some cases an engineering allocation has to be made of those figures, and, of course, are my allocations. They are not shown in exactly that form.

Q. Are the papers and records from which you prepared this Exhibit 329, are they here in Court in evidence?

A. They are in evidence, yes.

Q. Do you know the tabulation which you have made here is a true and correct tabulation of the instruments that you have mentioned and which are now here in evidence?

A. Where tabulated they are true and correct and where allocated they are my best judgment.

Q. I presume you have made some computations also?

A. That has been necessary in some cases.

Q. And are those computations true and correct?

A. They are.

Q. Generally speaking, what is this Exhibit 329?

A. This is an inventory per books of the various pieces of equipment and material and tabulation of labor and overhead that went into the construction of the line from Aberdeen to Ipswich; the line from Aberdeen to Barnard; the portion of the Aberdeen sub used for the interconnection; the line from Blunt to Gettysburg that was used for part of the interconnection, and a portion of the charges on the line from Highmore to Blunt which are chargeable to interconnection.

Q. What is the first study on this tabulation? I notice you have these classified in three or four sub-divided studies?

A. The first classification I have taken up is the Aberdeen substation.

Q. For how long have you been well and intimately familiar with these interconnecting properties?

A. These that we are discussing as part of the interconnection facilities?

Q. Yes?

A. I have been acquainted with them in a rough way for ten years or more, very actively since 1940.

Q. In your activities, do you have occasion to keep these properties more or less checked as a part of [you] routine duties?

A. That is part of my job, to see they are maintained and kept in proper state of repair.

Q. Then you have a personal knowledge of the property?

A. Yes, I do.

Q. I take it your first paragraph under "Aberdeen substation" is more or less descriptive of the type of structure?

A. That is the basis upon which the allocation has to be made. The structure itself is a large steel structure, consisting of several bays, each bay having its own equipment in it. Part of the bays being used for interconnection, part for Northwestern's own use. The entire structure was built in one lump sum and there is no means of allocating except on ratio basis.

Q. In what ratio was that ascribed to the defendant's own use and to the use of the interconnection facilities? I am speaking of the structure proper?

A. Of the structure itself, four bays or four sections are used to facilitate the interconnection, or make interconnection possible. Two bays are used for Northwestern's own use, so of the six bays I have allocated four to interconnection and two to Northwestern's own use.

Q. You also generally describe, I think, the equipment that is housed in the structure, do you not? A. Yes.

Q. Is an allocation made of the equipment or does that work itself out in your tabulation here?

A. Generally speaking the items of equipment can be identified item by item and charged or not charged, as indicated. The only items which have to be allocated are the structure itself and the labor, incidentals, supervision and interest. The remaining items as tabulated here are physical inventory and I referred back to the books to get the prices.

Q. Then you have actually inventoried this interconnecting facility property? A. Yes.

Q. Now, under your tabulation of "Costs, Aberdeen Sub," you have itemized those, have you?

A. That is correct.

Q. From what did you take your costs?

A. The costs are shown on the final return sheets which are in evidence.

[Which are in Defendant's Exhibit 55-19 (R. p. 741; supra).]

Q. There was some discussion here when Mr. Elvig was on the stand for the plaintiff concerning overheads, which included on the work order an account No. 60, and an account No. 61 and an account No. 62. Did you check those items? A. Yes.

Q. Item by item as shown by the journal vouchers and the cash vouchers?

A. They are shown properly segregated on the final return sheet, although on the ledger they are lumped together.

Q. So this tabulation is an actual inventory of the properties that go into this classification? A. Oh, yes.

Q. And the costs that are used are the record costs, are they? A. That is correct.

Q. Now, were you able to check out the so-called incidentals?

A. By "checking out" do you mean to determine what they consisted of?

Q. Yes? A. Yes.

Q. Did you so determine?

A. Yes, I did. We made a complete check of every item.

Q. I take it those were allocated to the Aberdeen sub, and to the Aberdeen Barnard line, and Ipswich line, etc., were they?

A. They were allocated—perhaps I will have to explain that a little more. Many of the items could not be identified as to whether they were used on the line or whether they were used on the sub. If I might use an example, the item of crew expense, truck expense, which was simply classed as incidentals. From this distance it would be totally impossible to determine whether they was used in completing the line or substation. So what I have done, I have indicated on the fourth page, analysis of work order 404. I have taken the total material, plus

labor, total incidentals, which worked out about 10.2% on the items, material and labor, and I have pro-rated the incidentals on both the lines and the Aberdeen sub, and a portion of the sub which was not used as interconnection, and the portion of the Aberdeen Barnard which was credited against the entire contract, and I have apportioned the incidentals, pro-rated among those five separate categories on Pro-rate basis with reference to total material plus labor which had been charged to each one.

Q. Were you able to satisfy yourself that all of those items were part of the so-called interconnection facilities?

A. Yes, except those for which I deducted.

Q. What do you say you deducted those for?

A. If you will refer to page 4, I have set up on the first line the total material plus labor, of the complete job. The job consisted of complete Aberdeen sub, part of which was charged to interconnection, part of which was not. It consisted of Aberdeen Barnard line. It consisted of entire construction of Aberdeen Barnard line, and it consisted of the line from Aberdeen to Ipswich. There was really a total of five items. It figured out 10.2 on the itemized charges. Leaving that picture there, we go back and find out what material and labor is properly chargeable to Aberdeen Ipswich line. Then we apply the same 10.2 against the material and labor on Aberdeen Ipswich line and that will give us a figure for the proper amount of incidentals to charge against that line. Similarly with each of the others. By this approach, when we are all through, I have deducted the incidentals which are not properly chargeable to the interconnection in the same ratio as you have added them on where they are properly chargeable.

Q. Have you made a true and correct distribution of those amounts? A. To the best of my ability, yes.

Q. Does that involve some engineering questions? And engineering experience? A. It does, yes.

Q. As so tabulated by you, what do you find the amount of the cost of the Aberdeen substation, under the interconnection figures?

A. I arrived at a total as of July 1, 1941, of $65,864.84.

Q. That is the same figure that appears on Page 1 of the tabulation under that same heading, isn't it? A. Yes.

Q. Under the roman numeral one? A. Yes.

Q. What was the next classification, "Aberdeen Barnard," "Aberdeen Ipswich" line?

A. Yes. Those are on Page 3. Both of these lines, I might mention were built on the same work order as the Aberdeen sub. There was no allocation made at the time of the construction between what went on the Barnard line and what went on the Ipswich line. Under the system of accounting in use in those days there was no necessity for making such a break down. They were built simultaneously and part of the same job, and there was no allocation made. So they are both part of the interconnection facilities and I have not attempted to break it down. I have combined Barnard line and Ipswich line.

Q. You know of your own knowledge, do you, that the items contained in this classification are true and correct and properly applied to that cost? A. That is correct.

Q. Does that include items of incidentals, supervision and interest?

A. Yes, pro-rated in the same manner as Aberdeen sub.

Q. What was supervision on the Aberdeen sub?

A. In dollars?

Q. No, in per cent.

A. Supervision is 9.6%.

Q. I observe there, the figure, interest, 3.12%. Was that interest as charged against the work?

A. Yes. That interest is figured each month by journal voucher against the total uncompleted value of the construction as of that date. In other words, if you spend $2,000 the first month, at the end of that month, for the following month the interest charge would be per centage of the $2000. If you added another $3000 the following month the interest charge would be on $5000.

Q. At what rate? A. I believe ½% a month.

Q. Then the total interest which you charged at the Aberdeen sub was $1227.54?

A. That is right. That represented the fact that construction was started on the substation and material was purchased and held there inactive for some months, before the substation actually went into the service.

( ) Parenthesis Indicates Red Figures

Q. I think you stated that under that classification, supervision, that an amount of 9.6% was used. What was that figured against?

A. That is based upon the total of the direct charges.

Q. That would be an actual cost item?

A. Oh, yes. Out of pocket expense.

Q. Are you familiar as an electric Engineer with the rates of supervision, beginning in 1929 and 1930, along in there, down to the present time? A. I believe so.

Q. Do you know what those generally were in practice and operation during the years?

A. Depending a little on the individual job. It will vary on different jobs, different classes of work, but figures from 9, 10, 11%, in that range, are very good, customarily.

Q. Were they during the years from 1930? A. Yes.

Q. I think this construction was originally completed along in 1930, as the record shows?

A. That is my understanding.

Q. Has there been some change since the inauguration of the Federal Power Commission, where companies are subject to interstate commerce of the Power Act?

A. Very definitely there have been changes that came in with the uniform system of accounts and record keeping in 1937.

Q. That would start some time about 1937? A. Yes.

Q. Have we any records or files in this case, as exhibits, that reflect the overheads that were used back through the years on this type of construction?

A. There is in evidence appraisals of the North Dakota State Railroad Commission.

Q. Those are Plaintiff's Exhibits 13 and 14 (R. p. 242, supra). A. Perhaps they are.

Q. Do you know what they provide?

A. In a general way, yes.

Q. What do you find they provide?

A. Around 10, 11, 12%, I believe.

Q. Those reflect the policy and practice of the North Dakota Commission in supervision of rates for electrical utility companies, do they?

A. That would represent the amount of overhead which they allowed to be used in preparing rate base.

Q. Was there anything further here that you observed that reflected the practices in the early '30's?

A. The Lucas and Luick report set forth in some estimating figures for construction which they were recommending in which the overheads are set out, I believe.

Q. I show you Plaintiff's Exhibit 82-14 (R. p. 607, supra), and ask you if that is the record and exhibit to which you refer? A. Yes.

Q. Does that reflect the practice on or about the time that that survey was made by a reputable engineer?

A. I think it would be an accurate reflection, yes.

Q. What would that show?

A. Here is an estimate on page 88, estimating cost of lines, to which they add a flat plus 20%. That is, 1, 2, 3, 4, 5, 6, 7, in seven instances they have added 20% on their estimate on page 91. Dealing with distribution they have added 25%. I haven't had a chance to study this.

Q. Do you know what Mr. Helmick's study, which has been marked Exhibit 226 in this case, showed so far as overheads was concerned? A. Yes, I checked that.

Q. What did you find that to be in the year 1927?

A. According to my recollection there were overheads estimated in that appraisal from 17 to 22%. Varying with different classes of construction.

Q. Now, referring to the Barnard-Aberdeen-Ipswich line. Your sub-division 2. appearing on page 3, of this Exhibit 329. What do you find the totals of those to be?

A. The total cost, or portion of the total cost chargeable to interconnection [anounts] to $105,337.65, as of July 1, 1941.

Q. And you have checked the items and inventoried these the same way as you did the Aberdeen sub?

A. I have not checked these item by item as physical inventory of the line, but I am thoroughly familiar with the line and I identified all items as being items used in construction.

Q. And your costs were taken from what?

A. Costs were taken from the final return sheets attached to the work order.

Q. What did you allow there for supervision?

A. That would be the same percentage as applied to Aberdeen sub, 9.06%.

Q. And interest 3.12? A. 3.12, yes.

Q. And incidentals were actual material that went into the work, were they?

A. Actual material or legitimate expense. Not all of them represent material, of course.

Q. Were you satisfied as to the items being properly chargeable to that construction? A. Yes.

Q. On page 4 of your analysis you have already testified concerning that, haven't you?

A. I believe so, unless there is some other question.

Q. On page 5, under Roman numeral III, you tabulate the Gettysburg substation. Have you arrived at that in the same manner as you have arrived at these other costs?

A. Yes. These are costs taken from the final return sheets on which it was built plus the additional requirements and additions to bring it up to date of 1941.

Final return sheets are in Defendant's Exhibit 55-20 (R. p. 749, supra).

Q. Are they true and correct? A. They are.

Q. What is the original cost, as you found, for that construction?

A. The original cost as of July 1, 1941, represents $20,420.62.

Q. And you carried that to page 1, and put it in the tabulation in that amount, did you? A. Yes.

Q. That is true also of the Aberdeen-Barnard-Ipswich lines? You carried that to page 1 and put it in your tabulation? A. Yes.

Q. Will you discuss the Gettysburg substation for a moment. Generally speaking, what is that construction?

A. It consists of a steel structure, about which are lightning arrestors. On the structure are mounted cut switches or bus work. At the time of construction there were two banks of transformers installed there. That is, in 1930, when it was built. Because at that time the Dakota system was 22,000 volts, on Northern, and on Northwestern 33,000, so the two banks of transformers were put in, to step down from 33,000 down to 2400, and back up to 22,000. From the 2400 stage voltage was taken off to supply the town of Gettysburg. There was also step down regulators to meter power whichever way it may be flowing. Then there was fencing and a little land.

Q. Was that substation used or useful to defendant in the interchange of energy?

A. That depends on the date. Early in the contract it was necessary to have that substation there in order to match voltages. The structure transformers and low side circuit breakers were essential to interconnection at the time it was built. In 1940 when the line from Bowdle to Gettysburg was converted to 33,000, then both lines coming in were at 33,000 and there was no further need for the transformers or low side switches there as part of the interconnection. From that date on they were used simply to supply the town of Gettysburg.

Q. Was that a part of the defendant system or part of the Dakota system?

A. The town of Gettysburg was a Dakota town.

Q. Stepping down the energy, down to 2400, was essential only in the operation of the Dakota company's business in Gettysburg? A. That is correct.

Q. You say after 1940 no part of the substation there was used or essential to the defendant company in the interchange of energy?

A. No. The matter of equipment was still essential in the interconnection.

Q. Outside of the metering connection there was?

A. No.

Q. And you have prepared this Gettysburg substation appraisal the same way as you have prepared the other appraisals in the interconnecting facilities?

A. Yes. This is the total per books as if it were all used for the interconnection.

Q. That is, you have not allocated this to the Dakota company merely because it was used or useful to them only, or largely? A. No.

Q. I note there the Highmore-Gettysburg line on page 6, and it ends over on page 7, doesn't it?

A. That is correct.

Q. Is that prepared in the same way? A. Not entirely.

Q. Will you explain that, please, to the Court?

A. There is more allocation which has to be made here. These lines were built, portions of them, at various times, and again as in the case of Aberdeen, two or three jobs

were frequently done on the same work order, and it is necessary to go back and make an engineering allocation and segregation of the labor and material that went into part of the job and what went into the other part. Fortunately that can be done in most cases because you can identify material of 33,000 and distinguish it from the material used on the undercircuit.

Q. Did you do that? A. Yes.

Q. You worked it out on that basis, did you?

A. To the best of my ability, yes.

Q. I take it you have the same intimate knowledge concerning that property as these other properties?

A. I am very familiar with it.

Q. What did you make that total?

A. Perhaps I ought to itemize that because it was built at different times. The total consists of a charge for additional five feet of pole heighth only for the construction from Highmore to Harrold, and estimated labor to go with it, $21,271.00, and $15,500.00, to work order 397. Add amounts $88,670.00, from work order 420. The total chargeable to interconnection of these items amounts to $106,298.66. That is as of time of construction. There was miscellaneous minor retirements of $139.00 for that. Brings us to the original cost as of January 1, 1941, $106,158.78.

Q. You picked up these retirements and deducted them?

A. Yes.

Q. On what part of the line did you charge five feet of pole to the interconnecting facilities?

A. In fact, all the way from Highmore to Blunt. It was done on two different work orders, to my belief, there was. With the distribution circuit they run up to feed the towns of Ree Heights, Highmore, Harrold, Blunt in the other direction. Our distribution circuit, I am willing to concede, had to have some poles had there been no interconnection, so I have charged to the interconnection the additional five feet made necessary to used poles for the interconnection. In other words, the total cost of the poles themselves, surveying, right of way, construction, all of that is not charged to the interconnection. Only the additional cost of five foot longer poles.

Q. I notice you have also placed some of the labor to this classification, too, in the handling of these poles?

A. I have made an estimate on Page 6. I have estimated that the additional five foot longer pole, the hauling of it to its location, the digging of the hole, which would have to be six inches deeper for five foot taller pole, erecting pole, tamping, would probably amount to a dollar a pole. That is my estimate.

Q. Is that according to your experience as an engineer?

A. That is conservative.

Q. This final amount, $106,158.78, you have carried forward on Page 1 of the tabulation? A. That is correct.

Q. Now, what do you make the cost of the total interconnection facilities?

A. Arrived at by my allocations, $297,781.89.

Q. Is there anything else you desire to comment on, on this subject?

A. I don't believe so. Only, perhaps, the point that to the extent there is allocations involved in here, it is more in the nature of an appraisal. We expect to come out within a few dollars one way or the other of what an independent appraisal would put on it. It is not a thing you expect to come out to a penny. Two to five per cent leeway would ordinarily be left.

Q. Is that engineering practice? A. Yes.

Q. Going back just a moment to the interconnection facilities which you have, according to your data, tabulated as approximately 297 thousand. What is properly chargeable against that as a fixed charge? What is your opinion?

A. Fixed charges would include interest, depreciation, maintenance, operation and taxes. Do you want me to put a value on each of those?

Q. Yes. A. As of the time these were built?

Q. That is right.

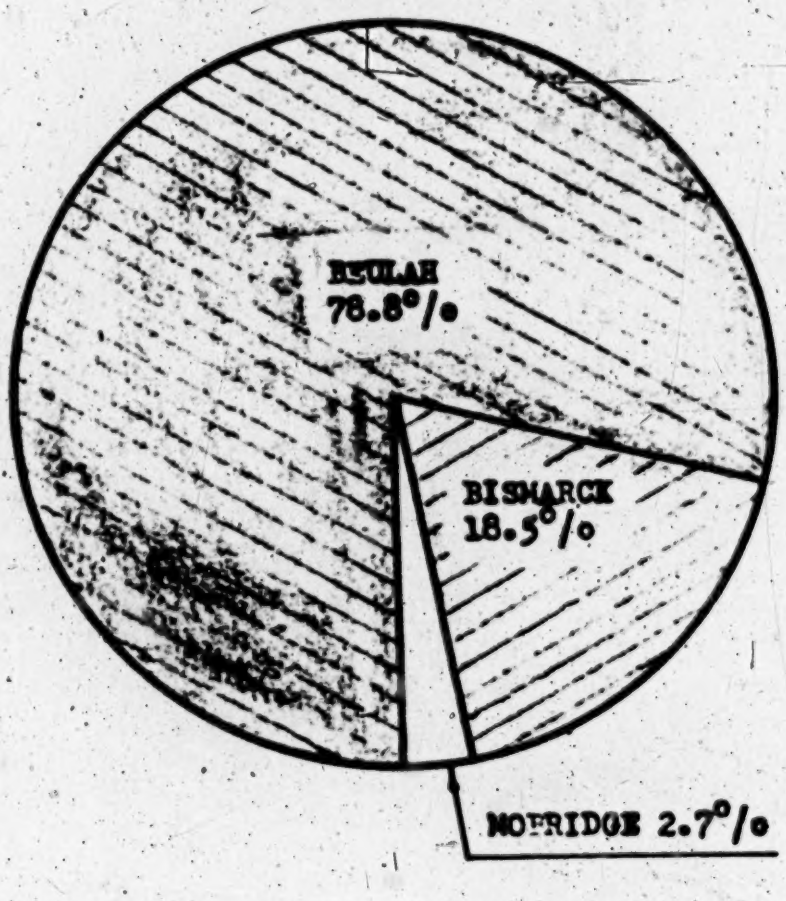
A. I will explain that taxes and maintenance costs have gone up since these were built, and interest costs have gone down. In other words, the total will be correct.

Q. How about taxes? A. I think taxes have gone up.

Q. Go ahead.

A. The figures generally accepted in the 30's, before the war, were 6% for interest; 3⅓% for depreciation; on this

type of equipment; between 2% and 3% for [manitenance] and taxes, and roughly 1% for operation. That will total about 13%. 13% is a very commonly used figure.



Q. In the electrical engineering profession? A. Yes.

Defendant's Exhibit 330 was received in evidence. It is as follows:

Defendant's Exhibit 330.

Total	214,279.0 (x1000)KWH		=100°/o

*Sources: Station Logs
Monthly Efficiency Reports

Defendant's Exhibit 330-A was received in evidence. It is as follows:

Q. I am referring now to Exhibit 330, which is entitled "Input to Transmission system" and also Exhibit 330-A, which is entitled "Output to transmission by plant."

A. Yes.

Q. Did you prepare Defendant's Exhibit 330-A? A. Yes.

Q. From the books and records of the interconnected companies that are here in court?

A. Yes, they are all in court, I believe.

Q. Are these computations and figures true and correct?

A. Yes, they are.

Q. Now, what do you mean "Output to transmission"? Just generally?

A. Each of these plants on the north end or on the south end, or the combined system, each plant was located where there were loads. In other words, the [Puelah] plant had some local load. The Bismarck plant had some local load, in the town of Bismarck. The Dickinson plant had local load in the town of Dickinson. Each of these plants also were interconnected with the transmission system. Depending on the size of the plant with reference to its location and with reference to its local load, each plant put more or less out onto the transmission. In some cases, the very small plants, all that they produced was used locally and none of it got out on the transmission system. In other cases, such as [Buelah], they had very little load at the location of their plant, and the bulk of their power was sent out onto the transmission system. The round total put on the transmission system came from these various plants in proportion to which they had capacity exceeding their local need.

Q. I take it, from Exhibit 330-A, it is a compilation of the Dakota companies' generating plants or units that went out on the transmission?

A. These are compiled from the actual meter readings showing what power left the plant and got out onto the transmission system, yes.

Q. What is Exhibit 330, generally speaking?

A. Exhibit 330 is simply a graphic form of representing out of a given number, a million kilowatt hours, or any representative figure, the proportion which came from the various plants into the total pool of transmission on the Dakota system.

Q. Now will you indicate more particularly the source of those figures, so far as metering is concerned? You say you took them from meters?

A. Take the [Buelah] plant. It is the largest producer. The [Buelah] plant had meters installed, integrating meters installed, first, that in the generators themselves. Secondly on the local loads which, in this case, would be the town of [Buelah], the [Buelah]-Kill Deer line, and the Knife River mine. Those three were taken off of the bus. Then they had three meters installed on the substation feeders, that is the feed that goes out from the plant to the transmission line. In any case those readings are recorded on substation logs, the substation feeder readings, daily, monthly, annually, and by reference to those substation logs you can determine how many kilowatt hours any given day, any given month, left that plant and went out onto the transmission system. The same thing exactly happened at the other plants.

Q. I take it that this Exhibit 330 and 330-A determined perhaps to the Dakota companies, the cost of power that went out on the transmission lines by computing the cost of the several plants and their per centages that went onto the transmission?

A. Northwestern Public Service Company, the entire power, and Dakota's power under different conditions, could only purchase power that was on the transmission, and except as power got onto the transmission it would not be available for sale. But the proportion in which the various plants put power onto the transmission, the costs prevailing in those plants, would all, of course, be a proper method of determining what the cost of such power was.

Q. Now, this graph, that indicates by curves a distribution of these per centages, does it?

A. That represents the average over the five year period which was considered. I total over the five year period, I should say.

Q. That is the total over the five year period, and the per centage shown?

A. The per centage in each case is the total that transmission plant contributed to the total transmission power. It goes up into astronomical sums. Over the five year period the total was 35 million kilowatt hours, so it has been necessary to reduce it to per centages.

Q. Those figures on Exhibit 330, [Buelah], 168,992.1. What does that mean?

A. You have to actually add three more ciphers. That represents 168 million plus from [Buelah].

Q. Is that the same at Bismarck and Mobridge? A. Yes.

Q. I observe on Exhibit 330-A there are some stations that are stations that are off the load. What do you mean by that?

A. By that I mean that they produced no net contributions to the transmission system. In other words, over an annual period, or any given period of any length, they actually took more power off the transmission than they put out into it. They represent no net contribution to the system.

Q. You have designated those as "other units"?

A. Yes. I think on your copy they are identified as "Miscellaneous". They include, Mott, Mandan, Ellendale, Gettysburg and Lemmon.

Defendant's Exhibit 331 was received in evidence. It is as follows:

Q. As a matter of electrical enginering, does transmission loss vary? A. Definitely.

Q. With conditions, etc.? A. Yes.

Q. Will you kind of tell us about that?

A. Transmission loss is, of course, a combination of the amount of power transmitted, and how far it goes and at what voltage and over what size of wire. On a complex system of transmission wires, with plants scattered about and with various lines scattered about, it is virtually impossible to pick out a given unit of power and say it is power coming from such and such a place, or went to such and such a place, or traveled over a known route. In other words, it is as if a large tank of water was being filled by a dozen different faucets, and you went out and took out a pail of water, you could not tell which faucet it came from, if I might use a very crude [anology]. The only thing that is known on the system is what the total losses in transmission were. That we can calculate correctly. We know what went in and we know what came out, and the difference is what we lost in transmission. And because of the fact that conditions on transmission systems vary from time to time, even from minute to minute, one moment you may have a thousand kilowatts flowing out over a transmission line, and fifteen minutes later power may be flowing in over that line. Losses are impossible to calculate. Given a steady condition where things don't change from an hour at a time, say, you could go out and read the meters and you could calculate it. But under conditions as they are there is no way I know of that you can calculate on anything but theoretical basis.

Q. The item of losses which you use on Exhibits 331 and 331-A, are those losses from all causes or just transmission line losses?

A. That represents a number of factors. That represents losses in stability in transformers which are a factor. It represents losses which we class as unaccounted for. I made an effort to eliminate that as far as possible, but there are still losses due to low meter readings, that is, meters that have been disabled for a portion of a month. There is also losses unaccounted for on a system in addition to strictly line losses. In each case these will include losses in stability in substations, because in all cases the

S.J.S. CNEL

Defendant's Exhibit 331-A was received in evidence. It is as follows:

Defendant's Exhibit 331-A.

Transmission Losses DPS System.

In tracing the flow of power between DPS and NWPS systems it is apparent that some losses occur enroute from the point of delivery to the point at which power is used. Were accurate metering installed and available, and had the lines between plants been used only to transfer power between systems, the losses which occurred in transmission could be determined.

Transmission line losses can be calculated on a theoretical basis with a fair degree of accuracy, but only if all conditions are known. Losses vary with the amount and direction of power flow, with the installed transformer capacities, with characteristics of the load and power factor and a number of other variables which fluctuate from day to day, hour to hour and even from minute to minute. A set of conditions can be assumed and the losses calculated, but such losses are only accurate as long as the conditions remain exactly as assumed. In utility operation the variations on a widespread system are almost infinite and calculating of losses on a set of assumed conditions is not only of questionable accuracy but may be actually misleading.

To bring the matter of transmission losses out of the field of speculation, a study has been prepared to establish what actually did happen on the DPS system during the past five years. Earlier figures could have been set up equally well but records prior to 1941 are now no longer complete or available.

Considering the DPS transmission system as a whole, it extends from Beulah on the north down through Glen Ullin; divides there with one path through Bismarck and Wishek to Bowdle and Aberdeen; the other path to Bowdle and Aberdeen via Mobridge. Some facts are known or can be reconstructed from available records; the power fed into this system from the various generating plants, the

power taken from the system by the numerous intervening load points, and the power delivered and received at Gettysburg and Aberdeen.

These records in fact are all that are needed to determine the losses which occurred on the system

1—The input to the system

2—The [redacted] output

and

3—The difference between input and output, which is loss.

Set out in tabular form on the attached exhibit, these losses may be summarized thus:

	Input	Output	Loss	% Loss
1941	43.4	34.4	9.0	20.8
1942	45.6	34.6	10.9	24.0
1943	46.4	35.4	11.0	23.8
1944	46.7	35.6	11.1	23.8
9 months 1945	36.7	28.2	8.5	23.1
			5-year average	23.1%

From this point, with actual losses on the transmission system established by the records, the only question remains as to whether this 23% loss should be assessed proportionally between power sold to Northwestern and power sold to other users; or whether Northwestern should be charged a disproportionate share of such losses.

Considering that the flow of power to Northwestern was predominately during off-peak periods when lines were lightly loaded, it is likely that an equally good argument can be advanced for charging transmission losses at a lower-than-average rate as for charging at higher-than-average.

In any event the total deliveries to Northwestern during this 5-year period amounted to less than 50 million KWH while the DPS transmission system was actually carrying 218 million. Furthermore DPS losses in 1941, when 12 million KWH were delivered to Northwestern, were actually slightly lower than in 1942 and 1943 when 11 million was delivered.

Therefore, having no sound engineering basis which would justify a different allocation, the preceding % loss figures may be taken as properly assignable to loss in transmitting power to all users including Northwestern.

S. J. SICKEL.

Q. Now, referring to papers marked Defendant's Exhibits 331 and 331-A, did you prepare those papers?

A. Yes.

Q. And from what sources did you take the data?

A. From the substation logs and from district efficiency reports.

Q. They are part of the records and files here in court?

A. Yes.

Q. Are these true and correct? A. They are.

Q. You know them to be such, do you? A. Yes.

Q. I notice you have made some ten corrections on this copy?

A. I think those are supposed to be corrected on all copies. It was figured that was in error when first prepared and discovered when rechecked.

Q. Generally speaking, what does Exhibit 331 demonstrate?

A. I have taken, in preparing the tabulation on Exhibit 331, I have taken the total in-put to the transmission system, as I discussed in this previous line of testimony, the total in-put to the transmission system and set it down in one line. Below it I have totalled the total so-called loads taken off the transmission system. In other words, it is a totalization of what was delivered to Northwestern Public Service Company and what was delivered to individual substation and all individual users off of the transmission system. The in-put comes from substation after readings, and the out-put from the transmission comes from the efficiency report readings. The difference is loss, and that represents the total kilowatt hours lost in the operation of the Dakota transmission system.

Q. Have you figured that out in kilowatt hours and also in percentages?

A. Yes. It varies a little from year to year. The total

over a five year period in kilowatt hours amounted to 50 million kilowatt hours, out of generation of 218 million. The per cent lost, 23.1% over a five year period.

Q. So these exhibits, 331 and 331-A are transmission losses of the Dakota Public Service Co. transmission?

A. Yes, that is the Dakota Public Service Co.

Q. What does Exhibit 331-A show, just generally?

A. Exhibit 331-A shows the total losses on the system can be determined effectively by measuring in-put and measuring out-put.

Q. Which is an explanation of Exhibit 331-A?

A. That is correct.

Q. Predicated on engineering knowledge and study?

A. Yes.

Q. Do you desire to explain Exhibits 331 and 331-A any further now that they are received in evidence, as to the method of preparation or as to the use or usefulness of the exhibit in this litigation?

A. I believe I mentioned that these were not matters of opinion. They are tabulations of actual meter readings, which represent the actual loss that had prevailed on the Dakota Public Service Co. during this five year period.

Q. That includes 1941, through October 19, 1945?

A. Yes. This represents the period over which the heaviest transfer of power between companies occurred. That could have been reconstructed earlier had the figures been available, but they haven't been preserved earlier than 1941 and we cannot now reconstruct them. These representing the loss during the period when 10, 11, 12 million dump power were being sold to Northwestern Public Service Co., and represent the largest losses.

Q. In computing cost of generation, is this Exhibit 331 and 331-A useful?

A. They are useful. In other words, you have to know from which plants the power or transmission was derived, and you have to have some factual basis on which to allocate losses in transmission in either case.

Q. That, then, together with the kilowatt hours, plus the cost of kilowatt hours, is the basis of cost of energy, isn't it?

A. That would represent what it would cost to deliver it at Aberdeen or Gettysburg.

in-put readings were on the low side of the [tranformer]. Transformer losses are included in these losses.

Q. In addition to transmission losses?

A. In addition to line losses.

Defendant's Exhibit 332 was received in evidence. It is as follows:

Defendant's Exhibit 332.

DPS (& Predecessors) Peaks & Cap.

Year	Peak*	Firm Capacity*	Reserve
44	13,230	9,955	(3,275)
43	11,770	9,955	(1,815)
42	11,680	9,955	(1,725)
41	12,850	9,955	(2,895)

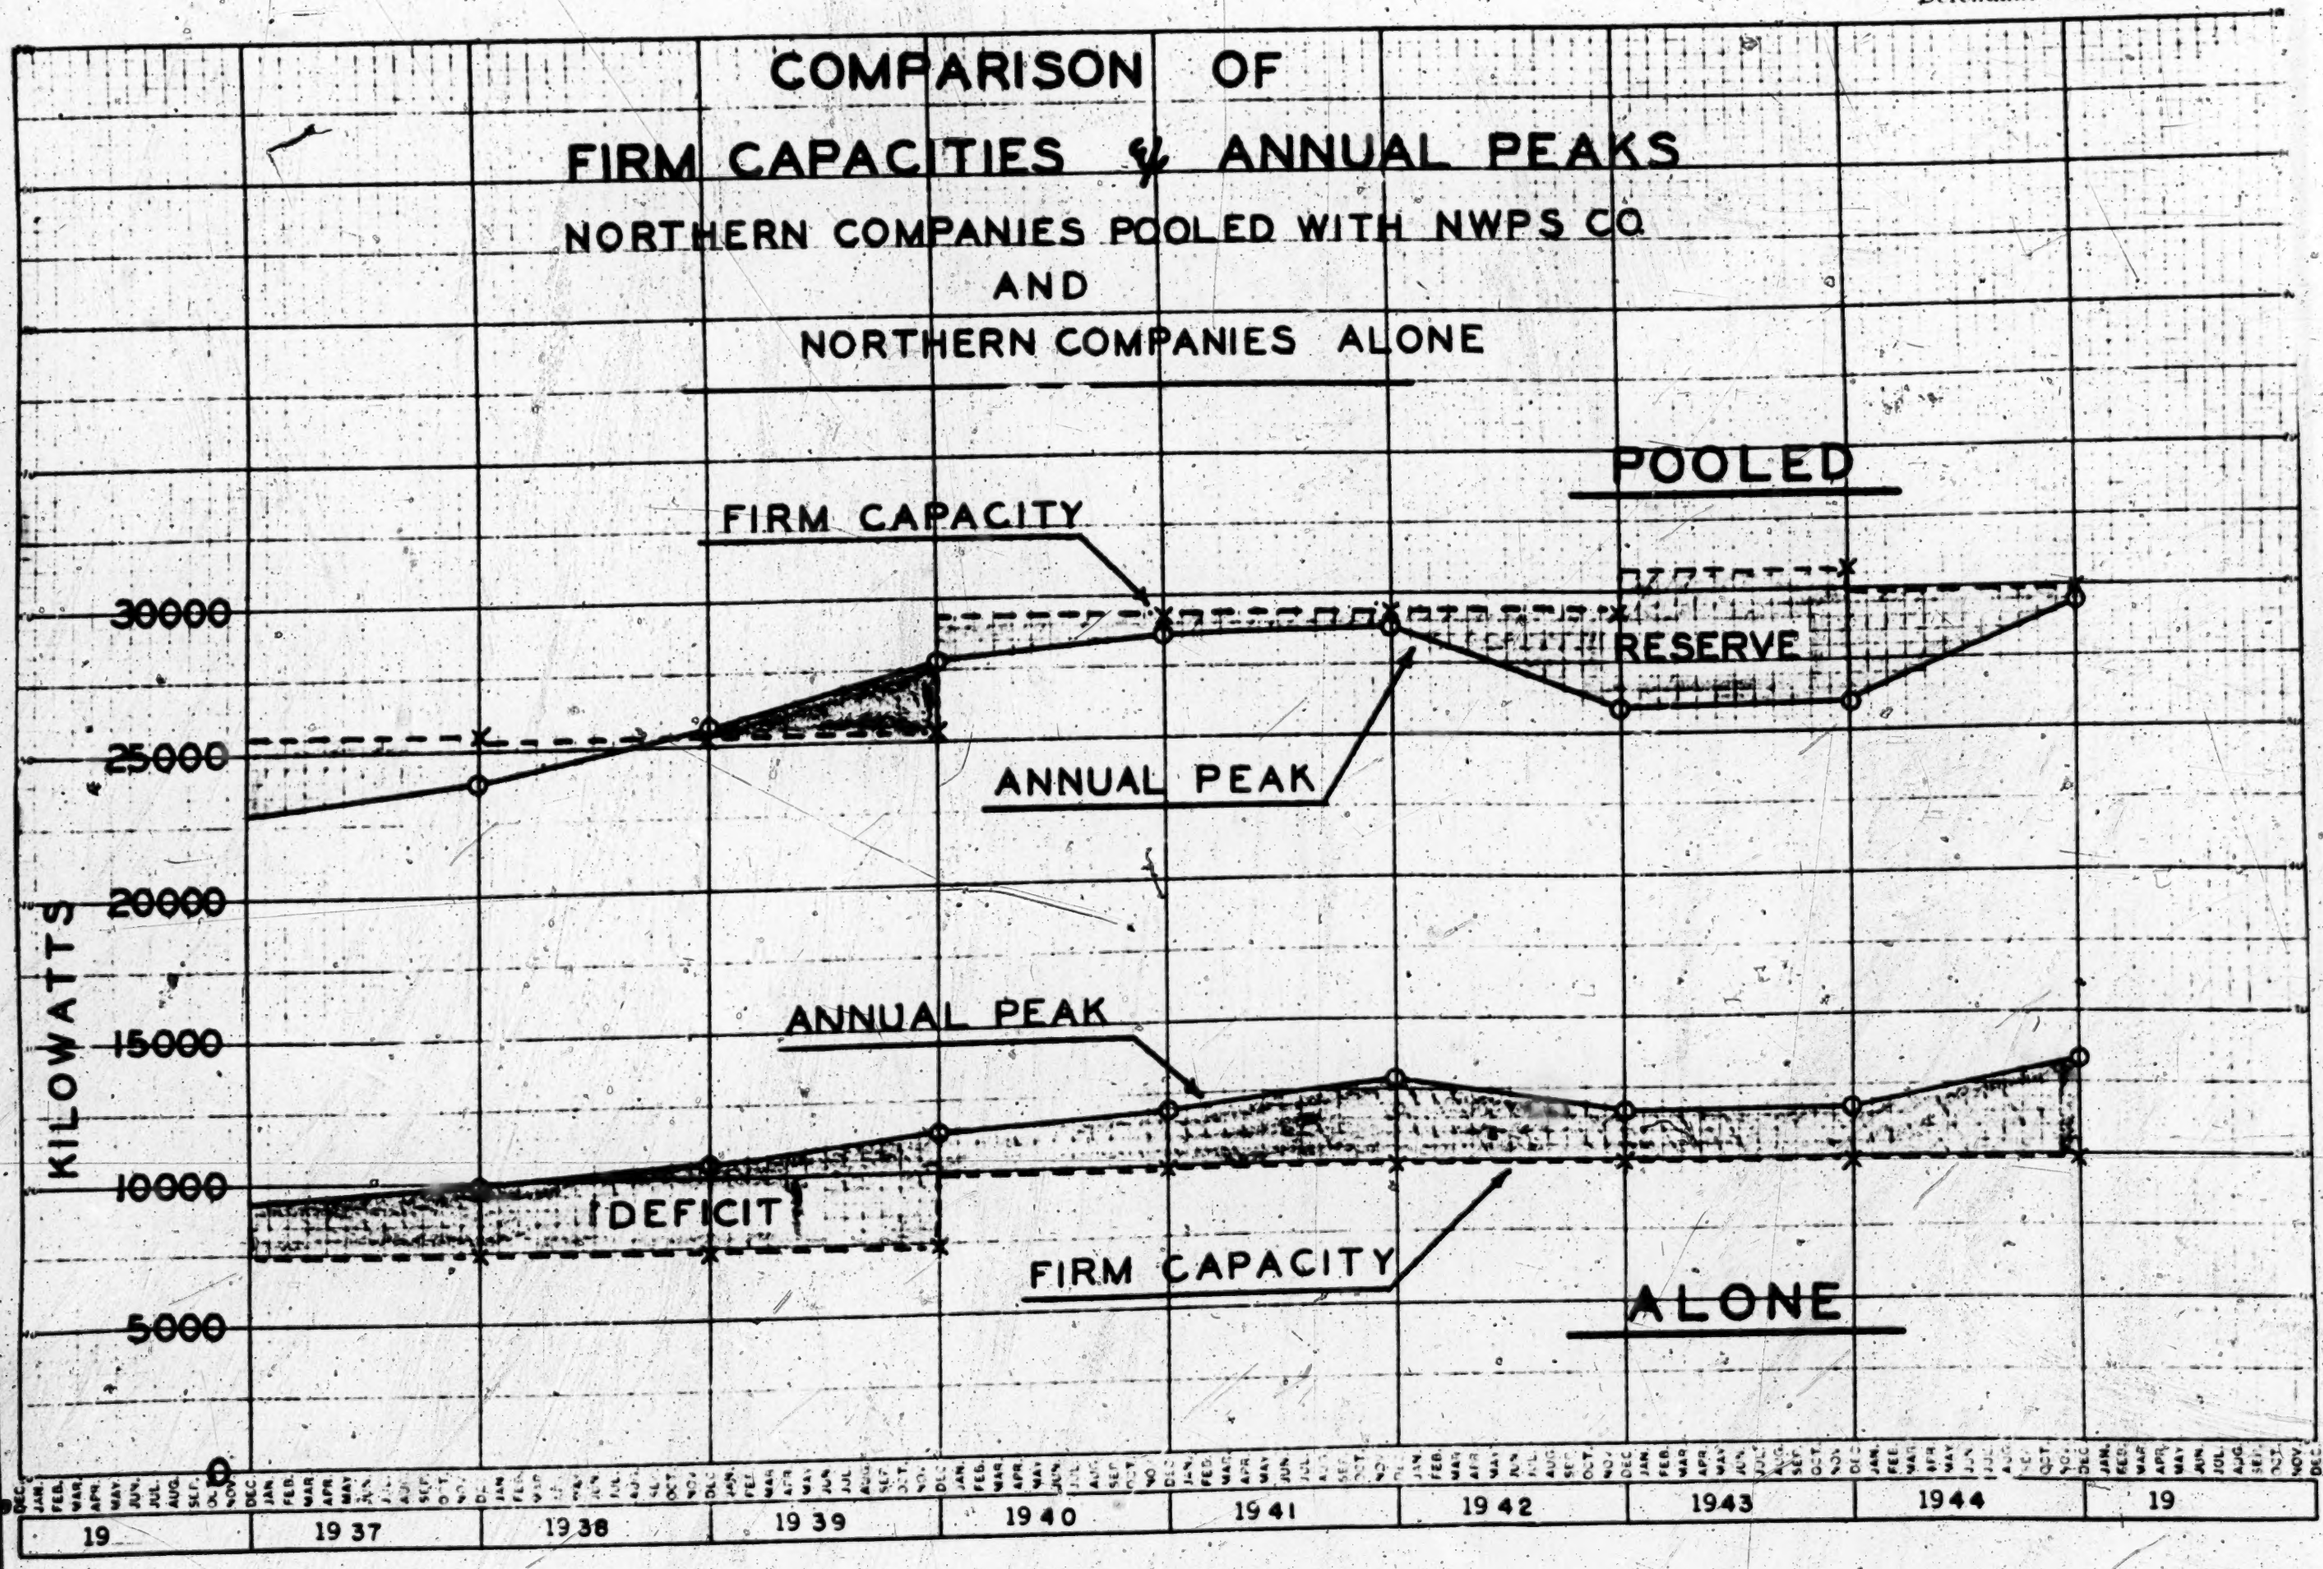
S. J. SICKEL



3/1/48.

Defendant's Exhibit 332-A was received in evidence. It is as follows:

Defendant's Exhibit 332-A.

COMPARISON OF FIRM CAPACITIES & ANNUAL PEAKS

NORTHERN COMPANIES POOLED WITH NWPS CO AND NORTHERN COMPANIES ALONE

Q. I show you exhibits marked 332 and 332-A and ask you if you prepared those? A. Yes.

Q. What generally is shown on Exhibit 332?

A. 332 is a tabulation of peak capacities for Dakota Public Service Co. and its predecessors on its own basis. In other words, its own peak load for its own customers. Alongside of it, its own firm capacity for the same years, and reserves or deficits between peak loads and firm capacity for each year. Below that is shown the combined figures which represents the same total of Dakota interconnected with Northwestern as a combined system.

Q. And they are tabulated in the same way as you have mentioned for the Dakota companies? A. Yes, same basis.

Q. I notice these run from 1937 to 1944, both inclusive?

A. That is correct.

Q. Will the 1937 to 1939 total include both Northern Power and Light and North Dakota Power & Light?

A. Yes.

Q. You have combined them, have you? A. Yes.

Q. From what sources have you taken this information which is here tabulated?

A. These sources were taken from Exhibit B's supplement to interchange agreement. Subsequently I found they are not as yet in evidence so they have been rechecked against operating records which are in evidence.

Q. And are these tabulations and computations true and correct? A. To the best of my knowledge, yes.

Q. I take it the graph, Exhibit 332-A, simply demonstrates the so-called capacities of the combined system and of the Dakota system alone?

A. That is correct. It is simply a visual presentation of the same figures on the tabulation.

Q. You say these both are true and correct?

A. Yes, they are.

Q. Going back to 332. In each the combined and also in the Dakota Public Service Co. compilation, you have the peaks. Those are the peaks that appear in the contract of 1941 and its supplement of 1943? A. Yes.

Q. Originating in 1938?

A. They are also shown on these annual load curves.

Q. Your next columns in both the combined and in the Dakota compilations, those columns are indicated as firm

capacity. Will you indicate what you mean, as an electrical engineer, by firm capacity?

A. Firm capacity is, I believe, a generally recognized term in the utility industry. On systems of this size it is taken as the total effective capacity minus the largest single one unit on the system.

Q. That is, applying that to the year 1944, on the Dakota system, I observe under firm capacity for that year you have 9955? A. That is correct.

Q. What do you mean by that figure?

A. The total installed capacity of Dakota Public Service Co. was 13,955 kilowatts in capacity that year. Deducting the largest unit—perhaps I ought to explain in the first place, this firm capacity has to do with reliable operation of the system. It is customary to arrive at firm capacity by deducting loss of the largest single one unit of the system and comparing the firm capacity thereby arrived at with the peak loads. In this case was the 4,000 kilowatt unit at Bismarck. Deducting 4,000 from 13,955, gives us 9955, firm capacity on that system.

Q. You use a peak for that year on the Dakota system of 13,230? A. Yes.

Q. After deducting your largest unit of 4,000 k. w., you have under the column headed "Reserve" a red figure of 3275. What is meant by that?

A. That means they were short 3275 kilowatts of having what we call a firm system. In other words, their firm capacity was short 3275 k. w. of being enough to carry their own peak.

Q. Then in the year 1944, if they had ideal situation, they had sufficient capacity to carry their peak? A. Yes.

Q. Does that apply to the combined system?

A. With this restriction referring to the combined system. By adding the two systems together the largest single unit on the combined system became 5000 kilowatt unit, which was 5000 at Aberdeen and Mitchell. The deduction then is 5000 and not 4000.

Q. Then for the year 1944, they actually had capacity of 34,985? A. Yes.

Q. And to make out the firm capacity you deducted 5000 from 34,895, leaving 29,895? A. Yes.

Q. Which, as opposed to the peak that year, left them a reserve, did it? A. Yes. Not much, but a reserve.

Q. Would you call the combined system in this compilation or computation a firm system?

A. A firm system. That is correct.

Q. When they are combined? A. As a combined system.

Q. I observe when you get down to the years 1939 and 1938 you run into the red there. A. That is true.

Q. Will you explain to us what created that, or what changed it?

A. In adding capacity, generating capacity on the systems you add it in blocks. In other words you will notice that working up the line of combined systems was showing increase in loads, a thousand or two thousand kilowatts each year, that much higher than the preceding year. It is not practical or economical to add capacity in a small piece or pieces each year to take care of that year's load growth. Actually you let yourself run a little bit in the red and then you put in a block of 5000 or 10,000 capacity, which brings you way above firm for a little while. Then your load gradually eats that up until you run into the red, then you put in another block of capacity. At the time of which you speak you will notice the combined system are a little short, beginning early in 1938. In 1939 they were widely short of being firm, and at that time the Bismarck turbine was on order and in the process of being installed. At least, the preliminaries were under way. That brought it up into the firm category again the following year, in 1940. In 1941 the firm reserve had dropped again to 400 kilowatts, and it was contemplated at that time a 7500 kilowatt turbine at Aberdeen would be in operation in 1942. Of course, the war intervened and the turbine could not be installed. It never was installed until 1945 because of the war. But at the same time there was a substantial drop in loads due to the introduction of daylight saving time in 1942, which had the effect of giving the combined system additional generation. So consequently the combined system goes up to a very favorable firm position again even though the third turbine at Aberdeen was not installed at that time.

Q. Let's go back to 1942. I observe the peak over the combined system for 1942 was 25,920, and that the combined system peak for 1941 was 28,840. You say that was a factor in adjusting your reserve capacity?

A. Yes. The reduction in peak caused by daylight saving time. It reduced the peak demand on the system, which had the effect of producing larger reserve.

Q. There is some 3000 kilowatt hours that your peak went off in the year 1942? A. Yes, nearly 3000.

Q. You say that was due to the change in daylight savings time?

A. Yes. I can explain that in this way. The annual peak in the winter time comes between five and six p. m., at which time the commercial loads, stores and offices and industrial loads pile on top of the light load, because in December at that time of year it is dark by six o'clock. The combination of one load on top of the other produces the annual peak. Now, when daylight saving time was introduced, it set the closing hour ahead in stores and offices and factories and what-not, closed up and went home before it got dark. So there wasn't the combination of one peak on top of the other to produce that peak from five to six.

Q. That is the explanation of the situation, is it?

A. Yes.

Q. Now, referring to Exhibit 332-A, is that just a reflection of the data that appears on Exhibit 332? A. Yes.

Q. Will you explain that somewhat?

A. Well, starting with the topmost curve, the one which is a broken line, running horizontally and jumps vertically and runs horizontally again, that dotted line represents the firm capacity of the combined or pooled system, of Northwestern Public Service Co. plus the Dakota companies.

Q. By that point, do I understand, running from January 1, 1937 to January 1, 1940, that firm was 25,000?

A. As a matter of fact there was a slight reduction at the end of 1937. I guess it don't show there. Yes, that is correct.

Q. Then I notice it jumped to about 29,000?

A. Yes, in 1940 it became about 29,000.

Q. And carried over to January 1, 1943, that 29,000?

A. That is right.

Q. And then jumped again there? A. Yes.

Q. To about 31,000? A. That is correct.

Q. And it remained there for a year and dropped to 30,000?

A. Yes. I can explain why those jumps happened.

Q. If you will?

A. The first increase is shown in this curve at the end of 1939, actually took place during 1940, but it was after the 1939 peak. The first reference to the generator at Bismarck. Approximately 900 kilowatts. Total of Dakota and Northwestern that year. Then there was no change until 1942, at which time additional boilers were secured at Aberdeen, at least one additional boiler, which enabled Northwestern to put more capacity into service than they had previously been able to do. In other words, there was more generating capacity at Aberdeen than there was steam to run it. At that time we were able to get a boiler from War Production Board and install it, which gave us an increase in capacity there in 1942.

Q. What caused it to drop at the end of 1943?

A. At that time, according to my recollection, there was a unit in Aberdeen which was derated, or cut down and moved outside to make room for the new 7500 unit being installed. That is my memory of it.

Q. Starting over to the left of that top graph there, which covers the combined or pooled system. I observe from the left that you have a line which is marked "Annual Peak" that runs in a straight line from cipher to cipher at the end of each year, does it?

A. Yes. That, of course, you can take intermediate places between one circle and another and see the peak in March, or April or May was so much. It only refers to the annual peak.

Q. You are just merely connecting annual peaks?

A. Yes.

Q. The annual peak then is indicated by the cipher?

A. Yes.

Q. Now, the green markings which are between your firm capacity and your annual peak line. What does that indicate?

A. Where it is green indicates the firm capacity was greater than the annual peak, meaning there was a firm reserve.

Q. Then, next to that, do you call the next one orange?

A. I think it is orange.

Q. What does that indicate?

A. That indicates where the peak was higher or larger than the firm capacity. Then we show it in orange, indicating deficit.

Q. And that was indicated on your Exhibit 332?

A. That is correct.

Q. From there on, it would be from 1940 through to January 1, 1945, there was a continuous reserve, was there? A. Yes, there was. Firm reserve.

Q. And that last year indicates from 400 to—

A. It got up to 4000, nearly 5000, in 1943.

Q. In 1943 to 1945. And it was at 1943 where this daylight saving time come in, and is an element in fixing and determining that added firm capacity?

A. That accounts for it, yes. May I introduce something else?

Q. Yes.

A. At the same time daylight saving time went in there were other factors. We had loss of population, a number of [shall business] went out of business. It was all war factors, but it was not exclusively daylight savings time.

Q. Dropping down a curve. At least one of the Dakota companies appears to be in orange?

A. They had a deficit each year. They were never firm.

Q. As a unit and by themselves, they never had firm capacity during those years?

A. No. They were deficient. The closest they were to firm was at the beginning of 1937, when they were short 1470 kilowatts. Their maximum deficiency was in 1939, or almost 4000 kilowatts. With the addition of the [Buelah] turbine in 1940 the situation improved slightly but they were still 1975 kilowatts in the red, and they became progressively worse until in 1944 they were 3275.

Q. It is a fact, is it not, that the Dakota systems' demand increased more rapidly than defendant's demand?

A. I think it increased more rapidly the most of this period, yes.

Q. Do you have anything else you desire to discuss on that? A. I don't believe so.

Q. Have you demonstrated what a power pool is by these Exhibits 332, and 332-A?

A. I think probably they show the advantage of a power pool without explaining what a power pool is.

Q. Will you tell us what it is?

A. A power pool is a method of operation whereby by interconnecting two or more systems, in effect, you make the same and given amount of reserve capacity serve the purposes of both systems. Assume you had two utility plants, and each one had one engine with a thousand kilowatt load. Each plant in order to carry their service to their customers would have to have a separate engine to take care of times when their engine was being overhauled. By combining two plants with a transmission line, you can make one spare engine serve as a spare for both of them. That is a saving of 50%, but it illustrates the principle. The same thing can be extended by connecting two systems together. When the Dakota stood by themselves, or had they stood by themselves, they would have been required on a service basis to have spare equal to the largest single unit on their system, which would be 4000 kilowatts in later days. Northwestern would have been required to have its 5000. But by combining Dakota with Northwestern, the same 5000 which Northwestern was providing for reserve could also become reserve for Dakota, and it was not necessary for them to provide any reserve on their own property.

Q. Is there a method or practice in computing the cost or a charge to be made in such power pools?

A. There is quite—I imagine there is a great many ramifications. The same principles are quite commonly used, although there might be many different details.

Q. What is it, generally speaking?

A. The general principle, I believe, is that the total loads are combined, the total effective capacities are combined, the difference between the total loads and total capacities represents the pool reserve. Then this pool reserve is allocated to various subscribers. They that are providing some of this pool reserve, they are compensated for what they are putting into the pool. If their own capacity is less than their own loads, they in turn compensate the more adequate companies and pay for their deficiencies. In other words, the company that receives capacity from the pool pays for it. The company

that contributes capacity to the pool are compensated for it.

Q. Do you have any compilation or do we have any record here in evidence showing how that worked out under the contract arrangement between the defendant and the Dakota company? A. You mean the mechanics?

Q. Not the mechanics, but the extent to which payments of each was made.

A. In one of plaintiff's exhibits there was a tabulation about reserve capacity charges.

Q. Do you have some exhibit there now?

A. I have a copy of 82-9 (R. p. 595, supra).

Q. Will that demonstrate what you are talking about?

A. It demonstrates the charges which were made for reserve capacity, if I understand your question.

Q. Where one company or the other had a deficiency in reserve a charge was made against one or more companies?

A. Yes. The company that was deficient compensated the company that had an excess.

Q. Does that Exhibit 82-9 show the amount of the deficiency?

A. No, it does not. It just simply shows payment.

Q. I want to talk to you about the Bowdle to Ipswich and Bowdle to Wishek lines. To what extent have you a personal and intimate knowledge of this transmission line, both as they originally were and as they were replaced down through the years?

A. The Bowdle Wishek line was rebuilt, reconstructed, prior to the time I was in the Huron office, and I know something about the operating experience with the old line, but I had never seen it personally. The Bowdle to Ipswich line and the Bowdle substation were built during my time at Huron and I am quite familiar with them.

Q. Are there any records here in evidence showing the condition of these lines in the early 30's, and the recommendation made by engineers concerning the replacement of those lines?

A. There is quite an explanation of the work order covering the Bowdle Ipswich line, and the reasons for its replacement. I don't recall whether there is corresponding explanation of the Bowdle Wishek line or not.

Q. There is some engineering study here in evidence. Do you have in mind what that is? About 1928?

A. There is the Lucas & Luick report (R. p. 607, supra).

Q. Are you familiar with that? A. Reasonably.

Q. Did they make recommendations concerning these transmission lines?

A. It makes recommendations as to raising the voltage on them, and construction of certain tie lines.

Q. I call your attention to Page 29, 30 and 31, of Exhibit 82-14, the Lucas & Luick report, as of 1928, concerning the transmission system of the Dakota companies. I will ask you if your are familiar with that in some degree? A. Yes.

Q. Will you explain the purpose of a transmission system over an electric company system?

A. The purpose of the transmission system is to get power from where it is produced to where it is needed. It is not economical to put utility generating stations in every little town and every place where there is a load. The economical system is to spot generating plants at various suitable locations, not too many locations, keep the number of spots relatively small, and then distribute this power, transmit this power to the various points where it is to be used by means of transmission lines.

Q. Is that regular and approved construction in the operation of a system? A. Yes.

Q. Now, to what extent are such transmission lines necessary for the preservation or protection of the service of the system?

A. The transmission line first of all has to be of high enough voltage, heavy enough conductor, with relation to its length and amount of load it is going to carry, to deliver power to a consumer without excessive fluctuations in voltage and irregularity in stability, to the point where the customer has adequate dependable service. Transmission lines have to be provided not only adequate to carry such loads under normal conditions but to a certain amount of abnormal conditions or operating difficulties, storms, troubles of one sort or another, and a certain amount of that has to be provided for so reasonably good service can still be maintained.

Q. That is, you can't construct transmission lines then

upon what you call ideal, normal basis of operation. You have to prepare for trouble?

A. You have to make certain provision for line outages and equipment outages, which happen with a degree of regularity.

Q. As applied to these 22,000 volts transmission lines, which I believe Mr. Elvig and Mr. Helmick said had been replaced by Dakota system, do you know whether or not that 22,000 volts transmission system would be sufficient under ideal operating conditions? A. Yes, I know.

Q. Would it, or wouldn't it? A. No.

Q. If it would not be sufficient under ideal operating conditions it certainly would not be sufficient in troublesome times, would it? A. No.

Q. Now, why wouldn't the 22,000 volts transmission system, originally contained in the Dakota system, why were they not sufficient?

A. Under the very best conditions, perhaps I misinterpreted your previous question, under perfect conditions, and with no line out of service, no trouble anywhere on the system, with the Mobridge and Bismarck plants operating and with the interconnection at Aberdeen, to stabilize the end of the system, under those conditions, loads could have been carried on 22 KV system. However, it necessitated both lines, from Beulah and Bismarck to Wishek and Bowdle, and the second line from Beulah to Glen Ullin, Mobridge to Bowdle, it necessited both of those lines in continuous service to carry loads. There is approximately three hundred miles of line in each leg, and any mischance that affected any point in that 600 miles of total line could put the system out of business because the only remaining line would not be adequate to carry the load, at 22KV.

Q. Do you know whether or not it was necessary for the preservation of the service of the Dakota companies that this voltage be increased in the transmission system?

A. Yes, I know.

Mr. Fellows:

Q. On what do you base your knowledge? Where do you get your opinion you are testifying about?

A. I can't define knowledge and opinion in this case. I know what conditions prevailed up there.

The Court: He wants to know how do you know?

A. I know from my experience, my travels along that property, my supervision of the property, prior to the time of the cut-over to 40,000 volts.

Q. When was that? A. It was cut over in 1940 or 1941.

By Mr. Royhl:

Q. Do you know whether or not it was necessary for the preservation of the service of the Dakota companies that this voltage be increased in the transmission system?

A. Satisfactory voltage levels and voltage stability could not be maintained with 22,000 volt system. Conversion to 38,000 volts made a material improvement in service to Dakota Public Service Co. customers to a point that service became satisfactory.

Q. Now, to what extent, if at all, was energy purchased by the defendant company, the surplus energy from the Dakota companies, a factor in instituting the enlargement or reinforcement of this transmission system of the Dakota system, if at all?

A. It was a negligible factor, if at all.

Q. Was it at all a determining factor with respect to that transmission replacement? A. No.

Q. After you became active in the Dakota company system, were the lines on the entire east side stabilized to 40,000 volts?

A. They were all converted to 40,000 except their section from Wishek to Ellendale, after I came to the Huron office.

Q. In your opinion is there any justification to charging any part of the fixed charges for the replacement of this particular transmission lines to the defendant company?

A. No justification.

Q. Do I understand after you became employed by the defendant, and later in the joint management, and the inter-company arrangement, that the dispatcher's office was always at Aberdeen?

A. Yes. Since 1933 it has always been at Aberdeen.

Q. Do you know whether or not it is necessary that any electrical system have a dispatcher?

A. Any system of any extent, yes.

Q. What is the province or duty of this dispatcher, or these dispatchers? A. As done on our system?

Q. Yes.

A. The dispatcher keeps watch of the loads on the system. Apportions those loads among the plants. He likewise keeps watch over what equipment is in service and what equipment is out of service, and makes use of that knowledge and those conditions in allocating the load from the various plants. The dispatcher keeps track and systemizes the operation and the transmission of the production system.

Q. Was that done at Aberdeen for this interconnected system up until October 19, 1945? A. Yes.

Q. You had occasion to observe that, I take it, the last several years, prior to the discontinuance? A. Yes.

Q. This dispatcher then must be kept informed concerning any boilers that are down or any generating unit that is out of service?

A. The dispatcher is the man to whom is entrusted the maintenance of service on the system. Service inasmuch as it is affected to available generating plants, and as it may be affected on available transmission lines. As operated on our system, any outage of any transmission line, for example, is immediately reported to the dispatcher. He supervises the isolation and getting it straightened out. Similarly the routine of taking generating equipment out of service for repairs. The dispatcher schedules what equipment was to be taken off at certain times and when it shall go back on, to the end that an adequate reserve, as much reserve as possible is continually provided on the system. The dispatcher is the watch dog of the service.

Q. How extensive a force did you have in the Aberdeen office during this period of the interconnected company?

A. Two men.

Q. Was that a 24 hour operation?

A. Each man worked an eight hour shift, and one or the other was then available for call in the remaining eight hours.

Q. Do you know whether or not any charge was made by the defendant company for office space for these dispatchers?

A. The dispatchers, to the best of my knowledge, were carried like myself, as a part of the joint management employees and I assume that a part of their salaries and expense was allocated back to the operating companies.

Q. That is, they were paid by all of the interconnected companies? A. They were on the same basis.

Q. Do you know whether or not the Dakota companies provided the interconnected companies in operating this dispatcher's office in Aberdeen, do you know whether the Dakota companies had separate dispatchers?

A. Yes, I know.

Q. Did they? A. No.

Q. To what extent did you personally have any opportunity of conferring with Samuel W. White?

A. I met Mr. White on his periodic trips, inspection trips over the property. I travelled with him when he made these trips.

Q. On those occasions did you discuss the transmission lines and the substations and the new work installation?

A. Yes, in detail.

Q. Was he informed and advised concerning them?

A. Yes.

Q. How often would Mr. White make these trips with you or other staff employees?

A. Mr. White made, as I recall, an annual trip. These may have been supplemented in some cases by special trips for some special purpose. But I recall the annual trips particularly.

Q. Did you have occasion to discuss some of the transmission and operating problems of the Dakota system with a Mr. Lakin? A. Yes.

Q. Were you ever a director or an officer of either of the interconnected corporations? A. No.

Q. During your entire service? A. No.

Q. Were you familiar with the policy and practice of the joint operating force in the care of the interconnected companies? A. I believe so.

Q. As to loyalties, etc.? A. I believe so.

Q. What was that policy?

A. As far as my personal observation goes I never seen any but the most scrupulous care in fairness between the two companies as to charges or rates or various points of contact.

Q. Do you know, Mr. Sickel, what the policy and practice of the combined systems, and the joint management of the combined systems was concerning the operation of generating units? A. Yes, I know.

Q. What was that?

A. The general policy of this system, this interconnected system, was to generate load, first of all, in the cheapest producing plants. As the load daily increased to the point where the cheapest plant was loaded, then the next cheapest plant was brought on the line to bring up the load. As that plant became loaded, then the next more expensive plant, and so on down the line, corrected always or influenced always by other considerations, such as voltage, or power flow, or limitation of transmission or distribution. But the general practice was to load the cheapest plant first, and then bring on the remaining plants in the order of their cost of production.

Q. What was your lowest cost plant?

A. The lowest cost plant was Beulah.

Q. And next in order was what?

A. Next in order would be Bismarck as of the later years of the contract.

Q. Was that reflected upon the so-called logs that were kept and maintained in the dispatcher's office?

A. It would be indicated by the logs of the various plants. It would be better indicated by the daily system load graphs which were prepared by the dispatcher.

Q. Were those daily load graphs taken from the logs?

A. Yes, they are compilation of the data on the various plant logs.

Defendant's Exhibits 333 and 334 were received in evidence. They consist of daily load graphs on the combined systems of Dakota Public Service Company and defendant for the years 1944 and 1945. As a sample of the type of information which is contained in these graphs, the load graph for Saturday, June 30, 1945, which was referred to in the evidence, is reproduced herein:

Aberdeen	88 000	77 300
Mitchell	88 800	80 700
Yankton	18 500	19 530
Huron	6 500	8 000
Armour	500	480
Webster	500	440
Beulah	135 100	122 100
Bismarck	56 700	48 187
Redridge	15 000	12 700
total	410 600	365 437

Page from Defendant's Exhibits 333 and 334. 1719

Q. I show you exhibits marked Defendant's Exhibits 333 and 334, described generally as daily load graphs. Were those such graphs on the combined systems? A. Yes.

Q. They are a part of the so-called Exhibit 55 (R. p. 376, supra)? A. I understand they are.

Q. Will you pick out a representative day and demonstrate the policy and practice of that operation of the combined systems, so far as base loads were concerned?

A. Any day in this period should show it, except you might hit a random day when some major equipment was out of service.

Q. Referring to the graph at the top—

A. The day at which I am looking happens to be Saturday, June 30, 1945.

Q. Is the top curve black? A. The pencil curve, yes.

Q. What does that refer to?

A. That uppermost curve which is entitled "Total equals ½ scale", that is the combined operation of all of the plants on the combined system hour by hour. In other words, at midnight, referring to this scale, where the curve comes out at the left hand side of the scale, on mine it is around 8000. It might be 7 or 8 or 10,000.

Q. Would that be the demands of the system?

A. That times 2. It would be 16,000 in my case. It means at that hour, ending at midnight, that was the integrated generation for the system at that hour.

Q. Then it shows the change of demand of the combined systems, does it, as it proceeds across the page to the right?

A. This indicates the way the system load fluctuates from hour to hour. Actually the midnight reading, you might say, is finishing up the load from the day before. Then it drops down uniformly to the so-called graveyard period between two and perhaps six in the morning. That is the lowest period on the system always. That is the low point of the day. As the load starts to increase in the morning it raises quite steadily to noon. There is generally then quite a slow decline after twelve o'clock noon, carrying on through the afternoon, and another rise later in the evening at dusk. Depending on the time of the year, that might occur at five o'clock, and might not occur until eight o'clock, depending on what season the day

happened to represent. But the graphs are uniform to that extent.

Q. Is the next curve the green curve on the exhibit?

A. It is, yes.

Q. Is that designated Beulah? A. Yes.

Q. What does that show?

A. That shows the integrated load in the Beulah plant hour by hour over the twenty-four hours of the day.

Q. On the exhibit that you are demonstrating there, is that quite a uniform load?

A. On the curve at which I am looking it starts 6000 kilowatts at midnight, 5100 at 1:00 a. m., 5100 at 2:00 a. m., 4900 at 3:00 a. m., 5100 at 4:00 a. m., 5400 at 5:00 a. m., dropping to 4600, and then dropping to 4300, back again to 5300 at 8:00 a. m., dropping to 5,000 at 9 and 10, and then back up to the neighborhood of 6000, and 6200 across the page. In the Beulah plant the lowest reading during the twenty-four hours [are] 4200. The maximum 6000.

Q. What was the generating capacity of that station?

A. 6000.

Q. So that was kept pretty firm all of the way?

A. Not firm. It was kept at a uniform rate at practically full load around the clock.

Q. Was that, as you say, the practice in the operation of the combined system of that plant?

A. Beulah being the low cost producer would be loaded to the maximum.

Q. What is the next curve there?

A. They cross here. In some cases Mitchell may be above Aberdeen, or Aberdeen above Mitchell. You have a red one showing Aberdeen and running roughly parallel is a blue one for Mitchell.

Q. Were they low cost plants?

A. They were steam plants and as such were lower cost producers than the Diesel plants, but they were higher cost than Beulah or Bismarck.

Q. Referring to the graphs or curves which demonstrates the operation or generation at Mitchell, Aberdeen and Bismarck. Were those kept on for 24 hours?

A. Yes.

Q. Did they run as consistently as the Beulah plant?

A. No. Both Mitchell and Aberdeen dropped back to.

light generation or reduced generation during this so-called graveyard period at night. They also take wider fluctuations during the daytime period. I think that will be reflected on that quite generally. Mitchell dropped back to about 40% capacity during this early morning period. Aberdeen dropped back to about 20% of their rated capacity during this early morning period. Comparing that with Beulah which stayed in the neighborhood of 80% capacity during the graveyard period.

Q. At what point would energy be received by the defendant company from the Dakota companies in respect to the periods when those plants were backed down, Mitchell and Aberdeen. Would it be at those times?

A. Yes, almost exclusively.

Q. That would be some time between midnight and six o'clock in the morning?

A. Yes. As the Aberdeen and Mitchell plants were backed down that permitted the power to flow in from the northern system.

Q. What you have said about the Mitchell and Aberdeen plants, is that quite similar to Bismarck?

A. No. Bismarck was operated very nearly like Beulah. Bismarck had smaller installed capacity than Beulah. Bismarck only had 4,000 kilowatts of ordinary running capacity. Beulah had 6,000. For that reason Bismarck would not go as high as Beulah. But if you will notice on most of these curves, at least on the one I am examining here, Bismarck's load low point was 1500 kilowatts. Their maximum for that day was 3600 kilowatts. In other words, Bismarck dropped about 50%, or a little less, of their full load rating.

Q. I notice you have the next curve there, a yellow mark for Yankton? A. Yes.

Q. What capacity was at Yankton?

A. Yankton was a [Deisel] plant. Depending a little on just what day you were looking at, but approximately 2000 [kilowat] capacity.

Q. 4000 to 4500, would you have there?

A. 2000, 2200 kilowatts. In that neighborhood.

Q. I notice on this exhibit they were called in late in the day. When was Yankton called in by the dispatcher on the exhibit you are reading from?

A. They shut down at 2 o'clock in the morning and were

off until 7 o'clock in the morning, at which time they were called back on. That is quite a uniform operating practice with regard to Yankton.

Q. What was the peak generation as of that day you are looking at?

A. Their peak for this particular day was 1800 kilowatts which was at noon.

Q. Will you refer to the Mobridge curve and discuss that?

A. Mobridge had installed capacity of 1000 kilowatts, approximately. Steam turbine. Mobridge ran around the clock, 24 hours a day. Most of their output was consumed in the town of Mobridge. The excess of their installed capacity over the requirements of the town of Mobridge were very slight in comparison with the size of the system loads. They made very little net contribution to the system. As a result of this the Mobridge plant operated day in and day out at about a normal load. They dropped during the graveyard period but picked up again during the daytime shift and dropped off again in the evening. On this particular graph I am examining Mobridge produced 300 kilowatts from 1 to 5 a. m., and then gradually picked up with their local load, and held more or less at that load until 2 p. m. and then gradually dropped back to about 500 kilowatts until a brief evening peak, at which time they went up to 800 again.

Q. At Bismarck and Mobridge, do you operate those plants generally with central steam heating plants?

A. Mobridge and Bismarck, yes.

Q. That was a factor in their operation, was it?

A. Yes, very much so. I might amplify that. I don't recall whether the Mobridge plant kept their steam heating mains hot all summer or not. Bismarck was required to keep their boilers hot and keep the turbines spinning all of the time in order to provide steam. In Mobridge, during the heating season.

Q. In addition to the generating plants you have discussed, I notice, at least I see on these exhibits, the dispatcher has called in at divers times scattered plants like Mott, Ellendale, Webster, Huron, etc. Is that right?

A. Yes.

Q. When were those minor generating plants called in?

A. Those were the highest cost plants on the system. Operating costs were prohibitive on them except for, perhaps, breakdown of every other generation, and upon occasion when equipment was out of service, or lines might be out of service, but only for a brief period each day those small plants were called on as might be required when the load exceeded the capacity of the efficient plants.

Q. And those plants on the combined system would include Webster, Armour, Redfield, Dickinson, and others?

A. There were really two classes of plants there. There are what we have thought of as the better class of Diesel plant, larger units, more efficient. That would include Dickinson, Webster, Armour, Yankton. Those were good Diesel plants, used daily, almost, on peak service to help the system over a brief hour or two at noon or evening, when the peak loads were very severe. Then there was the last line of defense which were the little one cylinder or two cylinder engines at Mott, Gettysburg, Highmore, Clark, Lemmon. There may have been some others, but they were the last plants to go on because they were not plants ordinarily used. Used only for breakdown service.

Q. I take it that those secondary plants were generally called in at your peak periods as shown by the detailed combined scale at the top curve? A. Yes.

Q. They only came on when those peaks were arrived at on the combined scale? A. That is right.

Q. Do you have anything else you desire to say on that?

A. I don't believe so.

Q. You made a statement about the ordinary trend. Have you demonstrated in these curves the ordinary trend in the operation of the combined system?

A. The ordinary trend—

Q. The ordinary or uniform trend, if everything was working normally?

A. Yes. I think if you examine any 20 or 30 consecutive days, eliminate any odd day when something might be out of service, I believe it is quite evident the policy that was followed on this.

Q. There are exceptions when something would be out of service. Would that be if they were repairing a boiler or cleaning a boiler in one of the big plants?

A. All of this equipment requires periodic taking out of

service for maintenance and repairs. Boilers, turbines, Diesels. Part of the load dispatcher's job was to schedule the outages of those pieces of equipment so necessary routine maintenance could be done without disrupting the system. When I speak of being out, you might take boilers. Some plants have spare boiler capacity, some do not. In some cases when a boiler came out of service, that meant a net reduction in the capacity of that plant. In other words, they might not start their second turbine, or they might run their one turbine on reduced load. That might last for three or four days or a week, but it was scheduled so only a safe amount of equipment was taken out for maintenance at any one time.

Q. That would be the explanation of the uniform curves which you have described? A. Yes.

Q. Or one of the explanations? A. Yes.

Q. You have described the power pool arrangement as a form or process for the combined loads of the two systems. Is that correct? A. That is correct.

Q. I think that your Exhibits 332-A and 332 (R. pp. 1703 and 1702, supra), show by graphs or charts the firm capacity of the Dakota system alone, and also the firm capacity of the combined system as pooled. Do you know what the effect was on the defendant's system from this power pooling arrangements?

A. You mean on similar basis to them?

Q. Yes.

A. The Northwestern Public Service Company, in that period, had, as I recall—I believe that period covers seven years?

Q. It covers from 1937 to 1944, inclusive. Eight years.

A. Out of that eight year period there was three years when Northwestern Public Service Company were firm on their own account, with no pool. The remaining five years, Northwestern would have had a deficit without the pool.

Q. Deficit as far as firm capacity is concerned? A. Yes.

Q. Do you mean by that, that the defendant received no benefits from this power pool?

A. Certainly not. Both companies were benefited by the pooling of their reserves to the point that the combined reserves were then available to either party when needed.

Q. If and when needed? A. Yes.

Q. Do you know whether or not in the years shown, 1937 to 1944, both inclusive, there ever was any demand made by the Dakota company systems to the defendant under this power pool, that was not complied with? I am speaking of demand for energy.

A. To the best of my knowledge there was never a requirement of power to be supplied by Northwestern which was not supplied in full, and in many cases the amount supplied was greatly in excess of the [——] for which Northwestern was being compensated in reserve capacity charges.

Q. Then I take it, from your testimony, that the firming up of benefits was a function of this power pool to both the Dakota companies and to the defendant? A. Certainly.

Q. And was that the basis upon which the interconnection facilities were furnished and paid for by the two parties, and as far as rentals was concerned, and carrying charge?

A. Without the interconnection facilities there could have been no pooling.

Q. Do you know how much of the interconnection facility cost was being carried by the defendant during all of this period? A. Yes.

Q. Do I understand that at the time of the rebuilding or replacing of the transmission lines of the Dakota companies, I am referring now to Bowdle-Wishek and Bowdle-Ipswich transmission lines, that one of them was rebuilt or replaced about 1936? A. I believe that is correct.

Q. Were the wires strung at that time, or just poles set?

A. It was completely replaced.

Q. Which was replaced last?

A. The Bowdle-Ipswich line.

Q. Do you have personal knowledge of the Bowdle Ipswich line that was replaced? A. Yes.

Q. What was its condition before it was replaced?

A. The Bowdle Ipswich line was in a poor state of repair, by personal examination.

Q. You knew that from your own examination? A. Yes.

Q. I show you Defendant's Exhibit 82-20 (R. p. 651, supra), and note particularly the signatures attached thereto, and I will ask you if you recognize those signatures? A. Yes, I do.

Q. Are they the signatures of the person presumed to have signed that exhibit? A. I believe they are. They are.

Q. That is your opinion? A. Yes.

Cross-Examination.

By Mr. Morrison:

Q. Mr. Sickel, how long have you lived at Huron, about?

A. Since August, 1940.

Q. That would be eight years?

A. Eight years in August, yes.

Q. To be brief, prior to that time, you were employed at Mitchell and other points on the line of this defendant?

A. Yes.

Q. Have you always had, since 1940, your office in Huron? A. Yes.

Q. Is that the place where is located the defendant in this case? A. Yes.

Q. And in that office is the president and vice president and treasurer and yourself and all of the rest of the help?

A. No.

Q. Some of the help? A. Yes.

Q. Most of them, and the office help? A. Yes.

Q. You have never had an office on the northern property have you? A. No.

Q. If I understand you correctly, during the approximate eight years, we will say that, over at Huron, your job was looking after the interests and property of the Northern companies as well as the defendant in this case. Is that right? A. Supervisory nature, yes.

Q. And you had that supervisory authority both over the Northern properties and the properties in the south?

A. Insofar as it [obtained] to my department.

Q. If any question came up in which was involved the interests of both the Northern company and the one where you had the office and lived and the officers were, you represented both of them, did you, in the exercise of your judgment? A. Subject to the people who were over me.

Q. What? A. Subject to the people I was responsible to.

Q. Then the ones right on top, that you were responsible to, they were doing the same thing, weren't they, if you know? A. I don't know.

Q. You knew when you were in daily contact with the president and treasurer and vice president and secretary, weren't you? A. Yes.

Q. You mean to say here in answer to my question you don't know how they were carrying on in both of these companies, as far as it pertained to the work that you did? You knew that, didn't you?

A. I don't know what you mean by carrying on.

Q. In the dispatch of their business?

A. I knew roughly what their duties were.

Q. And saw them exercise it? A. In some cases.

Q. As far as pertains to your matters? A. Yes.

Q. And during all of that time, as pertains to items in which you were involved, you know that they were representing or claiming to represent both the northern companies and the defendant in this case. Is that right?

A. I believe that is right.

Q. As I understand, you claim to have a personal and intimate knowledge of the properties of the northern companies? A. A good working knowledge, yes.

Q. You have been over that property?

A. A number of times.

Q. You have kept track of the items of construction and the costs thereof? A. Yes, that is my job.

Q. Traveled over the entire property?

A. I believe I have seen it all.

Q. Now, so I may get just a general, over-all picture here, if I can, I am going to ask you, Beulah is located in the northwest corner of this property?

A. Northwest, that is right.

Q. About how far north and west of Bismarck is Beulah?

A. Approximately eighty miles, by road.

Q. And this Beulah of which we speak, is a small, little place, at which there is a coal mine near?

A. Coal mine and a town.

Q. The town is very small?

A. I don't know what your definition of small is. The town is 600 to 800 people.

Q. Is there a line running south from Beulah that hits Mandan?

A. There is two lines from Beulah. One goes southeasterly through Mandan.

Q. And the other where?

A. The other goes almost due south to Glen Ullin.

Q. And Glen Ullin is west of Bismarck, between Bismarck and Dickinson? A. Yes.

Q. Now, there are a number of small towns, or towns, rather, that are serviced in that locality. Is that right?

A. In which locality?

Q. In the locality of Beulah? A. Yes.

Q. Now, in the Dickinson area is Richardson, Taylor, Gladstone, Lehigh and Belfield?

A. They are in the Dickinson area, yes.

Q. And that is, then, about how many miles approximately to Beulah?

Q. Do you understand the question?

A. No, I don't. You say, "And that." I don't know what you are referring to.

Q. The territory served by these towns.

A. I will tell you where the nearest one is from Beulah, and the fartherest one, if you like.

Q. Tell me.

A. The fartherest one would be Belfield, which is beyond Dickinson.

Q. And the closest one?

A. I believe the closest one would, perhaps, be Taylor. It might be sixty or seventy miles.

Q. Now, in the area in which is located Bismarck, are there a number of small towns served there?

A. Yes, quite a number.

Q. Are those towns, Burke, Braddock, Center, Dawson, Steele, Driscoll, Sterling, McKenzie and others?

A. They are not all in the Bismarck area. They are handled out of the Bismarck division, however.

Q. They are right up there in that territory, aren't they, within fifty miles or so? A. No.

Q. Any of them more than that?

A. The fartherest town would be, I believe, Mott, which is almost due south of Dickinson. That puts it approximately 100 miles west of Bismarck. The fartherest town east would be, I don't know, Dawson, Driscoll, one of those towns. That would be 75 miles, perhaps, or more, east.

Q. Am I correct in this, that where, from the highline,

you have a small town hooked on, you have a transformer, or some way of reducing voltage to serve that town?

A. Yes, generally speaking.

Q. That is true in each town that you serve?

A. Except as two or three towns may be served from one transformer.

Q. And in that operation, at each place where there is a transformer to make a breakdown to serve one town, or a number there connected, there is a certain loss in that operation? A. Yes.

Q. And that is true of all towns that are served from the high line, is it?

A. That is true wherever there is a transformer.

Q. You know that as a practical matter of engineering?

A. Certainly.

Q. Now, you are familiar with the current produced at Beulah, you say?

A. I am not familiar with the current. You will have to explain that question.

Q. You know what current means, don't you? Is that juice?

A. Do you mean am I familiar with the amount they produced?

Q. Can you answer that question or not? A. No.

Q. You have a 6000 meter, or what do you call it, at Beulah? A. We have two generators that total 6,000.

Q. Are they 6000 each? A. No, they total 6000.

Q. And the total at Bismarck is 4000?

A. No. 4000 is the major unit. I believe there is a smaller one of 1000.

Q. 5000 at Bismarck? A. That is right.

Q. And then 1000 at Mobridge, approximately?

A. That is right.

Q. Would it be your opinion that approximately 70% of the power generated at Beulah would be used feeding towns in the areas that you have named here?

A. I would not venture an opinion on that.

Q. Can you give me any idea at all? A. No.

Q. You could not?

A. I could make a calculation but I would not venture an opinion on it.

Q. Anyway, the power that goes to this defendant from Beulah or these other towns is delivered at Aberdeen?

A. That is correct. And Gettysburg.

Q. Gettysburg, of course, is south of Aberdeen, and west?

A. Yes.

Q. And the power that goes to Gettysburg, is that taken off at Bowdle, and shot straight down to Gettysburg, or does it come from Aberdeen? I want to get how you would move it when you get into South Dakota. Do you take it from Aberdeen or Bowdle to get it over to Gettysburg?

A. The line runs from Bowdle to Gettysburg.

Q. Now, all of the properties of the defendant in this case are in South Dakota? A. No.

Q. What have you got in North Dakota? A. Nothing.

Q. Then your answer was yes?

A. No. We have property in Nebraska.

Q. I mean as far as involved in this law suit?

A. Your question was all of the properties.

Q. All of the properties of this—or there is no property of this defendant located in North Dakota?

A. Not to my knowledge, no.

Q. And the property of the northern companies, that is in North Dakota and comes down into a portion of South Dakota? A. Yes.

Q. You are up to Lemmon, come down east along the Milwaukee and then you drift down to Gettysburg, and down in that territory in South Dakota?

A. That is approximately correct.

Q. Is this true, that of the juice, energy, that is generated at Beulah, that reaches Aberdeen, travels approximately 300 miles?

A. That would be approximately correct.

Q. Is it true with this 38 volt high line?

A. Those are 38,000 volt high lines.

Q. At least, this is true. The power taken from the north company by this defendant is delivered at Aberdeen. There is no question about that? A. That is correct.

Q. Now, you had a means and manner here by which you said you calculated the loss, the line loss. Is that right?

A. That is correct.

Q. Now, in talking about those line losses, I am getting

down to Aberdeen, the point of delivery, which there seems to be no dispute about. You understand that? A. Yes.

Q. Now, in moving current on a line of this size, 38,000 volts, I think you said the loss is far greater, the last fifty miles, is it not, than it would be the fifty miles near to the place that you generate it? A. No, that is not correct.

Q. Then, the farther you move electric energy, as I understand you to say, the less the loss would be?

A. No, that is not what I said.

Q. Is it true that where you attempt to move energy 300 miles on a line of 38,000 voltage, that you would probably lose it all? A. No, that is not true.

Q. Can that be done?

A. Can you select a set of conditions when you would lose it all?

Q. You know this line, don't you? A. Very well.

Q. You have been over it? A. Many times.

Q. Can you transport energy 300 miles over this voltage line, and when you got down to Aberdeen would you have any voltage to deliver? Do you understand that?

A. I certainly do.

Q. Much or little?

A. In this case it amounted to 38 million kilowatt hours a year.

Q. You know Strike, do you? A. Yes.

Q. He has some evidence in this case. I am going to call your attention to it and then ask your opinion. Page 61. He was asked the question whether or not you could transport this amount of energy, and he gave the distance—

"A. Technically the transmission of energy, 38,000 volts, 285 miles, is almost a practical impossibility, due to the resistance you have in that distance of miles."

Q. Do you understand that answer?

A. I understand what he is saying.

Q. Do you concur in that or not? A. No.

Q. I am going back again to the items you say you considered in getting at the line loss. Do you have a meter at each small town or towns that are served, when the line is tapped and energy taken in there?

A. No. Some of them are not located at the point of take-off.

Q. Tell me about how many of them are not metered before the point of take-off?

A. That varies from year to year as meters are inoperative at certain times, as they become damaged. One meter may be out for a month. It might be out for three months. It is not the same ones. There are some that have no meters.

Q. There are some that have no meters at all? A. Yes.

Q. How many are there of those?

A. I can name them, I think.

Q. About how many? A. I would guess three.

Q. How then, do you measure the juice [of] the energy that is taken off at those points?

A. We still have a record of what the customers use at those points from the customers' billing. In those cases, which are negligible in number, in those cases we take the customers' billings and add to them 10% for distribution loss, and take that as the amount taken from the transmission.

Q. Then in that one calculation we do have an estimate of 10% where you have no figures. Is that right?

A. In those three towns, yes.

Q. And to that extent, at least, you would not have an accurate measurement, as you claim, by meters, would you?

A. It would be off about a thousandth of one per cent.

Q. I am asking you if you have an accurate measurement? A. Not perfectly accurate, no.

Q. In what other places are there where you don't have the meters? I think you mentioned some where they would be out or were not in use?

A. I can't quote from memory. I would have to look at the efficiency reports.

Q. Are there some? A. Yes.

Q. Estimate about the number.

A. At any given time there might be perhaps a dozen.

Q. And then in those instances would you operate the same—Would you get at your figures the same as you did in these other three? A. Yes.

Q. And in this instance again some one would have to estimate? A. Estimate the distribution losses.

Q. There would be no accurate way to determine that?

A. The consumption was metered.

Q. I am asking you about the entire amount. Of course, we know the consumption is metered. That leaves a percentage if you haven't measured in some way?

A. The entire amount consists of 90% which is metered and 10% which is estimated in those towns.

Q. That is your estimate? A. My best estimate.

Q. On the Pollock line are there meters? Pollock, Hague, Strasburg, Mound City?

A. I don't recall. I would have to look at that to refresh my mind. There is a meter as I recall it, installed at the point where the Hague-Pollock line takes off of transmission. There are no meters on the individual towns of Hague, Strasburg, etc.

Q. So for those you would have to estimate, the same process that you used for the other ones you have described? A. That is correct.

Q. And any account of that would be an estimate?

A. Yes, that is correct.

Q. Now, is it true that there are no meters, Leola to Wetonka, and the territory there that is served?

A. There is a meter at Wetonka and Leola. That is which Dakota Public Service buys power from Northwestern.

Q. How about Hoven and Tolstoy and the farming territory there?

A. I don't recall whether there are meters there or not.

Q. May be or may not be?

A. I could not state from memory.

Q. How about Napoleon, Braddock, Hazleton?

A. Metering at Napoleon.

Q. And these other towns?

A. No. The outage back and forth is metered at Napoleon.

Q. How do you get at then the amount of energy used in the towns in this last group where there aren't [meteres]? Do you use the same process you used before?

A. You take the total metering at Napoleon which includes all of those towns.

Q. Anyway, to sum this all up, there are estimates, quite

a number of them, in your figures of the amount of power losses. Is that right? A. There are estimates in it, yes.

Q. Now, then, I want to show you Exhibit 331 (R. p. 1695, supra). I want you to look at that. You didn't mean to tell the Court, in that exhibit you had figured accurately, from a meter, all of the information that is contained in it, did you?. Say yes, or no.

A. The results are accurate.

Q. I ask you to point out in that exhibit any statement that you have made showing that you rely in part on an estimate any place. Read it to me.

A. No, there is nothing in this statement as to estimates.

Q. Now, I want to ask you another thing. This exhibit you prepared when?

A. I prepared it, I believe, in February, and I made one correction since the trial has begun.

Q. February of what year? A. This year.

Q. There was no record in the form that you have got it condensed here at any time in the books of this defendant, was there? A. You mean in that form?

Q. In this form that you have got it here? A. No.

Q. And what you did, in the preparation of this exhibit, as an employee of the company, you figured out for use here in court, this Exhibit 331? A. That is correct.

Q. And it is based, in part at least, upon estimates, and not upon any reading of meters? A. In part, yes.

Q. "To bring the matter of transmission issues out of the field of speculation a study has been prepared to establish what actually did happen on the DPL system during the past five years. Earlier figures could have been set up equally as well but records prior to 1941 are no longer complete or available." You wrote that, didn't you?

A. Yes, I did.

Q. Now, in your experience as an engineer, is there a basis on which can be reasonably [figures] out the line loss on any particular line that is known and described?

A. Yes.

Q. There is a basis? A. Yes.

Q. And engineer, and in engineering, is that quite standard? A. Yes.

Q. Is one of the fundamentals considered in that calcu-

lation the distance the energy is moved? I am just taking that one element. Is distance one of the items? A. Yes.

Q. And where it grows into hundreds of miles, one, two, three hundred miles, is it a very important item? A. Yes.

Q. Now, in this case, if the energy that this defendant received travelled about the lines a hundred miles before it got to Aberdeen, would there be a bigger loss, in your opinion, in that hundred miles, than the first hundred or two hundred miles travelled? A. No.

Q. In other words, it would not make any difference, according to this setup there, how far, in your opinion, it travelled?

A. Certainly it would make a difference. Make a major difference.

Q. Would the loss the last portion of the trip farther away from the site of production be greater than close to it?

A. The loss in the last hundred miles would be less than in the first hundred miles.

Q. It would be just the opposite to what I am trying to say?

A. You tell me what you are trying to say. You have asked me twice if the loss in the last hundred miles was larger than in the loss in the first hundred miles. The answer is no, it is not. The major loss comes in the first hundred miles.

Q. Is the loss larger in transmission of 300 miles than 100 miles? A. Yes.

Q. I show you Exhibit 330 (R. p. 1689, supra). I notice on this exhibit, on this wagon wheel, what do you call it? A. A pie.

Q. That you have Beulah, 78.8%? A. That is correct.

Q. Does that mean that that per centage of power generated at Beulah is delivered to the defendant company at Aberdeen? A. No.

Q. What does it mean?

A. That means that of the power that appeared on the transmission system, the total transmission system pool, of Dakota Public Service Company, of all of those kilowatts on that system, 78.8% came from Beulah.

Q. And the line was replenished at Bismarck and other spots, where you had smaller generating units?

A. I don't understand replenished.

Q. Putting more juice in it?

A. There was a lesser amount put in at Bismarck and a lesser amount at Mobridge.

Q. I understand you to say when work was done, Bowdle to Ipswich, Bowdle to Wishek, Bowdle to Selby, substation at Bowdle, you had something to do with the actual work? A. Not with all of them.

Q. Did you have with some of them? A. Yes.

Q. Which ones?

A. Bowdle to Ipswich line and the Bowdle substation.

Q. Is that the work order in which they are combined and you said they were all done at one time? A. No.

Q. What is that item you said was all done at one time and it was not separated?

A. There was one work order, 404, I believe, on which Aberdeen-Ipswich, Aberdeen-Barnard and Aberdeen sub were built.

Q. Is this 404? A. It appears to be.

Q. And that includes what?

A. This includes Aberdeen substation, the Barnard substation, Aberdeen to Ipswich line, and the Aberdeen to Barnard line.

Q. Did you prepare that work order?

A. No, this is made in 1930.

Q. So you had nothing to do with that at all? A. No.

Q. Did you have anything to do with the construction at that time? A. No.

Q. Did I understand you to say you looked that property over afterwards, and you made out this plat, what was there, and to make allocation of the different items in expense in it?

A. Yes. I am very familiar with the property.

Q. Now, in order to break this down and find out what those different items cost, what did you have to do?

A. I have to select which material went into each station, and whether it went into lines or station.

Q. Did you have any record of details of the amount of material that went separately into each station?

A. Not separately, no.

Q. What else did you have to do?

A. I had to allocate labor. Substation labor, I believe, is set out separately. I had to allocate substation labor between Barnard sub and Aberdeen sub.

Q. How long was that after the labor had been performed? A. 17, 18 years.

Q. And the record was so kept, as I understand, that you had to go there on the job and kind of figure out for yourself what went in here and what went in there. Is that right? A. To some extent, yes. Yes, that is right.

Q. What other items did you have to do the same thing on, on these four jobs?

A. The incidentals are allocated among the various jobs, on per centage basis of material.

Q. First you have to make up a slate yourself and figure out what they want for labor, material, and all of that, in each one? A. That is not exactly correct.

Q. Did you have any written record showing what it was in detail? A. Yes, we had written records in detail.

Q. Did it show particularly what went into each station, or was it all bunched?

A. I can't answer that question as you have asked it with a yes or no answer.

Q. Anyway, looking at this work order, the items are not specified definitely and in detail as to each station. Is that right? A. That is correct.

Q. And you had to go, seventeen years afterwards, and figure out what was put in there from your observation and study there. Is that right? A. Yes.

Q. You testified yesterday and gave some figures of the expenditures that were made on the Bowdle Wishek line, and I think you said in 1936 there was $127,690.00. Have you that memo? A. I didn't make that statement.

Q. Did you give the expenditure made on the Bowdle to Wishek line? A. No.

Q. You were here in court the last week, weren't you?

A. Part of the week.

Q. You heard all of the testimony of Elvig? A. Yes.

Q. And Dan Helmick? A. Yes.

Q. You sat back of Mr. Royhl? A. That is right.

Q. You examined every exhibit that went in evidence?

A. Yes.

Q. Looked it over? A. Yes.

Q. In this exhibit submitted did you find a statement that purported to come from the books of this company, showing expenditure, Bowdle to Ipswich, in 1936, of $127,690.00?

A. I can't swear to the exact amount. I heard the testimony.

Q. I call your attention to Exhibit 82-22 (R. p. 661, supra), that was introduced here last week. You saw and examined that, didn't you? A. I believe I did.

Q. And it shows up there in the corner the expenditures of 111 thousand dollars? Is that the total? A. 111,873.01.

Q. Did you make any check, or have any check of this, made? A. No.

Q. Now, without finding those other exhibits, I am going to call your attention to this, assuming that there was spent in 1936, on the Bowdle Wishek line, the amount of $127,690.00, Bowdle to Ipswich in 1941, $50,850.00, Bowdle to Selby in 1940, $19,000.00, Bowdle substation $46,525.00.

A. I think those are approximately correct.

Q. And you know from your knowledge of the property and the examination of the records, that those expenditures were made substantially at that time, in substantially those amounts, as shown by the records?

A. They sound alright to me.

Q. The total of that expenditure, totalled up, as I add it, is $227,000.00? A. That is about right.

Q. Now, the work that was done in 1941 and 1940, was that under your supervision? A. Partially.

Q. What else did you have to do besides furnish supervision of those three jobs?

A. I had a good many other duties.

Q. You are familiar, I think you said yesterday, in figuring fixed charges that include depreciation, interest, taxes, etc.? A. In a general way, yes.

Q. And there is a standard you use for that, isn't there? General standard?

A. There is some generally accepted figures, yes.

Q. And the base of one of those, do you have to estimate the life of the property? A. Yes.

Q. What is the ordinary life of property of this character as you estimate it?

MATTHEW BENDER & COMPANY

52

MICRO

TRADE

536

CARD

MARK ®

A. The pole line property, are you referring to?

Q. The property involved here.

A. That might vary widely.

Q. Give me the maximum and the other end.

A. The poorly built line might need replacement in twenty years or less. A well built line, as we try to build them, should be good for thirty years.

Q. Do you know how long the line was in operation, Bowdle to Wishek line, at the time of this new improvement? A. The old line, you are referring to?

Q. Yes? A. No, I don't know.

Q. Do you know how long the line from Bowdle to Ipswich had been in operation? A. No.

Q. Do you know how long the line from Bowdle to Selby, had been in operation? A. No.

Q. Or the line from Bowdle to the substation?

A. No, I don't know.

Q. Did you look over the property yourself, before the improvements were made?

A. Yes. I don't mean to say I passed on the improvement, but I saw the property before it was taken down at the time the improvements were made.

Q. Now, at that time, when you looked it over, this portion of the line had been serving its customers, hadn't it? A. Yes.

Q. And it had been doing that for a period of from ten to fifteen years, at least, hadn't it?

A. I don't know what the period was.

Q. It was some considerable period? A. Yes.

Q. And the voltage of the line was 22,000?

A. That is correct.

Q. And then it became necessary to put in a line, a high line of 38,000 volts. Is that right?

A. Yes, it was necessary.

Q. And the voltage was raised from 22,000 to 38,000. Is that right? A. That is correct.

Q. Have you the figures of the amount of energy taken by the defendant company from the northern companies in the year 1938? A. I don't have them with me.

Q. Can you give them, please? In 1938 they were 6,251,670. Is that right?

A. You are referring to what, total [delivers] to Northwestern?

Q. Yes, in the year 1938? A. Net or gross?

Q. Gross?

A. No, I can't tell from these figures. If you have an exhibit I would like to look at it. I believe your figure is correct.

Q. That is what was delivered by the northern company in 1938. Is that right?

A. That is what I understand this exhibit (Plaintiff's Exhibit 82-10, R. p. 597, supra) shows.

Q. In 1939, that exhibit shows, 6,688,515?

A. That is correct.

Q. In 1940, 7,044,662? A. That is correct.

Q. Those totalled together, make 21 million, substantially do they not? A. Yes.

Q. Now, in 1941, the volume delivered was 11,314,400?

A. Correct.

Q. And in 1942, 12,102,000? A. Correct.

Q. And in 1943, 11,621,000? A. Correct.

Q. And those totalled together amount to 35 million kilowatts? A. Approximately.

Q. Immediately after this line was built, and the voltage raised, and which you said was of no benefit to this defendant at all, they took and received from the northern company in the three years after that line was first put into operation 35 million kilowatts. Is that right?

A. Is it right that they received 25 million kilowatts?

Q. Yes? A. That is correct.

Q. During those three years? A. That is correct.

Q. Does that same exhibit show the amount the northern company received from the defendant in 1938?

A. Yes.

Q. And that is 2,142,540?

A. According to this, that is correct.

Q. In 1939, 2,433,920? A. Yes.

Q. And in 1940, 1,983,340? A. That is correct.

Q. Those three total, 6,500,000? A. I believe so.

Q. Turn to the three years on that exhibit immediately after this line was rebuilt, and in 1941 the northern company received from the defendant, 1,380,684?

A. That is right.

Q. And in 1942, 1,006,460? A. Correct.

Q. And in 1943, 1,319,940? A. That is correct.

Q. And that totals 3,700,000 kilowatts. Is that right?

A. That is about right.

Q. Now, this company in the south wanted and needed power during that time, didn't they? A. No.

Q. Did they take it from the northern company during that period? A. Yes.

Q. Did they take from 1941 to 1943, inclusive, 35 million kilowatts? A. That is about correct.

Q. Did they have use for it down below? A. Yes.

Q. Did you sell it? A. Certainly.

Q. Did they have any tie-in to get it from outside, to get it outside of this northern company?

A. No. They could have generated it themselves.

Q. Did they have something to generate it with?

A. Certainly.

Q. In other words, the amount sent south was the difference between 21 million and 35 million that the defendant got in those three years. Is that right?

Mr. Royhl: What three years are you referring to?

Mr. Morrison: 1938, '39, '40, the first three.

A. No.

Q. Was there an increase from 1938, '39 and '40, for 1941, '42 and '43, an increase of what they got, of the difference between 21 million and 35 million?

A. Yes, that is correct.

Q. And likewise, in the property, in the current flowing north, was there a decrease from 1938, '39 and '40, this 6,500,000, to 3,700,000? A. That is correct.

Q. Anyway you did give an opinion here yesterday?

A. As to what?

Q. As to the benefit, if any, that the defendant received from what was done by the northern companies in improvement, rebuilding, construction, etc., of these lines?

A. That is correct. I gave an opinion.

Q. And you said, in substance, your opinion was that as far as the defendant was concerned, their gain, if any,

was just negligible, you used that word, in this whole transaction. Is that right?

A. By comparison is what I said.

Q. Do you still have that picture before you? A. Yes.

Redirect Examination, by Mr. Royhl.

Q. Counsel has shown you a tabulation, Exhibit 82-10 (R. p. 597, supra), and which indicates that after and including 1940, or after 1940, the Dakota company received less energy from the defendant than it did in prior years. Is that correct? A. That is correct.

Q. Had there been any change in the generating capacity and facilities of the Dakota company on and during 1940?

A. Yes. In 1940 a 4000 kilowatt turbine was [installted] at Bismarck.

Q. How big a factor was that?

A. Bismarck was a major contributor to the system.

Q. Was that addition at Bismarck a contributing factor in the generating capacity of the Dakota company?

A. Yes, it was.

Q. Also was the replacing of the transmission lines a factor in the distribution of the Dakota companies' energy?

A. Are you referring now to sales to Dakota or purchase from Dakota?

Q. In their own system. Was that a conserving of their own energy, the replacing of their transmission lines. Was the replacing of the transmission lines a factor in the capacity of the Dakota company? A. Yes, it was a factor.

Q. In what way?

A. It was a factor in getting power reliably from the plants to the customer.

Q. Now, you have stated that the defendant company could generate its own energy. Is that right?

A. That is true.

Q. That is, that the purchase of energy from the Dakota company was not a necessity at any time during the years counsel inquired about?

A. Generally speaking, it was not.

Q. That is, they could generate their own. Is that right?

A. Certainly.

Q. And they had the facilities to do it? A. Certainly.

Q. Counsel [ask] you concerning place of delivery of energy to the defendant, and I think you said at one place, Aberdeen. Was such energy delivered both at Aberdeen and Gettysburg? A. Yes.

Q. Do you know whether or not the Dakota company could deliver energy to the defendant under and through the 22,000 volt transmission line? A. Yes.

Q. And under what circumstances and conditions?

A. They could deliver off peak energy to the defendant on the 22,000 volt transmission system.

Q. Why do you say off peak?

A. Because the 22,000 volt system, when it was 22,000 volt system, was completely loaded for service to Dakota's own customers over peak periods of the day. Off peak there was transmission capacity still available for delivery of dump power to Northwestern.

Q. And when was the bulk of the energy purchased by the defendant company from the Dakota company?

A. Off peak.

Q. Do you desire to explain, Mr. Sickel, concerning the line losses from the transmission line, concerning which you were inquired about on cross-examination?

Q. You were inquired concerning the loss of energy in distribution where the energy was taken off the transmission line and used on the Dakota companies' own system, weren't you? A. Yes.

Q. I think you estimated that at approximately 10%?

A. Yes.

Q. Will you explain that?

A. In some cases it was necessary to estimate distribution losses. The estimates made involved a very small amount of the total kilowatt hours involved, to the extent that the quantities being estimated represented a negligible amount of the total kilowatt hours tabulated.

Q. Suppose you had made no allowance for that distribution loss on those take-offs and those customers, how much would that have affected the transmission loss figure

1755

Defendant's Exhibit 335-A.

Filed March 3, 1948
R. Cox & Wilson
Clerk

DAKOTA PUBLIC SERVICE COMPANY AND PREDECESSORS
SUMMARY OF GROSS K.W.H. DELIVERED TO N.W.P.S. CO., PRODUCTION COSTS, AND PROFIT - POWER POOL OPERATIONS

Power Plant (1)	Gross K.W.H. Delivered to N.W.P.S.Co. Based on Percent Input to Transmission System and Average Fuel Cost: Percent (2)	K.W.H. (3)	Fuel Costs Average: Mills per K.W.H. (4)	Total Amount (5)	K.W.H. DELIVERED TO N.W.P.S.CO. - LOSS, COSTS, ETC.: Gross K.W.H. Delivered to N.W.P.S. CO. (6)	Percent Loss by Transm. (7)	Incremental Costs per K.W.H. in Mills: Fuel (8)	Misc. (9)	Total (10)	Production Cost Corrected for Transmission Loss: Mills per K.W.H. (11)	Total Amount (12)	Revenue to DPS Co. from KWH Delivered to N.W.P.S.CO. of 23.1%, which you have testified to here, in that transmission?

A. Had there been no estimate made, in other words, had the distribution losses been estimated at zero, it would have raised the apparent transmission losses by 4/10th of 1% in the year 1944.

Recross-Examination, by Mr. Morrison.

Q. You used yesterday, Mr. Sickel, the figure of 22% line loss? A. Did I?

Q. Didn't you?

A. I think I used the five year figure of 23.1%. That is my recollection.

Q. And in your calculation in arriving at that figure, it was based upon the entire energy in the North Dakota properties? A. In the transmission system?

Q. In the transmission system. A. That is correct.

Q. Now, the line loss in Bismarck, or one of the close stations, that would be small, or comparatively small, wouldn't it? A. Compared to what?

Q. In figures. Would it be one or two per cent in that locality?

A. Probably not quite that small, but it would be smaller than 23.1.

Q. About what would it be? A. 5% perhaps.

Q. Are there other towns, Dickinson, Mobridge, where the same thing would prevail?

A. You mean that would have 5% losses?

Q. Substantially, approximately 5%?

A. Well, the loss would vary in getting power from point to point. The losses would vary with the distance.

Q. Probably go as low as 5% and up higher than that?

A. Depending on a great many other factors, yes.

Q. Then when you finally take all line loss of power delivered to this defendant at Aberdeen, you include those figures with the long transportation of approximately 300 miles, don't you? A. Yes.

Q. So, really, after all, your 23%, whether it be an estimate or more than that, takes the whole picture into account? A. Certainly.

Q. You understand the question we have in this case, if we have one, is the line loss on the power delivered at Aberdeen? A. Yes.

Q. Now, in redirect this morning you said if the energy was not furnished you by the North Dakota company, you could have made it yourself?

A. That is a general statement, yes.

Q. Why didn't you make it?

A. Because it was possible to purchase dump power at five mills, which would be cheaper than it could be produced at Aberdeen.

Q. In other words, I am going to use the word purchased. By the expenditure of approximately two hundred thousand dollars, where you put a new high voltage line, 22,000 to 38,000, and repaired the lines from Ipswich to Bowdle, there was three items in there we enumerated this morning? A. I understand it.

Q. You were able then to purchase, that is, the defendant was able to purchase from the northern company, energy cheaper than they could make it? A. Certainly.

Q. Then when you told the Court it was your opinion it didn't help the company in the south any, you better take that back? A. Certainly not.

Q. There is one other question. In Mr. Royhl's redirect examination, Mr. Sickel, if I heard you correctly this morning, you spoke of the line, the transmission line, before the voltage was raised from 22,000 to 38,000?

A. Yes.

Q. If I understood you correctly you made the statement that off peak, not as I understood it, at the peak, the company in the north could furnish power to the defendant. Is that right? A. Off peak?

Q. Yes, off peak. A. Yes.

Q. So when this two hundred thousand dollars was spent, and this line was improved up there, and the energy was raised to 38,000, on peak then you could furnish power to the defendant? Is that right? yes or no.

A. Not as a practical matter, no.

Q. Didn't you say this morning you could?

A. No, I don't think so.

Q. Couldn't, even when you raised it to 38,000, furnish power to them?

A. There is limitations involved besides the transmission line. Dakota hadn't capacity enough to furnish power to Northwestern after taking care of their own loads on peak.

Q. You said yesterday afternoon, didn't you, that 22,000 volt line, with every part of it working, they could take care of their own business and customers? You made that statement yesterday, didn't you? A. Yes.

Q. Now, with the additional voltage, from 22,000 to 38,000 there must have been some surplus or something above that, wasn't there? A. No.

Q. You didn't present any facts here, as I understand, of anything at any time on these lines that went wrong, did you, in detail? When they had the 22,000 voltage?

A. Will you explain that question, please? You say anything that went wrong on these lines. Are you referring to interruptions on the lines?

Q. I mean interruptions of any kind.

A. No, there wasn't any.

Q. And the company, in that period, made annual reports to North Dakota State Commission, didn't they?

A. I don't know.

Q. You made some of them? A. No.

Q. You haven't filed any? A. I haven't, no.

Q. Have you seen any? A. No.

Q. You know nothing about those reports at all? A. No.

O. C. STOKKE

was called as a witness by the defendant, and having heretofore been sworn, testified as follows:

Direct Examination: by Mr. Royhl.

Q. Will you state your name to the record?

A. O. C. Stokke.

Q. You testified here early in this trial, didn't you?

A. Yes.

Q. I believe you stated that for a number of years you have been an employee of the defendant company and also the interconnected companies? A. Yes.

Q. And when did you say you first started in this employment? A. As superintendent of production?

Q. Yes. A. 1935.

Q. Have you continuously been in that department since 1935? A. Yes.

Q. What is your title now?

A. Superintendent of Production.

Q. What does that mean, briefly?

A. General supervision over power plant operations.

Q. That has to do with the generation of energy?

A. Generation of electric energy.

Q. Now, I assume that after you have generated the energy and got it to the switchboard somewhere, that is where your duty ceases?

A. My responsibility stops at the switchboard.

Q. Since 1935, as such [superintedent], have you had charge or supervision directly over all of the generating units or plants or stations of the interconnected companies? A. Yes, I have.

Q. Which included until 1939 the North Dakota Power & Light Co., the Northern Power & Light Co., on the one hand, and the defendant company on the other hand. Is that right? A. That is right.

Q. And are you intimately familiar with each of those stations and units?

A. Yes, very much acquainted with the structures and equipment of the plants.

Q. I believe you also testified that you were and had been a director of the defendant company? A. Yes, I did.

Q. You are not now? A. Not now.

Q. Were you ever a director of the North Dakota Power & Light Co., or Northern Power & Light Co., or Dakota Public Service Co.? A. No, I never was.

Q. Were you ever an officer, other than director, as you have stated, of either or any of these companies?

A. No, not an officer of either company.

Q. Were you ever a director or officer of the Knife River Coal Mining Co.? A. No sir.

Q. Were you familiar with that company?

A. I was acquainted with the general operations of the mine.

Q. And particularly in connection with the Beulah power station? A. With the mine operations of the mine.

Q. I take it you were also familiar with the situation there at Beulah? A. Oh, yes.

Q. It was a part of the North Dakota company? A. Yes.

Q. How long were you a member of the joint management staff of these interconnected companies?

A. That began back in 1930.

Q. And continued until October 19, 1945? A. Yes.

Q. Were you continuously connected with the companies during that period? A. Yes.

Q. I take it, in your department, and down through the years, there have been work orders which originated in your department? A. Yes.

Q. Now, referring to such work orders in your department that [originaged] in the Dakota companies, meaning the Northern Power & Light Co., the North Dakota Power & Light Co., and Dakota Public Service Co., do you know what the policy and practice was as to the approval of such work orders before construction?

A. Yes, with respect to the power plants.

Q. I mean within your department?

A. Yes, that is right.

Q. What was that policy and practice?

A. The work orders would be made in the field and I had a part in making out the work orders. The work orders which I was interested in or involved in, practically everyone of those work orders, I had part in the preparation of them, and the first action on the work orders was to have them approved by the chief engineer of the plant, and the division manager in the district in which the work orders originated. Then the work order was passed on to the joint office in most cases. They might come in the mail to the mailing department and passed on to the work order department. Then it would come back to me for review and check. After the work order was in form, as I found it should be, and met with my approval, I would sign the

work order. Then the work order was passed on to the accounting department for recheck and entry in the work order department. From there the work order would pass on to Mr. Buckmier, Secretary, for his check and approval. From Mr. Buckmier the work order would be passed on to the treasurer of the company for his information and check. After his approval it would be passed onto the president of the company, Mr. Sanborn, during recent years. The procedure from there on, the work order was sent back to the work order department for a record of these various checks and approvals. The work order department then would pass the work order on to the Chicago office in most cases.

Q. Chicago office of what company?

A. To the Middle West in case it was Northwestern Public Service Co. and to the U. P. U. company's office if it was a work order of Northern Power & Light Co., North Dakota Power & Light Co., or the Dakota Public Service System. After it got to Chicago I am not sure what the procedure was, but when the work order came back approved it had the approval of the top officers of those two companies, and in some cases initialled by the engineering department in Chicago. After it was approved by the Chicago office, either U. P. U. or Middle West, it would be mailed back to the Huron joint office.

Q. Would any work actually be started on the work order except and unless it was so approved?

A. No sir, not until the work order was returned approved.

Q. Were you, down through the years, in some contact with United Public Utilities, or Mr. White, its president?

A. Yes.

Q. Were some of those contacts in Chicago and some here in the field on the companies' property?

A. Yes. Some in Chicago and some in the field.

Q. At those times was the business of your department discussed with representatives of the Chicago corporation?

A. Yes. My conversations in Chicago were generally with the head of the engineering department, representing the two companies, or with Mr. White.

Q. You say you also met Mr. White and representatives of U. P. U. out here in South Dakota and North Dakota?

A. Yes.

Q. How often would that be?

A. The visits out here were generally held in the late spring or early summer. Sometime in May or June. When representatives of the Chicago office, specifically, Mr. Kruesi, Mr. White, Major Buell, quite often some other department heads from either one of the two holding companies would make a trip out here for a week's visit over the property, and the staff from the joint office would meet that group, usually at Mobridge, by car. They would come out to Mobridge as their first stop-off point, where we would join the group and start our inspection trip over the Northern Power & Light Co., North Dakota Power & Light Co., or Dakota Public Service Co. That would be the beginning of the trip.

Q. So far as your portion was concerned, did you handle that portion that had to do with the power plants?

A. Yes.

Q. And on those occasions did you ever talk with Mr. White or the other representatives concerning sales of energy inter-company?

A. Discussions came up on that quite materially on every trip, especially between myself and Mr. White.

Q. And those talks would be on the occasions of those trips? A. Yes.

Q. And during the time of the trips? A. That is right.

Q. Would those talks be largely between you and Mr. White as to those specific matters?

A. Well, invariably we would be together, walking or sitting and talking together and there may be one or two others joining in the discussions.

Q. Can you fix the time, perhaps, of the first conversation that you recall with Mr. White?

A. Those inspection trips, my first recollection of those joint trips was back in 1936, I believe.

Q. And you say perhaps in the spring or early summer of that year?

A. Usually in May or June. Somewhere in there.

Q. Can you recall where on the property such talks likely occurred.

A. The discussions with regard to the transfer of energy usually took place between myself and Mr. White, while we were visiting at the [Buelah] plant, and particularly at the Bismarck plant.

Q. Now, as to your first conversation with Mr. White, what was said by you and he concerning this exchange of energy?

A. Mr. White, year after year, during those visits, seemed to make it a point to stress in his thinking that the Beulah plant was not being loaded as fully as he would like to see it be loaded, and to shift more of that surplus energy down to Northwestern if Northwestern could take it. That was the request that usually came from Mr. White.

Q. Do you recall what you said concerning the taking of energy?

A. Well, as the discussion came up each year, I assured Mr. White that as conditions permitted, outlining certain limitations that developed from time to time, that we would be glad to make every effort to increase the loading of the [Buelah] plant in order to transmit more power down to Northwestern.

Q. In substance, is that about the talks you had on numerous occasions? A. Yes, those general conversations.

Defendant's Exhibit 335 was received in evidence. It is as follows:

Defendant's Exhibit 335.

Dakota Public Service Company and Northwestern Public Service Company.

Summary of Profits and Savings Resulting from Interchange Power for the Years 1936 to Oct. 19, 1945, Inclusive.

Year	Dakota Public Service Company and Predecessors	Northwestern Public Service Company
1936	$ 4,342.00	$ 644.30
1937	10,169.85	1,861.45
1938	9,815.35	2,218.35
1939	10,318.02	2,042.02
1940	13,348.59	2,430.39
1941	20,140.00	4,867.42
1942	15,612.00	5,215.30
1943	13,248.50	7,108.20
1944	10,883.50	4,916.00
January 1, 1945 to October 19, 1945	7,962.50	4,928.00
Total	$115,840.31	$36,231.43

Defendant's Exhibit 335-A was received in evidence. It is as follows:

Defendant's Exhibit 335-B was received in evidence. It is as follows:

Deft's Exh. 335-B

Filed March 3, 1948
Roy L. Marker, Clerk

Q. I now call your attention to exhibits marked as Defendant's Exhibits 335, 335-A and 335-B, and ask you if you prepared those?

A. Yes. I directed preparation of these.

Q. Are they true and correct? A. Yes.

Q. From what did you take the data that is shown on there? Does it come from Exhibits 82 and 55 (R. pp. 546-7 and 376, respectively, supra), here in court? A. Yes.

Q. Do you know Mr. Stokke, whether or not the computations and figures as shown upon Exhibits 335, A and B, are true and correct? A. Yes.

Q. Are they? A. Yes.

By Mr. Fellows:

Q. Mr. Stokke, are part of the figures in this exhibit offered in evidence taken from some compilations or exhibits prepared by Mr. Sickel? A. Yes.

Q. And some of them were also taken from records you had made yourself, in times past, weren't they? Some of these figures?

A. Made from records—I made this up just recently.

Q. Which ones of these figures were taken from the records made by Mr. Sickel, for the purpose of this trial?

A. The per cent column, No. 2, on Exhibit 335-A.

Q. Everyone of these figures that go clear down through the column headed "per cent", were taken from these exhibits Mr. Sickel prepared for the trial and which he [identired] here at the trial, weren't they?

A. You are referring to No. 2?

Q. Yes, No. 2?

A. I was not here all during Mr. Sickel's testimony.

Q. Did you take these from these exhibits Sickel prepared? A. He furnished me these figures.

Q. When did he furnish them to you?

A. Several days ago.

Q. Then you took them with the figures on the exhibits Sickel produced here at the trial, so you know, as a matter of fact, you took them from Sickel's exhibits. Where did you get the figures under "per cent" in the second column?

A. From a tabulation sheet which Mr. Sickel furnished me of these per centage figures for each of these years.

Q. Did you help Sickel prepare the tabulation sheet?

A. No, sir.

Q. You know it is a tabulation sheet he prepared for the purpose of this trial? A. That is right.

Q. Where did you get the figures in the third column?

A. Third column, "kilowatt hours"?

Q. Yes?

A. I got them from the operating report. That is the total for each year.

Q. And those figures from the operating report are figures that you from time to time prepared, aren't they, in your capacity as superintendent of production?

A. No, I didn't prepare those. They were prepared by the accounting department.

Q. Didn't they go from your department into the accounting department?

A. No, not from the production department.

Q. How did these figures get into the accounting department? A. From our division offices.

Q. That is your office, isn't it, as superintendent of production?

A. These figures were not cleared through my office. They are sent to the general office direct from the division office.

Q. Who sends them to the general office?

A. The chief clerk in the division office.

Q. What branch of the Huron office do they come from? Where do they originate before they start making the circuit?

A. The kilowatt hour readings and totals are prepared by the division office. Taken from meter readings obtained on the division.

Q. That is the division office at Huron?

A. No. Aberdeen, Mobridge.

Q. From where are they sent?

A. To the accounting department at the joint office.

Q. In Huron? A. Yes.

Q. Through your office? A. Not through my office.

Q. Where did the figures in the column marked "4", where did they originate?

A. They are from the operating report.

Q. Who made out those operating reports?

A. They are prepared by the accounting department of the joint office.

Q. At Huron? A. At Huron.

Q. What participation do you have in those figures?

A. I had no part in preparing them.

Q. Where did you get those figures to put on these sheets? A. From the operating reports.

Q. Have you those operating reports here that show the [Buelah] cost per mill, as the first figure in column 4, 2.57? Have you something here to show that?

A. I took the operating reports that are over in Exhibit 82.

Q. Have you got a report anywhere of the place from which you can take the figure, 2.57, as cost per kilowatt hour, at [Buelah] station, from January 1, 1937 to October, 1945? A. No.

Q. Where did you get those figures?

A. From the Dakota Public Service operating reports over on that bench.

Q. You found that figure in it?

A. I took the total fuel cost and divided by the net generation to get that unit fuel cost on this report.

Q. So it is not a figure then you took from any record whatever, except you took figures from which you computed this 2.57 mills. Is that right? This is a computation of yours from some record you got? A. That is right.

Q. Now, we get down to the seventh column, the per cent lost by transmission. Where did you get any such figure as 23.1 for the period from January to October 19, 1945?

A. I got those per cent losses by transmission from Mr. Sickel.

Q. And the next figure for the year 1944, transmission losses 22.8. You got that from Sickel? A. Yes.

Q. Every one of them? A. Yes.

Q. The transmission losses for 1942, those are all Sickel figures? A. Yes.

Q. And yet, as foundation for your testimony, you say those figures are correct?

A. Yes, to my knowledge they are correct.

Q. And you took them from Sickel's figures? A. Yes.

By Mr. Royhl:

Q. I show you Defendant's Exhibits 330 and 330-A and ask you if that is one of the records which you used in arriving at your line losses?

A. Yes. The figures that are on this sheet here. I have a carbon copy of those figures.

Q. Now, referring to Exhibit 335-A, Mr. Stokke, and the column on the left of the page which is entitled "Power plant"-and designated with the numeral "1". To what does that refer?

A. That refers to the name of the power plant under its location. Beulah, Bismarck, Mobridge.

Q. And the first group is for the year 1945?

A. For the year January 1, 1945 to October 19, 1945.

Q. Going down on that column I note the years 1944 and 1943, down to 1936. It covers those years, does it?

A. Yes.

Q. Just, generally, what does this exhibit purport to be, this 335-A?

A. If you will refer to the heading to begin with, it is a summary of the gross kilowatt hours delivered to Northwestern, production costs and profit under the power pool operation.

Q. From whom was the delivery made and to whom?

A. Delivered from Dakota Public Service Co. to Northwestern Public Service Co.

Q. When you say Dakota Public Service Co., do you mean, Northern and North Dakota Companies, prior to July 1, 1939? A. Yes.

Q. And thereafter the Dakota Public Service Co.?

A. That is right.

Q. Now, your next column to the right which column is designated "per cent". Under it in parentheses the figure 2. To what does that refer?

A. That refers to the per cent of kilowatt hours to the transmission line from the respective plants outlined through each year.

Q. That is the load that was on the transmission line from which the defendant purchased—it is the per centages of power from those plants. Is that it?

A. That is applying to kilowatt hours received at Aberdeen.

Q. Was some of this delivered at Gettysburg, as well?

A. Between the two, yes.

Q. Now, your third column there which is entitled "KWH" with the figure 3, in parentheses. To what does that refer.

A. First not the total in 1945, for example. 8,847,500 kilowatt hours.

Q. That is from all stations?

A. That is the total. That figure refers to gross kilowatt hours delivered by Dakota Public Service Co. to Northwestern Public Service Co. for that year, or for that period.

Q. Then you break that down according to those per centages, do you?

A. Yes, for each power plant. 78.8 of the 8,847,500 is mostly from 6,971,830 for Beulah. 17.6 for Bismarck applied to 8,847,500 is 1,557,160 kilowatts from Bismarck plant.

Q. And the same is true of the Mobridge computation?

A. Same for Mobridge.

Q. Going to column 4, which is entitled "Fuel Cost Average per KWH" (4) to what does that refer?

A. Let me take the figures one by one. The first one, [Buelah], 2.57, is the average fuel cost in mills per kilowatt hour generated by that plant during that period.

Q. Did you get that from the operating report?

A. From the operating report, yes.

Q. Did I understand you on your cross examination with counsel that you [divided] the generation of that plant by the fuel cost and arrived at your mill cost?

A. Divide the fuel cost by the generation. The next one, 3.73, is average fuel cost on the same basis for the Bismarck plant for the period. 7.35 is average fuel cost per kilowatt hour, net, for the Mobridge plant for the same period.

Q. Then you have a line there in that tabulation that is total of average. Do you mean that for the year?

A. That is average fuel cost—Before I get to that I would like to go to column 5. The total amount of column 5 is arrived at by multiplying first, 6,971,830 kilowatt hours from the [Buelah] plant, by 2.57, fuel cost, will result $17,918.00. The next figure in that column is arrived at by multiplying Bismarck plant kilowatt hours, 1,557,160 delivered to Northwestern by 3.73. The average fuel cost of that station, $5,808.00. The third item in there, column 5, $2,341.00, is arrived at by multiplying 318,510 by 7.35 in column 4. The next computation in preparing this report is to add up total dollars of fuel cost of the three

power plants. That totals $26,067.00. To arrive at the average fuel cost in column 4, or 2.95, [divided] $26,067.00 by the total kilowatt hours, 8,847,500, and the result is 2.95 mills.

Q. That is true of all of the years, as you have explained it?

A. That is the same process for all the way down.

Q. Now, you got your kilowatt hours in column 3 from the operating reports? A. Yes.

Q. Where did you get the total amounts in column 5, by multiplication?

A. By computation as I have just recited to you.

Q. Your column 4, mills per kilowatt hour, you have already explained, I think, you got that by dividing fuel cost from the operating report by the sum total of the kilowatt hours in column 3? A. That is right.

Q. Now, I refer you to the column designated "6", which is kilowatt hours gross delivered to the defendant. That is the same figure that is shown in column 3, is it not? A. The total in column 3.

Q. And you received it from the operating report of the Dakota companies? A. Yes, same source.

Q. Column 7, which is designated "per cent loss by transmission", you say you got that from this Exhibit 330-A. Is that right?

A. The loss by transmission determined by Mr. Sickel in another computation separate from that.

Q. You had a copy of this, didn't you?

A. No. This is transmission losses.

Q. I show you Defendant's Exhibit 331 (R. p. 1695, supra), and ask you if that is where you got your average transmission losses? A. Yes, that is where I got that.

Q. Your next, column 8, is merely the average, total average KWH appearing in column 4, isn't it? A. Yes.

Q. Do you know what the miscellaneous incremental costs were in production of kilowatt hours in this plant, or those plants? A. Yes.

Q. What were they?

A. Those miscellaneous plant costs are—

Q. In amount, what were they?

A. The first column is .2 mills. Next is .21 and .22.

Q. Now, I take it that column 10 is merely an addition of columns 8 and 9. Is that right? A. That is right.

Q. What is column 11?

A. Column 11 is column 10 divided by transmission efficiency to obtain the production cost, subtracted from transmission loss.

Q. Is that a matter of computation?

A. Yes, it is computation to get the results completed.

Q. Is that the result, 3.15 mills created by this 23.1% loss in transmission and adjusted to it?

A. That is right. It is the result of the total cost, 3.15, divided by the transmission efficiency, which is obtained in this way. The 23.1 is per cent figure. Expressed with decimal that would be .231. To obtain the transmission efficiency subtract the .231 from 1,000, and leaves the resultant figure of .769. The 3.15 in column 10 is divided by the transmission efficiency .769, and that gives 4.1 mills as the equivalent production cost expressed in mills after allowing for transmission efficiency or transmission loss.

Q. In other words you increase the incremental cost from 3.15 to 4.10 mills, to compensate for the transmission loss of 23.1%? A. That is right.

Q. Column 12 is merely the multiplication of the figure in column 6 by the figure in column 11, which is the cost, 4.10 mills? A. Yes. 8,847,500 x 4.1 mills.

Q. That amounts to $36,275.00, doesn't it? A. Yes.

Q. I observe that column 13 refers to the revenue to the Dakota company from sales to Northwestern. Is that right? A. Yes.

Q. That is a matter of computation, isn't it? A. Yes.

Q. What unit of cost do you show there in that computation? A. I used the 5 mills per kilowatt hour.

Q. That is the contract price, is it? A. Yes.

Q. And that is again the gross kilowatt hours as shown in column 6? A. Yes.

Q. And that would be $44,237.50, is it? A. Yes.

Q. Now, what do you intend to show by Column 14?

A. Column 14 is headed to show profit to Dakota Public Service Co. on kilowatt hours delivered to Northwestern Public Service Co. for the respective years.

Q. What computation did you make there to arrive at the figure in Column 14?

A. Column 14 is column 13 minus column 12.

Q. In other words, you take the amount of column 13, which is the amount Northwestern paid the Dakota com-

pany, and subtract from it the production cost of those kilowatt hours to the Dakota company, leaving the figure $7,962.50, as the profit under your method of figuring?

A. That is correct.

Q. Is that true of the various other columns shown here?

A. Yes, all of the way down the line.

Q. Now, as you arrived at the figures shown in column 14, did you transfer them in each instance to the summary and recapitulation that appears as Exhibit 335?

A. Yes, that is shown on Exhibit 335.

Q. In the year 1945, is that restricted to the period from January 1 to October 19, of that year? A. Yes.

Q. Now, referring to Defendant's Exhibit 335-B, the left hand column merely refers to the years or portion of years in the case of 1945. Is that right? A. Yes, that is right.

Q. What, generally, is this tabulation?

A. Well, as indicated by the heading, under Northwestern, it shows a summary of the kilowatt hours received from and delivered to Dakota Public Service Co. and predecessors, shows costs and net savings.

Q. Net savings to Northwestern? A. That is right.

Q. And then Exhibit 335-B shows the benefits that accrued on this 5 mill sale to the defendant company. Is that right? A. That is right.

Q. And Exhibit 335-A shows benefits accruing to Dakota Public Service Co., on the sale and exchange of this energy?

A. Yes.

Q. I notice that your column designated by the numeral (1) is kilowatt hours received from the Dakota Public Service Co. for the period shown to the left of that figure in each instance?

A. Yes. Kilowatt hours received from Dakota Public Service Co.

Q. And that is the same figure that appears in Exhibits 335-A, column 3 and 6, isn't it?

A. Yes, that is the same one.

Q. Now, referring to the column designated (2) "Kilowatt hours delivered to Dakota Public Service Co." What do you mean by that?

A. Kilowatt hours delivered by Northwestern to Dakota Public Service Co.

Q. For the period shown to the left of the first column on the left of the page? A. Yes, for those years.

Q. From what source did you get that figure?

A. Those figures are from the operating report.

Q. That is the operating reports of what company?

A. Of Northwestern Public Service Co.

Q. Does it show on the Dakota companies, too?

A. I am sure it does. I am not sure how far back. It goes back to 1936, I believe.

Q. These here are the operating records of the Northwestern Public Service Co. for the period covered by your exhibit there? A. Yes.

Q. Where did you get the figure that is in column 3, "Net KW interchange"?

A. Column 3 is column 1 minus column 2.

Q. That is the net interchange between the two companies? A. Yes.

Q. Where did you get the figure, incremental fuel cost, in column 4?

A. Those incremental fuel costs are computed costs that I made, taken from the tabulation of graph data off of that station, off of that unit, and the Aberdeen station.

Q. They are in the operating reports, too, aren't they?

A. Not these incremental costs.

Mr. Benson: They are not here in the court room?

A. The incremental costs are determined from the average fuel cost by application to the actual cost expressed incrementally, from a load diagram I got of the station generator.

Q. Is that load diagram here in evidence?

A. I have got a graph on that.

Q. Do you know that to be a true and correct figure?

A. Yes.

Q. Is that true of the figure in column 5 as you have explained it heretofore? A. Yes.

Q. Is column 6 the total of column 4 and column 5?

A. Yes.

Q. Where do you get the amount in the column designated No. 7?

A. No. 7 is the [produce] of column 1 x column 6.

Q. What does that represent?

A. The gross kilowatt hours received from Dakota Public Service Co. times incremental total cost shown under column 6.

Q. In other words, that is what it would have cost Northwestern Public Service Co. to have generated 8,847,500 kilowatt hours, is it? A. That is correct.

Q. Which is the amount defendant received from Dakota Public Service Co. that year, or part of year?

A. Are you referring to No. 7, the production costs?

Q. You say that the figure that appears in column 7, is that what it would have cost Northwestern Public Service Co. to have generated 8,847,500 kilowatt hours?

A. Yes, that is correct.

Q. And the figure in No. 8 is the same figure shown in column 6? A. That is right.

Q. What is the figure appearing in column 9?

A. Column 9 is the kilowatt hours shown under column No. 2 times cost per KWH shown under column No. 8. In other words it is 1,365,300 kilowatt hours delivered to Dakota Public Service Co., times total incremental cost per KWH, 5.65, equals the total dollars shown under No. 9.

Q. That represents what it cost the defendant company to generate the kilowatt hours that were transferred to the Dakota Public Service Co. during that period? A. Yes.

Q. What is the computation or figure shown in Column 10?

A. The cost of net kilowatt hours interchanged, based on Aberdeen production cost. No. 10 is kilowatt hours shown in column 3, net kilowatt hours interchanged, 7,582,200 times 5.65 mills, shown under column 6 or column 8. That equals $42,839.00, shown under column 10 for the period of 1945.

Q. That figure represents what it would have cost the Northwestern to have generated in its own stations the net kilowatt hours shown in column 3 of the exhibit?

A. That is correct.

Q. Where did you get the figures in column 11?

A. Column 11 is total dollars payment to Dakota Public Service Co. for the net kilowatt hours interchanged at 5 mills. That is column 3 times 5 mills.

Q. That is what the Northwestern Public Service Co. actually paid to the Dakota company for the net kilowatt hours back and forth between the two companies for that period of time? A. Yes.

Q. What is the computation or figure which is shown in Column 12?

A. Column 12 is column 10 minus column 11.

Q. In 1945 it amounts to $4928.00? A. That is right.

Q. That is what the Northwestern Public Service Co. [benefitted] by buying net kilowatts in column 3, at 5 mills, is it?

A. Yes. It is net savings to Northwestern on net interchange.

Q. Now, the figure in column 12, you have transferred this over to your Exhibit 335, have you, in the summary?

A. Yes.

Q. I take it you had added that up there, benefits accruing to the defendant company and benefits accruing to the Dakota company? A. That is right.

Q. There is an amount shown by that exhibit as [benefitting] the Dakota company for the year 1945 back through 1936, inclusive? A. The total is $115,840.31.

Q. What are the benefits shown accruing to the Northwestern Public Service Co. for that same period of time?

A. The Northwestern savings, $36,231.43.

Defendant's Exhibit 337 was offered in evidence and objected to by plaintiff on the ground it was immaterial to the issues and an attempt to try an issue collateral to the case. The exhibit was received subject to the objection. It consists of the operating reports of Knife River Coal Mining Company covering the years 1936 to October 19, 1945, inclusive, and containing various accounting data, including therein mining costs plus royalties per ton of coal delivered.

Among other information, those reports contain the following data:

	Revenue to Knife River Per Ton Sold to:			
Year	Northwestern	North Dakota	Northern	Dakota
1936	.71	1.34	.67	...
1937	.83	1.13	.94	...
1938	.90	1.09	.95	...
1939	.93	1.08	.95	...
1940	.95	...	...	1.07
1941	.96	...	...	1.04
1942	.89	...	...	1.10
1943	.96	...	...	1.18
1944	.96	...	...	1.18
1945	1.26	...	...	1.27

Q. Do you know of your own knowledge that those are the regularly kept reports of that corporation?

A. Yes, I do.

Q. Are they a part of the business records of that corporation? A. Yes.

Q. Kept in the due course of the business of the corporation? A. Yes.

Q. And as a part of the transaction of that corporation?

A. The accounting records of transactions, yes.

Q. Part of the regular records of the company? A. Yes.

Q. Are they made at the time shown by the instruments?

A. They are made for the years shown on the covering sheets.

Q. And at the time shown?

A. The following month, yes.

Q. Are they in the same condition now as when made?

A. Yes, I am sure they are.

Q. Are those instruments all part of the records and files of that corporation? A. Yes.

Defendant's Exhibit 336 was received in evidence subject to the same objections as made by plaintiff to Exhibit 337. It is as follows:

Defendant's Exhibit 336.

Profit Accruing to Knife River Coal Mining Co. from Coal Sold to Dakota Public Service Co. at the Beulah Plant to Produce K. W. H. Interchanged Years 1936–October 19, 1945, Inclusive.

Year	K. W. H. Delivered by Beulah Plant to NWPS Co.	Tons of Coal Based on— 3.7 lbs. per KWH	Delivered Cost per Ton	Mining Cost Plus Royalties per Ton Delivered	Net Profit per Ton Delivered	Amount of Profit
1936	4,878,140	9,025	$1.43	$0.86	$0.57	$ 5,144.00
1937	5,958,407	11,023	1.24	0.74	0.50	5,512.00
1938	5,970,345	11,045	1.21	0.78	0.43	4,749.00
1939	6,398,312	11,837	1.25	0.76	0.49	5,800.00
1940	6,745,087	12,478	1.20	0.74	0.46	5,740.00
1941	9,221,236	17,059	1.17	0.76	0.41	6,994.00
1942	9,149,112	16,925	1.25	0.78	0.47	7,955.00
1943	9,436,333	17,457	1.31	1.06	0.25	4,364.00
1944	8,423,674	15,584	1.32	1.09	0.23	3,584.00
1945 (to Oct. 19)	6,971,830	12,898	1.40	1.10	0.30	3,869.00
Total						$53,711.00

Q. I show you instrument marked Defendant's Exhibit 336, and ask you if you prepared that?

A. Yes, I prepared that.

Q. From what source did you get the data that is shown on Defendant's Exhibit 336?

A. To answer that I will have to take it up by columns.

Q. Very well.

A. The first column is the year for which the data is shown. The KWH delivered by Beulah plant to Northwestern, that I obtained from figures shown on a previous exhibit, 335-A, for the Beulah plant shown in each year

under column No. 3. The next column, "Tons of coal," based on 3.7 pounds per kilowatt hour generated, I obtained the 3.7 pounds per kilowatt hour generated by a spot check through the operating reports of the Dakota Public Service Co. and the predecessor companies, for the power plant at Beulah. I used the 3.7 pounds for this period on down through the report. The figures shown under that column are the kilowatt hours shown under the first column times 3.7 which gives the pounds divided by 2000 pounds, and gives the resultant tonnage by years.

Q. That is a matter of computation, then, largely?

A. That is right.

Q. Where did you get the information shown in the column headed "delivery cost per ton"?

A. I got those figures from the operating report of Dakota Public Service Co.

Q. They are here in court? A. Yes.

Q. Where did you get the figures shown mining cost plus royalties per ton delivered?

A. I got those figures from the Knife River Coal Mining Co.

Q. Exhibit 337? A. That is right.

Q. Where did you get the computation in the column designated "net profit per ton delivered"? That is a matter of computation?

A. That is a matter of computation. Delivered cost per ton less total mining cost equals net profit per ton.

Q. And the figure appearing in the right hand column of Exhibit 336 is a mere matter of computation? A. Yes.

Cross Examination: by Mr. Benson.

Q. Now, you have testified that the work order on the property of the Dakota companies went to the Chicago office of U. P. U., and that the work orders of Northwestern Public Service Co. went to Middle West Service Co. Is that right? A. Yes.

Q. Do you know that of your own knowledge? A. Yes.

Q. You know that was always the case?

A. To my knowledge it was.

Q. I show you Defendant's Exhibit 82-21 (R. p. 655, supra). Do you see the number on that? A. Yes.

Q. That is a work order of the Dakota Public Service Co. is it not? A. That is right.

Q. Do you know anything about the set-up in Mr. White's office in Chicago? How many people he had working there? A. No, I am not sure.

Q. Ever been in there? A. Oh, yes, several times.

Q. Do you know Mr. Edward Vennard, of Middle West?

A. Yes.

Q. Do you recognize his signature?

A. I am sure I would.

Q. Look at Exhibit 82-21. You see down in the right hand corner, "approved Middle West Service Co." That is Mr. Vennard's signature under that? A. That is right.

Q. And the date is April 18, 1940? A. That is right.

Q. Is this stamp on here Middle West Service Co. stamp? "Legend & Analysis Dept."?

A. I could not say about that.

Q. You can't tell about that?

A. I have seen that stamp on some work orders.

Q. That came from Middle West Service Co.?

A. On some work orders.

Q. On your own work orders that came back from Middle West you have seen that stamp? A. That is right.

Q. On the bottom of this 82-21, can you tell whether Sam White placed his initials on there?

A. Yes, that is Mr. White's initials.

Q. And opposite that is 4-20, isn't it? A. Yes.

Q. Meaning April 20? A. Yes.

Q. And this stamp we are talking about as recorded, April 15, 1940, by the analysis department?

A. That is right.

Q. I call your attention to Defendant's Exhibit 82-20, (R. p. 651, supra). That is a Dakota Public Service Co. work order, isn't it? A. Yes, it is.

Q. That is to build a line from Bowdle to Ipswich, isn't it?

A. They are both outside my department. I am just answering my opinion.

Q. But you answered to all on direct examination about work orders, didn't you?

A. No. Under the production department. I specifically said that is under production department.

Q. You think the work orders in your department were handled differently from the usual procedure, do you?

A. I would not know as to that.

Q. I call your attention to 82-20. That is the same stamp as affixed to Exhibit 82-21, the red stamp, Received April 15, 1940. Analysis Department. Is that your department? Do you know? Do you know whether that is Middle West or your own department?

A. I am sure that is not our department.

Q. You don't think it is Northwestern? A. No, I don't.

Q. You see approval of Middle West Service Co., 8-20-40?

A. Yes.

Q. See O. K., Sam White's initials, 4-23? A. Yes.

Q. Now, will you refer to your copy of your Defendant's Exhibit 335-A. Do you have it before you?

A. Yes, I have it here.

Q. Now, there are above the column 8, 9 and 10, Incremental Cost Per KWH in mills. Will you explain what you mean by the phrase and term "Incremental Costs"? Will you refer to your Exhibit 335-A (R. p. 1755, supra), and to the phraseology above the columns 8, 9 and 10, and the words "Incremental Costs" and tell us what you mean by that phraseology?

A. Incremental costs are the charges in total costs that are incurred by each in a unit of output. In other words it is the output cost.

Q. What you mean to say is, to see if I understand you, if you produced some additional kilowatt hours, you figure in coal under this exhibit in column 8, and charge those kilowatt hours cost in pounds of coal reduced to mills per kilowatt hour. Is that what you did?

A. That is the final. The fuel cost, incremental fuel costs are determined from the steam and weather load on the turbine, which varies pursuant to loads. In the low average cost.

Q. I am not an engineer and I don't understand that. I want you to go back to column 4 of this exhibit. Under fuel cost average. You say there, 2.95? A. That is right.

Q. That is the average fuel cost per kilowatt hour of what kilowatt hours produced during that period?

A. With the average fuel at those stations through that period.

Q. You mean by that, the figure 2.95, you have taken for Beulah, Bismarck and Mobridge in each instance the total number of kilowatt hours produced, the total number pro-

duced during that year, or in that whole period shown on the exhibit from January 1, 1945 to October 19, 1945?

A. To obtain the average fuel costs—

Q. You get a figure shown there of 2.57 mills?

A. Under Beulah, yes.

Q. You take all of the kilowatt hours produced from Beulah during all of that time? A. That is right.

Q. And divided it into the cost of coal for the whole period? A. Yes. For the Beulah plant, that is right.

Q. So that is not in that column 4 an incremental fuel cost but an average fuel cost?

A. Under fuel, that is average.

Q. That is the average fuel cost? A. Yes.

Q. So when you get over to column 8, 9 and 10, under column 8, and you put down in there incremental fuel cost, 2.95, you mean that was average fuel cost for each KWH produced by those three plants during the period indicated on the exhibit, and not incremental fuel cost?

A. That is the average fuel cost in column 8.

Q. Now, under column 9, which you have entitled "Miscellaneous", what figures do you use to get that .20 figure?

A. .20 figure shown on there for the particular year is my computation and estimate of the incremental maintenance and miscellaneous cost.

Q. You say that is your computation or estimate. Do you have your working papers here?

A. For all of these figures, no.

Q. Do you have your working papers from which you produced this .20? A. No, I don't have those here with me.

Q. Are they in this city?

A. No, not these figures here.

Q. They are not here in the city at all? A. No sir.

Q. Where did you do this work?

A. I prepared these incremental costs, I started on a tabulation of this kind way last fall sometime.

Q. From what figures were you working way last fall?

A. I was working—using the estimates of maintenance costs, miscellaneous costs, and then checked it with furnace maintenance and other incidentals from the operating reports, that I [check] here a couple of weeks ago.

Q. I asked you what records you were working from way last fall? You did not have the records of the Dakota Public Service Co. last fall, did you? A. No.

Q. What did you have?

A. I had pencil figures of my own taken from the operating reports.

Q. Some memo that you had kept yourself?

A. Yes, all of the years.

Q. And can you tell us now each item of cost that went into this figure of .20, miscellaneous, under column No. 9? Can you tell us? A. Yes.

Q. Will you give us those in detail, please?

A. I can tell you what they applied to.

Q. Just give us the items?

A. I don't have the dollars and cents.

Q. Just each item?

A. Principally furnace maintenance was the major item, and chemicals and some incidentals.

Q. What are the items that went into incidentals?

A. Station supplies and expense.

Q. What kind of supplies?

A. That would be packing, telephone calls, numerous incidental expenses in the plant.

Q. Any others?

A. Those are the major items. Furnace, chemicals, incidentals.

Q. Then I take it there is not in this figure .20, any supervision or engineering? A. No.

Q. There is no boiler repair? A. No, sir.

Q. There is no generator repair? A. No.

Q. There is no electrical labor? A. No, sir.

Q. There is no miscellaneous station labor? A. No, sir.

Q. There is no lubricants? A. No, sir.

Q. There is no expense of coal handling, ash handling?

A. Yes, that is in the fuel cost.

Q. Now, in the maintenance, there is no maintenance except furnace maintenance?

A. Furnace maintenance is a major item in certain years. It is a factor in every year. And there were other maintenance charges. Very little.

Q. I show you Dakota Public Service Co. operating report for the year 1945, under maintenance. Will you look at that total? Do you still say that furnace maintenance is a major item? A. Is the principal item.

Q. Principal item?

A. The principal portion of that was used in that incremental maintenance cost.

Q. You mean the greatest portion of the item, furnace maintenance, went into your incremental cost? A. Yes.

Q. That is all you put in, out of the whole maintenance account was something for furnace maintenance? That is all you put into your figures?

A. There were other items that went in for the particular years. As maintenance cost went up and down, year after year, this proportion was changed some to keep in line with the operation or total maintenance cost.

Q. What I have asked you is that the only item of maintenance carried on the regular accounting records of the Dakota Public Service Co., in its operating reports, which you put into your Exhibit 335-A, was a portion of the item called furnaces and boilers? A part of that item?

A. That is right. That is the primary item of ineremental maintenance costs.

Q. In other words, on that particlar page, you are talking about the item, furnaces and boilers, in toto, as an item of the total operating expense for the period shown on that sheet under maintenance?

A. That is all stations there. That is what it is on that particular sheet. Yes.

Q. Now, you are not an accountant? A. No, sir.

Q. These so-called incremental costs on your Defendant's Exhibit 335-A don't represent any return on any investment in facilities for making the energy you are talking about? A. No, they do not.

Q. They don't represent any expense such as depreciation, taxes or insurance? A. No, sir.

Q. It is just the items you have talked about in your prior explanation? A. That is right.

Q. Did you conceive the form of this exhibit yourself?

A. Yes, I did.

Q. You set it all up yourself? A. Yes, I did.

Q. Didn't have any help from anybody?

A. I had help from an accountant in the company to run off the machines and tabulate this.

Q. Did you confer with any consulting engineer?

A. No, sir. I initiated this.

Q. You didn't talk to any consulting engineer as to the validity of it? A. No, sir.

Q. You didn't talk to any consulting engineer or Mr. Royhl?

A. I talked to friends about it, but not as to the validity of it, no.

Q. I would like to ask, Mr. Stokke, this question. There is, in your figures in Defendant's Exhibit 335-A, no reflection of any of the costs or the investment in a new boiler or any of the costs of operation of the new boiler in [Buelah]. Is that correct? A. There is no reference.

Q. I said reflection, not reference.

A. Not that particular boiler or any other boiler.

Q. You just took the coal costs and furnace maintenance costs? A. By stations.

Q. You, I think yesterday, or when you first went on the stand at the beginning of the case, did you say something about being a member of the staff at the Huron office? Did you say you were a member of the joint management staff? A. Yes.

Q. Do you remember the kind of a check you got? Was it drawn by the Northwestern Public Service Co. on a bank? A. The payroll check, you mean?

Q. Yes. A. Yes, I believe it was.

Q. Did you hear Mr. Sickel state that his exhibit pie or chart, 330, did not mean that 78.8% of the power that the northern companies sent to Northwestern came from [Buelah]? A. I haven't seen that chart.

Q. Did you hear Mr. [Sickel's] on the stand when he so testified? A. I heard his testimony.

Q. Didn't he say that that chart was not intended to say that 78.8% of the power that went to Northwestern came from [Buelah]?

A. I don't recall his statement to that effect.

Q. If you will refer to your Exhibit 335-A (R. p. 1755, supra). Will you look at the figures under column 2, under the word "per cent". In working out your averages you assumed that of the power that went to the Northwestern from the northern companies 78.8% in the year 1945, came from [Buelah]? A. No. I didn't assume that.

Q. Where did you get [78.8%] opposite the name [Buelah]? A. Mr. Sickel furnished me those per centages.

Q. Let's get that straight. You show 8,847,500 KWH went from the northern companies to the Northwestern in

the period from January 1, 1945 to October 19, 1945, do you not? A. Yes, that is right.

Q. Do I understand you to say that Mr. Sickel told you 6,971,830 KWH during that period came from [Buelah]?

A. He did not give me those figures that you recited. I computed these figures.

Q. You computed the figures using the per centages he gave you? A. That is right.

Q. What did he tell you those per centages represented?

A. He told me that those per centages represented the per cent of kilowatt hours of the total that came from [Buelah]. 78.8% of the total that was delivered came from [Buelah].

Q. Now, then, did Mr. Sickel give you everyone of these per centages we find in that column marked "per cent" or No. 2? A. Yes, he did.

Q. Did he tell you that where you have a per [centages] for Bismarck, that that was the per centage of power that was delivered to Northwestern which originated at Bismarck? A. That is right.

Q. And he gave you the same statement opposite Mobridge, the per centage represented the per centage of power delivered to Northwestern which originated at Mobridge? A. That is right.

Q. Did you hear Mr. Sickel's testimony the Bismarck unit, generating unit, went in in 1940? Did you hear that?

A. Yes.

Q. You knew that of your own knowledge? A. Yes.

Q. That was 4000 KW generating unit? A. Yes.

Q. You are the man who made up these so-called annual supplements to the interchange capacity payment contract year by year, are you not?

A. Supplements Exhibits B.

Q. Sometimes it is only one and sometimes three, depending on your practice during the years, but you are the man that made the supplements?

A. No. The committee members determined those figures.

Q. Weren't you a member of the committee?

A. I was one of the committee.

Q. And the other man was a man who was a production man in the plant, in one of the plants?

A. For what year are you speaking?

Q. Isn't that true of every year? Let's take the year for 1941. Who was the other member that year, other than yourself? A. Mr. Chesire.

Q. He worked in the Bismarck plant?

A. He was chief engineer, Bismarck plant.

Q. You did [supervision] his operation of the plant, didn't you? As production engineer you supervised Chesire's operation of the plant, did you not?

A. I had general supervision of all power plants.

Q. Not only his but all of the rest?

A. All of them, yes.

Q. Did you see these charts that were prepared by Mr. Sickel, showing what he said was the deficiency of the northern systems in generating capacity over a considerable period of time? You saw those?

A. I saw the chart laying on the table. I haven't examined it.

Q. Did you hear his testimony? A. No.

Q. You recall that after the Bismarck unit went in, instead of giving that unit credit for 4000 KW capacity, it only got 3000 capacity in these annual statements which you used to fix up demands? Is that correct?

A. Your statement is not correct.

Q. You increased the capacity only 3000 from 2250 after putting in a 4000 KW unit? You increased the capacity to only 5250 KW? A. For certain reasons the committee did.

Q. I just wanted to find out about this 4000 which was deducted. When you only give credit for 3000 he deducts 4000. That is what I wanted to straighten out. Now, yesterday, in your exhibit 335-A, under the items that you added to get the cost of coal per kilowatt hour, you made a statement that nowhere in Exhibit 335-A was there any reflection of any expenditures or any capital charges or fixed charges on the new boiler at [Buelay]. That is correct, isn't it? A. No fixed charges, yes.

Q. You didn't in any way take into consideration the investment in the Bismarck boilers in 1938 in preparing your Exhibits 335-A? A. No, I did not.

Q. Nor the new generating capacity installed in 1940, you didn't take that into consideration in preparing 335-A. That is correct, isn't it?

A. With respect to the cost, you mean, here?

Q. The cost or expense of operation, outside of coal and some boiler washing?

A. All I took into consideration is what is shown on this particular sheet.

Q. I was only trying to find out what this uncertain column of miscellaneous meant, and there is nothing in there for this additional investment at Bismarck, is there?

A. That is right.

Q. When you were preparing that exhibit had you heard Mr. White's testimony read at page 647 of his deposition, with reference to what that new turbine, completed, cost, namely $341,979.00? Had you heard his testimony?

A. No, I had not.

Q. Were you there at the time, in charge of these properties when that new turbine went in? A. Oh, yes.

Q. And you were watching expenses and costs?

A. You bet.

Q. You knew what they were? A. Yes, I did.

Q. Were you in court yesterday when Mr. Morrison was asking some questions of Mr. Sickel about changing some lines on the southern end of the North Dakota company properties, where he mentioned the entire cost of changing those lines and building substation as being, in round figures, $227,000? A. I heard the testimony.

Q. All I wanted to find out, Mr. Stokke, is, there is nowhere in 335, 335-A or 335-B, any reflection of any portion of the cost or the expense of operating those lines Mr. Morrison mentioned? A. No, there is not.

Q. Now, if the Dakota companies sold energy to Northwestern at what you call incremental cost, entitled fuel, miscellaneous, and then the total which you show on 335-A, and were credited for line loss which you got from Mr. Sickel— A. That part of the question, yes.

Q. Now, look at 335-A, you show in the column "total", 3.15? A. That is right.

Q. And in column 7, line loss, 4.10. Is that correct?

A. Yes.

Q. You call that incremental cost plus line loss?

A. Total incremental cost plus line loss.

Q. Now, if the Dakota groups sold to Northwestern at incremental cost plus line loss, it rasied the average cost per kilowatt hour to the Dakota companies, didn't it?

Mr. Royhl: Objected to as argumentative. Not proper cross examination.

The Court: I don't know as it is argumentative. He is asking this man's opinion as to the effect of certain figures, and I think he is entitled to an answer. Received subject to objection. A. I don't understand.

Q. In these figures, I will use round figures, but they come essentially from Exhibit 82-10 (R. p. 597, supra). Take the year 1941. The production of the Dakota companies that year was in round figures, 60 million kilowatt hours, wasn't it? Now, will you look at the 1941 figure in the lower portion of 82-10, opposite the year 1941? There is a figure there, total production of Dakota groups, 60 million KWH? A. That is right.

Q. Let's say for ease, so you will understand what I am talking about, the figure 60 million. You take a piece of paper and put these down. Put down 60 million. In order to avoid a lot of odd figures instead of taking Mr. Helmick's exact figure as to average production cost. Let's take 5 mills, which is below that. Multiply the 60 million by 5 mills, and you get $300,000.00, don't you?

A. That is right.

Q. Now, in that year, 82-10, Plaintiff's Exhibit shows 11 million plus sold to Northwestern by the North Dakota companies. Do you see that figure? A. 11 million, yes.

Q. Use 11 million for round figures. Your fuel cost for that year, you said was, plus miscellaneous, was 2.55, or 2½ mills as the cost. Multiply your 11 million—

A. I don't know where you get that figure.

Q. I am looking at 335-A, column 10, 2.55. A. Yes.

Q. Will you multiply 11 million by 2½ mills? You get $27,500.00, don't you? A. 28,000.00.

Q. Alright. If you deduct 28,000 from 300,000, you have $272,000.00. And if you divide that by the remaining kilowatt hours, which was left out of our production that year, namely 49 million, that leaves the cost to us at 5½ mills, doesn't it?

Mr. Royhl: Objected to as incompetent, irrelevant and immaterial, argumentative, uncertain.

The Court: Received subject to objection.

A. The figures we are using here—

Q. Produce that result? A. Produce that result.

Q. Did you understand the question I asked you before? If the Dakota groups sold energy to Northwestern at their incremental cost, it raised the average per KWH cost to the Dakota companies on the remaining KWH which they used [themsevles]? A. No sir.

Mr. Royhl: Same objection.

The Court: Same ruling.

Q. Now, then, will you refer to your Exhibit 335-B, (R. p. 1757 supra). Just a minute. I take it from your answer that you don't agree with my compilation?

A. With your thinking.

Q. Now, will you refer to your 335-B. Will you look at the column 4, which you call incremental fuel cost. Is that average fuel cost for all of the KW produced during the period from January 1, 1945 to October 19, 1945?

A. What particular fuel costs are your referring to?

Q. Look at your Exhibit 335-B? A. I have it.

Q. That is Aberdeen, isn't it? A. Yes.

Q. Now, look at column 4. What figure do you divide by the cost of coal to get 5.45?

A. I did not use that formula.

Q. That is what we want to know. How do you arrive at 5.45?

A. That was determined from performance graphs and data of the unit in Aberdeen plant at that load condition.

Q. You are talking about what unit?

A. The main [unite] in the Aberdeen plant.

Q. That still does not answer the question. What was the main unit? A. 5000 rated kilowatt turbine.

Q. 5000 KW turbine at Aberdeen? A. That is right.

Q. Now tell us how you got the figure of 5.45?

A. I determined that incremental fuel cost from the actual steam consumption rate of that unit, with this turbo generator backed down to take these kilowatts that was delivered in there from the Dakota Public Service Co. and northern companies.

Q. Where are the figures you used? Where are your working figures? A. There was notes of that.

Q. Where are they? A. At Huron.

Q. Where are the original records of the company from which you started to work out this figure, 5.45?

A. They are in here, in my ratings. Rating data.

Q. They have not been in court at any time in this proceeding? A. Oh, no.

Q. And that is the way you got all of the figures in this column 4, on Exhibit 335-B, is it?

A. By my computations of the load of that machine at different load conditions.

Q. Did you follow the same formula you have described as to the figure, 5.45?

A. Down the column for all of the year?

Q. Yes. A. Yes.

Q. Now, do you know what fuel cost at Aberdeen you started with? A. Yes, for each of these years.

Q. What fuel cost per KWH did you start with for the year 1945?

A. Well, I applied the fuel cost per ton and per pound for these computations for the load graphs of that turbine, using the steam consumption to begin with, per kilowatt hour.

Q. What was the figure of fuel you started with, in mills or cents, or whatever it was?

A. I don't have those figures here with me, but I used the actual fuel cost. Cost of coal. Cost of fuel.

Q. You mean by that that is the average per KWH cost in coal for that station, per year?

A. No, I do not mean that.

Q. You have examined these Federal Power Commission No. 1 reports, that are in evidence, showing average fuel cost of the Aberdeen plant, haven't you?

A. I don't recall. I haven't examined them here.

Q. Never examined them. In preparing to testify in this case you did not pay any attention to them? A. Oh, no.

Q. I show you Defendant's Exhibits 274 and 274-A (R. pp. 1281 and 1283, respectively, supra). Do you see that letter to Mr. White, 274, with your signature at the bottom, isn't it? A. I see the letter.

Q. That is your signature? A. Yes.

Q. You say, "The figures in green pencil are coincident 15 minute demand taken at actual times on the integrating meters at various locations throughout the system." I

Defendant's Exhibit 338-A was received in evidence. It is as follows:

wonder if that is not an error. Can you find the original load diagram for the year 1938 in Exhibit 53? This graph which I take out of Plaintiff's Exhibit 53, or this load diagram, that is the same as the one attached to Defendant's Exhibit 274, isn't it? A. Yes.

Q. What I want to get straight in my own mind, is every figure in green on this taken from a meter?

A. Well, I will have to answer that by explanation.

Q. That is what we want to find out?

A. There were meter readings taken. For example, let's check here. There were meter readings taken on each line out of Bismarck night and day; meter readings taken at Mobridge night and day; meter readings taken at Ellendale, night and day; Aberdeen night and day. The green figures at the towns in the graphs are integrated meter readings for those particular towns where we have meters, and meter of power delivered to these respective towns. What goes out on the transmission line is metered in total, and we distribute that total over these areas on the basis of the known demands in these various areas.

Q. What do you mean by known demand?

A. The electrical superintendents take those readings several times a year and they are furnished to the load dispatcher.

Q. So where they are shown in green on the high lines of distribution means they are the results of computations? They are not taken off of the meters?

A. At these particular places in the section of the line they are not. They are allocated.

Q. Now, when you brought in these reports of the Knife River Coal Mining Co. you didn't bring in any of the reports that show years where there were losses to that company, do you?

Q. Did you bring any reports for the years 1942 and 1945? A. The operating reports of Knife River?

Q. You brought in one financial statement for one year which showed a profit that year. I want to know if you have in court the financial statements for the years 1942 and 1945? A. For Knife River?

Q. Yes? A. No, I haven't.

Mr. Royhl: The defendant states to the record that at no time did this witness put in evidence, either as part of

STUDY OF KWH. INPUT INTO DAKOTA PUB. SERVICE CO. AND ITS PREDECESSOR COMPANIES SYSTEM, KWH. DELIVERED ON DAKOTA SYSTEM, KWH. DELIVERED TO N.W.P.S.CO. AND KWH. UNACCOUNTED AND SHOWING RATIO OF EACH TO TOTAL INPUT .

Year	Net Kwh. Input into Dakota System	Kwh. Delivered and Accounted for on Dakota System	Kwh. Delivered to N.W.P.S.Co.	Unaccounted Kwh. on Dakota System	Kwh. in Percent of Total Input: Kwh. Del. N.D. System	Kwh. Del. N.W.P.S. Co.	% Unaccounted for

Defendant's Exhibit 338-A.

Filed March 4, 1948
Roy D. Marker
Clerk

Dykstra 4, 33 1-B
307

12 2394

the Exhibit 337, or otherwise, any financial report of the Knife River Coal Mining Co.

Redirect Examination: by Mr. Royhl.

Q. Concerning your Exhibit 274, that was showed to you with the green figures and inquired about by counsel. Did you discuss that with Mr. White so that he knew the detail of the diagram, etc.?

A. I discussed those load diagrams with him every year.

Q. With Mr. White? A. With Mr. White.

Q. You explained the figures and the nature of the diagram? A. Yes, that is right.

Q. Counsel has asked you concerning a boiler, I think, and a generator. Where was the boiler?

A. The boiler at Beulah and the turbo generator at Bismarck were two of the items.

Q. Were those instrumentalities taken into consideration by the operating committee during the years following the installation? A. Oh, yes.

Q. They are incorporated in the so-called Exhibit B?

A. They are considered in the report.

Q. Something was asked concerning energy and the percentage figures for Beulah, Bismarck and Mobridge. You did not attempt to identify any specific energy, did you?

A. No.

Q. That is, what you have stated is, that on the transmission line 78% was from Beulah and the other percentages from Bismarck and Mobridge?

A. Of the total that came into Aberdeen, yes.

Q. Onto the transmission line? A. Yes, that is right.

Q. Counsel asked you concerning the rating of the boiler that was installed in 1940. When was the boiler installed that was inquired about? A. At Beulah, in 1937.

Q. When was the generating equipment installed at Bismarck?

A. It was completed in 1940, September, I believe.

Q. Counsel asked you whether or not that was a rated generator of 4000?

A. That was the rating on that turbo generator.

Q. What differentials did the committee make after the installation of that generator in the generating capacity for the station as Bismarck?

A. The committee checked into the ratings on the boilers

in the plant, their steam generating capacity and the steam requirements of the three units in the Bismarck plant, the three turbo generators in the Bismarck plant. We found there was sufficient steam capacity to operate the 1250 unit, No. 2, and the 4000 unit, No. 3, with the steam available in the plant. The No. 1 unit, non-condensing turbine generator, could not be operated along with the other two because there was insufficient steam in the place.

Q. And the installation of the 4000 generator would increase the capacity of the station only 3000?

A. The net result was 3000, yes.

Q. And that was because of insufficient steam?

A. To carry all three units. Yes, that is right.

A. P. LEARNED, being called as a witness by the defendant, and being sworn, testified as follows:

Direct Examination: by Mr. Royhl.

Q. Will you state your name to the record?

A. A. P. Learned.

Q. What is your age? A. 59.

Q. Where do you reside? A. Kansas City, Mo.

Q. What is your occupation?

A. I am a consulting engineer with the firm of Black & Veatch, Kansas City, Mo.

Q. How long have you been with that firm?

A. Since September, 1910, except for about eleven months spent in the United States army in 1918 and 1919.

Q. What is the nature of the work that is handled by this firm of Black & Veatch?

A. Our work covers the design of water, sewer and electrical power systems. Design and derivation work for water; sewage disposal work; installation of power plants. We also handle a great deal of appraisal and rate investigations, and special reports for financial interests and municipalities investigating utilities serving them. Also other special problems and special work, such as some of the special problems now undertaken by the United States government in connection with some of its defense projects.

Q. Are you a member of the firm of Black & Veatch?

Defendant's Exhibit 338-B was received in evidence. It is as follows:

Defendant's Exhibit 338-B.

Summary of Input Into Dakota Public Service Company System and Its Predecessor Companies.

Year	Net Generation on N. P. & L. Co. System (1)	Net Generation on N. D. P. & L. Co. System (2)	Total Generation on Combined System (3)	Received from N. W. P. S. Co. (4)	Total Input in Combined System (5)=Col. 3+4
1930	3,282,959	22,422,553	25,705,512	279,300	25,984,812

Q. Did you prepare the graph, Defendant's Exhibits 338? A. I did.

Q. And the tabulations attached to that graph, which have been marked Exhibit 338-A and 338-B? A. Yes.

Q. Have you made a study of the in-put and deliveries from the Dakota Public Service Co. and predecessors, from 1930 to October, 1945? A. I have.

Q. Is it in exhibit form? A. Yes.

Q. Do you refer to the graph, Exhibit 338, and the tabulations attached thereto, as 338-A and B? A. I do.

Q. What is the source of the data used in these exhibits 338, 338-A and B?

A. No sir.

Q. How many members of the firm are there?

A. Partnership, Mr. Black and Mr. Veatch.

Q. How many employees?

A. At the present time something over 300.

Q. Are they largely engineers? A. Yes.

Q. Are you a registered professional engineer? A. Yes.

Q. If so, where, what state?

A. In Colorado, Kansas, Missouri, Nebraska.

Q. Did you have a university education and did you obtain a degree? A. Yes.

Q. What university and what degree?

A. I attended the University of Kansas and received in 1910 Degree of B. S. in civil engineering. Professional degrees in civil engineering in 1930.

Q. Was that with the same school? A. Yes.

Q. Are you a member of any national professional society?

A. American Society of Civil Engineers; New England Water Works Association; American Water Works Association; American Association of Public Works, and the national professional society, Sigma Psi; ke beta ke.

Q. What has been your work since graduation?

A. My work has included routine work as a field man, then a draftsman, and later a designer. Chief office engineer. Then representative in the field securing new business, letting contracts, supervising resident engineers. My work since 1930 has been largely confined to the study of special problems, more particularly relating to appraisals and rate analysis of public utilities.

Q. Does that include construction and appraisal and design of electrical utilities, etc.?

A. I may have overlooked the fact I acted also as resident engineer. In the early days my work did include resident engineer on water, sewer and electric light work.

Q. You mentioned appraisal work and rate studies and special reports. What are some of the special assignments you have directed for Black & Veatch in this line of work?

A. I have handled for the firm of Black & Veatch the appraisal of industrial plants, including the Pioneer Motor Corporation; Dayton Wright Airplane plant. The General

Vehicle Plant in Long Island City in 1915 for the Aircraft Production Board.

Q. Of the United States?

A. Of the United States government, yes. Other industrial plants that included Turbo Oil Co., Eldorado Oil Co., and part of what is now Sun Ray Oil Co. Also the utilities and structures of the Jay Harper Ordnance Works. My experience of water works appraisal work has covered work at Richmond and Thurston, Ky.; Bartlesville, Oklahoma; Jefferson City, Mo.; Hutchinson, Mo.; Wichita, Kas. In cost appraisal it has covered the system at Monroe, Michigan, and system of gas companies in Dallas, in Mexico, Texas, Oklahoma, Arkansas. My electrical work has included the rate analysis as well as appraisals. The appraisals and rate analysis covered Garden City, Kas.; Wellington, Kas.; Lincoln, Nebraska; Cleveland, Ohio; Cincinnati, Ohio. And straight appraisal work has covered such properties as Dakota Electric Co., Tampa Electric Co., Tampa, Fla., Houston Light & Power Co., Houston, Texas, and a number of others. I have also handled special reports of the St. Louis, Mo. Electric Utilities, for the information of the bankers and a special study of the Commonwealth Edison Co. of Chicago for the Public Utilities Committee of the council of the city of Chicago. In addition to that I acted as principal assistant to Mr. Black in the appraisal for the Corporation Commission of Kansas of the Cities Service Co., in their systems in five states, and as his principal assistant in connection with the appraisal of the East Ohio Gas Co. in Ohio and West Virginia. I believe that covers the major projects.

Q. Have you appeared in courts or regulatory commissions? If so, state some of those appearances.

A. I have appeared before the Corporation Commission of Kansas; the Public Utility Commission of Ohio; the Public Utility Commission of West Virginia; before the Commission in Missouri; before the United States Court in Ft. Worth, Texas, and before the Minnesota Warehouse Commission, on street railway matter at Minneapolis.

Defendant's Exhibit 338 was received in evidence. It is as follows:

A. The source of this information is the operating reports for the Northern Power & Light Co. and the North Dakota Power & Light Co. for the period from 1930 to 1938, inclusive. And the Federal Power Commission Form No. 1 for the period from 1939 to and through October 19, 1945.

Q. And those are the basis for these exhibits, are they?

A. Yes.

Q. Turn to the second page of that exhibit which I think has been marked 338-B. I will ask you what that is?

A. That is the summary of the in-put into the Dakota Public Service system, and its predecessor companies.

Q. For the years shown in that tabulation?

A. For the years 1930 through October 19, 1945.

Q. When you say in-put, what do you mean?

A. I mean the net generation introduced into the system plus the purchased power introduced into the system. It gives the total in-put into the system for the purpose of transmission and distribution.

Q. That covers both sales from the transmission and to the system customers?

A. Oh, yes. The total in-put has to include both.

Q. Now, column 1 and column 2, they show only 1938. Why is that?

A. That is because the Northern Power & Light Co., shown in column 1, and North Dakota Power & Light Co., shown in column 2, became one system in, I think, July 1, 1939, and the annual report was carried as a combined report for 1938, and therefore the total generation for the combined system is shown in column 3 and covers what had previously been the contributions by the separate companies, now one company or one generation.

Q. What is column 3, of this [exhibits] 338-B?

A. Column 3 is the deliveries of energy into the North Dakota systems, by the Northwestern Public Service Co. for the respective years.

Q. I am speaking of column 3?

A. Column 3 is total generation of the Dakota Public Service Co. system and its predecessor companies systems.

Q. It shows both the generation of Northern and North Dakota up until 1938? A. Yes.

Q. Merely an addition of 1 and 2? A. That is correct.

Q. After 1938 it is the generation of the successor company, the Dakota Public Service Co.? A. That is correct.

Q. What is column 4?

A. Column 4 is the energy received from the Northwestern Public Service Co.

Q. That is the energy sent up to the Dakota companies by the Northwestern? A. That is correct.

Q. For the years shown in the study? A. Yes.

Q. What is column 5?

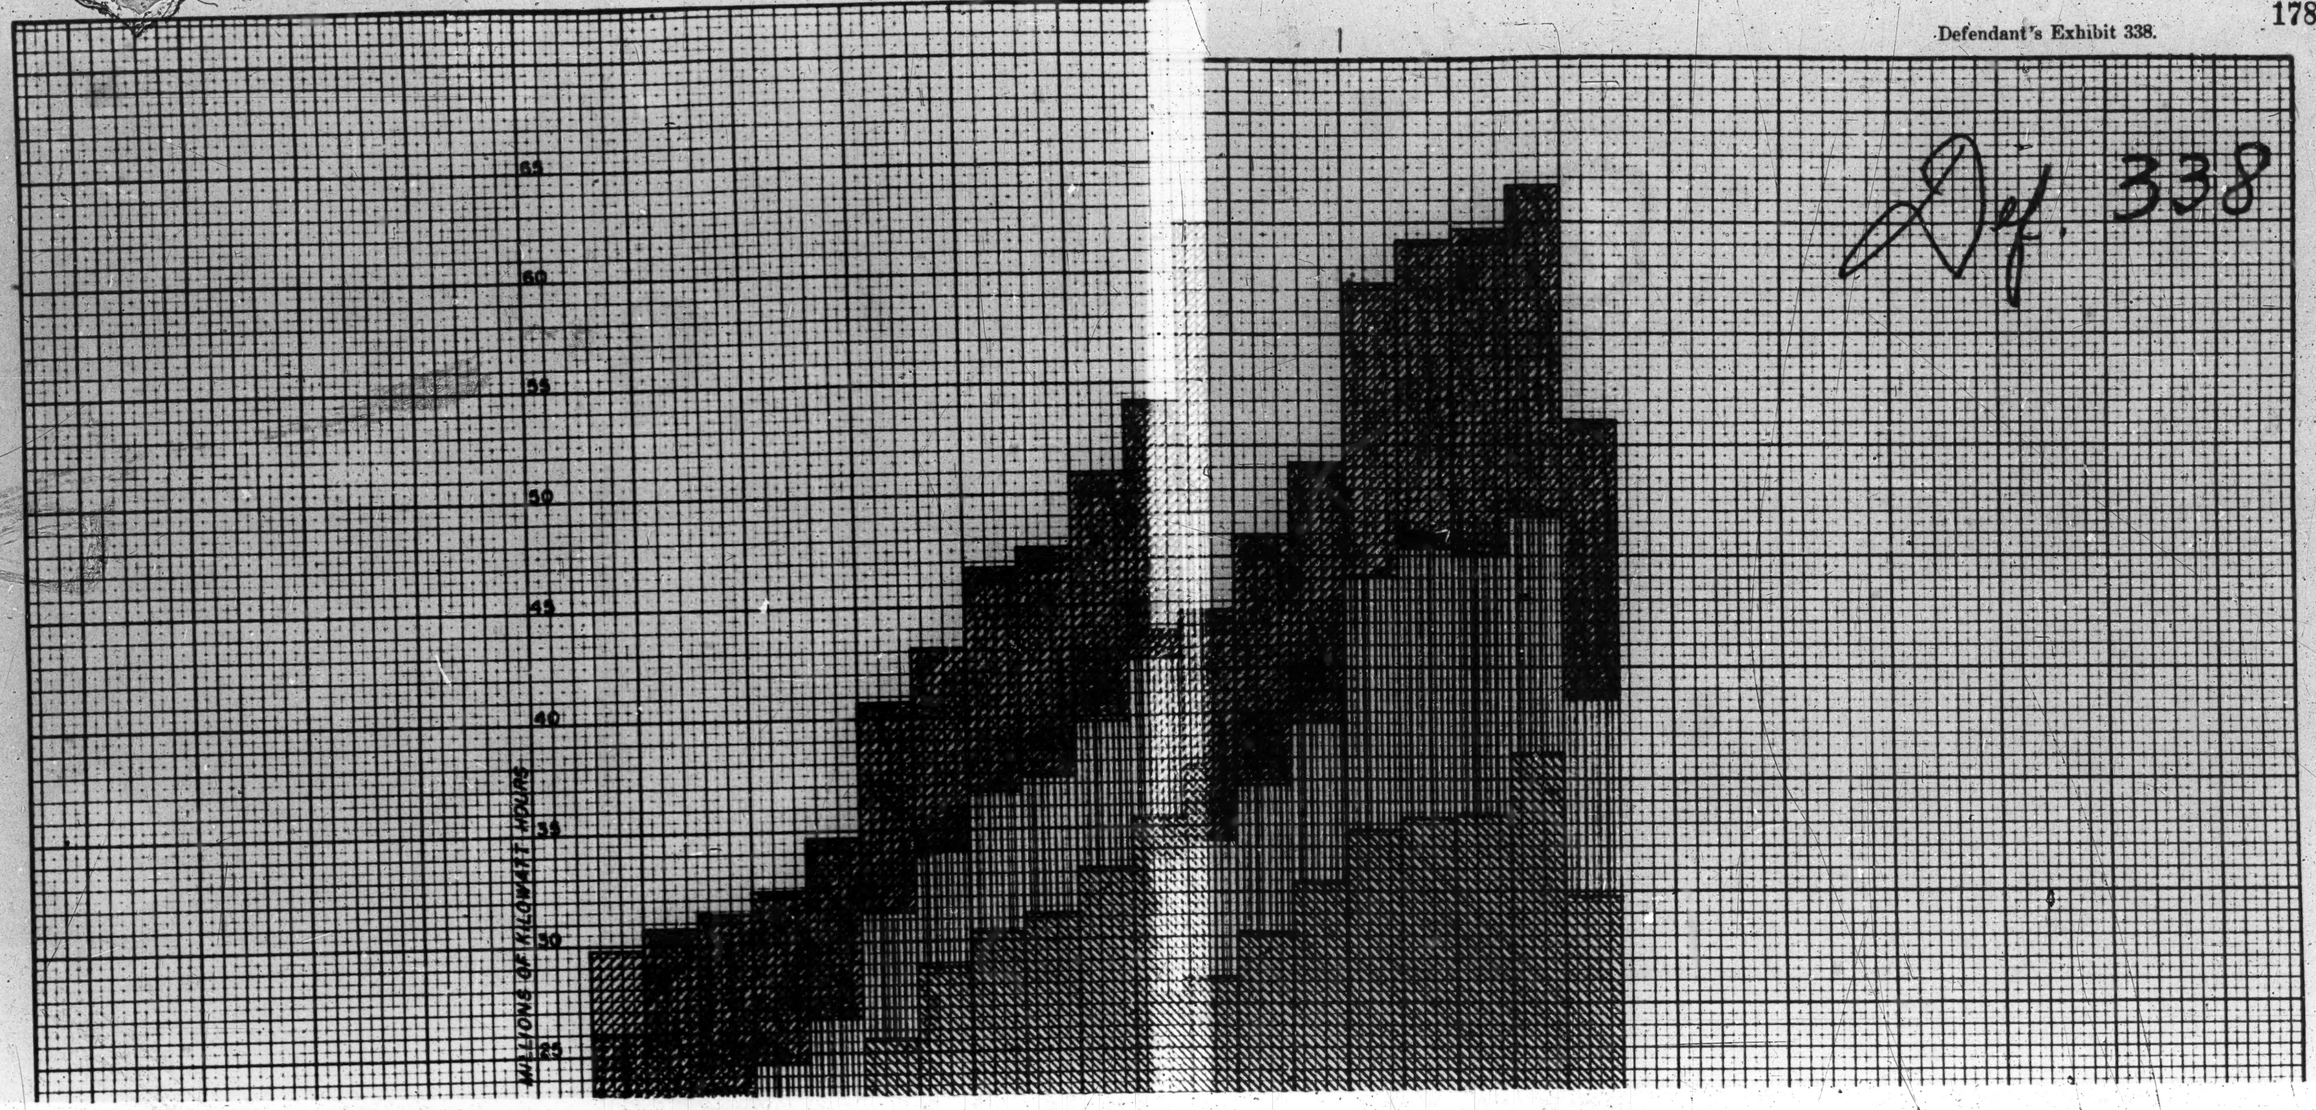
A. Column 5 is the total in-put into the combined system, or the sum of columns 3 and 4, for the respective years, 1930 through October 19, 1945.

Q. Will you now turn to the sheet marked 338-A, and tell us what the net kilowatt in-put into the Dakota system is, and where derived?

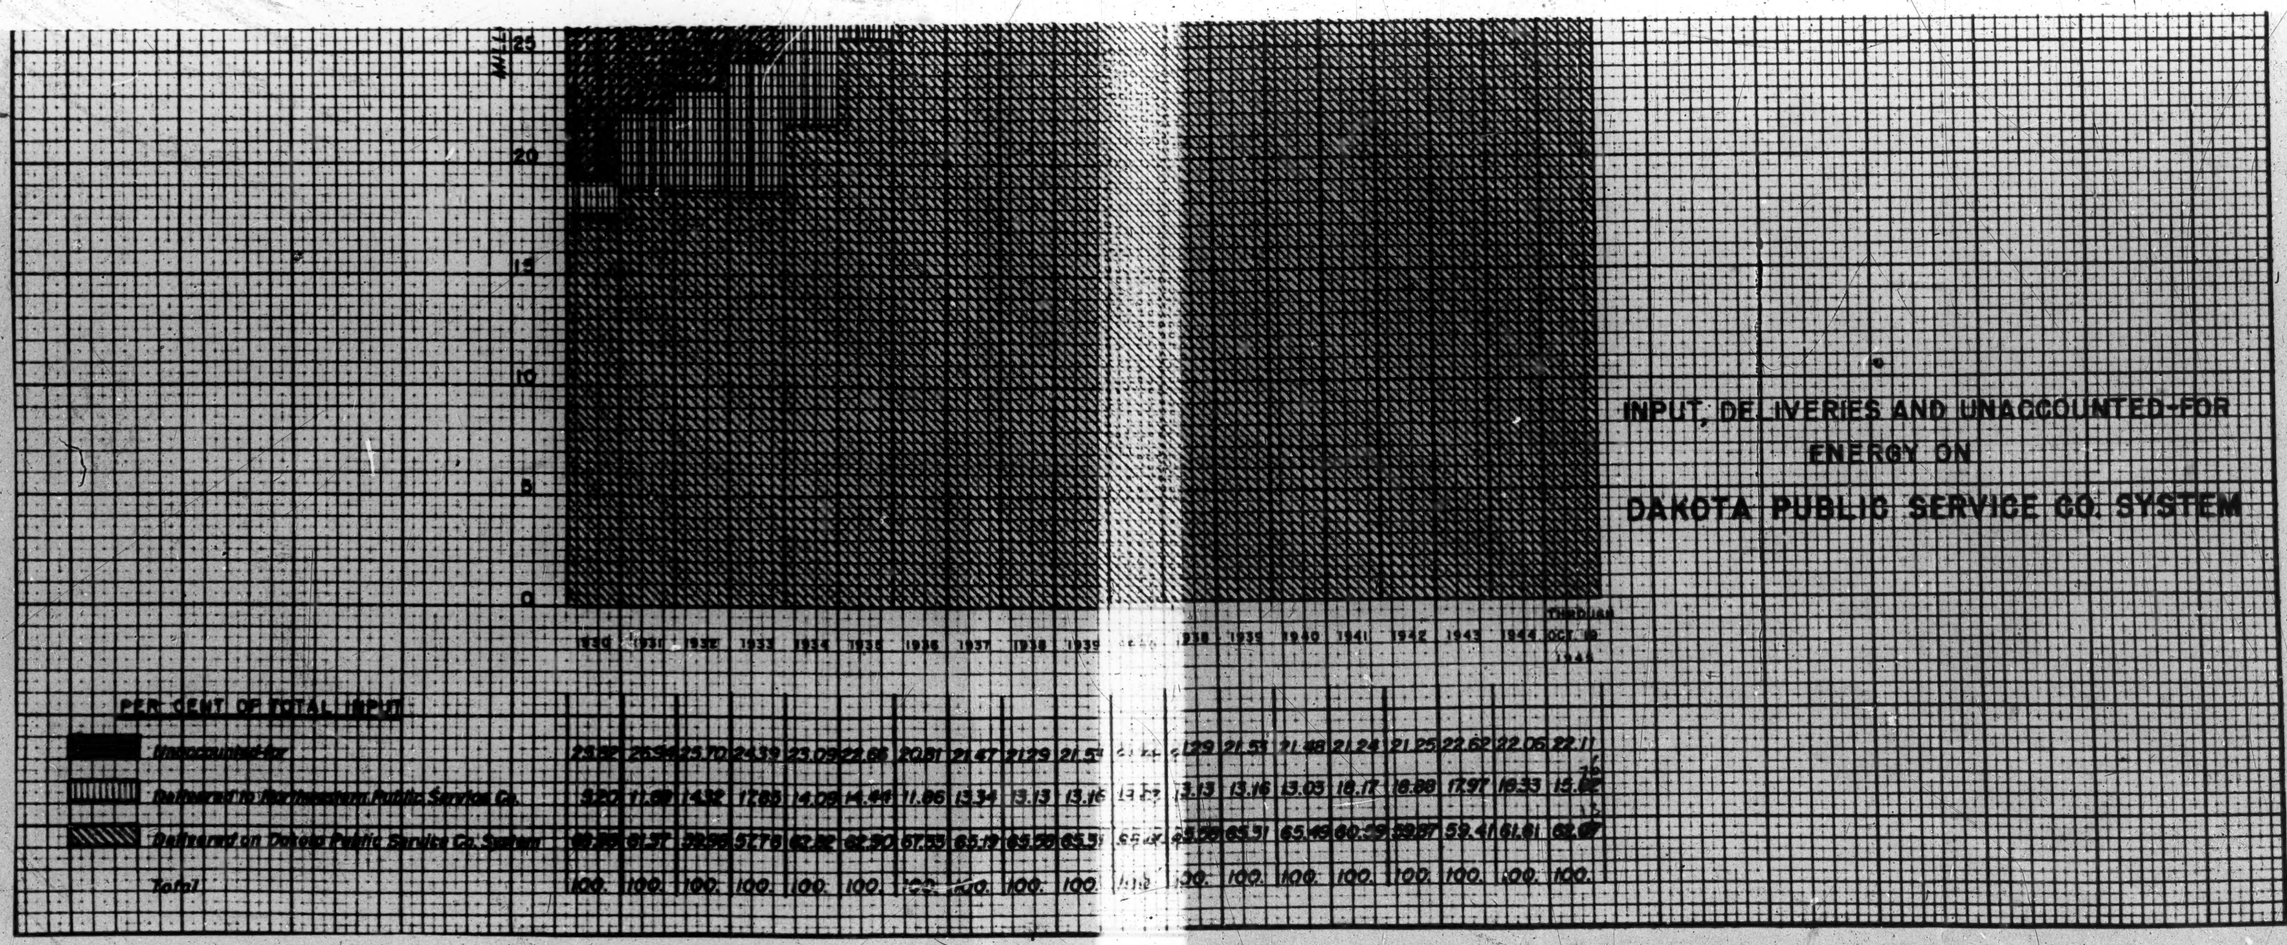
A. The net kilowatt in-put into the Dakota systems is simply the sum totals as are shown in column 5, Exhibit 338-B.

Q. Referring again to 338-A, what is the column headed "KWH delivered and accounted for on the Dakota System"?

A. That is the total of the kilowatt hours delivered on the Dakota system, which was sold or used by the company, or free energy. In other words, it is the amount of energy which was accounted for in deliveries of the Dakota system itself.



Q. The next column is headed "Kilowatts delivered to Northwestern". What is that?



A. That is the gross deliveries to Northwestern which were delivered either through the Aberdeen or Gettysburg bus.

Q. In the next column "Unaccounted for", what do you mean by that?

A. That is the energy which is unaccounted for by deliveries on the system. Namely, it is the difference between the net KWH in-put, the kilowatt hour in-put, less the deliveries on its own system which are accounted for, and its deliveries to Northwestern. This is energy which is not recovered and is lost. It is commonly known as loss in transmission or distribution.

Q. That is merely your computation from columns 1, 2, and 3? A. Yes.

Q. What is intended in the next column to the right?

A. The next column to the right is one of three per centage columns. I have expressed the kilowatt hours delivered and accounted for on the Dakota system, the kilowatt hours delivered to Northwestern, and the unaccounted for kilowatt hours on the Dakota system as a percent of the total in-put. In the first column headed "KWH delivered to ND System" I show the per centage of the total in-put by years that those deliveries were of the total in-put. In the next column headed "Kilowatt Hours delivered Northwestern" I show in per centage the total in-put of deliveries to that company. And in the last column to the right of the page, the unaccounted for is expressed as a per cent of the total in-put for the respective years. The sum of the per centage of the three columns makes 100% of the total in-put.

Q. What is the range in per cent on deliveries to the Dakota system, varied total, from 1930 to October 19, 1945?

A. They vary from 57 to 76.

Q. Are these Exhibits 338, 338-A and 338-B, true and correct reflections of the records and files that you have mentioned? A. Yes.

Q. And insofar as computations are made thereon, are those computations true and correct? A. Yes.

Q. Generally speaking, and referring to Defendant's Exhibit 338, what is the legend at the bottom?

A. In-put, deliveries and unaccounted for energy of Dakota Public Service Co.

Q. In per centages for the years shown? A. Yes.

Q. Are those per centages taken from the tabulations, 338-A and 338-B? A. Yes.

By Mr. Fellows:

Q. From what record did you take the figures in the first column of 338-A?

A. They come—if you will turn to page 338-B. I explained in connection with 338-B those figures come from the operating reports through 1938, and from the Federal

Power Commission reports from 1939 through October 19, 1945.

Q. You took those, yourself, direct from those reports, did you? A. Yes.

Q. Was that likewise true of the figures in column 2? A. Yes.

Q. And all of the columns up to the last three columns on 338-A? A. Yes.

Q. And the last three columns are your computations from those figures? A. Yes.

By Mr. Royhl:

Q. Counsel asked you whether or not the last three columns were your computations on 338-A. I think you stated yes? A. Yes.

Q. How about the column to the left of those three, which I think would be the column entitled "Unaccounted for KW of the Dakota system"?

A. That comes from the record.

Q. Is that a matter of record, or is that a matter of computation from the other three columns?

A. It is a matter of record.

Q. What is the range in per centage of deliveries to Northwestern? A. It varies from 5.2% to 18.18%.

Q. Of what?

A. Of the total in-put into the system for the respective years.

Q. What is the range in per centages of the unaccounted for energy?

A. It varies from 20.81% to 26.94%, of the total in-put into the system for the respective years.

Q. Referring to the graph, Exhibit 338. Is this data the same as shown on the typewritten tabulation, 338-A and B?

A. Yes, this is merely visual portrayal of the same information.

Q. What does the red portion represent on 338?

A. The unaccounted for energy.

Q. Does the yellow show the deliveries to Northwestern?

A. Yes.

Q. What does the blue refer to?

A. The deliveries on the Dakota Public Service Co.'s own system.

Q. Is the line at the top of the red figures the total in-put into the Dakota system? A. Yes.

Q. That is, then, referring to the year 1945, that would be some 56 million?

A. Yes. That is but a part of the year. Up to October 19, 1945.

Q. Now, the figures that appear to the left of the colored section, what do those refer to?

A. They refer to millions of kilowatt hours.

Q. And if you extend that to the right, through the graph, it indicates the amount, does it? A. Yes.

Q. Am I correct in the statement that the blue shows deliveries on [Dakot's] own system in 1930, of approximately 17 million? A. Yes.

Q. That is, that is what they sold to their customers or used on the system?

A. Yes. That was sales, company use and free energy if there was any.

Q. What is the unaccounted for in per centage of total in-put in 1930 and in 1945?

A. It is 25.82% of total in-put into the system in 1930 and 22.11% through October 19, 1945.

Q. 1944, that is a full year. Will you indicate as to that year?

A. The unaccounted for energy in 1944 was 22.06%, of the total in-put into the system that year.

Q. Did that decrease as you go back through the years to 1936? A. Yes.

Q. What was it in 1936? A. 20.81% of the total in-put.

Q. In the graphs there, do the kilowatt hours unaccounted for include both transmission and distribution losses? A. Yes.

Q. Did you hear Mr. Sickel testify? A. Yes.

Q. Did you hear Mr. Sickel say that his determination of transmission losses for the years he used were in excess of the losses you show percentagewise for the year 1941 through 1945? A. Yes.

Q. How can that be?

A. A certain amount of energy is delivered direct into

the distribution system and the losses on the distribution system are lost before they are on the transmission system.

Q. Can you estimate the approximate relative losses?

A. I did. I made a study of that in order to sort of test out the results which Mr. Sickel had as to transmission losses.

Q. Have you an opinion on the accuracy of Mr. Sickel's results on losses? A. Yes.

Q. Did you form an opinion of Mr. Sickel's results on losses from your independent studies of the records you have mentioned? A. Yes.

Q. And do you know whether or not the result shown by Mr. Sickel in his analysis of losses is right or wrong?

A. Yes.

Q. Have you stated the method you used to analyze Mr. Sickel's results? A. No sir.

Q. What method did you use?

A. I took the gross unaccounted for energy which I found for the respective years on the Dakota system. I deducted from that the amount of energy shown in Mr. Sickel's exhibit and that gave me the unaccounted for energy which I attribute to distribution. I have in my exhibit the kilowatt hours delivered and accounted for on the Dakota Public Service Co.'s own system. I added that delivery to the unaccounted for, which I arrived at by the deduction of Mr. Sickel's transmission unaccounted for from my graphs, which gave me the total introduced into the distribution system. I then divided the unaccounted for in the distribution system by the gross introduced into the distribution system, and found the distribution losses to be in 1941, 10.07%; in 1942, 6.5%, in 1943—

Mr. Fellows: That is not responsive. We move to strike it out.

The Court: It may go out.

Q. Will you state the results you obtained from the method you have just narrated?

A. The distribution losses in per cent of total in-put into the distribution system in 1941 were 10.07%; in 1942,

6.5%; in 1943, 8.57%; in 1944, 8.03%; and in the period up to October 19, 1945, 10.16%. This latter figure is possibly slightly off because, as I have written it I have the complete unaccounted for for the entire period through October 19, 1945, and Mr. Sickel's per cent did not include the last nineteen days, so the 10.16 may be slightly high on that account.

Q. You include 19 more days in 1945 than Mr. Sickel did? A. I did in my gross unaccounted for.

Mr. Benson: Will you tell us, Mr. Royhl, what he said this percentage ranging from 10 to something? They were what?

Mr. Royhl: On distribution, on the system's own distribution, the North Dakota companies.

Mr. Benson: The distribution system or Dakota companies' property?

The Witness: Yes.

Q. Now, do you know, Mr. Learned, whether or not these results that you have recited, losses on distribution on the Dakota companies' own system, whether or not they are true and correct? A. Yes.

Q. Are they?

By Mr. Fellows:

Q. How do you know [they]?

A. I would like to explain that because I tested their reasonableness—

Q. Let me get at it a different way, to save a speech from you. When you say you know they are accurate you are testifying from information you received from Sickel's and Sickel's reports? A. Yes.

Mr. Fellows: We object to the question as calling for hearsay; not the best [eividence]; the witness is incompetent; the evidence is incompetent; no proper foundation laid.

The Court: Sustained.

By Mr. Royhl:

Q. Do you know whether or not losses are different on distributions by the system to its own customers, from the [lossed] upon the transmission lines? A. Usually, yes.

Q. What is the fact concerning that?

Mr. Fellows: Just a minute. You got this same information from the same source as you did that which I inquired about a [minutes] ago?

The Witness: No.

Mr. Fellows: Where did you get this information?

The Witness: My general knowledge of distribution losses and transmission losses.

Mr. Fellows: Where?

The Witness: As my many studies [or] properties.

Mr. Fellows: On systems all over the country except this system?

The Witness: Yes.

Mr. Fellows: Objected to as incompetent; no proper foundation laid.

The Court: I think that objection is well taken. We are not interested in anything but what the losses on this system are. The losses on this system may be a great deal more than they are on some other system. I think the objection is well taken. Sustained.

By Mr. Royhl:

Q. Did your study include a study of losses upon the distribution on these systems? A. Only by this deduction.

Mr. Fellows: From Sickel's?

The Witness: Yes.

Q. Do you know whether or not a varying of loads effects losses upon transmission lines, that is, in relation to loads upon transmission lines? A. Yes.

Q. What is the fact concerning that?

A. In a specific line of specific size, if a larger amount of energy, that is, if the rate of delivery is higher the losses will be greater. That is, if you were to send energy over the line at the rate of 100 kilowatt hours per hour, the losses would be greater if you sent 200 kilowatt hours over the same line.

Q. In other words, if deliveries are being made to the defendant company by the Dakota companies during off peak times, would the loss be as great as it would be if those deliveries were attempted in on peak times?

A. Probably they would be less in off peak than they would be in on peak.

Q. You have referred in answer to one of counsel's questions to a so-called study made by Mr. Sickel. Do you refer to Defendant's Exhibits 331 and 331-A (R. pp. 1695 and 1697 supra)? A. Yes.

Q. Now, with respect to Exhibit 331, I observe that there is a five year period average loss on transmission of 23.1%. Does this graph of yours, Defendant's Exhibit 338, show any average for a five year period? A. No, sir.

Q. I observe that the Exhibit 331, this Sickel study, shows loss for the year 1945 of 23.1. You say that only is to October 1 of that year?

A. I think that is right. Just let me refer to the exhibit. It is to October 1 of that year, yes.

Q. And your study to and including October 19th?

A. Yes.

Q. What does your study show of the 1945 loss?

A. Mine is 22.11% because mine is all losses on the system as expressed in per cent of the total in-put into the system.

Q. Is that true, comparatively, of the other years shown in the Sickel study and in your study, 338?

A. Yes.

Q. Now, let me briefly refer to your own Exhibit 338 again before we leave it. The graph which is colored in blue shows by years which are designated at the bottom of the blue, the energy that was delivered on the Dakota system? A. Yes.

Q. You mean that was actually sold and accounted for? A. Yes.

Q. I observe on the legend at the bottom of [Defendant's] Exhibit 338, certain percentages which are extended below your tabulation of years. Have you stated to what that refers? A. Yes.

Q. You have already stated concerning that, have you? A. Yes.

Q. Referring again, did any part of that data, was any part of that data in those exhibits taken from the Sickel set-up? A. No sir.

Q. Now, in the electric utilities business, what is meant by a power pool?

A. A power pool is an arrangement of operations between one or more systems by which the power generating system facilities are pooled and operated as a single system, getting the benefits of the installed capacity for the various members of the pool. This operation results in a saving over-all in the necessity of the amount of generating equipment required and in a saving in operation costs.

Q. Will you explain in what way there is a savings in generation equipment?

A. If the companies are to be separated it is necessary in order to have a firm system within itself that there be sufficient excess or spare capacity that the peak load could be carried if the largest generating unit of the particular system were out of commission, or shut down. When you join together one or more systems the system is considered firm if there is sufficient excess or spare capacity so that the peak of the combined systems could be met if the single largest unit in the group of properties were out of commission.

Q. Have you made a study and are you familiar with the interchange capacity contracts which are exhibits to

and attached to Plaintiff's Complaint as Exhibits C, E and F? A. Yes sir.

Q. Have you made a study of the operation of the interchange capacity contracts as involved in this litigation? A. Yes.

Defendant's Exhibit 339 was received in evidence. It is as follows:

Def. E. 339

TABULATION OF OPERATION OF INTERCHANGE CAPACITY CONTRACTS (POOLING OF GENERATING FACILITIES) DAKOTA PUBLIC SERVICE COMPANY AND NORTHWESTERN PUBLIC SERVICE COMPANY

	1938	1939	Jan. 1 to Aug. 31 1940	Sept. 1 to Dec. 31 1940	1941	1942	1943	1944	Thru Oct.19 1945
(1) Company Generating Capacity in Kilowatts									
Dakota Public Service Co.			10,955	13,955	13,955	13,955	13,955	13,955	13,955

NOTE:
LOWER HALF THIS PAGE NEXT FRAME

Defendant's Exhibits 340 and 341 were received in evidence. They constitute the Annual Supplements to the 1938 Interchange Capacity Agreement and are also known as the Exhibits "B", "C" and "D" respectively. They set forth the same type of information for the calendar years 1938 and 1939 as that contained in the Annual Supplements included in Plaintiff's Exhibit 31 (R. p. 301 supra).

Q. What has been the source of that study?

A. The principal source of study was the supplement, I think known as Exhibit D, filed by the operating committee of the joint companies, forming the basis for the interchange capacity charges for the several years during the operation of the contract. That has been the principal source. Some of the data on it has reference to load diagrams.

Q. Is the paper marked Defendant's Exhibit 339 that study that you made? A. Yes.

Q. Have you completed your statement as to what this study is predicated upon, or the source of it? A. Yes.

Q. Is your [studay], Defendant's Exhibit 339, taken from those exhibits that you hold in your hand?

A. A considerable part of it is, yes.

Q. What isn't taken from those exhibits, does that constitute computations by yourself? A. Yes.

Q. Does this Exhibit 339 reflect a true and accurate computation of those figures? A. Yes.

Q. And tabulation of those figures? A. Yes.

Q. Now, referring to Exhibit 339; will you [explaint] the column across the top of the page with the numeral (1)?

A. (1) is the company generating capacity in kilowatts for the Dakota Public Service Co. and Northwestern, or North Dakota Power & Light and Northern Power & Light, for the respective terms in which the supplement to the interchange capacity contract as determined by the operating committee applied. All these figures under each column are the total in kilowatt hours as established by that committee in its contracts, used in connection with the determination of the deficiency or excess of the reserve

capacity of the respective companies. These data are shown for the respective years in the exhibits listed. Each of these yearly reports by the operating committee have their sheets numbered by a letter designation, such as "B", for a number of the later years, and for some of the prior years there was B1, B2, B3, B4, C and D. The information in this portion (1) occurs on different sheets at different years. For instance, 1938, the data can be found on B4. 1939, two readings in 1940 and 1941, on Page D. And the readings for 1942, 1943, 1944 and 1945, on sheet B of those exhibits or contracts.

Q. Subdivision (1) for the years shown at the top of the page refer to the several generating capacities of the interconnecting companies? A. It does.

Q. What does the word "Total" and the figures to the right thereof, refer to?

A. The total of the generating capacity in kilowatts of the interconnected companies.

Q. Of the combined systems? A. Yes.

Q. Now, referring to (2). Will you explain that?

A. (2) is company system maximum demand in kilowatts of the interconnected system at the time of the coincidental system peak, and is taken from these several exhibits in the report of the committee on operations and is given for the four companies involved through the period 1938 to 1945.

Q. Does that show the demand of the several companies in the combined system as of the years shown?

A. The peaks were determined in the prior years and applied to the year at the head of the column.

Q. That was under the contract? A. Yes.

Q. And those reflect the prior year's demand? A. Yes.

Q. I notice in the years 1938 and 1939 you show the North Dakota Power & Light Co. and Northern Power & Light Co., and those demands are items by themselves?

A. Yes.

Q. Including, of course, the defendant company? A. Yes.

Q. What does the word "Total" following that refer to?

A. That refers to the total of the several company system maximum demands.

Q. That then constituted for the year shown the maximum demand in kilowatts of the combined system?

A. Yes, the coincidental peak.

Q. Now, the subdivision there that is indicated at (3) on the left for the years shown. What do they refer to?

A. That refers to the company's reserve capacity in kilowatts, and reserve capacity is the difference between the generating capacity in kilowatts and the company system maximum demand for the respective companies.

Q. Now, to clarify that and applying it to the Northwestern, that company's generating capacity in subdivision (1) is 19,485? A. Yes.

Q. And you deduct from that the figure shown in subdivision (2) and the company system maximum demand for the year, Northwestern, 13,915? A. Yes.

Q. In deducting that figure, No. 2 from No. 1, do you get the result shown in subdivision (3), 5570? A. Yes.

Q. And that reflects what?

A. The company's reserve capacity in kilowatts.

Q. Is the same thing true of the other companies specifically named in subdivisions 1, 2 and 3? A. Yes.

Q. What is meant by the word "Total" and the figures opposite the word "Total" in subdivision (3)?

A. It is the total reserve capacity of the interconnected companies.

Q. What is meant by subdivision (4)?

A. (4) is a calculation which I made and is simply the companies system demand expressed as a per cent of the interconnected demand. That is, in (2), each item in (2) for instance, under the column 1938, 13,915, divided by the total in (2) 23,855, and that gives the results in (4) 58.331.

Q. Then the defendant company's system demand in per cent for the year 1938 was 58.331%?

A. Of the total coincidental system demand.

Q. And that is true of the other companies? A. Yes.

Q. I observe that as applied to Northern Power & Light Co., they had a minus 950 in subdivision (3). What does that indicate?

A. That means a shortage of capacity to meet their own demand.

Q. That is, they actually had larger demand at coincidental peak than what they had capacity for? A. Yes.

Q. Their demand exceeded their capacity by 950 KWH?

A. Yes.

Q. And that appears also in the column for 1939 in the amount of 1414? A. Yes.

Q. And that is arrived at in the same way? A. Yes.

Q. What is set forth and expressed by the column (5)?

A. That is a comparison of the allocated portion of the total generating capacity and the installed capacity of the respective companies which gives the net results by which one can determine the deficiency or excess of reserve capacity of each particular company.

Q. For the years shown at the top of the page? A. Yes.

Q. Now, as applied to Northwestern Public Service Co., the defendant, what does that show for the year 1938?

A. In 1938 that shows 1720. If I might explain that, that differs 20 kilowatts with the calculation carried on the operating committee's report, and that results from a carrying out of percentage in my calculation in (4) to a greater length in percentage, and it shifts the 20 kilowatts. That part is changed from what shows in these exhibits here.

Q. You show it 20 KW more?

A. I show it more by these added—

Q. Applying it then, they collected only for 1700 and according to your figures they should have collected for 1720?

A. Carried out apparently as far as was carried through the rest of the years, yes.

Q. I notice that you determined there in subdivision (5) that the defendant company had an excess or reserve capacity of 1720? A. Yes.

Q. At that time the combined system included this defendant and also the North Dakota Power & Light Co. and Northern Power & Light Co.? A. Yes.

Q. What was the capacity of North Dakota Power & Light Co. as shown by this tabulation?

A. My tabulation shows an excess or reserve capacity of 5. However, the exhibit shows it as the same. There being no reserve capacity.

Q. Shows a balance? A. Yes.

Q. In other words, the North Dakota Power & Light Co. for the year 1938 would have no money coming and would owe no money? A. Yes.

Q. Under the operating committee's report? A. Yes.

Q. Now, applying it to Northern Power & Light Co. for the year 1938, what is shown by this Exhibit 339?

A. It shows in 1938 a deficiency of Northern Power & Light Co. of 1725, which, as I stated before, was due wholly to the difference in percentage dropping point. Came out 1700 in the committee's report.

Q. Then, under that, the Northern Power & Light paid to the defendant for 1700 deficiency of reserve capacity under the combined system? A. Yes.

Q. Do you show on this list the date of maximum demand for the combined systems?

A. Yes. That is shown under (7), as recorded by the committee having this determination in charge.

Q. The operating committee? A. Yes.

Q. What is meant by this sub-division (6)?

A. (6) is a development resulting from the contract of 1941.

Q. That is Exhibit F under the complaint?

A. Yes, I believe that is the correct number. In that contract it provided that the reserve capacity that a company could have or be charged for in case of deficiency, that its total could not exceed one fourth of the peak load. That was operative in 1943 and 1944. If you will note under (5) the results, if that clause had not been in effect, would have increased the amount chargeable to Dakota Public Service Co. in 1943 from 645 to 1476, and in 1944, from 757 to 2208.

Q. That is, if it had not been for this 25% limitation which appears in the 1941 contract, the Dakota company would have paid for 1476 in 1943 instead of 645? A. Yes.

Q. And in the year 1944 would have paid for 2208 KW instead of 757? A. Yes.

Q. Now, going back again to sub-division (5) I notice under Northern Power & Light Co. you have an allocated capacity of 3575. Where do you get that figure, for 1938?

A. That is my calculating, taking the per centage shown in (4).

Q. 11.738 for Northern Power & Light Co.?

A. Yes. Multiplying it by 30455, or the gross capacity of the system.

Q. That figure is shown as the total in sub-division (1) of the generating capacity? A. That is correct.

Q. And that 11.738%, 30755 is designated as allocated capacity?

A. That is by my calculation. That is the one that differs with the one that the committee filed, which is 3550 due to extended per centages.

Q. And the installed capacity as 1850, that is the same figure that appears in sub-division (1) opposite Northern Power & Light? A. Yes. Its own generating capacity.

Q. Its own generating capacity on its own system?

A. Yes.

Q. Now, sub-division (8). Just state generally what that refers to?

A. Sub-division (8) shows annual charges or amount paid for deficiency of reserve capacity at $13.20 per year per kilowatt of reserve capacity, and as stated before, in the case of 1938, 1700 times $13.20, gives us $22,440. I want to call your attention to the column 1939 under (8). I have Northern Power & Light Co. and North Dakota Power & Light Co. $8263.20, which is the figure called for in D of the exhibit, but those companies were merged in that year, and this is the total had it gone through the entire year. Therefore, payments were probably cut off at that time, after it shows on the exhibit.

Q. Then, as I understand it, going back to the year 1939, as shown by sub-division (5), Northern Power & Light Co. had a deficiency of capacity of 2000 KW?

A. Yes.

Q. And both of the other systems, the defendant and the North Dakota Power & Light Co. had an excess of reserve capacity, did they? A. Yes.

Q. And as a result thereof did the Northern Power & Light Co. pay to the North Dakota Power & Light Co. $8263.20?

A. Had they been separate companies through the year that would have been the result. However, they were merged, I think July 1 of that year, consequently I think that was discontinued.

Q. And you separated that according to computations?

A. This $8263.20 would have been the result had it lasted the entire year as separate companies.

Q. And the Northern Power & Light Co. under that computation paid the defendant, $18,136.80? A. Yes.

Q. After 1939 you then show the Dakota companies as a merged company, the Dakota Public Service Co.?

A. Yes.

Q. Referring to the paragraph, sub-division (9). To what do you refer there?

A. That is use of reserve capacity at the time of the coincident peak, Dakota Public Service Co. That simply shows the in-put into the Dakota Public Service Co., and what was flowing from them into the Northwestern in case of a minus amount at the time of the coincidental peak demand of the system.

Q. Will you explain that more fully?

A. Take the last year, through October 19, 1945. You will note, under 5, the Dakota Public Service Co. 1742, an underlined figure.

Q. That is, they had a deficiency of reserve capacity of 1742?

A. Yes, that is, on which they were billed. It happens at the time of the peak demand that they drew 1922 kilowatts from this company. The same, by the way, wherever you see a figure in any column which is underlined as a deficiency, that is the figure that was used in scheduling the amounts of payments for the periods shown. Now, in 1944 they only had to pay for 25% of their peak load based on deficiency, or rather, they didn't have an excess capacity in excess of 25% of their peak load, and in order to have that, they paid for 757, and this shows at the time of the coincident peak load of that year, they drew 1510. Now, in that connection you note that the peak governing in 1944 was the peak of 1943 and, of course, when this occurred they were re-establishing a basis for the subsequent year's contract. It shows how these estimates of power were established by the individual companies. In the case of 1943 they paid for 645, and at the time of the coincident peak they didn't [used] but 70. In the case of 1942 they paid on the basis of 1303, and they were deriving power sold on the basis of 150 kilowatts at that time. In the case of 1941, the Dakota Public Service Co. paid for 324, and at the time of the coincident peak demand they received 320. In the case of 1940, the Northwestern Public Service Co. was paying on the basis of 213 at the end of that year, and they furnished the

Comparison of Allocated Portion of Total Generating Capacity and Installed Capacity of Respective Companies (Cont'd)

North Dakota Power & Light Co.		
Allocated Capacity	9,115	8,554
Installed Capacity	9,120	9,180
Deficiency of Reserve Capacity		
Excess of Reserve Capacity	5	626
Northern Power & Light Co.		
Allocated Capacity	3,575	3,775
Installed Capacity	1,850	1,775
Deficiency of Reserve Capacity	1,725	2,000
Excess of Reserve Capacity		

(6) 25% of Company System Maximum Demand in Kilowatts and Deficiency in Reserve Capacity in Kilowatts

Dakota Public Service Co.(25% of Peak)	2,930	2,943
Dakota Public Service Co. Deficiency	645	757

(7) Company System Maximum Demand

Date / Time	Dec.21-1937 5:30 to 6PM	Dec.20-1938 5:30 to 6PM	Dec.19-1939 5:30 to 6PM	Dec.19-1939 5:30 to 6PM	Dec.18-1940 5:30 to 6PM	Dec.15-1941 5-6 PM	Jan.7-1942 6-7 PM	Dec.22,1943 6-7 PM	Dec.21-1944 6-7 PM

(8) Amount Paid for Deficiency of Reserve Capacity at $13.20 per year per Kilowatt

D.P.S.Co. to N.W. P.S. Co.			12,685.20		4,276.80	17,199.60	8,514.00	9,992.40	22,984.40
N.W.P.S.Co. to D.P.S. Co.				2,811.60					
N.P.&L.Co. to N.D.P&L.Co.		8,263.20							
N.P.&L.Co. to N.W.P.S. Co.	$ 22,440.00*	18,136.80							

(9) Use of Reserve Capacity at the time of Coincident Peak Demand in Kilowatts

Dakota Public Service Co.	745	320	150	70	1,510	1,922	

Note:

(3) Company Reserve Capacity in Kilowatts is equal to (1) Company Generating Capacity in Kilowatts less (2) Company System Maximum Demand.
(4) Company System Demand in Percent of Total Maximum Demand is Total for each Company in (2) divided by total of (2).
(5) Allocated Capacity is the result of multiplying percent in (4) by total in (1).
(6) This is 25% of total for Dakota peak and deficiency is determined by deducting from such amount the Dakota reserve capacity shown in (3).
(8) The amount shown is determined by multiplying underlined kilowatts in (5) and (6) by $13.20 per year or portion thereof represented by period covered.
(9) Shows use of Reserve Capacity by Dakota Public Service at time of System Coincident Peak.

* Amount calculated on basis of 1700 kw @ $13.20.

23514

Dakota Public Service Co. 745 on peak. This is just a representation of the purpose of the excess capacity contract. In other words, once a year—

Mr. Fellows: Just what question is before you?

Q. Will you explain that as to its application to the power pool relationship between these companies?

A. This excess capacity was determined by the operating committee once a year at the time of the coincident peak of the prior year to be applied to the following year. Any excess capacity, you put the excess that is indicated that each of the companies have at the time of the coincident peak of one or more systems into a pot, as we might say. Then we determine how much each of the companies have to carry their proportionate part. In other words, the excess capacity is then prorated as to the need of the company, and the campany under these contracts is expected to carry his ratio of the maximum peak of the excess capacity. For instance, if one company had 2000 kilowatt peak, and another one had 1000, and another one 1000, so there was three altogether, then the one having 2000 peak would carry 50% and the excess capacity would be charged against it, and each of the others would carry 25%. It doesn't mean that either one of the companies can draw on that excess capacity.

Mr. Fellows: I object to that. He is asking him to explain something from this document.

Mr. Benson: You are asking him about power pools, generally? Are you asking him to interpret the contract, or just talk about power pools generally?

Mr. Royhl: I am asking him to talk about the application to this Exhibit 339.

Mr. Fellows: Of what?

Mr. Royhl: Power pools.

Mr. Fellows: All over?

Mr. Royhl: This power pool.

Mr. Fellows: That is the reason I make the objection, it is not responsive at all.

The Court: I think it was explanation of the exhibit that has been introduced here. I think the objection is well taken.

Q. Have you explained as to how the Dakota Public Service Co. deficiency was arrived at for the year 1943 and 1944? A. Yes.

Q. I note that for the year 1940, you have two columns. Is that correct? A. Yes.

Q. And as applied to the column, September 1 to December 31, 1940, there is a minus 213, or a deficiency of reserve capacity for the defendant company? A. Yes.

Q. Where do you show what amount was paid by the defendant company for that deficiency or reserve capacity? A. Down under (8). $2811.60.

Q. Did I ask you if line 7 indicated the date of the coincident combined system peak?

A. If you didn't, I can say it does.

Q. Do you know, under the practice of electric utilities industry, the reasonable rate or charge per kilowatt of capacity, under the power pool contract? A. Yes.

Q. What is the reasonable rate or charge?

Mr. Fellows: We make the same objection.

The Court: If he knows he can answer.

A. My experience is that the charge on the one most like this with which I have had experience is the same charge as this.

Mr. Fellows: We move to strike the answer for all of the reasons given in the objection.

The Court: Sustained.

Q. Will you give it in dollars and cents.

Mr. Fellows: Same objection.

The Court: Overruled.

A. $13.20.

Mr. Fellows: We move to strike the answer for the purpose of objection.

The Court: It may go out for the purpose of objection.

By Mr. Fellows:

Q. What particular power pool were you referring to when you made your answer? A. Commonwealth Edison.

Mr. Fellows: We move to strike the answer for all of the reasons given in the objection; immaterial; no proper foundation laid.

The Court: It may go out.

By Mr. Royhl:

Q. Do you know how the KW value is computed or based under the contract involved in this litigation?

A. Yes.

Q. Have you prepared and made a study of the kilowatt values of the generating capacities in the combined system of these companies?

A. I have of the Northwestern Public Service Co.

Q. That is the defendant company? A. Yes.

Q. And do you know what those values are? A. Yes.

Q. Mr. Learned, from your knowledge, education and experience, do you know what a fair charge for reserve capacity in this territory during the years 1938 to 1945, inclusive, was? A. Yes.

Q. What was that charge?

By Mr. Fellows:

Q. Did you make an [installations] of the kind which you impute to the question Mr. Royhl just asked you, during any of the period embraced in the question, in the territory in which you assume he is asking about?

A. No, I think not. Not in South Dakota.

Q. Do you know what territory he is referring to in the question? A. I think I do.

Q. Do you know the conditions under which the installations were made which you assume are included in the question?

A. I have seen the results of the installations. I have been in a number of plants.

Q. For what period of time are you attempting to answer the question? A. For a period from 1935 on.

Q. Do you know what kind of installations, specifically, he is asking about?

A. I take it he is asking about installation of the character on this property.

Q. Have you ever seen the installation on this property?

A. Yes.

Q. Did you ever see the installations you assume he is asking about in the questions to you?

A. I was not there when they were installed. I have seen the plants in operation.

The Court: They are not asking about the cost of the installation. That is not the way I understood the question. Read the question.

Q. (Read) "Mr. Learned, from your knowledge, education and experience, do you know what a fair charge for reserve capacity in this territory during the years 1936 to 1945, inclusive, was? A. Yes.

"Q. What was that charge?"

The Court: It is a charge for reserve capacity.

Mr. Fellows: We object to that as no foundation.

The Court: He has testified that he knows.

By Mr. Fellows:

Q. How do you know? A. My business is studying rates.

Q. I am not asking your business of studying rates elsewhere. I said, how do you know in relation to this particular property?

A. Because properties of certain size have certain costs installed, and they do not vary a tremendous amount from section to section in a range of territory.

Q. Do they vary with conditions?

A. Somewhat. Some elements do. But the installation of a power plant of a certain size will run in certain range per KW.

Q. You are basing your testimony on the general knowledge you have had from experience in other places?

A. On my general knowledge over-all, together with my having visited these plants, some of them, the larger ones, and my engineering experience in appraisal and valuation and rate work.

Q. You can look at a plant and tell what it cost, can you?

A. I can't to the exact dollar. I don't know just what

I will find on appraisal. In [appraisale] we go out and study each one, but they have a general zone of cost.

A. At least $13.20.

Q. Per kilowatt? A. Per kilowatt for excess capacity.

Q. Is that per year? A. Yes.

Q. Did you hear Mr. Helmick's testimony for the plaintiff? A. Yes.

Q. To the effect that in his opinion, that the interchange capacity contracts had no value to the Dakota Public Service Co. and its predecessor companies? Did you hear that testimony? A. Yes.

Q. Do you have an opinion with respect to the value of the interconnection facilities contract between these companies and to the Dakota Public Service Co.? A. Yes.

Q. And its predecessor companies? A. Yes.

Q. What is that opinion?

A. I think it does have value to both companies.

Q. It is of actual benefit, is it? A. Yes.

Q. What is the difference in the expression KW, and the further expression KWH, or kilowatt hours?

A. KW, when it describes capacity, represents amount. In other words, KW is the rate, and the kilowatt hour is the rate delivered over the time. Kilowatt hour, to be technical, is a thousand watts in an hour. KWH is a quantity of energy.

Q. And KW is more particularly a capacity of development? A. Yes.

Q. Do you know, Mr. Learned, the usual and ordinary charge made for fixed charges of rentals in connection with interconnection facilities? A. Yes.

Q. Do you know that for the years 1936 to 1945, inclusive? A. Yes.

Q. What is a reasonable charge or rental for interconnection facilities, for the years 1936 to 1945, in the territory of North and South Dakota and adjacent territory?

A. 12% on investment plus operating expense.

Q. And what per centage for operating expense, approximately?

A. That may amount to possibly one or one and a half. Not to exceed that. I think one per cent.

Cross Examination, by Mr. Fellows.

Q. Will you refer to Exhibit 339, your tabulation? Have you that there? A. Yes.

Q. Referring to the 9th item, use of reserve capacity. Do you have that? A. Yes.

Q. I noticed in your direct examination that you testified to items 1940 to 1945, inclusive, did you not? A. Yes.

Q. And you failed to testify to the items of 1938, 1939 and 1940. Is that right? A. That is correct.

Q. Tell me this. On your tabulation, Exhibit 339, under that paragraph (9) you were explaining, isn't it a fact that in the years 1938, 1939 and 1940, the Northern Power & Light and the North Dakota Power & Light, paid to Northwestern, a total of $53,262.00, made up of the items of $22,440.00 for 1938, $18,136.80 for 1939, and $12,685.20, for the year 1940? A. Yes.

Q. And took no kilowatts during those years or any of those years on the peak?

A. I do not know that, or I would have put the figures in.

Q. You didn't even try to ascertain that, did you?

A. Yes, I did.

Q. Why didn't you ascertain that?

A. I could not find any data.

Q. They furnished you the books and records of the company for that purpose?

A. Yes, but as I understand the 1922 and 1510 were from some load diagrams, and I could not find any such information on load diagrams prior to that time.

Q. Those figures were taken for those three items, wasn't they? A. Yes.

Q. When did you start to work on this case?

A. I was in Huron the week of November 18, 1946. I think I arrived in Mitchell and went up to Huron the 19th of November, 1946.

Q. Is that the first contact you had with the case?

A. Yes.

Q. Were you sent there by your employer, Black & Veatch? A. Yes.

Q. At the time they sent you up here had they shown you the pleadings in the action? A. No, sir.

Q. Did they tell you what you were coming up here to prove or disprove?

A. No, sir. Mr. Sanborn came to our office and I had a conversation with him and he said he would like to have me call first on the attorney in Chicago, who advised me they wanted to know what the facts were.

Q. Mr. Sanborn first contacted you in Kansas City?

A. He contacted Mr. Black and Mr. Black called me in to meet with Mr. Sanborn.

Q. He is president of the defendant company? A. Yes.

Q. He had you go see the lawyers in Chicago? A. Yes.

Q. Did they show you the pleadings?

A. I don't recall at the time that they did.

Q. Did they tell you what they wanted to prove or disprove in this case?

A. No, sir. We don't do business in that way.

Q. Did they tell you what they wanted you for at all?

A. They said they wanted to find out what our idea was, whether there was a reason for the case.

Q. Your idea of what? A. Engineering facts.

Q. Did they tell you what they wanted you to find out an idea about?

A. They told me, generally, what the case was, I believe in district court here at that time. But when I got to Huron I think I had opportunity to read those pleadings.

Q. When you talked to Sanborn in Kansas City and when you talked to the lawyers in Chicago, they didn't tell you what the case was about, even?

A. Only in a general way.

Q. Did they tell you what the claims of the plaintiff were and what the defenses of the defendant were alleged to be?

A. I don't recall that there was anything said about the defense. As I recall it, they told us the general problem, they were being sued for about half a million dollars by a company which had purchased a property they had prior operated under joint management and which, at one time, when they first took over, was owned, I think, by a common owner who had requested them to take it over and operate it. We were approached and certainly asked to find out what we thought the facts showed.

Q. Did they tell you what they wanted you to do out here?

A. Yes. Find out facts from an engineering standpoint and give them an idea of what it meant.

Q. Had you ever worked for the defendant company before?

A. I think only once. I believe our firm made an appraisal of the Columbus, Nebraska system, when it was condemned by the Public Power Districts in Nebraska, around 1938, or somewhere in that neighborhood.

Q. That is the only work you know of your company or yourself having done for the defendant? A. Yes.

Q. Have you put in your time since November 19th on this job? A. Oh, my, no.

Q. Have you been an expert witness for utility companies before this time? A. Yes.

Q. Many times?

A. I don't know what would be considered many. I have probably testified once, possibly some years twice, some years not at all.

Q. Over this period from 1910?

A. I haven't done much testifying—I think the first testifying was about 1927 or 1928. Then I have testified a number of times since.

Q. From these different places you have worked, from Florida to Minnesota? A. Yes.

Q. You are the man Black & Veatch send out as an expert witness, are you?

A. I used to work largely as an assistant to Mr. Black, and in recent years he hasn't been going out and doing testifying, and I have taken over in a number of cases.

Q. You are the man out of over 300 employees in the office who they sent out as an expert witness?

A. No, we have others.

Q. How many others?

A. Mr. Veatch goes out. Some of the electrical men have gone out at different times, if it is a very technical problem sometimes the electrical men will go out. If it is a matter of this character generally I do the testifying.

Q. This is an electrical job? A. Certainly.

Q. Do you know why they didn't send an electrical man out?

A. Because they asked me to come, I suspect, because my work for the last fifteen or sixteen years has had to do with rates, appraisals, investigations and opinions of a general nature in utility operations, and revenues, returns,

rate structures analyses, and consequently I expect I had probably had more experience and was better fitted.

Q. You had testified oftener than the others. Is that it?

A. I wouldn't say that.

Q. What is the fact?

A. I just don't know whether they have testified more than I have or not, some of them.

Q. In addition to having been in Huron have you been over any other part of the defendant's system at all?

A. I went to the Mitchell plant. I was up to Aberdeen. I drove up to Barnard. I drove out to Ipswich along the line, and then I cut across down to Gettysburg and towards Highmore. Between Gettysburg, however, and Ipswich, I did not follow the transmission line because it was not close to the traveled road.

Q. Did you go up into North Dakota? A. No.

Q. Have you been over any part of the plaintiff's system or the system of its predecessors in North Dakota?

A. Not over the system as a property, no, sir.

Q. Ever inspect any part of their system? A. No.

Q. You worked from the figures and the information that the defendant's officers and regularly employed engineers and their attorneys gave you to build up a result?

A. Oh, no. I went to solid data. The Federal Power Commission reports are sworn to and are now regarded in the industry as probably the most reliable source of information as one gets into a company. I used that sort of information and I also went to the defendant and I got some collected information that brought some of the information carried in Federal Power Commission data into a little more convenient form for review. So I was able to satisfy myself on the problem.

Q. Mr. Expert, you testified this morning that the major portion of the figures you had on one of your exhibits were figures furnished you by Mr. Sickel, didn't you?

A. That was just some figures that are in evidence here and which I didn't realize; and they only had to do with one deduction I made, and it had nothing to do with the exhibits I put in. The exhibits I put in come from source data which I think are unimpeachable.

Q. You haven't any interest in this case, have you?

A. No, sir.

Q. With the exception of getting paid for your services?

A. We will be paid irrespective of the results and at the same rate, whether we win or lose.

Q. Did these attorneys and officers of the company give you information to work on as you went along and looked over the various contracts?

A. No. I was surprised at how much they asked me for information.

Q. Did they tell you about dual officers and directors entering into contracts?

A. I knew that was one of the pleadings. I had a copy of the pleadings.

Q. Did they tell you the fact of the control by the defendant of the load dispatchers?

Mr. Royhl: Objected to as assuming facts not in evidence; not proper cross examination.

The Court: This man comes here as an expert. Within reasonable limitations the objection will be overruled.

Q. Did they tell you about that? A. Yes.

Q. That the defendant kept control of the load dispatchers? A. That is just common—

Q. I asked you if they told you?

A. No, they would not tell me that sort of thing because I would not believe it.

Q. You would not have believed it? You would have thought it was outrageous? In the utility business you would have thought that was an outrage, for the defendant to keep control of the load dispatcher where they were operating two separate systems under joint control?

Mr. Royhl: Objected to as improper cross examination.

The Court: Overruled.

Q. You would have thought that was an outrageous thing for them to do, wouldn't you?

A. I don't understand what you mean by control?

Q. This is joint management.

A. Joint management can be bad or good.

Q. You would have thought that was an outrageous thing for them to do for the defendant to have control of the load dispatchers under the situation you have here?

Mr. Royhl: Objected to as immaterial; not proper cross-examination.

The Court: Overruled.

A. If you take that hypothesis that it was under control and was controlled to the disadvantage of one company to the other, I would go along with you.

Q. Answer the question. You said a minute ago you would not have believed them if they had told you, that the defendant kept control of the load dispatcher, didn't you? A. Yes. I haven't seen any evidence of that here.

Q. Were you in court here during the course of this trial? A. Yes.

Q. Did you hear a letter in which Mr. Strike wrote to North Dakota Power Commission that the defendant kept control of the load dispatchers?

Mr. Royhl: Objected to as not a proper statement of record; not proper cross-examination.

The Court: Arguing whether it is or not, doesn't get us anywhere.

Q. Did you hear a letter read?

A. As a recall I heard it read.

Q. As you went along and developed your case in order to testify you would ask various officers and attorneys for facts and figures, would you?

A. I largely took them from the record.

Q. Did you ask them for any at all?

A. I asked them where to find data.

Q. They furnished you figures from time to time?

A. I verified them.

Q. They furnished you figures from time to time, did they? A. Yes, at my request.

Q. And you accepted those figures whole-heartedly, without any question?

A. No. Those figures that I had were largely furnished me when I was in Huron on the first trip and I verified them, checked a large portion of them from the records which were kept there in order to be satisfied that I could use them.

Q. Alright. You said largely. What about the balance of them?

A. It is possible that some I didn't use at all were those that I did not check. They furnished them but I didn't bother to check them because I would not be using them.

Q. Some of the figures you used were not matters of record, but were estimates. Isn't that a fact?

A. Not many that I have used.

Q. How about the figures that were used where there were no meters to show the current, that was not metered. What did you use there? The things they told you?

A. I haven't used that kind of stuff. I have used data which is in the operating reports and in the Federal Power Commission reports and in the zone records by three representatives of the operating committee reports. That is the kind of information I have used.

Q. You figured the transmission loss?

A. I didn't figure the transmission loss. I figured the over-all—I didn't even figure that—I took the over-all unaccounted for energy, from the reports.

Q. You got all of that from reports? A. Yes.

Q. Didn't you use any figures in any of your testimony here that came from calculations?

A. I simply used basic figures and made calculations from them.

Q. Didn't you use any figures that came from calculations of yours in this testimony you have given here?

A. I did some which I understood was stricken, and it was information that is on exhibit here. I didn't realize it at the time I explained it to you.

Q. I thought you said you used Federal Power Commission reports that are sworn to? A. Yes.

Q. Will you come down and look at these Federal Power Commission reports and show me where they are sworn to?

A. That is my understanding, they are sworn to. They have been on jobs where I have been. These may not be the copy that went to the Federal Power Commission.

Q. You don't find this sworn to, do you?

A. That is pencil copy. The other is a carbon copy and shows a place for a notary public, so I expect the copy that went to Federal Power Commission was sworn to.

Q. You testified you worked with Federal Power Commission reports that were sworn to, didn't you?

A. I said I used them because they are sworn to.

Q. Didn't you testify you used Federal Power Commission reports that were sworn to?

A. I think they were sworn to.

Q. You used these that are in evidence here? A. Yes.

Q. And they are not sworn to?

A. They are not sworn to there.

Q. You didn't go down to Washington and use any that are sworn to, down there? A. No.

Redirect Examination, by Mr. Royhl.

Q. Did you use the Federal Power Commission reports the plaintiff put in evidence in this case? A. Yes.

Q. You have mentioned that when you first came to Huron there was a case in the state court. You didn't mean this court, did you? A. District court.

Q. You meant the state court up there in Beadle County?

A. Yes.

Q. I am not just clear. You were inquired about certain payments made in 1938 and 1939 by the Dakota companies. Those payments were made by Northern Power & Light Co.? A. In 1938 and 1939?

Q. Yes. A. Yes.

Q. And I think also he inquired about part of the 1940. Was that made by North Dakota Power & Light or Northern Power & Light Co.?

A. That was probably by Northern Power & Light, or Dakota Public Service Co., which one was the merger of the two after the middle of the year.

Q. That was the merger after July 1, 1939? A. Yes.

Q. And your Exhibit 339 shows the separation prior to the merger, does it not? A. For which year is that?

Q. 1939.

A. 1939 shows the total amount paid that year, both before and after. It is listed as under Northern Power & Light Co., but it is the total amount received by the Northwestern Public Service Co. that year from the Northern Power & Light Co. and the successor.

G. R. McARTHUR

was called as a witness by the defendant, and being duly sworn, testified as follows:

Direct Examination, by Mr. Woods.

Q. Will you state your name, please?

A. G. R. McArthur.

Q. Your age? A. 55 next April.

Q. Place of residence? A. Huron, South Dakota.

Q. Business or occupation?

A. Vice president of the Northwestern Public Service Co.

Q. Have you been in the electric utility business for some years? A. Since April 1, 1930.

Q. Where has your place of residence been during all of that time? A. At Huron, South Dakota.

Q. Are you an engineer? A. No, sir.

Q. You had, I presume, some preliminary training before you went into business, education and experience?

A. I went through grade school, high school and college.

Q. You came to Huron in what year?

A. I came out to Huron, South Dakota in 1923.

Q. Did you have a position there at Huron at that time?

A. Yes.

Q. What was that business?

A. I came out to Huron to join the faculty of Huron College, as Professor of Economics, Business Administration.

Q. After being there for a time did you then join the offices of the utilities there at Huron? A. Yes, in 1930.

Q. Who made that arrangement with you?

A. Mr. Parker, who was then president of the Northwestern Public Service Co., North Dakota Power & Light Co., and Northern Power & Light Co.

Q. Did he have any talk with you about your employment, the nature of your work, at the time you went to work? A. Yes, we had a conversation.

Q. Just tell in a general [——] the nature of your work, and what your employment was to be?

A. Mr. Parker explained to me that in my employment that I was working for the Northwestern Public Service Co., North Dakota Power & Light Co. and Northern Power

& Light Co. My responsibility was to be those in connection with employee problems, employee relations, and in connection with customer service problems. General field of that which is known as public relations. I came to the organization with a fresh viewpoint—

Q. Did you have during your early years of your employment with those companies, customer difficulties in the area north of Bowdle, South Dakota? A. Yes.

Q. Do you know about when that first came to your attention?

A. I went to Eureka, South Dakota, which is north of Bowdle, along, as I recall it, in the late winter or early spring of 1932, and spent probably the better part of three months in working in that district headquarters at that time.

Q. Was that on account of trouble in the area? A. Yes.

Q. What was the character of the trouble?

A. Customer complaints as to service.

Q. Due to what?

A. Outages, voltage conditions, service levels.

Q. You say you stayed there some three months?

A. The majority of that period, yes.

Q. Were you at other towns or cities in that territory along about those years? A. Yes.

Q. In similar work? A. Yes.

Q. Will you name some of them?

A. I spent some time in Wishek, which was north of Eureka in that area. I spent some time in and out of Ashley, and some time at Napoleon.

Q. Will you tell the Court whether or not that was an area where the business was of value and desirable from the point of view of the companies?

A. The city of Eureka and city of Wishek were two of the largest towns in the area. In fact, two of the largest towns in the stretch of service area extending south from Steele to Bowdle. The towns of Napoleon and Ashley and adjacent thereto were likewise substantial towns as of that area.

Q. Do you have a classification of towns in the business as "B" towns?

A. We had the classification at that time of "B" towns. Subsequently we had "A", "B" and "C" towns.

Q. Did that indicate a town that had a good market for your product?

A. They represented classification of towns largely on volume of business and relationship in size, yes.

Q. Did you name the town of Ashley and Napoleon as towns in which there was trouble in those years, prior to 1936? A. Yes.

Q. What was the nature of that trouble?

A. Problems related to customer service, outages.

Q. Was that your job, to go out and try to straighten those things out?

A. My job was to make investigation of the situation that existed. Visit with the customers. Know what the facts were that related thereto. Bring the report back to the staff that would deal with it from there on out.

Q. At some time in the course of your work there for those companies, did you become acquainted with Mr. Sam White, of Chicago? A. I did.

Q. Can you tell the Court about when?

A. I think my contacts with Mr. Sam White probably began as early as 1932 or thereabouts.

Q. Do you know what occurred to bring him into the picture about that time?

A. Mr. Sam White was appointed receiver of the United Public Utilities Co., of which this property was a subsidiary, and the occasion for my meeting him was a visit to the property, as I recall it.

Q. You say this company was a subsidiary. I wish you would explain what you mean?

A. You are speaking as of the area of Northern Power & Light Co. I am thinking in terms of this particular service area, about Wishek, Eureka, Napoleon, Ashley, in the area of what was Northern Power & Light Co.

Q. And that is what you mean then? A. That is right.

Q. After Mr. White was receiver of the United Public Utilities Co., what was your understanding of the position that he occupied with respect to these companies or the parent company? A. Well, he was receiver—

Q. I said after he was receiver.

A. After they came out of receivership?

Q. That is right.

A. Then he was president of the survivor or successor

company, after the merger of the United Public Utilities Co. He was president thereof.

Q. Was that known as United Public Utilities Corporation? A. Yes.

Q. Who was the chief executive or administrative officer of that corporation, United Public Utilities Corporation?

A. Mr. Sam White.

Q. Did you have occasion to deal with him at varying intervals after termination of the receivership? A. Yes.

Q. Can you fix the date when he became president of United Public Utilities Corporation?

A. Not with any exactitude of date. As I recall, it was 1934 or 1935. 1935, I think.

Q. Can you tell the Court about how often you would see him in the course of each year?

A. In the early years, back in 1932, '33, '34, I probably saw Mr. White out there at least once in the spring, in May. I would see him again in the fall, perhaps in the month of September. And I saw him, perhaps, as often as two or three or four times in between.

Q. Did you continue to see him at frequent intervals until the Dakota Public Service property was separated from the Northwestern Public Service property? A. Yes.

Q. Now, did you, subsequent to your beginning with the company, come to have some offices or positions with these companies? A. Yes.

Q. Do you know when you first became an officer or director?

A. I first became a director of Northwestern Public Service Co. in January, I think, of 1935. I became an officer of Northwestern Public Service Co. in July, 1937, I believe. I became a director of North Dakota Power & Light Co. and Northern Power & Light Co. and Knife River Coal Mining Co. in August, I believe, 1937. I became vice president of those latter three companies, I think, at the same time, same date.

Q. Did you continue to hold those offices and directorships up to the [——] that the Dakota Public Service Co. was separated from Northwestern Public Service Co., in October, 1945? A. Yes.

Q. Now, over the years, was your work and were your

duties with the companies, changed from the duties and work that you described here a little while ago? A. Yes.

Q. What became the nature of your work?

A. Naturally, as I acquired experience in the organization and in the business, I was able to take on more responsibility, and the work became more and more of a supervisory and administrative nature. I became in due time, relatively soon, an assistant to Mr. C. J. Strike, who was general manager, and worked with him as his assistant through a number of years. Then, with progression and development or responsibility, I continued with public relations work and customer and employee relations problems, and likewise the field of activity spread out in more general operations as would naturally come, working in relationship as assistant to the general manager.

Q. Did you come to know the relationships with Samuel W. White, and the method of working with him and the office routine with respect to him? A. Yes.

Q. What means of obtaining information as to the operations of the United Public Utilities Corporation did he have, to you?

A. He had before him reports of various types that he would ask for, operating reports and things of that kind. He had communications and reports on specific problems as they came up from time to time. He had information that he got by direct inquiry and in personal visits. He kept in close contact with the operations of the property.

Q. I think there was some testimony he used the long distance telephone frequently in his contacts with you. Do you recall about that?

A. I don't recall as to the testimony, but as to the fact he did use it, yes.

Q. That is, did he? A. Yes, he did use the telephone.

Q. He invariably visited the property once a year?

A. Without exception once a year. I would say he visited more frequently than once a year.

Q. On those occasions when he visited the property did he go all over it? A. Yes.

Q. Did you upon occasion go over the property with him? A. Yes.

Q. Do you know whether you did every time he came out, or not?

A. No. I doubt if I went with him every time that he came out.

Q. Can you state what proportion of the time that he visited the properties from 1935 to 1945 you did go with him?

A. From 1935 to 1945 I would doubt that I missed a trip with him.

Q. You think you went with him every time?

A. I think I went with him every time from 1935 on. I may have missed one but I don't recall at the moment.

Q. Then did you visit every town, or every principal town in which the company had business or generation plants? How extensive were those visits?

A. Invariably we visited all of the division offices on the property that he was interested in and the major facility that was in process of construction or consideration incident to that particular kind. We would travel along the highways adjacent to the transmission lines, we would visit power plants and visit the mine.

Q. Did he note the condition of properties and discuss that on those trips? A. Yes.

Q. State whether or not he was an inquiring person and a fellow who made his investigation in a thorough way?

A. Yes.

Q. I think you have stated that he got reports regularly, that is, copies of reports that were made in the offices of the joint management went to him? A. Yes.

Q. Was there any rule about that?

A. Yes, there was a rule.

Q. State what it was?

A. That he should have all of the information that was available to him in reports. He was asking for those reports.

Q. And did he get them? A. He did.

Q. With respect to expenditures, or of amounts. Could anybody or could the executive officers at that time expend any amount that they saw fit, without his approval, or was there a rule he was to be advised and give his approval of expenditures of certain amounts?

A. I think I understand. There was a rule or understanding on his part, that those of us connected with the joint management agreement, as to expenditures relating to his property.

Q. State what it was?

A. I think it may have changed from time to time, but as I recall it, amounts in excess of $100.00 were referred to him, provided they were not a part of the regular budget of expenditures adopted each year, which he had opportunity to approve or go over as a budget, and if they were in the budget, my recollection is that he permitted expenditures up to $500.00, if covered in the budget he had previously approved and knew about.

Q. Is it fair to say he kept in close touch with the operations of those subsidiaries in South Dakota at all times?

A. Not only fair to say. It is a fact.

Q. Do you know whether Mr. White went over the road from Bowdle to Wishek along where the new transmission line was built? I think completed about 1936, at or about the time that it was being built?

A. Yes. He was in that territory on that spring trip and in inspection of those facilities at various points along the line. As a matter of fact I was with him on that trip.

Q. There is some testimony here with regard to relationships of these companies with Middle West Service Co. Were you familiar with that?

A. With the testimony or the relationship?

Q. Relationship. A. Yes.

Q. Did they furnish service for these United Public Utilities subsidiaries?

A. Middle West Service Co. was under contract to these companies.

Q. What character of service did they furnish?

A. Advisory, consulting service in a variety of fields. Engineering.

They were advising mostly with reference to advertising; with reference to public relations and on franchise procedures; accounting procedures; income taxes; tax work; merchandising.

Q. Now, then, with respect to any cases where there was a diversity of opinion between the subsidiaries of the United Public Utilities Corporation on the one hand, and Northwestern Public Service Co., can you tell the Court what happened in such cases, as to how they were handled? During the period of time from 1937 to October 19, 1945?

A. Whenever there were questions involving diversity

of interest in that period between 1937 and 1945, those questions were put squarely up to the owners of those respective companies for decision and handling.

Q. Mr. McArthur, you have testified that you were an employee of these companies from 1930 to 1945. Is that right? A. That is right.

Q. So you were there in all of the year 1936? A. Yes.

Q. Did you obtain any knowledge of the 1936 contract between these companies? That is the contract with respect to rates and charges? A. Yes.

Q. You learned about that? A. Yes.

Q. Were you an officer or director of any of these companies at that time?

A. I was director of Northwestern in 1936.

Q. Prior to the execution of that contract had a man named Lakin paid a visit to the property? A. Yes.

Q. Where did you first come in contact with Mr. Lakin?

A. Mr. Lakin was in attendance at Minneapolis at a meeting of the division managers. Our managerial conference was held in June of that year, for the assistance of division managers of the three companies.

Q. Did you learn the purpose of his visit? A. Yes.

Q. Do you know whether or not plans and arrangements were made for him to visit the property? A. Yes.

Q. What do you know about that?

A. Mr. Lakin came out to Minneapolis and attended the joint managerial conference we had, and then came out to the property, coming out to Aberdeen in company with Mr. Strike. We called a car from the joint office after he came back out to meet them at Aberdeen and they went out over the property. Mr. Lakin came back into Huron, to the joint office headquarters there after he had completed his trip, and spent some time there in the joint office. I visited with him in the joint office on his return. Then he left and went back east.

Q. Did you have occasion to see Mr. Samuel W. White after that? A. Yes.

Q. And before the contract was finally signed? A. Yes.

Q. Do you know what those occasions were, if there was more than one?

A. Yes. There was at least one I recall very definitely, and I am sure there were other occasions in between that

mid-summer and the managers' meeting at which I talked to Mr. White.

Q. I believe that is the year in which there were directors' [meeting] about April, and later in October, with respect to that contract. Do you recall about that?

A. I recall meeting in the spring and fall, yes.

Q. Can you state in a general way, whether or not the action, or part of the action, at the fall meeting was by reason of action taken at the April meeting? A. Yes, I can.

Q. To clear up, for counsel. Were you a director of Northwestern Public Service Co. in 1936?

A. I was director of Northwestern Public Service Co., in 1936.

Q. You were not of the northern companies at that time?

A. I was not of the northern companies in 1936.

Q. Do you recall the occasion of any connection of Mr. White with that action? A. I do.

Q. You may state what action was taken by Mr. White in connection with it.

A. After the action was taken by the directors of Northwestern Public Service Co. in the spring of 1936, drafting the interchange agreement, Mr. White objected in part to that agreement and [desire] revisions in some respect in it, and on the basis of that objection on his part, there was changes made to conform to the thought that he had in mind and his desires in connection therewith, and in the fall of 1936, the board of directors of Northwestern rescinded the action taken in the spring and approved the contract as it has been—

Q. Now, then, I don't believe you signed the 1936 contract as an officer of any company? A. I did not.

Q. Did you regard it as fair?

Mr. Fellows: Objected to as immaterial; calling for opinion and conclusion.

The Court: Sustained.

Q. You were a member of the board of directors of Northwestern Public Service Co. at that time?

Mr. Fellows: Objected to as repetition.

The Court: He has already answered that.

Mr. Woods: We offer to prove by this witness that he regarded this contract as fair and had that state of mind at the time that the minutes of the directors of Northwestern were made, approving the contract as entered into.

Mr. Fellows: Object to the offer for the reasons contained in the objection to the question.

The Court: Sustained.

Q. Now, do you recall some change or revision in the contractual relationship between these companies in about the year 1938? A. Yes.

Q. Do you recall whether or not you signed that contract? A. I did sign for Northern Power & Light Co.

Q. Prior to the time that you signed that contract had you been in touch with Mr. Samuel White, president of the United Public Utilities Corporation, and had you discussed that matter with him? A. I had.

Q. Can you tell the Court now whether it was once or more than once?

A. There was several occasions upon which I visited with him.

Q. Did you know at the time that you signed the contract whether or not it had his approval or consent?

A. Yes. I would not have signed the contract without his approval.

Q. I infer from that that it did have his approval and consent? A. It did.

Q. Do you recall a revision or some change in that contractural situation between Northwestern and the northern companies in the year 1939? A. Yes.

Q. Do you know the occasion for that change? A. I do.

Q. What was it?

A. That revision or change came about by reason of the merger of the two northern companies, Northern Power & Light Co. and North Dakota Power & Light Co., into what is known as its successor company, the Dakota Public Service Co.

Q. You may state if you know who worked that out?

A. The detail and technical work on that was worked out with me, Mr. C. L. Sandstedt, Mr. Karl Goldsmith, of Pierre. Mr. Scheetz of Philadelphia representing—

There were others besides those three.

Q. You may name the others?

A. Mr. White, himself, was a party to that adjustment of the contract, and representatives of the Middle West Corporation.

Q. You are referring to the contracts dated July 1, 1939, now, are you?

A. I don't recall the exact date of the contract, but I do recall the contract revision was made as of 1939, written in the language of Dakota Public Service Co. and Northwestern Public Service Co. as against the previous contracts written in the language of three companies.

Q. Now, then, with respect to those contracts of 1939, and the 1938 contracts, was there any formal approvals of those by directors' meeting, so far as you know?

Mr. Benson: We will admit there is no minutes in the minutes books with respect to any contract except the interconnection contract of 1936.

Q. Now, with respect to the 1941 contract, did you have knowledge of the execution of such a contract? A. Yes.

Q. Can you state what events led up to that?

A. Yes, I can.

Q. Calling your attention to the document which is in evidence as Exhibit 258 (R. p. 1230 supra), purporting to be a letter dated November 18, 1942, signed, A. B. Sanborn, addressed to Mr. S. W. White, I will ask you if you saw that letter at or about the time of the date noted in it?

A. I did.

Q. With respect to the 1941 contract, did you have a meeting, a joint meeting, at Detroit Lakes, Minnesota, prior to the execution of that contract? A. Yes.

Q. What kind of a meeting was it?

A. That was a meeting of the managers of the system, what we called our managerial conference. Mr. White was in attendance.

Q. Do you recall whether or not some work was done upon that contract, 1941 contract, at that meeting?

A. Yes, there was.

Q. And by whom?

A. There was controversy on that contract between Mr. White and members of the joint management staff, and

particularly as between Mr. White on the one hand and C. L. Sandstedt and Carl Goldsmith on the other hand.

Q. Was it subsequent to that time that the contract was placed in final form and signed? A. Yes.

Q. Prior to the time that the 1941 contract was signed, had there been some change in the financial and business situation of the companies that were being operated under that joint management, which were reflected in the contract itself? A. There were.

Q. Did Northwestern Public Service Co. at that time have some funds which had been obtained from the sale of properties in Nebraska? A. It did.

Q. Did the interconnected system at that time have need of capacity? A. It did.

Q. That is, generating capacity? A. It did.

Q. And in the negotiations that led up to the execution of the 1941 contract, do you know whether there was discussion of the building of capacity at Aberdeen for the interconnected system? A. I do.

Q. Was there? A. Yes.

Q. Do you recall about the signing of the supplemental contract in 1943, which has been discussed and mentioned as the 1943 supplement here? A. I do.

Q. And referring to that Exhibit 258, which I handed you awhile ago, I think you said you saw that at or about the date it bears? A. Yes.

Q. Subsequent to the writing of that letter, do you know of negotiations between Mr. White and others in the two organizations with respect to that supplement? A. Yes.

Q. What knowledge do you have of that? Just state.

A. Well, I had conversations directly with Mr. White, and at times when those arrangements were under discussion.

Q. You mean you discussed it with him? A. Yes.

Q. Do you know whether he approved of the 1943 supplement before it was signed or put into effect? A. Yes.

Q. And did he? A. He did.

Q. Do you know whether or not Mr. Samuel W. White took any interest or exercised any control in or over the dividend policy of the northern companies during the time that you were an employee of those companies?

A. Yes.

Q. You may state to what extent?

A. He kept track and had knowledge of funds and earnings that were available and discussed with the management staff of the companies that he was interested in any recommendations or suggestion that they made to him, and those things were cleared as between the officers or management of the companies he was interested in, and his office, and himself, personally.

Q. With respect to the operation of the fiscal affiairs of that joint management. Mr. Stokke was asked yesterday whether he was paid by Northwestern check, whether he received salary that way. I want to ask you if you know whether or not the joint management had any separate bank account for the payment of salaries of the joint management? A. No, not as between the three companies.

Q. As a matter of fact or practice how were those salaries paid?

A. Paid by Northwestern under the terms and conditions of the joint management contract.

Mr. Fellows: Move to strike the last part of the answer as not responsive.

The Court: It may go out, the last part.

Q. After payment of those salaries by Northwestern, as you have stated, was anything done to adjust the expense as between the companies, if you know?

A. I do know, and the answer is yes.

Q. You may state what was done in that regard?

A. There was an allocation or distribution of the expenses on the gross revenue percentage basis as between the companies.

Q. Did you in the course of your employment, either as an officer or director, have any intent to do anything or permit anything which would cause or permit Northwestern Public Service Co. to overreach or defraud Northern Power & Light Co., North Dakota Power & Light Co., or Dakota Public Service Co.? A. I did not.

Q. Did you, during your employment, ever see or observe any act or [ommission] designed to cause or permit overreaching by Northwestern of the other companies named?

A. I did not.

Q. Now, with respect to the rates and charges for capacity, energy, interconnection, and the basis or allocation of payment of joint management expense, did you or did you not regard those things, that is, those rates and charges, as fair and just at all times during the [court] of your employment there?

A. I sincerely believe them to be fair and just.

Q. Now, there has been some evidence here with respect to the control of the load dispatchers upon the interconnected system. Do you know what the control of those load dispatchers was? A. I do.

Q. Will you tell the Court what their instructions were or what the policy to be followed by them was?

By Mr. Fellows:

Q. That was not in your department at all?

A. As an executive officer of the company I would have knowledge or supervision.

Q. Did you have anything to do with the direction and control of the load dispatchers?

A. As an executive officer, shaping of policy, yes.

Q. Answer the question. Did you control or direct the activities of the load dispatchers?

A. As of the control, no. As of the shaping of policy, yes.

By Mr. Woods:

Q. You may state. A. The policy—

Mr. Fellows: We object to any evidence of policy in answer to that question, as not binding upon the plaintiff and as incompetent.

The Court: I think that objection is well taken.

Mr. Woods: I think the question calls for instructions and policy in regard to the handling of it. That is what I want to call for. Is the objection to the question in that form sustained?

The Court: Yes.

Q. Do you know what rule the load dispatchers were required to follow? A. Yes.

Q. Do you know what investigations were made by Montana-Dakota, plaintiff in this suit, during the year 1945, prior to the purchase of the stock and securities of the Dakota Public Service Co.?

A. Yes, I know investigations were made.

Q. Do you know whether investigations were made by accountants named Arthur Young & Co.? A. I do.

Cross Examination, by Mr. Benson.

Q. Mr. McArthur, did you say you were public relations man with Northwestern Public Service Co.?

A. I said I had charge of public relations, customer relations and employee relations.

Q. Did you have charge of the advertising campaign in the fall of 1941, when you were trying to get a new franchise at Aberdeen? A. I did.

Q. You prepared the advertising or saw the advertising that was used?

A. I did not necessarily prepare all of it, but I think I saw all of it.

Q. You approved it all before it was published?

A. I think so.

Q. On September 9, 1941, didn't you approve an ad in the Aberdeen paper, and which you thereafter paid for and which was published, stating that you solicited the votes of the voters of Aberdeen and asked them to vote because of the benefits which would accrue to Aberdeen, including (1) a million dollar expansion and construction program at the Aberdeen power plant of the Northwestern Public Service Co., (2) more jobs for Aberdeen people during construction and in its operation after construction; (5) a dependable supply of electric power for the next twenty years; (3) more income taxes for the schools and various city departments; (4) a substantial increase of freight and coal which, in turn, means steadier work for railroad men in Aberdeen?

Mr. Woods: Objected to as incompetent, irrelevant and immaterial; [nor] proper cross examination; not gone into on direct.

The Court: It will be received subject to objection.

A. May I see the ad?

Q. You did approve that ad, didn't you?

A. I think I approved an ad that contained in substance the material there.

A. P. LEARNED,

being recalled by the defendant, and having heretofore been sworn, testified as follows:

Direct Examination, by Mr. Royhl.

Q. I overlooked asking you on your direct examination some matters. Now, based upon your experience with rates and contracts concerning rates, in electric utilities and with electric utilities generally, to which you have previously testified, do you have an opinion as to whether or not the incremental cost of production is a [propr] cost basis upon which to establish a rate at which surplus energy produced by the seller is sold to the purchaser? Do you have an opinion? A. Yes.

Q. What is your opinion?

A. The incremental cost is a proper basis for the establishment of a rate for surplus energy.

Q. Have you examined the contracts involved in this case providing a rate of 5 mills per kilowatt hour for energy sold to the defendant by the plaintiff's predecessors, and which are Exhibits B, D, and F to the complaint, and have you examined the provisions of those contracts relating to surplus energy and the sale thereof? A. Yes.

Q. And have you examined Defendant's Exhibits 335 and 335-A received in evidence (R. pp. 1754 and 1755, supra)?

A. Yes.

Q. In considering the provisions of those contracts relating to surplus energy and the sale, and also the figures set forth in Defendant's Exhibits 335 and 335-A, do you have an opinion as to whether or not the 5 mills per kilowatt hour for energy so sold to the defendant by plaintiff's predecessors, during the period from January 1, 1936 to October 19, 1945, both inclusive, was a fair, just and reasonable rate for the sale of such energy? A. Yes.

Q. What is your opinion?
A. It is a satisfactory rate for the sale of surplus power.
Q. And in your opinion is that fair, just and reasonable?
A. Yes.

Cross Examination, by Mr. Benson.

Q. Mr. Learned, you say you have spent a good portion of your life in the utility business of various kinds, sewerage disposal, electricity, and everything else in the public utility business? A. Yes.

Q. If one company makes a capital investment to serve another company, they don't sell on incremental cost basis?

A. They probably don't sell firm power on incremental basis, but they would surplus power.

O. C. STOKKE,

being recalled by the defendant, and having heretofore been sworn, testified as follows:

Direct Examination, by Mr. Woods.

Q. Mr. Stokke, there seems to be some ambiguity in the record as it is set with respect to Plaintiff's Exhibits 31 and 35, and Defendant's Exhibits 340 and 341, which I hand you, and which I am told are called supplements to the interchange capacity contracts. They are also known here as Exhibit B's to the contract? A. Yes, they are.

Q. I want to ask you from what source were those exhibits which I have handed to you prepared at the time they were made up by the committee? To whom that work was delegated?

A. The operating committee prepared the information for these exhibits.

Q. From what source?

A. The company generating capacities on Exhibit B were prepared by the operating committee. The generating capacities for the respective companies.

Q. From what?

A. From our determination of the generating capacities of the respective stations for the respective companies.

The company system maximum demand were determined by the operating committee from special readings taken at the direction of the operating committee, special readings obtained from all power plants of the power pool companies. The thirty minute peak, coincident peak period demands, were obtained from the special thirty minute readings obtained from the various generating stations and from the readings obtained at the points of interconnection between the two parties, operating companies.

Q. And were they prepared from the load diagrams?

A. No.

WILLIAM M. DUNN was called as a witness by the defendant, and being duly sworn, testified as follows:

Direct Examination: by Mr. Woods.

Q. Please state your name? A. William M. Dunn.

Q. Age? A. 51.

Q. Place of residence? A. Huron, South Dakota.

Q. What is your business or occupation?

A. Treasurer, Northwestern Public Service Co., at the present time.

Q. How long have you been connected with the Northwestern Public Service Co., or the Northwestern and its associated companies, Northern Power & Light, North Dakota Power & Light and Dakota Public Service Co.?

A. Since January, 1933.

Q. In what capacity did you first go with them?

A. As travelling auditor.

Q. Was that as a member, then, of the joint management staff? A. It was.

Q. How long did you continue in that capacity?

A. Until the fall of 1936.

Q. Then what happened?

A. In 1936 I was made assistant secretary and assistant treasurer of the three electric companies and the Knife River Coal Mining Co., and still continued somewhat the duties of travelling auditor. Later in 1936 I was transferred to Columbus, Nebraska, as division manager of the Columbus, Nebraska, division.

Q. Where did you go from Columbus?

A. Yankton, South Dakota.

Q. In what capacity?

A. As division manager of the Yankton division.

Q. How long did you continue there?

A. Until the summer of 1944.

Q. Where did you go then?

A. I went to Huron, South Dakota.

Q. In what capacity?

A. As treasurer of Northwestern Public Service Co., Dakota Public Service Co. and Knife River Coal Mining Co., and a member of the board of directors of the companies.

Q. In 1934 did you have occasion to be up in the territory in North Dakota, in the vicinity of Wishek and at Wishek? A. I did.

Q. What was the occasion for your going there?

A. To make an audit of the finances of the city of Wishek.

Q. What I am getting at is whether there was trouble there so far as the power company supplying power was concerned? A. There was.

Q. Of what character?

A. The number of interruptions of service they were receiving at that time.

Q. Do you know whether or not there was agitation for municipal plants in that area at that time? A. Yes.

Q. Was there? A. There was.

Q. Now, in the course of your work for the several companies you have mentioned here, I want to ask whether your work was the same for all of the companies?

A. It was.

Q. Did you, in the course of your work for these companies were you guilty of any partiality in your work in favor of one company as against another?

A. I showed no partiality.

Q. Was that true with respect to the operations of the company and the personnel involved? A. It was true.

Q. Did you observe any partiality on the part of other officers in the course of your employment, as between these companies? A. I did not observe any.

Q. Did you have occasion to observe and do you know the attitude of the management of these companies with

respect to matters and instances where there was diversity of interest between the Northwestern on the one hand, and the northern companies on the other, and how those matters were handled in such cases? A. Yes.

Q. You may state?

A. In all matters affecting the interest of the several companies, when under discussion, they were referred to the officers of the parent company for settlement or negotiations.

Q. Have you ever met Samuel W. White? A. I have.

Q. Do you know when you first met him?

A. I believe in 1934.

Q. Did you know who he was? A. I did.

Q. Who was he at that time?

A. He was president of United Public Utilities Corporation.

Q. Did he continue to hold that office during all of the time that you were associated with him in business?

A. He did.

Q. Will you tell the Court how he kept in touch with the operations of the companies and the joint management staff at Huron?

A. Mr. White received the complete file of operating and financial reports. He received letters made by the joint staff. He kept in contact with the joint staff by telephone. And he visited personally with members of the staff who had occasion to be in Chicago. He attended the annual manager's meetings and he made at least one inspection trip all over the property.

Q. Then, I take it, you saw him frequently after you became a director of his companies. A. I did.

Q. Did he have any way of knowing about what funds were on hand with the treasurer of the companies?

A. He did.

Q. How did he get that information?

A. By receiving monthly financial statements, operating reports, communications from our office.

Q. You furnished those to him? A. I did.

Q. Did he advise or recommend with respect to the investment of surplus funds of those companies? A. He did.

Q. Do you know whether or not he had or exercised any control over work orders of those companies?

A. He did exercise authority over work orders.

Q. In what respect?

A. Work orders up to a certain amount, not included in the budget, were required to receive his approval before the expense were incurred. Work orders of a larger amount, included in the budget, over and above a larger amount included in the budget, were required to receive his approval before the expense was incurred.

Q. I take it budgets were made periodically? A. Yes.

Q. Was he furnished copies of those? A. Oh, yes.

Q. In all instances? A. I believe he was in all instances.

Q. Who determined the dividend policy of the company? A. Mr. White.

Q. Did he have anything to do with the deposit of surplus funds or handling the investment of surplus funds?

A. He did.

Q. Did he direct that? A. He did.

Q. Were his instructions followed in all instances?

A. They were.

Q. Can you tell the Court any specific instances after you became treasurer and director of these companies in which a controversial matter was referred to the officers of the parent companies? A. I can.

Q. What one?

A. Renegotiation of a coal contract between Knife River and Northwestern.

Q. Can you tell the Court who worked that out?

A. That was worked out by Mr. White and Mr. Purchas of the Middle West Service Co.

Q. About when? A. That was in the winter of 1944-1945.

Q. Mr. Dunn, prior to your becoming associated with these companies did you ever hold any public office?

A. I did.

Q. What?

A. County Auditor of Yankton County, and State Auditor of South Dakota.

Q. During what period of time?

A. State Auditor, 1929 to 1932. County Auditor from 1925 to 1929.

Q. Do you know, Mr. Dunn, whether or not the plaintiff, Montana-Dakota, prior to October 19, 1945, made investigations of the Northwestern Public Service Co. and Dakota Public Service Co. and their records? A. Yes.

Q. And also other properties? Not only their records but over the properties? Or is your knowledge confined to investigations or records at Huron?

A. I don't recall of knowledge of their being out on the property. I am referring to examination of records at Huron.

Q. Do you know whether they had agents in there for that purpose? A. I do.

Q. Over how long a period of time?

A. For a number of months.

Q. Can you tell the Court who those agents were?

A. Representatives of Arthur Young & Co. Day & Zimmerman. Montana-Dakota attorney. I believe his name to be Higgins, representing the legal staff of Montana-Dakota. Some of their auditors and other employees.

Q. Was Mr. Elvig among those? A. He was.

Q. Day & Zimmerman, Inc., metioned by you, is that an engineering concern?

Mr. Morrison: Objected to as immaterial, and for all of the reasons stated in the objection to the other question.

The Court: Sustained.

Q. Do you know whether or not it was the general rule to obtain the consent of Mr. Samuel W. White prior to the transfer of any so-called key personnel from one property to another?

Mr. Morrison: Objected to as immaterial.

The Court: We will take an answer,

A. Yes.

Q. Was it?

Mr. Morrison: Objected to as immaterial.

The Court: Received subject to objection.

A. It was the rule.

Q. Do you know whether or not Northwestern Public Service Co. furnished the office equipment and automotive equipment for the joint management staff without charge during all of this time? A. Yes.

Q. And did they?

Mr. Morrison: Objected to as immaterial.

The Court: Received subject to objection.

A. They did.

Q. Now, Mr. Dunn, as a common officer and director of the Northwestern Public Service Co. and the Dakota Public Service Co., did you ever take or cause or permit to be taken by the defendant, Northwestern Public Service Co., fraudulently, unreasonably, unfairly, unlawfully or without consideration anything whatever—

Mr. Fellows: Just a minute. We object to that. There is no claim Mr. Dunn ever took anything. Covering the same question he was inquiring about some time ago. We don't claim Bill Dunn took a dime or did anything.

Mr. Royhl: They allege in the complaint that this man as a common officer and director caused to be taken or permitted to be taken, wrongfully and unlawfully—

Mr. Fellows: Unlawfully as directors and officers.

The Court: The witness may answer subject to objection.

A. I did not.

Q. Did you ever intend that the Northwestern Public Service Co. should take or cause to be taken from the Dakota Public Service Co., anything wrongfully or unlawfully whatever? A. I did not.

A. B. SANBORN, being called as a witness by the defendant, and being first sworn, testified as follows:

Direct Examination: by Mr. Woods.

Q. Please state your name? A. A. B. Sanborn.
Q. Your age? A. 56.
Q. Place of residence? A. Huron, South Dakota.
Q. Business or occupation?
A. I am president of Northwestern Public Service Co.
Q. How long have you held that position?
A. Since July 1, 1938.

Q. From that date, until some time in 1945, did you have some position with North Dakota Power & Light Co., Northern Power & Light Co., Knife River Coal Mining Co., and later, Dakota Public Service Co.?

A. I was president and director of all of the companies you mentioned. I should add also that I was director of Northwestern since July 1, 1930.

Q. Your connection with the so-called northern companies and the coal mine terminated when, if you know?

A. My connection with the coal mine terminated a little indefinitely. My connection with the northern companies terminated at the conclusion of the sale to Montana-Dakota on October 19, 1945. My connection as officer and director of the mine until sometime in February, 1946. We continued to manage for Montana-Dakota, the northern property.

Q. I would like to ascertain a little bit about your education and background. After getting out of high school what education did you have?

A. I entered the Naval Academy in 1908 and graduated in 1912. I was commissioned as ensign in the United States navy in 1912. I resigned my commission as lieutenant commander, temporary, in 1920.

Q. I take it you continued in the navy from the time of your graduation from United States Naval Academy for ten years, through the first world war?

A. A little over eight years. I resigned in 1920.

Q. Did you get any degree from the naval academy or did they give any degree at that time?

A. No, they didn't give degrees in the naval academy at that time.

Q. What character of education did they give or provide? A. Predominantly and almo[illegible] wholly engineering.

Q. After leaving the navy, what business did you [engaged] in?

A. I came directly into the utility business in British Columbia, Canada, and stayed in British Columbia, Canada, for eighteen years, until July 1, 1938, when I came down to South Dakota to this job.

Q. What character of work did you do in the utility business in Canada?

A. I went with the Department of Columbian when that

company was a dream in the promoter's eye. During the time I was there they built two electro-hydro plants, and one steam plant, and built a load up to 1 million kilowatt hours a year. Then I came to South Dakota on this job I am in now.

Q. Now, with regard to your coming to the South Dakota companies, how did you first contact in that regard?

A. Mr. Kruesi asked me to come in and see him in Chicago, through a friend of mine in Ashland, Wisconsin, my home at that time. My father and mother's home, it was. I met Mr. Kruesi in Chicago at his office, talked to him for a few minutes, not over ten or fifteen or twenty, and he suggested I go in and see Mr. White.

Q. Was that the same building?

A. That was in the same building.

Q. What did you learn about the character of this operation at that time or about that time?

A. I was told definitely that this operation was one of a combined operation of three utilities that were owned by two separate corporate entities, and that I had to be extremely careful in my operation out here not to lean towards one company or another and to continue a fair relationship at all times. I was told by Mr. White and Mr. Kruesi that there was a possibility that the time might come that I would have to defend my actions on these properties and I should not let the finger of blame point at me.

Q. About how long was it after you visited with them that you came to the property and took up residence in Huron?

A. About three or four months, as I remember. I know I had an opportunity to drive through South Dakota on my way back to British Columbia. I spent some time back there. I think my first contact with Mr. Kruesi and Mr. White was sometime early in the spring or late in the winter of 1938.

Q. When you came to actively take up that job, did you learn anything about a contract between the companies in the process of negotiation? A. Yes.

Q. What did you learn about that?

A. I learned that for some months Mr. Strike and Mr. Sandstedt had been talking to Mr. White and Mr. Kruesi

and to the members of the service company staff, and that Mr. Scheetz had prepared a contract for the interchange of energy capacity and line rental between the three companies involved.

Q. What, if anything, did you do about that?

A. I reviewed the studies and the negotiations and inasmuch as Mr. Sandstedt had been in the negotiations since the start, I instructed him to continue the negotiations and do what he could to see that all parties were properly served and the contract come to a satisfactory answer.

Q. Now, do you know whether or not contracts were completed in 1938?

A. I do. As I remember it, they were completed late in the fall or early winter of 1938.

Q. Did you sign such contracts?

A. I signed for Northwestern after I had been assured that the contract was satisfactory to Mr. White, acting for United Public Utilities Corporation, and Mr. Kruesi, acting for the owners of Northwestern.

Q. Did you, as president of these companies, know about the revision of those contracts in 1939? A. Yes.

Q. Do you know who worked that out? A. Yes.

Q. Who?

A. The essential terms of the revision were worked out between the attorneys of United Public Utilities Corporation and attorney for the joint management staff of the joint companies. I am referring to Mr. Carl Goldsmith, of Pierre, and Mr. Scheetz, acting as officer for Mr. White. The reason for that was—

Q. What was the occasion for that revision?

A. It was occasioned by the merger of Northern Power & Light Co. and North Dakota Power & Light Co. and the change of name of the surviving corporation to Dakota Public Service Co.

Q. Now, I want to ask you a few general questions about how Mr. White kept in touch with United Public Utilities Corporation subsidiaries in North Dakota and somewhat in South Dakota. How did he maintain that contact?

A. In every way and by every avenue that was open to him.

Q. Will you name some of them?

A. Reports, as has been testified before, were sent to him. Financial reports, operating reports, special studies, bank reports. In addition to that, Mr. White always made one trip to the property and went over a portion of the property on that trip as much as time would allow. He always attended our management [meeting], which were held once a year. I don't believe there was any officer of the company that went into Chicago that didn't confer with Mr. White and visit with Mr. White, on the operations of the company. I know in my case I was in Chicago five or six times a year. Other officers, I know, were in there, perhaps not quite as much, but at least three or four times a year. I assume his direct [contract] with the officers of the joint staff was at least ten or twelve times a year in addition to his visits to the property and his attendance at the managers meetings.

Q. As I understand, his visits to the property came usually in May, and the managers meetings usually were in the fall?

A. That is correct as far as the time I was on the property. Prior to that, I believe, some times the managers meetings were held in the spring and Mr. White visited us sometime later.

Q. Now, with regard to the transfer of key employees during the time you were on the property there, was that done without Mr. White's knowledge and consent?

A. It was not.

Q. In the matter of differences between the companies, those cases where there was a diversity of interest, how were such matters handled while you were on the property?

A. It was in each case, in every case, the matter was passed up to the owners of the two properties. I refer particularly to the contract under litigation here. I refer also to the contract between Knife River Coal Mining Co. and Northwestern Public Service Co. for coal. I refer to such matters as transfer of key personnel. As I see it, the only job I had was to determine in my own mind when such a conflict did exist.

Q. Do you know who determined the dividend policies of those companies?

A. Mr. White, in conference, of course, with the execu-

tive officers and treasurer of the companies in which he was interested.

Q. Mr. Dunn has testified he kept in touch with the financial affairs of the companies. Did you observe whether or not that was true?

A. I can remember on several occasions getting telegrams from Mr. White in regard to investment of corporation's funds in U. S. securities.

Q. Did you heed those telegrams? A. Quickly.

Q. In every instance? A. In every instance.

Q. And I think you have seen something of the fact about transfer of funds to eastern banks. Did he exercise control over such matters?

A. Mr. White was very much interested in where our funds were. He took over the receivership at the time when some banks were closing and he was very careful as to how the funds were handled.

Q. Did I ask you whether you signed the 1939 contracts?

A. No, I don't believe you have asked me when I signed any contract.

Q. I think you said you signed the 1938 contract as president of Northwestern. With respect to the 1939 contract, did you sign that? A. I did.

Q. Do you know whether or not it had the approval of Mr. White, as president of United Public Utilities Corporation, prior to signing it? A. I know it did.

Q. And was that true of both the 1939 contracts?

A. That was true of both of them.

Q. What was the next change in the contractual relations between Northwestern and other company or companies? A. The 1941 contract.

Q. Will you tell the Court what events led up to that change in that contractual relationship?

A. The reason the 1941 contract, the conditions of the 1941 contract became necessary, was that it became evident the interconnected system required additional capacity. An examination was made by engineers to determine at what point the capacity should be placed. Aberdeen was picked and it met the approval of Mr. White. At that time it so happened that Northwestern had funds available, that were made available through the sale of properties in Nebraska, and for that reason, with the approval

of Mr. White, an investment which was thought at that time to be about $750,000.00, was determined upon at Aberdeen. The contract was inadequate as it stood to take care of the permanent investment of that amount of money, and it was thought, for the proper protection of Northwestern a longer term contract was necessary. For that reason, the 1941 contract was changed to ten year contract, without cancellation provided.

Q. Who worked that contract out?

A. That contract was worked out primarily by Mr. White and Mr. Kruesi. Mr. White acting for United Public Utilities Corporation and Mr. Kruesi acting for the owners of Northwestern Public Service Co., and by the office of Mr. Scheetz, and I believe that the office, also, of the engineering staff of Middle West engineering service, who was under contract to both U. P. U. subsidiaries and Northwestern.

Q. Did you sign that contract also?

A. I did. There were other matters that came up. Of course, in our net return for the entire term, Mr. White directed amortization of the interconnecting facilities.

Q. Do you know whether or not that contract had the approval of Mr. White, prior to signing it? A. I do.

Q. Did it? A. It did.

Q. You made mention of the watch he kept of the financial affairs of the North Dakota subsidiaries. Were there instances when the joint management desired money for improvements when Mr. White did not agree to such appropriations? A. There were.

Q. Can you state some of those instances? A. I can.

Q. Will you do so?

A. For the last four years prior to the sale of the property to Montana-Dakota there was a question of an additional Diesel [enginer] in the Dickinson plant to take care of that area load properly, and also to bolster up the capacity of the North Dakota system. Mr. White felt he had made a considerable investment in the Beulah boiler and a considerable investment in the Bismarck turbine and boiler, and that was as far as he could go at that time. In that length of time there had been talk of connecting the line from Kildare to Dickinson, so as to help along the Kildare-Beulah line. We were never able to obtain money to do that. In addition to that, there was a line west of

Mobridge out to Lemmon that required changing and we got a portion of that done, but not the whole of it. In addition to that there was a very weak 22 KV line from Wishek and from Hoven and Merango into Ellendale that we hoped to rebuild but we could not get money in the time we had to do it. Many of those items were in the [budger] the year Montana-Dakota acquired the property.

Q. I want to ask you this, whether or not you know if Northwestern had carrying charges on the inter-connection facilities that existed between it and the Dakota Public Service Co.?

A. Northwestern carried its half of the investment, its half of the amount set up in the contract, which amounted to Northwestern to about 151 thousand dollars.

Q. Were the Bowdle and Wishek line, and Bowdle and Ipswich line, interconnection facilities?

A. My interpretation is they were not.

Q. Do you know of the policy or requirement that work orders for the United Public Utilities Corporation subsidiaries had to have the approval of Mr. White over certain amounts? A. Yes.

Q. And that was the rule, was it? A. That was the rule.

Q. Did Northwestern Public Service Co. furnish the office equipment and automotive equipment for the joint management staff without any charge to United Public Utilities subsidiaries?

A. There was no charge whatever on office equipment. There was no charge in interest in money invested in automotive equipment.

Q. I don't know whether I have covered the proposition, that is, whether or not the members of the board of directors of United Public Utilities Corporation were ever out or ever went over the properties while you were there?

A. Only two members of the board at the time I was there. One was Mr. White, who went over the properties every year, and on one occasion Mr. Lakin came along. Mr. Lakin was also at that time a member of the board of United Public Utilities Corporation.

Q. There has been some question raised about the time of delivery of the minute books, stock books, and resignations of the officers and directors of Dakota Public Service Co. Do you know when that was?

A. Some time in October, 1945.

Q. And at whose direction was delivery of those things made?

A. I was directed by Mr. White to deliver the material that he specified to the office of Faegre & Benson, in Minneapolis.

Q. The office of the attorneys for the plaintiff in this suit? A. One of the many.

Q. Did you do that? A. I did.

Q. Some time in October, 1945?

A. That is right, as far as my recollection goes, some time in October.

Q. Do you know what the rule or policy with respect to the load dispatchers was? A. I do.

Q. During the period of time you were president of these companies? A. I do.

Q. Was that in writing? A. I believe it was not.

Q. You may state what the policy or rule with respect to handling of these loads was.

A. The load dispatchers were instructed to utilize the lowest cost producers on the system, regardless of ownership of those producers, to the utmost. When the lowest cost producer was loaded to go down the line and load up the next lower cost producer.

Q. So far as you know, was that policy followed regularly?

A. It was followed—It was not always followed far enough to the satisfaction of Mr. White.

Q. Do you mean by that that he made some criticism?

A. Mr. White criticized us for some load we were carrying in the Aberdeen plant when the Beulah plant was not fully loaded.

Q. Now, during the time you were an officer and director of Northwestern Public Service Co., Northern Power & Light Co., North Dakota Power & Light Co. and Dakota Public Service Co., did you ever intend to cause or permit Northwestern Public Service Co. to overreach or defraud the others named in any respect? A. I did not.

Q. Do you regard the several contracts between the companies named, with respect to rates and charges and allocation of expense, including those rates, as fair and just? A. I do.

Q. Did you at the time they were made? A. I did.

Q. Did you ever as an officer or director of the compa-

nies I have just mentioned, intentionally cause or permit the Northwestern Public Service Co. to take or charge anything against the other companies without consideration, unjustly, unreasonably, unlawfully, or fraudulently?

A. I did not.

Q. Mr. Sanborn, I neglected to ask you about the events leading up to the execution of the so-called 1943 supplement to the interconnection contract. Calling your [attentiont] to this photostatic copy marked Defendant's Exhibit 258, did you write the original of that? A. I did.

Q. Is that your signature on it? A. That is.

Q. On or about what date?

A. November 18, 1942 was the date of the letter.

Q. Was that transmitted to Samuel White about that time? A. It was.

Q. Subsequent to the writing of that letter was something done with the existing interchange contract of the company?

A. Yes. Mr. White, as I suggested in the letter, got in touch with Mr. Kruesi and they say that Northwestern was unable, as contemplated—

Q. Calling your attention to the language in that letter, to the effect Northwestern Public Service Co. would not be able to build the capacity which it had contemplated, what event had created that situation?

A. The war and W. P. B.

Q. Was it, as a result of that, impossible for Northwestern Public Service Co. to obtain the generator it had contemplated? A. It was.

Q. After that you wrote that letter? A. That is right.

Q. Who worked out the details of that 1943 supplement which you say was worked out subsequent to that letter?

A. At Mr. White's invitation the first draft was worked out in the Huron office and sent to Mr. Goldsmith for his comments and then sent to Mr. White. He tried to work out a supplement and was unable to do so and he sent it along to his legal officer and that draft came back into Huron, and to our suggestion, some of them were made and send back to Chicago. Mr. White and Mr. Kruesi got together with Mr. Stevenson, legal officer, Middle West, and a draft of the supplement as finally completed was completed in the Chicago office.

Q. Did you sign it? A. I did.

Q. Prior to the signing of it, do you know whether or not it had the approval of Mr. Samuel White, president, United Public Utilities Corporation? A. I do.

Q. Did it? A. It did.

Q. Did you regard the provisions of the 1943 supplement as fair so far as they affected the Dakota Public Service Co.? A. I did.

Q. There was some testimony this morning with regard to the negotiation of a new coal contract between Northwestern Public Service Co. and the Knife River Coal Mining Co., and I want to ask you what events led up to that occurrence?

A. I asked Mr. White to act for United Public Utilities Corporation and I asked Mr. Kruesi to act for Northwestern in forming a new contract for the supply of coal from Knife River Coal Mining Co. to the Aberdeen plant of Northwestern.

Q. That was in the winter of 1944 and 1945, was it?

A. As I remember it was either March or April, 1945.

Q. Were you present at any time when that contract was under discussion?

A. I was present as an observer. Mr. Kruesi did not act for Northwestern. He appointed Mr. Purchas to act as his representative.

Q. He did act?

A. Mr. White and Mr. Solberg, sales manager for Knife River Coal Mining Co., and Mr. Mont, mine manager, for Knife River, acted for Knife River. Mr. Purchas acted for Northwestern.

Q. I don't believe you have stated where those negotiations took place?

A. In the coal mining office in Bismarck, North Dakota.

Q. And after those negotiations was the contract made?

A. The contract was signed.

Q. Did you know before it was signed whether or not it had the approval and consent of Mr. Samuel White?

A. It did. He negotiated it.

Q. Did you sign that? A. I signed it.

Q. Now, I want to ask you in regard to Defendant's Exhibit 215, whether you have seen that before?

A. Yes, I have seen it before.

Q. The names of Bayles and Gazin have been mentioned

in connection with the exhibit, as I understand it. Who were they?

A. Mr. Gazin was assistant chief engineer of Middle West. Mr. Bayles, at the time this exhibit was made, was superintendent of transmission and distribution of the joint companies, the joint staff in Huron, South Dakota.

Q. Do you know who worked that out?

A. Mr. Gazin and Mr. Bayles between them worked it out.

Q. And prepared those papers there, did they?

A. Yes. They prepared the information from which these papers were taken.

Q. Is there a figure there on those papers that was used in connection with a subsequent contract relating to the interconnection facilities?

A. The column headed "Portion for interconnection with Dakota Public Service [Co.]" adds up to 303 thousand some odd dollars and cents, which figure was used for the basis of the amortization clause in the 1941 contract, and half of the figure was used as the figure for the value of half of the interconnection facilities in the 1943 supplement to the 1941 contract.

Q. I want to ask you whether you ever told Mr. R. M. Heskett, president of the plaintiff, that the interchange contract between the defendant and the Dakota Public Service Co. was cancellable on ninety days notice, or substantially that? A. I did not.

Cross Examination, by Mr. Fellows.

Q. When you detailed your connections and the proceedings that led up to your connection with Northwestern Public Service Co., I believe you stated you were sent to their office in Chicago by somebody in Ashland, Wisconsin?

A. That is right.

Q. Who was that?

A. Walter Hodgkins, whom I have known for a good many years.

Q. At least you were sent to the Middle West Corporation? A. Middle West Service Co.

Q. Did you know what connection Middle West Service Co. had at that time with the defendant company?

A. I found out later.

Q. If you know, will you state?

A. What time are you talking about?

Q. At the time you went to work for the company.

A. Middle West Service Co. had a service contract with Northwestern and with Northern Power & Light and North Dakota Power & Light.

Q. Now, at that time the Middle West Corporation owned the stock of the Northwest Utilities Co.?

A. That is correct. That is as I understand it.

Q. You also know, do you not, that in turn the Northwestern Utilities Co.—going back a little, the Middle West Corporation you have stated, owned the stock of Northwestern Utilities Co. A. I understand so.

Q. And the Northwestern Utilities Co. owned the stock of the defendant company?

A. That was a fact. Common stock.

Q. During all of the time from 1938 until the sale of the northern companies to the plaintiff, you were not only an officer but you were a director in both the defendant company and in the northern companies, weren't you?

A. That is correct.

Q. And president of both companies?

A. President of first three companies, and then two companies.

Q. And president of the defendant company, too?

A. That is correct.

Q. Did you own some stock during that period of time in the northern companies?

A. There wasn't any stock available.

Q. You held your office as director without any stock ownership? A. Correct.

Q. Do you own any stock in the defendant company?

A. There wasn't any stock available in the defendant company.

Q. You likewise hold your position as director and officer without any stock holding?

A. I had one share of stock in trust. It was not my stock.

Q. That was in the defendant company?

A. In the defendant company.

Q. You did sign Exhibits C, D and E and F to the complaint as president of the northern companies, did you and the supplement of July 1, 1941?

A. What are the exhibits?

Q. Did you sign the contract, Exhibit C, of January 1, 1938? A. If that is the 1938 contract, I did.

Q. And also the one of July 1, 1939? A. I signed that.

Q. And the other one, July 1, 1939? A. I signed that.

Q. And the one of July 1, 1941?

A. I believe I signed that.

Q. You signed those as president of the northern companies, did you not?

A. I think I signed them as president of Northwestern.

Q. Do you know who signed on behalf of the northern companies?

A. I haven't refreshed my memory on that. I will be glad to do it if you will show me the contracts. My understanding is Mr. Sandstedt signed—

Q. Here is Exhibit C to the complaint. On whose behalf did you sign that?

A. On behalf of Northwestern Public Service Co.

Q. Who signed on behalf of the northern companies?

A. C. L. Sandstedt signed on behalf of North Dakota Power & Light Co. and G. R. McArthur signed on behalf of Northern Power & Light Co.

Q. He was also a dual officer and [directors]?

A. That is correct.

Q. And Mr. Sandstedt was, too? A. That is right.

Q. Where was this signed? A. At Huron.

Q. That is the place where all of you people were operating? A. That was the joint office.

Q. That is true of Exhibit D, is it not?

A. If signed by dual officers, yes.

Q. You signed as president of Northwestern?

A. I signed for Northwestern. Mr. Sandstedt signed for Dakota Public Service Co.

Q. And Exhibit E?

Mr. Royhl: This is all admitted in the pleadings.

A. I signed for Northwestern. Mr. Sandstedt signed for Dakota Public Service.

Q. When they got ready to be signed did you call Sandstedt in and tell him what company he was to sign for and tell him you were signing for the other one?

A. I don't know how we settled who we were going to sign for.

Q. How did you determine which one would sign for one company and which would sign for another company?

A. I haven't the slightest idea. There was no system to it. I don't know as it ever occurred to us.

Q. It was just a matter of getting it signed by two fellows, one on behalf of one company and one for the other?

A. Two people that had authority to sign.

Q. Was it just a question of who signed for one company and who for the other? A. That is right.

Q. All of you being directors of both companies and officers of both companies? A. That is right.

Q. Mr. White was not there, was he? A. No.

Q. Since you were an officer in both companies why didn't you sign for both companies?

A. I would not know that. I think it would have been just as legal if I had.

Q. At least, when you signed, it didn't make any difference to you which one you signed for, as long as you signed for one of them?

A. Not as long as the owners approved of the contract.

Defendant offered in evidence a portion of the testimony by deposition of adverse witness R. M. HESKETT, an officer of plaintiff, which testimony was received in evidence as follows:

Q. Your name is R. M. Heskett? A. Yes, sir.

Q. Where do you live, Mr. Heskett? A. Minneapolis.

Q. What street, please? A. 2127 Pleasant Avenue.

Q. Are you the president of the Montana-Dakota Utilities Co., the plaintiff in this action? A. Yes.

Q. How long have you been president of that company?

A. Well, I think it was '43. I would not be sure.

Q. Were you connected with the company prior to that time? A. I was vice-president.

Q. Vice president. Are you a director of that company?

A. Yes.

Q. How long have you been a director?

A. Since the company was organized.

Q. When was that, approximately? A. In '24.

Q. 1924. You have been continuously a director since that time? A. Yes.

Q. You own stock in the company? A. Yes, sir.

Q. How much stock do you own in the Montana-Dakota, approximately?

A. Well, approximately, I would say, 50,000 shares.

Q. And what percentage is that 50,000 shares of the total? A. There is 900,000 shares.

Q. 900,000 outstanding? A. Yes.

Q. You own 50,000 shares? A. I say about that.

Q. About 50,000? A. Yes.

Q. That's as of the present? A. Yes.

Q. The members of your family own any other stock?

A. Yes, they do.

Q. Now, the 50,000 shares you own now, did you own them during 1945? A. '45, yes, yes.

Q. Now, do Montana-Dakota Utilities Co. own any shares of its own stock?

A. Oh, they may, I would not be sure about that. If it does, it is quite a small amount.

Q. How about in 1945, did they own any stock?

A. If it did it would be a very small amount.

Q. This morning, Mr. Heskett, you said you would endeavor over the noon hour to ascertain the amount of stock that you owned? A. Yes.

Q. Were you able to do that?

A. I have January, '48, and September '45 that's about what you wanted?

Q. What does September, 1945, show? A. I have 49,793.

Q. Does that reflect any additional shares held by members of your family?

A. No, I am going to give you that separate. Mary G. Heskett, my wife, has 18,890.

Mr. Benson: You mean had as of that date.

The Witness: Yes. David M. Heskett, a son, had 11,050. Robert G. Heskett had the same amount. Jean Heskett Feidt, a daughter, 11,050, and Mary Lou Heskett had 11,050. That's of '45.

Q. (By Mr. Stafford) Yes, sir.

A. Now of today's ownership or January 1st, I had 56,702 Mrs. Heskett had 19,290, David Heskett had 11,298, Robert Heskett had 11,250, Jean Heskett Feidt had 11,250, Mary Lou Heskett had 11,250.

Q. And that's a complete list of the stock owned by yourself and members of your family? A. Yes.

Q. That's common stock? A. Yes.

Q. Did you have preferred holdings too?

A. I didn't have any preferred in '45. I now have 100 and Mrs. Heskett had 609 and now she has got 610. I don't know where that one share came from.

Q. She had 609 in '45?

A. Yes, and now she has 610. The children have no preferred.

Q. At either date? A. No.

Q. What were you endeavoring to purchase from Mr. White, the utility properties of the Dakota Public Service Service Company and the mine properties of the Knife River? A. Yes.

Q. But Mr. White sold you stock and securities, how did that come about? You wanted the properties, if I understood you?

A. No, not necessarily properties, we wanted to get the property but buying the stock was simply a step.

Q. Why did you want to get the property, so you could integrate that with the Montana-Dakota?

A. Yes, certainly.

Q. So as to make an integrated—?

A. Merge it with our company.

Q. So you have one system of public utility properties?

A. Yes.

Q. But you had to buy the stock and the securities in order to—as a step in order to achieve that result, is that correct?

A. That's the way he wanted to sell it. Of course, as far as we are concerned we could have bought the property.

Q. Mr. White had a tax problem or some problem of his own?

A. I would not be surprised, I don't know whether he wanted to sell the stock.

Q. And you would have just as soon have bought the properties? A. Oh, yes.

Q. You recall when you agreed upon the price with Mr. White? I take it you did agree on the price with Mr. White? A. Yes.

Q. You recall when that happened?

A. That I have testified it is either in the early summer or in the spring of '45.

Q. It was prior to the time that the formal contract was drawn and signed? A. Yes.

Q. Some time prior to that? A. Yes.

Q. And there wasn't any deviation from that price that was agreed upon and the one in the contract?

A. I don't believe there was, I think that carried out the contract.

Q. If I said to you that you agreed informally on that $7,500,000.00 plus earnings, with Mr. White, about April 24, 1945, would that be incorrect?

A. I would not dispute it.

Q. You would not dispute it? A. No.

Q. It could have been agreed upon at that time?

A. Yes.

Q. Who else did you deal with in connection with acquiring these Dakota Public Service Company properties other than Mr. White?

A. Why, I never dealt with anybody.

Q. Anybody else in the United Public Utilities Corporation organization? A. Not about that property.

Q. When you said "they" did something a minute ago, who did you mean by "they"?

A. I mean the Northwestern.

Q. And you said they had control of both companies?

A. Yes.

Q. So your testimony is that Northwestern Public Service Company had control of itself and of Dakota Public Service Company? A. Yes.

Q. Do you recall that I interrogated you a few moments ago about allegations in the Federal Power Commission complaint filed by Montana-Dakota Utilities Co. alleging domination and control by Middlewest Corporation of Northwestern Public Service Company and of Dakota Public Service Company? A. Yes.

Q. But you are now testifying that Northwestern Public Service Company had control of—

A. Well, they had—they are the only company that I was in contact with.

Q. Who is "they"?

A. The Northwestern. I don't attempt to follow that tier of ownership about the Northwestern. I don't remember the connection.

Q. Well, you say Northwestern Public Service Company had control of Dakota Public Service Company?

A. Well, I thought so. They had an operating contract.

Q. Well, when you negotiated for the acquisition of the securities of Dakota Public Service Company, did you deal with the Northwestern Public Service Company?

A. Well, no, you know—

The Witness: I dealt with the owner.

By Mr. Schiff:

Q. What was the answer?

A. I said you know I dealt with White.

Q. I so understood your testimony, yes. A. Yes.

Q. And you dealt with Freeman with reference to the proposed acquisition of Northwestern Public Service Company? A. Yes.

Q. No 7, after the conversations with Mr. White in April or the spring of 1945, were any investigations made by the personnel of the Montana-Dakota Power Utilities Co. of the Dakota Public Service property records and so forth? A. Yes, there were.

Q. Under whose supervision were those investigations made? A. Mr. Gamble and Mr. Elvig.

Q. Mr. Gamble and Mr. Elvig. Was that at your direction, Mr. Heskett? A. Yes.

Q. What instructions did you give Mr. Gamble and Mr. Elvig in connection with these investigations?

A. Well, we had a balance sheet. They principally used their own judgment.

Q. Well, what information were you expecting them to get from these investigations?

A. Well, I left that largely to them.

Q. Well, how was it, did you give them the authority

and instruct them to make the investigations to satisfy themselves as to what you were purchasing? A. Yes.

Q. Have you or anyone in your staff, to your knowledge, any information with reference to that contract prior to your purchase of the Dakota Public Service Company stock? A. Well, I had notice of it.

Q. And in your opinion—

A. I knew about it when I went over the property with Mr. Sanborn and I discussed it with him to some extent. I asked him, I remember, when it expired, that is, cancellation, and he told me in three months after notice. Now at this time we knew that was not correct of course.

Q. In your discussion with Mr. Sanborn, can you recall anything else that was discussed with reference to that contract?

A. I think the only thing I asked him was the cancellation clause.

Q. And you have no familiarity with the terms of the contract? A. Yes, I already knew that.

Q. Prior to your discussion with Mr. Sanborn? A. Yes.

Q. Had you ever seen those contracts?

A. No, I don't think I had ever seen them.

Q. But you knew about them? A. Yes.

Q. Do you recall you knew about them, not having seen them?

A. I think Mr. White—I am not sure but I think Mr. White told me that they had an operating contract and the expenses were divided according to the gross income.

Q. Well, was that the management contract?

A. Yes, that was the management contract.

Q. Did Mr. White ever discuss with you what is called the interchange contract, in this prospectus?

A. He mentioned—of course I knew that they had that, we discussed it, but I don't remember just in how much detail.

Q. Had you ever made complaint with reference to the contract to Mr. White? A. No.

Q. Or to Mr. Freeman? A. No.

Q. Or to Mr. Sanborn?

A. I don't think so. I think the first complaint I made was in that letter.

Q. And by "that letter" you mean the July 8th letter of 1946 (R. p. 1600, supra)? A. Yes.

Q. And that is true although you have yourself been dissatisfied with that contract for some period of time prior to July 8th?

A. I considered it a one sided contract quite a while but I didn't appreciate its seriousness until later.

Q. Did you appreciate its seriousness before or after the termination notice of February 27th?

A. Oh, I wouldn't be able to say. The contract on its past performance didn't look bad in the early days up until the time we got in.

Q. Then you mean by that—

A. The contract that one company pays a very small amount for power and the other side pays much larger don't strike me as equitable.

Q. And that is your view of the contract? A. Yes.

Q. But you hadn't arrived at that view at October 19, 1945? A. October?

Q. Yes? A. That is when we bought the property?

Q. Yes.

A. Yes. I thought it was a little out of key but I didn't think it was so serious but what we could buy the property, and it would depend [it] good bit on how it was exercised.

Q. Well, I think that was a different inquiry. I was trying to place the time at which you thought it was a one-sided contract, and it is my recollection that you said in substance that the contract over a period of years had worked fairly. That is what I thought your testimony was. If I am in error I would like to have it corrected.

A. I didn't say fairly. I said it didn't seem to be any particular burden on either one. There wasn't much money transferred.

Q. Well, now, "it wasn't any particular burden on either one", by that you mean on Northwestern or Dakota Public Service Company?

A. Well, I said there wasn't much money. It was settled by interchange of power.

Q. And you are then speaking of the period prior to October 19th? A. As shown in those reports.

Q. Is the effect of your testimony that there wasn't much money involved between Dakota and Northwestern?

Mr. Schiff: As of what period were you speaking?

A. I was referring to the three or four years that are

shown in the reports of the operation of the two companies, between the two companies.

Q. That would include the period of three years and four months covered by the Arthur Young & Company statement? A. Yes.

Q. This is a question on another subject, Mr. Heskett. Did you when you bought the Dakota Public Service Company securities know of the construction of a so-called Aberdeen improvement by Northwestern Public Service Company? A. Yes.

Q. And it was then under construction?

A. Yes, almost complete, I think.

Q. I would like now to address some attention, Mr. Heskett, to the question of when you first knew of the fact whether there was at times common directors between Northwestern Public Service Company and Dakota Public Service Company? A. I could not tell you when that—

Q. You have no recollection at all of when you first knew there were common directors, there were some common directors between those two companies?

A. Well, I think I had that impression for a long time but I don't know when I knew, had positive information.

Q. By a long time, I am trying to see what period is encompassed?

A. Well, I would say several years, as far as that goes.

Defendant offered in evidence a portion of the testimony by deposition of adverse witness CECIL W. SMITH, an officer of plaintiff, which testimony was received in evidence as follows:

Q. Will you state your full name, Mr. Smith?

A. Cecil W. Smith.

Q. And where do you live?

A. 1320 West Minnehaha Parkway in Minneapolis, Minnesota.

Q. Mr. Smith, are you at present connected with the plaintiff in this case, Montana-Dakota Utilities Co.?

A. I am.

Q. And in what capacity are you connected with that company? A. Vice president.

Q. And are you a director of that company?

A. And a director.

Q. How long have you been vice president of that company, approximately?

A. About four years, I believe.

Q. What position did you hold in the company prior to that time?

A. I was chief engineer and assistant vice president.

Q. And how long have you been with the company?

A. Since 1927.

Q. And have you been associated in an active capacity with the company since 1927 in some capacity or other?

A. I have.

Q. And how long have you been a director, Mr. Smith?

A. I don't recall just how long it is. I imagine six or eight years, somewhere along in there. I don't recall exactly.

Q. That's sufficient. Mr. Smith, would you tell us please your duties or functions as vice president of Montana-Dakota Utilities Co.?

A. I have been in charge of operation and construction, particularly.

Q. By operation, you mean the actual running of the company's operating facilities, such as its gas and electric and other facilities of that nature? A. That is correct.

Q. You own any stock in Montana-Dakota Utilities Co.?

A. I do.

Q. How much, please, approximately?

A. Oh, I imagine around four or five thousand shares.

Q. How many did you own in 1945? A. Probably—

Q. Was it about the same?

A. About the same, some less.

Q. Now, prior to the acquisition of the properties of Dakota Public Service Company in 1945, was there any investigation made by engineers of Montana-Dakota Utilities Co. of the properties of Dakota Public Service Company, if you know? A. Yes, there was.

Q. Who made such investigation?

A. My recollection is that the company engineers looked over the power plants and transmission lines of the company and subsequently I believe Day & Zimmerman made examination of the physical properties of the company.

Q. Now, could you fix the date, or approximately the dates upon which the company's engineers looked over the plants and transmission facilities of Dakota Public Service Company?

A. I believe it was in July or August.

Q. Of 1945? A. Of 1945, that's right.

Q. Who were the employees that looked over these facilities?

A. Well, I looked them over and Mr. A. P. McDonald, electrical engineer, looked over the plants.

Q. Were you afforded full access to look at any of the properties of facilities that you desired to see at that time?

A. Yes.

Q. Now, Mr. Smith, it has already been testified by Mr. Gamble, I am certain, and I believe also by Mr. Heskett, that Day & Zimmerman made an investigation of these properties of Dakota Public Service Company and prepared and furnished a report on the integration of these properties which has been marked and offered in evidence as Defendant's (Minneapolis) Exhibit 4. Do you recall whether or not you have ever seen that report?

A. Yes, I believe I have.

Q. When, could you say, Mr. Smith?

A. Shortly after it was completed. I don't recall the date of it.

Q. Now, you state that you have seen it shortly after it was furnished to Montana-Dakota; would that be prior to the actual closing of the purchase of the securities of Dakota Public Service on October 19, 1945?

A. Yes, I believe it was.

Q. Did you make a study or review of that report at that time?

A. Yes, I went over it. I don't recall what its contents are now.

Q. Now, you have also testified that during that same period an investigation was being made of Northwestern properties by Day & Zimmerman. Was any investigation made of Northwestern properties by yourself or Mr. McDonald?

A. No, Mr. McDonald didn't make any investigation, and as I recall it, I went over part of the Northwestern properties, not all of them.

Q. Would this be during this same period or after the acquisition of Dakota Public Service Company on October 19th?

A. That was prior to the acquisition of Dakota. As I recall it was in July or August of '45.

Q. Did you visit the Aberdeen plant of Northwestern Public Service Company during that period? A. Yes.

Q. Did they have under construction at that time a new generating unit?

A. Yes, they were installing a new turbine and a new boiler at the time I was at that plant.

Q. Did you have occasion to see the unit at all during its installation? A. Yes, I saw it.

Q. Was it a modern type of generating unit and boiler, turbine, rather?

A. Yes, it was a new General Electric turbine.

Q. Well, now, just what did the term fraudulently mean to you, Mr. Smith?

A. Well, I think under the conditions there it might mean that as far as the Northern Power & Light was concerned they were being taken advantage of in that situation.

Q. Who was taking advantage of Northern Power & Light?

Mr. Fellows: We object to that as incompetent.

The Court: I don't think it is competent. Sustained.

Q. Was that payment which you state Northwestern had exacted from Northern Power & Light, received pursuant to any contract in force and effect between those parties?

A. I believe in pursuance to the contract cited in that paragraph.

Q. How was that contract unfair, Mr. Smith?

Mr. Fellows: Objected to as conclusion of the witness.

The Court: Sustained.

Q. I don't think you covered this in Mr. Robinson's interrogation this morning so I will ask you now, do you recall now when you first knew who the directors were of Northwestern Public Service Company?

A. Of Northwestern Public Service Company?

Q. Yes, the defendant in this action.

A. I believe the first information that I had as to the directors of Northwestern Public Service Company was from Mr. Sanborn when I was out on the property in July.

Q. Of 1945? A. Of 1945.

Q. Now about directors of Dakota Public Service Company? What is your best recollection as to when you first knew who those directors were?

A. I think about the same time.

Q. About the same time and the source of your information was the same? A. That's right.

Q. That's in July of 1945? A. Yes.

Defendant's Exhibit 343 was received in evidence. It consists of the minutes of the special meeting of the directors of plaintiff held July 11, 1945.

At that meeting, among other things, said directors approved, ratified and confirmed the execution of the contract with United Public Utilities Corporation dated July 2, 1945, relating to the purchase by plaintiff of all of the outstanding securities of Dakota Public Service Company and Knife River Coal Mining Company, which is Defendant's Exhibit 282 (R. p. 1333, supra).

Defendant's Exhibit 344 was received in evidence. It is as follows:

Defendant's Exhibit 344.

United States of America
Federal Power Commission

Before Commissioners:

Nelson Lee Smith, Chairman; Claude L. Draper and Leland Olds.

September 2, 1947

In the Matter of	
Montana-Dakota Utilities Co. and Northwestern Public Service Company.	Docket No. IT-6004 and (Waiver of Notice for Filed Rate Schedules)

Order Allowing Rate Schedules to Take Effect and Dismissing Complaint.

It appears to the Commission that:

(a) On August 12, 1946, Montana-Dakota Utilities Co. (hereinafter "complainant") filed a complaint with this Commission against Northwestern Public Service Company (hereinafter "defendant") alleging among other things, that, under the agreement between it and defendant, dated July 1, 1941, and supplemented by an agreement, dated March 13, 1943:

> "The rates and charges exacted from complainant by defendant . . . are unjust and unreasonable and complainant should not be required . . . to pay to defendant anything on account of the transmission line amortization . . . or anything on account of the capacity of the Aberdeen generating station in excess of 6,000 kw capacity; and should be paid by the defendant not less than 6½ mills per kilowatt-hour for all energy furnished by complainant to defendant."

(b) On January 21, 1947, defendant filed a proposed Notice of Cancellation of the aforementioned agreements be-

tween it and the complainant, to become effective as of August 31, 1947, in accordance with a Notice of Termination served by complainant upon defendant under the terms of the aforementioned agreements.

(c) On February 20, 1947, complainant amended its complaint of August 12, 1946, by requesting that the Commission order the maintenance of the facilities interconnecting it and defendant and fix the rates for power to be interchanged by complainant and defendant.

(d) On August 20, 1947, complainant and defendant made application requesting that the following rate schedules, providing by their terms for temporary emergency interchange service be allowed to take effect at midnight August 31, 1947:

Name of Seller	Rate Schedule Designation	Rate Schedule Superseded	Name of Purchaser
Northwestern Public Service Company	FPC No. 7	FPC No. 6, as amended	Montana-Dakota Utilities Co.
Montana-Dakota Utilities Co.	FPC No. 4	FPC No. 3, as amended	Northwestern Public Service Company

(e) By the terms of the agreement filed August 20, 1947, the issues involved in the complaint, as amended, have become merely moot and the public interest will be served by dismissing the same.

The Commission orders that:

(A) The aforesaid rate schedules be and they hereby are allowed to take effect at midnight August 31, 1947;

(B) The aforesaid rate schedules shall be deemed to have been filed and published in compliance with the Federal Power Act;

(C) Nothing contained in this order shall be construed as constituting approval by this Commission of any service, rate, charge, classification, or any rule, regulation, contract or practice affecting such service or rate provided for in the above-designated rate schedules, nor shall this order be deemed as recognition of any claimed contractual right or obligation affecting or relating to such service or rate;

(D) The foregoing provisions of this order are without prejudice to any findings or orders which have been or may hereafter be made by this Commission in any proceeding now pending, or hereafter instituted, by or against the applicants.

(E) The complaint filed on August 12, 1946, and as amended on February 20, 1947, by Montana-Dakota Utilities Co. against Northwestern Public Service Company be and it is hereby dismissed.

By the Commission.

LEON M. FUQUAY,
Secretary.

Date of Issuance: September 4, 1947.

FRED GAMBLE, being called as an adverse witness by the defendant and being first sworn, testified as follows:

Cross Examination, by Mr. Royhl.

Q. Your name is Fred Gamble? A. Yes.

Q. You are an officer and director of the plaintiff company? A. I am.

Q. And for how long have you acted in that capacity?

A. As an officer since 1925. As a director since 1936 or 1937.

Q. What office do you hold at the present time?

A. I am Treasurer of Montana-Dakota, and assistant secretary.

Q. How long have you acted in those capacities?

A. I have been assistant secretary since 1925. I have been treasurer of the company, I am not sure of the date, 1932, 1933, approximately.

Q. Do you know where Ellendale, North Dakota is on this system of the Dakota companies? A. Yes, I do.

Q. Since October 19, 1945, has the plaintiff installed generating equipment there?

Q. What installation has the plaintiff made of generating capacity at Ellendale?

A. They have made installation of Diesel engines similar

in character as the ones described by Mr. Helmick in his testimony.

Q. At Ellendale? A. Yes.

Q. Of what capacity?

A. Net capacity or gross installed?

Q. Gross installed capacity?

A. I believe the ratings were two 1750 KW units.

Q. That would be 3500 KW? A. That is gross.

Q. What installation has been made by the plaintiff at Gettysburg, South Dakota?

A. We have made no installation of capacity at Gettysburg.

Q. What installation, if any, has been made by the plaintiff at Mobridge, South Dakota?

A. Identical equipment with that installed at Ellendale.

Q. That would be 3500 additional KW at Mobridge?

A. That is correct.

Q. Did you make any additional installations other than the 3500 at Ellendale and 3500 at Mobridge?

A. We are in the process of making additional installations.

Q. Where?

A. At Columbus, North Dakota, just north and west of Mandan, and at Bismarck, North Dakota.

Q. What additional are you making at Bismarck?

A. We are installing additional boiler and generating capacity. Generating capacity of 5000 KW.

Q. Any other?

A. Yes, we are installing generating capacity at Sheridan, Wyoming.

Q. That is not on the North Dakota property?

A. Part of the Montana-Dakota property.

Q. Are you installing any additional capacity at Dickinson, North Dakota?

A. No. We have taken generating capacity out of that station.

Redirect Examination, by Mr. Benson.

Q. Mr. Gamble, are you familiar with the general increase of electrical consumption over the whole of the ... ted States since the first of January, 1936?

Mr. Royhl: Objected to as not proper cross examination; immaterial.

The Court: I think he can show by this witness, if he is competent to testify, there has been a general increase in demand for electric power all over the country. Within reasonable limitations the witness may answer.

A. Yes, I believe I am.

Q. How many years have you been in the utility business? A. Since 1920.

Q. Has there been a period that you know of in the utility business from the time you have been in it, when there has been such an increase in demand for energy as began about January 1, 1936?

Mr. Royhl: Same objection.

The Court: Same ruling.

A. No.

Q. Do you know whether the defendant company has installed any additional generation on its system? A. Yes.

Q. Where?

Mr. Royhl: Same objection.

The Court: Same ruling.

A. At Mitchell, South Dakota.

Q. Do you know how much? A. I believe 7500.

Q. KW? A. Yes.

Mr. Royhl: Defendant rests.

Mr. Fellows: Plaintiff rests, and I want to ask leave of the Court to amend the complaint in certain particulars to conform to the proof, and the amendment has to do with the amount of underpayment current, for energy, and based on figures which now appear as our cost of production of current.

We ask leave to amend Paragraph II of the second cause of action, by changing that paragraph to read as follows:

"From the 1st day of September, 1935, to July 1, 1939, the defendant, through its officers and directors, who were officers and directors in common with Northern Power and

Light Company and North Dakota Power & Light Company, caused said North Dakota Power & Light Company to generate in the State of North Dakota and transmit to Northern Power & Light Company at Keldron, South Dakota, and at Driscoll, North Dakota, electrical energy which was in turn by Northern Power and Light Company transmitted to defendant at Gettysburg, Barnard, Ipswich and Aberdeen, South Dakota, and at said points purchased for resale by defendant. The amount of such energy was 12,550,381 kilowatt hours and said energy was of the just and reasonable value of One Hundred Two Thousand Two Hundred Eighty-five and 61/100 Dollars ($102,285.61), but defendant, through its officers and directors aforesaid, paid to said Northern Power and Light Company only the sum of Sixty-two Thousand Seven Hundred Fifty-one and 90/100 Dollars ($62,751.90), which was unjustly and unreasonably and unlawfully low price therefor, to the damage of North Dakota Power & Light Company and Northern Power and Light Company in the amount of Thirty-nine Thousand Five Hundred Thirty-three and 70/100 Dollars ($39,533.70)."

Amend Paragraph III so that the last sentence of said paragraph will read as follows:

"That by reason of the facts hereinbefore alleged, the defendant became indebted to and liable to said North Dakota Power & Light Company and Northern Power and Light Company in the sum of Thirty-nine Thousand Five Hundred Thirty-three and 70/100 Dollars ($39,533.70), no part of which has been paid."

Amend the Fourth Cause of Action by amending the last paragraph of Paragraph VI of said Cause of Action to read as follows:

"The net energy sold as aforesaid by Dakota Public Service Company to Northwestern Public Service Company from July 1, 1939 to July 1, 1941, under the terms of said original of said Exhibit 'D' was fairly, justly and reasonably of the value of Ninety Thousand Nine [Hundred] Seventeen and 65/100 Dollars ($90,917.65) but the defendant, through its officers and directors aforesaid, paid to said Dakota Public Service Company and caused said

Dakota Public Service Company to receive for said energy only the sum of Fifty-nine Thousand Three Hundred Forty-five and 74/100 Dollars ($59,345.74) which was an unjustly, unreasonably and unlawfully low and inadequate price therefor."

Amend Paragraph VII of the Fourth Cause of Action to read:

"By reason of the facts hereinbefore in this cause of action alleged, defendant became liable to and indebted to Dakota Public Service Company in the amount of Seventy-one Thousand, Five Hundred Seventy-one and 91/100 Dollars ($71,571.91), no part of which has been paid."

Amend the Sixth Cause of Action by amending Paragraph IX to read as follows:

"From the 1st day of July, 1941, to the 19th day of October, 1945, the defendant, through its officers and directors, who were officers and directors in common with Dakota Public Service Company, caused said Dakota Public Service Company to generate electrical energy in the State of North Dakota and transmit the same to the defendant at Gettysburg, Barnard and Ipswich, South Dakota, and there to resell the same to the defendant and defendant transmitted the same and resold the same to its public utility customers in the State of South Dakota, and the net energy thus generated, transmitted and sold by Dakota Public Service Company to defendant was fairly, justly and reasonably of the value of Three Hundred Seventy-seven Thousand One Hundred Eight and 6/100 Dollars ($377,108.06), but the defendant, through its aforesaid officers and directors, paid to said Dakota Public Service Company and caused said Dakota Public Service Company to receive for said energy only the sum of Two Hundred Eighteen Thousand Nine Hundred Ninety-four and 23/100 Dollars ($218,994.23), which was an unjustly, unreasonably and unlawfully low price therefor."

Amend Paragraph X of the Sixth Cause of Action to read as follows:

"By reason of the facts hereinbefore in this cause of action alleged, defendant became indebted to the Dakota

Public Service Company in the amount of Three Hundred Thousand Four Hundred Dollars ($300,400.00) no part of which has been paid."

Amend the amended prayer to the complaint so that Paragraph (5) thereof will read as follows:

"(5) For the sum of Five Hundred Fifty-six Thousand One Hundred Twenty and 77/100 Dollars ($556,120.77), with interest at the rate of six per cent (6%) per annum from the date of each payment of each portion thereof by North Dakota Power & Light Company, Northern Power and Light Company and Dakota Public Service Company to the defendant, and with interest on all underpayments by defendant for electrical energy at the rate of six per cent (6%) per annum from the date of each monthly underpayment on account of such energy."

Mr. Royhl: To which the defendant objects for the reason that such application comes too late; it is not timely made; and the defendant having completed the trial of the action, both sides having rested, is surprised; prejudicial and can't meet such additional issues; improper and prejudicial to the defendant, and no proof upon which to make such offer exists.

The Court: I don't see there is any additional issues presented. He has merely made a motion to amend the complaint to conform to the testimony now in the record. As to whether or not the evidence before the Court, the record of the case so far would prove the allegations of the complaint is a matter I am not prepared to pass upon at this time, but I think, if the evidence before the Court is conclusive enough to justify the allegations in the proposed amendment, I think counsel should have a right to amend his complaint to conform to the evidence as it now stands. I don't think there is any question about that, but I would not want to pass upon the motion at this time.

Mr. Royhl: May we have an exception to the ruling?

The Court: Certainly. I will take the matter under advisement and I may rule the other way in the future, but if the evidence in the case will prove the allegations in

the proposed amendment then there is no question but what he has a right to amend the complaint to conform to the facts.

(Opinion.)

The Court: Gentlemen, I have made a careful study of the briefs submitted in this case; I have examined a good deal of the evidence; I have listened with a great deal of interest to the oral presentation of your several positions, and I am convinced that perhaps I am as well, if not better, prepared to decide the case now than I would be if I made a further study of it.

As far as the law of the case is concerned, I have already passed upon the question as to the jurisdiction of the Court.

The next question, as I remember [is], raised by the proof, is the contention of the defendant that the action is barred by the equity rule which prohibits a stockholder, who was not a stockholder at the time of the alleged wrong in the conduct of the board of directors of a corporation, from maintaining a suit for or resulting from the wrongdoing, unless he was a stockholder at the time of the wrongful act, or unless his ownership of the stock was due to legal possession of it. While I have no quarrel with the authorities submitted in support of defendant's contention, this is not a law suit that I think that law is applicable to at all. This is not a suit by a stockholder upon a so-called derivative cause of action. This is a suit by an assignee of the cause of action, and I don't think the equity rule contended for by the defendant is applicable at all.

The next law question, as I recall it, as raised by the proofs, is that of the statute of limitations. I don't think the statute of limitations has anything to do with this case.

That leaves only, as I recall it, the main questions of fact to be determined. As to a good many of the essential facts in the case there seems to be no dispute. As I recall the evidence and contention of counsel, there is no dispute as to the figures representing the amount of money which it is contended the plaintiff paid to the defendants for the services contended for by the defendant in the action.

The next question is whether or not those amounts, collected from the plaintiff by the defendant were collected under legal rate schedules and legal contracts under the provisions of the Federal Power Act.

As to the first proposition, that of the alleged deficiency in the rate, there isn't any dispute, as I recall it, as to the amount paid under that agreement.

As I view the law, the Power Act contemplated that corporation or individuals engaged in the interstate transportation of electric energy, as were the parties to this suit, should file with the Commission, prior to the time that any rate went into effect, not only the proposed rate, but all contracts, charges or other agreements that in any way affect the rate. Under the evidence, as I view it, this rate and these various contracts and agreement were never filed properly, within the contemplation of the statute. It is true, the Power Commission, by orders, permitted the filing of the rates that had been withheld from the record and been in force between these parties for as long as two years, if I recall correctly. They permitted the filing of the rate without the filing of other contracts or agreements or charges or information which, under the contemplation of the law, should have been filed. There is no explanation in the evidence, so far as I am able to recall it, which would in [anyway] tend to excuse or justify the defendant company in withholding from the Power Commission, the rate and contracts affecting it, for a period of two years. That is contrary to the real purpose and intent of the law that a thing like that should occur. The fact that the rates were filed in this haphazard manner, coupled with the fact that the necessary information which should have accompanied them was not filed before the Commission, notwithstanding the fact that the Commission, under specific authority granted to it by the Power Act authorized the filing of the various instruments, some of them at least, at a specified time after they went into effect, contrary to the whole spirit and purpose of the Power Act.

That fact in itself, when you take into consideration that it was a rate, established and promulgated in transactions between two or more corporations which were managed and operated by the same board of directors, is enough to create a presumption of unfair dealing.

As I indicated to counsel a few moments ago, I have no thought that any of the men who were directors and officers of the defendant company, who participated in these contracts and agreements were guilty of any lack of personal integrity or personal honor. That is not the question. The question is not whether these men were honest, or whether they were self-respecting citizens. The question is whether or not the rates which they promulgated and which were put into operation by them between these companies, the contracts which were entered into by these companies, whether or not those contracts were absolutely fair and reasonable in every way; whether or not they gave to one of the companies an unfair advantage over another; whether or not one of the companies by the promulgation of these rates and contracts profited materially to the disadvantage of the other company. That is the question before the Court.

Under the facts in this case, as I view them, Gentlemen, I cannot come to any other conclusion in the matter than that these contracts were entered into by this joint board of directors, and that the result of that was of material advantage to the defendant company and to the disadvantage of the predecessors of the plaintiff in this case.

It is argued that all of these acts were permitted, ratified and approved by Mr. White. Mr. White must have been a very busy man. As I recall the evidence, he had charge not only of the operations involved in this suit of some two or three public service corporations who were engaged in the manufacture and distribution of electric energy over a wide stretch of territory, but he had some six or seven public utilities companies under his charge and supervision. The evidence shows that he made several visits to this territory; that he talked to the officers of the company; that he talked to men employed, and [gain] such information as anyone would be expected to gain by that visit and talking with these men, but I don't think that he had that intimate understanding and knowledge of the transactions or details that would enable him to approve a contract in such a way as to be of very much benefit to anybody. Mr. White, as I say, was engaged in the management of some six or seven corporations, all held by the same holding company,

United Public Utilities Corporation. I have no doubt but what Mr. White used his best judgment and his energies in an effort to so conduct those companies as to produce for the holding company, United Public Utilities, the greatest profit that he could, but I am convinced from the evidence in this case that in passing upon the conduct of these joint directors and officers in the transactions between the corporations which were controlled by them and which were operated by them, that he also had in mind the benefit which might accrue to some other corporation that he had. The evidence shows that nothwithstanding the fact that he knew that the production of electricity at Beulah was being sold to the Northwestern Public Service Company at a rate which exceeded the cost of production, that he was anxious that they run to capacity because it benefitted the Knife River Coal Company, and Knife River Coal Company, if he could keep that plant running 24 hours a day, and they furnished all of the coal, the Knife River Coal Company could dispose of coal which otherwise might be surplus.

I don't think Mr. White had that particular interest in the welfare of the individual corporation involved in this case that he had in the success of the aggregate of the corporations which were under his control, and even if he did, I don't think Mr. White's approval or disapproval of the conduct of the Board of Directors of these northern companies has anything to do with it.

The officers of the northern companies were the officers charged with the duty of operating this corporation. There is nothing in the law that I know of that made it necessary for Mr. White to approve or disapprove of their conduct. His board of directors, as he calls them, the Board of Directors of the holding company, United Public Utilities Co., knew nothing about the transactions between the companies involved in this law suit, or their predecessors, except what Mr. White told them. Mr. White knew nothing about it except what somebody connected with the transactions involved in this law suit told him. I don't regard the approval of the United Public Utilities Co. as in any material way affecting the equities in this case.

It is true the record shows the whole board of directors

of the United Public Utilities Co. came out to South Dakota once and looked these properties over. I don't know how much time they put in; how much in detail they went in the examination of the records, or manner in which it was conducted and contracts entered into or contemplated at that time. I don't recall that the record indicates how long they stayed here; whether they were out here primarily as a vacation or whether they came out to find out what they could about the plant. I only know that as a matter of common knowledge it is not unusual for a board of directors of a big holding company like this to plan a trip to San Francisco to a Worlds Fair, where they can transact some company business. I have heard of a board of directors of a corporation planning a trip to South Dakota during the pheasant season. I don't know what these men came out here for, but there isn't anything connected with their trip out here, as far as the record goes, that shows they found out anything particularly about the conduct of these corporations. So I don't think their approval in any way affected the activities of any of the companies.

As I say, there is no contest, as I recall it, as to the figures affecting the amount which it is claimed by the plaintiff was wrongfully collected by the defendant. The only question in dispute then would be as to whether or not these rates and contracts were unfair and unreasonable; whether or not they have been properly and duly filed with the Power Commission. From the evidence, I can't view it in any other way than that the contracts that were entered into, the rates and schedules and everything that was entered into, operated by this joint board of directors and officers, primarily were of material benefit to the defendant company and to the material detriment of the plaintiff's predecessors.

As I say, I don't think any further study would change my mind in regard to it.

It is the judgment of the Court that the plaintiff shall recover, and upon presentation of findings and judgment to that effect, the same will be signed and entered of record.

Mr. Woods: We would like to have a little time to make some requests for findings and conclusions.

The Court: That is entirely satisfactory to me. You may have until September 15th. We will set it for that date or as soon thereafter as counsel can be heard.

(Indorsed)—Filed Aug. 27, 1948, Roy B. Marker, Clerk. By Helen S. Lambert, Deputy.

Requests by Defendant, Northwestern Public Service Company, for Findings of Fact and Conclusions of Law.

Now comes defendant, Northwestern Public Service Company, pursuant to leave of Court and respectfully submits the following findings of fact and conclusions of law and requests that the Court adopt and enter each of said findings of fact and each of said conclusions of law as the findings of fact and conclusions of law of the Court in this cause.

Findings of Fact.

I. *Findings Applicable to All Causes of Action.*

1. Plaintiff was prior to the commencement of this action and at all times thereafter has been and now is a Delaware corporation and a citizen of said state, continuously qualified as a foreign corporation in the State of South Dakota since June 27, 1935 and in the State of North Dakota since July 2, 1935.

2. Defendant was prior to the commencement of this action and at all times thereafter has been and now is a Delaware corporation and a citizen of said state and has been continuously qualified to do business in the State of South Dakota since December 23, 1923.

3. The amount in controversy in each of the ten causes of action in the complaint, as amended, exclusive of interest and costs, exceeds $3,000, except that the amount in controversy in each of the seventh and eighth causes of action does not exceed $3,000, exclusive of interests and costs.

4. Northern Power & Light Company (hereinafter called "Northern") was a Delaware corporation continuously

from prior to January 1, 1928, to July 1, 1939 and was qualified to do business in the states of N h Dakota and South Dakota during said period.

5. North Dakota Power & Light Company (hereinafter called "North Dakota") was a Delaware corporation continuously from prior to January 1, 1928 to July 1, 1939 and was qualified to do business in the State of North Dakota during said period.

6. On July 1, 1939 Northern and North Dakota, pursuant to the laws of the State of Delaware, merged into one corporation, the surviving corporation being North Dakota, which changed its name in said merger proceedings to Dakota Public Service Company (hereinafter called "Dakota").

7. From July 1, 1939 to and after October 19, 1945 Dakota was a Delaware corporation, and since July 13, 1939 and to and after October 19, 1945 was qualified as a foreign corporation in the State of South Dakota and since July 1, 1939 and to and after October 19, 1945, in the State of North Dakota.

8. Pursuant to the terms of said merger, Dakota became the owner of all the public utility business of Northern, in addition to the properties on the date of said merger owned by North Dakota; and thereafter Dakota owned and operated as a public utility the properties formerly owned by it (as North Dakota) and the properties on the date of said merger owned by Northern.

9. The corporation laws of the State of Delaware provide that when two corporations of said state merge pursuant to the provisions of said corporation laws, then the surviving corporation shall, among other things, be subject to all of the restrictions, disabilities and duties of each of the corporations so merged; and, further, that in the case of such merger all debts, liabilities and duties of the respective constituent corporations shall upon said merger attach to the surviving corporation and may be enforced against it to the same extent as if said debts, liabilities and duties had been incurred or contracted by it.

10. The following persons were directors and officers of defendant and at the same time directors and officers of

Northern and North Dakota (prior to July 1, 1939) or of Dakota (after July 1, 1939): F. E. Kruesi from January 1, 1935 to July 21, 1937; C. J. Strike from January 1, 1935 to June 1, 1938; C. L. Sandstedt from January 1, 1935 to June 28, 1944; W. R. Gasin from January 1, 1935 to January 31, 1935; J. F. Buckmier from March 10, 1937 to October 19, 1945; G. R. McArthur from July 21, 1937 to October 19, 1945; A. B. Sanborn from July 1, 1938 to October 19, 1945; Wm. M. Dunn from July 24, 1944 to October 19, 1945. The following persons were officers of defendant and at the same time officers of Northern and North Dakota (prior to July 1, 1939) or of Dakota (after July 1, 1939): J. F. Buckmier from January 1, 1935 to February 26, 1935; E. W. Dempewolf from November 27, 1936 to April 21, 1941; Ralph Mauch from April 21, 1941 to September 14, 1942; Margaret Frost from September 14, 1942 to October 19, 1945.

11. Throughout the period from January 1, 1935 to October 19, 1945 there was no person who was either an officer or director of defendant and at the same time was either an officer or director of either Northern, North Dakota or Dakota, except for the persons and during the periods named in the preceding Finding of Fact No. 10.

12. In each of the aforesaid instances enumerated in the preceding Finding of Fact No. 10 the holding of offices and directorships, as the case may be, in Northern, North Dakota or Dakota (hereinafter sometimes collectively called "Northern Companies") simultaneously with the holding of offices or directorships, as the case may be, in defendant by the individuals named in said Finding of Fact was made known to the Federal Power Commission, and the holding of all such positions was authorized by said Commission by orders duly issued by it.

13. Throughout the period from January 1, 1935 to and including June 30, 1939 the Board of Directors of Northern consisted of five members, and the Board of Directors of North Dakota consisted of five members. From July 1, 1939 to October 19, 1945 the Board of Directors of Dakota consisted of five members. From January 1, 1935 to October 19, 1945 the Board of Directors of defendant consisted of seven members.

14. Throughout the period from January 1, 1935 to July 1, 1939 Samuel W. White was a director of both Northern and North Dakota and was also a director and President of United Public Utilities Corporation (hereinafter called "U. P. U."), a New Jersey corporation. Throughout the period from July 1, 1939 to October 19, 1945, both inclusive, Samuel W. White was a director of Dakota and was also a director and President of U. P. U. At no time throughout the period from January 1, 1935 to October 19, 1945, both inclusive, was Samuel W. White an officer of Northern, North Dakota or Dakota or a director, officer or stockholder of defendant or of Middle West Utilities Company, a Delaware corporation, or The Middle West Corporation, a Delaware corporation, or of any subsidiary thereof or company affiliated therewith.

15. On April 15, 1932 Samuel W. White was appointed by the United States District Court for the Northern District of Illinois, Eastern Division, receiver of United Public Utilities Company and of United Public Service Company and a third company. This equity receivership was succeeded by reorganization proceedings under Section 77B of the Bankruptcy Act in which Samuel W. White continued as trustee. The reorganization proceedings terminated on December 31, 1934, and throughout the period from April 15, 1932 to said date all the capital stock of both North Dakota and Northern was owned by United Public Utilities Company. During the same period all of the capital stock of Knife River Coal Mining Company (hereinafter called "Knife River"), a Minnesota corporation, was also owned by United Public Utilities Company. Throughout said receivership and the subsequent reorganization proceedings all the directors of North Dakota, Northern and Knife River were elected by the outstanding stock of said respective corporations under and subject to the control and direction of said Samuel W. White as receiver and as trustee. Also during said period the officers of said three companies in every instance were approved by said Samuel W. White as receiver or as trustee prior to their election or appointment to their respective offices.

16. During practically all of the period from April 15, 1932 through December 31, 1934, Samuel W. White was a director of both Northern and North Dakota.

17. Throughout the period from January 1, 1935 to October 19, 1945, both inclusive, all the stock of the Northern companies and of Knife River was owned by U. P. U. which was successor to United Public Utilities Company. Throughout the same period the persons who acted as directors of the Northern Companies and of Knife River were approved by U. P. U., and the aforesaid stock of said companies was voted in favor of the election of said persons with the consent and at the direction of U. P. U. Also throughout said period the officers of the Northern Companies and of Knife River were approved by U. P. U. prior to their election or appointment to their respective offices.

18. Throughout the period from prior to January 1, 1932 to after October 19, 1945 all the outstanding common stock of defendant was owned by North West Utilities Company, a Delaware corporation, and all the outstanding common stock of North West Utilities Company was owned by The Middle West Corporation or by its predecessor, Middle West Utilities Company.

19. During the receivership and the reorganization proceedings concerning United Public Utilities Company all the common stock of that company was owned by United Public Service Company, a New Jersey corporation, which was one of the three companies of which Samuel W. White was receiver and trustee. During the same period practically all of the common stock of United Public Service Company was owned by Middle West Utilities Company.

20. The common stock of U. P. U. was divided under the provisions of its charter into Class A and Class B shares, and by charter limitation the Class B common stock was entitled to elect only one of the directors of U. P. U. until 50% of the total of U. P. U.'s collateral trust bonds and of its preferred capital stock were either converted or paid and retired. This limitation ceased on July 1, 1945. Throughout the period from January 1, 1935 to July 1, 1945 the number of directors on the Board of U. P. U. varied between five and seven, and for no interval throughout this period did the Class B common stock elect more than one director.

21. Throughout the period from January 1, 1935 to October 19, 1945 not less than 48.65% nor more than 56.34%

of the voting stock of United Public Service Corporation (successor to United Public Service Company) was owned by The Middle West Corporation or by its predecessor, Middle West Utilities Company, and during the same period United Public Service Corporation owned a majority of the Class B common stock of U. P. U. During the same period neither The Middle West Corporation nor its predecessor, Middle West Utilities Company, nor any subsidiary of or other company affiliated with either of said two companies owned other than negligible amounts of the Class A common stock or of either of the series of preferred stock of U. P. U. In 1939 The Middle West Corporation sold all the remaining securities of U. P. U. held by it and thereafter owned no securities whatsoever of U. P. U.

22. At no time from January 1, 1935 to October 19, 1945 did The Middle West Corporation or its predecessor, Middle West Utilities Company, or United Public Service Corporation or any other company affiliated with or controlled by any of said three companies elect more than one director upon the Board of Directors of U. P. U.

23. At no time throughout the period from January 1, 1935 to October 19, 1945 was any director on the Board of U. P. U. also a director of The Middle West Corporation or of any of its subsidiaries, except that Nicholas P. Zech was a director of U. P. U. and of North West Utilities Company in the years 1936, 1937 and 1938, and that Gail Belden was a director of U. P. U. and of North West Utilities Company and of United Public Service Corporation in 1944 and 1945. Nicholas P. Zech and Gail Belden were the directors of U. P. U. elected by the Class B common stock in 1936, 1937 and 1938 and in 1944 and 1945, respectively. At no time throughout said period was any director of U. P. U. a director or officer of defendant.

24. At no time throughout the period from January 1, 1935 to October 19, 1945 was any director or officer of the Northern Companies or of Knife River or of defendant ever a director or officer of U. P. U., North West Utilities Company, Middle West Utilities Company or The Middle West Corporation, with the single exception of Samuel W. White who was a director and President of U. P. U.

25. During the entire period from January 1, 1935 to October 19, 1945 the defendant neither owned any of the capital stock of U. P. U., North Dakota, Northern, Dakota or Knife River, nor did it elect any of the directors or appoint any of the officers of said companies.

26. During the entire period from April 15, 1932 to October 19, 1945 neither U. P. U. nor its predecessor, United Public Utilities Company, was dominated or controlled by the defendant or by The Middle West Corporation or its predecessor, Middle West Utilities Company, or any subsidiary thereof or company affiliated therewith.

27. During the entire period from April 15, 1932 to October 19, 1945 neither North Dakota, Northern, Dakota nor Knife River was dominated or controlled by the defendant or by The Middle West Corporation or its predecessor, Middle West Utilities Company, or any subsidiary thereof or company affiliated therewith.

28. Throughout the period during which Samuel W. White was a director of the Northern Companies, he at all times dominated and controlled the action taken by the Boards of Directors and officers of said corporations and directed and controlled the policies, operations, business and affairs of each of said corporations.

29. The Northern Companies and Knife River produced approximately forty per cent of the operating revenues and two-thirds of the net profits received by U. P. U.

30. None of the individuals who at any time were directors or officers of defendant and were also at the same time directors or officers of any of the Northern Companies acted fraudulently or dishonestly in connection with any of the contracts involved in this action or in the negotiation, preparation or execution thereof or the operations thereunder, but each of said individuals at all times in connection with said contracts and the operations thereunder and the relationships between the defendant and the Northern Companies acted honestly, with personal integrity, and in good faith.

31. Samuel W. White, as Receiver of United Public Utilities Company, consented to and approved the first

arrangements between North Dakota and Northern and the receivers of Middle West Utilities Company under which North Dakota and Northern received certain advisory services in connection with engineering, accounting, advertising and similar matters. Middle West Service Company commenced business January 30, 1936, and new contracts were made between North Dakota and Northern and Middle West Service Company in place of those previously existing between North Dakota and Northern and the receivers and trustees of Middle West Utilities Company. These contracts were fully known to and approved and authorized by U. P. U. A similar contract was made in 1939 between Dakota and Middle West Service Company in order to reflect the results of the merger of North Dakota and Northern.

32. Neither the defendant nor any of the persons who at any time were officers or directors of defendant and simultaneously were also officers or directors of the Northern Companies caused said arrangements with the receivers and trustees of Middle West Utilities Company to be made, or said contracts with Middle West Service Company to be entered into or to be signed by any of the Northern companies or on their behalf.

33. The interconnection facilities described in certain of the contracts involved in this action were constructed by defendant at its sole cost in 1929 to 1931. These facilities and the purposes of their construction and operation were as follows:

(1) A 38,000 volt transmission line from the substation of defendant at Aberdeen, South Dakota, northward to Barnard, South Dakota, to enable Northern to protect its service in the area north, northwest and west to Barnard by access to the generating capacity of defendant;

(2) A 38,000 volt transmission line from the substation of defendant at Aberdeen, South Dakota, westward to Ipswich, South Dakota, to enable Northern to protect its service in that town and the area lying north and west of that point by access to the generating capacity of defendant;

(3) A 33,000 volt transmission line from Highmore, South Dakota, to Gettysburg, South Dakota, to enable Northern to protect and better its service at Gettysburg and its entire system by access to the generating capacity of defendant;

(4) The portion of the interconnected substation and control equipment at Aberdeen, South Dakota, used exclusively for the interconnection with Northern;

(5) A substation at Gettysburg, South Dakota, used exclusively for the interconnection with Northern and to serve the town of Gettysburg.

34. Prior to, during and after the construction of the interconnection facilities described in certain of the contracts involved in this action, Northern's system was weak and inefficient, due principally to the lack of sufficient generating capacity on its system and to poor transmission facilities. Without the interconnection facilities Northern was unable to carry its peak loads and to afford essential protection against the hazards of weather, poor transmission and an inadequate and unreliable supply of energy, resulting in threats of municipal ownership in many parts of the territories served by Northern. Northern was unable to obtain sufficient energy from North Dakota to serve its needs and to protect its service. Neither Northern, North Dakota, nor United Public Utilities Company, at the time the interconnection facilities were constructed, was financially able to provide the additional necessary generating capacity and transmission facilities needed by Northern in its own system. Defendant had ample generating capacity to aid Northern. Through the construction of the interconnection facilities, Northern's deficiency of generating capacity was corrected and the inefficiencies of its transmission system were eliminated except those due to inadequate voltage and poor physical condition.

35. The interconnection facilities described in certain of the contracts involved in this action were not constructed for the sole use and benefit of defendant. The principal benefits resulting from the construction of said interconnection facilities accrued to Northern.

36. From the time the construction of the interconnection facilities described in certain of the contracts involved in this action was completed in 1931 through October 19, 1945, certain additions were made in generating capacity on the system of the Northern Companies with the prior approval of U. P. U. Due to the steadily increasing load on the systems of the Northern Companies, the generating capacity of said companies never was adequate to serve their needs except during the last four months of 1940. During this entire period defendant at all times furnished the necessary additional generating capacity to enable the Northern Companies to meet their requirements which would have been impossible without the continuation of the interconnection facilities. The interconnection facilities were of benefit and value to the Northern Companies throughout said period.

37. U. P. U. had full knowledge throughout the period from January 1, 1935 to October 19, 1945, of all of the operations of the Northern Companies under each of the contracts involved in this suit, the performance of said contracts and of the relationships and transactions between its said subsidiaries and defendant, and, through its directors and officers, U. P. U. fully considered, approved and affirmed all such operations, performances, relationships and transactions.

38. Samuel W. White, as President and a director of U. P. U., sole stockholder of the Northern Companies, and also as a director of said Northern Companies, was fully familiar with all of the provisions of the 1936 contract, 1938 contract, 1939 Interconnection Contract, 1939 Interchange Capacity Agreement, 1941 contract, 1943 amendment thereof, and the 1936 and 1939 Agreements for Allocation of Joint Management Expenses, and with the rates and charges provided for in said contracts, and was fully satisfied with said contracts, the terms and provisions thereof and said rates and charges provided therein.

39. Samuel W. White, both as President and a director of U. P. U., the sole stockholder of the Northern Companies, and as a director of said Northern Companies, was

fully advised of the operations of said companies under the 1936 contract, 1938 contract, 1939 Interconnection Contract, 1939 Interchange Capacity Agreement, 1941 contract, both prior to and after the 1943 amendment, and the 1936 and 1939 Agreements for Allocation of Joint Management Expenses, and was fully satisfied with said operations.

40. In 1942 integration proceedings were instituted by the Securities and Exchange Commission under Section 11 (b) (1) of the Public Utility Holding Company Act of 1935 against U. P. U. and its subsidiaries, including Dakota, Extensive hearings were had in said proceedings, at which U. P. U. through its officers and counsel was present and participating. It submitted and supported the contractual arrangements between Dakota and defendant, including the joint management arrangement, the contractual arrangement with Middle West Service Company, and the holding of interlocking offices and directorships by all common officers and directors of Dakota and defendant.

41. On October 9, 1945 hearings were had before the Securities and Exchange Commission concerning the issuance of an order by that Commission permitting the acquisition by plaintiff from U. P. U. of the stock and other securities of Dakota and during the course of said proceedings the entire transcript of said prior integration proceedings was incorporated by reference. Plaintiff was present and participated throughout said proceedings of October 9, 1945, through its officers and counsel.

42. At no time throughout the period September 1, 1935 to October 19, 1945 were any of the rates and charges made by defendant against the Northern Companies, or vice versa, based upon an estimate of a hypothetical cost to the Northern Companies or any mistake of fact.

43. Under date of August 12, 1946 plaintiff filed a verified complaint against defendant with the Federal Power Commission alleging that the rates and charges in effect under the 1941 contract, as amended by the 1943 amendment, were unjust and unreasonable. Said complaint

alleged domination and control of Dakota and its predecessors, North Dakota and Northern, and of defendant by The Middle West Corporation at the time of the execution of the 1936, 1938, the two 1939, and the 1941 contracts and of the 1943 amendment. It contained no charge with respect to any alleged action by or on behalf of defendant, acting through its officers and directors or otherwise.

44. Said complaint filed by plaintiff with the Federal Power Commission referred to and set forth as exhibits thereto the 1936, 1938, 1939 Interconnection Contract, 1939 Interchange Capacity Agreement, 1941 contract and the 1943 amendment thereto. Said complaint contains no allegation with respect to unlawful or improper filing of any of said contracts.

45. Under date of February 27, 1946 plaintiff served notice of termination of the 1941 contract, as amended, effective August 31, 1947. Thereafter, and subsequent to the filing of this suit plaintiff filed a verified amendment to its complaint before the Federal Power Commission in which it alleged that it was short of necessary generating capacity on the Dakota properties and asked for an order that the interconnection facilities be maintained so as to permit plaintiff to purchase large amounts of electric energy from defendant until at least November 1, 1947.

46. Shortly prior to the effective date of the notice of termination of the 1941 contract, as amended, plaintiff and defendant agreed upon a rate for energy to be sold by defendant to plaintiff after September 1, 1947 and upon receipt of copies of said agreement the Federal Power Commission dismissed as moot the complaint and amendment theretofore filed by plaintiff.

47. On July 2, 1945 plaintiff and U. P. U. entered into a written contract pursuant to which plaintiff agreed to purchase from U. P. U. all of the outstanding stock and securities of both Dakota and Knife River for a price in excess of $7,000,000, which price was negotiated and agreed upon in April of 1945 by and between R. M. Heskett, President of plaintiff, and Samuel W. White, President of U. P. U.

48. Both before and after the signing of said contract plaintiff made a thorough and detailed study of the properties, plants and facilities of both Dakota and Knife River and of their books and records, contracts and relations with defendant. Such investigation was conducted on behalf of plaintiff by, among others, a firm of accountants and also a firm of engineers, both of which had represented plaintiff for many years. Plaintiff had complete access to the books and records of Dakota and Knife River and its representatives questioned officers and employees of defendant and of Dakota and Knife River both prior and subsequent to making such contract.

49. Prior to the execution of said contract of purchase dated July 2, 1945 plaintiff knew of all contracts and arrangements then exisiting and which had previously existed by and between Dakota and defendant and by and between Knife River and defendant. Plaintiff also knew of the operation of the Northern Companies under a joint management arrangement with defendant and that certain persons were and had been either officers or directors of defendant and at the same time officers or directors of the Northern Comapnies.

50. Said contract of purchase was consummated on October 19, 1945 and on the same day pursuant to a plan of liquidation adopted by Dakota at the instance of plaintiff the stock and securities of Dakota so acquired by plaintiff were surrendered by plaintiff for cancellation and extinguishment in exchange for the transfer to plaintiff of all assets and property of Dakota.

51. The several contracts between Dakota and its predecessors on the one hand, and defendant on the other, and the rates and charges provided therein were fair, just and reasonable under all the circumstances.

II. *Findings Applicable to First and Second Causes of Action.*

1. From January 1, 1933 to January 31, 1936 defendant and Northern interchanged surplus electric energy at the rate of 5 mills per kilowatt-hour under an oral contract which was fully known to and approved by Samuel W.

White as receiver and trustee of United Public Utilities Company and by U. P. U. Under date of January 28, 1936 defendant submitted to the Federal Power Commission the terms of said oral contract, being the information required by Order No. 36 of said Commission as originally adopted December 16, 1935. The letter submitting such information was designated by the Federal Power Commission as Northwestern Public Service Company Rate Schedule F. P. C. No. 1 and given an effective date of January 31, 1936 by the Commission.

2. The rate covered by said Northwestern Public Service Company Rate Schedule F. P. C. No. 1 was 5 mills per kilowatt-hour for the interchange of surplus electric energy. Plaintiff has admitted that said rate schedule was properly filed with the Federal Power Commission. The 5 mill per kilowatt-hour rate for the interchange of energy remained the same from January 1, 1933 through October 19, 1945.

3. The contract dated October 7, 1936, between Northern and defendant (Exhibit B to the Complaint), by its terms was effective from January 1, 1936 and ran for five years thereafter, terminable by either party on 18 months notice. Said contract was signed and attested by officers of Northern on its behalf at the direction and with approval of U. P. U., the sole stockholder of Northern.

4. Neither defendant nor any of the persons who at any time were officers or directors of defendant and were also at the same time officers or directors of Northern caused said 1936 contract to be entered into or to be signed by Northern or on its behalf.

5. Said 1936 contract was not entered into for the benefit of defendant or to the injury or detriment of Northern, but was fair, reasonable and just in all of its terms and provisions.

6. The terms and provisions of said 1936 contract were negotiated and drafted on behalf of Northern by Samuel W. White and other representatives of U. P. U. who had no connection with or interest in defendant or The Middle West Corporation or any subsidiary thereof or company affiliated therewith.

7. The question of making such contract and the reasonableness of the rates and charges therein provided as to Northern was extensively considered and discussed by the entire Board of Directors of U. P. U. at several meetings thereof, and the entire situation, including particularly the reasonableness and fairness as to Northern of the rates and charges to be provided in said contract, was extensively investigated by C. E. Lakin and Samuel W. White as agents and representatives of U. P. U., whose recommendations were reported in full to and considered at length by the entire Board of U. P. U. C. E. Lakin had no connection with or interest in defendant or The Middle West Corporation or any subsidiary thereof or any company affiliated therewith, but was the President of several other utility subsidiaries of U. P. U. in Ohio and Indiana. In 1940 said Lakin was also elected a director of U. P. U. and continued to serve as such continuously thereafter to and including October 19, 1945.

8. Prior to its execution by Northern or defendant, said 1936 contract was authorized and approved by the Board of Directors of U. P. U.

9. Said 1936 contract was filed with the Federal Power Commission on December 23, 1938, assigned a rate schedule classification by said Commission as Northwestern Public Service Company Rate Schedule F. P. C. No. 3, and made effective as of January 1, 1936 by order issued by the Federal Power Commission.

10. Said 1936 contract contained two rates or charges, one being an interchange energy rate of 5 mills per kilowatt-hour, and the other being transmission line charge of $1666.66 a month covering Northern's share of the fixed charges, maintenance and operating expenses relating to the interconnection facilities described in the contract. The 5 mill per kilowatt-hour interchange energy rate was the same as the 5 mill interchange energy rate previously on file with the Federal Power Commission as Northwestern Public Service Company Rate Schedule F. P. C. No. 1. The transmission line charge of $1666.66 a month was created for the first time by the 1936 contract and was a new rate or charge filed for the first time with the Federal Power Commission. Said transmission line

charge was neither a change in nor an addition to the previously filed interchange energy rate of 5 mills per kilowatt-hour.

11. The 5 mill per kilowatt-hour interchange energy rate and the $1,666.66 monthly transmission line charge in said 1936 contract was each fair, just and reasonable in so far as Northern and North Dakota were concerned during the entire period that said contract was in force and effect, from January 1, 1936 to July 1, 1939.

12. The $1,666.66 monthly transmission line charge in said 1936 contract was based upon and supported by adequate consideration.

13. Neither the 5 mill per kilowatt-hour interchange energy rate nor the transmission line charge of $1,666.66 per month in said 1936 contract was fixed by any of the individuals who at any time were officers or directors of North Dakota or Northern and also were at the same time officers or directors of defendant.

14. Said 1936 contract was not executed for the purpose of fixing terms, rates and charges which would be made by the parties against each other for and in connection with the transmission and sale of electric energy to be generated in the State of North Dakota and transmitted to the State of South Dakota or vice versa. Said contract was executed to provide for the payment by Northern of its share of the fixed charges, maintenance and operating expenses relating to the interconnection facilities described in the contract in consideration of the continued use thereof by Northern, and to reduce to written form the then existing oral agreement covering the interchange of surplus energy at 5 mills per kilowatt-hour.

15. For the period from January 1, 1936 to July 1, 1939 Northern paid to defendant $70,000 for and on account of said transmission line charge of $1,666.66 per month. Defendant did not cause Northern to make these payments. It had nothing to do with such payments except to receive the same in consideration for the use by Northern of the interconnection facilities as provided in

the 1936 contract. Said payments were made in every case with the complete knowledge and approval of U. P. U.

16. From September 1, 1935 to July 1, 1939, neither the defendant nor any of the individuals who at any time were officers or directors of the defendant and were also at the same time officers or directors of Northern and North Dakota caused North Dakota to generate in that state and transmit to Northern at any point energy, which was in turn transmitted by Northern to defendant at any point.

17. All amounts of energy which were generated by either North Dakota or Northern and transmitted by Northern to defendant during the entire period from September 1, 1935 to July 1, 1939, were generated and transmitted either under the oral contract between Northern and defendant filed with the Federal Power Commission as Northwestern Public Service Company Rate Schedule F. P. C. No. 1 (Exhibit A-1 to the Complaint) or under and pursuant to the provisions of the 1936 contract (Exhibit B to the Complaint), and were generated and transmitted by and with the full knowledge, approval and consent of U. P. U., the sole stockholder of both North Dakota and Northern.

18. The just and reasonable value of all energy delivered by Northern to defendant during said period September 1, 1935 to July 1, 1939, was 5 mills per kilowatt-hour, which Northern received from defendant.

19. Defendant did not cause Northern to receive from defendant for the net energy delivered by Northern to defendant during the period September 1, 1935 through June 30, 1939, the amount of $62,751.90, being computed at the rate of 5 mills per kilowatt-hour. Defendant had nothing to do with the receipt of that amount by Northern except to pay said amount pursuant to the terms and provisions of the 1936 Contract. Payments aggregating such amount for the net energy delivered by Northern in said period were received by Northern in every case with the complete knowledge and approval of U. P. U.

III. *Findings Applicable to Third Cause of Action.*

1. Under date of January 28, 1936 defendant submitted to the Federal Power Commission the terms of its oral contract with Northern for the exchange of electric energy by and between said companies, being the information required by Order No. 36 of said Commission as originally adopted December 16, 1935. The letter submitting such information was designated by the Federal Power Commission as Northwestern Public Service Company Rate Schedule F. P. C. No. 1 and given an effective date of January 31, 1936 by the Commission.

2. The rate covered by said Northwestern Public Service Company Rate Schedule F. P. C. No. 1 was 5 mills per kilowatt-hour for the interchange of surplus electric energy. Plaintiff has admitted that said rate schedule was properly filed with the Federal Power Commission. The 5 mills per kilowatt-hour rate for the interchange of energy remained the same from January 1, 1933 through October 19, 1945.

3. The contract dated January 1, 1938 between North Dakota, Northern and defendant (Exhibit C to the Complaint) by its terms was effective from January 1, 1938 for one year and for successive periods of one year thereafter unless cancelled by six months' notice by any party. Said contract was signed and attested by officers of North Dakota and Northern on their behalf at the direction and with the approval of U. P. U., the sole stockholder of North Dakota and Northern.

4. Neither defendant nor any of the persons who at any time were officers or directors of defendant and were also at the same time officers or directors of Northern or North Dakota caused said 1938 contract to be entered into or to be signed by Northern or North Dakota or on their behalf.

5. Said 1938 contract was not entered into for the benefit of defendant or to the injury or detriment of North Dakota or Northern, but was fair, reasonable and just in all of its terms and provisions.

6. The terms and provisions of said 1938 contract were negotiated and drafted on behalf of Northern and North Dakota by Samuel W. White and other representatives of U. P. U., none of whom had any connection with or interest in defendant or The Middle West Corporation or any subsidiary thereof or company affiliated therewith.

7. Said 1938 contract was not executed for the purpose of fixing terms, rates and charges which would be made by the parties against each other for and in connection with the transmission and sale of electric energy to be generated in the State of North Dakota and transmitted to the State of South Dakota or vice versa. The purpose of said contract was to pool the generating capacities of North Dakota, Northern and defendant so as to operate the three systems as one single interconnected system and thereby to effect a saving in the amount of reserve generating capacity which would otherwise have been required by each of said three companies operated as a single independent system. Said contract required each of the parties thereto to maintain and make available to the other parties thereto such reserve capacity as said party might possess, and under the contract the party or parties which were short of reserve capacity were required to make payments to the party or parties having an excess of reserve capacity. The rate at which energy was to be generated and transmitted from either the State of North Dakota to the State of South Dakota or vice versa was already fixed and agreed upon in and by the 1936 contract between Northern and defendant.

8. The question of making such contract and the reasonableness of the rate therein provided as to North Dakota and to Northern was extensively considered and [discusses] by the Board of Directors of U. P. U. at several meetings thereof and the entire situation, including the increasing shortage of reserve capacity on the system of North Dakota and of generating capacity on the system of Northern, the increasing load on the systems of both companies, and the reasonableness and fairness as to both North Dakota and Northern of the rate to be provided in said contract, was extensively investigated by Samuel W. White, as President and agent of U. P. U. Said Samuel W. White reported in full the results of all of his investigations and study to the

Board of U. P. U. and the several directors on said Board studied and considered the questions involved independently.

9. Prior to its execution by Northern, North Dakota or defendant, said 1938 contract was approved by the Board of Directors of U. P. U.

10. Said 1938 contract was executed during the first ten days of December, 1938, and was filed with the Federal Power Commission on December 23, 1938. It was thereupon assigned a rate schedule classification by said Commission as Northwestern Public Service Company Rate Schedule F. P. C. No. 4 and made effective as of January 1, 1938 by order issued by the Federal Power Commission.

11. The rate contained in said 1938 contract was $13.20 per kilowatt of firm demand per year, as defined in said contract, payable by the party or parties which had a deficiency in reserve capacity to the party or parties having an excess of reserve capacity. This reserve capacity charge of $13.20 was created for the first time by the 1938 contract and was a new rate or charge filed for the first time with the Federal Power Commission. Said rate or charge of $13.20 was neither a change in nor an addition to the previously filed interchange energy rate of 5 mills per kilowatt-hour or the previously filed transmission line charge of $1,666.66 per month.

12. Said 1938 contract was not a scheme or plan conceived and put into effect or operation by defendant or by any of the officers or directors of defendant for the purpose of exacting large charges from Northern and North Dakota in order to offset charges of those two companies for energy generated in North Dakota and transmitted to and sold to defendant for resale in South Dakota.

13. The $13.20 reserve capacity charge in said 1938 contract was fair, just and reasonable insofar as both Northern and North Dakota were concerned during the entire period that said contract was in force and effect from January 1, 1938 to June 30, 1939, both inclusive.

14. The $13.20 reserve capacity charge in said 1938 contract was based upon and supported by adequate consideration.

15. The $13.20 reserve capacity charge was not fixed by any of the individuals who at any time were officers or directors of North Dakota or Northern and also were at the same time officers or directors of defendant.

16. While the 1938 contract was in force and effect from January 1, 1938 through June 30, 1939, Northern paid to defendant $22,440.00 for the year 1938 for the excess of reserve capacity which defendant supplied because of Northern's deficiency in reserve capacity, and neither North Dakota nor defendant paid anything to any other party to the contract for that year; for the period, January 1, 1939, through June 30, 1939, Northern paid to defendant $9,068.40 because of that portion of its deficiency in reserve capacity which was supplied out of the excess of reserve capacity which the defendant supplied, and Northern also paid to North Dakota $4,131.60 for the balance of its deficiency in reserve capacity which was supplied by the excess of reserve capacity which North Dakota had. Defendant did not cause Northern to make the foregoing payments to defendant or to North Dakota and had nothing to do with such payments except to receive those made to it in consideration for the excess of reserve capacity which it supplied to the power pool. Said payments by Northern, both to defendant and to North Dakota, were made in every case with the complete knowledge and approval of U. P. U.

17. At all times during the period when the 1938 contract was in effect the excesses and deficiencies in reserve capacity of North Dakota, Northern and defendant were [determmined] for each of the years by the operating committee as provided in and by said contract and in accordance with the terms and provisions thereof. U. P. U. had full knowledge of and approved such determinations in every case. In each year the determinations of the operating committee were filed with the Federal Power Commission and accepted by that Commission. In no case did the determinations by said operating committee change or in any way affect the reserve capacity charge of $13.20 provided in said contract.

IV. *Findings Applicable to Fourth and Fifth Causes of Action.*

1. Under date of January 28, 1936 defendant submitted to the Federal Power Commission the terms of its oral contract, with Northern for the exchange of electric energy by and between said companies, being the information required by Order No. 36 of said Commission as originally adopted December 16, 1935. The letter submitting such information was designated by the Federal Power Commission as Northwestern Public Service Company Rate Schedule F. P. C. No. 1 and given an effective date of January 31, 1936 by the Commission.

2. The rate covered by said Northwestern Public Service Company Rate Schedule F. P. C. No. 1 was 5 mills per kilowatt-hour for the interchange of surplus electric energy. Plaintiff has admitted that said rate schedule was properly filed with the Federal Power Commission. The 5 mill per kilowatt-hour rate for the interchange of energy remained the same from January 1, 1933 through October 19, 1945.

3. The contracts dated July 1, 1939 and designated "Interconnection Contract" (Exhibit D to the Complaint) and "Interchange Capacity Agreement" (Exhibit E to the Complaint) between Dakota and defendant were each signed and attested by officers of Dakota on its behalf at the direction and with the approval of U. P. U., the sole stockholder of Dakota. The Interconnection Contract was effective on July 1, 1939 and for eighteen months thereafter, and was then to remain in effect until cancelled by eighteen months' written notice by either party. The Interchange Capacity Agreement was also effective on July 1, 1939 and for succeeding terms of one year thereafter unless cancelled by either party upon six months' written notice.

4. Neither defendant nor any of the persons who at any time were officers or directors of defendant and were also at the same time officers or directors of Dakota caused either the 1939 Interconnection Contract or the 1939 Interchange Capacity Agreement to be entered into or to be signed by Dakota or on its behalf.

5. Neither the 1939 Interconnection Contract nor the 1939 Interchange Capacity Agreement were entered into for the benefit of defendant or to the injury or detriment of Dakota. Each of said contracts was fair, just and reasonable in all of its terms and provisions.

6. The rates and charges contained in the 1939 Interconnection Contract with respect to the interchange of energy at 5 mills per kilowatt-hour and with respect to the use of interconnection facilities at $1,666.66 per month were the same as those contained in the 1936 contract. The rate and charge of $13.20 for reserve capacity contained in the 1939 Interchange Capacity Agreement was the same as the rate or charge for reserve capacity contained in the 1938 contract.

7. Both the 1939 Interconnection Contract and the 1939 Interchange Capacity Agreement were drafted and prepared by Francis H. Scheetz, General Counsel for U. P. U., and Karl Goldsmith, an attorney in South Dakota representing U. P. U. in connection with the merger of Northern and North Dakota, and the same two attorneys worked out between themselves the question of the manner, method and time of filing said 1939 Interconnection Contract and said 1939 Interchange Capacity Agreement with the Federal Power Commission. Neither the defendant nor any of the persons who were at any time officers or directors of defendant and were also at the same time officers or directors of Dakota had anything to do with the determination of the time, manner or method of filing either said 1939 Interconnection Contract or said 1939 Interchange Capacity Agreement with the Federal Power Commission.

8. The idea of preparing and executing new contracts covering the 5 mill interchange energy rate and the transmission line charge to supersede the 1936 contract and covering charges for reserve capacity furnished by one party to another party to supersede the 1938 contract originated with Samuel W. White as President of U. P. U., and neither the defendant nor any of the individuals who at any time were officers or directors of defendant and were also at the same time officers or directors of Dakota had anything to do with that matter.

9. The 5 mill per kilowatt-hour interchange energy rate and the $1,666.66 monthly transmission line charge contained in said 1939 Interconnection Contract and the $13.20 reserve capacity charge contained in the 1939 Interchange Capacity Agreement was each fair, just and reasonable in so far as Dakota was concerned during the entire period that said contracts were in force and effect, viz., from July 1, 1939 to June 30, 1941, both inclusive.

10. The $1,666.66 monthly transmission line charge in said 1939 Interconnection Contract and the $13.20 reserve capacity charge in said 1939 Interchange Capacity Agreement was each based upon and supported by adequate consideration.

11. Neither the 5 mill per kilowatt-hour interchange energy rate nor the transmission line charge of $1,666.66 per month in said 1939 Interconnection Contract nor the $13.20 reserve capacity charge in said 1939 Interchange Capacity Agreement was fixed by any of the individuals who at any time were officers or directors of Dakota and also were at the same time officers or directors of defendant.

12. Neither the 1939 Interconnection Contract nor the 1939 Interchange Capacity Agreement was executed for the purpose of fixing terms, rates or charges to be made by the parties thereto against each other for electric energy and the transmission thereof. Said contracts were each executed for the purpose of reflecting the results of the merger of North Dakota and Northern in so far as said merger affected the corporate parties to the existing 1936 and 1938 contracts.

13. The 1939 Interchange Capacity Agreement was not a scheme or plan conceived and put into effect or operation by defendant or by any of the officers or directors of defendant for the purpose of exacting large charges from Dakota in order to offset charges of Dakota for energy then being sold and thereafter to be sold by Dakota to defendant.

14. Both the 1939 Interconnection Contract and the 1939 Interchange Capacity Agreement were filed with the Federal Power Commission on January 10, 1940 and were as-

signed rate schedule classifications by said Commission as Northwestern Public Service Company Rate Schedules F. P. C. Nos. 5-A and 5-B, respectively, and both were made effective by said Commission as of July 1, 1939.

15. Said 1939 Interconnection Contract continued without change the same 5 mill per kilowatt-hour interchange energy rate and the same $1,666.66 per month transmission line charge which were contained in the 1936 contract, and said 1939 Interchange Capacity Agreement continued without change the same $13.20 reserve capacity charge which was contained in the 1938 contract, and each of said rates and charges were already on file with the Federal Power Commission at the time of the filing of the 1939 Interconnection Contract and the 1939 Interchange Capacity Agreement.

16. For the period from July 1, 1939 through June 30, 1941 Dakota paid to defendant $40,000 for and on account of said transmission line charge of $1,666.66 per month. Defendant did not cause Dakota to make these payments. It had nothing to do with said payments except to receive the same in consideration for use by Dakota of the interconnection facilities as provided in the 1939 Interconnection Contract. Said payments were made in every case with the complete knowledge and approval of U. P. U.

17. For the period from July 1, 1939 through June 30, 1941 Dakota paid to defendant the following amounts: $9,068.40 for the period July 1, 1939 through December 31, 1939; $13,622.40 for the period January 1, 1940 through August 31, 1940; and $2,138.40 for the period January 1, 1941 through June 30, 1941; and defendant paid to Dakota $937.20 for the period September 1, 1940 through December 31, 1940. These payments were made pursuant to the 1939 Interchange Capacity Agreement by each of the parties to the other because of their respective deficiencies in reserve capacity and for use of the excess of reserve capacity of the party receiving payment. Defendant did not cause Dakota to make or receive the aforesaid payments made or received by Dakota and had nothing to do with said payments except to receive or make the same in consideration for the excess of reserve capacity which it supplied to or received from the power pool. Both the payments

by Dakota to defendant and the payments by defendant to Dakota were made in each case with the complete knowledge and approval of U. P. U.

18. At all times during the period when the 1939 Interchange Capacity Agreement was in effect the excesses and deficiencies in reserve capacity of Dakota and defendant were determined for each of the years by the operating committee as provided in and by said contract and in accordance with the terms and provisions thereof. U. P. U. had full knowledge of and approved such determinations in every case. In each year the determinations of the operating committee were filed with the Federal Power Commission and accepted by that Commission. In no case did the determinations by said operating committee change or in any way affect the reserve capacity charge of $13.20 provided in said contract.

19. During the effective period of the 1939 Interconnection Contract neither the defendant nor any of the individuals who at any time were officers or directors of defendant and were also at the same time officers or directors of Dakota caused Dakota to generate and transmit to defendant energy at any point. All amounts of energy which were generated by Dakota and transmitted to defendant during the entire period from July 1, 1939 through June 30, 1941 were generated and transmitted under and pursuant to the provisions of the 1939 Interconnection Contract and by and with the full knowledge and approval and consent of U. P. U., the sole stockholder of Dakota.

20. The just and reasonable value of all energy delivered by Dakota to defendant during said period July 1, 1939 through June 30, 1941 was 5 mills per kilowatt-hour, which Dakota received from defendant.

21. Defendant did not cause Dakota to receive from defendant for the net energy delivered by Dakota to defendant during the period July 1, 1939 through June 30, 1941, the amount of $59,345.74, being computed at the rate of 5 mills per kilowatt-hour. Defendant had nothing to do with the receipt of that amount by Dakota except to pay said amount pursuant to the terms and provisions of the 1939 Interconnection Contract. Payments aggregating

such amount for the net energy delivered by Dakota in said period were received by Dakota in every case with the complete knowledge and approval of U. P. U.

V. *Findings Applicable to Sixth Cause of Action.*

1. The contract dated July 1, 1941 between Dakota and defendant (Exhibit F to the Complaint) by its terms was effective from July 1, 1941 for a period of ten years and thereafter until terminated by either party upon eighteen months' notice. Said contract was signed and attested by officers of Dakota on its behalf at the direction and with the approval of U. P. U., the sole stockholder of Dakota.

2. Neither defendant nor any of the persons who at any time were officers or directors of defendant and were also at the same time officers or directors of Dakota caused said contract to be entered into or to be signed by Dakota or on its behalf.

3. Said 1941 contract was not entered into for the advantage and benefit of defendant or to the injury or detriment of Dakota, but was fair, just and reasonable in all of its terms and provisions.

4. Said 1941 contract was not a scheme or plan conceived and put into effect or operation by defendant, through its officers and directors or otherwise, for the purpose of exacting large charges from Dakota for the advantage and benefit of defendant and, among others, to offset charges of Dakota for energy then being sold and thereafter to be sold by Dakota to defendant.

5. The terms and provisions of said 1941 contract were negotiated and drafted on behalf of Dakota by Samuel W. White and other representatives of U. P. U. who had no connection with or interest in defendant or The Middle West Corporation or any subsidiary thereof or company affiliated therewith.

6. The question of making the 1941 contract and the reasonableness as to Dakota, of the rates and charges therein provided and of the other provisions therein contained, were extensively considered and discussed by the

entire Board of Directors of U. P. U., and the negotiation of said contract was expressly authorized by said Board. The increasing shortage of generating capacity and necessary reserves, the increasing load on the system of Dakota, the proposed installation of 7500 kw generating capacity by defendant and the location thereof at Aberdeen, South Dakota, at the north end of defendant's system so as to benefit the system of Dakota as well as that of defendant, the ten year term and all other provisions of the contract, were extensively investigated and considered by Samuel W. White as President and agent of U. P. U. and by him reported to and considered by the Board of Directors.

7. Prior to its execution by Dakota or defendant said 1941 contract was approved and authorized by the Board of Directors of U. P. U.

8. Said 1941 contract was filed with the Federal Power Commission on February 28, 1942, assigned a rate schedule classification by said Commission as Northwestern Public Service Company Rate Schedule F. P. C. No. 6, and made effective as of July 1, 1941 by order issued by said Federal Power Commission.

9. Said 1941 contract continued without change the intercharge energy rate of 5 mills per kilowatt-hour and the transmission line charge of $1,666.66 a month contained in the 1939 Interconnection Contract and the reserve capacity charge of $13.20 contained in the 1939 Interchange Capacity Agreement. Each of said rates and charges was already on file with the Federal Power Commission at the time of filing the 1941 contract.

10. The 5 mills per kilowatt-hour interchange energy rate, the $1,666.66 monthly transmission line charge, and the $13.20 reserve capacity charge in the 1941 contract each was fair, just and reasonable insofar as Dakota was concerned during the entire period said contract was in force and effect between defendant and Dakota from July 1, 1941 to October 19, 1945, both inclusive.

11. The $1,666.66 monthly transmission line charge and the $13.20 reserve capacity charge in said 1941 contract each was based upon and supported by adequate consideration.

12. Neither the 5 mills per kilowatt-hour interchange energy rate, the transmission line charge of $1,666.66 per month nor the $13.20 reserve capacity charge in said 1941 contract was fixed by any of the individuals who at any time were officers or directors of Dakota and who also were at the same time officers or directors of defendant.

13. For the period from July 1, 1941 to October 19, 1945, pursuant to the 1941 contract, Dakota paid to defendant the following amounts because of its deficiencies in reserve capacity, which deficiencies were supplied out of the excesses of reserve capacity which defendant furnished to the power pool: for July 1, 1941 through December 31, 1941, $2,138.40; for 1942, $17,199.60; for 1943, $8,514.00; for 1944, $9,992.40; and for January 1, 1945 through October 19, 1945, $18,420.25. Defendant did not cause Dakota to make any of the foregoing payments to defendant and had nothing to do with such payments except to receive them in consideration for the excesses of reserve capacity which it supplied to the power pool. Said payments by Dakota to defendant were made in every case with the complete knowledge and approval of U. P. U.

14. At all times during the period when the 1941 contract was in effect the excesses and deficiencies in reserve capacity of Dakota and defendant were determined for each of the years by the operating committee as provided in and by said contract and in accordance with the terms and provisions thereof. U. P. U. had full knowledge of and approved such determinations in every case. In each year the determinations of the operating committee were filed with the Federal Power Commission and accepted by that Commission. In no case did the determinations by said operating committee change or in any way affect the reserve capacity charge of $13.20 provided in said contract.

15. For the period from July 1, 1941 to October 19, 1945 Dakota paid to defendant the sum of $86,021.51 for and on account of the transmission line charge of $1,666.66 per month, as provided in said 1941 contract. Defendant did not cause Dakota to make these payments. It had nothing to do with such payments except to receive the same in consideration for the use by Dakota of the inter-

connection facilities as provided in said contract. Said payments were made in every case with the complete knowledge and approval of U. P. U.

16. Throughout the period when said 1941 contract was in effect between Dakota and defendant, neither the defendant nor any of the individuals who were at any time officers or directors of defendant and were also at the same time officers or directors of Dakota caused Dakota to generate and transmit to defendant energy at any point. All amounts of energy which were generated by Dakota and transmitted to defendant during the entire period from July 1, 1941 to October 19, 1945, were generated and transmitted under and pursuant to the provisions of said 1941 contract and by and with the full knowledge, approval and consent of U. P. U., the sole stockholder of Dakota.

17. The just and reasonable value of all energy delivered by Dakota to defendant during said period July 1, 1941 to October 19, 1945 was 5 mills per kilowatt-hour, which Dakota received from defendant.

18. Defendant did not cause Dakota to receive from defendant for the net energy delivered by Dakota to defendant during the period July 1, 1941 to October 19, 1945, the amount of $218,994.23 being computed at the rate of 5 mills per kilowatt-hour. Defendant had nothing to do with the receipt of that amount by Dakota except to pay said amount pursuant to the terms and provisions of said 1941 contract. Payments aggregating such amount for the net energy delivered by Dakota in said period were received by Dakota in every case with the complete [knowledged] and approval of U. P. U.

19. Said 1941 contract was not executed for the purpose of fixing terms, rates and charges which would be made by the parties against each other for and in connection with the transmission and sale of electric energy to be generated in the State of North Dakota and transmitted to the State of South Dakota or vice versa. The purpose of said contract was to provide a written contract covering the rates and charges already existing between the parties under the 1939 Interconnection Contract and the 1939 Interchange Capacity Agreement, but for a definite ten-year

term without right of earlier termination by either party, predicated upon the location by defendant of its proposed 7500 kw additional generating capacity at Aberdeen, South Dakota, at the north end of its own system, instead of at Mitchell, South Dakota, or some other point located near the center of its own system.

20. The 1941 contract (Exhibit F to the Complaint) was amended by the parties under date of March 13, 1943. Said amendment was signed and attested by officers of Dakota on its behalf at the direction and with the approval of U. P. U., the sole stockholder of Dakota.

21. The purpose of the 1943 amendment was to provide for the termination of the 1941 contract upon 18 months' written Notice by either party because of the inability of defendant due to the war to construct its proposed additional generating capacity at Aberdeen, South Dakota.

22. Neither defendant nor any of the persons who at any time were officers or directors of defendant and were also at the same time officers or directors of Dakota caused said 1943 amendment to be signed by Dakota or on its behalf. Said 1943 amendment was not entered into for the advantage and benefit of the defendant or to the injury or detriment of Dakota, nor was it a scheme or plan conceived and put into effect or operation by defendant, through its officers or directors or otherwise, for the purpose of exacting large charges from Dakota for the advantage and benefit of defendant and, among other things, to offset charges of Dakota for energy then being sold and thereafter to be sold by Dakota to defendant.

23. The terms and provisions of said 1943 amendment were negotiated and drafted on behalf of Dakota by Samuel W. White and other representatives of U. P. U. who had no connection with or interest in defendant or The Middle West Service Corporation or any subsidiary thereof or company affiliated therewith.

24. The 1943 amendment to the 1941 contract was approved and its execution authorized by the Board of Directors of U. P. U. prior to such execution.

25. The 1943 amendment to the 1941 contract was filed with the Federal Power Commission on April 8, 1943, assigned a rate schedule classification by said Commission as Northwestern Public Service Company Supplement No. 1 to Rate Schedule F. P. C. No. 6, and made effective by said Commission as of May 8, 1943.

26. None of the rates or charges provided for in the 1941 contract were changed by the 1943 amendment to said 1941 contract.

VI. *Findings Applicable to First, Second, Third, Fourth, Fifth and Sixth Causes of Action.*

1. Since prior to January 1, 1935 and to October 19, 1945, the Northern Companies at all times had a generating plant at Beulah, North Dakota. This was a "mine-mouth" plant situated adjacent to the tipple of the Knife River mine so that lignite which was mined by Knife River could be delivered directly to the bunkers of the Beulah plant without freight charges. Throughout this entire period lignite was delivered to the Beulah plant and Knife River obtained for such deliveries the highest price of all the lignite which it sold, and the Beulah plant obtained the lignite at the lowest fuel cost of any of the generating plants of the Northern Companies and defendant. Included in said deliveries of lignite were the screenings from the mine which were otherwise [unsalable].

2. The energy delivered to defendant by the Northern Companies came entirely from energy put into the transmission system of said Northern Companies, and the Beulah plant furnished approximately 79% of all of the energy put into said transmission system.

3. In the transmission of electrical energy certain losses are incurred which are commonly referred to as transmission line losses. The Northern Companies' losses in the operation of their transmission lines averaged 23.1%.

4. The load (consumption) on an electric system varies during each 24-hour cycle. These portions of the 24-hour cycle when the load on the system is heavy are referred to as the daily peak periods and energy generated and

delivered during said periods is said to be generated and delivered "on-peak". The other periods of the 24-hour cycle are referred to as "Off-peak" periods. The period of the day between midnight and about 8 A. M. is usually the period of the smallest load on the system and is referred to as the "graveyard" period. Electric energy cannot be stored for future use.

5. Throughout the period from September 1, 1935 to and including October 19, 1945, almost all of the energy generated by the Northern Companies and delivered to defendant was generated and delivered during the "off-peak" periods of the day and mostly during the "graveyard" period. Throughout the same period September 1, 1935 to and including October 19, 1945, defendant generated and delivered energy to the Northern Companies, almost all of which was delivered during "on-peak" periods of the day which necessitated the operation by defendant of high cost generating units.

6. Surplus energy is that energy over and above the requirements of a producer at any given time which the producer is capable of generating and which the purchaser thereof is not required to take. During "off-peak" periods the Northern Companies were capable of producing and did produce surplus energy.

7. The energy delivered to defendant by the Northern Companies from September 1, 1935 to October 19, 1945 was surplus energy. Incremental cost of production is a proper basis for determining the rate for the sale of surplus energy. The incremental cost of producing electrical energy is that cost over and above the cost of producing energy necessary to fill the normal requirements of the producer which is required to produce energy over and above such normal requirements. Such incremental cost comprises the cost of additional fuel required to produce the additional or surplus energy plus lubrication, water and maintenance.

8. The incremental cost to the Northern Companies of producing the gross energy delivered to defendant, expressed in mills per kilowatt-hour, was 3.19 in 1936, 2.59 in 1937, 2.64 in 1938, 2.66 in 1939, 2.39 in 1940, 2.55 in 1941, 2.82 in 1942, 2.94 in 1943, 3.05 in 1944, 3.15 in 1945 to

October 19. After allowing for the average transmission losses of 23.1% the delivered cost to said Northern Companies of the surplus energy delivered to defendant, expressed in mills per kilowatt-hour, was 4.15 in 1936, 3.37 in 1937; 3.43 in 1938, 3.46 in 1939, 3.11 in 1940, 3.22 in 1941, 3.71 in 1942, 3.86 in 1943, 4.00 in 1944, 4.10 in 1945 to October 19.

9. The Northern Companies made a profit on the energy delivered to defendant in each of the years 1936 through October 19, 1945, being the difference between the delivered cost to the Northern Companies of such energy and the 5 mills per kilowatt-hour received by the Northern Companies from defendant. Said profits were: $4,342 in 1936, $10,169.85 in 1937, $9,815.35 in 1938, $10,318.02 in 1939, $13,348.59 in 1940, $20,140.00 in 1941, $15,612.00 in 1942, $13,248.50 in 1943, $10,883.50 in 1944 and $7,962.50 in 1945 up to October 19, totaling $115,840.31.

10. The lowest cost generating plant of defendant during the period January 1, 1936 through October 19, 1945, was its plant at Aberdeen, South Dakota. The incremental cost of producing energy at said plant during said period, expressed in mills per kilowatt-hour, was: for 1936, 5.43; 1937, 5.51; 1938, 5.54; 1939, 5.48; 1940, 5.48; 1941, 5.49; 1942, 5.47; 1943, 5.69; 1944, 5.52; and 1945 through October 19, 5.65.

11. Through its purchases of energy from the Northern Companies at 5 mills per kilowatt-hour, defendant realized net savings during the period January 1, 1936 to and including October 19, 1945, in the following amounts: for 1936, $644.30; 1937, $1,861.45; 1938, $2,218.35; 1939, $2,042.02; 1940, $2,430.39; 1941, $4,867.42; 1942, $5,215.30; 1943, $7,108.20; 1944, $4,916.00; 1945 through October 19, $4,928.00, totaling $36,231.43.

12. In each and every year from January 1, 1936, through October 19, 1945 the Northern Companies obtained greater benefits from the interchange of energy with the defendant than defendant received.

13. The 5 mill rate for the sale of energy by the Northern Companies to defendant from January 1, 1935 to October 19, 1945, was based upon the incremental cost of

producing surplus energy by the Northern Companies, and U. P. U., the sole stockholder of the Northern Companies, through its directors, officers and agents, knew of this fact and approved the same.

14. Throughout the entire period since prior to January 1, 1935 through October 19, 1945, the Beulah plant of the Northern Companies was operated as a base load plant, that is, it was operated at all times at capacity or as near capacity as possible, which was not true of any of the other generating plants on the interconnected system of the Northern Companies and defendant U. P. U. insisted upon the operation of the Beulah plant in such manner and upon the Northern Companies selling to defendant as much surplus energy as possible throughout the period from January 1, 1935 to October 19, 1945. Neither defendant nor any of the individuals who were officers or directors of defendant and were also at the same time officers or directors of the Northern Companies caused these things to be done, except in so far as to carry out the expressed desire of U. P. U.

15. If the interconnection facilities had not been built, or if the same had been discontinued at any time throughout the period involved in this lawsuit, the Northern Companies would have been compelled to install additional generating capacity on their systems together with necessary connecting transmission lines. The testimony and exhibits show additional generating capacity requirements of the Northern Companies during this period ranging from a minimum of 1500 K. W. to 5000 K. W. Such additions would have cost the Northern Companies sums ranging from approximately $248,000 to $625,000, carrying annual fixed charges on such costs ranging from approximately $30,000 to $75,000. Throughout this entire period the Northern Companies were without sufficient funds to install such additional generating capacity and lines, and they could not make any expenditures for such purposes without the prior approval and authorization of U. P. U. except in amounts from $100 to $500.

16. Over a period commencing in 1935 and continuing to 1941 portions of the transmission system of the Northern Companies were rebuilt and increased in voltages from

22,000 volts to 38,000 volts. This reconstruction and voltage increase was necessary in order to protect and better service to the customers of the Northern Companies on their own system and to meet the steadily increasing load on said system from their own customers by stabilizing the voltage and by replacing worn out portions of the transmission lines. Such reconstruction of the transmission lines and the increase in the voltage thereof was not made for the purpose of delivering energy to defendant. All such reconstruction and voltage changes were fully known to and approved and authorized by U. P. U.

17. On September 30, 1941 the Federal Power Commission entered its order granting the application of plaintiff dated September 9, 1941 that plaintiff's Supplement No. 1 to its Rate Schedule FPC No. 1 be allowed to take effect retroactively as of January 1, 1941. The order so allowing such retroactive effect contains terms and provisions identical with those in the order entered by said Commission allowing the 1941 contract involved in this suit to take effect retroactively as of July 1, 1941.

VII. *Findings Applicable to Seventh, Eighth, Ninth and Tenth Causes of Action.*

1. During the period 1932 to October 19, 1945 the operations of the Northern Companies, Knife River and defendant were carried on under a joint management arrangement.

2. Late in 1932 the joint management arrangement then existing was changed with the consent of Samuel W. White as receiver of United Public Utilities Company to an allocation of expenses on a gross earnings basis. This change was approved by the United States District Court for the Northern District of Illinois, Eastern Division.

3. Under date of January 2, 1936 an agreement for allocation of joint management expenses terminable on 90 days notice (Exhibit G to the complaint) was entered into by and between North Dakota, Northern, Knife River and defendant. Under date of July 1, 1939, Dakota, Knife River and defendant entered into a similar agreement for allocation of joint management expenses terminable on 90 days' notice (Exhibit H to the complaint).

4. The 1936 and 1939 joint management contracts (Exhibits G and H to the complaint) were submitted to and approved by U. P. U.

5. Neither defendant nor any of the persons who at any time were officers or directors of defendant and were also at the same time officers or directors of the Northern Companies or Knife River caused said 1936 or 1939 joint management contracts to be entered into or to be signed by the Northern Companies or Knife River or on their behalf.

6. None of the payments made by the Northern Companies to defendant under the 1936 or 1939 joint management contracts for dispatchers' salaries and expenses affected or related to any rate or charge for the transmission or sale of electric energy by the Northern Companies to defendant or vice versa; nor did such payments constitute a rate or charge for the transmission or sale of electric energy by and between any of said companies.

7. Payments made by the Northern Companies to defendant under both the 1936 and 1939 joint management contracts were made to reimburse defendant for the portion attributable to the Northern Companies of the amounts expended by defendant for the salaries and expenses of the load dispatchers whose services were performed for the joint benefit of all of the companies. Defendant did not cause the Northern Companies to make these payments. It had nothing to do with such payments except to receive the same pursuant to said contracts. The amounts of such payments were in every case fair, just and reasonable.

Conclusions of Law.

1. The Court does not have jurisdiction over the subject matter of this suit or of any of the ten separate causes of action alleged in the complaint.

2. Upon the facts and the law, plaintiff has shown no right to relief.

3. The Court is without power to determine in the first instance the reasonableness or justness of any rate or charge for the sale or transmission of electric energy in

interstate commerce or to determine what such rate or charge should be, such determination being a matter exclusively within the jurisdiction of the Federal Power Commission, subject to judicial review only as provided in the Federal Power Act.

4. The only right of plaintiff with reference to any of the rates or charges in any of the contracts involved in this suit, or with reference to the determination of the justness and reasonableness of such rates and charges, is the right to apply to the Federal Power Commission and to have that body pass upon the justness and reasonableness of such rates and charges.

5. No legal distinction can properly be drawn between the instant case and the case of Ambassador v. United States (325 U. S. 317) or the case of Mississippi Power & Light Co. v. Memphis Natural Gas Co. (162 F. 2d 388, cert. den., 332 U. S. 770).

6. If the Court had jurisdiction, defendant would be entitled to judgment dismissing the complaint upon the merits.

7. Upon the merger of North Dakota and Northern, the surviving corporation, Dakota, became bound and obligated under all of the terms and provisions of the 1936 contract between Northern and defendant, and under all of the terms and provisions of the 1938 contract between Northern, North Dakota and defendants, to the same extent as Northern and North Dakota were bound and obligated under said contracts prior to the merger.

8. The 1936 contract, 1938 contract, 1939 Interconnection Contract, 1939 Interchange Capacity Agreement, 1941 contract and the 1943 amendment to the 1941 contract were each properly filed with the Federal Power Commission.

9. The 1936 contract, the 1938 contract and the 1941 contract were each given retroactive effective dates by the Federal Power Commission acting within the power conferred upon it by the Federal Power Act, and neither the 1939 Interconnection Contract nor the 1939 Interchange Capacity Agreement required any action by said Commission.

10. The orders of the Federal Power Commission allowing a retroactive effective date for any of the contracts involved in this suit cannot be collaterally attacked by plaintiff in this proceeding.

11. Even if the Federal Power Commission did not have authority to permit any of the contracts filed in this cause to become effective retroactively, nevertheless said contracts each became effective as of the date filed with said Commission, except the 1943 amendment to the 1941 contract.

12. The 1936 and 1939 contracts for the allocation of joint management expenses were not required to be filed with the Federal Power Commission.

13. There is no presumption of fraud against the defendant in this cause either because of the contracts involved in this suit having been executed by officers of defendant who at the same time were also officers of the Northern Companies or because at the times when said contracts were executed or at any other time a majority of the directors of the Northern Companies were at the same time directors of defendant.

14. Plaintiff, as assignee of Dakota, has no greater or other rights than Dakota, Northern or North Dakota had.

15. Contracts between corporations having common boards of directors are not void, but are only voidable; but even if the several contracts involved in this suit and the operations and payments thereunder would otherwise have been voidable by any of the Northern Companies because of the fact that the same individuals were officers or directors of said Northern Companies and at the same time were officers or directors of defendant, or for any other reason, said Northern Companies would have had no cause of action on account of said contracts or any of the operations or payments thereunder because of the authorization and ratification thereof and acquiescence therein by U. P. U.

16. All information received by Samuel W. White and all knowledge possessed by Samuel W. White, as President of U. P. U., was imputed to U. P. U. and said company was

charged with having the same information and same knowledge as Samuel W. White.

17. Where the same individuals are directors on the Boards of Directors of each of two contracting corporations but in all cases of contracts between said corporations said individuals refer the matter of the making of such contracts and the determination of the terms and provisions thereof to the stockholders of each of the corporations for decision, neither such contracts nor the performance thereof are subject to judicial scrutiny or review; and this rule applies even more particularly in a case where such individuals are elected to the Boards of Directors of each of said contracting corporations by different owners of said corporations.

18. Plaintiff has not established by any evidence in this case any fraud, or any acts constituting fraud, against the Northern Companies on the part of defendant, or on the part of any of the individuals who at any time were officers or directors of defendant, whether or not they were also at the same time officers or directors of the Northern Companies.

19. A fair price to the seller for surplus electric energy is measured by the additional cost to the seller, including additional operating expense incurred by the seller and fixed charges on additional plants, if any, installed for the purpose of making the sale of such additional energy, over and above the operating expenses and fixed charges on plants which would be incurred by the seller if the sale of such surplus energy were not made.

20. The rates and charges provided in each and all of the contracts involved in this suit were fair, just and reasonable and in each case were supported by adequate consideration.

21. Plaintiff as purchaser of the capital stock and securities of Dakota from U. P. U. became the assignee of U. P. U., and as such assignee plaintiff is estopped to deny the validity of any of the contracts involved in this cause or of any of the operations or payments thereunder.

22. Any relief sought by plaintiff in any of the ten separate causes of action in the complaint, as amended, is

barred by subdivision 4 of Section 33.0232 of Chapter 33.02 of the South Dakota Code, 1939, except for any transactions which occurred within six years next preceding the commencement of this suit.

23. No action by the boards of directors of any of the Northern Companies was necessary in connection with any of the contracts involved in this suit.

24. At no time during the entire period from April 15, 1932 to October 19, 1945 was North Dakota, Northern, Dakota, Knife River, U. P. U. or United Public Utilities Company, or any of them, dominated or controlled by the defendant or by The Middle West Corporation, or its predecessor, Middle West Utilities Company, or by any subsidiary thereof or any company affiliated therewith.

25. By reason of the fact that all things of which plaintiff complains [occured] prior to the time plaintiff acquired the stock and securities of Dakota, and plaintiff stands as an assignee of the assets of Dakota solely as an incident of Dakota's liquidation plaintiff has no claim or demand on which any relief can be granted.

(Indorsed)—Filed Sept. 15, 1948. Roy B. Marker, Clerk.

(Transcript of Proceedings in District Court on September 15, 1948, on Motions to File Proposed Findings of Fact, to Change Record, to Amend Complaint and to Amend Findings and Judgment.)

Before Hon. A. Lee Wyman, District Judge.

Mr. Woods: This being the time appointed, Your Honor, we would like to make defendant's Findings of Fact and Conclusions of Law, which are herewith submitted to the Court.

The Court: I haven't had time to look them over. There might be a finding that was material to the case and supported by the evidence.

Mr. Fellows: We are going to make objection to the filing of that for the reason it is not proper procedure.

For the further reason, any matter in there they may have reviewed on appeal from the Findings of the Court on file.

The Court: It is to the interest of all parties to the case that if the facts are sufficient to justify a finding which is material to the issues in the case and the Court has neglected to do it, the facts ought to be found. However, if that [conditions] exists the defendant in the action would have just as good a [change] to raise that issue without this proceeding as with it. In other words, under the practice in Federal Court, it has always been the practice as far as equity proceeding is concerned, and under the Conformity Act there was a time when it was necessary to present findings and except to findings made and except to the failure of the Court to find the stated findings. That is all done away with now. To go into any proposition of that kind at this time, it seems to me like a case of lost motion.

Mr. Woods: I would like to state this, we don't think it can be categorically stated that such a record is useless, and against the contingency of the failure of the Court to find upon a material issue may be of no effect if not requested by defendant. We want to ask these things be requested and the request be granted.

The Court: So far as the rules are concerned, if the court has failed to find an essential fact which is supported by the evidence, it is not necessary that counsel request that finding or except to the failure to find it. I don't want to go on record as refusing to find a fact that is essential and supported by the evidence. I think I should sustain the motion of the plaintiff in the case. You have your record then. You have requested them and I have sustained their motion. Your findings are in the record. You may file them as part of the record.

Mr. Woods: We so file it with the Clerk.

* * * * * * *

(Indorsed) Filed Oct. 11, 1948. Roy B. Marker, Clerk.

Findings of Fact and Conclusions of Law.

The Court makes the following Findings of Fact from the pleadings and evidence:

1. Plaintiff Montana-Dakota Utilities Co. is a Delaware corporation qualified to do business and doing business as an electric public utility in North Dakota since July, 1935, and in South Dakota since June 27, 1935. Plaintiff as assignee of Dakota Public Service Company, North Dakota Power & Light Company and Northern Power and Light Company seeks to recover unreasonable rates and charges affecting and relating to sales of electric energy in interstate commerce at wholesale for resale and exacted from North Dakota Power & Light Company, Northern Power and Light Company and Dakota Public Service Company, predecessors of the plaintiff and assignors to the plaintiff directly or indirectly, as will hereinafter more specifically appear, of all claims and rights of the last three named companies against the defendant for the exaction of said unreasonable rates and charges which were exacted and charged by the defendant in violation of the Federal Power Act, 16 U. S. C. A. 824, et seq. Plaintiff as assignee as aforesaid also seeks to recover from the defendant the difference between the amounts paid by the defendant from time to time for electric energy transmitted in interstate commerce and sold in such commerce to the defendant at wholesale for resale, and the just and reasonable value of such energy to said Dakota Public Service Company and said North Dakota Power & Light Company and said Northern Power and Light Company, the details of said transactions in said electric energy being hereinafter more specifically set forth. Plaintiff also seeks to recover for said unreasonable rates and charges and the aforesaid underpayments for energy on the grounds that said rates and charges were fraudulently exacted from plaintiff's assignors and predecessors, and also seeks to recover the aforesaid underpayments for energy by the defendant on the grounds that plaintiff's predecessors were induced by defendant's fraud to deliver such energy to the defendant at unreasonably low and inadequate prices.

2. Defendant Northwestern Public Service Company is a Delaware corporation organized in 1923 and engaged in

the electric public utility business as an operating company in South Dakota where it has been qualified to do business since 1923.

3. At all times hereinafter mentioned, North Dakota Power & Light Company, hereinafter referred to as "North Dakota", was a Delaware corporation qualified to do business in the State of North Dakota where it engaged at all times hereinafter mentioned in the electric public utility business as an operating company in that state. It qualified to do business in South Dakota July 13, 1939, and from that date until its liquidation October 19, 1945, it engaged in the electric public utility business in South Dakota. It was liquidated under its then name of Dakota Public Service Company on October 19, 1945, the plaintiff then being the owner of all of the capital stock of Dakota Public Service Company and the recipient in liquidation of all properties and assets and claims, rights and demands of every kind of Dakota Public Service Company.

4. Northern Power and Light Company, hereinafter referred to as "Northern", was a Delaware corporation qualified to do business in both North Dakota and South Dakota at all times mentioned in these Findings up to the date of its merger with North Dakota on July 1, 1939. During all the times mentioned in these Findings prior to July 1, 1939, Northern was engaged in the electric public utility business as an operating company in both North Dakota and South Dakota.

5. On July 1, 1939, Northern and North Dakota, pursuant to the laws of the State of Delaware, merged into one corporation, North Dakota being the survivor and, pursuant to the terms of the merger, changing its name to Dakota Public Service Company, hereinafter referred to as "Dakota". Pursuant to the terms of the merger, Dakota became the owner of all the public utility plants, systems and business and all claims and assets whatsoever of Northern, in addition to the properties and assets owned on the date of the merger by North Dakota, and thereafter Dakota operated as an electric public utility in the States of North Dakota and South Dakota all of the

properties which it owned on the date of the merger and those which it acquired through said merger. The operation of said properties by Dakota continued until October 19, 1945.

6. In 1929 Middle West Utilities Company, a Delaware corporation, controlled North West Utilities Company, which owned and controlled the defendant. About August 6, 1929, Middle West Utilities Company acquired control of United Public Service Company, which controlled United Public Utilities Company, which owned all of the capital stock of North Dakota and Northern. Immediately on acquisition of control of United Public Service Company, Middle West Utilities Company caused North Dakota and Northern to elect to their respective Boards of Directors men who were then Directors of defendant and such newly elected Directors of North Dakota and Northern elected as officers men who were then officers and directors of defendant. At the time Middle West Utilities Company acquired control of United Public Service Company and United Public Utilities Company, Middle West Utilities Company caused the accounting and management offices of Northern and North Dakota to be moved to Huron, South Dakota, and located in and as a part of the management and accounting office of the defendant and such arrangement continued until the purchase of Dakota by the plaintiff.

7. Middle West Utilities Company at the time of the acquisition of control of United Public Service Company intended to promptly merge the properties of North Dakota and Northern into the defendant and with such merger in mind defendant began construction of high tension electric transmission lines from Aberdeen, South Dakota, to Barnard, South Dakota, and from Aberdeen, South Dakota, to Ipswich, South Dakota, and at the same time defendant began construction of a high tension electric transmission line from Ree Heights, South Dakota, to Pierre, South Dakota, as defendant was hopeful of buying the municipal plant at Pierre and intended to tie that plant into defendant's transmission system. Defendant was not successful in its attempt to buy the Pierre municipal plant in the fall of 1929 but continued its efforts to

acquire said plant through 1930 and continued construction of the line from Ree Heights toward Pierre but proceeded no farther west than Blunt, South Dakota. The high tension transmission lines from Aberdeen to Barnard and Aberdeen to Ipswich and the substation at Aberdeen partially built solely for use on the defendant's properties and partially built to secure energy from Northern and North Dakota were completed in the year 1930. In said year defendant also completed construction of the lines from Ree Heights to Blunt and from Blunt to Gettysburg, South Dakota. The high tension lines from Aberdeen to Barnard and Ipswich and from Ree Heights to Blunt and thence to Gettysburg interconnected the northeastern and northwestern ends of defendant's properties with the properties of Northern. North Dakota and Northern some years prior to 1930 had interconnected their properties at Driscoll, North Dakota and at Keldron, South Dakota. The latter interconnections between Northern and North Dakota were made by owners not connected at that time with Middle West Utilities Company, or any of its subsidiaries, and such interconnections were made pursuant to plans of the then owners of Northern and North Dakota to interconnect their properties and make them an operating system sufficient for the needs of the then businesses of those companies.

The high tension lines from Aberdeen to Barnard and Aberdeen to Ipswich and from a town west of Ree Heights, namely, Highmore, South Dakota, to Blunt and Gettysburg and transformer facilities at Gettysburg used in the interchange of energy between defendant and Northern, North Dakota and Dakota and transformer facilities in the substation at Aberdeen used in the interchange of energy between defendant and Northern, North Dakota and Dakota will be called the "interconnection facilities".

Before North Dakota and Northern and Northwestern could be merged or their properties merged into one ownership, Middle West Utilities Company was placed in equity receivership in the United States District Court for the Northern District of Illinois, Eastern Division, on April 15, 1932, and on the same date in the same court, United Public Service Company and United Public Utili-

ties Company were also placed in Equity receivership. Samuel W. White, an investment banker, Vice Chairman of the Board of Directors of Central Republic Company, the investment affiliate of Central Republic Bank and Trust Company of Chicago, Illinois, was appointed Receiver of United Public Service Company and United Public Utilities Company. North Dakota and Northern, though wholly owned subsidiaries of United Public Utilities Company, were not placed in receivership. After the appointment of Samuel W. White as Receiver of United Public Utilities Company and at all times subsequent thereto until October 19, 1945, at the suggestion of the Directors of the defendant, the Board of Directors of Northern and North Dakota and, subsequent to the merger, of Dakota was at all times composed of men who were at the same time directors of defendant, except that during all of said times Samuel W. White was also a director of each of said last named three companies but he was not an officer of any of said companies, and from January 1, 1935, to October 19, 1945, the officers of Northern, North Dakota and Dakota also held the same offices in the defendant. During the entire period of time from prior to September 1, 1935, until October 19, 1945, Samuel W. White was a director and President of United Public Utilities Corporation. Samuel W. White never attended a meeting of the Directors of Northern, North Dakota or Dakota.

8. United Public Service Company, United Public Utilities Company and Middle West Utilities Company were each brought under Chapter 77-B of the Bankruptcy Act and as a result of proceedings under said Chapter Middle West Utilities Company was reorganized as The Middle West Corporation and United Public Service Company was reorganized as United Public Service Corporation and United Public Utilities Company was reorganized as United Public Utilities Corporation.

9. At the time of the receiverships of United Public Service Company and United Public Utilities Company, Middle West Utilities Company owned controlling interests in United Public Service Company and through such ownership controlled United Public Utilities Company,

which was controlled by United Public Service Company. United Public Service Company and United Public Utilities Company came out of reorganization with their respective names changed as above noted in December, 1934, United Public Utilities Corporation owning Northern and North Dakota and the other subsidiaries hereinafter referred to. At that time the Articles of Incorporation were such that interests of Middle West Utilities Company in United Public Service Corporation gave to Middle West Utilities Company, and after its reorganization, The Middle West Corporation, actual control of United Public Service Corporation and potential control of United Public Utilities Corporation and since July 1, 1945, United Public Utilities Corporation has been a subsidiary of The Middle West Corporation.

From prior to August 6, 1929, to October 19, 1945, the controlling stock of defendant was owned by and defendant was completely dominated and controlled by Middle West Utilities Company and its successor, The Middle West Corporation, through the medium of an intermediary subholding company, North West Utilities Company.

10. North Dakota and Northern were entirely owned by United Public Utilities Company from prior to August 6, 1929, until United Public Utilities Company was reorganized into United Public Utilities Corporation and the entire ownership of North Dakota and Northern continued in United Public Utilities Corporation to October 19, 1945.

11. On October 19, 1945, United Public Utilities Corporation sold all of the stock and other securities of Dakota (which was North Dakota with a changed name as the surviving corporation in the merger of North Dakota and Northern hereinbefore set forth). Such stock was sold to the plaintiff in this action and on the same day Dakota made a general assignment to the plaintiff of all of its public utility property, assets, claims and rights of every kind, including its claims and rights against the defendant hereinafter considered and dealt with.

12. United Public Service Corporation and its subholding company, United Public Utilities Corporation, owned a

large number of public utility companies and some nonpublic utility property and among the public utility and nonpublic utility properties owned by United Public Utilities Corporation were electric utilities, a mining company, ice and coal companies, refrigerating companies, natural gas companies and water companies. The aggregate of the operating companies owned by United Public Utilities Corporation and engaged in such various businesses was 21. Mr. White did not have sufficient intimate understanding and knowledge of the operations of Northern, North Dakota or Dakota or of the contracts involved in this litigation or of the details of the transactions involved in said contracts to enable him to approve or ratify any of the contracts involved in these Findings. The Board of Directors of United Public Utilities Corporation had no knowledge of the transactions between defendant and Northern, North Dakota and Dakota except what Mr. White told them and Mr. White had no knowledge of the material facts involved in these transactions except what was conveyed to him by the officers and directors of defendant who were at the same time officers and directors of Northern, North Dakota and Dakota, or such knowledge as was conveyed to him indirectly from such common officers and directors.

13. During the entire period from September 1, 1935, through October 19, 1945, the common officers and directors of Northern, North Dakota, Dakota and the defendant were paid their entire compensation by the defendant. During all of that time defendant, pursuant to a formula which it worked out, was reimbursed by Northern, North Dakota and Dakota for a portion of the salaries which it paid to said common officers and directors. Beginning January 1, 1936, the agreements with reference to the reimbursement of defendant for a portion of said salaries of said common officers and directors was evidenced by written agreements, one dated as of January 2, 1936, and the other dated as of July 1, 1939, which superseded the prior agreement. These agreements were entitled "Agreement for allocation of joint management expenses".

14. After United Public Service Corporation and United Public Utilities Corporation came out of reorganization

proceedings, those corporations and certain of their subsidiaries, including Northern, North Dakota and Dakota, at all times had service contracts with the trustees of Middle West Utilities Company, and after its reorganization with its successor The Middle West Corporation, and after the creation of The Middle West Corporation's service company, with such service company, which was known as Middle West Service Company, a wholly owned subsidiary of The Middle West Corporation. Pursuant to these contracts, Northern, North Dakota and Dakota paid to Middle West Service Company and its predecessors in said service contracts very substantial amounts of money for services and expenses for the rendition by Middle West Service Company and its predecessors of engineering and rate services, accounting and similar aid and advice. At all times when Middle West Service Company and its predecessors had service contracts with Northern, North Dakota and Dakota, it and its predecessors had service contracts with a large number of public utilities affiliated with The Middle West Corporation, including defendant.

15. For the period from June, 1930, to the end of February, 1931, North Dakota generated energy, some of which was delivered to Northern, and some of this energy thus delivered to Northern was by it delivered over its transmission lines to the interconnection facilities and over the interconnection facilities to the defendant, and during that period of time the defendant paid North Dakota for the energy thus delivered to defendant at 7½ mills per kilowatt hour.

16. Beginning with March 1, 1931, payments by the defendant to North Dakota for energy were discontinued and thereafter and until July 1, 1939, the date of the merger of North Dakota and Northern, the defendant and Northern exchanged surplus energy at wholesale for resale, the energy delivered to the defendant having been generated in the State of North Dakota for the most part by North Dakota and sold by it to Northern, which in turn sold it to defendant which received and metered such energy in South Dakota and sold it to its retail customers in that state. During this same period just referred to, the de-

fendant generated electric energy in the State of South Dakota and transmitted it to Northern. Substantial amounts of energy thus delivered by defendant to Northern were transmitted by Northern to the State of North Dakota where the same was sold to retail customers of Northern, as defendant well knew.

17. Beginning on February 1, 1932, the price at which energy was interchanged by Northern and defendant was changed by the common officers and directors of defendant and Northern from a flat rate of 7½ mills per kilowatt hour to 7½ mills per kilowatt hour for the first 225,000 kilowatt hours per month and 4½ mills for the excess over said 225,000 kilowatt hours per month. That price averaged 6.6 mills and continued until January 1, 1933, when the price was changed by the common directors and officers of defendant and Northern to 5 mills per kilowatt hour.

18. From some time prior to September 1, 1935, to July 1, 1939, the defendant caused North Dakota to deliver energy to Northern at 3½ mills per kilowatt hour. From September 1, 1935, to October 19, 1945, the energy transmitted over the transmission systems of North Dakota, Northern and Dakota, including the energy delivered to the defendant, was generated at Beulah, North Dakota, Bismarck, North Dakota, and Mobridge, South Dakota. Such energy includes the energy sold during said period by North Dakota to Northern and by Northern to defendant.

19. Pursuant to the provisions of the Federal Power Act, the Federal Power Commission promulgated its Order No. 36, providing among other things as follows:

"(a) (Filing) On or before January 15, 1936, each public utility shall file with the Commission schedules showing all rates and charges made, demanded, or received for or in connection with the transmission, sale, purchase, or interchange of electric energy subject to the jurisdiction of the Commission, and all contracts, rules and regulations, interchange agreements, and working agreements for the use of facilities, affecting or pertaining to such rates and charges which were effective on January 1, 1936, and such rates and

charges shall not be changed except in accordance with the provisions of Section 205, Part II, Federal Power Act.

"(b) (Oral Agreements) If any interchange agreement, working agreement for the use of facilities, or other understanding under which electric energy is sold, or interchanged or under which facilities are used for the transmission of electric energy is not in writing, the basic terms of such agreement or understanding upon which settlement is made shall be reduced to writing, approved by the parties thereto, and filed with the Commission, as prescribed in paragraph (a)."

The Federal Power Commission extended the time of Northern, North Dakota and the defendant for filing rates to January 31, 1936.

Pursuant to said Order No. 36, the directors and officers of defendant, North Dakota and Northern, holding identical positions in all of said companies, filed with the Federal Power Commission on February 7, 1936, a letter of defendant dated January 28, 1936, denominated by said Commission "Northwestern Public Service Company Rate Schedule F. P. C. No. 1", stating that it was exchanging under an oral agreement surplus energy with Northern at Barnard, Ipswich and Gettysburg, South Dakota, at 5 mills per kilowatt hour, and on January 31, 1936, filed with said Commission a letter of Northern dated January 28, 1936, and signed by the common Vice-President of defendant and Northern, stating that Northern was exchanging under an oral agreement surplus energy with defendant at Barnard, Ipswich and Gettysburg, South Dakota, at 5 mills per kilowatt hour, and on February 7, 1936, filed with the Federal Power Commission on behalf of North Dakota a letter dated January 28, 1936, signed by the common Vice-President of defendant, Northern and North Dakota, stating that North Dakota was exchanging under an oral agreement surplus energy with Northern at 3½ mills per kilowatt hour.

The letter filed on behalf of Northern was denominated by the Federal Power Commission "Northern Power and Light Company Rate Schedule F. P. C. No. 1" and the

letter filed on behalf of North Dakota was denominated "North Dakota Power and Light Company Rate Schedule F. P. C. No. 1 and No. 2".

20. At the time defendant's Rate Schedule F. P. C. No. 1 was filed with the Federal Power Commission and from January 1, 1936, defendant was charging Northern and collecting from said company at the rate of $1,666.66 per month an annual charge of $20,000 per year, fixed by the common officers and directors of defendant and Northern, as a charge for the utilization of the interconnection facilities over which energy sold by Northern to defendant was transmitted and over which energy sold by defendant to Northern was transmitted, and at the time of the filing of defendant's Rate Schedule F. P. C. No. 1 with the Federal Power Commission, there was also in existence the agreement for allocation of joint management expenses dated January 2, 1936, under which Northern and North Dakota were obligated to pay to defendant a portion of the salary and expenses of defendant's load dispatchers located on defendant's system at Aberdeen, South Dakota, and who controlled the flow of energy back and forth between defendant, Northern and North Dakota. The agreement for allocation of joint management expenses dated January 2, 1936, and the agreement for allocation of joint management expenses dated July 1, 1939, were never filed with the Federal Power Commission. The agreement covering the charges on account of the use of the interconnection facilities was not filed with the Federal Power Commission until December 23, 1938, and then under circumstances which will be hereinafter stated. The monthly payments of $1,666.66 per month and the payments on account of dispatchers' salaries affected the rate at which energy was interchanged between Northern and defendant.

21. From September 1, 1935, to July 1, 1939, defendant, through the common officers and directors of defendant and Northern and North Dakota, caused North Dakota to generate electric energy in the State of North Dakota and transmit the same to Northern at Keldron, South Dakota, and at Driscoll, North Dakota, at which points such energy was in turn transmitted by Northern to Gettys-

burg, Barnard, Ipswich and Aberdeen, South Dakota, where it was purchased for resale in South Dakota by defendant.

During said period Northern delivered to defendant 12,550,381 kilowatt hours of electric energy over and above all electric energy delivered by defendant to Northern and defendant paid to Northern for said 12,550,381 kilowatt hours at only 5 mills per kilowatt hour, whereas the cost of said 12,550,381 kilowatt hours to Northern and to North Dakota at the point of delivery to defendant was 8.15 mills per kilowatt hour.

The 8.15 mill costs of said energy are only average production costs, a fair and reasonable cost of transmission of such energy and the line loss of the energy in the transmission of said energy to the defendant. The average production costs do not include any depreciation, taxes or insurance of any kind or any fixed charges on capital or any return on capital.

The payment of only 5 mills per kilowatt hour for said 12,550,381 kilowatt hours caused a loss to Northern and North Dakota of $39,533.70.

The record is silent as to the exact number of kilowatt hours delivered from September 1, 1935, to December 31, 1935 and is silent as to the exact number of kilowatt hours delivered from January 1, 1939, to July 1, 1939, but shows that 1,499,540 kilowatt hours were delivered during 1936, 3,648,909 kilowatt hours were delivered in 1937 and 4,109,130 kilowatt hours were delivered in 1938. Therefore, on the balance of 3,292,802 kilowatt hours interest would have to be figured from July 1, 1939.

The common officers and directors of the defendant and of Northern and North Dakota had charge of the operations of North Dakota and Northern and of their accounting records and knew or should have known the cost to Northern and North Dakota of said energy delivered to defendant and they did not tell said companies or Samuel W. White the cost of said energy or that the amount paid by defendant to Northern and North Dakota during the aforesaid period was unfair and unreasonably low in the amount of 3.15 mills per kilowatt hour or in any other amount.

On October 7, 1936, the common directors and officers of defendant and of Northern caused defendant and Northern to make and enter into an agreement denominated "Interconnection Contract" providing among other things for the interchange of electric energy between defendant and Northern and providing that defendant would pay to Northern for energy delivered a sum equivalent to 5 mills per kilowatt hour and that Northern would pay to defendant for energy delivered a sum equivalent to 5 mills per kilowatt hour and that Northern would pay to defendant on account of fixed charges, maintenance and operating expenses relative to the interconnection facilities beginning as of January 1, 1936, the sum of $1,666.66 per month, thereby reducing to writing the arrangement hereinbefore recited whereby Northern began as of January 1, 1936, to pay to defendant the aforesaid monthly payments on account of the interconnection facilities.

During the period from September 1, 1935, to July 1, 1939, hereinbefore recited, defendant was at all times buying energy from Northern at 3.15 mills less than the cost of said energy to Northern and at less than it would have cost defendant to generate the energy itself, but represented to Samuel W. White that the rate of 5 mills was a fair and reasonable rate for the energy purchased by defendant, and said officers and directors represented to said White that since the price at which the energy was sold exceeded the incremental cost, North Dakota and Northern were making a gain, whereas in fact they were losing on an assumed cost to North Dakota of solely the incremental cost.

22. As of January 1, 1938, the common directors and officers of Northern, North Dakota and defendant caused North Dakota and Northern to enter into a written agreement with defendant called "Interchange Capacity Agreement" providing that the generating capacities of all three companies should be considered as constituting a common pool of energy and setting forth how a formula should be worked out each year to determine whether or not either party to the contract was deficient in furnishing its share of said common pool according to the terms of said contract and such formula and providing for a charge against any party having a deficiency in reserve capacity accord-

ing to such contract and said formula of $13.20 per kilowatt of such deficiency. Then defendant began charging Northern for a deficiency as of January 1, 1938. This contract was not filed with the Federal Power Commission until December 23, 1938.

23. During the years 1935 and 1936, the common officers and directors of defendant and Northern caused Northern to expend $127,694.45 in rebuilding the transmission line of Northern from Wishek to Bowdle and installing oil circuit breakers. Said oil circuit breakers would not have been necessary for the operations of North Dakota and Northern and the rebuilding of the line was not necessary for the operations of North Dakota and Northern and said rebuilding and installations were for the purpose of enabling defendant to purchase increased energy at 5 mills per kilowatt hour and created transmission capacity on said line in excess of Northern and North Dakota's requirements.

The interchange capacity contract between defendant, Northern and North Dakota dated January 1, 1938, contained in Article IV provisions that if any company to the agreement had provided transmission capacity between existing points of interchange in excess of ts own requirements, it should be entitled to receive compensation for the use of such excess from the party using such excess and the construction of the line and the installation of the circuit breakers on the line between Wishek and Bowdle created such excess and was used by defendant to secure interchange energy from Northern and North Dakota, but defendant has never compensated Northern for the use of such excess transmission capacity.

24. As of July 1, 1939 (the date of the merger of North Dakota and Northern resulting in North Dakota being the surviving corporation under the name of Dakota Public Service Company), the common officers and directors of defendant and Dakota made and entered into an interconnection contract between defendant and Dakota containing the same provisions as hereinbefore recited from the interconnection contract between defendant and Northern and as of said date said common officers and directors made and entered into a so-called interchange capacity agree-

ment between defendant and Dakota containing, among other things, the same provisions as quoted hereinbefore, from the interchange capacity agreement dated as of January 1, 1938, between defendant and North Dakota and Northern. The last mentioned interconnection contract between defendant and Dakota was not filed with the Federal Power Commission until January 10, 1940, and the same is true of the interchange capacity agreement between said parties.

25. From July 1, 1939, to July 1, 1941, Dakota and defendant interchanged energy as contemplated by the interconnection contract and the net energy interchanged during this period was 11,869,145 kilowatt hours which went to defendant. At the time of the filing of said interconnection contract and interchange capacity agreement with the Federal Power Commission on January 10, 1940, there was also a written agreement dated July 1, 1939, made and entered into by the common officers and directors of defendant and Dakota under which Dakota was obligated to pay to defendant a portion of the salary and expenses of the defendant's load dispatchers located on defendant's system at Aberdeen, South Dakota, and who controlled the flow of energy back and forth by the defendant and Dakota and which salary affected and was in connection with the rate for such interchange energy. Said agreement under which charges for dispatchers' services were collected by defendant from Dakota was never filed with the Federal Power Commission.

From July 1, 1939, to July 1, 1941, the defendant, through the common officers and directors of defendant and Dakota, caused Dakota to generate electric energy in the State of North Dakota and transmit the same to defendant at Gettysburg, Barnard, Ipswich and Aberdeen, South Dakota, where it was purchased for resale in South Dakota by defendant and the aforesaid 11,869,145 kilowatt hours was energy thus generated, transmitted and sold. Said kilowatt hours of electric energy were paid for by defendant to Dakota at only 5 mills per kilowatt hour, whereas the cost thereof per kilowatt hour to Dakota at points of delivery to defendant was 7.66 mills per kilowatt hour.

The 7.66 mills cost of said energy is only average production cost, a fair and reasonable cost of transmission of such energy and the line loss of energy in the transmission of such energy to defendant. The average production costs do not include any depreciation, taxes or insurance of any kind, or any fixed charges on capital, or any return on capital.

The payment of only 5 mills per kilowatt hour for said 11,869,145 kilowatt hours caused a loss to Dakota of $31,571.91.

The record is silent as to the exact number of kilowatt hours delivered from July 1, 1939, to December 31, 1939, and is silent as to the exact number of kilowatt hours delivered from January 1, 1941, to July 1, 1941, but shows that 5,062,322 kilowatt hours were delivered during 1940. Therefore the balance of 6,806,823 kilowatt hours will draw interest only from July 1, 1941.

The common officers and directors of defendant and Dakota had charge of the operations of Dakota and of its accounting records and knew or should have known the cost to Dakota of said energy delivered to defendant and they did not tell Dakota or Samuel W. White the cost of said energy and the amount paid by defendant to Dakota during the aforesaid period was unfair and unreasonably low in the amount of 2.66 mills per kilowatt hour.

During the period from July 1, 1939, to July 1, 1941, defendant was at all times buying energy from Dakota at less than the cost of said energy to Dakota and at less than it would have cost defendant to generate the energy itself, but represented to Samuel W. White that the rate of 5 mills was a fair and reasonable rate for the energy purchased by defendant, and defendant represented to said White that since the price at which the energy was sold exceeded the [imcremental] cost, Dakota was making a gain, whereas in fact Dakota was losing even on an assumed cost to Dakota of solely the incremental cost.

During the year 1940 the common officers and directors of defendant and Dakota caused Dakota to expend $50,851.11 to rebuild the transmission line of Dakota from Bowdle to Ipswich and to increase the voltage of said line

from 22,000 volts to 38,000 volts and caused Dakota to expend $1,928.98 to increase the voltage of Dakota's line from Bowdle to Selby from 22,000 volts to 38,000 volts and caused Dakota to spend $46,529.96 to install a new substation at Bowdle, South Dakota. None of said expenditures would have been necessary for the operations of Dakota and such expenditures created transmission capacity on said lines in excess of Dakota's requirements and said rebuilding and installations were for the purpose of enabling defendant to purchase increased energy at 5 mills per kilowatt hour.

The interchange capacity agreement aforesaid between defendant and Dakota dated July 1, 1939, contained provisions that if either company provided transmission capacity between existing points of interchange in excess of its own requirements it should be entitled to receive compensation for the use of such excess from the party using such excess and the reconstruction of the aforesaid lines and the installation of the substation at Bowdle created such excess which was used by defendant to secure interchange energy from Dakota but defendant has never compensated Dakota for the use of such excess transmission capacity.

26. As of July 1, 1941, the common officers of defendant and Dakota made and entered into a contract between defendant and Dakota wherein the parties agreed to exchange surplus energy at the rate of 5 mills per kilowatt hour and requiring Dakota to pay to defendant an interchange capacity charge under a power pooling arrangement similar to that set forth in the agreement for interchange capacity described in Finding No. 22 hereof but said contract of July 1, 1941, set forth the then agreed upon generating capacities of the parties but otherwise contained none of the figures necessary to determine the interchange capacity charge for the first year or subsequent years of said agreement.

Said contract of July 1, 1941, also required Dakota to pay to defendant $1,666.66 per month beginning as of January 1, 1936, and continuing through June 1, 1950, and the further sum of $1,348.82 on July 1, 1950, and beginning

August 1, 1950, $442.53 per month. This contract was for a term of ten years. This contract was not filed with the Federal Power Commission until February 28, 1942. It was the intention of said common officers and directors that the payments of $1,666.66 per month should retire $151,724.63 by July 1, 1950, at a maintenance rate of 3½% and interest rate of 5%, the balance of each monthly payment to be applied on the principal. The sum of $151,724.63 was one-half of $303,449.26 which the officers of defendant represented to Samuel W. White was the cost of the interconnection facilities.

In addition to the payments required by said contract to be made to defendant on account of interconnection facilities, Dakota was also required during each year of said contract to pay substantial amounts, as will hereinafter appear in these Findings, on account of the interchange capacity charges provided for in said contract, and both the charges on account of the interconnection facilities and on account of the interchange capacity provisions of said contract were part of the rate for surplus energy which defendant sent to Dakota for interchange under said contract.

From July 1, 1941, to October 19, 1945, Dakota and defendant interchanged energy as contemplated by the contract of July 1, 1941, and the net energy interchanged during this period was 43,798,846 kilowatt hours which went to defendant. At the time of the filing of the aforesaid contract of July 1, 1941, with the Federal Power Commission on February 28, 1942, there was also the written agreement dated July 1, 1939, made and entered into between the common officers and directors of defendant and Dakota under which Dakota was obligated to pay to defendant a portion of the salaries and expenses of defendant's load dispatchers located on defendant's system at Aberdeen, South Dakota, and who controlled the flow of energy back and forth by defendant and Dakota, which salary affected and was in connection with the rate for such interchange energy. Said agreement for which charges for dispatchers' services were collected by defendant from Dakota was never filed with the Federal Power Commission.

From July 1, 1941, to October 19, 1945, the defendant, through its officers and directors, who were officers and directors in common with Dakota caused Dakota to generate the aforesaid electric energy in the State of North Dakota and transmit the same to defendant at Gettysburg, Barnard, Ipswich and Aberdeen, South Dakota, where it was purchased for resale in South Dakota by defendant and the aforesaid 43,798,846 kilowatt hours was energy thus generated, transmitted and sold. Said kilowatt hours of electric energy were paid for by defendant to Dakota at only 5 mills per kilowatt hour, whereas the cost thereof per kilowatt hour to Dakota at points of delivery to defendant was 8.61 mills per kilowatt hour.

The 8.61 mills cost of said energy is only average production cost, a fair and reasonable cost of transmission of such energy and the line loss of energy in the transmission of such energy to defendant. The average production costs do not include any depreciation, taxes or insurance of any kind, or any fixed charges on capital, or any return on capital.

Payment of only 5 mills per kilowatt hour for said 43,798,846 kilowatt hours caused a loss to Dakota of $158,113.83.

Of the aforesaid 43,798,846 kilowatt hours, 5,365,546 were delivered to defendant from July 1, 1941, to and including December 31, 1941, and 11,095,540 from January 1, 1942, to and including December 31, 1942, and 10,301,160 from January 1, 1943, to and including December 31, 1943, and 9,454,400 from January 1, 1944, to and including December 31, 1944, and 7,582,200 from January 1, 1945, to and including October 19, 1945.

The common officers and directors of defendant and Dakota had charge of the operations of Dakota and of its accounting records and knew or should have known the cost to Dakota of said energy delivered to defendant and they did not tell Dakota or Samuel W. White the cost of said energy and the amount paid by defendant to Dakota during the aforesaid period was unfair and unreasonably low in the amount of 3.61 mills per kilowatt hour.

During the period from July 1, 1941, to October 19, 1945, defendant was at all times buying energy from Dakota at less than the cost of said energy to Dakota and at less than it would have cost the defendant to generate the energy itself, but defendant represented to Samuel W. White that the rate of 5 mills per kilowatt hour was a fair and reasonable rate for the energy purchased by defendant, and the aforesaid officers and directors of defendant represented to said White that since the price at which the energy was sold exceeded the incremental cost Dakota was making a gain, whereas in fact Dakota was losing even on an assumed cost to Dakota of solely the incremental cost.

During the year 1940 the officers and directors of defendant, who were common officers and directors of Dakota, had caused Dakota to expend funds hereinbefore in Finding No. 25 set forth to rebuild the transmission line of Dakota from Bowdle to Ipswich and to increase the voltage from Bowdle to Selby and to install a new substation at Bowdle, South Dakota, and had caused Northern in 1936 to make the expenditures set forth in Finding No. 23 for the transmission line from Wishek to Bowdle and the oil circuit breakers described in said Finding, and none of said expenditures would have been necessary for the operations of Dakota during the period in this Finding referred to and such expenditures created transmission capacity on said lines in excess of Dakota's requirements, and the aforesaid rebuilding and installations were for the purpose of enabling defendant to purchase increased energy at 5 mills per kilowatt hour.

27. The interconnection facilities were constructed by defendant for its own use and benefit to secure without any charge against Northern and Dakota on account of such interconnection facilities a net return to defendant of $29,500 a year. The interconnection facilities cost the defendant as of the time of their original construction, completed in 1930, not to exceed $255,699.54, and thereafter in 1941 the defendant added thereto a transformer at Aberdeen at a cost not exceeding $14,359.15, so that the maximum aggregate investment at any time by the defendant in said facilities did not exceed $270,058.69.

Further findings concerning the interconnection facilities are contained in the foregoing portions of the Findings in this case.

The interconnection facilities were utilized by defendant for the interchange with Northern, North Dakota and Dakota of energy in interstate commerce at wholesale for resale.

From January 1, 1936, and through October 19, 1945, the common officers and directors of Northern, North Dakota and Dakota caused said companies under the terms of the contracts hereinbefore in this findings referred to to pay to defendant at the rate of $1,666.66 per month as a charge on account of said interconnection facilities an aggregate of $196,021.51 of which Northern paid $70,000.00 in the period from January 1, 1936, to June 30, 1939, and Dakota paid from July 1, 1939, to October 19, 1945, the balance, or $126,021.51, of which $1,021.51 was paid for the period from October 1st to October 19, 1945.

During the entire period of the payments referred to in the foregoing paragraph, defendant knew that by far the bulk of energy interchanged would and did flow southward from Northern and Dakota to defendant as opposed to the energy flowing to the north from defendant to Northern and Dakota. During this period the gross energy interchanged was 95,720,480 kilowatt hours and Northern and Dakota delivered of that amount 81,330,996 kilowatt hours to defendant.

The charge thus made against Northern and Dakota on account of the interconnection facilities constituted a charge for energy and an increase in the 5 mill charge for energy which Northern and Dakota paid to defendant.

This charge of $1,666.66 per month was originally conceived by defendant as a method of recouping most of the loss defendant would suffer if the agreement for allocation of joint management expenses should be terminated by Northern and North Dakota and was originally proposed at $20,000.00 per year for 1,000 kilowatts of firm power to be furnished by defendant to Northern, but defendant after such proposal, realizing it had no such firm power, abandoned that as a basis for the charge. In con-

nection with the proposal for said charge, defendant falsely represented to Samuel W. White that the interconnection facilities had been built solely for the benefit of Northern and that said interconnection facilities had cost $340,000, whereas said interconnection facilities were in fact built for the benefit of defendant, as set forth in these Findings, and at amounts not to exceed $270,058.69. Later defendant represented to said Samuel W. White that said facilities cost $325,000 and some time in 1943 represented to said White that said facilities cost $303,449.26.

Throughout the entire period from January 1, 1936, to October 19, 1945, Samuel W. White relied implicitly on the statements of the defendant to him concerning defendant's investment in and the carrying charges on said interconnection facilities and on the judgment of the common officers and directors of Northern, Dakota and the defendant as to the propriety of said charge on account of said interconnection facilities.

Samuel W. White was never fully advised of the facts on which he could have determined whether there should have been any charge on account of said interconnection facilities or the amount thereof. The defendant represented to Samuel W. White that taxes and maintenance were equivalent to 3½% of the investment in said interconnection facilities, whereas taxes, maintenance and operation did not exceed 2¼% of $303,449.26.

On December 20, 1938, defendant transmitted to the Federal Power Commission a copy of the interconnection contract hereinabove referred to dated as of October 7, 1936, and stated:

> "We wrote you on January 28, 1936, with respect to the energy interchanged, but since writing you have reduced to writing the energy interchange agreement between Northwestern Public Service Company and Northern Power and Light Company."

The letters of January 28, 1936, are the letters constituting defendant's Rate Schedule F. P. C. No. 1 and Northern's Rate Schedule F. P. C. No. 1. Upon being advised by the Federal Power Commission that the interconnection contract would not be effective as of January 1, 1936, without

an application therefor pursuant to the rules of the Commission, the defendant filed such application with said Commission on January 25, 1939, falsely advising the Commission that the oral agreement of January 28, 1936, providing for the interchange of surplus energy, which has hereinbefore been referred to, was reduced to writing on October 7, 1936, without changing the terms of the agreement, whereas in fact the charge of $20,000 per year began as of January 1, 1936, and was incorporated in the agreement of October 7, 1936, and defendant also falsely advised the Federal Power Commission in said application that the defendant and North Dakota and Northern operated their respective systems as a single interconnected system for a number of years under an oral agreement providing for the billing of energy interchanged and also for the billing of fixed charges on the interconnection facilities, whereas in fact no charge had been made for fixed charges on interconnection facilities by the defendant against Northern prior to January 1, 1936. When the aforesaid charge of $20,000 per annum was instituted and at the time of the filing of said application for authority to make said contract of October 7, 1936, retroactive to January 1, 1936, defendant failed to notify said Commission of the charges on account of dispatchers' salary and expenses hereinbefore recited in these Findings. On February 22, 1939, the defendant advised the Commission by letter received by the Commission on February 24, 1939, that the charge to Northern of $20,000 per annum on account of interconnection facilities was made on the basis of actual costs, which statement was untrue.

On the 23rd day of February, 1939, the Federal Power Commission issued an order that the agreement of October 7, 1936, between the defendant and Northern filed with the Commission on December 23, 1938, be allowed to take effect as of January 1, 1936.

On March 15, 1939, the defendant, pursuant to a request for information from the Federal Power Commission concerning the transmission charges on the interconnection facilities, falsely advised the Federal Power Commission that the interconnection facilities had cost $324,989.78. No hearing was held by the Commission on the application

of defendant to have the contract of October 7, 1936, made effective as of January 1, 1936, and no notice was given by the Federal Power Commission to Northern of such application.

28. Sometime after June 1, 1938, and as of January 1, 1938, the common officers and directors of defendant, Northern and North Dakota caused Northern and North Dakota to make and enter into an interchange capacity contract, hereinbefore referred to, which had for its purposes the purposes hereinbefore stated.

At the time of the execution of said interchange capacity contract, defendant knew that by far the bulk of the electric energy interchanged and to be interchanged by the defendant and Northern would be generated in the State of North Dakota and transmitted to the State of South Dakota and, in fact, from January 1, 1938, through October 19, 1945, the bulk of said energy was generated by North Dakota or Dakota in the State of North Dakota and by Northern or Dakota delivered to the defendant in the State of South Dakota at Barnard, Ipswich, Aberdeen and Gettysburg and the energy thus received by defendant was resold to its retail electric customers. Substantial portions of the energy generated by defendant in the State of South Dakota during the aforesaid period and by it sold to Northern or Dakota was transmitted to the State of North Dakota where it was sold by Northern or North Dakota, and after July 1, 1939, by Dakota, to their respective retail electric customers.

Said interchange capacity contract was filed with the Federal Power Commission on December 23, 1938, as hereinbefore stated and without filing the agreement for allocation of joint management expenses then in existence under which defendant was charging North Dakota and Northern for load dispatchers' salaries and expenses, as hereinbefore found. The Federal Power Commission notified the defendant that said contract would not be effective as of January 1, 1938, without an application being presented to the Federal Power Commission, pursuant to the rules of said Commission, for consideration by it as to whether said contract should be made effective as of Janu-

ary 1, 1938. The letter of transmittal of said interchange capacity agreement to the Federal Power Commission contained the following statement of the defendant:

> "We have recently reduced to writing the oral agreement between Northwestern Public Service Company, North Dakota Power & Light Company and Northern Power and Light Company with respect to reserve capacity."

Upon receipt of notice from the Federal Power Commission as aforesaid, defendant filed with the Federal Power Commission an application to have said contract given retroactive effect to January 1, 1938, and in said application stated to said Commission with reference to said contract as follows:

> "Under date of January 1, 1938, an agreement was entered into whereby each company would furnish its proportion of the reserve capacity required for the interconnected system, or in lieu thereof the company or companies with a deficiency of reserve capacity will pay the company or companies having excess reserve capacity a demand charge."

No notice of the filing of said application by the defendant was given to Northern or North Dakota though defendant was then charging Northern under said contract at the rate of $22,440 per annum for the year 1938, and for the period beginning January 1, 1939, and ending June 30, 1939, defendant charged Northern the sum of $9,068.40. The aforesaid charges for the year 1938 and for the aforesaid period in the year 1939 were received by the defendant in said years.

On July 1, 1939, the interchange capacity contract dated as of said date between defendant and Dakota was made as hereinbefore found, under the circumstances hereinbefore found, and was filed with the Federal Power Commission as hereinbefore found, and from July 1, 1939, to December 31, 1939, defendant charged and received from Dakota the sum of $9,068.40 and during the year 1940, under the terms of said contract, charged and received from Dakota the sum of $12,685.20, and during the period from January 1, 1941, to June 30, 1941, defendant charged and received from Dakota under the terms of said contract

$2,138.40. As of the 1st day of July, 1941, but actually on January 28, 1942, defendant's common directors and officers, who were at the same time directors and officers of Dakota, caused Dakota to make and enter into the contract dated as of July 1, 1941, covering interchange power, interconnection facility charges and interchange capacity charges as hereinbefore found, and caused said agreement to be filed with the Federal Power Commission on the 5th day of February, 1942. At the time of the filing of said agreement with the Federal Power Commission, defendant represented that the agreement was a combination of the interchange capacity agreement dated July 1, 1939, and the interconnection contract dated July 1, 1939, hereinbefore referred to, and stated falsely that the agreement made January 28, 1942, contained no material change in the formula for determining the charges, whereas in fact the formula for determining the charges had a material change in the interval fixed for the determination of system demands whereby said interval was changed from one-half hour to one hour, and said letter of transmittal falsely stated that the payments on account of transmission facilities would be applied against the existing investment and after the investment had been amortized the charge would be reduced to cover maintenance and operation on the interconnection facilities, whereas the charge was on a greater amount than the existing investment and the provision for charge in the agreement after the amortization of the investment was substantially greater than the maintenance and operation charges, and said letter of transmittal contained a false statement to the Federal Power Commission that even if said contract so transmitted was not effective for 1942, nevertheless the provision for regulating payments under the interchange capacity provisions would be the same as under the interchange capacity agreement dated July 1, 1939, whereas in fact the payments for the year 1942 were under the agreement then transmitted to the Federal Power Commission $7,761.60 greater than they would have been under the interchange capacity agreement dated as of July 1, 1939. Under date of February 19, 1942, the Federal Power Commission advised defendant that an application would have to be filed to make said contract dated July 1, 1941, executed on January 28, 1942,

effective as of July 1, 1941, and asked why the interval for figuring the demands for the interchange capacity charge had been changed to a sixty minute interval and asked defendant to state the values of the excess or deficiency in reserve capacity which would have resulted had a thirty minute demand interval been used as provided in the interchange capacity agreement dated as of July 1, 1939, and asked the original cost of the interconnection facilities, and defendant falsely represented to the Federal Power Commission that the rates provided in the interchange capacity agreement and the interconnection contract, both dated as of July 1, 1939, and the rates provided in the contract made January 28, 1942, were the same, whereas in fact the contract of January 28, 1942, provided for a ten year term which was an additional burden on Dakota, and in response to said request from the Federal Power Commission, defendant falsely represented and stated to the Federal Power Commission that it did not have facilities for determining the values of the excess or deficiency in reserve capacity which would have resulted had a thirty minute demand interval been used, as provided in the then existing contract, instead of the sixty minute interval provided in the contract of January 28, 1942, whereas in fact defendant then knew and had prepared schedules showing that had the thirty minute interval been used as under the 1939 contract, the charge against Dakota would have been $9,438.00, whereas under the contract of January 28, 1942, the charge was $17,199.60, and in response to said request of said Commission defendant falsely stated to the Commission that the original cost of the interconnection facilities was $303,449.26. After receipt of the aforesaid misrepresentations by the defendant to the Federal Power Commission, the Federal Power Commission issued an order dated March 31, 1942, providing that the contract made January 28, 1942, be allowed to take effect as of July 1, 1941, and providing that said contract should be deemed to be filed and published in compliance with the Federal Power Act, and providing that nothing contained in the order of the Federal Power Commission should be construed as constituting approval by the Commission of any service, rate, provision or condition contained in said contract. Pursuant to the terms of

said contract dated as of July 1, 1939, the defendant charged and received from Dakota for so-called interchange capacity charges in the year 1941 the sum of $2,138.40, in the year 1942 $17,199.60, in the year 1943 $8,514.00, in the year 1944 $9,992.40 and in the year 1945, for the period from January 1, 1945, through October 19, 1945, $18,420.25.

All of the aforesaid interchange capacity contracts represented a plan whereby defendant purported to furnish reserve capacity to the other contracting parties, but in fact agreed to furnish only surplus energy which it was already bound to furnish under the interconnection contracts, or in the case of the 1941 contract, under the provisions thereof with reference to the interchange of energy.

The interchange capacity contracts did not contain data from which the charge could be determined and such information was never filed with the Federal Power Commission until after charges for the then current year had been instituted and said data was never accompanied with any request that the charges disclosed in such data should be made operative as of any prior date or as of any date.

The charge of $13.20 per kilowatt provided for in said contracts was in fact the going charge in the territory where the parties to said contract operated for firm power and the so-called interchange capacity agreements were of no value to Northern, North Dakota or Dakota and it is admitted by the defendant that said contracts were not firm power contracts and defendant did not at any time furnish firm power to Northern, North Dakota or Dakota.

The defendant knew at the time of the making of the interchange capacity contract of January 1, 1938, and at all times thereafter, that it did not have and was not furnishing firm power to Northern, North Dakota or Dakota, and that there was no justification for any charge for interchange capacity, but never disclosed to Samuel W. White its knowledge relative thereto.

Prior to the year 1942, defendant arbitrarily selected a day on which it assumed the maximum demand would occur on all the properties of all of the companies parties to the interchange capacity contracts, and selected the

hours in which it assumed such demand would occur, and after such selections of the day and the hours, read meters to determine the highest thirty minute demand and using those readings as one of the elements of its formula determined the interchange capacity charge for the ensuing year and charged the other parties to the interchange contracts accordingly. This method was wholly unreliable and purely speculative.

The interchange capacity charges collected by defendant from Northern and Dakota as hereinbefore found constituted a charge for energy and an increase in the 5 mill charge for energy which Northern and Dakota paid to defendant.

29. The agreements for allocation of joint management expenses hereinbefore referred to in these Findings, which were never filed with the Federal Power Commission, as hereinbefore found, affected the rates and charges collected by the defendant from Northern and North Dakota for interchange energy and defendant, pursuant to the terms of said agreements and through the aforesaid common officers and directors, charged Northern and North Dakota and caused them to pay to defendant from January 1, 1936, to July 1, 1939, the sums of $2,652.25 and $1,900.89, respectively, for dispatchers' services and expenses and under said agreement for the allocation of joint management expenses dated as of July 1, 1939, defendant, through said common officers and directors, caused Dakota to pay to defendant from July 1, 1939, to October 19, 1945, on account of said dispatchers' salaries and expenses, the sum of $14,661.62 by years as follows: From July 1, 1939, to July 1, 1941, the sum of $4,423.88, and for the period from July 1, 1941, to October 19, 1945, the sum of $10,237.74.

Pursuant to the terms of the aforesaid agreements for the allocation of joint management expense, defendant exacted the aforesaid payments on account of the salaries and expenses of the load dispatchers employed by defendant to control the flow of energy between the parties to said agreements, as set out hereinbefore in these Findings, which energy, as hereinbefore noted, moved in interstate commerce and was sold by the respective parties to the

other parties to said agreements for resale to retail customers. Defendant failed to offer any proof establishing the fairness and reasonableness of the load dispatchers' salaries and expense charges.

30. Charges exacted by defendant under the aforesaid interconnection contracts, the interchange capacity contracts and the agreements for allocation of joint management expense were all part of a scheme of defendant to offset the price that it was paying Northern and Dakota for energy.

The defendant's charge on account of the interconnection facilities assumed an equal use of such facilities by the defendant and by Northern in the first instance and Dakota after the aforesaid merger and was in an amount sufficient to retire one-half of the entire cost of such property in 14½ years, pay interest at 5% and pay taxes, maintenance and operation of the property. Such a charge is unreasonably high and it is manifest defendant knew such amount was excessive, ignoring the $29,500.00 defendant said it would realize annually out of such facilities even before a charge to Northern and North Dakota was contemplated. All of the charges for interconnection facilities were without consideration, unjust, unreasonable and unlawful in their entirety.

31. At no time was Mr. White or the members of the Board of Directors of United Public Utilities Corporation aware of the frauds being practiced upon Northern, North Dakota or Dakota.

32. The interest which has accrued at 6% per annum to September 15, 1948, on the monthly payments of $1,666.66 made by plaintiff's predecessors to defendant on account of interconnection facilities amounts to $91,340.18.

33. The interest which has accrued at 6% per annum to September 15, 1948, on the payments made by plaintiff's predecessors to defendant on account of the interchange capacity demand charges, computed on $22,440.00 from January 1, 1939, and on $18,136.80 from January 1, 1940, and on $12,685.20 from January 1, 1941, and on $4,276.80

from January 1, 1942, and on $17,199.60 from January 1, 1943, and on $8,514.00 from January 1, 1944, and on $9,992.40 from January 1, 1945, and on $18,420.25 from January 1, 1946, amounts in the aggregate to $43,866.13.

34. The interest which has accrued at 6% per annum to September 15, 1948, on the payments made by plaintiff's predecessors to defendant on account of dispatchers' salaries and expenses, computed on $2,652.25 from July 1, 1939, and $1,900.89 from July 1, 1939, and on $4,428.88 from July 1, 1941, and on $10,237.74 from October 19, 1945, amounts in the aggregate to $6,213.38.

35. The interest which has accrued at 6% per annum to September 15, 1948, on the amounts which defendant paid plaintiff's predecessors for energy less than the cost thereof to such predecessors, as found herein, is:

Interest		Principal	
$ 3,318.29 on	(1,499,540 KWH at 3.15 mills)	$ 4,723.55 from	1/ 1/37
$ 7,284.93 on	(3,648,909 KWH at 3.15 mills)	$ 11,494.06 from	1/ 1/38
$ 7,539.74 on	(4,108,130 KWH at 3.15 mills)	$ 12,942.76 from	1/ 1/39
$ 5,730.71 on	(3,292,802 KWH at 3.15 mills)	$ 10,372.33 from	7/ 1/39
$ 6,227.92 on	(5,062,322 KWH at 2.66 mills)	$ 13,465.78 from	1/ 1/41
$ 7,830.91 on	(6,806,853 KWH at 2.66 mills)	$ 18,106.15 from	7/ 1/41
$ 7,796.27 on	(5,365,546 KWH at 3.61 mills)	$ 19,369.62 from	1/ 1/42
$13,718.80 on	(11,095,540 KWH at 3.61 mills)	$ 40,054.90 from	1/ 1/43
$10,505.28 on	(10,201,160 KWH at 3.61 mills)	$ 37,187.19 from	1/ 1/44
$ 7,594.01 on	(9,454,400 KWH at 3.61 mills)	$ 34,130.28 from	1/ 1/45
$ 4,770.89 on	(7,582,200 KWH at 3.61 mills)	$ 27,371.74 from	10/19/45
Total $82,417.85		$229,819.46	

Upon the foregoing Findings of Fact, the Court states the following as its

Conclusions of Law.

1. This Court has jurisdiction of the subject matter and of the parties to this cause, and said cause is properly cognizable in a court of equity.

2. The merger of Northern and North Dakota vested in the surviving corporation all rights, claims and demands of Northern against the defendant on account of the exaction by defendant from Northern of unjust, unreasonable and unlawful rates and charges for interconnection facilities and interchange capacity and dispatchers' sal-

aries and expenses, and vested in Dakota all rights, claims and demands of Northern against the defendant on account of underpayments for electric energy delivered by Northern to defendant.

3. Plaintiff by virtue of the assignment of October 19, 1945, is owner and holder of all claims, including the ones in issue, which Northern, North Dakota and Dakota had and have against defendant.

4. All rates and charges in issue were subject to the provisions of Section 205 (a) of the Federal Power Act, 16 U. S. C. A. 824d (a), which requires that such rates and charges be reasonable, and were further subject to Section 205 (c) of the Federal Power Act, 16 U. S. C. A. 824d (c), and Order No. 36 of the Federal Power Commission which required that all such rates and charges be filed with the Federal Power Commission.

Defendant when it filed the rate contracts recited in the preceding Findings of Fact at no time made a complete filing of all of the rates and charges affecting or relating to the sale of electric energy in interstate commerce at wholesale for resale which it had placed in effect between itself and Northern, North Dakota and Dakota. Since these unfiled charges, to-wit, the charges for dispatchers' salaries and expenses, and from January 1, 1936, to its date of filing on December 23, 1938, the interconnection facility rental contract, constituted contracts which affected or related to such rates or charges as defendant was attempting to file, defendant never had a lawful rate on file with the Commission. Further, the frauds practiced by defendant on the Federal Power Commission and on Northern, North Dakota and Dakota also made the attempted filing of rates by the defendant void and ineffective for any purpose whatsoever.

5. Under Section 205 (d) of the Federal Power Act, 16 U. S. C. A. 824d (d), the attempted filings of the aforesaid contracts by the aforesaid common officers after the initial filing of the energy interchange contract between defendant and Northern filed on February 7, 1936, with the Federal Power Commission were ineffective as all of said

rates, with the exception of the initial filing above referred to, were filed after they had gone into effect, though they constituted changes in the initially filed rate, being merely increased charges for energy, and the Federal Power Commission was without power or authority to give such changes in rates a retroactive effect.

6. The Federal Power Commission was granted no authority by Congress to take away from a utility which had made payments under unfiled rates such utility's right to recover such rates from the payee thereof.

7. The Federal Power Commission has no power to grant reparations or retroactive relief to a utility injured because of violations of the Federal Power Act by another utility.

8. Recourse to the Federal Power Commission is not the sole remedy available to a party damaged as were Northern, North Dakota and Dakota under the circumstances described in the foregoing Findings of Fact.

9. The Federal Power Act grants to an electric utility which is subjected to unreasonable rates and charges, or charges collected pursuant to unfiled contracts, or contracts improperly filed as disclosed by the Findings herein, for or in connection with electric energy or transmission thereof which moves at wholesale in interstate commerce, a remedy enforceable in the District Courts of the United States to recover on account of such rates and charges and to recover damanges for energy which it was caused to sell at unreasonably low prices under the circumstances set forth in the foregoing Findings of Fact.

10. The fact that a rate or charge for or in connection with the sale or transmission of electric energy at wholesale in interstate commerce is on file with the Federal Power Commission does not establish the reasonableness of such rates or charges or constitute approval by the Federal Power Commission, nor does it alleviate the liability under the Federal Power Act or otherwise of an electric utility exacting an unreasonable rate thereunder or paying an unreasonably low rate thereunder. Those guilty of

fraud cannot avail themselves of the provisions of the Federal Power Act to protect themselves.

11. In view of the doctrine of Hurn v. Oursler, 289 U. S. 238, 77 L. Ed. 1148 (1933), plaintiff has a claim against defendant which it may enforce in Federal Court either under the provisions of the Federal Power Act or in Equity because of the fraudulent practices imposed on plaintiff's assignor and its predecessors by the defendant.

12. The status of defendant's directors, who were also directors of the Northern companies, is that of express trustees as determined by Delaware law which establishes the nature of their relationship to their corporation.

13. All of the contracts in question were presumptively fraudulent as to plaintiff's assignor and its predecessors in view of the common directors and officers. Defendant has failed to rebut this presumption and sustain the fairness of the contracts.

14. Defendant's unlawful, wrongful and fraudulent underpayment to plaintiff's assignor and its predecessors for energy delivered by them to it amounted to $229,219.44.

15. Defendant unlawfully, wrongfully and fraudulently charged and exacted from plaintiff's assignor and its predecessors $196,021.51 for interconnection facility rental.

16. Defendant unlawfully, wrongfully and fraudulently charged and exacted from plaintiff's assignor and its predecessors $111,665.05 under the guise of the so-called interchange capacity charges.

17. Defendant unlawfully, wrongfully and fraudulently charged and exacted from plaintiff's assignor and its predecessors $19,214.76 for dispatchers' salaries and expenses in view of the fact that the agreements for allocation of joint management expenses were never filed with the Commission though they represented a charge for and in connection with the sale and transmission of electric energy at wholesale in interstate commerce, and, further, since defendant has failed to meet its burden of establish-

ing the reasonableness of this charge, it may not retain same.

18. Plaintiff is not barred by laches or the statute of limitations from enforcing any of the rights set out in its complaint herein in view of the fact that plaintiff's assignor and its predecessors were under the domination and control of the defendant until October 19, 1945. Further, in view of the fact that plaintiff's cause of action is one which heretofore was solely cognizable in equity and that the fraud practiced by defendant was not discovered until after October 19, 1945, after which time plaintiff proceeded with due diligence, plaintiff's causes of action are not barred by any statute of limitations.

19. Defendant is guilty of a breach of fiduciary duty which it owed Northern, North Dakota and Dakota by virtue of the actions of common officers and directors, as set forth in the Findings.

20. The contracts for payment of interconnection charges being unjust and unreasonable were unlawful and illegal and therefore incapable of ratification.

21. The contracts for the payment of interchange capacity charges being for charges that were unjust and unreasonable were unlawful and illegal and therefore incapable of ratification. The contracts for the payment on account of dispatchers' salaries and expenses being unjust and unreasonable were unlawful and illegal and they were also unlawful and illegal because they were not filed with the Federal Power Commission and they therefore could not be ratified.

22. Neither plaintiff's assignor, Dakota, North Dakota, or Northern, nor United Public Utilities Corporation at any time so acted that such action would have constituted a ratification of any of the transactions in issue, had such transactions been capable of ratification.

23. Plaintiff is entitled to recover from the defendant $556,120.76, being the aggregate payments on account of interconnection facilities and on account of interchange capacity charges and on account of the payments for

dispatchers' salaries and expenses and the underpayments for energy and, in addition, the plaintiff is entitled to recover interest as found in the Findings of Fact herein, making an aggregate of principal and interest of $779,958.30.

Let Judgment Be Entered Accordingly.

By the Court,

A. LEE WYMAN,
Judge of the United States
District Court.

Arrest:

ROY B. MARKER,
Clerk. (Seal of Court)

Dated September 15th, 1948.

(Indorsed)—Filed Sept. 15, 1948. Roy B. Marker, Clerk.

(Judgment, September 15, 1948.)

This cause was duly tried by the Court, Honorable A. Lee Wyman, Judge, without a Jury, at Sioux Falls, South Dakota, on February 9, 1948 and succeeding days: all parties being represented by their Attorneys of record herein: And the Court having made, adopted and filed its Findings Of Fact and Conclusions Of Law [consituting] the decision herein:

Now, Therefore, it is hereby Ordered, Adjudged and Decreed that the Plaintiff, Montana Dakota Utilities Company, a Corporation, have and recover Judgment against the Northwestern Public Service Company, a Corporation, Defendant, for the sum of $779,958.30 principal and interest, together with the further sum of Seventeen Hundred Eighty-one and 41/100 Dollars, costs and disbursements to be taxed and hereinafter inserted by the Clerk of this Court.

Dakota Public Service Co. 745 on peak. This is just a representation of the purpose of the excess capacity contract. In other words, once a year—

Mr. Fellows: Just what question is before you?

Q. Will you explain that as to its application to the power pool relationship between these companies?

A. This excess capacity was determined by the operating committee once a year at the time of the coincident peak of the prior year to be applied to the following year. Any excess capacity, you put the excess that is indicated that each of the companies have at the time of the coincident peak of one or more systems into a pot, as we might say. Then we determine how much each of the companies have to carry their proportionate part. In other words, the excess capacity is then prorated as to the need of the company, and the campany under these contracts is expected to carry his ratio of the maximum peak of the excess capacity. For instance, if one company had 2000 kilowatt peak, and another one had 1000, and another one 1000, so there was three altogether, then the one having 2000 peak would carry 50% and the excess capacity would be charged against it, and each of the others would carry 25%. It doesn't mean that either one of the companies can draw on that excess capacity.

Mr. Fellows: I object to that. He is asking him to explain something from this document.

Mr. Benson: You are asking him about power pools, generally? Are you asking him to interpret the contract, or just talk about power pools generally?

Mr. Royhl: I am asking him to talk about the application to this Exhibit 339.

Mr. Fellows: Of what?

Mr. Royhl: Power pools.

Mr. Fellows: All over?

Mr. Royhl: This power pool.

Mr. Fellows: That is the reason I make the objection, it is not responsive at all.

The Court: I think it was explanation of the exhibit that has been introduced here. I think the objection is well taken.

Q. Have you explained as to how the Dakota Public Service Co. deficiency was arrived at for the year 1943 and 1944? A. Yes.

Q. I note that for the year 1940, you have two columns. Is that correct? A. Yes.

Q. And as applied to the column, September 1 to December 31, 1940, there is a minus 213, or a deficiency of reserve capacity for the defendant company? A. Yes.

Q. Where do you show what amount was paid by the defendant company for that deficiency or reserve capacity? A. Down under (8). $2811.60.

Q. Did I ask you if line 7 indicated the date of the coincident combined system peak?

A. If you didn't, I can say it does.

Q. Do you know, under the practice of electric utilities industry, the reasonable rate or charge per kilowatt of capacity, under the power pool contract? A. Yes.

Q. What is the reasonable rate or charge?

Mr. Fellows: We make the same objection.

The Court: If he knows he can answer.

A. My experience is that the charge on the one most like this with which I have had experience is the same charge as this.

Mr. Fellows: We move to strike the answer for all of the reasons given in the objection.

The Court: Sustained.

Q. Will you give it in dollars and cents.

Mr. Fellows: Same objection.

The Court: Overruled.

A. $13.20.

Mr. Fellows: We move to strike the answer for the purpose of objection.

The Court: It may go out for the purpose of objection.

By Mr. Fellows:

Q. What particular power pool were you referring to when you made your answer? A. Commonwealth Edison.

Mr. Fellows: We move to strike the answer for all of the reasons given in the objection; immaterial; no proper foundation laid.

The Court: It may go out.

By Mr. Royhl:

Q. Do you know how the KW value is computed or based under the contract involved in this litigation?

A. Yes.

Q. Have you prepared and made a study of the kilowatt values of the generating capacities in the combined system of these companies?

A. I have of the Northwestern Public Service Co.

Q. That is the defendant company? A. Yes.

Q. And do you know what those values are? A. Yes.

Q. Mr. Learned, from your knowledge, education and experience, do you know what a fair charge for reserve capacity in this territory during the years 1938 to 1945, inclusive, was? A. Yes.

Q. What was that charge?

By Mr. Fellows:

Q. Did you make an [installations] of the kind which you impute to the question Mr. Royhl just asked you, during any of the period embraced in the question, in the territory in which you assume he is asking about?

A. No, I think not. Not in South Dakota.

Q. Do you know what territory he is referring to in the question? A. I think I do.

Q. Do you know the conditions under which the installations were made which you assume are included in the question?

A. I have seen the results of the installations. I have been in a number of plants.

Q. For what period of time are you attempting to answer the question? A. For a period from 1935 on.

Q. Do you know what kind of installations, specifically, he is asking about?

A. I take it he is asking about installation of the character on this property.

Q. Have you ever seen the installation on this property?

A. Yes.

Q. Did you ever see the installations you assume he is asking about in the questions to you?

A. I was not there when they were installed. I have seen the plants in operation.

The Court: They are not asking about the cost of the installation. That is not the way I understood the question. Read the question.

Q. (Read) "Mr. Learned, from your knowledge, education and experience, do you know what a fair charge for reserve capacity in this territory during the years 1936 to 1945, inclusive, was? A. Yes.

"Q. What was that charge?"

The Court: It is a charge for reserve capacity.

Mr. Fellows: We object to that as no foundation.

The Court: He has testified that he knows.

By Mr. Fellows:

Q. How do you know? A. My business is studying rates.

Q. I am not asking your business of studying rates elsewhere. I said, how do you know in relation to this particular property?

A. Because properties of certain size have certain costs installed, and they do not vary a tremendous amount from section to section in a range of territory.

Q. Do they vary with conditions?

A. Somewhat. Some elements do. But the installation of a power plant of a certain size will run in certain range per KW.

Q. You are basing your testimony on the general knowledge you have had from experience in other places?

A. On my general knowledge over-all, together with my having visited these plants, some of them, the larger ones, and my engineering experience in appraisal and valuation and rate work.

Q. You can look at a plant and tell what it cost, can you?

A. I can't to the exact dollar. I don't know just what

I will find on appraisal. In [appraisale] we go out and study each one, but they have a general zone of cost.

A. At least $13.20.

Q. Per kilowatt? A. Per kilowatt for excess capacity.

Q. Is that per year? A. Yes.

Q. Did you hear Mr. Helmick's testimony for the plaintiff? A. Yes.

Q. To the effect that in his opinion, that the interchange capacity contracts had no value to the Dakota Public Service Co. and its predecessor companies? Did you hear that testimony? A. Yes.

Q. Do you have an opinion with respect to the value of the interconnection facilities contract between these companies and to the Dakota Public Service Co.? A. Yes.

Q. And its predecessor companies? A. Yes.

Q. What is that opinion?

A. I think it does have value to both companies.

Q. It is of actual benefit, is it? A. Yes.

Q. What is the difference in the expression KW, and the further expression KWH, or kilowatt hours?

A. KW, when it describes capacity, represents amount. In other words, KW is the rate, and the kilowatt hour is the rate delivered over the time. Kilowatt hour, to be technical, is a thousand watts in an hour. KWH is a quantity of energy.

Q. And KW is more particularly a capacity of development? A. Yes.

Q. Do you know, Mr. Learned, the usual and ordinary charge made for fixed charges of rentals in connection with interconnection facilities? A. Yes.

Q. Do you know that for the years 1936 to 1945, inclusive? A. Yes.

Q. What is a reasonable charge or rental for interconnection facilities, for the years 1936 to 1945, in the territory of North and South Dakota and adjacent territory?

A. 12% on investment plus operating expense.

Q. And what per centage for operating expense, approximately?

A. That may amount to possibly one or one and a half. Not to exceed that. I think one per cent.

Cross Examination, by Mr. Fellows.

Q. Will you refer to Exhibit 339, your tabulation? Have you that there? A. Yes.

Q. Referring to the 9th item, use of reserve capacity. Do you have that? A. Yes.

Q. I noticed in your direct examination that you testified to items 1940 to 1945, inclusive, did you not? A. Yes.

Q. And you failed to testify to the items of 1938, 1939 and 1940. Is that right? A. That is correct.

Q. Tell me this. On your tabulation, Exhibit 339, under that paragraph (9) you were explaining, isn't it a fact that in the years 1938, 1939 and 1940, the Northern Power & Light and the North Dakota Power & Light, paid to Northwestern, a total of $53,262.00, made up of the items of $22,440.00 for 1938, $18,136.80 for 1939, and $12,685.20, for the year 1940? A. Yes.

Q. And took no kilowatts during those years or any of those years on the peak?

A. I do not know that, or I would have put the figures in.

Q. You didn't even try to ascertain that, did you?

A. Yes, I did.

Q. Why didn't you ascertain that?

A. I could not find any data.

Q. They furnished you the books and records of the company for that purpose?

A. Yes, but as I understand the 1922 and 1510 were from some load diagrams, and I could not find any such information on load diagrams prior to that time.

Q. Those figures were taken for those three items, wasn't they? A. Yes.

Q. When did you start to work on this case?

A. I was in Huron the week of November 18, 1946. I think I arrived in Mitchell and went up to Huron the 19th of November, 1946.

Q. Is that the first contact you had with the case?

A. Yes.

Q. Were you sent there by your employer, Black & Veatch? A. Yes.

Q. At the time they sent you up here had they shown you the pleadings in the action? A. No, sir.

Q. Did they tell you what you were coming up here to prove or disprove?

A. No, sir. Mr. Sanborn came to our office and I had a conversation with him and he said he would like to have me call first on the attorney in Chicago, who advised me they wanted to know what the facts were.

Q. Mr. Sanborn first contacted you in Kansas City?

A. He contacted Mr. Black and Mr. Black called me in to meet with Mr. Sanborn.

Q. He is president of the defendant company? A. Yes.

Q. He had you go see the lawyers in Chicago? A. Yes.

Q. Did they show you the pleadings?

A. I don't recall at the time that they did.

Q. Did they tell you what they wanted to prove or disprove in this case?

A. No, sir. We don't do business in that way.

Q. Did they tell you what they wanted you for at all?

A. They said they wanted to find out what our idea was, whether there was a reason for the case.

Q. Your idea of what? A. Engineering facts.

Q. Did they tell you what they wanted you to find out an idea about?

A. They told me, generally, what the case was, I believe in district court here at that time. But when I got to Huron I think I had opportunity to read those pleadings.

Q. When you talked to Sanborn in Kansas City and when you talked to the lawyers in Chicago, they didn't tell you what the case was about, even?

A. Only in a general way.

Q. Did they tell you what the claims of the plaintiff were and what the defenses of the defendant were alleged to be?

A. I don't recall that there was anything said about the defense. As I recall it, they told us the general problem, they were being sued for about half a million dollars by a company which had purchased a property they had prior operated under joint management and which, at one time, when they first took over, was owned, I think, by a common owner who had requested them to take it over and operate it. We were approached and certainly asked to find out what we thought the facts showed.

Q. Did they tell you what they wanted you to do out here?

A. Yes. Find out facts from an engineering standpoint and give them an idea of what it meant.

Q. Had you ever worked for the defendant company before?

A. I think only once. I believe our firm made an appraisal of the Columbus, Nebraska system, when it was condemned by the Public Power Districts in Nebraska, around 1938, or somewhere in that neighborhood.

Q. That is the only work you know of your company or yourself having done for the defendant? A. Yes.

Q. Have you put in your time since November 19th on this job? A. Oh, my, no.

Q. Have you been an expert witness for utility companies before this time? A. Yes.

Q. Many times?

A. I don't know what would be considered many. I have probably testified once, possibly some years twice, some years not at all.

Q. Over this period from 1910?

A. I haven't done much testifying—I think the first testifying was about 1927 or 1928. Then I have testified a number of times since.

Q. From these different places you have worked, from Florida to Minnesota? A. Yes.

Q. You are the man Black & Veatch send out as an expert witness, are you?

A. I used to work largely as an assistant to Mr. Black, and in recent years he hasn't been going out and doing testifying, and I have taken over in a number of cases.

Q. You are the man out of over 300 employees in the office who they sent out as an expert witness?

A. No, we have others.

Q. How many others?

A. Mr. Veatch goes out. Some of the electrical men have gone out at different times, if it is a very technical problem sometimes the electrical men will go out. If it is a matter of this character generally I do the testifying.

Q. This is an electrical job? A. Certainly.

Q. Do you know why they didn't send an electrical man out?

A. Because they asked me to come, I suspect, because my work for the last fifteen or sixteen years has had to do with rates, appraisals, investigations and opinions of a general nature in utility operations, and revenues, returns,

rate structures analyses, and consequently I expect I had probably had more experience and was better fitted.

Q. You had testified oftener than the others. Is that it?

A. I wouldn't say that.

Q. What is the fact?

A. I just don't know whether they have testified more than I have or not, some of them.

Q. In addition to having been in Huron have you been over any other part of the defendant's system at all?

A. I went to the Mitchell plant. I was up to Aberdeen. I drove up to Barnard. I drove out to Ipswich along the line, and then I cut across down to Gettysburg and towards Highmore. Between Gettysburg, however, and Ipswich, I did not follow the transmission line because it was not close to the traveled road.

Q. Did you go up into North Dakota? A. No.

Q. Have you been over any part of the plaintiff's system or the system of its predecessors in North Dakota?

A. Not over the system as a property, no, sir.

Q. Ever inspect any part of their system? A. No.

Q. You worked from the figures and the information that the defendant's officers and regularly employed engineers and their attorneys gave you to build up a result?

A. Oh, no. I went to solid data. The Federal Power Commission reports are sworn to and are now regarded in the industry as probably the most reliable source of information as one gets into a company. I used that sort of information and I also went to the defendant and I got some collected information that brought some of the information carried in Federal Power Commission data into a little more convenient form for review. So I was able to satisfy myself on the problem.

Q. Mr. Expert, you testified this morning that the major portion of the figures you had on one of your exhibits were figures furnished you by Mr. Sickel, didn't you?

A. That was just some figures that are in evidence here and which I didn't realize; and they only had to do with one deduction I made, and it had nothing to do with the exhibits I put in. The exhibits I put in come from source data which I think are unimpeachable.

Q. You haven't any interest in this case, have you?

A. No, sir.

Q. With the exception of getting paid for your services?

A. We will be paid irrespective of the results and at the same rate, whether we win or lose.

Q. Did these attorneys and officers of the company give you information to work on as you went along and looked over the various contracts?

A. No. I was surprised at how much they asked me for information.

Q. Did they tell you about dual officers and directors entering into contracts?

A. I knew that was one of the pleadings. I had a copy of the pleadings.

Q. Did they tell you the fact of the control by the defendant of the load dispatchers?

Mr. Royhl: Objected to as assuming facts not in evidence; not proper cross examination.

The Court: This man comes here as an expert. Within reasonable limitations the objection will be overruled.

Q. Did they tell you about that? A. Yes.

Q. That the defendant kept control of the load dispatchers? A. That is just common—

Q. I asked you if they told you?

A. No, they would not tell me that sort of thing because I would not believe it.

Q. You would not have believed it? You would have thought it was outrageous? In the utility business you would have thought that was an outrage, for the defendant to keep control of the load dispatcher where they were operating two separate systems under joint control?

Mr. Royhl: Objected to as improper cross examination.

The Court: Overruled.

Q. You would have thought that was an outrageous thing for them to do, wouldn't you?

A. I don't understand what you mean by control?

Q. This is joint management.

A. Joint management can be bad or good.

Q. You would have thought that was an outrageous thing for them to do for the defendant to have control of the load dispatchers under the situation you have here?

Mr. Royhl: Objected to as immaterial; not proper cross-examination.

The Court: Overruled.

A. If you take that hypothesis that it was under control and was controlled to the disadvantage of one company to the other, I would go along with you.

Q. Answer the question. You said a minute ago you would not have believed them if they had told you, that the defendant kept control of the load dispatcher, didn't you? A. Yes. I haven't seen any evidence of that here.

Q. Were you in court here during the course of this trial? A. Yes.

Q. Did you hear a letter in which Mr. Strike wrote to North Dakota Power Commission that the defendant kept control of the load dispatchers?

Mr. Royhl: Objected to as not a proper statement of record; not proper cross-examination.

The Court: Arguing whether it is or not, doesn't get us anywhere.

Q. Did you hear a letter read?

A. As a recall I heard it read.

Q. As you went along and developed your case in order to testify you would ask various officers and attorneys for facts and figures, would you?

A. I largely took them from the record.

Q. Did you ask them for any at all?

A. I asked them where to find data.

Q. They furnished you figures from time to time?

A. I verified them.

Q. They furnished you figures from time to time, did they? A. Yes, at my request.

Q. And you accepted those figures whole-heartedly, without any question?

A. No. Those figures that I had were largely furnished me when I was in Huron on the first trip and I verified them, checked a large portion of them from the records which were kept there in order to be satisfied that I could use them.

Q. Alright. You said largely. What about the balance of them?

A. It is possible that some I didn't use at all were those that I did not check. They furnished them but I didn't bother to check them because I would not be using them.

Q. Some of the figures you used were not matters of record, but were estimates. Isn't that a fact?

A. Not many that I have used.

Q. How about the figures that were used where there were no meters to show the current, that was not metered. What did you use there? The things they told you?

A. I haven't used that kind of stuff. I have used data which is in the operating reports and in the Federal Power Commission reports and in the zone records by three representatives of the operating committee reports. That is the kind of information I have used.

Q. You figured the transmission loss?

A. I didn't figure the transmission loss. I figured the over-all—I didn't even figure that—I took the over-all unaccounted for energy, from the reports.

Q. You got all of that from reports? A. Yes.

Q. Didn't you use any figures in any of your testimony here that came from calculations?

A. I simply used basic figures and made calculations from them.

Q. Didn't you use any figures that came from calculations of yours in this testimony you have given here?

A. I did some which I understood was stricken, and it was information that is on exhibit here. I didn't realize it at the time I explained it to you.

Q. I thought you said you used Federal Power Commission reports that are sworn to? A. Yes.

Q. Will you come down and look at these Federal Power Commission reports and show me where they are sworn to?

A. That is my understanding, they are sworn to. They have been on jobs where I have been. These may not be the copy that went to the Federal Power Commission.

Q. You don't find this sworn to, do you?

A. That is pencil copy. The other is a carbon copy and shows a place for a notary public, so I expect the copy that went to Federal Power Commission was sworn to.

Q. You testified you worked with Federal Power Commission reports that were sworn to, didn't you?

A. I said I used them because they are sworn to.

Q. Didn't you testify you used Federal Power Commission reports that were sworn to?

A. I think they were sworn to.

Q. You used these that are in evidence here? A. Yes.

Q. And they are not sworn to?

A. They are not sworn to there.

Q. You didn't go down to Washington and use any that are sworn to, down there? A. No.

Redirect Examination, by Mr. Royhl.

Q. Did you use the Federal Power Commission reports the plaintiff put in evidence in this case? A. Yes.

Q. You have mentioned that when you first came to Huron there was a case in the state court. You didn't mean this court, did you? A. District court.

Q. You meant the state court up there in Beadle County?

A. Yes.

Q. I am not just clear. You were inquired about certain payments made in 1938 and 1939 by the Dakota companies. Those payments were made by Northern Power & Light Co.? A. In 1938 and 1939?

Q. Yes. A. Yes.

Q. And I think also he inquired about part of the 1940. Was that made by North Dakota Power & Light or Northern Power & Light Co.?

A. That was probably by Northern Power & Light, or Dakota Public Service Co., which one was the merger of the two after the middle of the year.

Q. That was the merger after July 1, 1939? A. Yes.

Q. And your Exhibit 339 shows the separation prior to the merger, does it not? A. For which year is that?

Q. 1939.

A. 1939 shows the total amount paid that year, both before and after. It is listed as under Northern Power & Light Co., but it is the total amount received by the Northwestern Public Service Co. that year from the Northern Power & Light Co. and the successor.

G. R. McARTHUR

was called as a witness by the defendant, and being duly sworn, testified as follows:

Direct Examination, by Mr. Woods.

Q. Will you state your name, please?

A. G. R. McArthur.

Q. Your age? A. 55 next April.

Q. Place of residence? A. Huron, South Dakota.

Q. Business or occupation?

A. Vice president of the Northwestern Public Service Co.

Q. Have you been in the electric utility business for some years? A. Since April 1, 1930.

Q. Where has your place of residence been during all of that time? A. At Huron, South Dakota.

Q. Are you an engineer? A. No, sir.

Q. You had, I presume, some preliminary training before you went into business, education and experience?

A. I went through grade school, high school and college.

Q. You came to Huron in what year?

A. I came out to Huron, South Dakota in 1923.

Q. Did you have a position there at Huron at that time?

A. Yes.

Q. What was that business?

A. I came out to Huron to join the faculty of Huron College, as Professor of Economics, Business Administration.

Q. After being there for a time did you then join the offices of the utilities there at Huron? A. Yes, in 1930.

Q. Who made that arrangement with you?

A. Mr. Parker, who was then president of the Northwestern Public Service Co., North Dakota Power & Light Co., and Northern Power & Light Co.

Q. Did he have any talk with you about your employment, the nature of your work, at the time you went to work? A. Yes, we had a conversation.

Q. Just tell in a general [——] the nature of your work, and what your employment was to be?

A. Mr. Parker explained to me that in my employment that I was working for the Northwestern Public Service Co., North Dakota Power & Light Co. and Northern Power

& Light Co. My responsibility was to be those in connection with employee problems, employee relations, and in connection with customer service problems. General field of that which is known as public relations. I came to the organization with a fresh viewpoint—

Q. Did you have during your early years of your employment with those companies, customer difficulties in the area north of Bowdle, South Dakota? A. Yes.

Q. Do you know about when that first came to your attention?

A. I went to Eureka, South Dakota, which is north of Bowdle, along, as I recall it, in the late winter or early spring of 1932, and spent probably the better part of three months in working in that district headquarters at that time.

Q. Was that on account of trouble in the area? A. Yes.

Q. What was the character of the trouble?

A. Customer complaints as to service.

Q. Due to what?

A. Outages, voltage conditions, service levels.

Q. You say you stayed there some three months?

A. The majority of that period, yes.

Q. Were you at other towns or cities in that territory along about those years? A. Yes.

Q. In similar work? A. Yes.

Q. Will you name some of them?

A. I spent some time in Wishek, which was north of Eureka in that area. I spent some time in and out of Ashley, and some time at Napoleon.

Q. Will you tell the Court whether or not that was an area where the business was of value and desirable from the point of view of the companies?

A. The city of Eureka and city of Wishek were two of the largest towns in the area. In fact, two of the largest towns in the stretch of service area extending south from Steele to Bowdle. The towns of Napoleon and Ashley and adjacent thereto were likewise substantial towns as of that area.

Q. Do you have a classification of towns in the business as "B" towns?

A. We had the classification at that time of "B" towns. Subsequently we had "A", "B" and "C" towns.

Q. Did that indicate a town that had a good market for your product?

A. They represented classification of towns largely on volume of business and relationship in size, yes.

Q. Did you name the town of Ashley and Napoleon as towns in which there was trouble in those years, prior to 1936? A. Yes.

Q. What was the nature of that trouble?

A. Problems related to customer service, outages.

Q. Was that your job, to go out and try to straighten those things out?

A. My job was to make investigation of the situation that existed. Visit with the customers. Know what the facts were that related thereto. Bring the report back to the staff that would deal with it from there on out.

Q. At some time in the course of your work there for those companies, did you become acquainted with Mr. Sam White, of Chicago? A. I did.

Q. Can you tell the Court about when?

A. I think my contacts with Mr. Sam White probably began as early as 1932 or thereabouts.

Q. Do you know what occurred to bring him into the picture about that time?

A. Mr. Sam White was appointed receiver of the United Public Utilities Co., of which this property was a subsidiary, and the occasion for my meeting him was a visit to the property, as I recall it.

Q. You say this company was a subsidiary. I wish you would explain what you mean?

A. You are speaking as of the area of Northern Power & Light Co. I am thinking in terms of this particular service area, about Wishek, Eureka, Napoleon, Ashley, in the area of what was Northern Power & Light Co.

Q. And that is what you mean then? A. That is right.

Q. After Mr. White was receiver of the United Public Utilities Co., what was your understanding of the position that he occupied with respect to these companies or the parent company? A. Well, he was receiver—

Q. I said after he was receiver.

A. After they came out of receivership?

Q. That is right.

A. Then he was president of the survivor or successor

company, after the merger of the United Public Utilities Co. He was president thereof.

Q. Was that known as United Public Utilities Corporation? A. Yes.

Q. Who was the chief executive or administrative officer of that corporation, United Public Utilities Corporation?

A. Mr. Sam White.

Q. Did you have occasion to deal with him at varying intervals after termination of the receivership? A. Yes.

Q. Can you fix the date when he became president of United Public Utilities Corporation?

A. Not with any exactitude of date. As I recall, it was 1934 or 1935. 1935, I think.

Q. Can you tell the Court about how often you would see him in the course of each year?

A. In the early years, back in 1932, '33, '34, I probably saw Mr. White out there at least once in the spring, in May. I would see him again in the fall, perhaps in the month of September. And I saw him, perhaps, as often as two or three or four times in between.

Q. Did you continue to see him at frequent intervals until the Dakota Public Service property was separated from the Northwestern Public Service property? A. Yes.

Q. Now, did you, subsequent to your beginning with the company, come to have some offices or positions with these companies? A. Yes.

Q. Do you know when you first became an officer or director?

A. I first became a director of Northwestern Public Service Co. in January, I think, of 1935. I became an officer of Northwestern Public Service Co. in July, 1937, I believe. I became a director of North Dakota Power & Light Co. and Northern Power & Light Co. and Knife River Coal Mining Co. in August, I believe, 1937. I became vice president of those latter three companies, I think, at the same time, same date.

Q. Did you continue to hold those offices and directorships up to the [——] that the Dakota Public Service Co. was separated from Northwestern Public Service Co., in October, 1945? A. Yes.

Q. Now, over the years, was your work and were your

duties with the companies, changed from the duties and work that you described here a little while ago? A. Yes.

Q. What became the nature of your work?

A. Naturally, as I acquired experience in the organization and in the business, I was able to take on more responsibility, and the work became more and more of a supervisory and administrative nature. I became in due time, relatively soon, an assistant to Mr. C. J. Strike, who was general manager, and worked with him as his assistant through a number of years. Then, with progression and development or responsibility, I continued with public relations work and customer and employee relations problems, and likewise the field of activity spread out in more general operations as would naturally come, working in relationship as assistant to the general manager.

Q. Did you come to know the relationships with Samuel W. White, and the method of working with him and the office routine with respect to him? A. Yes.

Q. What means of obtaining information as to the operations of the United Public Utilities Corporation did he have, to you?

A. He had before him reports of various types that he would ask for, operating reports and things of that kind. He had communications and reports on specific problems as they came up from time to time. He had information that he got by direct inquiry and in personal visits. He kept in close contact with the operations of the property.

Q. I think there was some testimony he used the long distance telephone frequently in his contacts with you. Do you recall about that?

A. I don't recall as to the testimony, but as to the fact he did use it, yes.

Q. That is, did he? A. Yes, he did use the telephone.

Q. He invariably visited the property once a year?

A. Without exception once a year. I would say he visited more frequently than once a year.

Q. On those occasions when he visited the property did he go all over it? A. Yes.

Q. Did you upon occasion go over the property with him? A. Yes.

Q. Do you know whether you did every time he came out, or not?

A. No. I doubt if I went with him every time that he came out.

Q. Can you state what proportion of the time that he visited the properties from 1935 to 1945 you did go with him?

A. From 1935 to 1945 I would doubt that I missed a trip with him.

Q. You think you went with him every time?

A. I think I went with him every time from 1935 on. I may have missed one but I don't recall at the moment.

Q. Then did you visit every town, or every principal town in which the company had business or generation plants? How extensive were those visits?

A. Invariably we visited all of the division offices on the property that he was interested in and the major facility that was in process of construction or consideration incident to that particular kind. We would travel along the highways adjacent to the transmission lines, we would visit power plants and visit the mine.

Q. Did he note the condition of properties and discuss that on those trips? A. Yes.

Q. State whether or not he was an inquiring person and a fellow who made his investigation in a thorough way?

A. Yes.

Q. I think you have stated that he got reports regularly, that is, copies of reports that were made in the offices of the joint management went to him? A. Yes.

Q. Was there any rule about that?

A. Yes, there was a rule.

Q. State what it was?

A. That he should have all of the information that was available to him in reports. He was asking for those reports.

Q. And did he get them? A. He did.

Q. With respect to expenditures, or of amounts. Could anybody or could the executive officers at that time expend any amount that they saw fit, without his approval, or was there a rule he was to be advised and give his approval of expenditures of certain amounts?

A. I think I understand. There was a rule or understanding on his part, that those of us connected with the joint management agreement, as to expenditures relating to his property.

Q. State what it was?

A. I think it may have changed from time to time, but as I recall it, amounts in excess of $100.00 were referred to him, provided they were not a part of the regular budget of expenditures adopted each year, which he had opportunity to approve or go over as a budget, and if they were in the budget, my recollection is that he permitted expenditures up to $500.00, if covered in the budget he had previously approved and knew about.

Q. Is it fair to say he kept in close touch with the operations of those subsidiaries in South Dakota at all times?

A. Not only fair to say. It is a fact.

Q. Do you know whether Mr. White went over the road from Bowdle to Wishek along where the new transmission line was built? I think completed about 1936, at or about the time that it was being built?

A. Yes. He was in that territory on that spring trip and in inspection of those facilities at various points along the line. As a matter of fact I was with him on that trip.

Q. There is some testimony here with regard to relationships of these companies with Middle West Service Co. Were you familiar with that?

A. With the testimony or the relationship?

Q. Relationship. A. Yes.

Q. Did they furnish service for these United Public Utilities subsidiaries?

A. Middle West Service Co. was under contract to these companies.

Q. What character of service did they furnish?

A. Advisory, consulting service in a variety of fields. Engineering.

They were advising mostly with reference to advertising; with reference to public relations and on franchise procedures; accounting procedures; income taxes; tax work; merchandising.

Q. Now, then, with respect to any cases where there was a diversity of opinion between the subsidiaries of the United Public Utilities Corporation on the one hand, and Northwestern Public Service Co., can you tell the Court what happened in such cases, as to how they were handled? During the period of time from 1937 to October 19, 1945?

A. Whenever there were questions involving diversity

of interest in that period between 1937 and 1945, those questions were put squarely up to the owners of those respective companies for decision and handling.

Q. Mr. McArthur, you have testified that you were an employee of these companies from 1930 to 1945. Is that right? A. That is right.

Q. So you were there in all of the year 1936? A. Yes.

Q. Did you obtain any knowledge of the 1936 contract between these companies? That is the contract with respect to rates and charges? A. Yes.

Q. You learned about that? A. Yes.

Q. Were you an officer or director of any of these companies at that time?

A. I was director of Northwestern in 1936.

Q. Prior to the execution of that contract had a man named Lakin paid a visit to the property? A. Yes.

Q. Where did you first come in contact with Mr. Lakin?

A. Mr. Lakin was in attendance at Minneapolis at a meeting of the division managers. Our managerial conference was held in June of that year, for the assistance of division managers of the three companies.

Q. Did you learn the purpose of his visit? A. Yes.

Q. Do you know whether or not plans and arrangements were made for him to visit the property? A. Yes.

Q. What do you know about that?

A. Mr. Lakin came out to Minneapolis and attended the joint managerial conference we had, and then came out to the property, coming out to Aberdeen in company with Mr. Strike. We called a car from the joint office after he came back out to meet them at Aberdeen and they went out over the property. Mr. Lakin came back into Huron, to the joint office headquarters there after he had completed his trip, and spent some time there in the joint office. I visited with him in the joint office on his return. Then he left and went back east.

Q. Did you have occasion to see Mr. Samuel W. White after that? A. Yes.

Q. And before the contract was finally signed? A. Yes.

Q. Do you know what those occasions were, if there was more than one?

A. Yes. There was at least one I recall very definitely, and I am sure there were other occasions in between that

mid-summer and the managers' meeting at which I talked to Mr. White.

Q. I believe that is the year in which there were directors' [meeting] about April, and later in October, with respect to that contract. Do you recall about that?

A. I recall meeting in the spring and fall, yes.

Q. Can you state in a general way, whether or not the action, or part of the action, at the fall meeting was by reason of action taken at the April meeting? A. Yes, I can.

Q. To clear up, for counsel. Were you a director of Northwestern Public Service Co. in 1936?

A. I was director of Northwestern Public Service Co., in 1936.

Q. You were not of the northern companies at that time?

A. I was not of the northern companies in 1936.

Q. Do you recall the occasion of any connection of Mr. White with that action? A. I do.

Q. You may state what action was taken by Mr. White in connection with it.

A. After the action was taken by the directors of Northwestern Public Service Co. in the spring of 1936, drafting the interchange agreement, Mr. White objected in part to that agreement and [desire] revisions in some respect in it, and on the basis of that objection on his part, there was changes made to conform to the thought that he had in mind and his desires in connection therewith, and in the fall of 1936, the board of directors of Northwestern rescinded the action taken in the spring and approved the contract as it has been—

Q. Now, then, I don't believe you signed the 1936 contract as an officer of any company? A. I did not.

Q. Did you regard it as fair?

Mr. Fellows: Objected to as immaterial; calling for opinion and conclusion.

The Court: Sustained.

Q. You were a member of the board of directors of Northwestern Public Service Co. at that time?

Mr. Fellows: Objected to as repetition.

The Court: He has already answered that.

Mr. Woods: We offer to prove by this witness that he regarded this contract as fair and had that state of mind at the time that the minutes of the directors of Northwestern were made, approving the contract as entered into.

Mr. Fellows: Object to the offer for the reasons contained in the objection to the question.

The Court: Sustained.

Q. Now, do you recall some change or revision in the contractual relationship between these companies in about the year 1938? A. Yes.

Q. Do you recall whether or not you signed that contract? A. I did sign for Northern Power & Light Co.

Q. Prior to the time that you signed that contract had you been in touch with Mr. Samuel White, president of the United Public Utilities Corporation, and had you discussed that matter with him? A. I had.

Q. Can you tell the Court now whether it was once or more than once?

A. There was several occasions upon which I visited with him.

Q. Did you know at the time that you signed the contract whether or not it had his approval or consent?

A. Yes. I would not have signed the contract without his approval.

Q. I infer from that that it did have his approval and consent? A. It did.

Q. Do you recall a revision or some change in that contractural situation between Northwestern and the northern companies in the year 1939? A. Yes.

Q. Do you know the occasion for that change? A. I do.

Q. What was it?

A. That revision or change came about by reason of the merger of the two northern companies, Northern Power & Light Co. and North Dakota Power & Light Co., into what is known as its successor company, the Dakota Public Service Co.

Q. You may state if you know who worked that out?

A. The detail and technical work on that was worked out with me, Mr. C. L. Sandstedt, Mr. Karl Goldsmith, of Pierre. Mr. Scheetz of Philadelphia representing—

There were others besides those three.

Q. You may name the others?

A. Mr. White, himself, was a party to that adjustment of the contract, and representatives of the Middle West Corporation.

Q. You are referring to the contracts dated July 1, 1939, now, are you?

A. I don't recall the exact date of the contract, but I do recall the contract revision was made as of 1939, written in the language of Dakota Public Service Co. and Northwestern Public Service Co. as against the previous contracts written in the language of three companies.

Q. Now, then, with respect to those contracts of 1939, and the 1938 contracts, was there any formal approvals of those by directors' meeting, so far as you know?

Mr. Benson: We will admit there is no minutes in the minutes books with respect to any contract except the interconnection contract of 1936.

Q. Now, with respect to the 1941 contract, did you have knowledge of the execution of such a contract? A. Yes.

Q. Can you state what events led up to that?

A. Yes, I can.

Q. Calling your attention to the document which is in evidence as Exhibit 258 (R. p. 1230 supra), purporting to be a letter dated November 18, 1942, signed, A. B. Sanborn, addressed to Mr. S. W. White, I will ask you if you saw that letter at or about the time of the date noted in it?

A. I did.

Q. With respect to the 1941 contract, did you have a meeting, a joint meeting, at Detroit Lakes, Minnesota, prior to the execution of that contract? A. Yes.

Q. What kind of a meeting was it?

A. That was a meeting of the managers of the system, what we called our managerial conference. Mr. White was in attendance.

Q. Do you recall whether or not some work was done upon that contract, 1941 contract, at that meeting?

A. Yes, there was.

Q. And by whom?

A. There was controversy on that contract between Mr. White and members of the joint management staff, and

particularly as between Mr. White on the one hand and C. L. Sandstedt and Carl Goldsmith on the other hand.

Q. Was it subsequent to that time that the contract was placed in final form and signed? A. Yes.

Q. Prior to the time that the 1941 contract was signed, had there been some change in the financial and business situation of the companies that were being operated under that joint management, which were reflected in the contract itself? A. There were.

Q. Did Northwestern Public Service Co. at that time have some funds which had been obtained from the sale of properties in Nebraska? A. It did.

Q. Did the interconnected system at that time have need of capacity? A. It did.

Q. That is, generating capacity? A. It did.

Q. And in the negotiations that led up to the execution of the 1941 contract, do you know whether there was discussion of the building of capacity at Aberdeen for the interconnected system? A. I do.

Q. Was there? A. Yes.

Q. Do you recall about the signing of the supplemental contract in 1943, which has been discussed and mentioned as the 1943 supplement here? A. I do.

Q. And referring to that Exhibit 258, which I handed you awhile ago, I think you said you saw that at or about the date it bears? A. Yes.

Q. Subsequent to the writing of that letter, do you know of negotiations between Mr. White and others in the two organizations with respect to that supplement? A. Yes.

Q. What knowledge do you have of that? Just state.

A. Well, I had conversations directly with Mr. White, and at times when those arrangements were under discussion.

Q. You mean you discussed it with him? A. Yes.

Q. Do you know whether he approved of the 1943 supplement before it was signed or put into effect? A. Yes.

Q. And did he? A. He did.

Q. Do you know whether or not Mr. Samuel W. White took any interest or exercised any control in or over the dividend policy of the northern companies during the time that you were an employee of those companies?

A. Yes.

Q. You may state to what extent?

A. He kept track and had knowledge of funds and earnings that were available and discussed with the management staff of the companies that he was interested in any recommendations or suggestion that they made to him, and those things were cleared as between the officers or management of the companies he was interested in, and his office, and himself, personally.

Q. With respect to the operation of the fiscal affiairs of that joint management. Mr. Stokke was asked yesterday whether he was paid by Northwestern check, whether he received salary that way. I want to ask you if you know whether or not the joint management had any separate bank account for the payment of salaries of the joint management? A. No, not as between the three companies.

Q. As a matter of fact or practice how were those salaries paid?

A. Paid by Northwestern under the terms and conditions of the joint management contract.

Mr. Fellows: Move to strike the last part of the answer as not responsive.

The Court: It may go out, the last part.

Q. After payment of those salaries by Northwestern, as you have stated, was anything done to adjust the expense as between the companies, if you know?

A. I do know, and the answer is yes.

Q. You may state what was done in that regard?

A. There was an allocation or distribution of the expenses on the gross revenue percentage basis as between the companies.

Q. Did you in the course of your employment, either as an officer or director, have any intent to do anything or permit anything which would cause or permit Northwestern Public Service Co. to overreach or defraud Northern Power & Light Co., North Dakota Power & Light Co., or Dakota Public Service Co.? A. I did not.

Q. Did you, during your employment, ever see or observe any act or [ommission] designed to cause or permit overreaching by Northwestern of the other companies named?

A. I did not.

Q. Now, with respect to the rates and charges for capacity, energy, interconnection, and the basis or allocation of payment of joint management expense, did you or did you not regard those things, that is, those rates and charges, as fair and just at all times during the [court] of your employment there?

A. I sincerely believe them to be fair and just.

Q. Now, there has been some evidence here with respect to the control of the load dispatchers upon the interconnected system. Do you know what the control of those load dispatchers was? A. I do.

Q. Will you tell the Court what their instructions were or what the policy to be followed by them was?

By Mr. Fellows:

Q. That was not in your department at all?

A. As an executive officer of the company I would have knowledge or supervision.

Q. Did you have anything to do with the direction and control of the load dispatchers?

A. As an executive officer, shaping of policy, yes.

Q. Answer the question. Did you control or direct the activities of the load dispatchers?

A. As of the control, no. As of the shaping of policy, yes.

By Mr. Woods:

Q. You may state. A. The policy—

Mr. Fellows: We object to any evidence of policy in answer to that question, as not binding upon the plaintiff and as incompetent.

The Court: I think that objection is well taken.

Mr. Woods: I think the question calls for instructions and policy in regard to the handling of it. That is what I want to call for. Is the objection to the question in that form sustained?

The Court: Yes.

Q. Do you know what rule the load dispatchers were required to follow? A. Yes.

Q. Do you know what investigations were made by Montana-Dakota, plaintiff in this suit, during the year 1945, prior to the purchase of the stock and securities of the Dakota Public Service Co.?

A. Yes, I know investigations were made.

Q. Do you know whether investigations were made by accountants named Arthur Young & Co.? A. I do.

Cross Examination, by Mr. Benson.

Q. Mr. McArthur, did you say you were public relations man with Northwestern Public Service Co.?

A. I said I had charge of public relations, customer relations and employee relations.

Q. Did you have charge of the advertising campaign in the fall of 1941, when you were trying to get a new franchise at Aberdeen? A. I did.

Q. You prepared the advertising or saw the advertising that was used?

A. I did not necessarily prepare all of it, but I think I saw all of it.

Q. You approved it all before it was published?

A. I think so.

Q. On September 9, 1941, didn't you approve an ad in the Aberdeen paper, and which you thereafter paid for and which was published, stating that you solicited the votes of the voters of Aberdeen and asked them to vote because of the benefits which would accrue to Aberdeen, including (1) a million dollar expansion and construction program at the Aberdeen power plant of the Northwestern Public Service Co., (2) more jobs for Aberdeen people during construction and in its operation after construction; (5) a dependable supply of electric power for the next twenty years; (3) more income taxes for the schools and various city departments; (4) a substantial increase of freight and coal which, in turn, means steadier work for railroad men in Aberdeen?

Mr. Woods: Objected to as incompetent, irrelevant and immaterial; [nor] proper cross examination; not gone into on direct.

The Court: It will be received subject to objection.

A. May I see the ad?

Q. You did approve that ad, didn't you?

A. I think I approved an ad that contained in substance the material there.

A. P. LEARNED,

being recalled by the defendant, and having heretofore been sworn, testified as follows:

Direct Examination, by Mr. Royhl.

Q. I overlooked asking you on your direct examination some matters. Now, based upon your experience with rates and contracts concerning rates, in electric utilities and with electric utilities generally, to which you have previously testified, do you have an opinion as to whether or not the incremental cost of production is a [propr] cost basis upon which to establish a rate at which surplus energy produced by the seller is sold to the purchaser? Do you have an opinion? A. Yes.

Q. What is your opinion?

A. The incremental cost is a proper basis for the establishment of a rate for surplus energy.

Q. Have you examined the contracts involved in this case providing a rate of 5 mills per kilowatt hour for energy sold to the defendant by the plaintiff's predecessors, and which are Exhibits B, D, and F to the complaint, and have you examined the provisions of those contracts relating to surplus energy and the sale thereof? A. Yes.

Q. And have you examined Defendant's Exhibits 335 and 335-A received in evidence (R. pp. 1754 and 1755, supra)?

A. Yes.

Q. In considering the provisions of those contracts relating to surplus energy and the sale, and also the figures set forth in Defendant's Exhibits 335 and 335-A, do you have an opinion as to whether or not the 5 mills per kilowatt hour for energy so sold to the defendant by plaintiff's predecessors, during the period from January 1, 1936 to October 19, 1945, both inclusive, was a fair, just and reasonable rate for the sale of such energy? A. Yes.

Q. What is your opinion?
A. It is a satisfactory rate for the sale of surplus power.
Q. And in your opinion is that fair, just and reasonable?
A. Yes.

Cross Examination, by Mr. Benson.

Q. Mr. Learned, you say you have spent a good portion of your life in the utility business of various kinds, sewerage disposal, electricity, and everything else in the public utility business? A. Yes.

Q. If one company makes a capital investment to serve another company, they don't sell on incremental cost basis?

A. They probably don't sell firm power on incremental basis, but they would surplus power.

O. C. STOKKE,

being recalled by the defendant, and having heretofore been sworn, testified as follows:

Direct Examination, by Mr. Woods.

Q. Mr. Stokke, there seems to be some ambiguity in the record as it is set with respect to Plaintiff's Exhibits 31 and 35, and Defendant's Exhibits 340 and 341, which I hand you, and which I am told are called supplements to the interchange capacity contracts. They are also known here as Exhibit B's to the contract? A. Yes, they are.

Q. I want to ask you from what source were those exhibits which I have handed to you prepared at the time they were made up by the committee? To whom that work was delegated?

A. The operating committee prepared the information for these exhibits.

Q. From what source?

A. The company generating capacities on Exhibit B were prepared by the operating committee. The generating capacities for the respective companies.

Q. From what?

A. From our determination of the generating capacities of the respective stations for the respective companies.

The company system maximum demand were determined by the operating committee from special readings taken at the direction of the operating committee, special readings obtained from all power plants of the power pool companies. The thirty minute peak, coincident peak period demands, were obtained from the special thirty minute readings obtained from the various generating stations and from the readings obtained at the points of interconnection between the two parties, operating companies.

Q. And were they prepared from the load diagrams?

A. No.

WILLIAM M. DUNN was called as a witness by the defendant, and being duly sworn, testified as follows:

Direct Examination: by Mr. Woods.

Q. Please state your name? A. William M. Dunn.

Q. Age? A. 51.

Q. Place of residence? A. Huron, South Dakota.

Q. What is your business or occupation?

A. Treasurer, Northwestern Public Service Co., at the present time.

Q. How long have you been connected with the Northwestern Public Service Co., or the Northwestern and its associated companies, Northern Power & Light, North Dakota Power & Light and Dakota Public Service Co.?

A. Since January, 1933.

Q. In what capacity did you first go with them?

A. As travelling auditor.

Q. Was that as a member, then, of the joint management staff? A. It was.

Q. How long did you continue in that capacity?

A. Until the fall of 1936.

Q. Then what happened?

A. In 1936 I was made assistant secretary and assistant treasurer of the three electric companies and the Knife River Coal Mining Co., and still continued somewhat the duties of travelling auditor. Later in 1936 I was transferred to Columbus, Nebraska, as division manager of the Columbus, Nebraska, division.

Q. Where did you go from Columbus?
A. Yankton, South Dakota.
Q. In what capacity?
A. As division manager of the Yankton division.
Q. How long did you continue there?
A. Until the summer of 1944.
Q. Where did you go then?
A. I went to Huron, South Dakota.
Q. In what capacity?
A. As treasurer of Northwestern Public Service Co., Dakota Public Service Co. and Knife River Coal Mining Co., and a member of the board of directors of the companies.
Q. In 1934 did you have occasion to be up in the territory in North Dakota, in the vicinity of Wishek and at Wishek? A. I did.
Q. What was the occasion for your going there?
A. To make an audit of the finances of the city of Wishek.
Q. What I am getting at is whether there was trouble there so far as the power company supplying power was concerned? A. There was.
Q. Of what character?
A. The number of interruptions of service they were receiving at that time.
Q. Do you know whether or not there was agitation for municipal plants in that area at that time? A. Yes.
Q. Was there? A. There was.
Q. Now, in the course of your work for the several companies you have mentioned here, I want to ask whether your work was the same for all of the companies?
A. It was.
Q. Did you, in the course of your work for these companies were you guilty of any partiality in your work in favor of one company as against another?
A. I showed no partiality.
Q. Was that true with respect to the operations of the company and the personnel involved? A. It was true.
Q. Did you observe any partiality on the part of other officers in the course of your employment, as between these companies? A. I did not observe any.
Q. Did you have occasion to observe and do you know the attitude of the management of these companies with

respect to matters and instances where there was diversity of interest between the Northwestern on the one hand, and the northern companies on the other, and how those matters were handled in such cases? A. Yes.

Q. You may state?

A. In all matters affecting the interest of the several companies, when under discussion, they were referred to the officers of the parent company for settlement or negotiations.

Q. Have you ever met Samuel W. White? A. I have.

Q. Do you know when you first met him?

A. I believe in 1934.

Q. Did you know who he was? A. I did.

Q. Who was he at that time?

A. He was president of United Public Utilities Corporation.

Q. Did he continue to hold that office during all of the time that you were associated with him in business?

A. He did.

Q. Will you tell the Court how he kept in touch with the operations of the companies and the joint management staff at Huron?

A. Mr. White received the complete file of operating and financial reports. He received letters made by the joint staff. He kept in contact with the joint staff by telephone. And he visited personally with members of the staff who had occasion to be in Chicago. He attended the annual manager's meetings and he made at least one inspection trip all over the property.

Q. Then, I take it, you saw him frequently after you became a director of his companies. A. I did.

Q. Did he have any way of knowing about what funds were on hand with the treasurer of the companies?

A. He did.

Q. How did he get that information?

A. By receiving monthly financial statements, operating reports, communications from our office.

Q. You furnished those to him? A. I did.

Q. Did he advise or recommend with respect to the investment of surplus funds of those companies? A. He did.

Q. Do you know whether or not he had or exercised any control over work orders of those companies?

A. He did exercise authority over work orders.

Q. In what respect?

A. Work orders up to a certain amount, not included in the budget, were required to receive his approval before the expense were incurred. Work orders of a larger amount, included in the budget, over and above a larger amount included in the budget, were required to receive his approval before the expense was incurred.

Q. I take it budgets were made periodically? A. Yes.

Q. Was he furnished copies of those? A. Oh, yes.

Q. In all instances? A. I believe he was in all instances.

Q. Who determined the dividend policy of the company? A. Mr. White.

Q. Did he have anything to do with the deposit of surplus funds or handling the investment of surplus funds?

A. He did.

Q. Did he direct that? A. He did.

Q. Were his instructions followed in all instances?

A. They were.

Q. Can you tell the Court any specific instances after you became treasurer and director of these companies in which a controversial matter was referred to the officers of the parent companies? A. I can.

Q. What one?

A. Renegotiation of a coal contract between Knife River and Northwestern.

Q. Can you tell the Court who worked that out?

A. That was worked out by Mr. White and Mr. Purchas of the Middle West Service Co.

Q. About when? A. That was in the winter of 1944-1945.

Q. Mr. Dunn, prior to your becoming associated with these companies did you ever hold any public office?

A. I did.

Q. What?

A. County Auditor of Yankton County, and State Auditor of South Dakota.

Q. During what period of time?

A. State Auditor, 1929 to 1932. County Auditor from 1925 to 1929.

Q. Do you know, Mr. Dunn, whether or not the plaintiff, Montana-Dakota, prior to October 19, 1945, made investigations of the Northwestern Public Service Co. and Dakota Public Service Co. and their records? A. Yes.

Q. And also other properties? Not only their records but over the properties? Or is your knowledge confined to investigations or records at Huron?

A. I don't recall of knowledge of their being out on the property. I am referring to examination of records at Huron.

Q. Do you know whether they had agents in there for that purpose? A. I do.

Q. Over how long a period of time?

A. For a number of months.

Q. Can you tell the Court who those agents were?

A. Representatives of Arthur Young & Co. Day & Zimmerman. Montana-Dakota attorney. I believe his name to be Higgins, representing the legal staff of Montana-Dakota. Some of their auditors and other employees.

Q. Was Mr. Elvig among those? A. He was.

Q. Day & Zimmerman, Inc., metioned by you, is that an engineering concern?

Mr. Morrison: Objected to as immaterial, and for all of the reasons stated in the objection to the other question.

The Court: Sustained.

Q. Do you know whether or not it was the general rule to obtain the consent of Mr. Samuel W. White prior to the transfer of any so-called key personnel from one property to another?

Mr. Morrison: Objected to as immaterial.

The Court: We will take an answer.

A. Yes

Q. Was it?

Mr. Morrison: Objected to as immaterial.

The Court: Received subject to objection.

A. It was the rule.

Q. Do you know whether or not Northwestern Public Service Co. furnished the office equipment and automotive equipment for the joint management staff without charge during all of this time? A. Yes.

Q. And did they?

Mr. Morrison: Objected to as immaterial.

The Court: Received subject to objection.

A. They did.

Q. Now, Mr. Dunn, as a common officer and director of the Northwestern Public Service Co. and the Dakota Public Service Co., did you ever take or cause or permit to be taken by the defendant, Northwestern Public Service Co., fraudulently, unreasonably, unfairly, unlawfully or without consideration anything whatever—

Mr. Fellows: Just a minute. We object to that. There is no claim Mr. Dunn ever took anything. Covering the same question he was inquiring about some time ago. We don't claim Bill Dunn took a dime or did anything.

Mr. Royhl: They allege in the complaint that this man as a common officer and director caused to be taken or permitted to be taken, wrongfully and unlawfully—

Mr. Fellows: Unlawfully as directors and officers.

The Court: The witness may answer subject to objection.

A. I did not.

Q. Did you ever intend that the Northwestern Public Service Co. should take or cause to be taken from the Dakota Public Service Co., anything wrongfully or unlawfully whatever? A. I did not.

A. B. SANBORN, being called as a witness by the defendant, and being first sworn, testified as follows:

Direct Examination: by Mr. Woods.

Q. Please state your name? A. A. B. Sanborn.
Q. Your age? A. 56.
Q. Place of residence? A. Huron, South Dakota.
Q. Business or occupation?
A. I am president of Northwestern Public Service Co.
Q. How long have you held that position?
A. Since July 1, 1938.

Q. From that date, until some time in 1945, did you have some position with North Dakota Power & Light Co., Northern Power & Light Co., Knife River Coal Mining Co., and later, Dakota Public Service Co.?

A. I was president and director of all of the companies you mentioned. I should add also that I was director of Northwestern since July 1, 1930.

Q. Your connection with the so-called northern companies and the coal mine terminated when, if you know?

A. My connection with the coal mine terminated a little indefinitely. My connection with the northern companies terminated at the conclusion of the sale to Montana-Dakota on October 19, 1945. My connection as officer and director of the mine until sometime in February, 1946. We continued to manage for Montana-Dakota, the northern property.

Q. I would like to ascertain a little bit about your education and background. After getting out of high school what education did you have?

A. I entered the Naval Academy in 1908 and graduated in 1912. I was commissioned as ensign in the United States navy in 1912. I resigned my commission as lieutenant commander, temporary, in 1920.

Q. I take it you continued in the navy from the time of your graduation from United States Naval Academy for ten years, through the first world war?

A. A little over eight years. I resigned in 1920.

Q. Did you get any degree from the naval academy or did they give any degree at that time?

A. No, they didn't give degrees in the naval academy at that time.

Q. What character of education did they give or provide? A. Predominantly and almost wholly engineering.

Q. After leaving the navy, what business did you [engaged] in?

A. I came directly into the utility business in British Columbia, Canada, and stayed in British Columbia, Canada, for eighteen years, until July 1, 1938, when I came down to South Dakota to this job.

Q. What character of work did you do in the utility business in Canada?

A. I went with the Department of Columbian when that

company was a dream in the promoter's eye. During the time I was there they built two electro-hydro plants, and one steam plant, and built a load up to 1 million kilowatt hours a year. Then I came to South Dakota on this job I am in now.

Q. Now, with regard to your coming to the South Dakota companies, how did you first contact in that regard?

A. Mr. Kruesi asked me to come in and see him in Chicago, through a friend of mine in Ashland, Wisconsin, my home at that time. My father and mother's home, it was. I met Mr. Kruesi in Chicago at his office, talked to him for a few minutes, not over ten or fifteen or twenty, and he suggested I go in and see Mr. White.

Q. Was that the same building?

A. That was in the same building.

Q. What did you learn about the character of this operation at that time or about that time?

A. I was told definitely that this operation was one of a combined operation of three utilities that were owned by two separate corporate entities, and that I had to be extremely careful in my operation out here not to lean towards one company or another and to continue a fair relationship at all times. I was told by Mr. White and Mr. Kruesi that there was a possibility that the time might come that I would have to defend my actions on these properties and I should not let the finger of blame point at me.

Q. About how long was it after you visited with them that you came to the property and took up residence in Huron?

A. About three or four months, as I remember. I know I had an opportunity to drive through South Dakota on my way back to British Columbia. I spent some time back there. I think my first contact with Mr. Kruesi and Mr. White was sometime early in the spring or late in the winter of 1938.

Q. When you came to actively take up that job, did you learn anything about a contract between the companies in the process of negotiation? A. Yes.

Q. What did you learn about that?

A. I learned that for some months Mr. Strike and Mr. Sandstedt had been talking to Mr. White and Mr. Kruesi

and to the members of the service company staff, and that Mr. Scheetz had prepared a contract for the interchange of energy capacity and line rental between the three companies involved.

Q. What, if anything, did you do about that?

A. I reviewed the studies and the negotiations and inasmuch as Mr. Sandstedt had been in the negotiations since the start, I instructed him to continue the negotiations and do what he could to see that all parties were properly served and the contract come to a satisfactory answer.

Q. Now, do you know whether or not contracts were completed in 1938?

A. I do. As I remember it, they were completed late in the fall or early winter of 1938.

Q. Did you sign such contracts?

A. I signed for Northwestern after I had been assured that the contract was satisfactory to Mr. White, acting for United Public Utilities Corporation, and Mr. Kruesi, acting for the owners of Northwestern.

Q. Did you, as president of these companies, know about the revision of those contracts in 1939? A. Yes.

Q. Do you know who worked that out? A. Yes.

Q. Who?

A. The essential terms of the revision were worked out between the attorneys of United Public Utilities Corporation and attorney for the joint management staff of the joint companies. I am referring to Mr. Carl Goldsmith, of Pierre, and Mr. Scheetz, acting as officer for Mr. White. The reason for that was—

Q. What was the occasion for that revision?

A. It was occasioned by the merger of Northern Power & Light Co. and North Dakota Power & Light Co. and the change of name of the surviving corporation to Dakota Public Service Co.

Q. Now, I want to ask you a few general questions about how Mr. White kept in touch with United Public Utilities Corporation subsidiaries in North Dakota and somewhat in South Dakota. How did he maintain that contact?

A. In every way and by every avenue that was open to him.

Q. Will you name some of them?

A. Reports, as has been testified before, were sent to him. Financial reports, operating reports, special studies, bank reports. In addition to that, Mr. White always made one trip to the property and went over a portion of the property on that trip as much as time would allow. He always attended our management [meeting], which were held once a year. I don't believe there was any officer of the company that went into Chicago that didn't confer with Mr. White and visit with Mr. White, on the operations of the company. I know in my case I was in Chicago five or six times a year. Other officers, I know, were in there, perhaps not quite as much, but at least three or four times a year. I assume his direct [contract] with the officers of the joint staff was at least ten or twelve times a year in addition to his visits to the property and his attendance at the managers meetings.

Q. As I understand, his visits to the property came usually in May, and the managers meetings usually were in the fall?

A. That is correct as far as the time I was on the property. Prior to that, I believe, some times the managers meetings were held in the spring and Mr. White visited us sometime later.

Q. Now, with regard to the transfer of key employees during the time you were on the property there, was that done without Mr. White's knowledge and consent?

A. It was not.

Q. In the matter of differences between the companies, those cases where there was a diversity of interest, how were such matters handled while you were on the property?

A. It was in each case, in every case, the matter was passed up to the owners of the two properties. I refer particularly to the contract under litigation here. I refer also to the contract between Knife River Coal Mining Co. and Northwestern Public Service Co. for coal. I refer to such matters as transfer of key personnel. As I see it, the only job I had was to determine in my own mind when such a conflict did exist.

Q. Do you know who determined the dividend policies of those companies?

A. Mr. White, in conference, of course, with the execu-

tive officers and treasurer of the companies in which he was interested.

Q. Mr. Dunn has testified he kept in touch with the financial affairs of the companies. Did you observe whether or not that was true?

A. I can remember on several occasions getting telegrams from Mr. White in regard to investment of corporation's funds in U. S. securities.

Q. Did you heed those telegrams? A. Quickly.

Q. In every instance? A. In every instance.

Q. And I think you have seen something of the fact about transfer of funds to eastern banks. Did he exercise control over such matters?

A. Mr. White was very much interested in where our funds were. He took over the receivership at the time when some banks were closing and he was very careful as to how the funds were handled.

Q. Did I ask you whether you signed the 1939 contracts?

A. No, I don't believe you have asked me when I signed any contract.

Q. I think you said you signed the 1938 contract as president of Northwestern. With respect to the 1939 contract, did you sign that? A. I did.

Q. Do you know whether or not it had the approval of Mr. White, as president of United Public Utilities Corporation, prior to signing it? A. I know it did.

Q. And was that true of both the 1939 contracts?

A. That was true of both of them.

Q. What was the next change in the contractual relations between Northwestern and other company or companies? A. The 1941 contract.

Q. Will you tell the Court what events led up to that change in that contractual relationship?

A. The reason the 1941 contract, the conditions of the 1941 contract became necessary, was that it became evident the interconnected system required additional capacity. An examination was made by engineers to determine at what point the capacity should be placed. Aberdeen was picked and it met the approval of Mr. White. At that time it so happened that Northwestern had funds available, that were made available through the sale of properties in Nebraska, and for that reason, with the approval

of Mr. White, an investment which was thought at that time to be about $750,000.00, was determined upon at Aberdeen. The contract was inadequate as it stood to take care of the permanent investment of that amount of money, and it was thought, for the proper protection of Northwestern a longer term contract was necessary. For that reason, the 1941 contract was changed to ten year contract, without cancellation provided.

Q. Who worked that contract out?

A. That contract was worked out primarily by Mr. White and Mr. Kruesi. Mr. White acting for United Public Utilities Corporation and Mr. Kruesi acting for the owners of Northwestern Public Service Co., and by the office of Mr. Scheetz, and I believe that the office, also, of the engineering staff of Middle West engineering service, who was under contract to both U. P. U. subsidiaries and Northwestern.

Q. Did you sign that contract also?

A. I did. There were other matters that came up. Of course, in our net return for the entire term, Mr. White directed amortization of the interconnecting facilities.

Q. Do you know whether or not that contract had the approval of Mr. White, prior to signing it? A. I do.

Q. Did it? A. It did.

Q. You made mention of the watch he kept of the financial affairs of the North Dakota subsidiaries. Were there instances when the joint management desired money for improvements when Mr. White did not agree to such appropriations? A. There were.

Q. Can you state some of those instances? A. I can.

Q. Will you do so?

A. For the last four years prior to the sale of the property to Montana-Dakota there was a question of an additional Diesel [enginer] in the Dickinson plant to take care of that area load properly, and also to bolster up the capacity of the North Dakota system. Mr. White felt he had made a considerable investment in the Beulah boiler and a considerable investment in the Bismarck turbine and boiler, and that was as far as he could go at that time. In that length of time there had been talk of connecting the line from Kildare to Dickinson, so as to help along the Kildare-Beulah line. We were never able to obtain money to do that. In addition to that, there was a line west of

Mobridge out to Lemmon that required changing and we got a portion of that done, but not the whole of it. In addition to that there was a very weak 22 KV line from Wishek and from Hoven and Merango into Ellendale that we hoped to rebuild but we could not get money in the time we had to do it. Many of those items were in the [budger] the year Montana-Dakota acquired the property.

Q. I want to ask you this, whether or not you know if Northwestern had carrying charges on the inter-connection facilities that existed between it and the Dakota Public Service Co.?

A. Northwestern carried its half of the investment, its half of the amount set up in the contract, which amounted to Northwestern to about 151 thousand dollars.

Q. Were the Bowdle and Wishek line, and Bowdle and Ipswich line, interconnection facilities?

A. My interpretation is they were not.

Q. Do you know of the policy or requirement that work orders for the United Public Utilities Corporation subsidiaries had to have the approval of Mr. White over certain amounts? A. Yes.

Q. And that was the rule, was it? A. That was the rule.

Q. Did Northwestern Public Service Co. furnish the office equipment and automotive equipment for the joint management staff without any charge to United Public Utilities subsidiaries?

A. There was no charge whatever on office equipment. There was no charge in interest in money invested in automotive equipment.

Q. I don't know whether I have covered the proposition, that is, whether or not the members of the board of directors of United Public Utilities Corporation were ever out or ever went over the properties while you were there?

A. Only two members of the board at the time I was there. One was Mr. White, who went over the properties every year, and on one occasion Mr. Lakin came along. Mr. Lakin was also at that time a member of the board of United Public Utilities Corporation.

Q. There has been some question raised about the time of delivery of the minute books, stock books, and resignations of the officers and directors of Dakota Public Service Co. Do you know when that was?

A. Some time in October, 1945.

Q. And at whose direction was delivery of those things made?

A. I was directed by Mr. White to deliver the material that he specified to the office of Faegre & Benson, in Minneapolis.

Q. The office of the attorneys for the plaintiff in this suit? A. One of the many.

Q. Did you do that? A. I did.

Q. Some time in October, 1945?

A. That is right, as far as my recollection goes, some time in October.

Q. Do you know what the rule or policy with respect to the load dispatchers was? A. I do.

Q. During the period of time you were president of these companies? A. I do.

Q. Was that in writing? A. I believe it was not.

Q. You may state what the policy or rule with respect to handling of these loads was.

A. The load dispatchers were instructed to utilize the lowest cost producers on the system, regardless of ownership of those producers, to the utmost. When the lowest cost producer was loaded to go down the line and load up the next lower cost producer.

Q. So far as you know, was that policy followed regularly?

A. It was followed—It was not always followed far enough to the satisfaction of Mr. White.

Q. Do you mean by that that he made some criticism?

A. Mr. White criticized us for some load we were carrying in the Aberdeen plant when the Beulah plant was not fully loaded.

Q. Now, during the time you were an officer and director of Northwestern Public Service Co., Northern Power & Light Co., North Dakota Power & Light Co. and Dakota Public Service Co., did you ever intend to cause or permit Northwestern Public Service Co. to overreach or defraud the others named in any respect? A. I did not.

Q. Do you regard the several contracts between the companies named, with respect to rates and charges and allocation of expense, including those rates, as fair and just? A. I do.

Q. Did you at the time they were made? A. I did.

Q. Did you ever as an officer or director of the compa-

nies I have just mentioned, intentionally cause or permit the Northwestern Public Service Co. to take or charge anything against the other companies without consideration, unjustly, unreasonably, unlawfully, or fraudulently?

A. I did not.

Q. Mr. Sanborn, I neglected to ask you about the events leading up to the execution of the so-called 1943 supplement to the interconnection contract. Calling your [attentiont] to this photostatic copy marked Defendant's Exhibit 258, did you write the original of that? A. I did.

Q. Is that your signature on it? A. That is.

Q. On or about what date?

A. November 18, 1942 was the date of the letter.

Q. Was that transmitted to Samuel White about that time? A. It was.

Q. Subsequent to the writing of that letter was something done with the existing interchange contract of the company?

A. Yes. Mr. White, as I suggested in the letter, got in touch with Mr. Kruesi and they say that Northwestern was unable, as contemplated—

Q. Calling your attention to the language in that letter, to the effect Northwestern Public Service Co. would not be able to build the capacity which it had contemplated, what event had created that situation?

A. The war and W. P. B.

Q. Was it, as a result of that, impossible for Northwestern Public Service Co. to obtain the generator it had contemplated? A. It was.

Q. After that you wrote that letter? A. That is right.

Q. Who worked out the details of that 1943 supplement which you say was worked out subsequent to that letter?

A. At Mr. White's invitation the first draft was worked out in the Huron office and sent to Mr. Goldsmith for his comments and then sent to Mr. White. He tried to work out a supplement and was unable to do so and he sent it along to his legal officer and that draft came back into Huron, and to our suggestion, some of them were made and send back to Chicago. Mr. White and Mr. Kruesi got together with Mr. Stevenson, legal officer, Middle West, and a draft of the supplement as finally completed was completed in the Chicago office.

Q. Did you sign it? A. I did.

Q. Prior to the signing of it, do you know whether or not it had the approval of Mr. Samuel White, president, United Public Utilities Corporation? A. I do.

Q. Did it? A. It did.

Q. Did you regard the provisions of the 1943 supplement as fair so far as they affected the Dakota Public Service Co.? A. I did.

Q. There was some testimony this morning with regard to the negotiation of a new coal contract between Northwestern Public Service Co. and the Knife River Coal Mining Co., and I want to ask you what events led up to that occurrence?

A. I asked Mr. White to act for United Public Utilities Corporation and I asked Mr. Kruesi to act for Northwestern in forming a new contract for the supply of coal from Knife River Coal Mining Co. to the Aberdeen plant of Northwestern.

Q. That was in the winter of 1944 and 1945, was it?

A. As I remember it was either March or April, 1945.

Q. Were you present at any time when that contract was under discussion?

A. I was present as an observer. Mr. Kruesi did not act for Northwestern. He appointed Mr. Purchas to act as his representative.

Q. He did act?

A. Mr. White and Mr. Solberg, sales manager for Knife River Coal Mining Co., and Mr. Mont, mine manager, for Knife River, acted for Knife River. Mr. Purchas acted for Northwestern.

Q. I don't believe you have stated where those negotiations took place?

A. In the coal mining office in Bismarck, North Dakota.

Q. And after those negotiations was the contract made?

A. The contract was signed.

Q. Did you know before it was signed whether or not it had the approval and consent of Mr. Samuel White?

A. It did. He negotiated it.

Q. Did you sign that? A. I signed it.

Q. Now, I want to ask you in regard to Defendant's Exhibit 215, whether you have seen that before?

A. Yes, I have seen it before.

Q. The names of Bayles and Gazin have been mentioned

in connection with the exhibit, as I understand it. Who were they?

A. Mr. Gazin was assistant chief engineer of Middle West. Mr. Bayles, at the time this exhibit was made, was superintendent of transmission and distribution of the joint companies, the joint staff in Huron, South Dakota.

Q. Do you know who worked that out?

A. Mr. Gazin and Mr. Bayles between them worked it out.

Q. And prepared those papers there, did they?

A. Yes. They prepared the information from which these papers were taken.

Q. Is there a figure there on those papers that was used in connection with a subsequent contract relating to the interconnection facilities?

A. The column headed "Portion for interconnection with Dakota Public Service [Eo.]" adds up to 303 thousand some odd dollars and cents, which figure was used for the basis of the amortization clause in the 1941 contract, and half of the figure was used as the figure for the value of half of the interconnection facilities in the 1943 supplement to the 1941 contract.

Q. I want to ask you whether you ever told Mr. R. M. Heskett, president of the plaintiff, that the interchange contract between the defendant and the Dakota Public Service Co. was cancellable on ninety days notice, or substantially that? A. I did not.

Cross Examination, by Mr. Fellows.

Q. When you detailed your connections and the proceedings that led up to your connection with Northwestern Public Service Co., I believe you stated you were sent to their office in Chicago by somebody in Ashland, Wisconsin?

A. That is right.

Q. Who was that?

A. Walter Hodgkins, whom I have known for a good many years.

Q. At least you were sent to the Middle West Corporation? A. Middle West Service Co.

Q. Did you know what connection Middle West Service Co. had at that time with the defendant company?

A. I found out later.

Q. If you know, will you state?

A. What time are you talking about?

Q. At the time you went to work for the company.

A. Middle West Service Co. had a service contract with Northwestern and with Northern Power & Light and North Dakota Power & Light.

Q. Now, at that time the Middle West Corporation owned the stock of the Northwest Utilities Co.?

A. That is correct. That is as I understand it.

Q. You also know, do you not, that in turn the Northwestern Utilities Co.—going back a little, the Middle West Corporation you have stated, owned the stock of Northwestern Utilities Co. A. I understand so.

Q. And the Northwestern Utilities Co. owned the stock of the defendant company?

A. That was a fact. Common stock.

Q. During all of the time from 1938 until the sale of the northern companies to the plaintiff, you were not only an officer but you were a director in both the defendant company and in the northern companies, weren't you?

A. That is correct.

Q. And president of both companies?

A. President of first three companies, and then two companies.

Q. And president of the defendant company, too?

A. That is correct.

Q. Did you own some stock during that period of time in the northern companies?

A. There wasn't any stock available.

Q. You held your office as director without any stock ownership? A. Correct.

Q. Do you own any stock in the defendant company?

A. There wasn't any stock available in the defendant company.

Q. You likewise hold your position as director and officer without any stock holding?

A. I had one share of stock in trust. It was not my stock.

Q. That was in the defendant company?

A. In the defendant company.

Q. You did sign Exhibits C, D and E and F to the complaint as president of the northern companies, did you and the supplement of July 1, 1941?

A. What are the exhibits?

Q. Did you sign the contract, Exhibit C, of January 1, 1938? A. If that is the 1938 contract, I did.

Q. And also the one of July 1, 1939? A. I signed that.

Q. And the other one, July 1, 1939? A. I signed that.

Q. And the one of July 1, 1941?

A. I believe I signed that.

Q. You signed those as president of the northern companies, did you not?

A. I think I signed them as president of Northwestern.

Q. Do you know who signed on behalf of the northern companies?

A. I haven't refreshed my memory on that. I will be glad to do it if you will show me the contracts. My understanding is Mr. Sandstedt signed—

Q. Here is Exhibit C to the complaint. On whose behalf did you sign that?

A. On behalf of Northwestern Public Service Co.

Q. Who signed on behalf of the northern companies?

A. C. L. Sandstedt signed on behalf of North Dakota Power & Light Co. and G. R. McArthur signed on behalf of Northern Power & Light Co.

Q. He was also a dual officer and [directors]?

A. That is correct.

Q. And Mr. Sandstedt was, too? A. That is right.

Q. Where was this signed? A. At Huron.

Q. That is the place where all of you people were operating? A. That was the joint office.

Q. That is true of Exhibit D, is it not?

A. If signed by dual officers, yes.

Q. You signed as president of Northwestern?

A. I signed for Northwestern. Mr. Sandstedt signed for Dakota Public Service Co.

Q. And Exhibit E?

Mr. Royhl: This is all admitted in the pleadings.

A. I signed for Northwestern. Mr. Sandstedt signed for Dakota Public Service.

Q. When they got ready to be signed did you call Sandstedt in and tell him what company he was to sign for and tell him you were signing for the other one?

A. I don't know how we settled who we were going to sign for.

Q. How did you determine which one would sign for one company and which would sign for another company?

A. I haven't the slightest idea. There was no system to it. I don't know as it ever occurred to us.

Q. It was just a matter of getting it signed by two fellows, one on behalf of one company and one for the other?

A. Two people that had authority to sign.

Q. Was it just a question of who signed for one company and who for the other? A. That is right.

Q. All of you being directors of both companies and officers of both companies? A. That is right.

Q. Mr. White was not there, was he? A. No.

Q. Since you were an officer in both companies why didn't you sign for both companies?

A. I would not know that. I think it would have been just as legal if I had.

Q. At least, when you signed, it didn't make any difference to you which one you signed for, as long as you signed for one of them?

A. Not as long as the owners approved of the contract.

Defendant offered in evidence a portion of the testimony by deposition of adverse witness R. M. HESKETT, an officer of plaintiff, which testimony was received in evidence as follows:

Q. Your name is R. M. Heskett? A. Yes, sir.

Q. Where do you live, Mr. Heskett? A. Minneapolis.

Q. What street, please? A. 2127 Pleasant Avenue.

Q. Are you the president of the Montana-Dakota Utilities Co., the plaintiff in this action? A. Yes.

Q. How long have you been president of that company?

A. Well, I think it was '43. I would not be sure.

Q. Were you connected with the company prior to that time? A. I was vice-president.

Q. Vice president. Are you a director of that company?

A. Yes.

Q. How long have you been a director?

A. Since the company was organized.

Q. When was that, approximately? A. In '24.

Q. 1924. You have been continuously a director since that time? A. Yes.

Q. You own stock in the company? A. Yes, sir.

Q. How much stock do you own in the Montana-Dakota, approximately?

A. Well, approximately, I would say, 50,000 shares.

Q. And what percentage is that 50,000 shares of the total? A. There is 900,000 shares.

Q. 900,000 outstanding? A. Yes.

Q. You own 50,000 shares? A. I say about that.

Q. About 50,000? A. Yes.

Q. That's as of the present? A. Yes.

Q. The members of your family own any other stock?

A. Yes, they do.

Q. Now, the 50,000 shares you own now, did you own them during 1945? A. '45, yes, yes.

Q. Now, do Montana-Dakota Utilities Co. own any shares of its own stock?

A. Oh, they may, I would not be sure about that. If it does, it is quite a small amount.

Q. How about in 1945, did they own any stock?

A. If it did it would be a very small amount.

Q. This morning, Mr. Heskett, you said you would endeavor over the noon hour to ascertain the amount of stock that you owned? A. Yes.

Q. Were you able to do that?

A. I have January, '48, and September '45 that's about what you wanted?

Q. What does September, 1945, show? A. I have 49,793.

Q. Does that reflect any additional shares held by members of your family?

A. No, I am going to give you that separate. Mary G. Heskett, my wife, has 18,890.

Mr. Benson: You mean had as of that date.

The Witness: Yes. David M. Heskett, a son, had 11,050. Robert G. Heskett had the same amount. Jean Heskett Feidt, a daughter, 11,050, and Mary Lou Heskett had 11,050. That's of '45.

Q. (By Mr. Stafford) Yes, sir.

A. Now of today's ownership or January 1st, I had 56,702 Mrs. Heskett had 19,290, David Heskett had 11,298, Robert Heskett had 11,250, Jean Heskett Feidt had 11,250, Mary Lou Heskett had 11,250.

Q. And that's a complete list of the stock owned by yourself and members of your family? A. Yes.

Q. That's common stock? A. Yes.

Q. Did you have preferred holdings too?

A. I didn't have any preferred in '45. I now have 100 and Mrs. Heskett had 609 and now she has got 610. I don't know where that one share came from.

Q. She had 609 in '45?

A. Yes, and now she has 610. The children have no preferred.

Q. At either date? A. No.

Q. What were you endeavoring to purchase from Mr. White, the utility properties of the Dakota Public Service Service Company and the mine properties of the Knife River? A. Yes.

Q. But Mr. White sold you stock and securities, how did that come about? You wanted the properties, if I understood you?

A. No, not necessarily properties, we wanted to get the property but buying the stock was simply a step.

Q. Why did you want to get the property, so you could integrate that with the Montana-Dakota?

A. Yes, certainly.

Q. So as to make an integrated—?

A. Merge it with our company.

Q. So you have one system of public utility properties?

A. Yes.

Q. But you had to buy the stock and the securities in order to—as a step in order to achieve that result, is that correct?

A. That's the way he wanted to sell it. Of course, as far as we are concerned we could have bought the property.

Q. Mr. White had a tax problem or some problem of his own?

A. I would not be surprised, I don't know whether he wanted to sell the stock.

Q. And you would have just as soon have bought the properties? A. Oh, yes.

Q. You recall when you agreed upon the price with Mr. White? I take it you did agree on the price with Mr. White? A. Yes.

Q. You recall when that happened?

A. That I have testified it is either in the early summer or in the spring of '45.

Q. It was prior to the time that the formal contract was drawn and signed? A. Yes.

Q. Some time prior to that? A. Yes.

Q. And there wasn't any deviation from that price that was agreed upon and the one in the contract?

A. I don't believe there was, I think that carried out the contract.

Q. If I said to you that you agreed informally on that $7,500,000.00 plus earnings, with Mr. White, about April 24, 1945, would that be incorrect?

A. I would not dispute it.

Q. You would not dispute it? A. No.

Q. It could have been agreed upon at that time?

A. Yes.

Q. Who else did you deal with in connection with acquiring these Dakota Public Service Company properties other than Mr. White?

A. Why, I never dealt with anybody.

Q. Anybody else in the United Public Utilities Corporation organization? A. Not about that property.

Q. When you said "they" did something a minute ago, who did you mean by "they"?

A. I mean the Northwestern.

Q. And you said they had control of both companies?

A. Yes.

Q. So your testimony is that Northwestern Public Service Company had control of itself and of Dakota Public Service Company? A. Yes.

Q. Do you recall that I interrogated you a few moments ago about allegations in the Federal Power Commission complaint filed by Montana-Dakota Utilities Co. alleging domination and control by Middlewest Corporation of Northwestern Public Service Company and of Dakota Public Service Company? A. Yes.

Q. But you are now testifying that Northwestern Public Service Company had control of—

A. Well, they had—they are the only company that I was in contact with.

Q. Who is "they"?

A. The Northwestern. I don't attempt to follow that tier of ownership about the Northwestern. I don't remember the connection.

Q. Well, you say Northwestern Public Service Company had control of Dakota Public Service Company?

A. Well, I thought so. They had an operating contract.

Q. Well, when you negotiated for the acquisition of the securities of Dakota Public Service Company, did you deal with the Northwestern Public Service Company?

A. Well, no, you know—

The Witness: I dealt with the owner.

By Mr. Schiff:

Q. What was the answer?

A. I said you know I dealt with White.

Q. I so understood your testimony, yes. A. Yes.

Q. And you dealt with Freeman with reference to the proposed acquisition of Northwestern Public Service Company? A. Yes.

Q. Now, after the conversations with Mr. White in April or the spring of 1945, were any investigations made by the personnel of the Montana-Dakota Power Utilities Co. of the Dakota Public Service property records and so forth? A. Yes, there were.

Q. Under whose supervision were those investigations made? A. Mr. Gamble and Mr. Elvig.

Q. Mr. Gamble and Mr. Elvig. Was that at your direction, Mr. Heskett? A. Yes.

Q. What instructions did you give Mr. Gamble and Mr. Elvig in connection with these investigations?

A. Well, we had a balance sheet. They principally used their own judgment.

Q. Well, what information were you expecting them to get from these investigations?

A. Well, I left that largely to them.

Q. Well, how was it, did you give them the authority

and instruct them to make the investigations to satisfy themselves as to what you were purchasing? A. Yes.

Q. Have you or anyone in your staff, to your knowledge, any information with reference to that contract prior to your purchase of the Dakota Public Service Company stock? A. Well, I had notice of it.

Q. And in your opinion—

A. I knew about it when I went over the property with Mr. Sanborn and I discussed it with him to some extent. I asked him, I remember, when it expired, that is, cancellation, and he told me in three months after notice. Now at this time we knew that was not correct of course.

Q. In your discussion with Mr. Sanborn, can you recall anything else that was discussed with reference to that contract?

A. I think the only thing I asked him was the cancellation clause.

Q. And you have no familiarity with the terms of the contract? A. Yes, I already knew that.

Q. Prior to your discussion with Mr. Sanborn? A. Yes.

Q. Had you ever seen those contracts?

A. No, I don't think I had ever seen them.

Q. But you knew about them? A. Yes.

Q. Do you recall you knew about them, not having seen them?

A. I think Mr. White—I am not sure but I think Mr. White told me that they had an operating contract and the expenses were divided according to the gross income.

Q. Well, was that the management contract?

A. Yes, that was the management contract.

Q. Did Mr. White ever discuss with you what is called the interchange contract, in this prospectus?

A. He mentioned—of course I knew that they had that, we discussed it, but I don't remember just in how much detail.

Q. Had you ever made complaint with reference to the contract to Mr. White? A. No.

Q. Or to Mr. Freeman? A. No.

Q. Or to Mr. Sanborn?

A. I don't think so. I think the first complaint I made was in that letter.

Q. And by "that letter" you mean the July 8th letter of 1946 (R. p. 1600, supra)? A. Yes.

Q. And that is true although you have yourself been dissatisfied with that contract for some period of time prior to July 8th?

A. I considered it a one sided contract quite a while but I didn't appreciate its seriousness until later.

Q. Did you appreciate its seriousness before or after the termination notice of February 27th?

A. Oh, I wouldn't be able to say. The contract on its past performance didn't look bad in the early days up until the time we got in.

Q. Then you mean by that—

A. The contract that one company pays a very small amount for power and the other side pays much larger don't strike me as equitable.

Q. And that is your view of the contract? A. Yes.

Q. But you hadn't arrived at that view at October 19, 1945? A. October?

Q. Yes? A. That is when we bought the property?

Q. Yes.

A. Yes. I thought it was a little out of key but I didn't think it was so serious but what we could buy the property, and it would depend [it] good bit on how it was exercised.

Q. Well, I think that was a different inquiry. I was trying to place the time at which you thought it was a one-sided contract, and it is my recollection that you said in substance that the contract over a period of years had worked fairly. That is what I thought your testimony was. If I am in error I would like to have it corrected.

A. I didn't say fairly. I said it didn't seem to be any particular burden on either one. There wasn't much money transferred.

Q. Well, now, "it wasn't any particular burden on either one", by that you mean on Northwestern or Dakota Public Service Company?

A. Well, I said there wasn't much money. It was settled by interchange of power.

Q. And you are then speaking of the period prior to October 19th? A. As shown in those reports.

Q. Is the effect of your testimony that there wasn't much money involved between Dakota and Northwestern?

Mr. Schiff: As of what period were you speaking?

A. I was referring to the three or four years that are

shown in the reports of the operation of the two companies, between the two companies.

Q. That would include the period of three years and four months covered by the Arthur Young & Company statement? A. Yes.

Q. This is a question on another subject, Mr. Heskett. Did you when you bought the Dakota Public Service Company securities know of the construction of a so-called Aberdeen improvement by Northwestern Public Service Company? A. Yes.

Q. And it was then under construction?

A. Yes, almost complete, I think.

Q. I would like now to address some attention, Mr. Heskett, to the question of when you first knew of the fact whether there was at times common directors between Northwestern Public Service Company and Dakota Public Service Company? A. I could not tell you when that—

Q. You have no recollection at all of when you first knew there were common directors, there were some common directors between those two companies?

A. Well, I think I had that impression for a long time but I don't know when I knew, had positive information.

Q. By a long time, I am trying to see what period is encompassed?

A. Well, I would say several years, as far as that goes.

Defendant offered in evidence a portion of the testimony by deposition of adverse witness CECIL W. SMITH, an officer of plaintiff, which testimony was received in evidence as follows:

Q. Will you state your full name, Mr. Smith?

A. Cecil W. Smith.

Q. And where do you live?

A. 1320 West Minnehaha Parkway in Minneapolis, Minnesota.

Q. Mr. Smith, are you at present connected with the plaintiff in this case, Montana-Dakota Utilities Co.?

A. I am.

Q. And in what capacity are you connected with that company? A. Vice president.

Q. And are you a director of that company?

A. And a director.

Q. How long have you been vice president of that company, approximately?

A. About four years, I believe.

Q. What position did you hold in the company prior to that time?

A. I was chief engineer and assistant vice president.

Q. And how long have you been with the company?

A. Since 1927.

Q. And have you been associated in an active capacity with the company since 1927 in some capacity or other?

A. I have.

Q. And how long have you been a director, Mr. Smith?

A. I don't recall just how long it is. I imagine six or eight years, somewhere along in there. I don't recall exactly.

Q. That's sufficient. Mr. Smith, would you tell us please your duties or functions as vice president of Montana-Dakota Utilities Co.?

A. I have been in charge of operation and construction, particularly.

Q. By operation, you mean the actual running of the company's operating facilities, such as its gas and electric and other facilities of that nature? A. That is correct.

Q. You own any stock in Montana-Dakota Utilities Co.?

A. I do.

Q. How much, please, approximately?

A. Oh, I imagine around four or five thousand shares.

Q. How many did you own in 1945? A. Probably—

Q. Was it about the same?

A. About the same, some less.

Q. Now, prior to the acquisition of the properties of Dakota Public Service Company in 1945, was there any investigation made by engineers of Montana-Dakota Utilities Co. of the properties of Dakota Public Service Company, if you know? A. Yes, there was.

Q. Who made such investigation?

A. My recollection is that the company engineers looked over the power plants and transmission lines of the company and subsequently I believe Day & Zimmerman made examination of the physical properties of the company.

Q. Now, could you fix the date, or approximately the dates upon which the company's engineers looked over the plants and transmission facilities of Dakota Public Service Company?

A. I believe it was in July or August.

Q. Of 1945? A. Of 1945, that's right.

Q. Who were the employees that looked over these facilities?

A. Well, I looked them over and Mr. A. P. McDonald, electrical engineer, looked over the plants.

Q. Were you afforded full access to look at any of the properties of facilities that you desired to see at that time?

A. Yes.

Q. Now, Mr. Smith, it has already been testified by Mr. Gamble, I am certain, and I believe also by Mr. Heskett, that Day & Zimmerman made an investigation of these properties of Dakota Public Service Company and prepared and furnished a report on the integration of these properties which has been marked and offered in evidence as Defendant's (Minneapolis) Exhibit 4. Do you recall whether or not you have ever seen that report?

A. Yes, I believe I have.

Q. When, could you say, Mr. Smith?

A. Shortly after it was completed. I don't recall the date of it.

Q. Now, you state that you have seen it shortly after it was furnished to Montana-Dakota; would that be prior to the actual closing of the purchase of the securities of Dakota Public Service on October 19, 1945?

A. Yes, I believe it was.

Q. Did you make a study or review of that report at that time?

A. Yes, I went over it. I don't recall what its contents are now.

Q. Now, you have also testified that during that same period an investigation was being made of Northwestern properties by Day & Zimmerman. Was any investigation made of Northwestern properties by yourself or Mr. McDonald?

A. No, Mr. McDonald didn't make any investigation, and as I recall it, I went over part of the Northwestern properties, not all of them.

Q. Would this be during this same period or after the acquisition of Dakota Public Service Company on October 19th?

A. That was prior to the acquisition of Dakota. As I recall it was in July or August of '45.

Q. Did you visit the Aberdeen plant of Northwestern Public Service Company during that period? A. Yes.

Q. Did they have under construction at that time a new generating unit?

A. Yes, they were installing a new turbine and a new boiler at the time I was at that plant.

Q. Did you have occasion to see the unit at all during its installation? A. Yes, I saw it.

Q. Was it a modern type of generating unit and boiler, turbine, rather?

A. Yes, it was a new General Electric turbine.

Q. Well, now, just what did the term fraudulently mean to you, Mr. Smith?

A. Well, I think under the conditions there it might mean that as far as the Northern Power & Light was concerned they were being taken advantage of in that situation.

Q. Who was taking advantage of Northern Power & Light?

Mr. Fellows: We object to that as incompetent.

The Court: I don't think it is competent. Sustained.

Q. Was that payment which you state Northwestern had exacted from Northern Power & Light, received pursuant to any contract in force and effect between those parties?

A. I believe in pursuance to the contract cited in that paragraph.

Q. How was that contract unfair, Mr. Smith?

Mr. Fellows: Objected to as conclusion of the witness.

The Court: Sustained.

Q. I don't think you covered this in Mr. Robinson's interrogation this morning so I will ask you now, do you recall now when you first knew who the directors were of Northwestern Public Service Company?

A. Of Northwestern Public Service Company?

Q. Yes, the defendant in this action.

A. I believe the first information that I had as to the directors of Northwestern Public Service Company was from Mr. Sanborn when I was out on the property in July.

Q. Of 1945? A. Of 1945.

Q. Now about directors of Dakota Public Service Company? What is your best recollection as to when you first knew who those directors were?

A. I think about the same time.

Q. About the same time and the source of your information was the same? A. That's right.

Q. That's in July of 1945? A. Yes.

Defendant's Exhibit 343 was received in evidence. It consists of the minutes of the special meeting of the directors of plaintiff held July 11, 1945.

At that meeting, among other things, said directors approved, ratified and confirmed the execution of the contract with United Public Utilities Corporation dated July 2, 1945, relating to the purchase by plaintiff of all of the outstanding securities of Dakota Public Service Company and Knife River Coal Mining Company, which is Defendant's Exhibit 282 (R. p. 1333, supra).

Defendant's Exhibit 344 was received in evidence. It is as follows:

Defendant's Exhibit 344.

United States of America
Federal Power Commission

Before Commissioners:

Nelson Lee Smith, Chairman; Claude L. Draper and Leland Olds.

September 2, 1947

In the Matter of	
Montana-Dakota Utilities Co. and Northwestern Public Service Company.	Docket No. IT-6004 and (Waiver of Notice for Filed Rate Schedules)

Order Allowing Rate Schedules to Take Effect and Dismissing Complaint.

It appears to the Commission that:

(a) On August 12, 1946, Montana-Dakota Utilities Co. (hereinafter "complainant") filed a complaint with this Commission against Northwestern Public Service Company (hereinafter "defendant") alleging among other things, that, under the agreement between it and defendant, dated July 1, 1941, and supplemented by an agreement, dated March 13, 1943:

> "The rates and charges exacted from complainant by defendant . . . are unjust and unreasonable and complainant should not be required . . . to pay to defendant anything on account of the transmission line amortization . . . or anything on account of the capacity of the Aberdeen generating station in excess of 6,000 kw capacity; and should be paid by the defendant not less than 6½ mills per kilowatt-hour for all energy furnished by complainant to defendant."

(b) On January 21, 1947, defendant filed a proposed Notice of Cancellation of the aforementioned agreements be-

tween it and the complainant, to become effective as of August 31, 1947, in accordance with a Notice of Termination served by complainant upon defendant under the terms of the aforementioned agreements.

(c) On February 20, 1947, complainant amended its complaint of August 12, 1946, by requesting that the Commission order the maintenance of the facilities interconnecting it and defendant and fix the rates for power to be interchanged by complainant and defendant.

(d) On August 20, 1947, complainant and defendant made application requesting that the following rate schedules, providing by their terms for temporary emergency interchange service be allowed to take effect at midnight August 31, 1947:

Name of Seller	Rate Schedule Designation	Rate Schedule Superseded	Name of Purchaser
Northwestern Public Service Company	FPC No. 7	FPC No. 6, as amended	Montana-Dakota Utilities Co.
Montana-Dakota Utilities Co.	FPC No. 4	FPC No. 3, as amended	Northwestern Public Service Company

(e) By the terms of the agreement filed August 20, 1947, the issues involved in the complaint, as amended, have become merely moot and the public interest will be served by dismissing the same.

The Commission orders that:

(A) The aforesaid rate schedules be and they hereby are allowed to take effect at midnight August 31, 1947;

(B) The aforesaid rate schedules shall be deemed to have been filed and published in compliance with the Federal Power Act;

(C) Nothing contained in this order shall be construed as constituting approval by this Commission of any service, rate, charge, classification, or any rule, regulation, contract or practice affecting such service or rate provided for in the above-designated rate schedules, nor shall this order be deemed as recognition of any claimed contractual right or obligation affecting or relating to such service or rate;

(D) The foregoing provisions of this order are without prejudice to any findings or orders which have been or may hereafter be made by this Commission in any proceeding now pending, or hereafter instituted, by or against the applicants.

(E) The complaint filed on August 12, 1946, and as amended on February 20, 1947, by Montana-Dakota Utilities Co. against Northwestern Public Service Company be and it is hereby dismissed.

By the Commission.

LEON M. FUQUAY,
Secretary.

Date of Issuance: September 4, 1947.

FRED GAMBLE, being called as an adverse witness by the defendant and being first sworn, testified as follows:

Cross Examination, by Mr. Royhl.

Q. Your name is Fred Gamble? A. Yes.

Q. You are an officer and director of the plaintiff company? A. I am.

Q. And for how long have you acted in that capacity?

A. As an officer since 1925. As a director since 1936 or 1937.

Q. What office do you hold at the present time?

A. I am Treasurer of Montana-Dakota, and assistant secretary.

Q. How long have you acted in those capacities?

A. I have been assistant secretary since 1925. I have been treasurer of the company, I am not sure of the date, 1932, 1933, approximately.

Q. Do you know where Ellendale, North Dakota is on this system of the Dakota companies? A. Yes, I do.

Q. Since October 19, 1945, has the plaintiff installed generating equipment there?

Q. What installation has the plaintiff made of generating capacity at Ellendale?

A. They have made installation of Diesel engines similar

in character as the ones described by Mr. Helmick in his testimony.

Q. At Ellendale? A. Yes.

Q. Of what capacity?

A. Net capacity or gross installed?

Q. Gross installed capacity?

A. I believe the ratings were two 1750 KW units.

Q. That would be 3500 KW? A. That is gross.

Q. What installation has been made by the plaintiff at Gettysburg, South Dakota?

A. We have made no installation of capacity at Gettysburg.

Q. What installation, if any, has been made by the plaintiff at Mobridge, South Dakota?

A. Identical equipment with that installed at Ellendale.

Q. That would be 3500 additional KW at Mobridge?

A. That is correct.

Q. Did you make any additional installations other than the 3500 at Ellendale and 3500 at Mobridge?

A. We are in the process of making additional installations.

Q. Where?

A. At Columbus, North Dakota, just north and west of Mandan, and at Bismarck, North Dakota.

Q. What additional are you making at Bismarck?

A. We are installing additional boiler and generating capacity. Generating capacity of 5000 KW.

Q. Any other?

A. Yes, we are installing generating capacity at Sheridan, Wyoming.

Q. That is not on the North Dakota property?

A. Part of the Montana-Dakota property.

Q. Are you installing any additional capacity at Dickinson, North Dakota?

A. No. We have taken generating capacity out of that station.

Redirect Examination, by Mr. Benson.

Q. Mr. Gamble, are you familiar with the general increase of electrical consumption over the whole of the ... ted States since the first of January, 1936?

Mr. Royhl: Objected to as not proper cross examination; immaterial.

The Court: I think he can show by this witness, if he is competent to testify, there has been a general increase in demand for electric power all over the country. Within reasonable limitations the witness may answer.

A. Yes, I believe I am.

Q. How many years have you been in the utility business? A. Since 1920.

Q. Has there been a period that you know of in the utility business from the time you have been in it, when there has been such an increase in demand for energy as began about January 1, 1936?

Mr. Royhl: Same objection.

The Court: Same ruling.

A. No.

Q. Do you know whether the defendant company has installed any additional generation on its system? A. Yes.

Q. Where?

Mr. Royhl: Same objection.

The Court: Same ruling.

A. At Mitchell, South Dakota.

Q. Do you know how much? A. I believe 7500.

Q. KW? A. Yes.

Mr. Royhl: Defendant rests.

Mr. Fellows: Plaintiff rests, and I want to ask leave of the Court to amend the complaint in certain particulars to conform to the proof, and the amendment has to do with the amount of underpayment current, for energy, and based on figures which now appear as our cost of production of current.

We ask leave to amend Paragraph II of the second cause of action, by changing that paragraph to read as follows:

"From the 1st day of September, 1935, to July 1, 1939, the defendant, through its officers and directors, who were officers and directors in common with Northern Power and

Light Company and North Dakota Power & Light Company, caused said North Dakota Power & Light Company to generate in the State of North Dakota and transmit to Northern Power & Light Company at Keldron, South Dakota, and at Driscoll, North Dakota, electrical energy which was in turn by Northern Power and Light Company transmitted to defendant at Gettysburg, Barnard, Ipswich and Aberdeen, South Dakota, and at said points purchased for resale by defendant. The amount of such energy was 12,550,381 kilowatt hours and said energy was of the just and reasonable value of One Hundred Two Thousand Two Hundred Eighty-five and 61/100 Dollars ($102,285.61), but defendant, through its officers and directors aforesaid, paid to said Northern Power and Light Company only the sum of Sixty-two Thousand Seven Hundred Fifty-one and 90/100 Dollars ($62,751.90), which was unjustly and unreasonably and unlawfully low price therefor, to the damage of North Dakota Power & Light Company and Northern Power and Light Company in the amount of Thirty-nine Thousand Five Hundred Thirty-three and 70/100 Dollars ($39,533.70)."

Amend Paragraph III so that the last sentence of said paragraph will read as follows:

"That by reason of the facts hereinbefore alleged, the defendant became indebted to and liable to said North Dakota Power & Light Company and Northern Power and Light Company in the sum of Thirty-nine Thousand Five Hundred Thirty-three and 70/100 Dollars ($39,533.70), no part of which has been paid."

Amend the Fourth Cause of Action by amending the last paragraph of Paragraph VI of said Cause of Action to read as follows:

"The net energy sold as aforesaid by Dakota Public Service Company to Northwestern Public Service Company from July 1, 1939 to July 1, 1941, under the terms of said original of said Exhibit 'D' was fairly, justly and reasonably of the value of Ninety Thousand Nine [Hundred] Seventeen and 65/100 Dollars ($90,917.65) but the defendant, through its officers and directors aforesaid, paid to said Dakota Public Service Company and caused said

Dakota Public Service Company to receive for said energy only the sum of Fifty-nine Thousand Three Hundred Forty-five and 74/100 Dollars ($59,345.74) which was an unjustly, unreasonably and unlawfully low and inadequate price therefor."

Amend Paragraph VII of the Fourth Cause of Action to read:

"By reason of the facts hereinbefore in this cause of action alleged, defendant became liable to and indebted to Dakota Public Service Company in the amount of Seventy-one Thousand, Five Hundred Seventy-one and 91/100 Dollars ($71,571.91), no part of which has been paid."

Amend the Sixth Cause of Action by amending Paragraph IX to read as follows:

"From the 1st day of July, 1941, to the 19th day of October, 1945, the defendant, through its officers and directors, who were officers and directors in common with Dakota Public Service Company, caused said Dakota Public Service Company to generate electrical energy in the State of North Dakota and transmit the same to the defendant at Gettysburg, Barnard and Ipswich, South Dakota, and there to resell the same to the defendant and defendant transmitted the same and resold the same to its public utility customers in the State of South Dakota, and the net energy thus generated, transmitted and sold by Dakota Public Service Company to defendant was fairly, justly and reasonably of the value of Three Hundred Seventy-seven Thousand One Hundred Eight and 6/100 Dollars ($377,108.06), but the defendant, through its aforesaid officers and directors, paid to said Dakota Public Service Company and caused said Dakota Public Service Company to receive for said energy only the sum of Two Hundred Eighteen Thousand Nine Hundred Ninety-four and 23/100 Dollars ($218,994.23), which was an unjustly, unreasonably and unlawfully low price therefor."

Amend Paragraph X of the Sixth Cause of Action to read as follows:

"By reason of the facts hereinbefore in this cause of action alleged, defendant became indebted to the Dakota

Public Service Company in the amount of Three Hundred Thousand Four Hundred Dollars ($300,400.00) no part of which has been paid."

Amend the amended prayer to the complaint so that Paragraph (5) thereof will read as follows:

"(5) For the sum of Five Hundred Fifty-six Thousand One Hundred Twenty and 77/100 Dollars ($556,120.77), with interest at the rate of six per cent (6%) per annum from the date of each payment of each portion thereof by North Dakota Power & Light Company, Northern Power and Light Company and Dakota Public Service Company to the defendant, and with interest on all underpayments by defendant for electrical energy at the rate of six per cent (6%) per annum from the date of each monthly underpayment on account of such energy."

Mr. Royhl: To which the defendant objects for the reason that such application comes too late; it is not timely made; and the defendant having completed the trial of the action, both sides having rested, is surprised; prejudicial and can't meet such additional issues; improper and prejudicial to the defendant, and no proof upon which to make such offer exists.

The Court: I don't see there is any additional issues presented. He has merely made a motion to amend the complaint to conform to the testimony now in the record. As to whether or not the evidence before the Court, the record of the case so far would prove the allegations of the complaint is a matter I am not prepared to pass upon at this time, but I think, if the evidence before the Court is conclusive enough to justify the allegations in the proposed amendment, I think counsel should have a right to amend his complaint to conform to the evidence as it now stands. I don't think there is any question about that, but I would not want to pass upon the motion at this time.

Mr. Royhl: May we have an exception to the ruling?

The Court: Certainly. I will take the matter under advisement and I may rule the other way in the future, but if the evidence in the case will prove the allegations in

the proposed amendment then there is no question but what he has a right to amend the complaint to conform to the facts.

(Opinion.)

The Court: Gentlemen, I have made a careful study of the briefs submitted in this case; I have examined a good deal of the evidence; I have listened with a great deal of interest to the oral presentation of your several positions, and I am convinced that perhaps I am as well, if not better, prepared to decide the case now than I would be if I made a further study of it.

As far as the law of the case is concerned, I have already passed upon the question as to the jurisdiction of the Court.

The next question, as I remember [is], raised by the proof, is the contention of the defendant that the action is barred by the equity rule which prohibits a stockholder, who was not a stockholder at the time of the alleged wrong in the conduct of the board of directors of a corporation, from maintaining a suit for or resulting from the wrongdoing, unless he was a stockholder at the time of the wrongful act, or unless his ownership of the stock was due to legal possession of it. While I have no quarrel with the authorities submitted in support of defendant's contention, this is not a law suit that I think that law is applicable to at all. This is not a suit by a stockholder upon a so-called derivative cause of action. This is a suit by an assignee of the cause of action, and I don't think the equity rule contended for by the defendant is applicable at all.

The next law question, as I recall it, as raised by the proofs, is that of the statute of limitations. I don't think the statute of limitations has anything to do with this case.

That leaves only, as I recall it, the main questions of fact to be determined. As to a good many of the essential facts in the case there seems to be no dispute. As I recall the evidence and contention of counsel, there is no dispute as to the figures representing the amount of money which it is contended the plaintiff paid to the defendants for the services contended for by the defendant in the action.

The next question is whether or not those amounts, collected from the plaintiff by the defendant were collected under legal rate schedules and legal contracts under the provisions of the Federal Power Act.

As to the first proposition, that of the alleged deficiency in the rate, there isn't any dispute, as I recall it, as to the amount paid under that agreement.

As I view the law, the Powe Act contemplated that corporation or individuals engaged in the interstate transportation of electric energy, as were the parties to this suit, should file with the Commission, prior to the time that any rate went into effect, not only the proposed rate, but all contracts, charges or other agreements that in any way affect the rate. Under the evidence, as I view it, this rate and these various contracts and agreement were never filed properly, within the contemplation of the statute. It is true, the Power Commission, by orders, permitted the filing of the rates that had been withheld from the record and been in force between these parties for as long as two years, if I recall correctly. They permitted the filing of the rate without the filing of other contracts or agreements or charges or information which, under the contemplation of the law, should have been filed. There is no explanation in the evidence, so far as I am able to recall it, which would in [anyway] tend to excuse or justify the defendant company in withholding from the Power Commission, the rate and contracts affecting it, for a period of two years. That is contrary to the real purpose and intent of the law that a thing like that should occur. The fact that the rates were filed in this haphazard manner, coupled with the fact that the necessary information which should have accompanied them was not filed before the Commission, notwithstanding the fact that the Commission, under specific authority granted to it by the Power Act authorized the filing of the various instruments, some of them at least, at a specified time after they went into effect, contrary to the whole spirit and purpose of the Power Act.

That fact in itself, when you take into consideration that it was a rate, established and promulgated in transactions between two or more corporations which were managed and operated by the same board of directors, is enough to create a presumption of unfair dealing.

As I indicated to counsel a few moments ago, I have no thought that any of the men who were directors and officers of the defendant company, who participated in these contracts and agreements were guilty of any lack of personal integrity or personal honor. That is not the question. The question is not whether these men were honest, or whether they were self-respecting citizens. The question is whether or not the rates which they promulgated and which were put into operation by them between these companies, the contracts which were entered into by these companies, whether or not those contracts were absolutely fair and reasonable in every way; whether or not they gave to one of the companies an unfair advantage over another; whether or not one of the companies by the promulgation of these rates and contracts profited materially to the disadvantage of the other company. That is the question before the Court.

Under the facts in this case, as I view them, Gentlemen, I cannot come to any other conclusion in the matter than that these contracts were entered into by this joint board of directors, and that the result of that was of material advantage to the defendant company and to the disadvantage of the predecessors of the plaintiff in this case.

It is argued that all of these acts were permitted, ratified and approved by Mr. White. Mr. White must have been a very busy man. As I recall the evidence, he had charge not only of the operations involved in this suit of some two or three public service corporations who were engaged in the manufacture and distribution of electric energy over a wide stretch of territory, but he had some six or seven public utilities companies under his charge and supervision. The evidence shows that he made several visits to this territory; that he talked to the officers of the company; that he talked to men employed, and [gain] such information as anyone would be expected to gain by that visit and talking with these men, but I don't think that he had that intimate understanding and knowledge of the transactions or details that would enable him to approve a contract in such a way as to be of very much benefit to anybody. Mr. White, as I say, was engaged in the management of some six or seven corporations, all held by the same holding company,

United Public Utilities Corporation. I have no doubt but what Mr. White used his best judgment and his energies in an effort to so conduct those companies as to produce for the holding company, United Public Utilities, the greatest profit that he could, but I am convinced from the evidence in this case that in passing upon the conduct of these joint directors and officers in the transactions between the corporations which were controlled by them and which were operated by them, that he also had in mind the benefit which might accrue to some other corporation that he had. The evidence shows that nothwithstanding the fact that he knew that the production of electricity at Beulah was being sold to the Northwestern Public Service Company at a rate which exceeded the cost of production, that he was anxious that they run to capacity because it benefitted the Knife River Coal Company, and Knife River Coal Company, if he could keep that plant running 24 hours a day, and they furnished all of the coal, the Knife River Coal Company could dispose of coal which otherwise might be surplus.

I don't think Mr. White had that particular interest in the welfare of the individual corporation involved in this case that he had in the success of the aggregate of the corporations which were under his control, and even if he did, I don't think Mr. White's approval or disapproval of the conduct of the Board of Directors of these northern companies has anything to do with it.

The officers of the northern companies were the officers charged with the duty of operating this corporation. There is nothing in the law that I know of that made it necessary for Mr. White to approve or disapprove of their conduct. His board of directors, as he calls them, the Board of Directors of the holding company, United Public Utilities Co., knew nothing about the transactions between the companies involved in this law suit, or their predecessors, except what Mr. White told them. Mr. White knew nothing about it except what somebody connected with the transactions involved in this law suit told him. I don't regard the approval of the United Public Utilities Co. as in any material way affecting the equities in this case.

It is true the record shows the whole board of directors

of the United Public Utilities Co. came out to South Dakota once and looked these properties over. I don't know how much time they put in; how much in detail they went in the examination of the records, or manner in which it was conducted and contracts entered into or contemplated at that time. I don't recall that the record indicates how long they stayed here; whether they were out here primarily as a vacation or whether they came out to find out what they could about the plant. I only know that as a matter of common knowledge it is not unusual for a board of directors of a big holding company like this to plan a trip to San Francisco to a Worlds Fair, where they can transact some company business. I have heard of a board of directors of a corporation planning a trip to South Dakota during the pheasant season. I don't know what these men came out here for, but there isn't anything connected with their trip out here, as far as the record goes, that shows they found out anything particularly about the conduct of these corporations. So I don't think their approval in any way affected the activities of any of the companies.

As I say, there is no contest, as I recall it, as to the figures affecting the amount which it is claimed by the plaintiff was wrongfully collected by the defendant. The only question in dispute then would be as to whether or not these rates and contracts were unfair and unreasonable; whether or not they have been properly and duly filed with the Power Commission. From the evidence, I can't view it in any other way than that the contracts that were entered into, the rates and schedules and everything that was entered into, operated by this joint board of directors and officers, primarily were of material benefit to the defendant company and to the material detriment of the plaintiff's predecessors.

As I say, I don't think any further study would change my mind in regard to it.

It is the judgment of the Court that the plaintiff shall recover, and upon presentation of findings and judgment to that effect, the same will be signed and entered of record.

Mr. Woods: We would like to have a little time to make some requests for findings and conclusions.

The Court: That is entirely satisfactory to me. You may have until September 15th. We will set it for that date or as soon thereafter as counsel can be heard.

(Indorsed)—Filed Aug. 27, 1948, Roy B. Marker, Clerk. By Helen S. Lambert, Deputy.

Requests by Defendant, Northwestern Public Service Company, for Findings of Fact and Conclusions of Law.

Now comes defendant, Northwestern Public Service Company, pursuant to leave of Court and respectfully submits the following findings of fact and conclusions of law and requests that the Court adopt and enter each of said findings of fact and each of said conclusions of law as the findings of fact and conclusions of law of the Court in this cause.

Findings of Fact.

I. *Findings Applicable to All Causes of Action.*

1. Plaintiff was prior to the commencement of this action and at all times thereafter has been and now is a Delaware corporation and a citizen of said state, continuously qualified as a foreign corporation in the State of South Dakota since June 27, 1935 and in the State of North Dakota since July 2, 1935.

2. Defendant was prior to the commencement of this action and at all times thereafter has been and now is a Delaware corporation and a citizen of said state and has been continuously qualified to do business in the State of South Dakota since December 23, 1923.

3. The amount in controversy in each of the ten causes of action in the complaint, as amended, exclusive of interest and costs, exceeds $3,000, except that the amount in controversy in each of the seventh and eighth causes of action does not exceed $3,000, exclusive of interests and costs.

4. Northern Power & Light Company (hereinafter called "Northern") was a Delaware corporation continuously

from prior to January 1, 1928, to July 1, 1939 and was qualified to do business in the states of N 'h Dakota and South Dakota during said period.

5. North Dakota Power & Light Company (hereinafter called "North Dakota") was a Delaware corporation continuously from prior to January 1, 1928 to July 1, 1939 and was qualified to do business in the State of North Dakota during said period.

6. On July 1, 1939 Northern and North Dakota, pursuant to the laws of the State of Delaware, merged into one corporation, the surviving corporation being North Dakota, which changed its name in said merger proceedings to Dakota Public Service Company (hereinafter called "Dakota").

7. From July 1, 1939 to and after October 19, 1945 Dakota was a Delaware corporation, and since July 13, 1939 and to and after October 19, 1945 was qualified as a foreign corporation in the State of South Dakota and since July 1, 1939 and to and after October 19, 1945, in the State of North Dakota.

8. Pursuant to the terms of said merger, Dakota became the owner of all the public utility business of Northern, in addition to the properties on the date of said merger owned by North Dakota; and thereafter Dakota owned and operated as a public utility the properties formerly owned by it (as North Dakota) and the properties on the date of said merger owned by Northern.

9. The corporation laws of the State of Delaware provide that when two corporations of said state merge pursuant to the provisions of said corporation laws, then the surviving corporation shall, among other things, be subject to all of the restrictions, disabilities and duties of each of the corporations so merged; and, further, that in the case of such merger all debts, liabilities and duties of the respective constituent corporations shall upon said merger attach to the surviving corporation and may be enforced against it to the same extent as if said debts, liabilities and duties had been incurred or contracted by it.

10. The following persons were directors and officers of defendant and at the same time directors and officers of

(Memorandum relating to Order of District Court fixing Amount of Bond on Appeal, and depositing amount thereof in Cash by Defendant with Clerk of District Court.)

On September 20, 1948, the District Court entered its order fixing the security for stay and supersedeas upon appeal in the amount of $780,000.00, which amount was deposited in cash by defendant with the Clerk of the District Court on September 22, 1948.

(Motion of Defendant to Amend and Supplement Findings of Fact, Conclusions of Law and Judgment of District Court.)

Under date of September 24, 1948, defendant served and filed its Motion to Amend and Supplement the Findings of Fact and Conclusions of Law made by the District Court and to Amend Judgment thereof. By this motion defendant resubmitted to the consideration of the District Court the points and matters included in its Request for Findings of Fact and Conclusions of Law filed on September 15, 1948, and in its Motion to Dismiss the action for want of jurisdiction over the subject matter (R. p. 1888 and 106, supra).

(Order denying Motion of Defendant to Amend and Supplement Findings of Fact and Conclusions of Law and Judgment, October 5, 1948.)

The defendant's Motion to Amend and Supplement Findings of Fact and Conclusions of Law and to amend the Judgment herein came on for hearing before this Court in the Federal Building in Pierre, Hughes County, South Dakota, on October 5th, 1948, at 10 o'clock A. M., the parties appearing by their attorneys of record. The Court being fully advised in the premises it is,

Ordered,

That defendant's Motion be and the same is hereby denied.

Done in Open Court this 5th day of October, 1948.

(Motion of Plaintiff to further Amend its Amended Complaint to conform to the Evidence, Findings of Fact, Conclusions of Law and Judgment.)

Comes now the plaintiff in the above entitled cause and moves the Court for leave to further amend its heretofore amended complaint on the ground that the amendments included in this motion will render said complaint conformable to the evidence, the findings of fact and the conclusions of law herein and the judgment herein, and accordingly moves that the aforesaid complaint be amended in the following particulars, to-wit:

1. By inserting in paragraph IX of the first cause of action of plaintiff's original complaint, immediately preceding the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Northern Power and Light Company which defendant, through its Board of Directors and officers, had caused said Northern Power and Light Company to enter into with defendant, and such agreement provided, among other things, that Northern Power and Light Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Northern Power and Light Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

2. By inserting in paragraph III of the third cause of action of plaintiff's original complaint, immediately preceding the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Northern Power and Light Company which defendant, through its Board of Directors and officers, had caused said Northern Power and Light Company to enter into with defendant, and such agreement provided, among other things,

that Northern Power and Light Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Northern Power and Light Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

3. By inserting in paragraph VI of the fourth cause of action of plaintiff's original complaint, immediately following the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Dakota Public Service Company which defendant, through its Board of Directors and officers, had caused said Dakota Public Service Company to enter into with defendant, and such agreement provided, among other things, that Dakota Public Service Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement for the payment of the portion of the salaries and expenses of load dispatchers and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Dakota Public Service Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defend-

ant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

4. By inserting in paragraph III of the fifth cause of action of plaintiff's original complaint, immediately preceding the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Dakota Public Service Company which defendant, through its Board of Directors and officers, had caused said Dakota Public Service Company to enter into with defendant, and such agreement provided, among other things, that Dakota Public Service Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement for the payment of the portion of the salaries and expenses of load dispatchers and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Dakota Public Service Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

5. By inserting in paragraph III of the sixth cause of action of plaintiff's original complaint, immediately preceding the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Dakota Public Service Company which defendant, through its Board of Directors and officers, had caused said Dakota Public Service Company to enter into with defendant, and such agreement provided, among other things, that Dakota Public Service Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement for the payment of the portion of the salaries and expenses of load dispatchers and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Dakota Public Service Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

(Indorsed)—Filed Oct. 5, 1948. Roy B. Marker, Clerk.

(Objections of Defendant to Motion of Plaintiff to Further Amend Its Amended Complaint, etc.)

Now comes the defendant in the above entitled cause and objects to the motion heretofore filed herein by plaintiff seeking leave to further amend the amended complaint on the ground that the amendments included in said motion will render said complaint conformable to the evidence, the findings of fact, the conclusions of law and the judgment heretofore entered herein for the following reasons, to-wit:

1. The Federal Rules of Civil Procedure do not permit pleadings to be amended in order to conform to the findings of fact and the conclusions of law entered by the court; nor to conform to the judgment rendered by the court. Said Rules restrict the right to amend after judgment to "conform to the evidence" (Rule 15 (b)).

2. The proposed amendments to plaintiff's amended complaint do not conform to the evidence for the following reasons:

(a) The proposed amendment of Paragraph IX of the First Cause of Action of plaintiff's original complaint does not conform to the evidence in the following particulars, to-wit: There is no proof in the record that at all times mentioned in plaintiff's First Cause of Action subsequent to January 1, 1936 there was in existence an agreement between defendant and Northern Power and Light Company which defendant, through its Board of Directors and officers, had caused Northern Power and Light Company to enter into with defendant; nor that any agreement between said parties provided that Northern Power and Light Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant; nor that any payments were made pursuant to such agreement; nor that such agreement and the payments to the defendant on account of the load dispatchers' salaries and expenses affected the rates and charges made by defendant against Northern Power and Light Company; nor that each schedule, rate and contract alleged in plaintiff's First Cause of Action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with said Commission; nor that each such rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act.

(b) The proposed amendment of Paragraph III of the Third Cause of Action of plaintiff's original complaint does not conform to the evidence for each of the reasons heretofore stated in subparagraph (a) hereof, which reasons are incorporated herein by reference and made a part hereof.

(c) The proposed amendment of Paragraph VI of the Fourth Cause of Action of plaintiff's original complaint does not conform to the evidence for each of the reasons heretofore stated in subparagraph (a) hereof and said reasons are incorporated herein by reference and made a part hereof except that where reference is made to North-

ern Power and Light Company in said subparagraph (a) the same shall refer to Dakota Public Service Company in this subparagraph (c).

(d) The proposed amendment of Paragraph III of the Fifth Cause of Action of plaintiff's original complaint does not conform to the evidence for each of the reasons heretofore stated in subparagraph (a) hereof and said reasons are incorporated herein by reference and made a part hereof except that where reference is made to Northern Power and Light Company in said subparagraph (a) the same shall refer to Dakota Public Service Company in this subparagraph (d).

(e) The proposed amendment of Paragraph III of the Sixth Cause of Action of plaintiff's original complaint does not conform to the evidence for each of the reasons heretofore stated in subparagraph (a) hereof and said reasons are incorporated herein by reference and made a part hereof except that where reference is made to Northern Power and Light Company in said subparagraph (a) the same shall refer to Dakota Public Service Company in this subparagraph (e).

(Order of District Court Granting Leave to Plaintiff to Amend Complaint, October 5, 1948).

Plaintiff's Motion to amend its complaint coming on to [——] heard before this Court at the Federal Building in Pierre, Hughes County, South Dakota on October 5, 1948, each party appearing by its attorneys of record. The Court being fully advised in the premises, it is,

Ordered,

That plaintiff's Complaint be and is hereby amended in the following particulars, to-wit:

1. By inserting in paragraph IX of the first cause of action of plaintiff's original complaint, immediately preceding the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Northern Power and Light Company which defendant through its Board of Directors and officers, had caused said Northern Power and Light Company to enter into with defendant, and such agreement provided, among other things, that Northern Power and Light Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Northern Power and Light Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

2. By inserting in paragraph III of the third cause of action of plaintiff's original complaint, immediately preceding the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to Jannary 1, 1936, there was in existence an agreement between defendant and Northern Power and Light Company which defendant, through its Board of Directors and officers, had caused said Northern Power and Light Company to enter into with defendant, and such agreement provided,

among other things, that Northern Power and Light Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Northern Power and Light Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

3. By inserting in paragraph VI of the fourth cause of action of plaintiff's original complaint, immediately following the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Dakota Public Service Company which defendant, through its Board of Directors and officers, had caused said Dakota Public Service Company to enter into with defendant, and such agreement provided, among other things, that Dakota Public Service Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement for the payment of the portion of the salaries and expenses of load dispatchers and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Dakota Public Service Company, as elsewhere alleged in this cause of action, and said agreement was never filed by de-

fendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

4. By inserting in paragraph III of the fifth cause of action of plaintiff's original complaint, immediately preceding the allegations now contained in said paragraph, the following to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Dakota Public Service Company which defendant, through its Board of Directors and officers, had caused said Dakota Public Service Company to enter into with defendant, and such agreement provided, among other things, that Dakota Public Service Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement for the payment of the portion of the salaries and expenses of load dispatchers and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Dakota Public Service Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

5. By inserting in paragraph III of the sixth cause of action of plaintiff's original complaint, immediately pre-

ceding the allegations now contained in said paragraph, the following, to-wit:

"At all times mentioned in this cause of action subsequent to January 1, 1936, there was in existence an agreement between defendant and Dakota Public Service Company, which defendant, through its Board of Directors and officers, had caused said Dakota Public Service Company to enter into with defendant, and such agreement provided, among other things, that Dakota Public Service Company should pay to defendant monthly a portion of the salaries and expenses of the load dispatchers of defendant, and such payments were made pursuant to said agreement. Said agreement for the payment of the portion of the salaries and expenses of load dispatchers and the payments to defendant on account of said load dispatchers' salaries and expenses affected the rates and charges made by defendant against Dakota Public Service Company, as elsewhere alleged in this cause of action, and said agreement was never filed by defendant with the Federal Power Commission, and each schedule, rate and contract alleged in this cause of action to have been filed by defendant with the Federal Power Commission was an incomplete, inaccurate and misleading statement of the rates and charges so alleged to have been filed with the Federal Power Commission, and each such filed rate and charge was filed in violation of the requirements of Section 205 (c) of the Federal Power Act."

Comes now appellant by his attorneys of record and represents and shows to the Court:

1. That the record below contained several hundred exhibits, all of which have been transmitted to this Honorable Court by the District Court; that some of those exhibits are quite voluminous and that, pursuant to stipulation entered into and made by appellant with appellee and filed with this Honorable Court on March 23, 1949, many such exhibits have been summarized and condensed in the printed record; but that there are a few exhibits hereinafter described which do not lend themselves to be summarized or condensed; that it would be very expensive to print or reproduce them in full; that the cost of the printed record exclusive of said exhibits was estimated by the St. Louis Law Printing Company to be in excess of $10,000.00; that said exhibits are very bulky and voluminous, that their inclusion in full in the printed record would encumber an already very voluminous record, at a considerable additional expense to appellant.

2. That appellee has agreed in the aforesaid stipulation, page 120 thereof, that said exhibits should not be fully reproduced in the printed record, but would be available for reference in their original form both to the Court and to counsel in their briefs and arguments.

3. That said exhibits are as follows:

Plaintiff's Exhibit 13 which is a certified copy of the Historical and Cost of Reproduction Appraisals of the Northern Power & Light Co., dated December 31, 1937, and consists of 362 pages of tabulations and other statistical data.

Plaintiff's Exhibit 14 which is a certified copy of the Historical and Cost of Reproduction Appraisal of the North Dakota Power and Light Company dated December 31, 1937, and consisting of 377 pages of tabulations and other statistical data.

Plaintiff's Exhibit 52 which consists of a Report of Sargent & Lundy, Engineers On Proposed increase in generating capacity for the North Dakota Power and Light Co., dated June 26, 1936, consisting of 15 pages and of 21 very large diagrams.

Plaintiff's Exhibit 55-3 which consists of three reports by O. C. Stokke to L. J. Strike, one of 14 pages dated April 8, 1935; one of 9 pages and 4 diagrams dated July 14, 1936; and one of 8 pages and 1 diagram dated December 31, 1935.

Plaintiff's Exhibit 32-14 which is an Engineering Survey of the Combined Properties of Hughes Electric Company, Bismarck, N. D. and Northern Power & Light Company, Mobridge, S. D. by Lucas & Luick, engineers, dated March, 1928, and consists of 149 pages plus index and accompanying letter and includes diagrams and tabulations.

Defendant's Exhibit 55-9 which is a bound volume copy of the Annual Report of defendant to the F. P. C. for the year ending December 31, 1945 filled in with pencil data and consisting of pages 100 to 606, inclusive, with omissions as marked.

Defendant's Exhibit 55-10 which is a similar report for the year ending December 31, 1938.

Defendant's Exhibit 55-11 which is a similar report for the year ending December 31, 1939.

Defendant's Exhibit 55-12 which is a similar report for the year ending December 31, 1940.

Defendant's Exhibit 55-13 which is a similar report for the year ending December 31, 1941.

Defendant's Exhibit 55-14 which is a similar report for the year ending December 31, 1942.

Defendant's Exhibit 55-15 which is a similar report for the year ending December 31, 1943.

Defendant's Exhibit 55-16 which is a similar report for the year ending December 31, 1944.

Defendant's Exhibit 55-17 which is a similar report for the year ending December 31, 1937.

Defendant's Exhibit 333 which consists of a bound volume styled Daily Load Curves 1944-45 and containing several hundred diagrams.

Defendant's Exhibit 334 which consists of a bound volume styled Daily Load Curves 1942-43 and containing several hundred diagrams.

4. That the following exhibits have not been fully reproduced in the printed record, pursuant to the aforesaid stipulation, but that in accordance with the final paragraph of said stipulation, it seems desirable that the Court and the parties herein may be entitled to refer to the originals of the said following exhibits:

Plaintiff's Exhibit 26 which consists of 48 pages of copies of correspondence of defendant with the F. P. C., with attached certificate of the Secretary of the F. P. C.

Plaintiff's Exhibit 34 which consists of 40 pages of copies of correspondence of defendant, Martens & Goldsmith with the F. P. C., with attached certificate of the Secretary of the F. P. C.

Defendant's Exhibit 340 which is a Supplement to Interchange Capacity Agreement dated February 8, 1939 and consisting of 3 pages.

Defendant's Exhibit 341 which consists of 7 pages of ratings of the Committee on Operations applicable to the Contract term beginning January 1st, 1938 and ending January 1, 1939, and are all dated May 10, 1938.

Wherefore, appellant prays this Honorable Court for an order under its Rule 9 (c) authorizing appellant not to print or reproduce as a part of the printed record in this case Plaintiff's Exhibits 13, 14, 26, 34, 52, 55-3 and 82-14; and Defendant's Exhibits 55-9 to 55-17, both inclusive, 333, 334, 340 and 341, as more fully described above, and authorizing both parties to this case to refer to said Exhibits in their original form and to consider said Exhibits as part of the appellate record for all other purposes.

Respectfully submitted,

SIDNEY K. SCHIFF,
MAX ROYHL,
FREDERIC H. STAFFORD,
JACOB M. LASHLY,
PAUL B. RAVA,
Attorneys for Appellant.

(Endorsed): Filed in United States Court of Appeals on May 17, 1949.

(Order granting Application of Appellant for leave to omit certain exhibits from printed record, etc.)

United States Court of Appeals
for the Eighth Circuit.

No. 13887 May Term, 1949.

Wednesday, May 18, 1949.

Northwestern Public Service Company, a Corporation, Appellant, vs. Montana-Dakota Utilities Co., a Corporation.	Appeal from the United States District Court for the District of South Dakota.

Application has been filed by attorneys for appellant for an order authorizing appellant not to print or reproduce as a part of the printed record Plaintiff's Exhibits 13, 14,

26, 34, 52, 55-3 and 82-14 and Defendant's Exhibits 55-9 to 55-17, both inclusive, 333, 334, 340 and 341, as more fully described in said application, with authority to both parties to this cause to refer to said exhibits in their original form and to consider said exhibits as part of the appellate record for all other purposes. The Court's order is sought because of the great expense to print or reproduce the exhibits and to avoid producing a very voluminous record which without the aforesaid exhibits is very large.

Upon representation made and on the grounds set forth in the application, It is Ordered by the Court that the application and prayer thereof is hereby granted and the said application and this order will be printed as a part of the record for hearing of this appeal.

May 18, 1949.

[fol. 1987] (Order of Submission.)

January Term, 1950.

Monday, January 9, 1950.

This cause having been called for hearing in its regular order, argument was commenced by Mr. Jacob M. Lashly for appellant, continued by Mr. Howard E. Wahrenbrock, Assistant General Counsel, Federal Power Commission, for

Federal Power Commission, Amicus Curiae, continued by Mr. John C. Benson for appellee, and concluded by Mr. Jacob M. Lashly for appellant.

Thereupon, this cause was submitted to the Court on the printed record and briefs of counsel filed herein, with leave granted to the Federal Power Commission to file Memorandum of additional citations.

[fol. 1988] (Opinion.)

United States Court of Appeals
For The Eighth Circuit.

No. 13,887.

Northwestern Public Service Company, a Corporation, Appellant,
vs.
Montana-Dakota Utilities Co., a Corporation, Appellee.

Appeal from the United States District Court for the District of South Dakota.

[April 4, 1950.]

Mr. Jacob M. Lashly (Mr. Max Royhl, Mr. Sydney K. Schiff, Mr. Fredric H. Stafford, Mr. Paul B. Rava, Messrs. Pam, Hurd & Reichmann and Messrs. Lashly, Lashly, Miller & Clifford were with him on the brief) for Appellant.

Mr. John C. Benson (Mr. Pat Morrison, Mr. H. F. Fellows, Mr. Rodger L. Nordbye and Messrs. Faegre & Benson were with him on the brief) for Appellee.

Mr. Howard E. Wahrenbrock, Assistant General Counsel, Federal Power Commission (Mr. Bradford Ross, General Counsel, and Mr. Louis W. McKernan, Principal Attorney, Federal Power Commission, were with him on the brief) for Federal Power Commission, Amicus Curiae.

Before SANBORN, THOMAS and JOHNSEN, Circuit Judges.

THOMAS, Circuit Judge, delivered the opinion of the Court.

This is an action brought by appellee as plaintiff in the district court on February 3, 1947, against appellant-defendant to recover damages according to the principles of the common law.

The parties, corporations organized under the laws of Delaware, are both engaged in the electric public utility business, the plaintiff chiefly in North Dakota and the defendant in South Dakota. The plaintiff brings the action as assignee of its predecessors. Prior to July 1, 1939, the Northern Power and Light Company and the North Dakota Power & Light Company, two Delaware corporations, were engaged in the electric public utility business in North Dakota. On the date named the two corporations merged into one corporation under the name of Dakota Public Service Corporation, which by the terms of the merger became the owner of the business and properties of its two predecessors. On October 19, 1945, the Dakota Public Service Company assigned to Montana-Dakota Utilities Co., plaintiff here, all claims, demands, and causes of action which it had against defendant.

Federal jurisdiction is based upon § 1331 of Title 28, U.S.C.A., upon the theory that the action arises under the "... laws of the United States", namely, the Federal Power Act, 16 U.S.C.A. § 824, et seq.

The controversy involves the period from September 1, 1935, to October 19, 1945. During this period plaintiff's predecessors and defendant operated under joint management in contiguous territory, and their lines were interconnected at several points. They entered into contracts for the exchange of electric energy and for the allocation of joint expenses. In this action plaintiff seeks to recover from defendant alleged unreasonable rates and charges for electric energy in interstate commerce at wholesale exacted from its predecessors by defendant in violation of the Federal Power Act; and to recover, also, the difference between amounts alleged to have been paid by defendant to such predecessors for electric energy and the reasonable costs of such energy on the ground that all such underpayments were in violation of the Federal Power Act. It is also alleged that all such excessive payments exacted from plaintiff's predecessors and such underpayments by defendant to such predecessors were fraudulent and unlawful.

The fraud charged was alleged to consist of (1) the exaction of unreasonable rates and charges by defendant through the medium of common officers and directors of defendant and of plaintiff's predecessors and (2) the improper filing by defendant of some rate schedules and the belated filing of others.

The record shows that all of the contracts for the interchange of electrical energy between defendant and plaintiff's predecessors fixed rates based upon per kilowatt hour service, and that such contracts were all filed by both defendant and plaintiff's predecessors with the Federal Power Commission, although some of them were filed after they had been put into effect. But they were all approved as filed by the Commission. Certain agreements for allocation of joint management expenses were not filed on the assumption that they did not affect rates.

The defendant, prior to the trial, moved the court to dismiss the complaint for want of jurisdiction over the subject matter, asserting *inter alia* that the "alleged cause of action does not really and substantially involve a dispute or controversy respecting the validity, construction or effect of the Constitution or laws of the United States nor does a determination of this suit depend thereon."

The motion was overruled; the case was tried to the court without a jury; findings of fact and conclusions of law were filed by the court and judgment rendered for plaintiff and against defendant for the total sum of $779,958.30. The judgment consisted of

(1) $229,214.46 representing the amount by which the defendant had paid less for electric energy delivered to it from 1935 to 1945 at the filed rate than the court determined would have been a "just and reasonable" rate, plus $82,417.85 interest.

(2) $196,021.51, interconnection rental charges received by defendant under an agreement filed as defendant's Rate Schedules FPC Nos. 3, 5A, 6, and supplement 1, plus $91,340.18 interest.

(3) $111,665.05, interchange capacity charges received by defendant under agreements filed as defendant's Rate Schedules FPC Nos. 4 and 6, and supplement No. 1, plus $43,866.13 interest.

(4) $19,214.76 received by defendant as reimbursement for a share of dispatching services initially paid for by it, pursuant to a joint management agreement not filed, plus $6,213.38 interest.

The defendant-appellant contends, first, that the court erred in refusing to dismiss the complaint for lack of jurisdiction over the subject matter in that under the applicable statute jurisdiction over electrical utility rates in inter-

state commerce is vested exclusively in the Federal Power Commission.

The plaintiff in its brief contends that the court had jurisdiction to adjudicate its claims under the Federal Power Act because the rates and charges sought to be recovered were collected in violation of § 205 of the Federal Power Act (16 U.S.C.A. 824d), in that (1) Section 205(a) of the Act declares that all unjust and unreasonable rates and charges are unlawful, and the rates and charges in dispute are alleged to be unjust and unreasonable; and (2) the rates in issue were illegal because defendant failed to comply with the filing provisions of § 205(d) of the Act.

The pertinent parts of § 205 (16 U.S.C.A. 824d) are:

"(a) All rates and charges made, demanded, or received by any public utility for or in connection with the transmission or sale of electric energy subject to the jurisdiction of the Commission, . . . shall be just and reasonable, and any such rate or charge that is not just and reasonable is hereby declared to be unlawful.

"(b) No public utility shall . . . (1) make or grant any undue preference or advantage to any person or subject any person to any undue prejudice or disadvantage, . . .

"(c) . . . every public utility shall file with the Commission . . . schedules showing all rates and charges for any transmission or sale subject to the jurisdiction of the Commission, and the classifications, practices, and regulations affecting such rates and charges, together with all contracts which in any manner affect or relate to such rates, charges, classifications and services.

"(d) . . . no change shall be made by any public utility in any such rate, charge, classification or service, or in any rule, regulation, or contract relating thereto, except after thirty days' notice to the Commission and to the public . . . [But] The Commission, for good cause shown, may allow changes to take effect without requiring the thirty

days' notice herein provided for by an order specifying the changes so to be made and the time when they shall take effect and the manner in which they shall be filed and published."

And subsection (e) provides that "Whenever any such new schedule is filed the Commission shall have authority, either upon complaint or upon its own initiative" upon reasonable notice to enter upon a hearing and to make such orders as it finds to be justified.

The district court, we think, erred in assuming that because the complaint alleged that the rates and charges in issue were unjust and unreasonable it had power to determine just and reasonable rates, and if the filed rates were found to be unreasonable to declare them unlawful and grant reparations under § 205, supra. Nowhere does the Act give the district court power to determine just and reasonable rates; that power is given to the Commission exclusively. Section 314 (16 U.S.C.A. § 825m(a)) provides that the Commission may bring an action in the proper court of the United States to enjoin violations of the Act and to enforce compliance with the Act or any rule, regulation or order of the Commission; and § 317 (16 U.S.C.A. §825p) provides that such actions may be brought in the district courts of the United States. The statute does not imply that aggrieved parties may bring such actions. See *Civil Aeronautics Board* v. *Modern Air Transport, Inc.*, 2 Cir., 179 F.2d 622, 624, 625, and cases cited.

The plan or scheme of the Federal Power Act is analogous to that of the Interstate Commerce Act, and decisions under the latter Act should be controlling here. This is especially true since the enactment of the Administrative Procedure Act. *United States* v. *Jones*, 336 U.S. 641, 672. It is well settled that the reasonableness of rates will not be considered by the courts before application has been

made to the Commission. The rates filed and approved by the Commission are the lawful rates until changed in the way provided by the Act. *Texas and Pac. Ry. Co.* v. *Abilene Cotton Oil Co.*, 204 U.S. 426; *Robinson* v. *Baltimore & Ohio R. Co.*, 222 U.S. 506; *Mitchell Coal Co.* v. *Pennsylvania R. Co.*, 230 U.S. 247; *Skinner & Eddy Corp.* v. *United States*, 249 U.S. 557; *Terminal R. R. Assn.* v. *United States*, 266 U.S. 17, 31; *United States* v. *I. C. C.*, 337 U.S. 426, 437; *Backus-Brooks Co.* v. *Northern Pac. Ry. Co.*, 8 Cir., 21 F.2d 4; *Chicago, I. & L. Ry. Co.* v. *International Milling Co.*, 8 Cir., 43 F.2d 93; *Woodrich* v. *Northern Pac. Ry. Co.*, 8 Cir., 71 F.2d 732; *Watab Paper Co.* v. *Northern Pac. Ry. Co.*, 8 Cir., 154 F.2d 436; *Civil Aeronautics Board* v. *Modern Air Transport, Inc.*, *supra*.

In *Great Northern Ry. Co.* v. *Merchants Elevator Co.*, 259 U.S. 285, at page 291, the Supreme Court said:

"Whenever a rate, rule or practice is attacked as unreasonable or as unjustly discriminatory, there must be preliminary resort to the Commission. Sometimes this is required because the function being exercised is in its nature administrative in contradistinction to judicial. But ordinarily the determining factor is not the character of the function, but the character of the controverted question and the nature of the enquiry necessary for its solution. To determine what rate, rule or practice shall be deemed reasonable for the future is a legislative or administrative function. To determine whether a shipper has in the past been wronged by the exaction of an unreasonable or discriminatory rate is a judicial function. Preliminary resort to the Commission is required alike in the two classes of cases. It is required because the enquiry is essentially one of fact and of discretion in technical matters; and uniformity can be secured only if its determination is reached ordinarily upon voluminous and conflicting evidence, for the adequate appreciation of which acquaintance with many intricate facts of transportation is indispensable; and such acquaintance is commonly to be found only in a body of experts."

Moreover, the transmission of electric energy being at wholesale and interstate, the seller must collect the charge named in the filed rate and the purchaser must pay that rate. So long as the filed rate is not changed in the manner provided by the Act it is to be treated as though it were a statute, binding upon the seller and the purchaser alike. *Texas & Pac. Ry. Co.* v. *Cisco Oil Mill*, 204 U.S. 449; *Pennsylvania R. R. Co.* v. *International Coal Mining Co.*, 230 U.S. 184, 197; *Pillsbury Flour Mills Co.* v. *Great Northern Ry. Co.*, 8 Cir., 25 F.2d 66, 68.

Plaintiff's further contentions that the rates in issue were unlawful are without merit in view of our conclusion that upon proper complaint under the Federal Power Act the Commission had jurisdiction and was the proper tribunal in the first instance to determine all such contentions. In brief, those contentions are that the rates were illegal because defendant failed to comply with the filing provisions of the Act; that thirty days' notice of filing as required by § 205(d) was not given; that the power, if it exists, to cure the defect in filing was nullified by the fraud of the defendant; and that defendant's acts were fraudulent because defendant and plaintiff's predecessors had common officers.

None of these contentions, however, defeated the jurisdiction of the Commission. They are in substance of the same effect as were the contentions of plaintiff in the case of *Watab Paper Co.* v. *Northern Pac. Ry. Co.*, *supra*, as enumerated on page 437 of the report. This court held there that the Commission had jurisdiction to hear and determine all the issues, and concluded: "Manifestly, if the Commission had such jurisdiction, it had jurisdiction to reach either a correct or an incorrect decision, but whether correct or incorrect its determination could not be at-

tacked collaterally as in this proceeding attempted." The situation is equally true here. Had the case been submitted to the Federal Power Commission, the statute, § 313(b) (16 U.S.C.A. § 825*l*(b)), gave to the plaintiff a right of appeal to the United States Court of Appeals.

Jurisdiction in such a controversy as this to investigate fraud practiced by an electric public utility in the past as well as in the present is vested not in the district court, but in the Commission by § 307 (16 U.S.C.A. §825f), wherein it is provided that "The Commission may investigate any facts, conditions, practices, or matters which it may find necessary or proper in order to determine whether any person has violated or is about to violate any provision of this Act or any rule, regulation, or order thereunder, . . . The Commission may permit any person to file with it a statement in writing . . . as to any or all facts and circumstances concerning a matter which may be the subject of investigation . . ." The Commission by § 309 (16 U.S.C.A. § 825h) is empowered to make, amend, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of the Act. The Commission can, no doubt, correct its own mistakes. In case a complainant is aggrieved by the decision of the Commission its remedy is by appeal under § 313(b), supra. It is a "long settled rule of judicial administration that no one is entitled to judicial relief for a supposed . . . injury until the prescribed administrative remedy has been exhausted." *Myers* v. *Bethlehem Shipbuilding Corp.*, 303 U.S. 41; *Macauley* v. *Waterman Steamship Corp.*, 327 U.S. 540, 543.

For the foregoing reasons the judgment appealed from is reversed with instructions to dismiss the complaint.

[fol. 1998] (Judgment.)

United States Court of Appeals
for the Eighth Circuit.

March Term, 1950.

Tuesday, April 4, 1950.

Northwestern Public Service Company,
a corporation, Appellant,
No. 13,887. vs.
Montana-Dakota Utilities Co., a Corporation.

Appeal from the United States District Court
for the District of South Dakota.

This cause came on to be heard on the record from the United States District Court for the District of South Dakota, and was argued by counsel.

On Consideration Whereof, It is now here Ordered and Adjudged by this Court that the judgment of the said District Court appealed from in this cause be, and the same is hereby, reversed with costs; and that the Northwestern Public Service Company, a corporation, have and recover against the Montana-Dakota Utilities Co., a corporation, the sum of.....Dollars for its costs in this behalf expended, and have execution therefor.

And it is further Ordered by this Court that this cause be, and the same is hereby, remanded to the said District Court with instructions to dismiss the Complaint.

April 4, 1950.

[fol. 1999] (Stipulation for Release by District Court of Cash Security on Supersedeas and for Stay of Issuance of Mandate to May 15, 1950.)

It is hereby stipulated and agreed by and between the parties hereto, by their attorneys of record herein:

1. That mandate pursuant to judgment entered into by this Court in this cause on April 4, 1950, will be stayed until May 15, 1950, inclusive; provided that if, within such stay there is filed with the Clerk of this Court the certif-

icate of the Clerk of the United States Supreme Court that the petition for certiorari, record and brief have been filed, such stay shall continue until final disposition by the Supreme Court, and nothing herein contained shall be construed to limit the power of the Court of Appeals to grant further stays herein.

2. That the sum of Seven Hundred Eighty Thousand Dollars ($780,000.00), which amount was deposited in cash by appellant with the Clerk of the United States District Court in Sioux Falls on September 22, 1948, pursuant to order entered by that Court on September 20, 1948, fixing the security for stay and supersedeas upon appeal in said amount, shall be released forthwith by said District Court and delivered by it to appellant; and plaintiff-appellee stipulates that although said cash bond is taken down as contemplated by this stipulation, plaintiff-appellee will not levy any execution on the judgment entered in the said District Court on September 15, 1948, unless or until said judgment shall be finally affirmed in whole or in part.

Dated April 15, 1950.

PAT MORRISON,
H. F. FELLOWS,
JOHN C. BENSON,
Attorneys for Appellee.

(Endorsed): Filed in U. S. Court of Appeals, April 17, 1950.

(Order directing District Court to release Cash Security on Supersedeas, etc.)

March Term, 1950.

Monday, April 17, 1950.

Whereas, on September 15, 1948, the United States District Court for the District of South Dakota entered judg-

ment in favor of Montana-Dakota Utilities Co., a corporation, plaintiff-appellee, and against Northwestern Public Service Company, a corporation, defendant-appellant, for the sum of $779,958.30 principal and interest, together with the further sum of $1,781.41, costs and disbursements to be taxed;

Whereas, on September 20, 1948, said District Court entered its order fixing the security for stay and supersedeas upon appeal in the amount of $780,000.00, which amount was deposited in cash by defendant-appellant with the Clerk of said District Court on September 22, 1948;

[fol. 2001] Whereas, upon appeal by defendant-appellant, this Court on April 4, 1950, entered its judgment reversing the aforesaid judgment of said District Court of September 15, 1948, with instructions to dismiss the complaint herein; and

Whereas, the parties hereto have filed with this Court a stipulation dated April 15, 1950, whereby they agree that mandate pursuant to the judgment entered into by this Court in this cause on April 4, 1950, will be stayed until May 15, 1950, pending the preparation by appellee of petition for certiorari to the United States Supreme Court, and that the aforesaid sum of $780,000.00 deposited in cash by defendant-appellant with the Clerk of the said District Court be released by said Court and delivered by it to defendant-appellant;

Now, Therefore, It is hereby ordered and decreed by this Court, that notwithstanding the stay of the mandate, said District Court make an order appropriate under the circumstances and thereby release forthwith to defendant-appellant the sum of Seven Hundred Eighty Thousand Dollars ($780,000.00) which was deposited in cash by defendant-appellant with the Clerk of said Court on September 22, 1948.

April 17, 1950.

[fol. 2002] (Order Staying Issuance of Mandate until May 15, 1950, etc.)

March Term, 1950.

Tuesday, April 25, 1950.

In pursuance of stipulation of parties, the issuance of the mandate of this Court in this cause is hereby stayed until May 15, 1950, and if on or before said date there is filed with the Clerk of this Court a certificate of the Clerk of the Supreme Court of the United States that a petition for writ of certiorari, record and brief have been filed, the stay hereby granted shall continue until the final disposition of the case by the Supreme Court.

April 25, 1950.

[fol. 2003] (Clerk's Certificate.)

United States Court of Appeals

Eighth Circuit

I, E. E. Koch, Clerk of the United States Court of Appeals for the Eighth Circuit, do hereby certify that the foregoing transcript composed of six volumes contains printed record composed of five volumes, Volume I consisting of pages a to 496, inclusive, Volume II consisting of pages 497 to 736, inclusive, Volume III consisting of pages 737 to 1008, inclusive, Volume IV consisting of pages 1009 to 1488, inclusive, and Volume V consisting of pages 1489 to 1984, inclusive, on which the appeal from the United States District Court for the District of South Dakota was heard in said Court of Appeals, and full, true and complete copies of the pleadings, record entries and proceedings, including the opinion, had and filed in the United States Court of Appeals for the Eighth Circuit, composed of one volume, Volume VI, consisting of pages 1985 to 2003, inclusive, except the full captions, titles and endorsements

omitted in pursuance of the rules of the Supreme Court of the United States, in a certain cause in said Court of Appeals wherein Northwestern Public Service Company, a Corporation, was Appellant and Montana-Dakota Utilities Co., a Corporation, was Appellee, No. 13,887.

In Testimony Whereof, I hereunto subscribe my name and affix the seal of the United States Court of Appeals for the Eighth Circuit, at office in the City of St. Louis, Missouri, on the 27th day of April, A. D. 1950.

E. E. KOCH,
Clerk of the United States Court of Appeals for the Eighth Circuit.

(Seal)

[fol. 2004] SUPREME COURT OF THE UNITED STATES, OCTOBER TERM, 1950

No. 77

ORDER ALLOWING CERTIORARI—Filed October 9, 1950

The petition herein for a writ of certiorari to the United States Court of Appeals for the Eighth Circuit is granted.

And it is further ordered that the duly certified copy of the transcript of the proceedings below which accompanied the petition shall be treated as though filed in response to such writ.

PETITION FOR A WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE EIGHTH CIRCUIT, AND SUPPORTING BRIEF.

PETITION.

The petitioner prays that a writ of certiorari issue to review the judgment of the United States Court of Appeals for the Eighth Circuit, entered in this cause (VI,* 1996).

JURISDICTION.

The judgment of the Court of Appeals was entered April 4, 1950.

Jurisdiction to issue the writ rests on Title 28, United States Code, Sec. 1254. See also Sec. 825p of

---

* Roman numerals in parenthesis indicate Record volume.

the Power Act, which gives United States District Courts "exclusive" jurisdiction "of all suits in equity and actions at law brought to enforce any liability or duty created by * * * this chapter," and makes the judgments of the District Courts reviewable by appeal to the Courts of Appeals, and by this Court on certiorari to the Courts of Appeals.

Statement.

This case arises under that part of the Power Act effective August 26, 1935, which gave to the Federal Power Commission authority over the transmission in interstate commerce and the sale at wholesale of electric energy. It involves questions as to the extent of the authority of the Commission to deal with the reasonableness of past rates and charges. The Commission's exclusive authority to fix rates and charges for the future is clear, and as that is a legislative function it cannot be exercised by any court, but Congress deliberately withheld from the Commission the power to grant reparations for past exactions. In that respect the Power Act is unlike the Interstate Commerce Act. The question is whether the Commission has authority to examine and make findings as to the reasonableness of past rates and charges as a basis for recovering in the United States District Court excessive and unreasonably high charges collected or unreasonably low payments made in the past, and whether resort to the Commission to find the facts must be had before resort to the courts.

The action was begun February 3, 1947 (I, 1) in the United States District Court for the District of South Dakota by petitioner as plaintiff, to recover for alleged overcharges by the defendant for services

rendered by it to some corporations to whose rights plaintiff succeeded October 19, 1945, and for underpayments by defendant to the plaintiff's predecessors for electric power transmitted by plaintiff's predecessor corporations and sold to defendant at wholesale for the period from September 1, 1935, to October 19, 1945. The complaint with amendments (I, 1-105, 173-186; V, 1879-1883, 1967-1978) alleged that the rates and charges complained of were unreasonable and therefore unlawful under Sec. 824d(a) of the Power Act, which provides:

> "*Sec. 824d Rates and charges; schedules; suspension of new rates.*—(a) All rates and charges made, demanded, or received by any public utility for or in connection with the transmission or sale of electric energy subject to the jurisdiction of the Commission, and all rules and regulations affecting or pertaining to such rates or charges shall be just and reasonable, and any such rate or charge that is not just and reasonable is hereby declared to be unlawful."

Involving, as the plaintiff's claim did, the reasonableness of charges for a past period, the defendant moved (I, 106) in the District Court to dismiss the case for want of "jurisdiction" asserting that the Power Commission has not only "primary" but exclusive jurisdiction to pass on the question of reasonableness of rates and consequently the District Court could not entertain an action which required it to determine the reasonableness of past rates; and that the plaintiff had not first exhausted its administrative remedies by applying to the Power Commission for relief (III, 995).

The District Court refused to dismiss (I, 112) hold-

ing that Congress had not given any power to the Commission to determine the reasonableness of past rates or grant reparations, but only to fix future rates and that the Power Act did not divest the District Courts of their jurisdiction granted by Title 28, Sec. 41, U. S. C. (now United States Code, Secs. 1331, 1337), over cases arising under laws of the United States. It then proceeded to trial on the merits without a jury, made findings (V, 1930-1965) and entered judgment for the principal sum of $556,120.76, together with interest to date of trial, making a total of $779,958.30 (V, 1965).

As the transactions between the corporations were at wholesale and required physical connections between their lines for interchange of electric energy, the rates and charges involved were fixed in contracts between them and did not affect other persons or corporations, and after the Power Act took effect August 26, 1935, the parties adopted the practice of filing these contracts with the Commission to disclose the rates and charges. The case is peculiar in that it involves not only unreasonably high charges by defendant for services it rendered, but unreasonably low rates paid by defendant for electric energy delivered to defendant. Although the contracts provided for the same price per kilowatt for electric energy whichever way it flowed, the amount of energy delivered to defendant was larger than what flowed the other way, and the largest item of recovery in the case was because of that.

On appeal by the defendant the Court of Appeals, without passing on the merits, held that the Power Act gave to the Commission primary and exclusive jurisdiction over the question of reasonableness of the rates, both past and future, and also that the plaintiff had not exhausted its administrative remedies

by applying to the Commission for relief, and reversed the judgment and ordered the District Court to dismiss the case.

It was charged in the complaint, and the District Court found, that the petitioner's predecessor corporations (to whose rights the plaintiff succeeded on October 19, 1945) (I, 12) had been dominated by officers and a board of directors who were also the officers and directors of the defendant during the period from 1935 to October 1945, and it was by means of that domination that plaintiff's predecessors in interest had been overreached by the defendant and subjected to unreasonable rates and charges. That domination had also the effect of preventing those predecessors from taking any steps for relief before the Commission or otherwise until the acquisition by petitioner in October 1945 of the assets of the predecessors vested the claims asserted in the complaint in a free agent with a new management and an independent board of directors, in a position to resort to either the Commission or the courts for such relief as either could grant.

The petitioner on August 12, 1946, filed a complaint with the Commission charging the existing rates to be unreasonable and asked for new rates *for the future* (I, 149). The complaint never came to a hearing because new schedules acceptable to the plaintiff were filed and the Commission then dismissed the complaint as moot (V, 1876) saying:

> "(e) By the terms of the agreement filed August 20, 1947, the issues involved in the complaint, as amended, have become merely moot and the public interest will be served by dismissing the same."

The petitioner did not then or since ask the Commission for any relief or action as to the unreasonable rates and charges in force from 1935 to 1945. The Commission had already conceded it had no power to grant reparations. *Mississippi Power and Light Co.* v. *Memphis Natural Gas Co.*, 162 F. (2d) 388, 389; *Cleveland and Akron* v. *Hope Natural Gas Co.*, 44 P. U. R. (N. S.) 1, 33; *Hope Natural Gas Co.* v. *Federal Power Commission*, 134 F. (2d) 287, 310-311 (1943) s. c. 320 U. S. 591, 618, January 3, 1944.

In the *Memphis* case the Commission had also held it was without authority to make findings as to past rates for use in an action to recover reparations pending in a District Court.

In the *Hope* case this Court said (p. 618):

> "It is conceded that under the Act, the Commission has no power to make reparation orders. And its power to fix rates admittedly is limited to those 'to be thereafter observed and in force.' § 5 (a). But the Commission maintains that it has the power to make findings as to the lawfulness of past rates even though it has no power to fix those rates. However that may be, we do not think that these findings were reviewable under § 19 (b) of the Act." That section provided for review by a Court of Appeals of "orders".

The United States Court of Appeals for the Fourth Circuit had held in *Hope Natural Gas Co.* v. *Federal Power Commission*, 134 F. (2d) 287, that under the Natural Gas Act, which is substantially identical with subchapter II of the Power Act in the respects here pertinent (see Section 717c, 717d, Natural Gas Act,

15 U. S. Code, Chapter 15B) the Power Commission not only had no authority to grant reparation orders, but had no authority to examine into the reasonableness of past rates or make findings on that question. The obvious course for the petitioner was to resort to the United States District Court which under Section 825p is given "exclusive" jurisdiction (thus eliminating resort to state courts) of all controversies under the Power Act, excepting review of "orders" which are taken directly to the United States Court of Appeals for review [Section 825l (b)].

The Statutes.

The pertinent part of the Federal Power Act is subchapter II which became effective August 26, 1935 (16 U. S. C. A. § 824, *et seq.*). Section 824 (b) is as follows:

> "The provisions of sections 824-824h of this title shall apply to the transmission of electric energy in interstate commerce and to the sale of electric energy at wholesale in interstate commerce, but shall not apply to any other sale of electric energy" etc.

Section 824 (d) reads:

> "The term 'sale of electric energy at wholesale' when used in sections 824-824h of this title means a sale of electric energy to any person for resale."

Section 824d is as follows:

> "*Sec. 824d Rates and charges; schedules; suspension of new rates.*—(a) All rates and charges made, demanded, or received by any public utility

for or in connection with the transmission or sale of electric energy subject to the jurisdiction of the Commission, and all rules and regulations affecting or pertaining to such rates or charges *shall be just and reasonable, and any such rate or charge that is not just and reasonable is hereby declared to be unlawful.*

(b) No public utility shall, with respect to any transmission or sale subject to the jurisdiction of the Commission, (1) make or grant any undue preference or advantage to any person or subject any person to any undue prejudice or disadvantage, or (2) maintain any unreasonable difference in rates, charges, service, facilities, or in any other respect, either as between localities or as between classes of service.

(c) Under such rules and regulations as the Commission may prescribe, every public utility shall file with the Commission, within such time and in such form as the Commission may designate, and shall keep open in convenient form and place for public inspection schedules showing all rates and charges for any transmission or sale subject to the jurisdiction of the Commission, and the classifications, practices, and regulations affecting such rates and charges, together with all contracts which in any manner affect or relate to such rates, charges, classifications, and services.

(d) Unless the Commission otherwise orders, no change shall be made by any public utility in any such rate, charge, classification, or service, or in any rule, regulation, or contract relating thereto, except after thirty days' notice to the Commission and to the public. Such notice shall

be given by filing with the Commission and keeping open for public inspection new schedules stating plainly the change or changes to be made in the schedule or schedules then in force and the time when the change or changes will go into effect. The Commission, for good cause shown, may allow changes to take effect without requiring the thirty days' notice herein provided for by an order specifying the changes so to be made and the time when they shall take effect and the manner in which they shall be filed and published.

(e) Whenever any such new schedule is filed the Commission shall have authority, either upon complaint or upon its own initiative without complaint, at once, and, if it so orders, without answer or formal pleading by the public utility, but upon reasonable notice, to enter upon a hearing concerning the lawfulness of such rate, charge, classification, or service; and, pending such hearing and the decision thereon, the Commission, upon filing with such schedules and delivering to the public utility affected thereby a statement in writing of its reasons for such suspension, may suspend the operation of such schedule and defer the use of such rate, charge, classification, or service, but not for a longer period than five months beyond the time when it would otherwise go into effect; and after full hearings, either completed before or after the rate, charge, classification, or service goes into effect, the Commission may make such orders with reference thereto as would be proper in a proceeding initiated after it had become effective. If the proceeding has not been concluded and an order made at the expiration of such five months, the proposed change

of rate, charge, classification, or service shall go into effect at the end of such period, but in case of a proposed increased rate or charge, the Commission may by order require the interested public utility or public utilities to keep accurate account in detail of all amounts received by reason of such increase, specifying by whom and in whose behalf such amounts are paid, and upon completion of the hearing and decision *may by further order require such public utility or public utilities to refund, with interest, to the persons in whose behalf such amounts were paid, such portion of such increased rates or charges as by its decision shall be found not justified.* At any hearing involving a rate or charge sought to be increased, the burden of proof to show that the increased rate or charge is just and reasonable shall be upon the public utility, and the Commission shall give to the hearing and decision of such questions preference over other questions pending before it and decide the same as speedily as possible. (June 10, 1920, c. 285, § 205, as added Aug. 26, 1935, c. 687, § 213, 49 Stat. 851.)"

Section 824e is as follows:

"*Sec. 824e Power of Commission to fix rates and charges; determination of cost of production or transmission.*—(a) Whenever the Commission, after a hearing had upon its own motion or upon complaint, shall find that any rate, charge or classification, *demanded, observed, charged, or collected by* any public utility for any transmission or sale subject to the jurisdiction of the Commission, or that any rule, regulation, practice, or contract affecting such rate, charge or

classification *is unjust, unreasonable, unduly discriminatory* or preferential, the Commission shall determine the just and reasonable rate, charge, classification, rule, regulation, practice, or contract *to be thereafter observed and in force, and shall fix the same by order.*

(b) The Commission upon its own motion, or upon the request of any State commission whenever it can do so without prejudice to the efficient and proper conduct of its affairs, may investigate and determine the cost of the production or transmission of electric energy by means of facilities under the jurisdiction of the Commission in cases where the Commission has no authority to establish a rate governing the sale of such energy. (June 10, 1920, c. 285, § 206, as added Aug. 26, 1935, c. 687, § 213, 49 Stat. 852.)" [All italics supplied.]

It should be noted that when the bill for subchapter II of the Power Act was pending in the Congress it contained provisions (similar to those in the Acts applicable to the Interstate Commerce Commission) authorizing the Power Commission to consider the reasonableness of past rates and to make reparation orders. Those provisions were stricken out in committee. See *Hope Natural Gas Co. v. Federal Power Commission,* 134 F. (2d) 287, at page 310, where the Court said:

"It is to be noted that in the passage of the Public Utility Holding Company Act of 1935, 15 U. S. C. A. § 79 *et seq.*, upon which the Natural Gas Act is modeled, provisions giving the Commission power to investigate single rates and is-

sue reparation orders, originally incorporated in the bill, were stricken out, the Senate Committee saying in its report: 'They are appropriate sections for a state utility law, but the committee does not consider them applicable to one governing merely wholesale transactions'. The Commission may not by administrative interpretation of the act thus clothe itself with a power denied it by Congress."

Title 28, § 41, U. S. C. (now Title 28 United States Code Sections 1331, 1337), defining the jurisdiction of the United States District Courts, provided:

"The district courts shall have original jurisdiction as follows: * * *

First. Of all suits of a civil nature, at common law or in equity, * * * where the matter in controversy exceeds, exclusive of interest and costs, the sum or value of $3,000, and (a) arises under the Constitution or laws of the United States, * * *.

* * * * *

Eighth. Of all suits and proceedings arising under any law regulating commerce."

Section 825p of the Power Act is as follows:

"*Sec. 825p Jurisdiction of offenses; enforcement of liabilities and duties.*—The District Courts of the United States, the District Court of the United States for the District of Columbia, and the United States courts of any Territory or other place subject to the jurisdiction of the United States shall have exclusive jurisdiction of violations of this chapter or the rules, regulations, and orders thereunder, and of all suits in

equity and actions at law brought to enforce any liability or duty created by, or to enjoin any violation of, this chapter or any rule, regulation, or order thereunder. Any criminal proceeding shall be brought in the district wherein any act or transaction constituting the violation occurred. Any suit or action to enforce any liability or duty created by, or to enjoin any violation of, this chapter or any rule, regulation, or order thereunder may be brought in any such district or in the district wherein the defendant is an inhabitant, and process in such cases may be served wherever the defendant may be found. Judgments and decrees so rendered shall be subject to review as provided in sections 225 and 347 of Title 28. No costs shall be assessed against the Commission in any judicial proceeding by or against the Commission under this chapter. (June 10, 1920, c. 285, § 317, as added Aug. 26, 1935, c. 687, § 213, 49 Stat. 862.)"

This section seems to confirm jurisdiction of cases like this to the United States District Courts, to the exclusion of state courts, leaving Commission orders to be taken direct to the Courts of Appeals for review.

Questions Presented.

1. Has the Federal Power Commission primary jurisdiction, or indeed any jurisdiction, to consider and determine the reasonableness of rates exacted and collected in the past, or to do more than exercise the legislative power to fix rates for the future?

2. Had the plaintiff any administrative remedy before the Commission? Has the Commission any

authority to consider a complaint as to the unreasonableness of past rates, or grant reparations, or even to make any findings as to past rates, as an aid to the courts before which a claim for reparations is made?

3. Conceding that Sec. 824d(e) of the Power Act does give an administrative remedy to a corporation which is a free agent to attack unreasonable rates and prevent their becoming effective if its complaint is filed before the rates take effect, do not facts alleged and found by the District Court—viz., that the plaintiff's predecessors were helpless because of the domination over them by the defendant as a result of which the preventive remedy under 824d(e) was lost—have the effect of relieving the plaintiff of the application of the rule requiring exhaustion of administrative remedies?

Specification of Errors.

The Court below erred:

1. In holding that the District Court was without jurisdiction;

2. In holding that the Power Act gives jurisdiction to the Power Commission to determine the reasonableness of past rates and charges and denies to the District Court jurisdiction to entertain this action, in which a determination of the reasonableness of past rates is necessary to the granting of relief;

3. In applying to the facts of this case the rule that judicial relief may not be obtained until the prescribed administrative remedies have been exhausted;

4. In holding that any administrative remedy was available to the petitioner, and in ignoring the findings of the Trial Court that the petitioner's predecessors were from 1935 to 1945 under the domination of the defendant and therefore unable to resort to the Commission before the rates became effective, to prevent their taking effect;

5. In holding, in effect, that the petitioner can have no relief in any tribunal since the Commission may only exercise the legislative power to fix future rates, and the courts are without jurisdiction because they are forbidden by the Power Act to consider or determine the reasonableness of past rates although that is a judicial question.

Reasons for Granting the Writ.

1. There is a conflict between the decision of the United States Court of Appeals for the Eighth Circuit in this case and the decision of the United States Court of Appeals for the Fourth Circuit in *Hope Natural Gas Co.* v. *Federal Power Commission*, 134 F. (2d) 287, decided February 16, 1943.

The *Hope* case arose under the Natural Gas Act (15 U. S. Code, Chapter 15B; Act of June 21, 1938, 52 Stat. 821, as amended), but that statute relating to natural gas and the Power Act relating to electric energy are identical in the respects pertinent here. Secs. 717c and 717d of the Gas Act are identical with Secs. 824d and 824e of the Power Act, except that one deals with the sale of natural gas at wholesale, and the other with sales of electric energy at wholesale. Thus decisions under the Natural Gas Act on the questions presented here as to powers of the

Commission are authorities on the interpretation of the Power Act.

In the *Hope* case in the Fourth Circuit the Power Commission, on complaint filed *after* the rates in question had taken effect, entered an order May 26, 1942, fixing *future* rates effective July 1, 1942, for sales of gas at wholesale by Hope to East Ohio Gas Company, but at the same time it made findings that the past wholesale rates charged by Hope to East Ohio Gas Company since June 30, 1939, had been unreasonable and found what would have been reasonable rates for the past period. The Commission had said, "The Commission does not have the authority to fix rates for the past and to award reparations" but asserted authority to make findings as to past rates "as an aid to state regulation," it appearing that the Ohio State Commission was considering the reasonableness of the retail rates being charged by the East Ohio Gas Company, a wholesale buyer from Hope.

Sec. 717d(b) of the Gas Act (identical with Sec. 824e(b) of the Power Act) which is the only provision in either Act giving the Power Commission authority to make findings "in aid" of any other agency or tribunal is as follows:

> "(b) The Commission upon its own motion, or upon the request of any State Commission, whenever it can do so without prejudice to the efficient and proper conduct of its affairs, may investigate and determine the cost of the production or transportation of natural gas by a natural-gas company in cases where the Commission has no authority to establish a rate governing the transportation or sale of such natural gas. (June 21, 1938, c. 556, § 5, 52 Stat. 823.)"

That section limits the Commission "in aid" of a state commission to ascertaining "cost of production or transportation" which are only two of the pertinent factors in determining the reasonableness of rates.

The Fourth Circuit Court held (134 F. (2d) 287, pp. 309-311) that the Commission lacked authority to make findings as to the reasonableness of past rates. It said:

> "The Natural Gas Act shows clearly that it was the intention of Congress to give the Commission quasi-legislative power, i. e. regulatory power as to future rates; but there is no indication of any intention to clothe it with judicial or quasi-judicial powers with respect to past charges or practices, such as was vested in the Interstate Commerce Commission by section 9 of the Interstate Commerce Act."

For the convenience of this Court the pertinent portions of the Power Commission's opinion in the *Hope* case are quoted in the appendix to this petition (*Cleveland and Akron* v. *Hope Natural Gas Co.*, 44 P. U. R. (N. S.) pp. 33-34).

It will be observed that the arguments of the Commission based on general provisions of the Natural Gas Act (Sec. 14a and Sec. 16) rejected by the Fourth Circuit are accepted by the Eighth Circuit in the present case in respect of like provisions of the Power Act. The *Hope* case reached this Court (*Federal Power Commission* v. *Hope Natural Gas Co.*, 320 U. S. 591, decided January 4, 1944) and was reversed on other grounds, but as to findings of the Commission

"in aid" of the Ohio Commission this Court said (pp. 618-619):

> "*Findings as to the Lawfulness of Past Rates.* As we have noted, the Commission made certain findings as to the lawfulness of past rates which Hope had charged its interstate customers. Those findings were made on the complaint of the City of Cleveland and in aid of state regulation. It is conceded that under the Act the Commission has no power to make reparation orders. And its power to fix rates admittedly is limited to those 'to be thereafter observed and in force.' § 5 (a). But the Commission maintains that it has the power to make findings as to the lawfulness of past rates even though it has no power to fix those rates. However that may be, we do not think that these findings were reviewable under § 19 (b) of the Act. That section gives any party 'aggrieved by an order' of the Commission a review 'of such order' in the circuit court of appeals for the circuit where the natural gas company is located or has its principal place of business or in the United States Court of Appeals for the District of Columbia. We do not think that the findings in question fall within that category.
>
> The Court recently summarized the various types of administrative action or determination reviewable as orders under the Urgent Deficiencies Act of October 22, 1913, 28 U. S. C. §§ 45, 47a, and kindred statutory provisions. *Rochester Telephone Corp.* v. *United States*, 307 U. S. 125. It was there pointed out that where "the order sought to be reviewed does not of itself adversely affect complainant but only affects his rights ad-

versely on the contingency of future administrative action,' it is not reviewable. *Id.*, p. 130. The Court said, 'In view of traditional conceptions of federal judicial power, resort to the courts in these situations is either premature or wholly beyond their province.' *Id.*, p. 130. And see *United States* v. *Los Angeles & Salt Lake R. Co.*, 273 U. S. 299, 309, 310; *Shannahan* v. *United States*, 303 U. S. 596. These considerations are apposite here. The Commission has no authority to enforce these findings. They are 'the exercise solely of the function of investigation.' *United States* v. *Los Angeles & Salt Lake R. Co.*, *supra*, p. 310. They are only a preliminary, interim step towards possible future action—action not by the Commission but by wholly independent agencies. The outcome of those proceedings may turn on factors other than these findings. These findings may never result in the respondent feeling the pinch of administrative action."

2. The Court below has decided an important question of federal law which has not been but should be settled by this Court. When this action was begun, the admission by the Power Commission that it had no authority to make reparation orders and the opinion of the Fourth Circuit in the *Hope* case that the Commission's authority was limited to the legislative function of fixing future rates and could not make findings as to the reasonableness of past rates, and the refusal of the Commission in 1945 in *Mississippi Power and Light Co.* v. *Memphis Natural Gas Co.*, *supra*, to make findings as to the reasonableness of past rates, to aid a District Court in a pending action for recovery of unreasonable charges (one of

the grounds assigned for refusal being its lack of power), pointed to the District Court as the only tribunal which could give the relief sought. After following that course, petitioner is now confronted with the Eighth Circuit decision that it took the wrong route. Although cases of this sort may not be frequent, litigants ought not to be left in a position to fall between two stools, and the law should be settled.

SUPPORTING BRIEF.

Opinions Below.

The opinion of the Court of Appeals (VI, 1987) has not been reported.

The oral opinion of the District Court (V, 1883) is not reported. Its findings are in V, 1930.

Statement.

No question of the merits is before this Court, but only the question of jurisdiction of the District Court, or to put it in another way the questions here are whether the Power Act divests the District Court of any power to consider or make findings as to the reasonableness of past rates, and whether the case is one for application of the rule that judicial relief will not be allowed until the plaintiff has exhausted his administrative powers.

The question is not whether the Power Act grants to the District Court jurisdiction, but whether it takes away or limits jurisdiction. The complaint charged and the Trial Court found that the rates charged were unreasonable and a violation of Section 824d of the Power Act, which provides that all unreasonable rates and charges are unlawful. That is a claim arising under the laws of the United States of which the District Court had original jurisdiction by virtue of what was, prior to September 1, 1948, Title 28, § 41(1) United States Code, and is now Title 28 United States Code, Section 1331, unless the Power

Act withdrew it. Section 825p of the Power Act (p. 12 of the petition) confirmed that jurisdiction, but went further and gave the District Courts "exclusive" jurisdiction of controversies under the Power Act, thus eliminating state courts.

For the purposes of this petition this Court has to assume that the evidence established and the District Court was justified in finding that the rates from 1935 to 1945 were unreasonable, and also that the petitioner's predecessor corporations were under the complete domination of the defendant, and that it was by means of that domination that there was no opportunity to apply to the Commission under Section 824d(e) of the Power Act for preventive relief to prevent the unreasonable rates from going into effect. For the same reason there was no opportunity to apply to the Commission to alter the rates for the future, until after October 19, 1945, when the petitioner acquired its predecessors and a new management was installed.

The evidence about corporate domination not only bears on the questions of constructive fraud and reasonableness of charges, and the burden of proof on that point, but also established a complete excuse to the aggrieved corporations for not applying to the Commission for relief before the rates and charges became effective.

Analysis of the Power Act.

Section 824d, subdivision (e), states that whenever any new schedule is filed then upon complaint or on its own motion the Commission may investigate the reasonableness of the proposed rates, and may stay their effectiveness for not more than five months. If the

proceeding has not been concluded and an order made at the expiration of said five months, the rates shall go into effect, but the Commission's order, if it finds the proposed rates too high, may require a refund for the period back to the date the rates took effect.

That section obviously relates to complaints filed *before* the proposed rates take effect, and in such cases allows a reparation order to a limited extent.

Section 824e relates to the power of the Commission on complaint filed *after* the rate takes effect, and in such case the Commission is limited to the determination of

> "the just and reasonable rate, charge, classification, rule, regulation, practice, or contract *to be thereafter observed and in force.*"

In this connection it should be noted that the provisions in the original bill to consider rates and charges collected in the past and make findings as a basis for reparation were stricken from the bill by the Senate Committee on Interstate Commerce.

There is no other provision in the Power Act which supports the view that the Commission may deal with past rates and charges. There is none which authorizes the Commission to examine into the reasonableness of past charges and make findings to bind or in order to aid a District Court when granting recovery for past unreasonable charges.

It thus appears that the Power Act limits the authority of the Commission, first, to preventing unreasonable rates from taking effect where complaint is made before they take effect; or, second, to fixing new rates for the future where the rates are assailed after they take effect.

In its opinion in the *Hope* case the Power Commission, claiming the power to make findings as to the reasonableness of past charges, said:

> "The Interstate Commerce Commission has furnished precedents for the performance of this public duty."

The Interstate Commerce Commission has not only express power to examine past charges and order reparations, but it has expressly been given authority to make findings as an aid to other agencies. Even the Mediation Board under the Railway Labor Act may apply to and obtain from the Interstate Commerce Commission findings for use in a labor dispute. *Shields* v. *Utah Idaho Railway,* 305 U. S. 177. See also *United States* v. *Interstate Commerce Commission,* 337 U. S. 427, pp. 464-6, as to staying action in the District Court to await findings by the Interstate Commerce Commission.

There is no provision in the Power Act (or the Gas Act) which even suggests that a person aggrieved by the imposition in the past of unreasonable charges may apply to the Commission for findings before bringing action in the District Court, or after action is begun may apply to the Commission for findings while the action is meanwhile stayed by the Court.

Section 824e(b) of the Power Act states that the Power Commission, on request of a state commission, and if not too busy, may determine the cost of production or transmission of electric energy in cases where the Power Commission has no authority to establish a rate, but a person subjected to an unreasonable rate has no right to make such an application, and the findings to be made are as to only one factor affecting the reasonableness of rates, and as to the *present* cost

of production as an aid to the state commission fixing future retail rates.

The Court below quotes Section 825f of the Power Act, and Section 825h—one giving investigative power, and the other giving it power to make, amend and rescind orders—as authority for its conclusion that jurisdiction in such a controversy as this to investigate fraud practiced by an electric public utility in the past, is vested not in the District Court but in the Commission.

Those sections of the Power Act are identical with Section 717m(a) (§ 14, ch. 556, Act of June 21, 1938), and Section 717o (§ 116, ch. 556, Act of June 21, 1938) of the Natural Gas Act, and which were relied on by the Commission in the *Hope* case to support its claim to authority equal to that of the Interstate Commerce Commission, and which the Court of Appeals of the Fourth Circuit in the *Hope* case carefully analyzed and rejected as a basis for any authority of the Power Commission to make findings as to past rates.

If the Power Commission lacks authority to investigate and make findings on the reasonableness of past rates as a basis for reparation orders, the conclusion of the Court below that it may do so, if the imposition of unreasonable rates was achieved by fraud, seems to be without basis.

The fraud question is not one with which a Commission is especially equipped to deal.

The opinion of the Court below is not very informative. Its general conclusion was that the Commission has exclusive jurisdiction to pass on the reasonableness of rates, past as well as future, and an action to recover damages for unreasonable past charges cannot be maintained or even begun until the Commission has exercised that function. It fails to point out spe-

cifically a provision of the statute which is to be followed, or anything in the statute as to the effect of the findings or as to whether the complaint to the Commission may be made after action is begun in court, or must be made before action, with assurance to the Commission that complainant intends to sue.

As to "exhausting" administrative remedies, the opinion fails to state just what administrative remedy the petitioner had or how to proceed to obtain it after October 19, 1945. It does not discuss the question as to the preventive remedy under Section 824d by complaint to the Commission before rates become effective, nor does it mention the question whether the domination by defendant excused the injured corporations from proceeding under 824d.

In *Civil Aeronautics Board* v. *Modern Air Transport,* 179 F. (2d) 622, it was said that the rule requiring exhaustion of administrative remedies "serves only to prevent private litigants from attempting to oust administrative bodies from the exercise of adjudication properly committed to them." If there is no administrative remedy, resort may be had to the courts. *Steele* v. *L. & N. Railroad,* 323 U. S. 192.

The opinion below also states that the rates charged and paid were "approved for filing" by the Commission. The record shows that the Commission never approved anything. It has never to this day considered or examined into the question of reasonableness of any rate here involved. It did not even do that when petitioner applied to it to alter rates for the future, because the defendant consented to new rates with which the petitioner was satisfied. The statute does not require any approval by the Commission for the filing of rate schedules. The Commission made some

orders purporting to give a retroactive effect to contracts, the filing of which had been delayed. In one of those orders it said:

> "Nothing contained in this order shall be construed as constituting approval by this Commission of any service, rate, provision, or condition contained in the contract referred to herein" (I, 111).

In the Court below the petitioner was confronted with an argument by the Commission (*amicus*) that under the law the petitioner was conclusively bound by the filed rates, and could not attack them or question their reasonableness. Many cases were cited arising under the Interstate Commerce Act and other regulatory statutes that where a rate schedule has been duly filed and has taken effect, the utility must collect and the shipper or customer must pay the scheduled rates. That is to prevent discrimination and rebating. Those cases do not hold that such rates are conclusively reasonable and unimpeachable, but merely that they must be collected and paid in the first instance, subject to correction or reparation by the tribunals having jurisdiction of such claims. The Power Commission itself said in the *Hope* case, 44 P. U. R. (N. S.) 33:

> "The acceptance of a rate for filing does not mean that the Commission approves it and does not establish the justness or reasonableness of the rate. *Re Home Gas Co.*, 39 P. U. R. (N. S.) 102, 109."

Section 824d(a) of the Power Act states that all rates and charges "made, demanded or received" shall be reasonable and 'any such rate or charge

that is not just and reasonable is hereby declared to be unlawful." That applies to rates filed. The filed rate must be collected and paid in the first instance, but is subject to impeachment by proceeding brought for that purpose.

The Petitioner Had No Interest in Bypassing the Commission on the Issue as to Reasonableness of Past Rates.

There is nothing in the record to suggest that the petitioner desired to avoid the Power Commission. Confronted with the decision of the Fourth Circuit in the *Hope* case, the legislative history of the Power Act, the fact that this Court in the *Hope* case had not decided the question of the Commission's power over reasonableness of past rates, and the fact that the Commission itself had repeatedly denied its authority (see, *Mississippi Power and Light Co.* v. *Memphis Natural Gas Co.*, 162 F. (2d) 388), and the state of the law generally, it was forced to make a decision on the proper interpretation of the Power Act, and on the course to be followed. We believe its decision was right. If the petitioner had applied to the Commission for findings as to the reasonableness of past rates, and the Commission had accepted jurisdiction and made findings, and those findings had been presented to the District Court to control its judgment as the only evidence required or permitted on the question of fact, it would now be confronted with the claim that the Commission was without authority to make the findings and the judgment should be for the defendant because of failure of proof.

The Senate Committee on Interstate Commerce, when striking from the bill for the Power Act all

provisions giving the Commission power to award reparations or to make findings as a prelude to judicial recovery of unreasonable charges paid in the past, assumed that as the bill related only to transactions at wholesale and only utility corporations were affected, such concerns, well informed and equipped to do so, could and would object to proposed rates promptly after their filing and before they took effect, and in that way avoid the necessity of providing for reparations. The Committee's assumption was sound enough as to cases where a corporation threatened by proposed unreasonable rates is a *free agent* and is not deterred for one reason or another from promptly applying for preventive relief.

In such a case it might well be concluded that if a corporation chooses not to complain to the Power Commission before the rates become effective and waits until they have been in force, it has waived the preventive remedy under Section 824d(e) and is thus limited to asking for an order fixing reasonable rates for the future under Section 824e. See, *Mississippi Power and Light Co.* v. *Memphis Natural Gas Co.*, 162 F. (2d) 388. There the action involved a claim for unreasonable charges in the past. During the pendency of the action Mississippi on April 11, 1945, filed with the Power Commission a complaint asking it to determine "the just and reasonable rate for gas delivered at the City gate by Memphis to Mississippi between June 21, 1938, and July 26, 1943, fixing the same by order." The Commission held it was without authority to grant the relief requested because of want of power, with the added ground that the complainant had failed to ask for preventive relief when the schedule was filed. Experience has shown that the committee's assumption has not been justified,

and the Power Commission thinks it should have powers similar to those of the Interstate Commerce Commission to consider the reasonableness of past rates and award reparations, or at least have primary jurisdiction to make findings binding on the courts in actions to recover for past transactions.

When the petitioner in 1946 applied to the Commission to alter the rates for the future, there was no good reason why it should not also have asked for reparations for the past if the Power Act provided for that. A trial of the issue of reasonableness of rates in court is a more difficult undertaking than one before a commission. We do not disagree with the Commission as to the propriety of granting it power so that the question of reasonableness of rates, past or present, should be tried before administrative commissions rather than courts. One reason for vesting in a single administrative commission primary jurisdiction over the issue of reasonableness of rates is to establish uniformity and prevent discrimination. See, *Great Northern Railway* v. *Merchants Elevator Co.*, 259 U. S. 285. That reason is of minor importance here, where the statute only applies to wholesale transactions and few persons are involved. The other reason for the administrative jurisdiction is to relieve the courts of the burden of dealing with the question of reasonable rates. The petitioner had no reason to object to that if the Power Act had offered an administrative remedy.

Our complaint about the Commission would be that, wanting those powers, it should have applied to Congress for an amendment to the statute instead of trying to gain those powers by straining the statute

beyond the breaking point, in the course of which it has twice shifted its position. If the decision below stands the petitioner will be left at this date without any remedy. An interpretation of the Power Act having that result should not be accepted if it may be avoided. *Ubi jus ibi remedium. Texas & Pacific Railway Co.* v. *Rigsby,* 241 U. S. 33.

The writ should issue.

APPENDIX.

Cleveland and Akron v. *Hope Natural Gas Co.*, 44 Pub. Utilities Rep. (New Series) pp. 34-35.

"* * * Originally the city of Cleveland requested this Commission to find the lawful Hope-East Ohio rates since June 21, 1938, but it now represents that the subject is idle for rates prior to June 30, 1939, because those rates which Cleveland consumers were obligated to pay East Ohio have been settled. The Commission does not have the authority to fix rates for the past and to award reparations. But Congress did empower and instruct the Commission in § 5(a) of the Natural Gas Act, 15 USCA § 717d(a), to fix future rates, and as a step in that process we must necessarily consider the reasonableness of past and existing rates. When the issue is raised and the public interest will be served, we consider as a necessary part of that duty the power to examine the entire rate problem involved and to determine what rates were lawful in the past. Also, § 14(a) of the act, 15 USCA § 717m(a), authorizes the Commission to investigate any facts which it finds necessary in order to determine whether Hope has violated any provision of the Natural Gas Act. Furthermore, the Commission has power to perform any act, pursuant to § 16, 15 USCA § 717o, which is necessary or appropriate to carry out the provisions of the act. Under § 4(a) of the Act, 15 USCA § 717c(a), any interstate wholesale rate that is not just and reasonable is unlawful. *Federal Power Commission* v. *Natural Gas Pipeline Co. supra* [(1942) 315 U. S. 575, 86 L ed , 42 PUR(NS) 129, 62 S Ct 736] Hope's

rate collected from East Ohio Gas Company was lawful after June 21, 1938, the effective date of the act, only to the extent that it was just and reasonable. The city of Cleveland states that the Ohio Commission is investigating the reasonableness of the East Ohio Gas Company's bonded retail rates in Cleveland for the period since June 30, 1939, and that the lawfulness of Hope's rate is an important factor in the case. Since the enactment of the 1938 Natural Gas Act this Commission has had exclusive jurisdiction to determine the lawfulness of the interstate wholesale rates charged by Hope and other natural gas companies.

In response to the request of the city of Cleveland, the Commission will make the appropriate findings of fact as to the lawfulness of the rates charged East Ohio by Hope since June 30, 1939. The Interstate Commerce Commission has furnished precedents for the performance of this public duty. Congress intended that this Commission cooperate with state Commissions and municipalities, and the provisions of §§ 5(b) and 17 are special evidence of such intent."

Supreme Court of the United States

OCTOBER TERM, 1950.

No. 77.

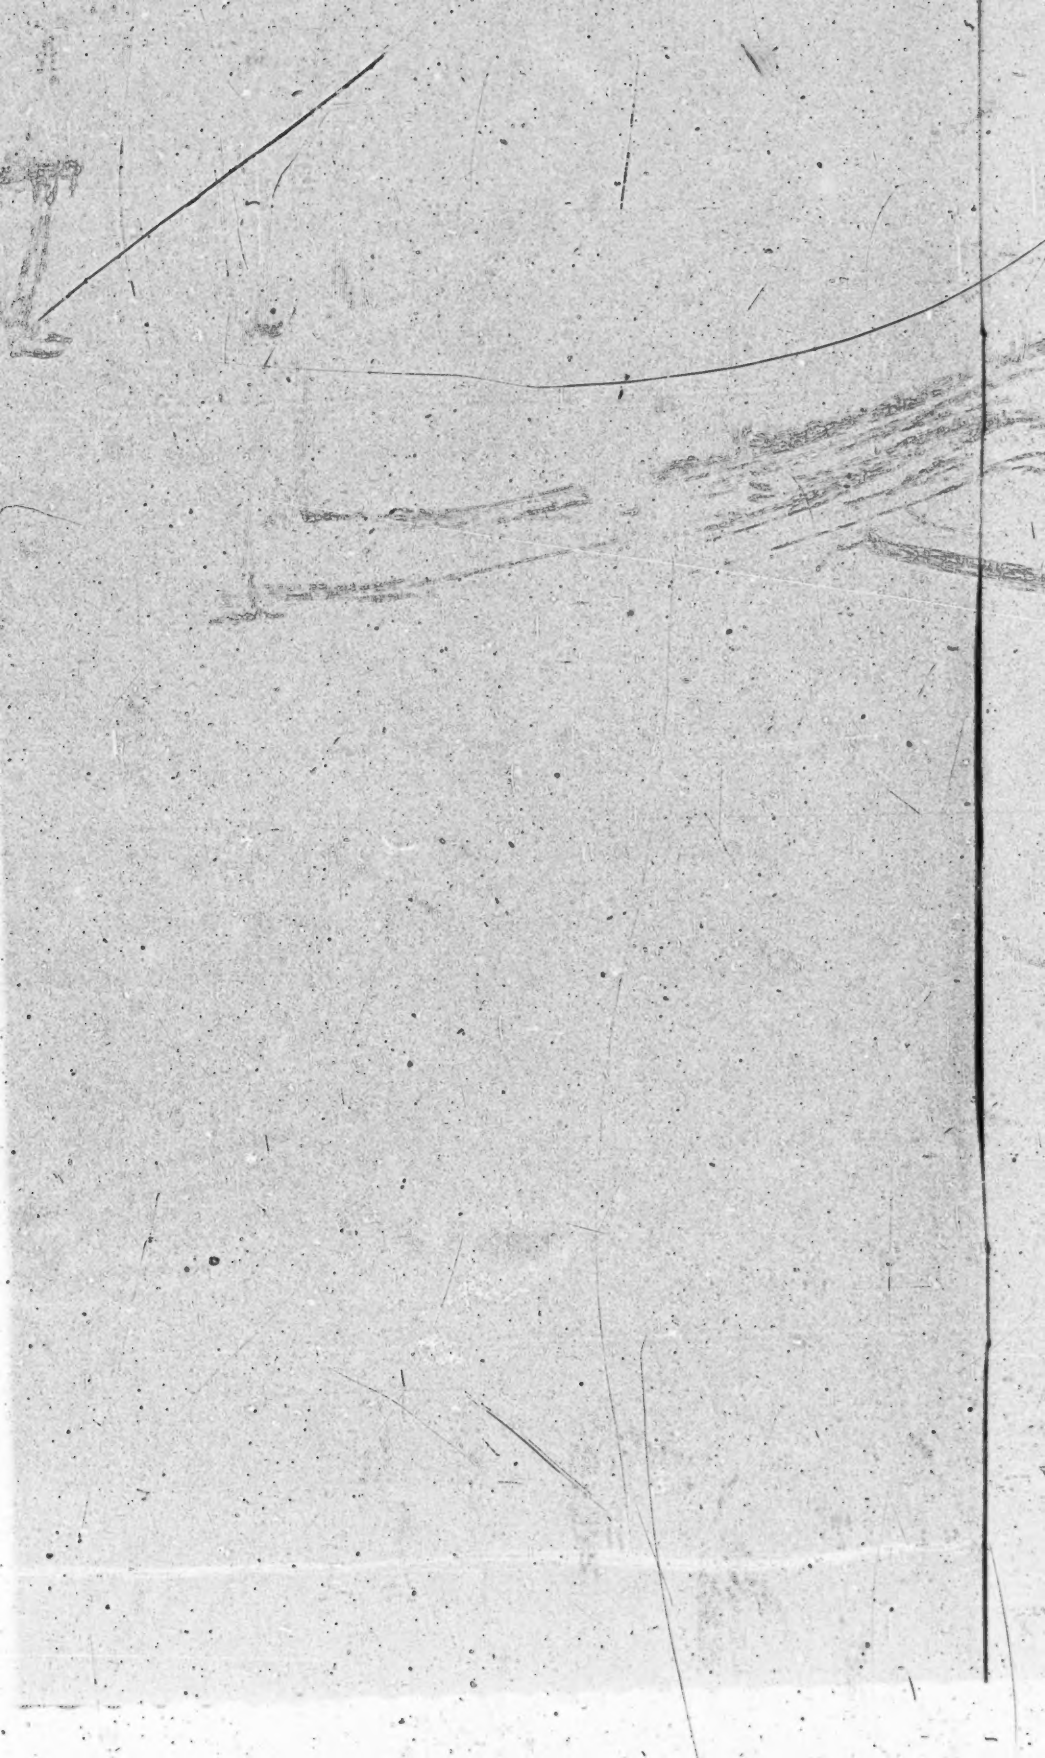
MONTANA-DAKOTA UTILITIES CO.,

Petitioner,

v.

NORTHWESTERN PUBLIC SERVICE COMPANY,

Respondent.



ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE EIGHTH CIRCUIT.

BRIEF FOR PETITIONER.

Opinions Below.

The opinion of the District Court (R., Vol. I, p. 112) denying motion to dismiss for want of jurisdiction is reported in 73 Fed. Supp. 149. Its opinion on the merits (R., Vol. V, p. 1883) is not reported.

The opinion of the Court of Appeals (R., Vol. VI, p. 1988) is reported in 181 F. (2d) 19.

Jurisdiction.

The judgment of the Court of Appeals was entered April 4, 1950 (R., Vol. VI, p. 1996). The petition for certiorari was filed May 17, 1950.

Jurisdiction rests on Title 28, United States Code, Section 1254. See also Section 825p of the Power Act

which, after making "exclusive" the jurisdiction of United States District Courts over "all suits in equity and actions at law brought to enforce any liability or duty created by * * * this chapter", provides that such judgments of the District Courts shall be subject to review by appeal to the Courts of Appeals and by certiorari in this Court "as provided in Sections 225 and 347 of Title 28", now Sections 1291 and 1254 of Title 28, U. S. C.

Questions Presented.

No question involving the merits is presented. The only question is one of the jurisdiction of the District Court.

The action is one arising under, and involving the interpretation of, the Power Act which gave the Federal Power Commission authority to regulate transmission and sale of electric energy in interstate commerce at wholesale, and the only question is whether that act gives the Commission either "primary" or exclusive power to determine the reasonableness of *past* charges and rates for sale of electric energy.

The action was begun in the United States District Court for South Dakota by petitioner to recover for alleged unreasonably low rates previously paid to and unreasonably high charges collected from petitioner's predecessors in interest, by the respondent. The District Court held it had jurisdiction and granted judgment for the petitioner. The Court of Appeals reversed and ordered the dismissal of the case, holding that the District Court lacked "jurisdiction" to determine the reasonableness of the rates, as the Commission had exclusive power to consider and

decide all questions as to reasonableness, and on the same theory the Court of Appeals held that the petitioner had not exhausted its administrative remedies before resorting to the courts.

The petitioner contends that under the Power Act the power of the Commission over rates is purely legislative and *is limited to establishing rates for the future*, and it has no power to grant reparations or to pass on the reasonableness of past charges as an "aid" to the courts; that the petitioner had no remedy before the Commission, and that the statutory jurisdiction of District Courts to entertain cases arising under Acts of Congress was not limited by any provision in the Power Act vesting primary or exclusive jurisdiction in the Power Commission to determine the reasonableness of charges in the past.

The questions may be stated thus:

1. Has the Federal Power Commission primary, or indeed any, jurisdiction to consider and determine the reasonableness of rates exacted and collected in the past, or do more than exercise the legislative power to fix rates for the future?

2. Had the plaintiff any administrative remedy before the Commission? Has the Commission any authority to consider a complaint as to the reasonableness of past rates, or to grant reparations, or even to make findings as to past charges as an aid to the courts in which a claim for reparations is made?

The Statutes.

Title 28, § 41, U. S. C. (now Title 28, United States Code Sections 1331, 1337), defining the jurisdiction of the United States District Courts, provided:

> "The district courts shall have original jurisdiction as follows: * * *
>
> First. Of all suits of a civil nature, at common law or in equity, * * * where the matter in controversy exceeds, exclusive of interest and costs, the sum or value of $3,000, and (a) arises under the Constitution or laws of the United States, * * *.
>
> * * * *
>
> Eighth. Of all suits and proceedings arising under any law regulating commerce."

Section 825p of the Power Act is as follows:

> "*Sec. 825p Jurisdiction of offenses; enforcement of liabilities and duties.*—The District Courts of the United States, the District Court of the United States for the District of Columbia, and the United States courts of any Territory or other place subject to the jurisdiction of the United States shall have *exclusive* jurisdiction of violations of this chapter or the rules, regulations, and orders thereunder, *and of all suits in equity and actions at law brought to enforce any liability or duty created by,* or to enjoin any violation of, this chapter or any rule, regulation, or order thereunder. Any criminal proceeding shall be brought in the district wherein any act or transaction constituting the violation occurred. Any suit or action to enforce any liability or duty

created by, or to enjoin any violation of, this chapter or any rule, regulation, or order thereunder may be brought in any such district or in the district wherein the defendant is an inhabitant, and process in such cases may be served wherever the defendant may be found. Judgments and decrees so rendered shall be subject to review as provided in sections 225 and 347 of Title 28. No costs shall be assessed against the Commission in any judicial proceeding by or against the Commission under this chapter. (June 10, 1920, c. 285, § 317, as added Aug. 26, 1935, c. 687, Title II, § 213, 49 Stat. 862, amended June 25, 1936, c. 804, 49 Stat. 1921.)"

This section seems to confirm jurisdiction of cases like this to the United States District Courts, to the exclusion of state courts, leaving Commission *orders* to be taken direct to the Courts of Appeals for review.

The pertinent part of the Federal Power Act is subchapter II which became effective August 26, 1935 (16 U. S. C. A. § 824, *et seq.*). Section 824(b) is as follows:

"The provisions of sections 824-824h of this title shall apply to the transmission of electric energy in interstate commerce and to the sale of electric energy at wholesale in interstate commerce, but shall not apply to any other sale of electric energy" etc.

Section 824(d) reads:

"The term 'sale of electric energy at wholesale' when used in sections 824-824h of this title means a sale of electric energy to any person for resale."

ection 824d is as follows:

"*Sec. 824d Rates and charges; schedules; suspension of new rates.*—(a) All rates and charges made, demanded, or received by any public utility for or in connection with the transmission or sale of electric energy subject to the jurisdiction of the Commission, and all rules and regulations affecting or pertaining to such rates or charges *shall be just and reasonable, and any such rate or charge that is not just and reasonable is hereby declared to be unlawful.*

(b) No public utility shall, with respect to any transmission or sale subject to the jurisdiction of the Commission, (1) make or grant any undue preference or advantage to any person or subject any person to any undue prejudice or disadvantage, or (2) maintain any unreasonable difference in rates, charges, service, facilities, or in any other respect, either as between localities or as between classes of service.

(c) Under such rules and regulations as the Commission may prescribe, every public utility shall file with the Commission, within such time and in such form as the Commission may designate, and shall keep open in convenient form and place for public inspection schedules showing all rates and charges for any transmission or sale subject to the jurisdiction of the Commission, and the classifications, practices, and regulations affecting such rates and charges, together with all contracts which in any manner affect or relate to such rates, charges, classifications and services.

(d) Unless the Commission otherwise orders, no change shall be made by any public utility in

any such rate, charge, classification, or service, or in any rule, regulation, or contract relating thereto, *except after thirty days' notice to the Commission and to the public.* Such notice shall be given by filing with the Commission and keeping open for public inspection new schedules stating plainly the change or changes to be made in the schedule or schedules then in force and the time when the change or changes will go into effect. The Commission, for good cause shown, may allow changes to take effect without requiring the thirty days' notice herein provided for by an order specifying the changes so to be made and the time when they shall take effect and the manner in which they shall be filed and published.

(e) Whenever any such new schedule is filed the Commission shall have authority, either upon complaint or upon its own initiative without complaint, at once, and, if it so orders, without answer or formal pleading by the public utility, but upon reasonable notice, to enter upon a hearing concerning the lawfulness of such rate, charge, classification, or service; and, pending such hearing and the decision thereon, the Commission, upon filing with such schedules and delivering to the public utility affected thereby a statement in writing of its reasons for such suspension, may suspend the operation of such schedule and defer the use of such rate, charge, classification, or service, but not for a longer period than five months beyond the time when it would otherwise go into effect; and after full hearings, either completed before or after the rate, charge, classification, or service goes into effect, the Commission may make such orders with reference thereto as would be

proper in a proceeding initiated after it had become effective. If the proceeding has not been concluded and an order made at the expiration of such five months, the proposed change of rate, charge, classification, or service shall go into effect at the end of such period, but in case of a proposed increased rate or charge, the Commission may by order require the interested public utility or public utilities to keep accurate account in detail of all amounts received by reason of such increase, specifying by whom and in whose behalf such amounts are paid, and upon completion of the hearing and decision *may by further order require such public utility or public utilities to refund, with interest, to the persons in whose behalf such amounts were paid, such portion of such increased rates or charges as by its decision shall be found not justified.* At any hearing involving a rate or charge sought to be increased, the burden of proof to show that the increased rate or charge is just and reasonable shall be upon the public utility, and the Commission shall give to the hearing and decision of such questions preference over other questions pending before it and decide the same as speedily as possible. (June 10, 1920, c. 285, § 205, as added Aug. 26, 1935, c. 687, Title II, § 213, 49 Stat. 851.)"

Section 824e is as follows:

"*Sec. 824e Power of Commission to fix rates and charges; determination of cost of production or transmission.*—(a) Whenever the Commission, after a hearing had upon its own motion or upon complaint, shall find that any rate, charge or classification, *demanded, observed, charged, or collected by* any public utility for any transmission

or sale subject to the jurisdiction of the Commission, or that any rule, regulation, practice, or contract affecting such rate, charge or classification *is unjust, unreasonable, unduly discriminatory* or preferential, the Commission shall determine the just and reasonable rate, charge, classification, rule, regulation, practice, or contract *to be thereafter observed and in force, and shall fix the same by order.*

(b) The Commission upon its own motion, or upon the request of any State commission whenever it can do so without prejudice to the efficient and proper conduct of its affairs, may investigate and determine the cost of the production or transmission of electric energy by means of facilities under the jurisdiction of the Commission in cases where the Commission has no authority to establish a rate governing the sale of such energy. (June 10, 1920, c. 285, § 206, as added Aug. 26, 1935, c. 687, Title II, § 213, 49 Stat. 852.)" [All italics supplied.]

It should be noted that when the bill for subchapter II of the Power Act was pending in the Congress it contained provisions (similar to those in the Acts applicable to the Interstate Commerce Commission) authorizing the Power Commission to consider the reasonableness of past rates and to make reparation orders. Those provisions were stricken out in committee.

Specification of Errors.

The Court below erred:

1. In holding that the District Court was without jurisdiction;

2. In holding that the Power Act gives jurisdiction to the Power Commission to determine the reasonableness of past rates and charges and denies to the District Court jurisdiction to entertain this action, in which a determination of the reasonableness of past rates is necessary to the granting of relief;

3. In applying to the facts of this case the rule that judicial relief may not be obtained until the prescribed administrative remedies have been exhausted;

4. In holding that any administrative remedy was available to the petitioner, and in ignoring the allegations of the complaint and the findings of the Trial Court that the petitioner's predecessors were from 1935 to 1945 under the domination of the defendant and therefore unable to resort to the Commission before the rates became effective, to prevent their taking effect, or to resort to the Commission for relief during that period;

5. In holding, in effect, that the petitioner can have no relief in any tribunal since the Commission may only exercise the legislative power to fix future rates, and the courts are without jurisdiction because they are forbidden by the Power Act to consider or determine the reasonableness of past rates although that is a judicial question.

Statement.

This action was commenced February 3, 1947 (R., Vol. I, p. 1) in the United States District Court for South Dakota by petitioner, Montana-Dakota Utilities Co. against the respondent, Northwestern Public Service Company, to recover because of unreasonably low rates paid by defendant for electric energy delivered to it by plaintiff's predecessor corporations, and for unreasonably high charges exacted by defendant for services it rendered to plaintiff's predecessors during the period from September 1, 1935, to October 11, 1945. That period was chosen because on August 26, 1935, was enacted the statute giving the Federal Power Commission jurisdiction to regulate charges for transmission and sale of electric energy at wholesale in interstate commerce, and which statute provided that "all rates and charges made, demanded, or received by any public utility for or in connection with the transmission or sale of electric energy subject to the jurisdiction of the Commission, * * * shall be just and reasonable, and any such rate or charge that is not just and reasonable is hereby declared to be unlawful."

The end of the period was fixed as October 19, 1945, because on October 19, 1945, through change of ownership and management the dominion and control over plaintiff's predecessors previously exercised by respondent came to an end and the claims here involved were then acquired by petitioner.

Petitioner's predecessors were Northern Power and Light Company, North Dakota Power and Light Company, and Dakota Public Service Company. On July 1, 1939, "Northern" and "North Dakota"

merged to form Dakota Public Service Company, and on October 19, 1945, all of the stock of Dakota Public Service Company was purchased by petitioner, and on the same day "Dakota" assigned all its claims, property and assets to petitioner (R., Vol. I, pp. 237-9). Originally, petitioner's predecessors and the respondent were part of a complicated public utility holding system controlled by the same "parent" company, and through common directors and officers the respondent dominated plaintiff's predecessors. The chain was broken in 1932 by a receivership and a bankruptcy proceeding, but the complaint alleged and the District Court found that the domination and control by respondent through common directors and officers continued right down to October 19, 1945, when the petitioner stepped into the picture. The arrangements for the necessary physical connections between petitioner's predecessors and the respondent were put in the form of contracts between them, and after the passage of the act giving the Power Commission jurisdiction over wholesale transmission and sale, compliance with statutory requirement for filing schedules of rates and charges took the form of filing with the Commission those contracts.

Shortly after petitioner acquired the property of its predecessors and on February 27 and 28, 1946 (R., Vol. I, pp. 159, 263) it served notice of cancellation of the existing contracts, and on August 12, 1946, filed a complaint with the Power Commission alleging the existing rates to be unreasonable and asked the Commission to fix new rates *for the future* (R., Vol. I, p. 149). This complaint never came to a hearing because new rates acceptable to the petitioner were agreed upon and the Commis-

sion then dismissed the complaint as moot (R., Vol. V, p. 1876), saying:

> "(e) By the terms of the agreement filed August 20, 1947, the issues involved in the complaint, as amended, have become merely moot and the public interest will be served by dismissing the same."

The petitioner did not then or since ask the Commission for any relief or action as to the unreasonable rates and charges in force from 1935 to 1945. The Commission had already conceded it had no power to grant reparations, and there was no provision in the act allowing the Commission to make findings as to the reasonableness of past rates as an "aid" to the courts. It seemed the proper course for the petitioner was to begin this action.

The complaint in the case alleged that "the action arises under the Federal Power Act, as hereinafter more fully appears, and under a law of the United States regulating commerce under said Federal Power Act" (R., Vol. I, p. 2). The complaint also alleged that the rates and charges during the period from 1935 to 1945 were "unreasonable" and were forced upon the plaintiff's predecessors by respondent by fraudulent practice and by means of its domination through common directors and officers, and the Trial Court so found (R., Vol. V, pp. 1930-1965). Thrice the respondent raised the point that as granting relief required a determination of the reasonableness of the rates charged the District Court was without jurisdiction, as the Power Commission had exclusive authority to deal with that question. The point was first raised by motion to dismiss (R., Vol. I, p. 106), which the Trial Court denied (R., Vol.

I, p. 112). It was raised again by motion to dismiss at the close of the plaintiff's evidence, which was denied (R., Vol. III, pp. 986-996) and it was raised again on the final submission of the case and again rejected (R., Vol. V, p. 1883).

The District Court made findings of fact (R., Vol. V, p. 1930) and conclusions of law (R., Vol. V, p. 1960) in which it determined that the rates which had been charged during the ten year period were unreasonable and unlawful, and had been wrongfully imposed on the petitioner by respondent through its dominion over and control of plaintiff's predecessors. Judgment was rendered for the petitioner in the sum of $779,958.30 (R., Vol. V, p. 1965). The respondent appealed to the United States Court of Appeals which reversed the judgment and ordered the case dismissed, on the ground that the District Court was without "jurisdiction" because the Power Commission had exclusive jurisdiction to pass on the reasonableness of the rates charged, and on the further ground that the petitioner had not exhausted its administrative remedies by applying to the Power Commission for relief.

Summary of Argument.

This action arises under the Federal Power Act, and particularly the provision which declares that all rates and charges which are unjust or unreasonable are unlawful. The sections of the Judicial Code which define the jurisdiction of District Courts and vest in them jurisdiction in actions arising under the laws of the United States and those arising under any act regulating commerce, vest jurisdiction of the controversy in the District Court.

The question is not whether the Federal Power Act gives, but whether it deprives the courts of, jurisdiction otherwise vested in them by the Judicial Code.

An issue of fact in the case, the determination of which was necessary to the rendition of judgment on the merits, is whether rates and charges for electricity paid by or charged and collected in the past by the respondent were unjust and unreasonable. The question is whether the Power Act gives "primary" or exclusive authority to the Power Commission to consider and decide that question, and thus deprives the District Courts of jurisdiction they otherwise would have.

Under the Power Act the Commission has no power to order reparations for past unreasonable charges. That power was deliberately withheld by the Congress. One section of the Act applicable to cases where the rates complained of have been in effect [Section 824e], gives the Commission authority to consider those rates, and if found to be unreasonable, to fix rates for the future. Another section [824d(e)] provides that when a new schedule is filed, and before it takes effect, the Commission may consider the proposed rates and if found to be unreasonable disapprove the schedule. The only authority for the Commission to order refunds is in the second class of cases, and the power is limited to ordering refunds of charges collected during the pendency of the proceeding.

Thus, the Commission was not given authority, after rates have gone into effect, to consider the reasonableness of past charges and order reparations. Neither was the Commission given power, in anticipation of judicial proceedings or during their pendency, to make any finding as an "aid" to the courts on the

question of reasonableness of past rates. The only authority to make findings "in aid" of another tribunal is in Section 824e(b), which gives limited power to make findings as to cost of production or transmission of electricity as an aid to State commissions.

There is no basis for the view that authority to determine the reasonableness of past charges and allow recovery of excessive exactions is vested in the Commission and therefore withdrawn from the courts.

This is not a case for application of the rule that administrative remedies must be exhausted before resort to the courts. The complaint alleged and the Trial Court found that the petitioner's predecessors in interest were, during the period involved in the case, under the domination and control of the respondent through common directors and officers, and it appears that no resort to the Commission could have been had to prevent the unreasonable rates from taking effect, nor to obtain reasonable rates for the future until, by change of control and management, the petitioner, as a free agent, was in a position to do so.

The petitioner in 1946 did promptly apply to the Commission to fix new rates for the future, and that resulted in an agreement between the parties as to future rates which obviated a hearing by the Commission, but as the Power Act does not authorize the Commission to determine the reasonableness of past charges, either as a basis for a reparation order or as an aid to a court in an action to recover unreasonable exactions, the petitioner's only recourse was to the courts.

The decision of the Court below would leave the petitioner without a remedy.

ARGUMENT.

I.

General statutes defining the jurisdiction of District Courts vest in them jurisdiction of a case like this, which arises under a law of the United States, and since the Power Act does not give the Commission authority to pass upon the reasonableness of past charges, it does not withdraw from the courts jurisdiction in cases involving the reasonableness of rates collected in the past.

The question is not whether the Power Act grants to the District Court jurisdiction to entertain cases involving the reasonableness of past charges, but whether that act deprives the courts of jurisdiction they otherwise would have.

This action arises under a law of the United States and one "regulating commerce." The basis for recovery is that provision of Sec. 824d (p. 6 above) of the Power Act which provides that a "rate or charge that is not just and reasonable is hereby declared to be unlawful." §41 of Title 28, U. S. C. (now Sections 1331, 1337 U. S. C.) gave to the District Court jurisdiction, which seems to have been made "exclusive" of state courts by Sec. 825p of the Power Act (p. 4 above). The latter section is not by its terms limited to actions brought by the Commission, but a decision of that question is not necessary in this case as the provisions of the Judicial Code defining jurisdiction of the District Courts are enough. A similar question has arisen under the Se-

curities Exchange Act. See, *Kardon* v. *National Gypsum Co.*, 69 F. Supp. 512; *Remar* v. *Clayton Securities Corporation*, 81 F. Supp. 1014. It remains only to analyze the Power Act to find whether it gave to the Power Commission authority to determine the reasonableness of past rates and charges, and thus withdraws that question from judicial cognizance.

There are two pertinent sections in the Power Act. Under Sec. 824e the Commission, on its own motion or on complaint, may find that an existing rate is unjust or unreasonable, may fix just rates "to be thereafter observed and in force and shall fix the same by order." Section 824d(e) (pp. 7-8 above) provides that when a new schedule is filed the Commission on its own motion or on complaint may at once have a hearing as to the lawfulness of the proposed rates, and pending the hearing and decision thereon may suspend the operation of such schedule and "defer" the use of such rate, but not for a longer period than five months. If a decision is not reached by the expiration of five months, the proposed rates shall take effect, and when a decision is reached the Commission may order a refund if it finds the scheduled rates are not justified.

Section 824d(d) (p. 6 above) prevents a new schedule from taking effect until it has been on file thirty days. Thus, one section relating to rates that have been in effect and when complaint is not made until after the rates have become effective, limits the Commission to fixing new rates for the future, and the other section relating to an attack on a new schedule is intended to provide a means for preventing a new schedule from taking effect. The limited power to require refunds in Sec. 824d(e) is only applicable when a complaint against a new schedule is filed

and is only operative in cases where the new schedule takes effect pending the decision of the complaint against it.

The only authority to order refunds or reparation is found in Section 824d(e), and is only applicable under the conditions there provided. That is not the whole story.

Subchapter II of the Federal Power Act, effective August 26, 1935, which contains the sections we are now considering, originated from two bills, H. R. 5423 and S. 1725, identical in terms, both introduced February 6, 1935. S. 2796 was afterwards substituted in the Senate for S. 1725. The two original bills each contained the following:

> "Sec. 213. (a) When complaint has been made to the Commission concerning any rate or charge for any service performed by any public utility, and the Commission has found after investigation that the public utility has charged an unreasonable, excessive, or discriminatory amount for such service in violation of any provision of this title, the Commission may order that the public utility make due reparation to the complainant thereunder, with interest from the date of collection. No such order shall be issued unless the complaint is filed with the Commission within two years from the date of the payment.
>
> "(b) If the public utility does not comply with the order for the payment of reparation within the time specified within such order, action may be begun in any court of competent jurisdiction to recover the same within one year from the date of the order, and not thereafter."

Those sections were stricken from the bill by the Senate Committee on Interstate Commerce.

Senate Report 621, accompanying S. 2796, under the caption "Material Differences between Title II of S. 2796 and Title II of S. 1725" on page 20 states:

> "The provisions defining with particularity the power of the Commission to investigate single rates and to fix standards of service (former secs. 208 (b) and 210) and the section authorizing the issuance of reparation orders (former sec. 213) have been eliminated. They are appropriate sections for a State utility law, but the committee does not consider them applicable to one governing merely wholesale transactions."

The only provision in the act under which the Commission may make findings of fact "in aid" of any other tribunal is in Section 824e(b) under which the Commission, if so disposed, may make findings to aid a state commission, limited to cost of production or transmission of electric energy, only two factors in rate fixing.

By familiar rules of construction, the express grant to the Commission by Section 824e(b) of power to make limited findings as an aid to State commissioners, excludes any authority to make findings in aid of the courts.

The conclusion must be that the Power Commission has no power to grant reparations or to make any findings as to reasonable past rates as an aid to any court, and is without "primary" or indeed any jurisdiction of that subject, which could diminish the jurisdiction vested by general statutes in the United States District Courts.

II.

There is no basis here for applying the rule that administrative remedies must be exhausted before resorting to the courts.

The rule about first exhausting administrative remedies has been developed judicially to maintain proper balance between administrative tribunals and courts.

The Court below has not pointed out any method by which petitioner or its predecessor corporations could have obtained relief from the Power Commission. The reasons given by the Senate Committee for striking from the bill of the Power Act all provisions for examining past rates and ordering reparations are not illuminating. We may surmise that the committee thought that as the bill dealt only with wholesale transactions and only large corporations were to be affected, the provision for prompt objection to new schedules of rates and for preventing their taking effect would give such organizations ample protection so that resort to the reparation method would not be needed.

But here, the complaint charged and the Trial Court found that from 1935 to 1945 the petitioner's predecessors were subject to the complete domination of the respondent. The domination which enabled the respondent to exact unfair contracts, enabled it to prevent resort to the Commission to disapprove them before they took effect.

If a corporation, subjected to unfair rates, is a free agent and as such refrains from taking prompt

steps to have the Commission prevent unfair rates from taking effect, it might well be that such conduct constitutes a waiver of that administrative remedy, and leaves the corporation affected only the right to apply to the Commission to establish new rates for the future. See, *Mississippi Power and Light Co.* v. *Memphis Natural Gas Co.*, 162 F. (2d) 388. It should not be open to the respondent to assert that the petitioner or its predecessor corporations had not exhausted their administrative remedies, when resort to the Power Commission was made impossible by the respondent's domination and control. As for the petitioner, the only administrative remedy open to it was to apply to the Commission to fix reasonable rates for the future, and it promptly did so, and as a result the respondent agreed to new rates satisfactory to the petitioner, which relieved the Commission from the necessity of hearing the application which it dismissed as moot (R., Vol. V, p. 1876). When that application was made it was clear that the Commission had no power to order reparations.

As to the Commission's power to making findings as to reasonableness of past rates "in aid" of other tribunals, there was only Section 824e(b) giving the Commission permission to make limited findings in aid of State commissions. There was and is in the act nothing vesting in the Commission power to make findings as to past charges in aid of any court, either in anticipation of court action, or after an action is commenced.

III.

The opinion of the Court below.

With due respect for the learned Court below, its opinion must be characterized as inadequate.

The opinion, referring to the rates charged, states "they were all approved as filed by the Commission." No rate involved here was ever approved by the Commission. The Commission never considered or had a hearing as to the reasonableness of any of the rates.

The mere acceptance of a schedule is not an approval. The only action the Commission ever took was to make some orders allowing schedules (in the form of contracts) to take effect as of a date some months previous to filing, and in one it said:

> "Nothing contained in this order shall be construed as constituting approval by this Commission of any service, rate, provision, or condition contained in the contract referred to herein" (R., Vol. I, p. 111).

In the Court below the petitioner was confronted with an argument that under the law the petitioner was conclusively bound by the filed rates, and could not attack them or question their reasonableness. Many cases were cited arising under the Interstate Commerce Act and other regulatory statutes that where a rate schedule has been duly filed and has taken effect, the utility must collect and the shipper or customer must pay the scheduled rates. That is to prevent discrimination and rebating. Those cases do not hold that such rates are conclusively reasonable and

unimpeachable, but merely that they must be collected and paid in the first instance, subject to correction or reparation by the tribunals having jurisdiction of such claims. The Power Commission itself said in *Cleveland and Akron* v. *Hope Natural Gas Co.*, 44 P. U. R. (N. S.) 1, 33:

> "The acceptance of a rate for filing does not mean that the Commission approves it and does not establish the justness or reasonableness of the rate. *Re Home Gas Co.*, 39 P. U. R. (N. S.) 102, 109."

Section 824d(a) of the Power Act states that all rates and charges "made, demanded or received" shall be reasonable and "any such rate or charge that is not just and reasonable is hereby declared to be unlawful." That applies to rates filed. The filed rate must be collected and paid in the first instance, but is subject to impeachment in a proceeding brought for that purpose. The opinion below states (R., Vol. VI, p. 1992):

> "Nowhere does the Act give the district court power to determine just and reasonable rates."

The question is not whether the Act confers jurisdiction on the District Courts, but whether it gives jurisdiction to the Commission to exercise primary or exclusive jurisdiction over the question of reasonableness of past rates, and thus deprives the courts of power to try and decide the issue of reasonableness.

The opinion proceeds:

> "That power is given to the Commission exclusively."

The Court below completely ignores the sections of the Power Act which we have discussed above, to wit, Section 824e(a) which limits the Commission, after rates have taken effect, to fixing rates to be thereafter observed and in force, and Section 824d(e) that where a new schedule is filed the Commission may prevent its taking effect. No mention was made of Section 824e(b), the only authority for making findings "in aid" of other tribunals and which is limited to aiding State commissions, not courts, and which permits the Commission to make findings *only* as to cost of production or transmission.

Nor does the opinion even refer to the fact that a provision in the bill allowing the Commission to examine past charges as to reasonableness and order reparations was stricken from the bill before its passage.

The opinion then asserts that "the plan or scheme of the Federal Power Act is analogous to that of the Interstate Commerce Act" and then cites a long list of cases under the Interstate Commerce Act to the effect that "the reasonableness of (railway) rates will not be considered by the courts before application has been made to the Commission." That assertion was made notwithstanding the Interstate Commerce Commission has express authority to examine into past rates and make reparation orders—a power deliberately withheld from the Power Commission—and has been given authority to make findings "in aid" even of the Railway Mediation Board, and differs radically from the Power Act.

In support of the assertion that "jurisdiction in such a controversy as this to investigate fraud practiced by an electric public utility in the past as well as in the present is vested not in the district court

but in the Commission" the opinion below cites § 307 (16 U. S. C., 825f) relating to general investigative powers.

That position produces the astonishing result that, although the Commission has no power to grant reparations, it has jurisdiction to consider the issue of fraud exercised through corporate domination, which issue is preeminently a judicial one, and which the Commission is not specially qualified to deal with. The opinion fails to point out what use the Commission could make of a finding on fraud, in the absence of power to order reparations.

Finally, the opinion invokes the rule that no one is entitled to judicial relief "until the prescribed administrative remedy has been exhausted", ignoring the fact that the Commission is limited to fixing rates for the future or preventing a new schedule of rates from taking effect, and that the latter remedy was lost in this case because of the corporate control and domination which lasted until the time for applying for preventive relief was long past.

The Court below does not even mention the opinion in the Fourth Circuit in *Hope Natural Gas Co.* v. *Federal Power Commission,* 134 F. (2d) 287, although that case was cited in the briefs. The Natural Gas Act and the Federal Power Act are identical in their provisions about the power of the Commission, except that one relates to natural gas and the other to electricity, and any decision under one is an authority under the other. The opinion in the Fourth Circuit (pp. 309-311) analyzed the provisions of the Gas Act. In that case the Commission fixed wholesale gas rates to become effective in the future and "as an aid to state regulation", proceeded to find that wholesale

rates charged by Hope to the East Ohio Gas Company for a past period of three years were "unreasonably high". Its findings were not limited to cost of production or transmission as the statute provides, but fixed the final delivery price in dollars and the amount of excess charges for each of the past three years. The power of the Commission to do that was challenged in the Court of Appeals and there held to be wanting (p. 310). It said:

> "The Natural Gas Act shows clearly that it was the intention of Congress to give the Commission quasi-legislative power, *i. e.* regulatory power as to future rates; but there is no indication of any intention to clothe it with judicial or quasi-judicial powers with respect to past charges or practices, such as was vested in the Interstate Commerce Commission by section 9 of the Interstate Commerce Act, 49 U. S. C. A. § 9. As the Commission itself says, it was not given authority to fix rates for the past or to award reparations on account of past rates. If it was not given the power to fix past rates, or award reparations based upon their unreasonableness, it certainly was given no power to do the same thing indirectly by making findings of fact as to past rates to be given effect in rate proceedings before state commissions. No intention on the part of Congress to vest any such unusual power in a commission ought to be indulged unless conferred in the plainest terms; and not only is it not plainly given here, but such power cannot be spelled out of the statutes on any theory of interpretation with which we are familiar."

In the case at bar a question is whether the Commission, being without power to grant reparations, nevertheless has power to make findings as to past rates "in aid" of a District Court, and exclusive power to deal with that issue. Whatever may be said about findings "in aid" of a State commission, there is no shadow of power in the Commission to make findings as to reasonableness of past rates as a basis for judicial action.

The *Hope* case reached this Court and was reversed on other points, but the question as to the extent of the Commission's power to make findings as an "aid" to State commissions was not decided as there had been no "order" by the Commission on that subject, and the review of Commission acts by direct appeal from it to a Court of Appeals, as in that case, only is available to review an "order". What the Commission said in the *Hope* case, and what this Court said are set forth in the appendix to this brief.

IV.

Where there is a right, there should be a remedy.

If the decision in the Court of Appeals is affirmed, the petitioner is left without a remedy. The corporate domination by respondent forestalled any move to prevent the rates taking effect, or any early move to obtain just rates for the future.

There was no remedy available before the Commission, and if the District Court was powerless to act, there is no other place to obtain relief.

In a long line of cases this Court has always held that where there is a right, there should be a remedy. See, *Texas & Pacific Railway Co.* v. *Rigsby*, 241 U. S. 33.

The Power Commission has no reason to complain of our position. We are not attacking the generally accepted principle that an administrative commission is an appropriate tribunal to exercise primary jurisdiction as to the reasonableness of past rates. We did not apply to the Commission for findings as to past charges, for the simple reason that the Federal Power Act does not permit it. If the Commission wants such authority, it should apply to the Congress for it instead of asking this Court to disregard what seems to be the clear effect of the present statute.

The judgment of the Court of Appeals should be reversed and the case remanded to that Court for consideration of the merits.

Respectfully submitted,

APPENDIX.

Cleveland and Akron v. *Hope Natural Gas Co.*, 44 Pub. Utilities Rep. (New Series), pp. 34-35:

"* * * Originally the city of Cleveland requested this Commission to find the lawful Hope-East Ohio rates since June 21, 1938, but it now represents that the subject is idle for rates prior to June 30, 1939, because those rates which Cleveland consumers were obligated to pay East Ohio have been settled. The Commission does not have the authority to fix rates for the past and to award reparations. But Congress did empower and instruct the Commission in § 5(a) of the Natural Gas Act, 15 USCA § 717d(a), to fix future rates, and as a step in that process we must necessarily consider the reasonableness of past and existing rates. When the issue is raised and the public interest will be served, we consider as a necessary part of that duty the power to examine the entire rate problem involved and to determine what rates were lawful in the past. Also, § 14(a) of the act, 15 USCA § 717m(a), authorizes the Commission to investigate any facts which it finds necessary in order to determine whether Hope has violated any provision of the Natural Gas Act. Furthermore, the Commission has power to perform any act, pursuant to § 16, 15 USCA § 717o, which is necessary or appropriate to carry out the provisions of the act. Under § 4(a) of the Act, 15 USCA § 717c(a), any interstate wholesale rate that is not just and reasonable is unlawful. *Federal Power Commission* v. *Natural Gas Pipeline Co. supra* [(1942) 315 U. S. 575, 86 L ed , 42 PUR(NS) 129, 62 S Ct 736] Hope's rate collected from East Ohio Gas Company was lawful after June 21, 1938, the effective date of the act, only to the extent that it was just and reasonable. The city of Cleveland states that the Ohio Commission is investigating the reason-

ableness of the East Ohio Gas Company's bonded retail rates in Cleveland for the period since June 30, 1939, and that the lawfulness of Hope's rate is an important factor in the case. Since the enactment of the 1938 Natural Gas Act this Commission has had exclusive jurisdiction to determine the lawfulness of the interstate wholesale rates charged by Hope and other natural gas companies.

In response to the request of the city of Cleveland, the Commission will make the appropriate findings of fact as to the lawfulness of the rates charged East Ohio by Hope since June 30, 1939. The Interstate Commerce Commission has furnished precedents for the performance of this public duty. Congress intended that this Commission cooperate with state Commissions and municipalities, and the provisions of §§ 5(b) and 17 are special evidence of such intent."

Extract from opinion in *Federal Power Commission* v. *Hope Natural Gas Co.*, 320 U. S. 591 (decided January 3, 1944), pp. 618-619:

"*Findings as to the Lawfulness of Past Rates.* As we have noted, the Commission made certain findings as to the lawfulness of past rates which Hope had charged its interstate customers. Those findings were made on the complaint of the City of Cleveland and in aid of state regulation. It is conceded that under the Act the Commission has no power to make reparation orders. And its power to fix rates admittedly is limited to those 'to be thereafter observed and in force.' § 5(a). But the Commission maintains that it has the power to make findings as to the lawfulness of past rates even though it has no power to fix those rates. However that may be, we do not think that these findings were reviewable under § 19(b) of the Act. That section gives any party 'aggrieved by an order' of the Commission a review 'of such order' in the circuit court of appeals for

the circuit where the natural gas company is located or has its principal place of business or in the United States Court of Appeals for the District of Columbia. We do not think that the findings in question fall within that category.

The Court recently summarized the various types of administrative action or determination reviewable as orders under the Urgent Deficiencies Act of October 22, 1913, 28 U. S. C. §§ 45, 47a, and kindred statutory provisions. *Rochester Telephone Corp.* v. *United States*, 307 U. S. 125. It was there pointed out that where 'the order sought to be reviewed does not of itself adversely affect complainant but only affects his rights adversely on the contingency of future administrative action,' it is not reviewable. *Id.*, p. 130. The Court said, 'In view of traditional conceptions of federal judicial power, resort to the courts in these situations is either premature or wholly beyond their province.' *Id.*, p. 130. And see *United States* v. *Los Angeles & Salt Lake R. Co.*, 273 U. S. 299, 309, 310; *Shannahan* v. *United States*, 303 U. S. 596. These considerations are apposite here. The Commission has no authority to enforce these findings. They are 'the exercise solely of the function of investigation.' *United States* v. *Los Angeles & Salt Lake R. Co., supra*, p. 310. They are only a preliminary, interim step towards possible future action—action not by the Commission but by wholly independent agencies. The outcome of those proceedings may turn on factors other than these findings. These findings may never result in the respondent feeling the pinch of administrative action."

Opinions below	1
Jurisdiction	2
Questions presented	2
Statement	2
Summary of the argument	9
Argument	10
I. There is no conflict between the decision of the court below and the decision of the U. S. Circuit Court of Appeals for the Fourth Circuit in Hope Natural Gas Co. v. Federal Power Commission (1943), 134 F. (2d) 287, Reversed (1944) 320 U. S. 591, 88 L. Ed. 333, 64 S. Ct. 281	10
II. The petition, far from tendering a new important question to be settled by this Court, actually attempts to unsettle the doctrines of exclusive jurisdiction of the FPC and of exhaustion of administrative remedies in disregard of unbroken lines of decision of this Court	15
1. The Court of Appeals below properly held that the determination of the reasonableness of rates is within the exclusive jurisdiction of the FPC	15
2. The alleged lack of administrative remedies, which is disproved by the record, affords no basis for jurisdiction in the District Court	23
3. No public interest is involved in the present petition: any recovery by petitioner would be a mere windfall for it while consumers could receive no possible benefit	29

No. 827.

IN THE

SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, 1949.

MONTANA-DAKOTA UTILITIES CO.,
a Corporation,
Petitioner,

v.

NORTHWESTERN PUBLIC SERVICE COMPANY,
a Corporation,
Respondent.

BRIEF

Of Respondent, Northwestern Public Service Company, in Opposition to Petition for Writ of Certiorari.

OPINIONS BELOW.

The judgment of which petitioner seeks review by certiorari was entered by the United States Court of Appeals for the Eighth Circuit on April 4, 1950 (R. 1996). The opinion is reported in 181 F. 2d 19. That decision reversed the judgment of the United States District Court for the District of South Dakota which was rendered against this respondent on September 15, 1948. The opinion of the trial court on the jurisdictional issue is reported in 73 F. S. 149. The opinion of the trial court on the merits is not reported and is set out in R. 1883-7.

JURISDICTION.

Respondent agrees with petitioner that Title 28 U. S. C., Sec. 1254 confers jurisdiction upon this Court to issue the writ, but denies that similar jurisdiction is conferred by Title 16 U. S. C., Sec. 825p. That section of the Federal Power Act does not apply to the case at bar, as more fully discussed herein (p. 16).

QUESTIONS PRESENTED.

The petition sets out three questions for the consideration of the Court, but fails to identify the basic question which in reality is the only question before this Court: Had the District Court jurisdiction over the action instituted by petitioner against this respondent, or was the Court of Appeals correct in reversing the judgment below for lack of jurisdiction?

STATEMENT.

There were three power properties involved here. They abutted each other in a nearly perpendicular line in the states of North and South Dakota. The predecessors of plaintiff-petitioner, North Dakota Power and Light Company ("North Dakota"), and Northern Power and Light Company ("Northern"), operated the northernmost and middle properties, respectively. The defendant-respondent ("Northwestern") operated the southernmost of the three. Petitioner's predecessors, including Dakota Public Service Company ("Dakota") into which the other two companies were later merged, were owned by one holding company, United Public Utilities Corporation ("UPU"), and respondent was owned indirectly by another holding company, The Middle West Corporation.

At the time these two holding companies came out of separate receiverships in 1935, the three properties were

being operated as a single system by interchange connections arranged prior to, and continued during, the receiverships. Connections and additional facilities for this purpose had been built and paid for by respondent. To facilitate joint operations certain of the key operating personnel were put on the boards of directors of the three companies. For this reason, petitioner claims that the contracts covering the interchange arrangements among the three systems were presumptively fraudulent. In each instance the joint director arrangement was reported to the Federal Power Commission and had its approval. The dominant person in the UPU subsidiaries was Samuel W. White, the chief executive of UPU, and he was never on the board of the respondent, operator of the southern company. The contracts between the companies recording their interchange arrangements and fixing the rates and charges between them were filed with the FPC, and legal rates thus established. The parties operated under these arrangements throughout the ten year period in issue, that is, from September 1, 1935, to October 19, 1945, on which latter date the petitioner purchased from the UPU holding company the stock of Dakota and acquired its properties through liquidation of the company.

Fifteen months later, on February 3, 1948, it brought the present suit against the respondent, allegedly under the Federal Power Act* claiming (a) that the interchange contracts were presumptively fraudulent because petitioner's predecessors had joint directors and officers with the respondent; (b) that the rates provided were unreasonable, and (c) that the contracts were improperly filed. In the present application the petitioner appears to have dropped its complaint about improper or late filings. The petitioner's case here is rested on the alleged presumption of fraud attaching to transactions entered into by companies with joint directorates. The petitioner desires to escape

* Both parties being Delaware corporations, there is no diversity of citizenship (R. 2, 210, 116).

from application of the rules making the filed rate the legal rate, and requiring it or its predecessors to apply for relief to the FPC through the claim that its predecessors were subject to domination by the respondent throughout the ten-year period on account of the joint directorates. It is argued that, by reason of this, petitioner's predecessors were not free agents to decide to apply, or to apply, to the Commission for relief, and hence neither the rule of exclusive jurisdiction nor of prior exhaustion of remedies was binding on them. Thus petitioner, having purchased Dakota from UPU, claims to be entitled as assignee and successor in interest to its predecessors to proceed in the District Court to recover damages it claims they suffered through the ten years involved by overcharges for energy bought and under-payments for energy sold in their interchanges with the respondent. The basis of recovery was a determination by the District Court of the unreasonableness of the rates established in the contracts and filed with the FPC. That judgment was reversed by the Eighth Circuit which held that the trial court lacked jurisdiction over the subject matter.

Some of the factual record constituting the setting in which these claims are laid and which was before the Court of Appeals might be helpful to the Court here, particularly to amplify the statement as to the contracts between the parties.

(1) The first contract in issue is the oral contract of September, 1935, for the interchange of energy between Northern and Northwestern for five mills per kilowatt hour. This rate remained unchanged throughout the ten years in issue (R. 630-1). The energy sold by Northern to Northwestern was surplus energy (R. 1644, 1127, 1499) generated by North Dakota (R. 1080). It was delivered to respondent mostly during off-peak periods while Northwestern furnished energy to the UPU group mostly during peak periods (R. 961, 1723, 1030, 1499).

(2) The second contract is known as the interconnection contract of October 7, 1936 (R. 464-5): In the late twenties Northern needed to fortify and improve its system, which was weak both in generating and transmission facilities (R. 1075, 1083-4, 433, 997-8, 815, 1001, 1034, 1828-9, 1845). Northern being badly in need of cash (R. 1075-6), Northwestern, which was at that time controlled by the same holding company as Northern, built interconnection facilities at no capital or carrying cost to Northern (R. 1497). When, after receivership, UPU emerged as the separate owner of the Northern and North Dakota, the question was presented to UPU whether to build new plants and transmission facilities or to continue to tie-in with respondent on an agreed basis of rates and charges. UPU chose the latter course for its subsidiaries rather than bear the whole brunt of the sizable expenditures which would have been required under the first alternative (R. 1076). Negotiations toward the establishment of a charge for these interconnection facilities were carried out over a long period between Strike, vice president of the three operating companies, and White, first receiver, and later president of UPU (R. 1074-5, 1100, 1020). White sent Lakin, an engineer and president of eleven of the UPU subsidiaries (R. 1604), and later a UPU director (R. 1194), who had no connection with respondent (R. 1604-5) to inspect the properties and determine the advisability of the contract (R. 1113). Upon his recommendation White decided that the contract as to both the charges provided, namely, $20,000 interconnection charge and the five mills energy rate was not only desirable (R. 1128-9, 1610-3) but necessary to Northern (R. 1076). It was also beneficial to North Dakota which could run its low cost power station at Beulah at a high load factor by selling surplus energy to Northwestern (R. 1080, 1005), also increasing the revenue for Knife River Coal Mining Co., the fuel supplying subsidiary of UPU (R. 1067, 1080, 1084-5, 1004). Both Lakin and White advised the UPU board to approve the contract

(R. 1609-14). Similar opinion was expressed by the UPU general counsel, Francis H. Scheetz of the firm of Evans, Bayard & Frick of Philadelphia (R. 1132-3, 1647), who had no connection with respondent or its parent company (R. 1636). The matter was laid twice before the board of UPU (R. 1114-5, 1121-28) and upon its approval White instructed the UPU subsidiaries to execute the contract (R. 1138).

(3) The history of the reserve capacity contract of 1938 shows the same pattern. UPU was faced with the problem of meeting the critical power situation of its subsidiaries (R. 1645). It caused a survey to be made by Sargent and Lundy, a firm of consulting engineers of Chicago, and considered the same, as well as other engineering studies at several meetings (R. 1118-9, 1138-41, 1160-61, 1164-5). The contract which provided for a yearly reserve capacity charge of $13.20 per kw payable to whichever company or companies was or were supplying reserve capacity (R. 54-5), was intended to pool the generating capacities of the UPU and the Northwestern systems, thus making available to the UPU subsidiaries the reserve capacity of Northwestern. After discussion by White with engineers (R. 1177), other officers of UPU, and Scheetz (R. 1178), it was approved by the UPU board (R. 1179-84) and executed by the operating companies in December of 1938.

(4-5) After the merger of Northern and North Dakota into Dakota on July 1, 1939, UPU decided that the interconnection and reserve capacity contracts should be redrafted to reflect the corporate change of its subsidiaries (R. 1652, 1185). Since no changes were made in any of the rates (R. 1189-90, 631, 704-5) Scheetz entrusted the matter to his South Dakota correspondent (R. 1652-3).

(6) Throughout this period there was a steady growth of demand for energy (R. 1879, 891). In 1941 additional generating capacity on the interconnected system was con-

sidered necessary. Northwestern expressed willingness to install additional capacity at Aberdeen at the northern end of its system upon the safeguard that the reserve capacity agreement with Dakota be changed into a ten year contract (R. 1190-92). White made several substantial modifications in the original draft (R. 1219-20) and, after a survey of the properties by both White and Lakin (R. 1194) and advice by Scheetz (R. 1221, 1509, 1645-6, 1654-5), the contract was approved by the UPU board, which recommended it to Dakota (R. 1193, 1614). The contract continued the three rates. On January 28, 1942, White authorized and approved the execution of the contract as of July 1, 1941 (R. 1225, 1221).

(7) Since the war had prevented Northwestern from carrying out the program of increasing its generating capacity, as contemplated by the 1941 contract, Sanborn (then president of Dakota and respondent, and, after petitioner's acquisition of Dakota, still the president of respondent) suggested to White an amendment to change the ten year contract into a cancellable contract (R. 1229-31). His suggestion was accepted, and the contract was finally drafted by the UPU counsel after several changes were made by White (R. 1232-54, 1656, 1858). The UPU board authorized White to recommend the execution of the amendment to Dakota (R. 1255-6, 1615), and the contract was executed on March 13, 1943 (R. 103).

(8-9) The last two contracts in issue are two agreements for allocation of joint management expenses between Northwestern and the UPU subsidiaries, which were dated January 2, 1936, and July 1, 1939, respectively. As receiver first, and as president of UPU later, White, who had terminated six similar arrangements relating to other UPU subsidiaries (R. 1316-19, 1553), decided to and did continue this joint management arrangement until the day UPU sold its Dakota stock to petitioner. He actively par-

ticipated in the drafting and negotiating of these contracts as representative of the UPU subsidiaries (R. 1099, 1384), on whose boards he remained at all times (R. 28-33, 1106). Both of these contracts were approved by the UPU board (R. 1099). The only item challenged by petitioner under these contracts, which cover nine classes of employees, concerns the allocation of the salaries and expenses of load dispatchers (R. 173-186, 1967-71).

These are the contracts in issue. Under the provisions of the Federal Power Act, all of the interchange contracts were filed with the FPC and petitioner's predecessors either participated in the filing or filed a certificate of concurrence in the filed rate under the directions or approval of UPU (R. 267-9, 343-5, 1652, 297-8, 1583, 1224-5). Thus, everybody having a financial interest participated in, or approved of, the filings. The Commission approved all the filings (R. 34, 35, 43, 61, 68, 87, 103, 108-111, 353). The joint management contracts were not formally filed because they did not establish or affect rates and charges for the transmission or sale of electric energy and were not required to be formally filed as such. Their existence and their basic terms, however, were disclosed to the FPC in the applications filed by the joint directors and officers for authority to hold interlocking positions in compliance with the requirements of the Federal Power Act, 16 U. S. C., 825d (R. 330, 339, 353). All these applications were granted by the FPC (R. 359-362).

The joint operating directors were selected and approved by White personally before being elected annually by vote of proxies under instructions of UPU (R. 1096-9, 1319). In his capacity as president and director of UPU and director of the Dakota companies, White was satisfied as to the "ability," "integrity" and "loyalty" of that personnel (R. 1328).

SUMMARY OF THE ARGUMENT.

I.

There is no conflict between the decision of the court below and the decision of the U. S. Circuit Court of Appeals for the Fourth Circuit in **Hope Natural Gas Co. v. Federal Power Commission** (1943), 134 F. (2d) 287, reversed (1944), 320 U. S. 591, 88 L. Ed. 333, 64 S. Ct. 281.

II.

The petition, far from tendering a new important question to be settled by this Court, actually attempts to unsettle the doctrines of exclusive jurisdiction of the FPC and of exhaustion of administrative remedies in disregard of unbroken lines of decision of this Court.

1. The Court of Appeals below properly held that the determination of the reasonableness of rates is within the exclusive jurisdiction of the FPC.

2. The alleged lack of administrative remedies, which is disproved by the record, affords no basis for jurisdiction in the District Court.

3. No public interest is involved in the present petition; any recovery by petitioner would be a mere windfall for it, while consumers could receive no possible benefit.

ARGUMENT.

I.

There Is No Conflict Between the Decision of the Court Below and the Decision of the U. S. Circuit Court of Appeals for the Fourth Circuit in Hope Natural Gas Co. v. Federal Power Commission (1943), 134 F. (2d) 287, Reversed (1944), 320 U. S. 591, 88 L. Ed. 333, 64 S. Ct. 281.

1. In the first place, inasmuch as the decision of the Circuit Court of Appeals in the **Hope** case and the decision below did not involve the same or similar issues, there would have been no conflict between the two decisions, even if the former one had not been reversed by this Court, which it was. In the **Hope** case, no district court trial was involved and no question of district court jurisdiction was in issue. The case involved an appeal from an FPC rate order; in the Commission proceedings the principal issue was the reasonableness of certain wholesale rates for the future but the Commission also made findings as to the reasonableness of past rates. In so doing, the Commission held that it did not have the power to fix rates for the past or award reparations, but that it did have power to make findings as to the reasonableness of past rates at the request of an interested municipality. 134 F. (2d), l. c. 309. The decision of the Circuit Court of Appeals on this point was summarized in the following words:

> "If it [the Commission] was not given the power to fix past rates, or award reparations based upon their unreasonableness, it certainly was given no power to do the same thing indirectly by making findings of fact as to past rates to be given effect in rate proceed-

ings before state commissions." [134 F. (2d), l. c. 310.]

In the present case, the decision below relates to the jurisdiction of a district court to determine the reasonableness of filed rates. No findings of the FPC as to past rates in aid of a state regulatory commission are in question. In fact, the court below has made no decision, conflicting or otherwise, on any issue involved in the **Hope** case. The only respect in which there is even a superficial resemblance between the issue and decision in the present case and those in the **Hope** case is this: in the course of its discussion as to the lack of jurisdiction of the district court in the present case, the court below (after stating that the rule of primary jurisdiction and the doctrine of legality of filed rates are not affected by petitioner's contentions as to alleged defective filing and alleged fraud) proceeds to say:

> "Jurisdiction in such a controversy as this to investigate fraud practiced by an electric public utility in the past as well as in the present is vested not in the district court, but in the Commission by § 307, 16 U. S. C. A., § 825f, . . . The Commission by § 309 (16 U. S. C. A., § 825h) is empowered to make, amend, and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of the Act. The Commission can, no doubt, correct its own mistakes. In case a complainant is aggrieved by the decision of the Commission, its remedy is by appeal under § 313 (b), supra" [R. 1995, 181 F. (2d), l. c. 23].

Even if this statement be regarded as a "decision" of the court below, there quite obviously would be no conflict between such a decision, viz., that the Commission has power to investigate past fraud and correct past mistakes, and a decision that the Commission has no power to make find-

ings as to reasonableness of past rates to be given effect in rate proceedings before state authorities.

The basic holdings of the two courts of appeal as to legality of filed rates were identical;* their conclusions differed only because they were dealing with different issues. The alleged conflict relied on in the petition is thus a synthetic one which could be suggested only through misapprehension of the issues and decisions in the two cases.

2. If there had otherwise been a conflict between any decision of the Circuit Court of Appeals in the **Hope** case and the decision below, that conflict would have disappeared entirely for purposes of the present petition when this Court reversed the judgment of the Circuit Court of Appeals in the **Hope** case.

The reversal, it is to be noted, went specifically to the decision of the Circuit Court of Appeals that the Commission had improperly made findings as to reasonableness of past rates. True, this Court did not itself pass upon the Commission's power to make such findings, but this Court did expressly reverse the Circuit Court's decision on the ground that the findings were not reviewable in any event. After reversal by this Court, the decision of the Circuit Court is neither controlling nor authoritative as a precedent, and, therefore, not a "decision" with which the decision below may be in conflict within the meaning of Rule 38.5 (b) of this Court.

---

* Compare the following portions of the respective opinions:

4th Circuit 134 F. (2d), l. c. 311	8th Circuit R. 1995; 181 F. (2d), l. c. 22
"When rates were filed with the Commission pursuant to Section 4 (c) of the Act they became the only lawful rates which the utility could charge or accept. * * * Until changed by the Commission under the power granted pursuant to Section 5 (a) they were binding alike upon the company and its customers * * *"	"The rates filed and approved by the Commission are the lawful rates until changed in the way provided by the Act. * * * So long as the filed rate is not changed in the manner provided by the Act it is to be treated as though it were a statute, binding upon the seller and the purchaser alike."

Freeman on Judgments (5th Ed., 1925), Vol. 3; p. 2416, says: "The judgment reversed becomes mere waste paper * * *." In **Leader et al. v. Apex Hosiery Co.** (C. C. A. 3, 1939), 108 F. (2d) 71, 81, aff'd 310 U. S. 469, 84 L. Ed. 1311, 60 S. Ct. 982, the Circuit Court of Appeals considered the effect of the Supreme Court reversal (302 U. S. 656, 82 L. Ed. 508, 58 S. Ct. 362) of its previous decision in certain injunction proceedings (90 F. [2d] 155) and said:

> "The decree of this court in the injunction proceedings must therefore be considered as having been vacated. It is no longer binding as a precedent, as the law of the case, or as res judicata."

Likewise, in **Crawford v. Metropolitan Life Ins. Co.** (St. Louis Ct. App. 1943), 167 S. W. (2d) 915, 920, the Court stated:

> "The first and foremost contention of appellant is that the suit is barred by the ten year statutes of limitation. * * * That question was before this Court in a very similar case based on this same policy of insurance. * * * Later our opinion was quashed by the Supreme Court. * * * And although it was quashed on another ground than as to the statute of limitations, the effect of the Supreme Court action was to do away entirely with our opinion so that it never became an authority. Hence the question is now again before us for determination, as though neither this Court nor the Supreme Court had ever considered it, and in fact the Supreme Court did not deem it necessary to and did not consider the question of the statute of limitations, as its opinion clearly shows."

To the same effect, see **Keller v. Hall** (C. C. A. 9, 1940), 111 F. (2d) 129, 131; **Kaplan et al. v. Joseph et al.** (C. C. A. 7, 1942), 125 F. (2d) 602, 606, and **Barr et al. v. Sumner et al.** (1915), 183 Ind. 402, 109 N. E. 193.

In any event, even assuming that the Court of Appeals' opinion in the **Hope** case should not be considered a legal nullity insofar as it sets forth grounds of decision which were not expressly reversed by the Supreme Court (the decision itself having been reversed on other grounds), it is clear that such statement of the lower court as to the grounds of the reversed decision is at most an obiter dictum and not a "decision." Cf. **Remick Music Corp. v. Interstate Hotel Co. of Nebraska** (D. C. Neb. 1944), 58 F. S. 523, 542.

As this Court pointed out in **Rogers v. Hill** (1933), 289 U. S. 582, 587, 77 L. Ed. 1385, 53 S. Ct. 731, the words "opinion" and "decision"

> "• • • while often loosely used interchangeably, are not equivalents. The court's decision of a case is its judgment thereon. Its opinion is a statement of the reasons on which the judgment rests [citing cases]. The Judicial Code uses 'decision' as the equivalent of 'judgment' and 'decree'. §§ 128, 238, U. S. C., Title 28, §§ 225, 345."

The same is true of rule 38.5 (b) of this Court, which uses the term "decision" in its technical sense. Compare: **Magnum Import Co. v. De Spoturno Coty** (1923), 262 U. S. 159, 163, 67 L. Ed. 922, 43 S. Ct. 531.

Under no permissible theory can it be said that a conflict exists between the decision below and the "decision" of the Circuit Court of Appeals in the **Hope** case.

II.

The Petition, Far From Tendering a New Important Question to Be Settled by This Court, Actually Attempts to Unsettle the Doctrines of Exclusive Jurisdiction of the FPC and of Exhaustion of Administrative Remedies in Disregard of Unbroken Lines of Decision of This Court.

1. The Court of Appeals below properly held that the determination of the reasonableness of rates is within the exclusive jurisdiction of the FPC.

Petitioner grounds federal jurisdiction on the Judicial Code, 28 U. S. C. 41 (1) (now 28 U. S. C. 1331) and on Section 317 of the Federal Power Act, 16 U. S. C. 825p (Petition, pp. 1-2, 12-13). Both contentions are clearly erroneous.

(a) **As to the Judicial Code.** Petitioner raises the self-defeating question "whether the Power Act divests the District Court" of jurisdiction (Petitioner's Brief, p. 21). It is clear that until the Power Act was enacted, there could be no jurisdiction over claims arising under it. Obviously, the Act which allegedly gave rise to the asserted claim could not also take away a non-existent prior jurisdiction to determine the same. The statute creates new substantive rights* and duties and at the same time defines by whom, and how, and where those rights and duties should be protected and enforced. Petitioner forgets for the moment that federal courts are courts of limited jurisdiction and that since **Turner v. Bank of North**

* No right or remedy to attack public utility wholesale rates fixed by contract on the ground of unreasonableness existed at common law, as petitioner itself admitted in its brief before the Court of Appeals (p. 28). See also **Arkansas Natural Gas Co. v. Arkansas R. R. Commission et al.** (1923), 261 U. S. 379, 67 L. Ed. 705, 43 S. Ct. 387; **Southern Iowa Electric Co. v. City of Chariton, Iowa, et al.** (1921), 255 U. S. 539, 65 L. Ed. 764, 41 S. Ct. 400; **City of Paducah v. Paducah Ry. Co.** (1923), 261 U. S. 267, 67 L. Ed. 647, 43 S. Ct. 335; **Colorado Power Company v. Halderman et al.** (D. C. Colo., 1924), 295 F. 178.

America (1799), 4 Dall 8, 11, 1 L. Ed. 718, a presumption obtains that a cause is not within their jurisdiction until the contrary appears.

If any new or additional rights were created by the Power Act in favor of petitioner or its predecessors, those rights, and any corresponding duties on the part of respondent, are to be measured according to the standards provided by the Act itself, and adjudicated and enforced under the procedural mechanism there established. The Court of Appeals below correctly held, "Nowhere does the Act give the district court power to determine just and reasonable rates; that power is given to the Commission exclusively" (R. 1992; 181 F. [2d], l. c. 22). Section 41 (1) of the Judicial Code cannot be resorted to as a detour to avoid the application of those standards, to circumvent the exclusive jurisdiction of the FPC and the statutory method whereby its orders are reviewable in the Courts of Appeals.

(b) **As to the Power Act.** Petitioner attempts here to find a basis for jurisdiction in the District Court by isolating a particular section of the Act (Section 317, 16 U. S. C. 825p)* from its context in the statute so as to give it a new and unsupportable meaning and function. The real meaning and function of the section, entirely different from those attributed to it by petitioner, are clear enough when the statute is viewed in its entirety.

In the Power Act Congress created a comprehensive scheme of regulation of interstate utility companies **through the instrumentality of the Federal Power Commission.** The interstate facilities of such companies are expressly committed to the jurisdiction of the Commission,

* That section, so heavily relied upon in the Petition, was neither pleaded in the complaint as amended nor relied upon by the District Court, which ruled that "While the Power Act does not specifically authorize such a suit * * * the Court * * * is vested with the necessary authority, as well as the duty to entertain such suit, by implication" (R. 113).

and each of the sections of the Act dealing with a particular aspect of utility regulation refers to the Commission as the agency of Congress to effectuate the purposes of the Act. The filing and other administrative provisions of the Act are closely tied in with the provisions establishing the standard of reasonableness, and all aspects are referred to the exclusive jurisdiction of the Commission. As part of the same pattern the Commission is given various types of enforcement powers in cooperation with the Attorney General. 16 U. S. C. 825 e, f, g, m, n. Insofar as the Commission may seek enforcement through criminal actions or other judicial proceedings, jurisdiction over such proceedings (not suits between power companies over claims for damages because of alleged unreasonablenes of filed rates or alleged fraud) is vested exclusively in the District Courts. 16 U. S. C. 825p.

Judicial review of orders of the FPC under the Power Act is conferred on the U. S. Courts of Appeals. 16 U. S. C. 825l. This means of review is exclusive. **Federal Power Commission v. Pacific Power & Light Co.** (1939), 307 U. S. 156, 160, 83 L. Ed. 1180, 1183, 59 S. Ct. 766; **Switchmen's Union of N. A. et al. v. National Mediation Board et al.** (1943), 320 U. S. 297, 88 L. Ed. 61, 64, 64 S. Ct. 95; **Safe Harbor Water Power Corp. v. Federal Power Commission** (C. C. A. 3, 1941), 124 F. 2d 800, cert. den. (1942), 316 U. S. 663, 86 L. Ed. 1740. But again prior resort to the Commission is a condition precedent for judicial review. Section 825l (a) provides:

> "No proceeding to review any order of the Commission shall be brought by any person unless such person shall have made application to the Commission for a rehearing thereon." [1]

[1] This requirement is jurisdictional. **Federal Power Commission v. Metropolitan Edison Co. et al.** (1938), 304 U. S. 375, 82 L. Ed. 1408, 58 S. Ct. 963.

To follow out petitioner's assertion (Petition, pp. 2, 7, 13; Brief, p. 22) that Section 825p, Title 16 U. S. C., confers "exclusive jurisdiction" upon the **District Court** to entertain actions based on alleged violations of the statutory requirement that rates shall be reasonable, without prior resort to the Commission, would mean to thwart the whole scheme of administrative machinery and procedural requirements, and the limitations which the statute establishes. It would mean to take away the exclusive jurisdiction of the FPC over the reasonableness of rates and to transfer that jurisdiction to the 87 District Courts. Petitioner has not cited a single case which even inferentially supports this construction of Section 825p of the Power Act, or the parallel Section 717u of the Natural Gas Act.

Section 825p refers only to the enforcement of the Act by the Commission, as the Eighth Circuit properly held. If it were intended to cover suits by private parties, its language would not be limited to cases where no administrative remedy is available—as contended here by petitioner—but would include all cases. In such event, the Commission would be deprived of its primary function; the carefully limited jurisdiction of the Court of Appeals on orders of the Commission would become meaningless; and a new system of administration and enforcement of the Act at the hands of the District Courts would nullify and replace the whole scheme of the Act.

Its legislative history makes it perfectly clear that such construction of Section 825p must be rejected. As originally introduced, the Senate and House bills (S. 1725 and H. R. 5423, 74th Congress) each contained a reparations provision taken in substance from the Interstate Commerce Act, providing that (a) the Commission could order reparations for past payments of unreasonable rates, on complaints filed within two years after payment, and (b)

if the utility did not comply, **action could be brought on the Commission's order in a court of competent jurisdiction.** However, the entire reparation provision was eliminated because not deemed applicable to wholesale transactions. Where Congress has thus **considered and rejected** a provision conferring **jurisdiction on the courts with respect to past payments,*** and then only to enforce Commission determinations as to unreasonableness of past rates, how can an even broader jurisdiction be deemed to have been established by another Section—825p—of the same statute? Petitioner contends that Congress' underlying assumption "has not been justified" (Petitioner's Brief, p. 29), but that is obviously for Congress to consider. It does not warrant judicial adoption of a proposal rejected by the legislative branch.

We submit that Congress has said, as plainly as if it used the very words: "The standards set forth in paragraphs (a) and (b) of Section 824d are to be realized exclusively through the agency named and the procedures detailed in paragraphs (c), (d) and (e) of Section 824d and in Section 824e."

Indeed, this Court has precisely so concluded under the comparable Natural Gas Act. In **Illinois Natural Gas Co. v. Central Illinois Public Service Co.** (1942), 314 U. S. 498, 506, 86 L. Ed. 371, 376, 62 S. Ct. 384, this Court said that the underlying purpose of that Act was to provide

> "* * * through the exercise of the national power over interstate commerce, an agency for regulating the wholesale distribution to public service companies of natural gas moving interstate * * *."

In **Federal Power Commission v. Hope Natural Gas Co.** (1944), 320 U. S. 591, 617, 88 L. Ed. 333, 353, 64 S. Ct. 281, this Court stated:

* In its summary of the legislative history, petitioner significantly overlooks this essential provision of the original bills (Petition, pp. 11-12, 23).

> "Congress has entrusted the administration of the Act to the Commission not to the courts."

As Mr. Justice Jackson observed in his separate opinion in that case:

> "To carry this into techniques of inquiry is the task of the Commissioner rather than of the judge, and it certainly is no task to be solved by mere bookkeeping, but requires the best economic talent available" (320 U. S., l. c. 653).

In **Colorado Interstate Gas Co. v. Federal Power Commission** (1945), 324 U. S. 581, 589, 89 L. Ed. 1206, 65 S. Ct. 829, a proceeding involving the same Natural Gas Act, this Court said:

> "Rate-making is essentially a legislative function. Munn v. Illinois, 94 U. S. 113, 24 L. Ed. 77. Congress to be sure has provided for judicial review of the Commission's orders. Sect. 19, 15 U. S. C. A., Sec. 717r; 4 F. C. A. Title 15, Sect. 717r. But that review is limited to keeping the Commission within the bounds which Congress has created."

Likewise in **Federal Power Commission v. Pacific Power & Light Co.**, supra, this Court stated:

> "A federal court cannot fix rates * * *" (307 U. S., l. c. 160).

There is nothing unique or anomalous about the statute thus construed; it is merely a Congressional restatement of a rule of law which would apply even apart from the statute—the rule of exclusive jurisdiction, which removes from the jurisdiction of the courts (except within the limited area of permissible review) all questions involving reasonableness of rates and other technical matters for the regulation of which an administrative agency has been created.

This rule was first established in **Texas and Pacific Railway Co. v. Abilene Cotton Oil Co.** (1907), 204 U. S. 426, 51 L. Ed. 553, 27 S. Ct. 350, and has been consistently reasserted through the years down to the latest decisions of this Court. Thus, in **United States v. Jones** (1949), 336 U. S. 641, 93 L. Ed. 938, 69 S. Ct. 787, reh. den. 337 U. S. 920, 93 L. Ed. 1729, 69 S. Ct. 1150, this Court stated that the District Court properly made "no attempt to render a money judgment for the carrier" (the very thing done by the District Court in the case at bar), and added:

> "Necessarily this restraint reflected the jurisdictional limitations placed upon the court by the Urgent Deficiencies Act. But those limitations themselves reflected another policy, quite apart from and in addition to that giving effect to the constitutional limitations of Article III. The limitations exemplify settled congressional policy concerning the relations of rate-making bodies and reviewing courts. Not only is rate-making essentially legislative in the first instance. **The policy of judicial restraint is one having regard for the expertise of special agencies charged with performing the rate-making function and for the inherent actual, as well as legal, disability of courts to execute that function.** Such doctrines or policies as those of 'primary jurisdiction' and exhaustion of administrative remedies lie at the very root of the problem" (l. c. 652). (Emphasis added.)

While the merits are not before this Court, it may be appropriate to point out that the basic errors made by the District Court in dealing with the technical problems of utility rate-making in this very case sufficiently demonstrate the soundness of the primary jurisdiction rule as embodied in the Federal Power Act. For example, the District Court was evidently unaware of the significance

of the differences between incremental cost and average cost of energy, between "graveyard" or other surplus energy and firm energy, and between peak power and off-peak power. It apparently was not familiar with the theory and practice of power pool arrangements or of the significance and importance of reserve capacity in an electric system. It seemingly failed to grasp the significance of energy interchange in the operations of respondent and petitioner's predecessors. These matters are all grist in the Commission's mill and they are basic to any determination of reasonableness of rates in the present case. In the words of the Jones opinion, quoted supra, the District Court was under an "actual, as well as legal, disability" in dealing with them.

As a corollary of the rule so frequently stated by this Court requiring the determination of the reasonableness of rates to be made by the specially qualified administrative agency created by Congress to deal with this specialized field, it is settled that the filed rate is the only legal rate. The District Court erred in holding it could be disregarded.*

As pointed out in the statement, supra, each of the interchange contracts was filed with the FPC as specifically required by law,** and plaintiff's predecessors either joined or concurred in the filings. Also as above noted,

---

* Texas and Pac. Ry. Co. v. Abilene Cotton Oil Co., supra; Robinson v. Baltimore & Ohio R. Co. (1912), 222 U. S. 506, 56 L. Ed. 288, 32 S. Ct. 114; Mitchell Coal Co. v. Pennsylvania R. Co. (1913), 230 U. S. 247, 57 L. Ed. 1472, 33 S. Ct. 916; Louisville & N. R. Co. v. Maxwell (1915), 237 U. S. 94, 59 L. Ed. 853, 35 S. Ct. 494; United States v. Interstate Commerce Commission, 337 U. S. 426, 93 L. Ed. 1451, 69 S. Ct. 1410; Backus-Brooks Co. v. Northern Pac. Ry. Co. (C. C. A. 8, 1927), 21 F. 2d 4, cert. den. (1927), 275 U. S. 562, 72 L. Ed. 427, 48 S. Ct. 120; Woodrich et al. v. Northern Pac. Ry. Co. (C. C. A. 8, 1934), 71 F. 2d 732, 736; Watab Paper Co. v. Northern Pac. Ry. Co. (C. C. A. 8, 1946), 154 F. 2d 436; Mississippi Power & Light Co. v. Memphis Natural Gas Co. (C. C. A. 5, 1947), 162 F. 2d 388, cert. den. 332 U. S. 770, 92 L. Ed. 355, 68 S. Ct. 82.

** In view of the requirements of the statute and of the FPC regulations, it is a peculiar statement for petitioner to say that "after the Power Act took effect August 26, 1935, the parties adopted the practice of filing these contracts with the Commission to disclose the rates and charges" (Petition, p. 4; our emphasis).

UPU, plaintiff's vendor and the sole stockholder of plaintiff's predecessors, directed or approved the filings. Under the foregoing authorities the rates and charges in all the contracts were the only legal rates, and so remained, because they were never changed by the FPC.

2. The alleged lack of administrative remedies, which is disproved by the record, affords no basis for jurisdiction in the District Court.

Petitioner's effort focuses on the proposition that no administrative remedy was available to its predecessors because of their alleged domination by respondent, and that therefore there must be jurisdiction on the part of the District Court to entertain this action, otherwise petitioner's right would fail for lack of any remedy (Petition, pp. 14-5, 22, 26, 31). This contention was most strenuously but unsuccessfully urged by petitioner before the Court of Appeals both in its brief and in the oral argument. It is erroneous in fact as well as in law.

(a) In the first place, the complaint below as amended did not plead that petitioner's predecessors were prevented from resorting to the administrative remedies provided by the Power Act because of the alleged domination and fraud of respondent. Being a prerequisite to the jurisdiction of the District Court—as petitioner seems to claim (Petition, p. 14, Question 3)—that allegation should have been pleaded. Nor is there any finding or holding by the District Court that the statutory administrative remedies were unavailable to petitioner's predecessors by reason of the alleged domination of respondent. Petitioner boldly asserts:

> "For the purposes of this petition this Court has to assume that the evidence established and the District Court was justified in finding * * * that the petitioner's predecessor corporations were under the com-

plete domination of the defendant, and that it was by means of that domination that there was no opportunity to apply to the Commission under Section 824d (e) of the Power Act for preventive relief to prevent the unreasonable rates from going into effect" (Petitioner's brief, p. 22).*

Significantly enough, no record reference is furnished by petitioner. Indeed, there were no such findings by the District Court.

Petitioner's statement is also unsound in law. The judgment of the District Court was rendered after trial on the merits, and, after it was reversed by the Court of Appeals, the findings of the District Court are not conclusive on this Court. A presumption of correctness attaches to the decision of the Court of Appeals, and as this Court held in **Reinman v. City of Little Rock et al.** (1915), 237 U. S. 171, 180, 59 L. Ed. 900, 905, 35 S. Ct. 511,

> "If the record, including the opinion, leaves it a matter of doubtful inference upon what basis of fact the state court rested its decision of the Federal question, it seems to us very plain, upon general principles, that we ought to assume, so far as the state of the record permits, that it adopted such a basis of fact as would most clearly sustain its judgment."

Failure to apply the foregoing rules and principles would necessitate an examination into the factual issues of fraud tendered by the petitioner in the District Court and urged in the Court of Appeals. And this the writ of certiorari was not designed to do. The rule is generally asserted by this Court that certiorari does not issue to review facts. **General Talking Pictures Corp. v. Western Electric Co.**

* See also the even stronger—and equally wrong—statement in the Petition, p. 14, question 3, asserting the existence of

> "* * * facts alleged and found by the District Court—viz., that the plaintiff's predecessors were helpless because of the domination over them by the defendant as a result of which the preventive remedy under 824d (e) was lost * * *."

(1938), 304 U. S. 175, 178, 82 L. Ed. 1273, 58 S. Ct. 849; Frankfurter and Landis, The Business of the Supreme Court (1928), p. 290.

(b) In any event the record clearly shows that there was no "domination" of petitioner's predecessors on the part of respondent or its holding company. Petitioner's repeated charge of "domination" (Petition, pp. 14, 15, 22, 26) is an inflation of the allegations of the complaint and of the findings of the trial court, that the joint officers and directors, or respondent through them, "caused" the predecessors of petitioner to enter into transactions detrimental to them and devised exclusively for the benefit of respondent (e. g., R. 7, 1940).

Yet petitioner does not even claim that White, who at all times was on the boards of the UPU subsidiaries and never on that of respondent, was ever prevented by respondent from resorting to the Commission. The dominant position of White, the chief executive of UPU, in all of the transactions in issue is apparent throughout the record. (See e. g., R. 1111-2, 1318-9, 1866-67, 1838-9; as to his financial interest, R. 1437, 1380 ff.)

Furthermore the undisputed evidence reviewed in the statement, supra, shows that the contracts and rates in issue were all arrived at under the direction or approval of UPU. The joint directors, each of whose applications for interlocking positions was approved by the FPC (R. 359-62),* were elected each year by independent action of the separate stockholders of respondent and of petitioner's predecessors (R. 1096-9). Again, at the hearings held in 1942 by the Securities and Exchange Commission in connection with the integration proceedings against the UPU

* The orders of the FPC contain findings that

"Applicant has made due showing in the form and manner prescribed by this Commission that neither public nor private interests will be adversely affected by his holding the following positions * * * [listing positions]" (R. 360-2).

Nor did FPC question the arrangement at any later time (R. 1510, 1587-8).

under 15 U. S. C. 79k (b) (1) (R. 1487 ff.), Scheetz represented UPU and its subsidiaries (R. 1657). Here the operation of the Dakota system under the 1941 contract, which covered all rates, was fully explored. In answer to the examiner's pointed inquiries the contract was most earnestly defended by UPU in all of its aspects. In so doing UPU again ratified the contract and the three rates provided therein. At those hearings UPU witnesses and its general counsel explained that the joint management followed the policy of referring to the respective companies all matters in which there might be a possible conflict of interests (R. 1542-3, 1545-6).

There is no allegation in the petition herein or in the complaint below, nor is there any finding by the District Court that UPU, as the sole stockholder of petitioner's predecessors, was ever under the domination of respondent for any purpose. The only finding, which has some indirect bearing on the point, is the one that "Middle West"—not respondent—had "actual control" of United Public Service Corporation and through it "potential control" of UPU (R. 1935). That finding was clearly erroneous both in law and in fact. In law, control of UPU by Middle West would not be control by respondent of UPU or of the predecessors of petitioner, and the finding was erroneous insofar as it purported to support the judgment against respondent. The act of an agent may legally become the act of his principal, but the converse is not true.*

In fact, the undisputed evidence shows that Middle West did not have control of petitioner's predecessors at any time during the period of controversy. From 1935 until July 1, 1945, Middle West could elect only one of the 5 to 7 directors of UPU (R. 233-4, 1349-51, 1088, 1554-5,

* Crosby et al. v. Calaway (1941), 65 Ga. App. 266, 16 S. E. 2d 155, 158; Pfeffer v. Lehmann et al. (1938), 255 App. Div. 220, 7 N. Y. S. 2d 275, 278; Barnett v. Perrine (Tex. Civ. App., 1923), 250 S. W. 1111, 1115; King v. City of Beaumont et al. (D. C. Tex., 1924), 296 F. 531, 534; Kingston Dry Dock Co. v. Lake Champlain Transp. Co. (C. C. A. 2, 1929), 31 F. 2d 265; 3 C. J. S., Agency, p. 130.

343, 356, 1092-3). On July 1, 1945, Middle West became entitled to vote 28% of the stock of UPU, but this was unimportant because, after lengthy negotiations, on the following day UPU contracted to sell Dakota to petitioner (R. 1333-4) and the transfer followed in due course. In any event it will be noted that the last contract in issue was dated March 13, 1943 (R. 103), that is, more than two years prior to the one day 28% "control" of UPU by Middle West.

Thus, there is no evidence establishing "domination" by respondent of either the predecessor operating companies of petitioner or of UPU. It is absolutely undisputed that in the ten year period in issue neither UPU, nor any consumer or state regulatory body or any other person lodged any complaint with the FPC challenging the reasonableness of the rates and charges involved here. Nor did the Commission on its own motion institute any proceeding against this respondent (R. 1588).

(c) Finally, even assuming for the sake of argument that petitioner's factual assertions of "domination" were correct, it is a non-sequitur to claim that the District Court is therefore empowered to determine the reasonableness of the rates in issue. No legal metamorphosis can convert lack of adequate administrative remedy into a source of jurisdiction for the District Courts, particularly when Congress has deliberately withheld from those courts any jurisdiction over reparations (supra, pp. 18, 19). Arguments similar to those of petitioner have been rejected by other courts of appeals. Thus, in **Mississippi Power & Light Co. v. Memphis Natural Gas Co.**, supra, where Mississippi argued that it had been induced by Memphis not to resort to the Commission, the Court said, inter alia:

> "Mississippi argues that since the Commission has held it may not set retroactive rates, to require it to

go before the Commission to obtain lower rates in advance of deliveries, would require it to have instantaneous knowledge of the lower rates extended by Memphis to another customer, and would require the Commission to obtain immediate action. Congress has made certain provisions for these hardships, and supplication for further relief must be addressed to that body" (162 F. 2d, l. c. 391).

Similarly, in **Michigan Consolidated Gas Co. v. Panhandle Eastern Pipe Line Co. et al.** (C. A. 1949), 173 F. 2d 784, the Sixth Circuit rejected the contention that a federal court should take jurisdiction upon an allegation by plaintiff that the FPC has no authority to grant the relief prayed. Likewise in **Backus-Brooks Co. v. Northern Pac. Ry. Co. et al.**, supra, charges of domination and unfaithfulness of the directors were held of no avail to confer jurisdiction upon the district court.

The rule clearly applicable to the present case is that stated by Mr. Justice Douglas in **General Committee etc. v. Missouri-Kansas-Texas R. Co. et al.** (1943), 320 U. S. 323, 337-338, 88 L. Ed. 76, 84, 64 S. Ct. 146:

> "In view of the pattern of this legislation and its history the command of the Act should be explicit and the purpose to afford a judicial remedy plain before an obligation enforcible in the courts should be implied. Unless that test is met the assumption must be that Congress fashioned a remedy available only in other tribunals. There may be as a result many areas in this field where neither the administrative nor the judicial function can be utilized * * * **Courts should not rush in where Congress has not chosen to tread.**" (Emphasis supplied.)

Petitioner's ultimate plea that it must have a remedy because it has a "right" is equally fallacious in its major premise, namely, that it has an **existing right.** The prede-

cessors of petitioner and respondent took the only means authorized by law to establish legal rates for electric power at wholesale moving in commerce, that is, filed their contracts containing the rates with the FPC. Under the law approval of these filings operated to establish the rate as legal and enforceable. The rates thus established continued to be the legal and binding rates by remaining on file through the period involved here. As time moved on these established rates performed their function and no longer had any purpose to serve. The fact that these were the legal rates, binding on all, occurred because the Federal Power Act declared it so. Neither of the contracting parties who had established the rates, or their respective stockholder owners; nor any consumer; nor other person on behalf of consumers, took any action to modify, change or disestablish the rates then in effect. Nor did the Commission do so of its own motion, after inquiry or otherwise (R. 1588). Nor does petitioner challenge here the filing of any of the rates. The attack on the rates is collateral.

What petitioner claims to be its "right" is that of a successor owner to set aside and disestablish the legal rates of those past years, and to collect damages through the establishment by court decree of new rates in their stead. This is the "right" as to which petitioner is claiming there would be no remedy, under the holding of the Court of Appeals. As a newcomer on the scene, petitioner can have no greater "rights" than those of the parties to which it has succeeded. Petitioner's alleged "right" is not a reality.

3. **No public interest is involved in the present petition: any recovery by petitioner would be a mere windfall for it while consumers could receive no possible benefit.**

There is no new issue of federal law of public importance tendered in the petition which would justify the issuance of the writ. As this Court said of the parallel provisions of the Natural Gas Act, which is also administered by the

FPC, "the aim of the Act was to protect ultimate consumers * * *." **Federal Power Commission v. Interstate Natural Gas Co., Inc., et al.** (1949), 336 U. S. 577, 581, 93 L. Ed. 895, 69 S. Ct. 775; see also **Federal Power Commission v. Hope Natural Gas Co.**, supra, 320 U. S., l. c. 610, 612. Obviously, the consumers for the period 1935-1945 would not share in any recovery of petitioner, which is not even purporting to sue in a representative capacity. Nor would any other consumer benefit thereby. This is the position taken by the FPC in its amicus brief and argument before the Court of Appeals, in support of its conclusion that the trial court lacked jurisdiction and that any recovery by petitioner would amount to a mere windfall to it. The FPC is entrusted with the duty of administering and enforcing the Act, and as a Justice of this Court had occasion to state, the Commission "has not been an unzealous guardian of national interest."*

The windfall aspect of this case is particularly striking since all of the matters complained of by petitioner occurred prior to October 19, 1945 and until that day petitioner owned no stock of, nor had any direct or indirect interest in, any of the UPU subsidiaries. Until petitioner entered on the scene, those companies had the burdens and benefits of the contracts in question: their costs of operation, their rates to customers, and their earnings to stockholders—all depended upon the entire set of facts and circumstances as then existing, including the contracts with respondent, and there is no suggestion that their customers paid excessive rates or their stockholders received an inadequate return. When petitioner bought the Dakota stock from UPU, the sale was authorized by the Securities and Exchange Commission (R. 242) and petitioner did not and does not claim that it paid more than a fair price for the utility assets and earning power it was acquiring.

---

* Mr. Justice Frankfurter in First Iowa Hydro-Electric Cooperative v. Federal Power Commission (1946), 328 U. S. 152, 187, 90 L. Ed. 1143, 66 S. Ct. 906.

Petitioner tries to reap where its predecessors did not sow. Any recovery in this case would be of no avail to consumers, who are the ultimate beneficiaries of the Act, and therefore no question of public importance is raised by the petition for certiorari. In **Layne Bowler Corp. v. Western Well Works** (1923), 261 U. S. 387, 393, 67 L. Ed. 712, 43 S. Ct. 422, in dismissing a writ of certiorari, this Court stated:

> "* * * it is very important that we be consistent in not granting the writ of certiorari except in cases involving principles the settlement of which is of importance to the public as distinguished from that of the parties * * *."

In conclusion, it is respectfully suggested that the petition for writ of certiorari to the court below should be denied.

Opinions below	1
Jurisdiction	2
Questions presented	2
Statutes involved	3
Statement	3
Summary of the argument	10
Argument	16
I. The Judicial Code does not confer jurisdiction upon District Courts to entertain private proceedings under the Federal Power Act	16
II. The District Court had no jurisdiction under the Federal Power Act to entertain the present suit and to substitute its own conception of reasonable rates for the rates filed with the Federal Power Commission pursuant to the Act	18
(A) Under the Federal Power Act jurisdiction to keep filed rates in conformity with the "just and reasonable" standard is vested exclusively in the Commission, and the role of the courts is limited to (i) aiding Commission enforcement and (ii) reviewing Commission orders, within defined limits	19
1. Summary of Parts II and III of the Act	19
2. The rate provisions: Sections 205 and 206 (a)	21
3. The doctrine of exclusive jurisdiction	22
(B) Congress's deliberate omission of a reparations provision from the Federal Power Act, for the specific reason that such a provision would be inappropriate in a statute regulating wholesale rates, confirms the intention to confer exclusive jurisdiction upon the Commission	24

(C) Section 317 of the Act has reference to the several types of judicial proceedings enumerated in preceding sections of the Act, and does not itself create or infer a private right of action 28

III. Petitioner's claim that no administrative remedies were available is wholly unwarranted and affords no basis for direct resort to the District Court 30

(A) The express sanction of the FPC under Section 305 (b) of the Act to the partial interlocking of managements between respondent and petitioner's predecessors disproves as a matter of law petitioner's claim that the joint management constituted constructive fraud on its predecessors by respondent, and prevented them from resorting to the FPC..... 32

(B) Administrative remedies were always available to the non-interlocked director (White) of petitioner's predecessors and to UPU (petitioner's vendor and the sole stockholder of petitioner's predecessors).. 34

(C) Petitioner itself failed to exhaust its administrative remedies before the FPC after its purchase in 1945..... 36

(D) Even assuming lack of all administrative remedies, the District Court nevertheless lacked jurisdiction to sustain petitioner's claims 40

Conclusion 43

IN THE

SUPREME COURT OF THE UNITED STATES.

OCTOBER TERM, 1950.

MONTANA-DAKOTA UTILITIES CO.,
a Corporation,
Petitioner,

v.

NORTHWESTERN PUBLIC SERVICE COMPANY,
a Corporation,
Respondent.

On Writ of Certiorari to the United States Court of Appeals for the Eighth Circuit.

BRIEF OF RESPONDENT.

OPINIONS BELOW.

The opinion of the District Court denying respondent's motion to dismiss is reported in 73 F. S. 149 (R. I, 112-113). Its opinion on the merits is not reported (R. V, 1883-1887). The opinion of the Court of Appeals is reported in 181 F. 2d 19 (R. VI, 1988-1995).

JURISDICTION.

Respondent agrees with petitioner that jurisdiction of this Court rests on 28 U. S. C. 1254, but denies that jurisdiction over this action is conferred by 16 U. S. C. 825p, as more fully discussed herein (pp. 28-30).

QUESTIONS PRESENTED.

The action is for damages. There is no diversity of citizenship between the parties, yet the suit was brought in the United States District Court. The complaint alleges that the action arises under the Federal Power Act and the Court held that it had jurisdiction "by implication" to enforce the reasonable rates provision of the Act and to award damages for its breach. The questions arise:

1. Whether the District Court had power or jurisdiction at the instance of a private party to enforce the Federal Power Act, or award damages for its breach.

2. Whether the District Court had jurisdiction to determine wholesale rates for public utilities for a past period, notwithstanding the existence of legal rates on file with the Federal Power Commission under Section 205 of the Federal Power Act, and to enter a judgment for the difference.

3. Whether the Federal Power Commission has primary jurisdiction for the establishment of legal wholesale rates between public utilities which would require resort to the Commission with regard to the rates or any orders affecting them by any interested party.

4. Whether it was the intention of Congress in adopting the Federal Power Act to provide a forum, either commission or court, for the recovery of reparations for past periods.

5. Whether constructive fraud and "domination" can be predicated upon interlocking directors and officers in adjoining utility companies, separately owned, where the interlocking directors and officers were authorized and approved by the Commission under Section 305 (b) of the Federal Power Act.

6. Whether a charge of constructive fraud and "domination" through authorized interlocking directors and officers supplies a legal reason for not applying to the Commission for relief from alleged unreasonable rates.

STATUTES INVOLVED.

The statutes involved are set out in the Appendix.

STATEMENT.

The scene of this controversy is laid in North and South Dakota, and the period in issue is 1935 to 1945. The two public utility properties which ultimately were acquired by petitioner were located, one above the other, north of respondent's property. All three properties had once been controlled by the same holding company, but throughout the period in issue here the two northernmost properties were controlled by one holding company, United Public Utilities Corporation (UPU), and respondent was controlled by a separate holding company, The Middle West Corporation (Middle West).

Prior to 1935, while the three public utilities were still controlled by a single holding company, their facilities had been physically interconnected and a joint management arrangement had been entered into, with the result that the three utilities were operated substantially as a single system. When the two northern companies and respondent came under the separate control of UPU and Middle West, respectively, the two holding companies

decided to continue the joint management arrangement, for reasons of economy. On UPU's part this decision was supported by a study of comparative costs and was in contrast to UPU's decision to terminate six similar arrangements relating to others of its subsidiaries.* Since the interlocking arrangement is the source of petitioner's present claim that "domination" of its predecessors precluded their obtaining administrative relief, the facts as to actual operation of the arrangement are of importance.

A single general office was maintained for the northern companies as well as respondent, and the holding company owners separately elected annually, from the operating personnel, common directors for the three corporate boards. The chief executive officer of UPU (White) was at all times a director of the northern companies but never was on the board of respondent.[1] (In addition to White's being an officer and director of UPU, his family had a substantial stock interest in that company; on the other hand, he had no interest whatever in respondent or in its parent company.[2]) White personally selected or approved the joint directors and officers before they were elected or re-elected. He testified that he had satisfied himself as to the "ability", "integrity" and "loyalty" of the joint personnel and as to the quality of their work.[3]

Each of the three operating companies was a "public utility" within the meaning of the Federal Power Act, 49 Stat. 847, 16 U. S. C. 824 et seq. In compliance with Section 305 (b) of the Act, 16 U. S. C. 825d (b),[4] each person who served as a joint director or officer at any time

2 R. IV, 1067, 1364-1366, 1380-1381.

3 R. IV, 1096-1097, 1349, 1328, 1079. In one instance, when White became dissatisfied with a joint president, he caused his removal (R. IV, 1318-1319).

4 The text of this Section is set out in the Appendix, p. 48.

during the ten-year period filed with the Federal Power Commission (FPC) his individual application for authority to hold interlocking positions. These applications were granted by the Commission upon its finding in each case that "neither public nor private interests will be adversely affected by the holding of such positions."[5]

While the three companies were operated locally as a single system, it was the practice to refer to the respective parent companies all matters of importance as to which it was thought there might be a conflict of interest.[6]

Through the ten-year period, rates and charges for the interchange of electric energy, for the use of interconnection facilities, and for pooling reserve capacity between the northern companies and respondent were established in a series of inter-company contracts. (The earliest was a 1935 oral contract and the latest was a written contract dated March 13, 1943. In 1939 the two northern companies were merged and the name taken was Dakota Public Service Company—"Dakota"; at that time the contracts were remade in the name of the successor company.[7]) All of the rates and charges were negotiated on behalf of the UPU group by White personally or, after having been initially worked out by the operating personnel, were reviewed and confirmed by him.[8] White's review was not merely perfunctory. He took pains to obtain pertinent data and in all instances secured the advice of an expert

parent) the operation of this joint management arrangement and the terms of the prevailing inter-company contracts—including the three rates in issue—were fully explored and their fairness to the UPU group was vigorously asserted by White and all other UPU witnesses, and by Scheetz, its counsel.[15]

Petitioner itself did not come upon the scene until October 19, 1945—the close of the ten-year period—when it purchased the stock of Dakota from UPU and succeeded to all of Dakota's assets by assignment.[16] The terms of the sale and purchase were approved by the SEC and by the FPC. Petitioner continued to operate under the contracts, but on August 12, 1946, it filed a complaint under the Federal Power Act, in which it asked the Commission to determine reasonable rates for the future and alleged that the rate and joint management contracts were the result of domination over its predecessors on the part of Middle West.[17] (At this stage there was no hint of petitioner's present crucial contention, that is, domination by the present respondent.) That complaint never went to hearing since new temporary rates were agreed upon between the companies for the period following the date of termination of the rate contract, August 31, 1947.[18]

On February 3, 1947, petitioner brought the present action in the District Court in South Dakota, seeking, as stated by the Court of Appeals in this case, "to recover damages according to the principles of common law" for the period from September 1, 1935, to the date of petitioner's purchase of the Dakota stock.[19] The complaint

alleged that the contracts were tainted with fraud, due to the fact that the interlocking directors and officers were involved in making them; that the rates and charges provided in the contracts were "without consideration, unjust, unreasonable and unlawful" in their entirety; and that respondent "unjustly, without consideration, fraudulently, unreasonably, unfairly and unlawfully took and received from" predecessors of petitioner the moneys sued for in the various counts.[20] The complaint asked that the contracts be declared void; that the rates and charges be declared unjust and unreasonable, and that fair and reasonable amounts be determined; also asked for an accounting and for a money judgment in specified amount.[21]

Both petitioner and respondent are Delaware corporations.[22] There being no diversity of citizenship, federal jurisdiction was ascribed to alleged violations of the Federal Power Act. The trial court sustained federal jurisdiction under the Act "by implication."[23] It held that "all of the contracts in question were presumptively fraudulent as to plaintiff's assignor and its predecessors, in view of the common directors and officers. Defendant has failed to rebut this presumption and sustain the fairness of the contracts."[24] Thus, the Court did not purport to set aside—it completely ignored—the series of orders of the FPC approving the interlocking positions; it merely decided that the relationship resulted, as a matter of law, in constructive fraud. Largely on this premise, the Court gave no weight to the other series of orders of the FPC which approved the filing of the contract rates. It determined that the rates and charges provided in the con-

tracts were unreasonable; found and supplied other rates which it determined would have been reasonable; gave judgment for the difference, in the aggregate amount of $779,958.30, inclusive of interest.[25]

On appeal by respondent, the Court of Appeals for the Eighth Circuit reversed the judgment on the grounds that the District Court was without jurisdiction to pass on the reasonableness of the rates, that the subject matter of the action was within the primary jurisdiction of the Commission, and that the administrative remedies provided in the Federal Power Act had not been exhausted.[26] The Court of Appeals did not review the merits; thus, the only determination of unreasonableness of the rates is that of the District Court, whose jurisdiction to make the determination is in issue.

25 R. V, 1960-1965.

26 R. VI, 1992-1995.

SUMMARY OF THE ARGUMENT.

The petitioner having purchased the property of the subsidiary called "Dakota" from its owner, the United Public Utilities Corporation, is seeking here to recover from respondent a damage claim based on charges that petitioner's predecessors had been defrauded by respondent through the period 1935 to 1945 due to the rates and charges contracted between them for electric energy. Absent diversity of citizenship, federal jurisdiction is predicated on the allegation that "the action arises under the Federal Power Act * * * and under a law of the United States regulating commerce under said Federal Power Act."[1] In substance the claim is that fraud is inferred from the existence of interlocking relationships among the officers and some of the directors of the respondent and the predecessors of petitioner during the period in question. From this relationship constructive fraud is alleged to have resulted, and it is alleged that petitioner's predecessors were damaged by it, but respondent was not. The fraud went into the contracts between the parties providing for interchange rates, interconnection and reserve capacity charges, according to this theory, so that the contracts are said to be void and to furnish no justification for the payments (under or over) made under them. The Court of Appeals concluded that the claim was one for damages at common law, and thus far it undoubtedly appears that it is so. However, beyond this point the contracts containing the rates and charges provisions were filed with the Federal Power Commission by the respondent with the concurrence of petitioner's predecessors. It was necessary to file them. The law required it. The filings and concurrences having been approved by the Commission, the rates and charges therein became and remain the only legal rates which could exist

1 Pet. Brief, p. 13.

between the parties. Their filing conveyed notice to the Commission, all interested rate making bodies, and the consumer-customers of these wholesale contractors. But petitioner claims that the rates and charges provided in the contracts and established as the legal rates through their filing and approval, were in fact unreasonable, hence, under Section 205 (a), unlawful. Without applying to the Commission to disestablish the filings, the petitioner brought suit in the federal District Court in 1947 to have rival rates and charges established by court decree. These were to be reasonable, hence lawful, rates and charges.

The District Court, overruling objection to the proceedings on jurisdictional grounds, determined that the filed rates and charges then existing unchallenged in the Federal Power Commission were unlawful and had been so for the ten year period from 1935 to 1945. In overruling the plea to the jurisdiction, the District Court, holding that the Federal Power Act did not explicitly provide jurisdiction in the courts for its enforcement or to award reparations or damages for its breach, concluded nevertheless that there was jurisdiction "by implication" to do so. The attack on the orders approving the filings by the Commission obviously was collateral, and the effect of the judgment of the District Court was to ignore the existence of the established legal rates, upon the ground that they were unlawful and of no validity. It seems clear that the Act did not undertake to supply either a right to reparations, damages or windfalls, or to furnish any remedy for enforcement of any such claimed right.

The pattern of the Act shows that Congress entrusted the duty to administer the statutory standard of reasonable rates to the Federal Power Commission and not to the courts, either explicitly or by implication. The consumers, not public utilities, were to be the beneficiaries of the law. If current and prospective regulation is not efficient to keep wholesale rates in line, then the entire scheme is a failure,

since consumers obviously would derive no benefit from reparations or damages collected by the wholesale utilities for past periods not included in their retail rates. The legislative history of the Act itself rejects any such construction. As is noted by petitioner in its brief,[2] Congress originally had before it a bill providing for reparations proceedings within the Commission, with enforcement referred to court action. Those provisions were eliminated from the final draft of the statute. They were dropped because contrary to the purposes of the Act, and not for the reason suggested by petitioner, namely, to leave the subject of reparations and damages for past periods to the courts. The idea which prevailed with the Committee, and which undoubtedly went into the Act, was to rely on current and prospective regulation exclusively to control the relations of wholesalers and producers with each other, not to provide a process by which a public utility might have or claim the right to go ahead receiving service at an established legal rate for a period of years, and then to maintain a court action for lump sum damages in which the customer-consumers would have no participation.

In the brief of petitioner (pages 4 and 5), it is tentatively suggested, rather than seriously argued, that Section 825 (p) (Section 317) of the Power Act "Seems to confirm jurisdiction of cases like this to the United States District Court, to the exclusion of state courts, * * *." This suggestion could be misleading unless Section 317 is read in context with the three sections immediately preceding. Those sections supply enforcement machinery for the Commission, not for private litigants. Section 317 designates the district courts as the exclusive jurisdiction for such enforcement, designates the venue for criminal and civil enforcement proceedings, which the Commission is authorized in the next preceding sections to undertake. The review was to be that provided in Sections 225 and

2 Pet. Brief, p. 9.

347 of Title 28, and no costs were to be taxed against the Commission in any case.[3] Here again the legislative history compels the conclusion that Section 317 was intended to refer only to Commission enforcement, not to private suits by public utilities against each other.

At the outset the respondent challenges any claim of fraud based upon the fact of interlocking officers and directors, since their positions had the formal approval of the Commission under authority of Section 305 (b) of the Act. Clearly, as a matter of law, no fraud may be inferred from relationships made lawful and proper by authority of the Commission exercised within the scope of its statutory powers. The record shows, therefore—the petition and brief of petitioner confirms—that there is no fraud here which can be recognized by the Court. The petitioner does not claim to have applied to the Commission, or that its predecessors or their corporate owner, at any time applied to the Commission to set aside the eleven formal orders made during the ten years drawn in question approving the positions of these corporate officials, but on the contrary the orders, like the filing approvals, stand to this day as valid, vital instruments of authorized power.

The petitioner claims that the constructive fraud alleged to arise from the authorized interlocking relationships resulted in "dominance" over its predecessors so as to enable respondent to secure the allegedly void contracts for rates and charges which were filed with the Commission. The same "dominance," so it is alleged, stood in the way of its predecessors having resort to the Commission for relief against the rates and charges, and against the alleged fraud on the petitioner. Again, the petition for certiorari in this Court and the briefs of counsel refute this contention. "Dominance" which would paralyze the active minds and bodies of the owners of the property which the peti-

---

3 Sections 314-317, inclusive.

tioner has purchased cannot be held to flow from an interlocking relationship made legal, for all of the purposes of wholesale transactions by public utilities, by proper orders of the Commission. Respondent does not wish to discuss the facts as though the scope of the present proceedings would involve the merits of these claims of fraud. That issue, together with the defenses of ratification and statute of limitations, were not reached in the Court of Appeals and are not before this Court now. But enough may be said to show beyond question that the United Public Utilities Corporation, the person who sold these properties to the petitioner; the owner of its predecessors throughout the ten year period under scrutiny, was not hampered or hindered in any way or prevented from applying to the Commission for relief at any time. No "dominance" over that interested party is pretended or claimed by the petitioner either in its petition or brief. The UPU president, who at all times was also a director of the two subsidiaries eventually purchased by the petitioner, was free to act on behalf of his properties and in his own interest. This much may be said as bearing upon the question of jurisdiction presented here. It is sufficient to show the flimsy tissue supporting the argument of "dominance" such as to prevent resort to the Commission. It destroys the excuses offered by petitioner for the failure through the ten years between 1935 and 1945, and even down to the present moment, of any person to apply to the Federal Power Commission for relief. It is assumed that petitioner thinks that, unless petitioner's predecessors were prevented by this fraud, it would have been necessary to come to the Commission in the first instance. Otherwise no excuse would be needed.

There is, therefore, both a legal reason and a factual reason apparent upon the face of these proceedings such as to warrant the Court in not accepting the excuse of "domination."

As a matter of fact, petitioner has given no reason why it could not itself have resorted to the Federal Power Commission to challenge the validity of the orders approving the filing of the rates and the orders authorizing the interlocking positions of certain of the officers and directors of the utilities. As is admitted here, petitioner actually filed a complaint with the Power Commission in February of 1946, alleging the filed rates to have been unreasonable and asking the Commission to fix new rates.[4] It offers no reason why its claim of constructive fraud such as to void the contracts then on file as the bases for the existing legal rates was not then brought to the attention of the Commission and a hearing requested on its complaint. It did not do that. It preferred to launch a collateral attack in the district court the next year, which ignored the existence of the legal rates and orders, as well, through the claim that they were unlawful and need not be considered. No such course was contemplated by the Federal Power Act, and approval of that course would do violence to clear purposes of the statute. A judgment in the district court which would enable the utility to enrich itself at the expense of another would have the effect to directly oppose the regulatory program designed to pass on to retail users all of the profits and benefits which should go into the rates. Utility rate making must not be left to circumstances so fortuitous and uncertain. Such a construction of the Power Act would result in the regulation of interstate commerce public utilities for the benefit of the utility rather than its retail customers.

---

[4] Pet. Brief, p. 12.

ARGUMENT.

I.

The Judicial Code Does Not Confer Jurisdiction Upon District Courts to Entertain Private Proceedings Under the Federal Power Act.

The complaint alleged that "the action arises under the Federal Power Act, as hereinafter more fully appears, and under a law of the United States regulating commerce under said Federal Power Act" (R. I, 2). The District Court sustained this claim of jurisdiction. In this Court petitioner argues that "the provisions of the Judicial Code defining jurisdiction of the District Courts are enough" (Pet. Brief, p. 17). Its concern with the Power Act is whether it "deprives the courts of jurisdiction otherwise vested in them by the Judicial Code" (Pet. Brief, p. 15; cf. id. p. 17).

Petitioner's logic here is difficult. "Deprives" connotes taking away something that existed before. The Federal Power Act could "deprive" district courts of jurisdiction only if jurisdiction existed apart from and prior to the Federal Power Act. But the only jurisdiction referred to by petitioner as being "deprived" by the Federal Power Act is the jurisdiction created by the provisions of the Judicial Code referring to suits arising under "laws of the United States" or "any law regulating commerce", and petitioner does not refer to any such law except the Federal Power Act itself. What, then, is the jurisdiction "otherwise vested in [the district courts] by the Judicial Code" of which the Federal Power Act "deprives" them?

The question seems to answer itself and to expose the fallacy of petitioner's reliance upon the Judicial Code

per se. The Judicial Code confers jurisdiction (among other things) over matters arising under laws of the United States and laws regulating commerce; it does not itself designate what those "matters" are. In enacting a law regulating commerce, as in any other law, Congress may decide to create or not to create a particular right or remedy. If Congress did not intend in enacting a particular law to create a right or remedy by court proceedings, the Judicial Code would not supply such an intent. *Switchmen's Union of N. A. v. National Mediation Board* (1943), 320 U. S. 297.

The Judicial Code was with us when this Court decided *Texas & Pacific Ry. Co. v. Abilene Oil Co.* (1907), 204 U. S. 426; *General Committee, etc., v. Missouri-Kansas-Texas R. Co. et al.* (1943), 320 U. S. 323, and the many other cases holding that federal courts lacked jurisdiction to grant relief under various laws of the United States, including laws regulating commerce. So here, the Judicial Code is of no ultimate avail to petitioner unless the Federal Power Act first creates a right and remedy in petitioner.

The real inquiry, then, is whether Congress intended, in enacting the Federal Power Act, that federal district courts should have jurisdiction to entertain proceedings of the type here involved, to enforce rights said to be created by the Act, for which no remedy was provided.[1]

---

1 The problem of statutory interpretation as to whether a right or remedy by court proceedings was intended to be created under a particular law of the United States, if substantial and not merely colorable, might itself present a federal question. *Gully v. First National Bank* (1936), 299 U. S. 109. In this case, however, in view of the rule of primary jurisdiction firmly established by this Court in 1907 and uniformly followed in numerous subsequent cases (see pages 22-24, infra) the claim that a judicial remedy was intended to be created under the Federal Power Act would seem to be plainly wanting in substance so that dismissal for want of jurisdiction would have been proper. *Levering & G. Co. v. Morrin* (1933), 289 U. S. 103, 105-6; *California Water Service Co. v. Redding* (1938), 304 U. S. 252, 255. But even if it be assumed that the question of statutory interpretation is not plainly wanting in substance, if the answer to that question is that Congress did not intend to create the remedy sought by petitioner here, the Judicial Code could not become the basis of jurisdiction to sustain petitioner's claims.

II.

The District Court Had No Jurisdiction Under the Federal Power Act to Entertain the Present Suit and to Substitute Its Own Conception of Reasonable Rates for the Rates Filed with the Federal Power Commission Pursuant to the Act.

The complaint, in invoking the Federal Power Act as the basis of federal jurisdiction, proceeds on the theory that petitioner had a right, under the Act, to obtain a determination by the District Court as to what rates would have been just and reasonable, and to recover the difference between the amount so determined and the amount paid and received under the rates actually filed.[2] The District Court held that the Act did not specifically authorize such a suit, but that,

> "in the absence of an adequate administrative remedy, the only relief remaining to those who have sustained damage by reason of such a breach of statutory duty as is set forth in the complaint, is in resort to the Court which, in my opinion, is vested with the necessary authority, as well as the duty to entertain such suit, *by implication.*" (Emphasis supplied).

Referring to a similar claim of implied judicial power under the Railway Labor Act, this Court said, through Mr. Justice Douglas, in *General Committee etc. v. Missouri-Kansas-Texas R. Co. et al.* (1943), 320 U. S. 323, 337:

> "In view of the pattern of this legislation and its history the command of the Act should be explicit and the purpose to afford a judicial remedy plain before an obligation enforcible in the courts should be implied."

---

2 The complaint also was founded upon alleged violations of the filing requirements of the Act, but all such contentions were rejected by the Court of Appeals and have been abandoned by petitioner.

With reference to the Federal Power Act, it seems clear that "the pattern of this legislation and its history" do not reveal any purpose to afford a private right of action, but plainly show a contrary purpose.

(A) Under the Federal Power Act jurisdiction to keep filed rates in conformity with the "just and reasonable" standard is vested exclusively in the Commission, and the role of the courts is limited to (i) aiding Commission enforcement and (ii) reviewing Commission orders, within defined limits.

Whether Congress intended to create a private right of action to determine reasonableness of rates cannot be ascertained, as petitioner has sought to do, from an isolated sentence or two of the Federal Power Act. Part II (Sections 201 to 209, 16 U. S. C. 824 to 824 h, inclusive) and Part III (Sections 301 to 319, 16 U. S. C. 825 to 824 r, inclusive) of the Act were enacted together.[3] Their provisions are related and integrated parts of a comprehensive regulatory program, and all must be taken in their legal and historical context in determining the roles which Congress assigned to the Commission and to courts respectively. Accordingly, before examining the rate sections (Sections 205 and 206, 16 U. S. C. 824d and 824e) in detail, a brief survey of the whole of Parts II and III will be helpful.

1. Summary of Parts II and III of the Act.

Part II contains a series of provisions, both substantive and administrative, concerning "public utilities," and Part III contains additional provisions, mostly administrative in character, concerning "licensees" and "public utilities". Throughout Part II there is not a single mention of any court or any judicial function, whereas "the Commission" is everywhere. Just as this Court said of

---

3 Part I of the present Act is the Federal Water Power Act of 1920 relating to so-called "licensees" and is not here involved.

the essentially similar Natural Gas Act, 52 Stat. 821, 15 U. S. C. 717 et seq., in *Federal Power Commission v. Hope Natural Gas Co.* (1944), 320 U. S. 591, 617:

> "Congress has entrusted the administration of the Act to the Commission not to the courts."

The keynote of *Commission* jurisdiction is found in the very first section (Section 201, 16 U. S. C. 824):

> "(b) The provisions of Sections 824-824h of this title shall apply to the transmission of electric energy in interstate commerce and to the sale of electric energy at wholesale in interstate commerce, • • •. *The Commission shall have jurisdiction* over all facilities for such transmission or sale • • •
>
> • • • • • • • •
>
> "(e) The term 'public utility' • • • means any person who owns or operates facilities *subject to the jurisdiction of the Commission* under Sections 824-824h of this title." (Emphasis supplied.)

In each of the succeeding sections of Part II and Part III dealing with particular aspects of utility regulation substantive and administrative provisions are interwoven and the entire administration is entrusted to the Commission.

The first mention of any judicial function or authority is in the section on judicial review of Commission orders (Section 313, 16 U. S. C. 825 l) and the enforcement sections (Sections 314-317, 16 U. S. C. 825m to 825p, inclusive). The former section provides for limited review by circuit courts of appeals—not district courts. As to the several enforcement sections, the role of the Commission is again primary, but Congress strengthened its hand by authorizing it to invoke the aid of the courts in several different ways. Thus the Commission may seek injunctions to prevent violations or enforce compliance (Section 314, 16 U. S. C. 825m), it may request the institution of criminal

proceedings (Sections 314 and 316, 16 U. S. C. 825m and 825o), and it may fix the amount of certain forfeitures recoverable by the United States (Section 315, 16 U. S. C. 825). As to Section 317 (16 U. S. C. 825p), the Court of Appeals correctly held that it was designed to give federal courts exclusive jurisdiction (i. e., exclusive of State courts) over the various types of court proceedings specifically authorized in and by the three sections immediately preceding it, and has no reference to private suits of any kind.[4]

2. The rate provisions: Sections 205 and 206 (a).[5]

As in the statute as a whole, so also, in Sections 205 and 206 (a) there is the intermingling of substantive and administrative provisions, and the administrator is exclusively the Commission. In paragraphs (a) and (b) of Section 205 are the substantive standards: rates are to be just and reasonable—otherwise they are declared to be "unlawful"—and may not be discriminatory or preferential. In paragraphs (c), (d) and (e) of Section 205 and in paragraph (a) of Section 206 are provided the administrative means to achieve these standards: schedules of rates are to be filed with the Commission and kept open for public inspection; no change may be made in filed rates except after notice to the Commission and the public by appropriate filing; the Commission may, upon complaint or on its own motion, suspend the operation of a new rate schedule pending hearing; and once a rate has become effective the Commission may, on complaint or on its own motion, hold a hearing to determine whether it conforms with the substantive standards, and if not, may determine, and compel adoption of, a proper rate under those standards. By Section 206 (b) the Commission is empowered to investigate

---

4 See pages 28-30, infra. The full text of this Section is set out in the Appendix, p. 50.

5 The full text of these provisions is set out in the Appendix, pp. 45-47.

and determine costs of production and transmission in certain situations where it has no authority to establish a rate.

Read by themselves, and even more so when read in their statutory context, Sections 205 and 206 (a) say plainly and unmistakably: *"The Commission is to have exclusive jurisdiction—through the mechanics of filing, publicity, complaints, investigations, hearings and orders, as detailed in the Act—to regulate wholesale rates in conformity with the standards set forth in Section 205 (a) and (b)."* These sections were patterned closely after the rate provisions of the Interstate Commerce Act (49 U. S. C. 1 et seq.) and similar statutes[6] with a few important changes occasioned by the difference in the subject matters (pages 24-28, infra). They embodied a half century's accumulated experience and doctrine on rate regulation, which petitioner now asks this Court to ignore.

3. The doctrine of exclusive jurisdiction.

The doctrine of exclusive jurisdiction of administrative agencies originated in decisions of this Court under the Interstate Commerce Act, holding that courts are without jurisdiction to find or determine the reasonableness of rates filed with the Interstate Commerce Commission but not found by that Commission to be unreasonable—notwithstanding the election given by Section 9 of that Act (of which there is no counterpart in the present Act) to a person claiming to be damaged to make complaint to the Commission or to bring suit in a district court of the United States. The venerability and vitality of the doctrine were expressed by this Court in *United States v. Interstate Commerce Commission* (1949), 337 U. S. 426, 437:

---

6 Hearings, House Committee on Interstate and Foreign Commerce, on H. R. 5423 (74th Cong., 1st Sess.), pp. 392, 393, 2170.

"But it has been established doctrine since this Court's holding in Texas & P. R. Co. v. Abilene Cotton Oil Co., 204 U. S. 426, * * * that a shipper cannot file a § 9 proceeding in a district court where his claim for damages necessarily involves a question of 'reasonableness' calling for exercise of the [Interstate Commerce] Commission's primary jurisdiction."

The doctrine has been applied in multitudinous cases and by now—

"has pervaded the entire realm of administrative law. Railroad legislation developed the doctrine, public utility expanded it, tax litigation extended it, and now the rapidly enlarging fields of labor and industry regulation have adopted it."[7]

The *Abilene* case had emphasized the need for *uniformity* as a rationale of the doctrine.

The recent case of *United States v. Jones* (1949), 336 U. S. 641, contains a succinct statement of another important rationale of the doctrine, namely, *"expertise"*:

"Not only is rate making essentially legislative in the first instance. The policy of judicial restraint is one having regard for the *expertise of special agencies charged with performing the rate-making function and for the inherent actual, as well as legal, disability of courts to execute that function.* Such doctrines or policies as those of 'primary jurisdiction' and ex-

---

7 51 Harv. L. Rev. (1938) 1251, 1252. The quotation is from a note entitled "Primary Jurisdiction—Effect of Administrative Remedies on the Jurisdiction of Courts," in which "primary jurisdiction" is shown to have two main branches, namely: (1) exclusive jurisdiction, where the court has no jurisdiction of the subject matter at all, and the commission must decide the question, with judicial review ordinarily only to safeguard the requirements of due process of law, and possible court action to enforce the commission's order; and (2) exhaustion of remedy, where the court has jurisdiction of the subject matter but the suit is premature, and the court refuses to decide the case until all possible administrative determination has been completed. Cf. K. C. Davis, Administrative Law Doctrines of Exhaustion of Remedies, Ripeness for Review, and Primary Jurisdiction (1949-1950), 28 Texas Law Review, p. 168 et seq., p. 400 et seq.

haustion of administrative remedies lie at the very root of the problem." (Emphasis supplied.) (l. c. 652)[8]

Both grounds of decision—*uniformity* (Abilene) and *expertise* (Jones)—are valid and relevant in the case of the Federal Power Act, and each helps to illuminate Congress' purpose and intent. To permit the district courts to determine reasonableness of filed rates retrospectively in private litigation would do violence to both.

(B) Congress's deliberate omission of a reparations provision from the Federal Power Act, for the specific reason that such a provision would be inappropriate in a statute regulating wholesale rates, confirms the intention to confer exclusive jurisdiction upon the Commission.

Petitioner has attempted to distinguish the cases applying the doctrine of exclusive jurisdiction under the Interstate Commerce Act by pointing to the absence of a provision in the Federal Power Act authorizing the granting of reparations (Pet. Brief, pp. 23-4). The theory of the argument seems to be that the absence of a reparations remedy before the Commission warrants the *inference* that a private right to direct relief in the district courts was intended. But when the particular and cogent reasons for omitting a reparations provision from this statute are taken into account, the intention of Congress to exclude any private right to sue stands out clearly.

The controlling consideration in enacting the statute was to regulate only *wholesale* rates (rates charged pur-

---

8 See also the following statement in *Mississippi Valley Barge Line Co. v. United States et al.* (1934), 292 U. S. 282, 286:

"The structure of a rate schedule calls in peculiar measure for the use of that enlightened judgment which the [Interstate Commerce] Commission, by training and experience is qualified to form [citing cases]. It is not the province of a court to absorb this function to itself."

chasers for resale, not those charged retail consumers)—yet its aim was to protect *retail* consumers.[9] If the ultimate (retail) consumers ever are to benefit by regulation of wholesale rates, compliance with the substantive standards contained in Section 205 (a) and (b) must be attained during the period when a particular rate is actually in effect, i. e., must be achieved by prospective action and not *ex post facto* through recovery of reparations. This follows from the very nature of the relationship between wholesale rates and retail rates. If wholesale rates are maintained in conformity with statutory standards, by prospective regulation, the ultimate consumer will be the beneficiary. This Court said in *Federal Power Commission v. Interstate Natural Gas Co.* (1949), 336 U. S. 577, 581, immediately after the passage quoted in footnote 9 herein:

> "The rates charged a wholesaler are part of its costs, reflected in its rate base. Reduction of those costs normally will lead in due course to reduction in its resale rates, unless we are to assume that the passage of the Natural Gas Act was an exercise in futility."

On the other hand, if wholesale rates are not kept in line by prospective regulation, ultimate consumers will derive no benefit from a later recovery of reparations—the retail rates actually paid by them during the past period in question having been predicated on the wholesale rates actually in effect during such period—and the only result will be but a windfall to the wholesaler.

---

[9] See *Federal Power Commission v. Interstate Natural Gas Co.* (1949), 336 U. S. 577, 581, and *Federal Power Commission v. Hope Natural Gas Co.* (1944), 320 U. S. 591, 610, 612, relating to the parallel provisions of the Natural Gas Act, and particularly the following statement in the *Interstate Natural Gas Co.* case (l. c. 581):

> "The aim of the [Natural Gas] Act was to protect ultimate consumers of natural gas from excessive charges * * *. They were the intended beneficiaries of rate reductions ordered by the federal commission, * * *."

The establishment by a district court *ex post facto* of a different rate from that on file in the Commission would accomplish none of the purposes of the Federal Power Act. Obviously the intent of the Act was not to create damage windfalls between wholesale utilities long after any differences in balance which may have existed between them had been distributed to their consumer-customers. The failure of the Act to support such a result as this neither implies a violation of the Act itself nor supports the claim that either of the wholesalers now has a *right without a remedy*. The legislative history contains specific and pointed evidence that such result would be precisely against the reasoning of Congress. As originally introduced, the Senate and House Bills (S. 1725 and H. R. 5423, 74th Cong.) each contained a reparations provision, providing that (a) the Commission could order reparations for past payments of unreasonable rates, on complaints filed within two years after payment, and (b) if the utility did not comply, action could be brought on the Commission's order in a court of competent jurisdiction. However, these and certain other provisions were omitted by the Senate Committee for the express reason that:

> "They are appropriate sections for a State utility law, but the Committee does not consider them applicable to one governing merely wholesale transactions." [10]

This latter conclusion was arrived at by the Committee after hearing testimony of the General Solicitor of the National Association of Railroad and Utilities Commissioners as follows:

> "That is an entirely proper provision in a railroad statute. When a man goes to the railroad station with a load of goods to ship somewhere he has to ship at the rate that is fixed in the tariff. He must make the

10 Senate Report No. 621, 74th Cong., 1st Sess., p. 20.

shipment then; and he ought to be able to come thereafter to the Commission and show that he was required to pay an unreasonable rate, if it was unreasonable, and to ask for a determination of a reasonable rate and get reparation that is due him for any overpayment. That is perfectly proper. But this bill relates only to service *between the wholesale generating or producing company and the distributing utility.* We question whether the *public interest* will be served by giving any company the right to go ahead receiving service at the established rate for 2 years, and then to bring a complaint before the Federal Commission that the rate has been unreasonable." (Emphsis supplied.) [11]

Thus, the determination of Congress to rely on prospective regulation exclusively and not to provide for private suits to recover reparations was deliberate, occasioned by the specified reason that only wholesale rates were involved. If the suggested reparations provisions had been retained, the Commission (not the courts, except by way of enforcing Commission determinations) would have had the power (not indefinitely, but subject to a two-year time limitation) to adjust a particular rate retrospectively, to accord with the just and reasonable standard. In such case the filed rates would not have been conclusively "lawful," i. e., in conformity with the substantive standard. But Congress concluded that the purpose of benefiting ultimate consumers would not be served by permitting retrospective determinations of reasonableness of wholesale rates. It preferred to make the filed rate conclusively the lawful rate and to rely upon the statutory machinery of filing, publicity, complaints, hearings, and reports to maintain filed rates in conformity with the standard of reasonableness.

---

11 Hearings, Committee on Interstate and Foreign Commerce, Public Utilities Holding Companies, on H. R. 5423, 74th Cong., 1st Sess., p. 1685.

Neither the statutory language nor the legislative history permits the conclusion that, by declining to give the Commission a limited reparations power for the reason disclosed in the hearings, Congress inferentially conferred an unlimited reparations power on the courts. To the contrary, both the language of the Act and the legislative history make it abundantly clear that Congress intended that no private rights to sue for reparations should exist.[12]

(C) **Section 317 of the Act has reference to the several types of judicial proceedings enumerated in preceding sections of the Act, and does not itself create or infer a private right of action.**

Neither the complaint below nor petitioner's brief in this Court claims that any specific section of the Federal Power Act confers jurisdiction upon the District Court. However, after referring to the Judicial Code as a sufficient source of jurisdiction, the brief suggests that Section 317 of the Federal Power Act, 16 U. S. C. 825p[13] "seems to confirm jurisdiction of cases like this to the United States District Courts * * *" (Pet. Brief, p. 5, compare id. p. 17).

When Section 317 is read in the light of the three immediately preceding sections, it is clear that it has no relevance at all to cases such as this. Those sections provide for enforcement of the Act by various types of proceedings at law and in equity: injunctions, forfeitures, mandamus actions, and criminal proceedings. Section 317 says that federal courts are to have jurisdiction in the enumerated classes of proceedings, to the exclusion of the State courts. It is not necessary to look elsewhere for any additional meaning of Section 317.

---

12 No right or remedy to attack public utility wholesale rates fixed by contract, on the ground of unreasonableness, existed at common law: *Arkansas Natural Gas Co. v. Arkansas R. R. Commission et al.* (1923), 261 U. S. 379; *Southern Iowa Electric Co. v. City of Chariton, Iowa, et al.* (1921), 255 U. S. 539; *City of Paducah et al. v. Paducah Ry. Co.* (1923), 261 U. S. 267.

13 The full text of this Section is set out in the Appendix, p. 50.

Here, again, the legislative history fully supports the conclusion that Section 317 was intended only to refer to Commission enforcement, not private suits. In their official statements to Congress concerning the proposed legislation, Commissioner Clyde L. Seavey and Solicitor Dozier DeVane of the Federal Power Commission said:[14]

> "Sections 311 and 312 [now Sections 314 and 317 of the Act] give to the Commission power to resort to appropriate United States courts for the enforcement of the provisions of the act and its orders and give to such courts the necessary authority to enforce the same."

Petitioner refers (Pet. Brief, p. 18) to two district court cases arising under the Securities Exchange Act of 1934, 15 U. S. C. 78 et seq., as involving "a similar question." These were cases applying the familiar tort principle that a violation of a statutory prohibition will create a right of action in favor of a person injured thereby, if he was of the class intended to be protected. In each of those cases the question was properly treated as a matter of legislative intent as shown by the entire statute in question, its legislative history.[15] In the present case, on the other hand,

---

14 Respectively: 74th Congress, 1st Session, Hearings before the Committee on Interstate and Foreign Commerce on H. R. 5423, p. 388, and Hearings before the Committee on Interstate Commerce on S. 1725, p. 249.

15 In *Massachusetts Universalist Convention v. Hildreth & Rogers Co.* (1949), 87 F. S. 822, another judge of the same district court which had decided *Remar v. Clayton Securities Corporation* (D. C. Mass., 1949), 81 F. S. 1014, one of the two cases relied upon by petitioner, held that there was no intention to create a private remedy under the Federal Communications Act, saying:

> "The only function of the courts in the enforcement of the Act is the exercise of the right to enforce or review orders of the Commission under Sections 401 and 402 of the Act. * * *
>
> "In the light of the scheme of enforcement by means of an administrative agency which Congress has chosen to select, it cannot be held that Congress intended to create by implication additional rights such as those for which plaintiff contends. The Communications Act is not designed primarily as a new code for the judgment of conflicting private rights through adjudication. Rather it expresses a desire on the part of Congress to maintain, through appropriate administrative control, a grip on the dynamic aspects of radio transmission." Federal Communications Commission v. Pottsville Broadcasting Co.,

petitioner is not a member of the class intended to be benefited, as is apparent from the text of the statute and the legislative history discussed supra, pp. 19-21, and the decisions of this Court under the comparable Natural Gas Act, *Federal Power Commission v. Interstate Natural Gas Co.* (1949), 336 U. S. 557, 581, and *Federal Power Commission v. Hope Natural Gas Co.* (1944), 320 U. S. 591, 610, 612, 659. Furthermore, the present case involves not a simple violation of a prohibition, as in the cases cited by petitioner, but a determination of the reasonableness of rates as to which jurisdiction of a court in the first instance is not to be inferred. The importance of this distinction is cogently brought out in the recent opinion of the Court of Appeals for the Second Circuit in *Civil Aeronautics Board et al. v. Modern Air Transport, Inc.* (1950), 179 F. 2d 622, 624-625.

Petitioner apparently seeks to find in Section 317, and in the two cases cited by it relating to a wholly different statute, a substitute for the reparations provision which Congress considered and rejected in enacting this statute. Congress having shown its contrary intention so clearly, petitioner's effort must fail.

III.

Petitioner's Claim That No Administrative Remedies Were Available Is Wholly Unwarranted and Affords No Basis for Direct Resort to the District Court.

The Court of Appeals held that none of the contentions of petitioner, including the claim that "defendant's acts

---

309 U. S. 134, 138, 60 S. Ct. 437, 439, 84 L. Ed. 656. The enforcement of the Act by the Commission would be hindered rather than aided if the plaintiff's contentions were correct. The problem of defining the public 'interest' under the Act is one appropriately left to the Commission rather than in the first instance to the courts, for it is one which is complicated by problems peculiar to the radio industry" (l. c. 825).

These considerations apply with at least equal strength to rate making in the public utility field.

were fraudulent because defendant and plaintiff's predecessors had common officers", justified the District Court in awarding damages to petitioner (R. VI, 1994). Petitioner challenges this holding by advancing the theory that, even if the Commission has exclusive jurisdiction over rates where a complainant is free to invoke its protection prospectively, the District Court must have had jurisdiction to examine the question of reasonableness retrospectively in this case because "domination" through interlocking managements prevented timely recourse to the Commission.

This theory rests on four separate premises, each of which is essential to sustain it:

(a) That the interlocking of management between respondent and petitioner's predecessors constituted constructive fraud amounting to "domination" by the former over the latter (Pet. Brief, p. 12).

(b) That this "domination" prevented timely recourse to the Commission (Petition, p. 5; Brief, pp. 16, 21, 22, 26).

(c) That since the Commission has no reparation power, no resort to the Commission was available to petitioner after it came upon the scene in 1945 (Pet. Brief, pp. 3, 16, 22).

(d) That the District Court had jurisdiction to award reparations if the Commission could not do so (Pet. Brief, pp. 3, 16, 28).

Each of these premises is unsound and petitioner's conclusion bottomed thereon is untenable.

(A) The express sanction of the FPC under Section 305 (b) of the Act to the partial interlocking of managements between respondent and petitioner's predecessors disproves as a matter of law petitioner's claim that the joint management constituted constructive fraud on its predecessors by respondent, and prevented them from resorting to the FPC.

Section 305 (b) of the statute, 16 U. S. C. 825d (b), provides that

> "* * * it shall be unlawful for any person to hold the position of officer or director of more than one public utility * * * unless the holding of such positions shall have been authorized by order of the Commission upon due showing in form and manner prescribed by the Commission, that neither public nor private interests will be adversely affected thereby."[16]

This provision is broad enough to cover all interlockings of management between public utility companies subject to the Act, whether or not the particular companies happen to have physical connections or business relationships in addition to the interlockings. The question of adverse effect on public or private interests must necessarily be decided by the Commission in light of the particular facts presented,[17] and if there are known to be important interconnections and business relationships between two public utilities having common personnel, this obviously is a factor of great importance.

---

16 The full text of this Section is set out in the Appendix, p. 48.

17 In denying the applications prayed for in *Matter of Applications of John Edward Aldred et al.* (1940), 2 FPC 247, 260, the Commission said:

> "By the enactment of Section 305 (b) of the Act, Congress made unlawful the holding of so-called multiple directorships unless the holding of such positions shall have been authorized by order of this Commission, and placed the burden for showing that neither public nor private interests will be adversely affected thereby upon the applicant. Obviously, therefore, this Commission is required to inquire into and determine with respect to each application presented for its approval, whether the circumstances and conditions found therein are such as may reasonably be expected to accomplish that purpose."

On the other hand, the Commission's jurisdiction under Sections 205 and 206, already discussed in detail (pp. 21-22, supra), extends broadly to all intercompany contracts establishing rates, whether or not there is any interlocking of personnel between the parties. But where interlocking does exist, that fact is necessarily known to the Commission and presumably has an important bearing on the nature and extent of the Commission's actual scrutiny of a particular rate schedule in the exercise of its various statutory powers.

In the present case, plaintiff's predecessors and respondent were all "public utilities" within the meaning of the Act. Thus, the Commission had two separate but complementary sources of jurisdiction in dealing with the actual facts of the case: (1) Over the ten-year period 13 separate applications were filed and allowed in 11 orders issued under Section 305 (b) (R. I, 324-343, 353-362). The Commission thus had many occasions to consider the possible effects on public or private interests of the interlockings here involved. It had the power and duty to do so in light of the known fact that there were continuing business relationships of prime significance between the companies.[18] (2) The Commission had complete jurisdiction also to control the basic terms of those business relationships under Sections 205 and 206. It had the power and duty to do so more especially in light of the known fact that the contracting parties had interlocking managements.[19]

---

18 Furthermore, the question of possible adverse effect on public or private interests was subject to reopening at any time or from time to time throughout the ten-year period, inasmuch as each of the Commission's orders granting an application to be a director or officer of more than one company expressly reserved to the Commission the power to reopen the question in the future (R. I, 357-362). At no time in the ten-year period did the Commission ever question the propriety of continuing any of the interlockings authorized by its orders in this situation (R. V, 1510, 1587-1588).

19 In addition to analyzing data contained in the filed rate contracts, the FPC inquired about the technical phases of the operation of the contracts, and requested further data relating to the rates, prior to making certain of the orders approving the filings (see, e. g., as to the interconnection charge: R. I, 277-282; and again R. I, 290-296, when the FPC

With both sides of the problem before it, each bearing directly upon the other, the Commission over a ten-year period entered 11 orders authorizing interlockings and accepted 8 different rate filings involving respondent and petitioner's predecessors, and never raised any question as to the propriety of continuing the interlockings on the one hand or as to the justness and reasonableness of the rate contracts on the other hand.[20]

No interested consumer, stockholder, municipality or other person or agency ever requested it to do so, and none of the orders which the Commission entered in connection with the above matters was ever made the subject of judicial review under Section 313 by "any person, State, municipality, or State commission aggrieved" (R. V, 1587-1588).

No joint management arrangement thus entered into in compliance with the law and procedure of the Act can give rise to constructive fraud. Nor can it become the basis for a collateral attack on that agency's jurisdiction. Thus, the first premise which underlies petitioner's theory is invalid.

(B) Administrative remedies were always available to the non-interlocked director (White) of petitioner's predecessors and to UPU (petitioner's vendor and the sole stockholder of petitioner's predecessors).

The second difficulty with petitioner's argument at this point is that it overlooks the all-important director of each

---

inquired into certain aspects of the reserve capacity charge). Furthermore, most detailed information as to the generating capacity of each plant, demands, reserve capacities and apportionment of the resulting charges was supplied to the FPC at least yearly in the Supplements to the Interchange Capacity Agreement (R. I, 300-321, 248-257). Again the FPC received throughout the period verified Annual Reports showing financial statements and such matters as relations with affiliated and non-affiliated companies, production costs, rates, rents, interchanged power and method of settlement thereof and statistics concerning the generating facilities (R. II, 643-647).

20 R. I, 357-362, 34, 35, 43, 61, 68, 87, 103, 108-111, 267-269, 283-285, 299-300, 353.

of petitioner's predecessors who was not on the board of respondent at any time: Samuel W. White, the president of UPU. Petitioner did not even purport to show that White was prevented from resorting to the Commission at any time within the ten-year period.[21]

White's complete independence of his fellow directors, as well as his energy and resourcefulness in upholding the interests of his own companies, are conclusively demonstrated by the whole record of evidence, the highlights of which are summarized in the Statement, supra, pp. 4-7.[22] The evidence established that White was free and willing to do everything necessary to promote and protect the interests of the northern companies. There is not the slightest factual basis for suggesting that he would not have been equally free and willing to complain to the FPC if the interests of the UPU subsidiaries had so required. Indeed, he personally took an active and important role in the dealings of the northern companies with the regulatory agencies, including arrangements relating to the filing of the contracts with the FPC (R. IV, 1177-1178, 1224-1225).

Apart from White personally, UPU was a company having other directors, officers and stockholders, not to

---

21 In the fourth paragraph of its Specification of Errors (Pet. Brief p. 10) petitioner refers to "the findings of the Trial Court that the petitioner's predecessors were from 1935 to 1945 under the domination of the defendant [respondent] *and therefore unable to resort to the Commission* * * *." (Emphasis supplied.) While the trial court did refer, in one of its Conclusions of Law, to "the fact that plaintiff's assignor and its predecessors were under the domination and control of the defendant" (Conclusion 18, R. V, 1964), there is no Finding or Conclusion dealing directly with the question of whether petitioner's predecessors were or were not able to resort to the Commission; nor is there any Finding or Conclusion on the question of whether White or UPU were precluded from resort to the Commission.

22 Cf., the following passage in the opinion of the District Court:

"I have no doubt but what Mr. White used his best judgment and his energies in an effort to so conduct those companies as to produce for the holding company, United Public Utilities, the greatest profit that he could, but I am convinced from the evidence in this case that in passing upon the conduct of these joint directors and officers in the transactions between the corporations which were controlled by them and which were operated by them, that he also had in mind the benefit which might accrue to some other corporation that he had [referring to a wholly owned subsidiary of UPU which supplied coal to the northern companies and respondent]" (R. V, 1886).

mention its own employees, engineers and attorneys. It cannot be questioned that UPU's access to the Commission was free and unrestrained at all times during the period—even if the contrary be assumed as to the northern companies themselves for the sake of argument. As the sole stockholder of those subsidiaries, upon which it depended for at least 60% of its net earnings, UPU had a direct and important financial interest in the fairness of the intercompany contracts (R. IV, 1094). Had there been any reason to complain of the contracts in whole or in part, UPU could have complained to the Commission at any time. There is nothing in the Act limiting the right of complaint to a contractual party; on the contrary, the regulatory pattern depends upon providing the widest possible publicity and opportunity to complain about filed rates. UPU never made any complaint or sought any other administrative remedy; whether because it had no grievance, or because it failed to voice it, is here unimportant.

Petitioner, besides being assignee of the former UPU subsidiaries, is the vendee of UPU. UPU's failure to make any use of the administrative remedies which were fully and freely available to it involves the petitioner. Thus even if assuming arguendo that mere absence of other remedies were sufficient to confer jurisdiction on the District Court, this particular basis of jurisdiction would not be available to petitioner.

(C) Petitioner itself failed to exhaust its administrative remedies before the FPC after its purchase in 1945.

Even if it be assumed that petitioner's vendor, as well as its predecessors, had no administrative remedies (violent assumption), petitioner itself did have certain remedies which it failed to pursue after its purchase of the Dakota stock in 1945.

Petitioner's brief devotes much attention to the question of whether the Commission has power to award reparations

under the Act, but this is not in issue. The Court of Appeals did not hold, and neither the respondent nor the Commission has asserted, that the Commission does have such power. But it does not follow that petitioner had no remedies under the Act.

Originally petitioner complained that improper, irregular and illegal filings of the contracts with the Commission were such as to render all of the filings, and the rates and charges founded thereon, illegal. That was the position in this case in the Court of Appeals. But the point has been abandoned in the petition for certiorari and need not further concern us. Whether constructive fraud, as complained of, due to the authorized interlocking officers and directors of the parties, could in any circumstances amount to a claim of fraud upon the Commission is questionable. Petitioner does not say so in its original complaint, but for the purpose of this argument let us concede (while actually denying) that the complaint of constructive fraud on petitioner's predecessors through which allegedly void contracts were negotiated and made amounts to a claim of fraud on the Commission, as well as on the other party to the contract.

Upon such assumption, a complaint so challenging the validity of the filed and legal rates would involve an attack upon the orders of the Commission approving those filings and should be addressed to the Commission. No such collateral attack as that attempted here would be permissible even in those circumstances. *Adams v. Nagle et al.* (1938), 303 U. S. 532; *Watab Paper Co. v. Northern Pac. Ry. Co.* (C. C. A. 8, 1946), 154 F. 2d 436, 438; *Tilney et al. v. City of Chicago, Ill., et al.* (C. C. A. 7, 1943), 134 F. 2d 682, 683; 42 Am. Jur., paragraphs 158, 159, pp. 514-517.

Petitioner asserts that the Commission "is not specially qualified to deal with" the issue of fraud (Pet. Brief, p. 26). There are two complete answers to any such contention:

1. No tribunal is as well equipped as the FPC to understand and determine a fraud issue such as the one assumed here, since it alone has a backlog of specific information both as to the technical features of the rates and as to the operation of the contracts.[23]

2. Where the perversion of an agency's own processes by fraud is alleged, "Every tribunal has inherent power to re-open and revise a decision induced by fraud." (United States Supreme Court Justice Roberts, as Umpire for the Mixed Claim Commission, United States and Germany, Opinions and Decisions, January 1, 1933—October 30, 1939, page 1127.) Cf. *Lane v. United States ex rel. Mickadiet* (1916), 241 U. S. 201; *Tagg Brothers and Moorhead v. United States* (1930), 280 U. S. 420; *Hanlon v. Town of Belleville et al.* (1950), 4 N. J. 99, 71 A. 2d 624, 627; K. C. Davis, Res Judicata in Administrative Law (1947), 25 Texas L. Rev. 199, 236. As this Court said in *Pacific Railroad Company v. Ketchum et al.* (1880), 101 U. S. 289, 296:

> "The remedy for the fraud or unauthorized conduct of a solicitor, or the officers of the corporation, in such a matter, is by an appropriate proceeding in the court where the consent was received and acted on, and in which proof may be taken and the facts ascertained."

Cf. *Universal Oil Products Company v. Root Refining Co.* (1946), 328 U. S. 575, 580; *Hazel-Atlas Glass Co. v. Hartford Empire Co.* (1944), 322 U. S. 238.

Besides this inherent power possessed by all tribunals, the Commission has *express* power under the Act to "investigate into facts, conditions, practices, or matters which it may find necessary or proper to determine whether any person has violated or is about to violate any provision of this chapter, or any rule, regulation or order thereunder, or to aid in the enforcement of the provisions of this

23 See footnote 19, supra, p. 33 of this brief.

chapter * * *" [Section 307 (a), 16 U. S. C. 825f (a)],[24] and it is also empowered "to perform any and all acts and to prescribe, issue, make, amend and rescind such orders, rules and regulations as it may find necessary or appropriate to carry out the provisions of this chapter" (Section 309, 16 U. S. C. 825h). If the Commission's orders were indeed induced by fraud and domination, a more obvious occasion for the exercise of these powers would be hard to imagine. The Court of Appeals properly held that "The Commission can, no doubt, correct its own mistakes" (R. VI, 1995).

Would it have been useful to petitioner to invoke these remedies, absent the power to award reparations? It not only would have been a useful step, it was an indispensable one under existing statutory procedures. As the discussion under Point II (B), supra, has shown, the orders of the Commission specifying effective dates for the contracts established the filed rates as the only legal rates, binding on everybody until disestablished by appropriate action of the companies or appropriate proceedings of the Commission. If petitioner was to have any right to question the reasonableness of the filed rates in any tribunal, judicial or administrative, state or federal, it first had to remove the conclusive barriers to such inquiry which had been created by the filing of the rates pursuant to the statute and the unchallenged orders of the Commission establishing the legal rates.[25]

---

[24] The full text of this Section is set out in the Appendix, p. 48.

[25] It is noteworthy that petitioner in the case at bar did file a complaint with the FPC alleging that existing rates were unjust and unreasonable and asking that the FPC establish different rates for the future (R. I, 149). Petitioner, however, did not ask that the Commission investigate the alleged fraud nor did it pray that the Commission set aside its orders approving the filing of the rates or the interlocking management.

For present purposes it is unnecessary to decide whether the Commission could and should have been requested, in addition to setting aside the filing orders, to make findings as to reasonable rates in lieu thereof. Concurring in *Federal Power Commission v. Interstate Natural Gas Co.* (1949), 336 U. S. 577, 589, Mr. Justice Frankfurter said: " * * * the Court of Appeals should ask the Federal Power Commission for an advisory report * * *. But a court of equity has inherent powers to invite such help from a great agency of the Government * * *."

Petitioner chose to ignore the FPC, which had voluminous files on the transactions in issue, as to the rates, the common directors and the transfer by Dakota to petitioner itself (cf. R. V, 1577-1583). It detoured to the District Court, and in doing so violated both the rules of primary jurisdiction and of exhaustion of administrative remedies. The Court of Appeals properly held that this could not be done under the law. As the Court pointed out in reference to the rule of exhaustion of administrative remedies, in *Meyers et al. v. Bethlehem Shipbuilding Corp., Ltd.* (1938), 303 U. S. 41, 51:

> "That rule has been repeatedly acted on in cases where, as here, the contention is made that the administrative body lacked power over the subject matter."

(D) Even assuming lack of all administrative remedies, the District Court nevertheless lacked jurisdiction to sustain petitioner's claims.

If we make the final assumption, contrary to what has been shown in Point III (A), (B) and (C) above, that neither petitioner nor its vendor, nor its predecessors, had administrative remedies, it still does not follow that there was a remedy under the Act by civil proceedings in a District Court.

Contentions analogous to those urged by petitioner here were advanced and rejected in *Backus-Brooks Co. v. Northern Pac. Ry. Co. et al.* (C. C. A. 8, 1927), 21 F. 2d 4, 11, cert. den. (1927), 275 U. S. 562, and in *Mississippi Power & Light Co. v. Memphis Natural Gas Co.* (C. C. A. 5, 1947), 162 F. 2d 388, cert. den. (1947), 332 U. S. 770. In the former case, alleged domination by defendant over the corporation, on whose behalf plaintiff was suing, was held to be of no avail to confer jurisdiction on the court to determine the just and reasonable division of joint rates under the Interstate Commerce Act, even though the

Interstate Commerce Commission had no power to award reparations in the circumstances. In the latter case the fact that no administrative remedies were available to Mississippi, a wholesale purchaser of natural gas from Memphis, and the fact that Mississippi "was requested by Memphis to defer action" (l. c. 390) until it was too late to get prospective relief before the FPC, were held not to sustain Mississippi's claim for relief. To grant that claim "would be tantamount to forcing new rates on Memphis" (l. c. 391). The Court of Appeals affirmed the decision of the court below that "until the Commission changed the rate, the contract rate between Memphis and Mississippi [filed with the Commission] was the lawfully promulgated rate" (l. c. 389-390).

As in those cases, so in this case: *"Ubi jus, ibi remedium" does not supply any answer, but poses a new question—what "right" does petitioner have under the Act?* It has been seen (pages 24-28) that Congress quite deliberately omitted a reparations provision from this statute for the reason that such a provision would not benefit ultimate consumers in accordance with the purpose of the Act but might only produce windfalls for wholesale purchasers. For this reason, wholesale purchasers were given the right to invoke the jurisdiction of the Commission to regulate rates prospectively under the procedures provided in Sections 205 and 206, but they were not given any "right" to a windfall through either Commission or court proceedings for reparations.

What petitioner asserts here is essentially a "right" to a windfall which Congress intentionally withheld. If it were true, as contended by petitioner, that over the ten year period the price received by respondent for energy sold to petitioner's predecessors was too high and the price paid by respondent for energy purchased from petitioner's predecessors was too low, it would have to be presumed that over this period the difference has gone

into the retail rates of the three public utilities involved. That is to say, the undue benefits which respondent is alleged to have obtained would have gone out to its ultimate consumers through the rates paid by them, and the undue burdens which plaintiff's predecessors are alleged to have borne would have been passed on to its ultimate consumers through the resale rates paid by them. There is no suggestion in the record that respondent earned more than a fair return or that petitioner's predecessors earned less than a fair return at any time. In these circumstances the determination by the District Court of different rates from those on file during the ten year period ending in 1945 could accomplish none of the purposes of the Act, but could only confer a windfall contrary to the purposes of the Act; a gift from respondent, of moneys it no longer has, to the petitioner—of moneys already returned to petitioner's predecessors by their customers.[26] Violation of the Federal Power Act thus cannot be the true ground for this action.

In *General Committee etc. v. Missouri-Kansas-Texas R. Co. et al.* (1943), 320 U. S. 323, 337, this Court said, immediately after the passage from the opinion quoted on page 18, supra, that unless the statutory purpose to afford a judicial remedy is plain "* * * the assumption must be that Congress fashioned a remedy available only in other tribunals. There may be as a result, many areas in this field where neither the administrative nor the judicial function can be utilized. * * * Courts should not rush in where Congress has not chosen to tread."

In the final analysis, there being no right to sue for damages under the Act because of alleged unreasonable rates

---

26 The windfall aspect of this case is particularly striking since all of the matters complained of by petitioner occurred prior to October 19, 1945, and until that day petitioner owned no stock of, nor had any direct or indirect interest in, any of the UPU subsidiaries. When petitioner bought the Dakota stock from UPU, the transaction was authorized by the FPC and the SEC, and petitioner did not and does not claim that it paid more than a fair price for the utility assets and earning power it was acquiring.

(Point II, supra), petitioner's claim rests on the allegation in its complaint of fraud through common directors and officers. Whether petitioner emphasizes the origin of the contracts or the alleged inability to resort to the Commission, in either case the gravamen of petitioner's claim is alleged fraud and domination stemming from common directors and officers—a common-law action not involving a federal question. Since petitioner and respondent are both Delaware corporations (R. I, 2), the District Court lacked jurisdiction apart from the Federal Power Act as well as under the Act.

In the case at bar, the District Court has rushed in where Congress has most definitely chosen not to tread.

CONCLUSION.

For the foregoing reasons, the judgment of the Court of Appeals should be affirmed.

Respectfully submitted,

APPENDIX.

STATUTES INVOLVED.

(Pertinent Sections of the Federal Power Act, Parts II and III, 16 U. S. C. 824d et seq.)

§ 824d (§ 206). Rates and Charges; Schedules; Suspension of New Rates.

(a) All rates and charges made, demanded, or received by any public utility for or in connection with the transmission or sale of electric energy subject to the jurisdiction of the Commission, and all rules and regulations affecting or pertaining to such rates or charges shall be just and reasonable, and any such rate or charge that is not just and reasonable is hereby declared to be unlawful.

(b) No public utility shall, with respect to any transmission or sale subject to the jurisdiction of the Commission, (1) make or grant any undue preference or advantage to any person or subject any person to any undue prejudice or disadvantage, or (2) maintain any unreasonable difference in rates, charges, service, facilities, or in any other respect, either as between localities or as between classes of service.

(c) Under such rules and regulations as the Commission may prescribe, every public utility shall file with the Commission, within such time and in such form as the Commission may designate, and shall keep open in convenient form and place for public inspection schedules showing all rates and charges for any transmission or sale subject to the jurisdiction of the Commission, and the classifications, practices, and regulations affecting such rates and charges, together with all contracts which in any manner affect or relate to such rates, charges, classifications, and services.

(d) Unless the Commission otherwise orders, no change shall be made by any public utility in any such rate, charge, classification, or service, or in any rule, regulation, or contract, relating thereto, except after thirty days' notice to the Commission and to the public. Such notice shall be given by filing with the Commission and keeping open for public inspection new schedules stating plainly the change or changes to be made in the schedule or schedules then in force and the time when the change or changes will go into effect. The Commission, for good cause shown, may allow changes to take effect without requiring the thirty days' notice herein provided for by an order specifying the changes so to be made and the time when they shall take effect and the manner in which they shall be filed and published.

(e) Whenever any such new schedule is filed the Commission shall have authority, either upon complaint or upon its own initiative without complaint, at once, and, if it so orders, without answer or formal pleading by the public utility, but upon reasonable notice, to enter upon a hearing concerning the lawfulness of such rate, charge, classification, or service; and, pending such hearing and the decision thereon, the Commission, upon filing with such schedules and delivering to the public utility affected thereby a statement in writing of its reasons for such suspension, may suspend the operation of such schedule and defer the use of such rate, charge, classification, or service, but not for a longer period than five months beyond the time when it would otherwise go into effect; and after full hearings, either completed before or after the rate, charge, classification, or service goes into effect, the Commission may make such orders with reference thereto as would be proper in a proceeding initiated after it had become effective. If the proceeding has not been concluded and an order made at the expiration of such five months, the proposed change of rate, charge, classifica-

tion, or service shall go into effect at the end of such period, but in case of a proposed increased rate or charge, the Commission may by order require the interested public utility or public utilities to keep accurate account in detail of all amounts received by reason of such increase, specifying by whom and in whose behalf such amounts are paid, and upon completion of the hearing and decision may by further order require such public utility or public utilites to refund, with interest, to the persons in whose behalf such amounts were paid, such portion of such increased rates or charges as by its decision shall be found not justified. At any hearing involving a rate or charge sought to be increased, the burden of proof to show that the increased rate or charge is just and reasonable shall be upon the public utility, and the Commission shall give to the hearing and decision of such questions preference over other questions pending before it and decide the same as speedily as possible.

§ 824e (§ 206). Power of Commission to Fix Rates and Charges; Determination of Cost of Production or Transmission.

(a) Whenever the Commission, after a hearing had upon its own motion or upon complaint, shall find that any rate, charge, or classification, demanded, observed, charged, or collected by any public utility for any transmission or sale subject to the jurisdiction of the Commission, or that any rule, regulation, practice, or contract affecting such rate, charge, or classification is unjust, unreasonable, unduly discriminatory or preferential, the Commission shall determine the just and reasonable rate, charge, classification, rule, regulation, practice, or contract to be thereafter observed and in force, and shall fix the same by order.

* * * * * * *

§ 825d (§ 305). Officials Dealing in Securities; Declaring Dividends Out of Capital Account; Interlocking Directorates.

* * * * * * *

(b) After six months from August 26, 1935, it shall be unlawful for any person to hold the position of officer or director of more than one public utility or to hold the position of officer or director of a public utility * * * and the position of officer or director of any bank, trust company, banking association, or firm that is authorized by law to underwrite or participate in the marketing of securities of a public utility, or officer or director of any company supplying electrical equipment to such public utility, unless the holding of such positions shall have been authorized by order of the Commission, upon due showing in form and manner prescribed by the Commission, that neither public nor private interests will be adversely affected thereby. The Commission shall not grant any such authorization in respect of such positions held on August 26, 1935, unless application for such authorization is filed with the Commission within sixty days after that date.

§ 825f (§ 307). Investigations by Commission; Attendance of Witnesses; Depositions; Immunity of Witnesses.

(a) The Commission may investigate any facts, conditions, practices, or matters which it may find necessary or proper in order to determine whether any person has violated or is about to violate any provision of this chapter or any rule, regulation, or order thereunder, or to aid in the enforcement of the provisions of this chapter or in prescribing rules or regulations thereunder, or in obtaining information to serve as a basis for recommending further legislation concerning the matters to which this chapter relates. The Commission may permit any person to file with it a statement in writing under oath or other-

wise, as it shall determine, as to any or all facts and circumstances concerning a matter which may be the subject of investigation. The Commission, in its discretion, may publish or make available to State commissions information concerning any such subject.

* * * * * * *

§ 825h (§ 309). Administrative Powers of Commission; Rules, Regulations, and Orders.

The Commission shall have power to perform any and all acts, and to prescribe, issue, make, amend, and rescind such orders, rules, and regulations as it may find necessary or appropriate to carry out the provisions of this chapter. Among other things, such rules and regulations may define accounting, technical, and trade terms used in this chapter; and may prescribe the form or forms of all statements, declarations, applications, and reports to be filed with the Commission, the information which they shall contain, and the time within which they shall be filed. Unless a different date is specified therein, rules and regulations of the Commission shall be effective thirty days after publication in the manner which the Commission shall prescribe. Orders of the Commission shall be effective on the date and in the manner which the Commission shall prescribe. For the purposes of its rules and regulations, the Commission may classify persons and matters within its jurisdiction and prescribe different requirements for different classes of persons or matters. All rules and regulations of the Commission shall be filed with its secretary and shall be kept open in convenient form for public inspection and examination during reasonable business hours.

§ 825p (§ 317). Jurisdiction of Offenses; Enforcement of Liabilities and Duties.

The District Courts of the United States, the District Court of the United States for the District of Columbia, and the United States courts of any Territory or other place subject to the jurisdiction of the United States shall have exclusive jurisdiction of violations of this chapter or the rules, regulations, and orders thereunder, and of all suits in equity and actions at law brought to enforce any liability or duty created by, or to enjoin any violation of, this chapter or any rule, regulation, or order thereunder. Any criminal proceeding shall be brought in the district wherein any act or transaction constituting the violation occurred. Any suit or action to enforce any liability or duty created by, or to enjoin any violation of, this chapter or any rule, regulation, or order thereunder may be brought in any such district or in the district wherein the defendant is an inhabitant, and process in such cases may be served wherever the defendant may be found. Judgments and decrees so rendered shall be subject to review as provided in sections 225 and 347 of Title 28. No costs shall be assessed against the Commission in any judicial proceeding by or against the Commission under this chapter.

Statement	2
Summary of argument	4
Argument	6
Introductory analysis	6
I. The Federal Power Act does not provide for or contemplate the recovery of reparations	9
A. A provision for reparations was deliberately eliminated from the Federal Power Act	9
B. Reparations would not be passed on to the ultimate consumer who has already reimbursed the distributing utility for the excessive cost of the power	13
C. To permit the recovery of reparations would be inconsistent with the purpose of the statutory scheme and might impair its effectiveness	18
1. To allow reparations would tend to defeat the purpose of the Power Act	18
2. To allow reparations would be inconsistent with the statutory scheme	19
D. The absence of a procedure for obtaining reparations from the Commission does not mean that such a remedy was to be available in the courts, but that reparations were not to be recoverable at all	22
II. The Commission has authority to determine whether a fraud had been perpetrated upon it in the filing of rate schedules	24
III. The District Court should stay its hand until the Commission determines the questions over which it has primary jurisdiction	32
Conclusion	35

OCTOBER TERM, 1950

No. 77

MONTANA-DAKOTA UTILITIES CO., PETITIONER

v.

NORTHWESTERN PUBLIC SERVICE COMPANY

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF APPEALS FOR THE EIGHTH CIRCUIT

BRIEF FOR THE FEDERAL POWER COMMISSION AS AMICUS CURIAE

OPINIONS BELOW

The opinion of the Court of Appeals (VI R. 1987) is reported at 181 F. 2d 19. The oral opinion of the District Court (V R. 1883) is not reported.

JURISDICTION

The judgment of the Court of Appeals was entered April 4, 1950. The petition for a writ of certiorari was filed on May 17, 1950, and granted on October 9, 1950. The jurisdiction of this Court is invoked under 28 U.S.C. 1254.

QUESTIONS PRESENTED

1. Whether under the Federal Power Act reparations for past unreasonable rates are recoverable in the courts.

2. Whether the Federal Power Commission has primary jurisdiction to determine whether a fraud has been perpetrated upon it in the filing of rate schedules when an element of such an inquiry may be the reasonableness of past rates.

3. If so, whether the District Court should stay its hand when such questions are presented in a suit to collect damages for such a fraud until after the Commission has determined them.

STATUTES INVOLVED

The pertinent provisions of the Federal Power Act (Title II of the Public Utility Act of 1935, Ch. 687, 49 Stat. 803, 838, 16 U.S.C. 791a, *et seq.*) appear in the pamphlet copy of the Act submitted with this brief.

STATEMENT

The Federal Power Commission files this brief *amicus curiae* because the petition for certiorari raises questions important to the administration of the Federal Power Act, and by close analogy the Natural Gas Act.

This proceeding was initiated by Montana-Dakota Utilities Co. to recover a difference between alleged reasonable rates and the rates actually paid for electricity interchanged between its assignor (and predecessors of its assignor) on the

one hand, and Northwestern Public Service Company, on the other, over a ten-year period from 1935 to 1945. The rates paid were the rates prescribed in contracts and supplementary contracts which from time to time were filed as rate schedules with the Federal Power Commission, given effective dates by orders of the Commission, and deemed by the Commission to have been duly filed under Sections 205(c) and 205(d) of the Power Act.

The district court presumed from the fact of interlocking officers and directors that respondent dominated petitioner's assignor (and before it, its predecessors). It found the rates to be "unfair,"[1] and concluded that a presumption of fraud had not

---

[1] The nature of the "unfairness" found by the District Court is shown by its treatment of all components of the service rendered, in addition to the supply of energy upon which charges had been computed (i.e., interconnection facilities rental, capacity, a share of joint dispatching costs, etc.), as merely being devices for charging additionally for the energy component of the interchanged services. Thus, the District Court judgment for $779,958.30 (V. R. 1965) was for an aggregate of several amounts relating to payments made or received by Northwestern, to or from the predecessors of Montana-Dakota, plus interest thereon. The interconnection facility rental charges (V R. 1950, 1959, 1963; I R. 35, 61, 87, 103; V R. 1942-1947), interchange capacity charges (V R. 1959-1960, 1963), and dispatching costs (V R. 1960, 1963) were found by the District Court to be charges by Northwestern for energy delivered by it, and part of a scheme to offset the price paid by Northwestern for energy received by it (V R. 1959), i.e., further reductions in Northwestern's 5-mill payment already found to be less than "just and reasonable" (V R. 1941, 1944-1945, 1948, 1960). All four of the above amounts were held to have been underpaid to Montana-Dakota's predecessors, or charged and exacted from them (as the case may be), "unlawfully, wrongfully and fraudulently" (V R. 1963-1964).

been rebutted by respondent (V R. 1963). It accordingly entered judgment for petitioner for $779,958 (V R. 1965).

The Court of Appeals, without reviewing the merits of the case, held that the Federal Power Commission, not the courts, had primary jurisdiction both to determine the reasonableness of rates and charges and to inquire into whether a fraud had been perpetrated upon the Commission. The court accordingly ordered the district court to dismiss the complaint.

SUMMARY OF ARGUMENT

I

Although the Federal Power Act was modeled on the Interstate Commerce Act, reparation provisions were deleted from the bill as inappropriate for a statute regarding only wholesale transactions. For reparations for past overcharges to purchasing utilities would not be passed on to the ultimate consumers whom the statute was designed to protect, and who had already reimbursed the utility for the excessive costs. The result would not be merely to give the purchasing utility a windfall. More importantly, it would provide an incentive not to follow the statutory procedure for challenging rates in advance of the effective date, but to pay the excessive rate and seek subsequent reparations at a time when the excess would not have to be returned to the ultimate consumers. Moreover, to allow subsequent

reparations would be inconsistent with the statutory scheme, which contemplates that changes must be made in the filed rates at a time when they can be translated into benefit to the ultimate consumer. This result is not unfair to the purchasing utility, which can utilize the procedures of the Act to protect itself against excessive rates. All of these considerations demonstrate that Congress did not intend a remedy by way of reparations to be available either before the Commission or in the courts.

II

The Power Commission does possess the authority to determine whether a fraud has been perpetrated on it in the filing of rate schedules. The power to correct an error induced by fraud is inherent in any tribunal, and such authority is, in addition, clearly granted by provisions of the Federal Power Act authorizing the Commission to perform any act and to issue, amend or rescind any order it may find necessary or appropriate to carry out the provisions of the Act, and to determine whether the Act was being violated. Inasmuch as the Commission is required to approve interlocking directorates and to pass upon the effect of corporate affiliation and less-than-arm's-length dealing, as well as to determine the reasonableness of rates, the type of fraud found to exist in this case relates to subjects with which the Commission is peculiarly well-fitted to deal. The

fact that the inquiry into an alleged fraud may require a consideration of the reasonableness of past rates does not deprive the Commission of jurisdiction, even though it has no authority to *fix* past rates in a reparations proceeding. The Commission possesses the authority to investigate the lawfulness of past rates in an appropriate situation in the public interest, such as when necessary to aid a court or state administrative agency.

III

In such circumstances, when the jurisdiction of a court is invoked to collect damages for the alleged fraud, the court should stay its hand until the Commission has exercised its primary jurisdiction to determine whether a fraud has been committed and the ancillary question of the reasonableness of rates. There is ample analogy in the precedents, in very similar situations, for such a proceeding. *United States* v. *Morgan,* 307 U.S. 183; *Atlantic Coast Line Co.* v. *Florida,* 295 U.S. 301; *Thompson* v. *Texas Mexican R. Co.,* 328 U.S. 134; *General American Tank Car Corp.* v. *El Dorado Terminal Co.,* 308 U.S. 422.

ARGUMENT

Introductory Analysis

Under the Federal Power Act, all rates must be filed with the Commission (Section 205(c), 16 U.S.C., Sec. 824d(c)); all rates are required to be "just and reasonable", with other rates "declared to be unlawful" (Section 205(a), 16 U.S.C., Sec.

824d(a)); and the Commission has authority, on complaint or on its own motion, to suspend proposed changes in filed rates pending an inquiry into their lawfulness (Section 205(e), 16 U.S.C., Sec. 824d(e)).[2] On complaint, or its own motion, the Commission also has authority to investigate any filed rate and, after hearing, if found to be "unjust, unreasonable, unduly discriminatory or preferential," to fix the "just and reasonable" rate "to be thereafter observed" (Section 206(a), 16 U.S.C., Sec. 824e(a)). The Act contains no provision for either the administrative or the judicial determination of the lawfulness of past rates in a reparation proceeding—and this omission, as we shall show, was deliberate. Under the statutory scheme and in fact, purchasers of electric power at wholesale—and it is only wholesale rates which are subject to the Commission's jurisdiction under Part II of the Act here involved—protect themselves against excessive rates by filing complaints with the Commission before changes in filed rate schedules become effective or by filing complaints for relief from filed rates alleged to be unlawful.

In this case petitioner claims that by reason of prior affiliation of its predecessors (hereafter re-

---

[2] Section 205(e) empowers the Commission to suspend the new rates for a period of five months; if the administrative proceeding is not concluded by the expiration of that period, the proposed change of rate may go into effect, but the Commission may require the utility to "keep accurate account * * * of all amounts received by reason of" the change in rates, and may subsequently require a refund of any amounts paid in excess of the rate subsequently found to be justified.

ferred to as petitioner) with, and domination by, respondent, it was fraudulently deterred from objecting to the rates and charges either before or after they became effective, until after the affiliation between the two companies was dissolved in 1945. Its contentions are (1) that since the Commission lacks power to grant reparations for a departure in the past from the "just and reasonable" standard of Section 205(a), the statute should be construed to vest such power in the district courts; and (2) that, whether or not this is true generally, such a remedy must be available when resort to the remedy *in futuro* contained in the statute is prevented by the fraud of the other party.

It is the position of the Government (1) that Congress deliberately omitted provisions for reparations from the Federal Power Act both because they were unnecessary to protect the wholesale distributors with whom the Act deals, and because to permit such distributors to recover reparations after they had passed on the costs of the past rates to the ultimate consumers would be inconsistent with the statutory scheme and detrimental to the effectuation of the purposes of the Act; (2) that, in the exceptional situation where the statutory remedy *in futuro* is ineffective for some such reason as the fraud claimed here, the proper remedy is to apply to the Commission to vacate the schedules fraudulently filed; and (3) that if there is any implied right to recovery in the

courts, the courts must await the Commission's prior determination as to whether a fraud has been perpetrated upon it and as to matters relating to the reasonableness of rates.

I

The Federal Power Act Does Not Provide for or Contemplate the Recovery of Reparations

A. *A Provision for Reparations was Deliberately Eliminated from the Federal Power Act*

In enacting the Power Act, Congress for the first time applied to the regulation of wholesale rates,[3] rate regulatory procedures and principles which had theretofore developed exclusively in relation to retail rates, particularly as embodied in the Interstate Commerce Act.[4] To do so it adopted the Commerce Act procedural provisions with the construction placed upon them by the

---

[3] The wholesale rates involved were those beyond the powers of state regulation under the commerce clause. *Publ. Util. Comm.* v. *Attleboro Co.*, 273 U.S. 83; *Missouri* v. *Kansas Gas Co.*, 265 U.S. 298; *cf., Interstate Natural Gas Co.* v. *F. P. C.*, 331 U.S. 682, 687-688.

[4] A comparison of the rate regulatory provisions of the Power Act, Sections 205 and 206, with those of the Commerce Act (49 U.S.C. §§ 1(5), 6(1), 6(3), 6(5)-6(7), 6(9), 13, 14, 15(1), 15(3) and 15(7)) shows their similarity, a similarity admitted by petitioner in its brief in the Court of Appeals (Br. Appellee, p. 31). The legislative history of the Power Act shows that generally it was patterned on that Act, the Communications Act (47 U.S.C. §§ 151, *et seq.*; see particularly §§ 201-205) and in places on state regulatory statutes. *Hearings, House Committee on Interstate and Foreign Commerce, on H.R. 5423* (74th Cong., 1st Sess.), pp. 392, 393, 2170.

courts.[5] Under that construction the filed rate is the only legally enforceable rate and the courts will not undertake the direct enforcement of the "just and reasonable" standard of "lawful" rates. Otherwise, this Court has reasoned, the rates enforced would vary from case to case, defeating the purpose of Congress to secure uniform and nondiscriminatory rates,[6] and court-fixed rates would conflict with commission-fixed rates, rendering enforcement of the Act impossible (*Texas & Pac. Ry. Co.* v. *Abilene Cotton Oil Co.*, 204 U.S. 426, 439, 440-441). The policy of judicial restraint thus established "is one having regard for the expertise of special agencies charged with performing the rate-making function and for the inherent actual, as well as legal, disability of courts to execute that function" (*United States* v. *Jones*, 336 U.S. 641, 652-653, 670-671; *cf., United States*

---

[5] *Shapiro* v. *United States*, 335 U.S. 1, 16, and cases there cited.

[6] Petitioner attempts to distinguish the Power Act from the Commerce Act on the ground that the former is concerned with rates in sales to a limited number of, or frequently only one, customer and hence is not affected by the same Congressional purpose of uniformity and nondiscrimination as the Commerce Act. But this is answered by the explicit provisions of Section 205 (b) of the Power Act against discrimination and preferences. Congress intended that even where there is only one purchaser under a filed rate, that rate be posted and filed so as to be disclosed to state utility commissions and all other existing or potential wholesale customers, including any who might apply for compulsory service under Section 202(b) of the Federal Power Act. In this way the objective of Congress to promote greater integration and coordination of electric facilities is served. That objective is clearly shown in the legislative history of the Act. *Hearings, House Committee on Interstate and Foreign Commerce, on H.R. 5423*, pp. 2148-2169, 501, 517, 520, 531-535, 384-385, 392.

v. *I.C.C.*, 337 U.S. 426, 437, 463-465). Even the express preservation of common law remedies in the Commerce Act did not prevent the adoption of the rule. *Texas & Pac. Ry. Co.* v. *Abilene Cotton Oil Co.*, 204 U.S. 426, 446.

But the Power Act contains no provision for reparations such as is found in the Interstate Commerce Act. As originally introduced in the House and Senate, the bills subsequently enacted as the Public Utility Act of 1935 (Title II of which amended the Federal Water Power Act and gave it the new short title, Federal Power Act) expressly provided for Commission reparations awards enforceable in the courts. That provision read as follows in both bills:[7]

> Sec. 213. (a) When complaint has been made to the Commission concerning any rate or charge for any service performed by any public utility, and the Commission has found after investigation that the public utility has charged an unreasonable, excessive, or discriminatory amount for such service in violation of any provision of this title, the Commission may order that the public utility make due reparation to the complainant thereunder, with interest from the date of collection. No such order shall be issued unless the complaint is filed with the Commission within two years from the date of the payment.

---

[7] *Hearings, House Committee on Interstate and Foreign Commerce, on H.R. 5423*, 74th Cong., 1st Sess., p. 36; *Hearings, S. Committee on Interstate Commerce, on S. 1725*, 74th Cong., 1st Sess., p. 43.

(b) If the public utility does not comply with the order for the payment of reparation within the time specified within such order, action may be begun in any court of competent jurisdiction to recover the same within one year from the date of the order, and not thereafter.

In a sectional analysis of the bill submitted by Mr. Dozier A. DeVane, Solicitor of the Commission, who was one of the draftsmen of the bill,[8] that Section was referred to as containing, "the usual utility law provisions, permitting complaints to the Commission and orders for reparation in cases where unreasonable or discriminatory rates have been charged."[9]

That provision was, however, eliminated from the bill as reported out of the Senate Committee, with the succinct explanation (referring to it and another provision also eliminated, S. Rep. No. 621, 74th Cong., 1st Sess., p. 20):

> They are appropriate sections for a State utility law, but the committee does not consider them applicable to one governing merely wholesale transactions.

The deletion of this provision had been requested by the National Association of Railroad and Utilities Commissioners, whose general solicitor, Mr.

---

[8] Hearings, S. Committee, *ibid.*, p. 223.
[9] Hearings, S. Committee, *ibid.*, p. 247.

John E. Benton, made the following illuminating statement of reasons (H. Hearings, *ibid.*, p. 1685):

> That is an entirely proper provision in a railroad statute. When a man goes to the railroad station with a load of goods to ship somewhere he has to ship at the rate that is fixed in the tariff. He must make the shipment then; and he ought to be able to come thereafter to the Commission and show that he was required to pay an unreasonable rate, if it was unreasonable, and to ask for a determination of a reasonable rate and get reparation that is due him for any overpayment. That is perfectly proper. But this bill relates only to service *between the wholesale generating or producing company and the distributing utility.* We question whether the *public interest will be served by giving any company the right to go ahead receiving service at the established rate for 2 years, and then to bring a complaint before the Federal Commission that the rate has been unreasonable.* [Italics supplied.]

B. *Reparations Would Not Be Passed On To the Ultimate Consumer Who Has Already Reimbursed the Distributing Utility for the Excessive Cost of the Power.*

The reason why reparations for wholesale electric purchasers would be inappropriate and not in "the public interest" is because wholesale electric purchasers are themselves typically regulated utilities. As such, the filed rates they pay in obtain-

ing their supply of electricity are part of their costs of operation. Their ability to pass along to their customers any excess of the filed rate over a just and reasonable rate paid for their purchased electricity is normally assured either by their government-granted monopoly position or their legally protected right to rates covering operating expenses plus a fair return. It is not dependent upon whether economic conditions will permit them to include it in a price for a commodity or service sold and delivered in a competitive market, as is true, for example, in the case of a purchaser of freight transportation services. Cf. *Louisville & N. R. R.* v. *Sloss-Sheffield Co.*, 269 U.S. 217, 237-238. As this Court said in *F.P.C.* v. *Interstate Natural Gas Co.* (336 U. S. 577, 582): "* * * experience does not indicate that utilities are wont to charge themselves out of business."

For Congress to have provided a reparations award for such a purchaser would result in a lump sum recovery by the purchaser after the year had closed in which it had incurred the excessive expense for power purchased at the filed rate. Such a reparations award could not lower the purchaser's resale rates during the past period covered by the award. During that period those resale rates would have been determinable on a basis which would reimburse it for its expenditures for purchased power at the filed rate it was currently paying, without any deduction for the

contingency of a reparations award at a later date. Nor could it affect future rates, for such lump sum award, when realized, would be an unusual and nonrecurring income. *Knoxville* v. *Water Co.*, 212 U.S. 1, 14; *Galveston Elec. Co.* v. *Galveston*, 258 U.S. 388, 395; *Board of Comm'rs.* v. *N. Y. Tel. Co.*, 271 U.S. 23, 32; *Los Angeles Gas Co.* v. *R. R. Comm'n*, 289 U.S. 287, 313.

Not only would ultimate consumers therefore not benefit through reduced retail rates from reparations at the wholesale level but, speaking generally, ultimate consumers could not reach the proceeds of the award in the hands of the utility wholesale purchaser by way of their own reparation proceeding against it, either before the state regulatory agency or the courts. As to the state regulatory agencies, they are typically without any reparation power.[10] Even where they do have reparation power, they are frequently unable to award reparation where the rates attacked as unreasonable have been prescribed by them in the exercise of their quasi-legislative function.[11]

[10] See, *e.g.*, *T. R. Miller Mill Co.* v. *Louisville & Nashville R. Co.*, 207 Ala. 253, 92 So. 797; *City of Atlanta* v. *Atlanta Gas-Light Co.*, 149 Ga. 405, 100 S.E. 439; *Texas & Pac. Ry. Co.* v. *Railroad Commission*, 137 La. 1059, 69 So. 837; *State ex rel Railroad* v. *Public Service Commission*, 303 Mo. 212, 218, 259 S. W. 445; *Re Arkansas Power & Light Co.*, 46 P.U.R. (N.S.) 226 (Ark. Com.); cf. *Dunlap Lumber Co.* v. *Nashville, etc. R. Co.*, 129 Tenn. (2 Thomp.) 163, 165 S. W. 224.

[11] *State ex rel. Boynton* v. *Public Service Commission*, 135 Kan. 491, 11 P. 2d 999; *Northern Pac. Ry. Co.* v. *Dept. of Public Works*, 136 Wash. 389, 240 Pac. 362; cf. *Arizona Grocery Co.* v. *Atchison Ry.*, 284 U.S. 370, 389.

Moreover, in several states, the courts have held that the common law right to sue for reparation was abolished by the change to commission supervision.[12] And even where a common law reparation proceeding may be instituted in the courts, the courts are bound by an administratively prescribed rate and barred from investigating into its reasonableness.[13] In many states the bar to judicial inquiry into the reasonableness of the rate attacked is extended to the situation where the regulatory agency has not affirmatively prescribed the attacked rate but merely accepted it for filing, whereby, it is held, the rate becomes a "commission rate" in contradistinction to a "carrier rate."[14] The bar to judicial inquiry which is present in jurisdictions in which the regulatory

Co.*, 51 F. 2d 443, 446 (C.A. 5) (Hutcheson, J., concurring).

agency has no reparation power leaves ultimate consumers wholly without remedy.[15]

It is perfectly clear, therefore, that for Congress to have provided for recovery of reparations by the utility purchasers who pay the wholesale rates regulated in the Power Act would have been to provide a windfall to them, and would have been of no benefit to the ultimate consumers, whom the Act was designed to protect.[16] As the court said of the similar provisions of the Natural Gas Act in *Federal Power Commission* v. *Interstate Gas Co.*, 336 U. S. 577, 581:

> * * * The aim of the Act was to protect ultimate consumers of natural gas from excessive charges. * * * They were the intended beneficiaries of rate reductions ordered by the federal commission, though state machinery might have to be invoked to obtain lower rates at the consumer level. The rates charged a wholesaler are part of its costs, reflected in its rate base. Reduction of those costs normally will lead in due course to reduction in its resale rates, unless we are to assume that the passage of the Natural Gas Act was an exercise in futility. * * *

C. *To Permit the Recovery of Reparations Would Be Inconsistent With the Purpose of the Statutory Scheme and Might Impair Its Effectiveness.*

1. TO ALLOW REPARATIONS WOULD TEND TO DEFEAT THE PURPOSE OF THE POWER ACT.

The evil which Mr. Benton foresaw if the purchasing utility were permitted "to go ahead receiving service at the established rate for two years, and then to bring a complaint before the Federal Commission that the rate has been unreasonable" was not merely that one utility company would receive a windfall at the expense of another without passing the benefit on to the ultimate consumer who had already repaid the utility for the original excessive rates. If, instead of availing itself of the statutory procedure for challenging the reasonableness of rates as provided in Sections 205(e) and 206(a), a distributing utility had the option of recouping the excessive charges itself through a subsequent reparation proceeding, its pecuniary interest might cause it deliberately to adopt the latter course so that it would not have to pass on the reduction in rates to the consumers. For if the purchasing company proceeds to challenge rates as soon as they are filed and succeeds in having the rates reduced, it would be expected—and if necessary compelled by the appropriate state agency—to pass on the reduction to its customers. On the other hand, if it continued to

charge a rate which gave it a fair return based on the excessive cost of the power to it, and brought a reparation proceeding several years later, it could keep the difference between the filed rate and the rate found subsequently—whether by court or Commission—to be reasonable. This removal of the incentive to follow the procedures prescribed in Sections 205(e) and 206(a) could reasonably be expected to defeat the underlying purpose of the Act by opening up an avenue for wholesale rate reductions which would not have to be passed on, and would also circumvent the statutory scheme for exclusive judicial review by the Courts of Appeals (Section 313(b)).

2. TO ALLOW REPARATIONS WOULD BE INCONSISTENT WITH THE STATUTORY SCHEME.

The Power Act seeks to make ultimate consumers the beneficiaries of its wholesale rate regulation by preventing wholesale rate changes from being made without notice and opportunity for timely action at the retail level. Such action might consist of action by ultimate consumers, or state commissions acting in their behalf, to require concurrent reductions in retail rates to reflect changes in wholesale rates, either by the utility purchasing under a filed rate which has been lowered, or by other local distributing utilities who might be able to effectuate savings by buying from the same source at the new low rate. Or it might consist of efforts by such parties to require the utility pur-

chasing under a filed rate which has been raised to absorb the increase out of otherwise excessive earnings, or to limit its increase in retail rates to the amount necessary to absorb the wholesale rate increase, or to resort to some other, cheaper source of electricity.

Such action as may be appropriate can be taken only if the filed rate is the legal rate, *i.e.*, the rate which shall prevail, by compulsion of court processes if necessary. Otherwise, if the filed rate or commission-fixed rate prescribed in lieu thereof, were not always the legal rate and changes could be made ignoring it, consumers and state regulatory commissions would have no assurance of an opportunity for taking into account the changes in wholesale rates (and their effect on retail distributing companies) early enough to attend to the appropriate resulting adjustment of the retail rates. For this reason, it is important that the purchasing utility be required to make its challenge to the reasonableness of the rate before that rate becomes effective, and not subsequently in a reparations proceeding.

That it was the intention of Congress to rely on the Commission's administration of the filing provisions, and Commission action, prospective in nature, bringing filed rates into conformity with the standard of just and reasonable rates, is shown by the relative prominence in the Act of provisions conferring powers to ascertain the facts in advance and to accumulate the data necessary to enable

the Commission to act effectively and promptly when a change is filed.

Thus, without waiting for a rate case to arise, the Commission is authorized (Section 208) to investigate and determine the principal fixed facts necessary for a rate case, with respect to each company subject to its regulation. Aiding such a determination are the accounting powers of the Commission (Sections 301 and 302) under which virtually all such companies' accounts have already been restated on a sound basis.[17] Provisions for periodic and special reports (Section 304), filed statements (Section 307) and investigations (Section 311) have resulted in the accumulation of a body of detailed data about each company in the industry, from which statistical compilations and computations of unit costs [18] provide standards for comparison and appraisal of the capital and operating costs of individual companies rendering particular classes of service to particular classes of customers. Annually filed Financial and Statistical Reports (F.P.C. Forms Nos. 1, 1-A, 1-B, 1-C), and Power System Statements (F.P.C. Forms 12, 12A, 12D) enable quick checks to be

---

[17] F.P.C., *Report on the Reclassification and Original Cost of Electric Plant of Public Utilities and Licensees, 1950.*

made on general questions with respect to a company's operations, on a relatively current basis.

All of these data facilitate scrutiny of filings of proposed changes in rates within the 30-day notice period and assist in complying with the statutory mandate (Section 205(e)) that where rate changes are suspended, "the Commission shall give to the hearing and decision of such questions preference over other questions pending before it and decide the same as speedily as possible."

The statutory emphasis on these provisions, particularly as contrasted with the complete silence on court reparations, is sufficient in itself to indicate that Congress intended the "just and reasonable" standard to be effectuated upon the basis of the Commission's prospective determination of all questions relating to rate schedule filings and to whether filed rates satisfy the statutory standard, even if there may be, under the particular circumstances of some case, justification for retrospective consideration of any of those questions.

D. *The absence of a procedure for obtaining reparations from the Commission does not mean that such a remedy was to be available in the courts, but that reparations were not to be recoverable at all.*

The history and purpose of the Federal Power Act, together with the effect of a contrary construction, all lead to the conclusion that Congress

intended that there be no remedy by way of reparations for charging an unreasonable rate in the past. This result is not unfair to the purchasing utility in the normal case, since it can—and will, if a remedy by reparations is not open to it—protect itself against unreasonable rates by means of a complaint filed with the Commission before newly filed rates become effective or a complaint filed promptly with respect to existing rates. (As to the exceptional case of fraud, see Point II, *infra*, pp. 24-32.) Nor does this result mean that the "just and reasonable" standard of lawfulness serves no practical or useful function. For this standard is the statutory guide to the Commission in the exercise of the powers delegated to it under Sections 205(e) and 206(a). It was upon the exercise of those Commission powers that Congress relied exclusively in this new venture in wholesale rate regulation.

All of the considerations referred to herein, which demonstrate that Congress did not contemplate or intend that there be a remedy by way of a procedure for reparations, apply at least as forcefully to a suit in court as to an administrative proceeding. The fact that Congress deleted from an early draft of the bill the provision for a remedy before the Commission, enforceable in the courts, does not mean that it was relegating the parties to a suit at law. For under the well-known rule of the *Abilene* case, resort to the Com-

mission rather than to the courts was obviously thought to be necessary for a determination as to the reasonableness of rates, whether for reparations or any other purpose. Thus, elimination of the administrative reparations remedy was doubtless thought to cover the whole subject of reparations, and not as merely transferring the reparations proceeding from the Commission to the courts. That such was not the intent is indicated by the statements of explanation in the legislative history (see pp. 11-13, *supra*), as well as by the other reasons why a remedy for past overcharges was neither necessary nor desirable.

II

The Commission Has Authority to Determine Whether a Fraud Had Been Perpetrated Upon It in the Filing of Rate Schedules

In the instant case, the district court found that the "frauds practiced by defendant on the Federal Power Commission and on [petitioner's predecessors] also made the attempted filing of rates by the defendant void and ineffective for any purpose whatsoever" (V R. 1961). The Court of Appeals did not find it necessary to review the finding of fraud, and for present purposes we shall assume that respondent's conduct was fraudulent.

The Court of Appeals did not suggest that the victims of fraud are remediless, when the fraud itself prevents them from availing themselves of the statutory remedies. And we make no such

contention here. The Court of Appeals found, however, that the proper agency to correct a fraud perpetrated upon the Commission, through the filing of schedules fraudulently prepared, was the Commission itself.

Petitioner does not deny that there must be resort to the administrative remedy if one is available; its position, as we understand it, is that there is no such remedy. Thus, the point at issue is whether the charge of fraud raises a question which the Commission may resolve.

In order to recover on the basis of fraud, petitioner must establish both that the filed rates were not validly filed because of the fraud and that the rates were unreasonable.[19] Both of these questions are within the primary jurisdiction of the Commission.

---

[19] More particularly, recovery would depend on decision of the following questions, among others, within the primary jurisdiction of the Commission:

(1) Were the rate schedules originally filed, or any subsequent changes, accepted for filing by the Commission erroneously because the concurrences of petitioner's predecessors in such filings (V R. 1581; I R. 343-345, 297-298), which were required by the Commission's rules (18 CFR 35.3(a)), were obtained by fraud?

(2) Were the Commission orders giving effective dates to the originally filed rate schedules, or any of the changes therein, erroneous because fraud deterred petitioner's predecessors from objecting to the applications for such orders?

(3) Did the Commission erroneously leave the originally filed rates, or any changes therein, in effect, without finding them to be unjust and unreasonable, because petitioner's predecessors were deterred by fraud from complaining of the rates?

(4) Will corrective action with respect to any of the above errors be necessary or appropriate to carry out the provisions of the Power Act?

As Mr. Justice Roberts declared, when speaking as Umpire for the Mixed Claims Commission:[20]

> Every tribunal has inherent power to reopen and to revise a decision induced by fraud. If it may correct its own errors and mistakes, *a fortiori* it may, while it still has jurisdiction of a cause, correct errors into which it has been led by fraud and collusion.

Cf. Hazel-Atlas Glass Co. v. *Hartford-Empire Co.*, 322 U.S. 238; *Federal Communications Comm.* v. *WOKO*, 329 U.S. 223; *Schachter, et al.* v. *Singer*, 45 A. 2d 364 (M.C.A.D.C.); *Gould* v. *Delsnider*, 42 A. 2d 140 (M.C.A.D.C.), reversed on other grounds, 154 F. 2d 844 (C.A.D.C., 1946).[21]

The Commission's authority to vacate a filing induced by fraud does not rest merely on this general principle. As the Court of Appeals observed (R. 1995), Section 309 of the Power Act gives the Commission authority to "perform any and all acts, and to * * * issue, * * * amend, and rescind such orders * * * as it may find necessary or appropriate to carry out the provisions of this Act." And the Commission is also authorized by Section 307(a) to "determine whether any person has violated * * * this Act or any rule, regulation,

[20] Mixed Claims Commission, United States and Germany (Opinions and Decisions, January 1, 1933, to October 30, 1939, pp. 1127-1128).

[21] In the *Schachter* and *Gould* cases, the Municipal Court of Appeals for the District of Columbia held that the District Rent Administrator, rather than the courts, had authority in the first instance to vacate rent ceiling orders procured by misrepresentation.

or order thereunder," to take evidence and hold hearings (Section 307(b)), to have access to the companies' files (Section 301(b)), and to require reports (Section 304(a)). Even apart from the implied power to vacate an order procured by fraud, it would certainly be appropriate for the Commission to make use of these statutory powers for that purpose.

Petitioner's assertion that "the fraud question is not one with which a commission is especially equipped to deal" (Pet. 25), will not stand up under analysis. For the "fraud" here involved is that set forth in the District Court's conclusion of law (V R. 1963):

> 13. All of the contracts in question were presumptively fraudulent as to Plaintiff's [Petitioner's] assignor and its predecessors in view of the common directors and officers. Defendant [Respondent] has failed to rebut this presumption and sustain the fairness of the contracts.

Thus, the bases of the fraud are (1) the fact of interlocking directors and officers between the two companies, and (2) respondent's failure to convince the court of the "fairness" of the contracts, i.e., reasonableness of the rates.

Contrary to petitioner's contention, both of these matters are peculiarly appropriate for Commission appraisal. For under Section 305(b) of the Act, officers and directors of companies sub-

ject to the Act may hold interlocking positions only with the approval of the Commission; and indeed, such approval had been granted in this case (I R. 359-362; cf. V R. 1510, 1587-88). As a practical matter the investigation and appraisal of the effect of affiliation and less-than-arm's length-dealing between electric utility operating companies has frequently engaged the attention of the Commission, and is, in fact, a routine aspect of its work.[22] Improper or fraudulent conduct in such relationships is clearly a subject with which the Commission is especially equipped to deal. And the same is obviously true as to the reasonableness of rates.

This does not mean that the Commission has power to award reparations. That would be inconsistent with the legislative history and purposes of the Act, as we have shown (*supra*, pp. 9-22). But it does mean that whatever rights

petitioner may have in the courts are dependent upon the establishment of the answers to questions which the Commission has power to answer in ascertaining and correcting any errors in its action or inaction resulting from fraud. When it has done so the rights of interested parties can be determined and enforced by appropriate administrative or court proceedings as though the correcting Commission action had been effective as of the date of the original error.

Thus if the Commission should find that one or more of the earlier filed rate schedules was validly filed and not affected by fraud, but that some of the subsequent filings of changes in rates were invalid because of fraud, the Commission might vacate the invalid changes and vacate its orders giving them effective dates. The earlier filed rates would then be left standing unchanged by the purported filings of subsequent changes. For charging rates differing from the filed rates left standing such remedies would lie as in any other case in which rates other than filed rates have been charged.

Or the Commission might find that the filings were valid, but that, had it not been for the fraud, it would have suspended one or more of them and fixed and prescribed rates in lieu thereof. Or the Commission might determine that the filings were validly made, that the information submitted in response to the inquiries which were made (I R. 266-323) had furnished sufficient data

to enable a proper determination, and hence that the rates and changes were all validly filed, were properly not suspended, and that the payments made in accord therewith were in full compliance with the statute and the rules. In that case there would be no occasion for recourse to the courts.

The Commission is not precluded from inquiring into questions raised by this case by reason of its lack of power to grant reparations. We have already shown that the Commission has ample power to take corrective action with respect to rates procured by fraud. And, we submit, the Commission also possesses the power to investigate and determine the lawfulness of the past rates in an appropriate situation,[23] such as where a determination of the reasonableness of rates is an essential element in an inquiry into an alleged fraudulent filing, even though it may not have the power to fix such rates.

In addition to the general authority granted the Commission by Section 309 to "perform any and all acts * * * necessary or appropriate to carry out the provisions of this Act," Section 307(a) empowers the Commission to investigate any matter in order to determine whether any person has

---

[23] The Court of Appeals for the Fourth Circuit held to the contrary in *Hope Natural Gas Co.* v. *Federal Power Commission*, 134 F. 2d 287, reversed on other grounds, 320 U.S. 591. The Government argued in this Court that the Commission had such power (No. 34, 1943 Term, Brief for Pet., pp. 115-121), but this Court found it unnecessary to decide the question. *Federal Power Commission* v. *Hope Natural Gas Co.*, 320 U.S. 591, 618.

violated any provision of the Act, and Section 205(a) explicitly forbids and declares unlawful the charging of unjust and unreasonable rates. Since the charging of such rates is an unlawful act and in violation of Section 205(a), an investigation of the lawfulness of past rates is clearly within the ambit of the investigatory power granted the Commission by Section 307(a).[24] Moreover, the Commission may, upon its own motion or at the request of a state commission, investigate and determine the cost of production or transmission of electrical energy in cases where it may not establish rates (Section 206(b)),[25] and is required by Section 209(c) to make available to the several state commissions such information and reports as may be of assistance in state regulation of public utilities. The findings as to past rates, even apart from fraud, fall within the contemplation of these provisions, constituting not

---

[24] The Interstate Commerce Commission has made similar determinations under an analogous provision of the Motor Carrier Act of 1935 (Secs. 216, 217). See *W. A. Barrows Porcelain Enamel Co.* v. *Cushman Motor Delivery Co.*, 11 M.C.C. 365, 366; *Dixie Mercerizing Co.* v. *ET & WNC Motor Transportation Co.*, 21 M.C.C. 491, 492.

[25] Petitioner attempts (Pet. 27-28) to construe the power to determine cost of service granted by Section 206(b) as falling short of the power to determine just and reasonable rates. But the "cost" into which the Commission inquires under Section 206(b) includes a return on the amount invested, and therefore the Commission's determination of costs is in fact the equivalent of a determination of what would be a reasonable rate. Compare the retrospective determination of the cost of service in the *Hope* case (3 F.P.C. at 199-202) with the prospective determination of just and reasonable rates (3 F.P.C. at 202-205).

only determinations as to cost but also "information and reports" as to lawful and reasonable rates for the period in question, as an aid to state regulation. There is no reason why the authority granted by Sections 307(a), 205 and 206 may not be exercised to assist the district courts, where such a procedure is appropriate, as well as to assist state regulatory agencies.

But in any event, we think it clear that whether a fraud has been perpetrated on the Commission should first be determined by the Commission itself. Any order of the Commission vacating or refusing to vacate the filing claimed to be fraudulent would, as the court below declared, be reviewable like any other order of the Commission exclusively in the appropriate court of appeals under Section 313(b). Any civil damages attributable to the fraud, and which the Commission was not empowered to order paid, would then be recoverable, upon the basis of the Commission's findings, in a civil action at law. See Point III, *infra*.

III

The District Court Should Stay Its Hand Until the Commission Determines the Questions Over Which It Has Primary Jurisdiction

We have argued that the Commission has primary jurisdiction to determine whether a fraud has been perpetrated upon it, and in doing so to inquire into the reasonableness of past rates—even

though it may not issue reparations orders as to past rates. In very similar situations this Court has required the district courts to wait and follow an administrative determination as to the reasonableness of past rates when the administrative agency had no authority to grant reparations. Thus, the lack of power in the Interstate Commerce Commission to grant reparations for intrastate rates charged and collected which discriminated unduly against interstate commerce does not deprive it of power "to inquire whether injustice had been done and to make report accordingly" to the district court where a shipper's suit for restitution was pending. *Atlantic Coast Line Co.* v. *Florida,* 295 U.S. 301, at 312. And in *United States* v. *Morgan,* 307 U.S. 183, proceedings for the distribution of the fund collected under an invalid order of the Secretary of Agriculture were restrained pending a determination by the Secretary of the just and reasonable rates during the period covered by the fund. This Court pointed out that the lack of authority in the Secretary to award reparations in that proceeding did not affect his power to investigate and decide the reasonableness of past rates (p. 192).

In other cases, this Court has held that a district court having jurisdiction over a controversy should "stay its hand pending a decision by" the administrative agency as to a matter peculiarly within the agency's authority. *Smith* v. *Hoboken R. Co.,* 328 U.S. 123, 133; *Thompson* v. *Texas*

Mexican R. Co., 328 U.S. 134; *General American Tank Car Corp.* v. *El Dorado Terminal Co.*, 308 U.S. 422; *cf.*, *El Dorado Oil Works* v. *United States*, 328 U.S. 12. In the *Thompson* case, the question related to a claim for trackage rentals which the Interstate Commerce Commission could fix "only for the future," but not retroactively. 328 U.S., at 148. The Court held that the Commission's power over trackage rights nevertheless made primary resort to the Commission necessary, stating (pp. 148-149):

> * * * Once the Commission has acted, the court may then proceed to enter judgment in conformity with the terms and conditions specified by the Commission. See *El Dorado Oil Works* v. *United States*, 328 U.S. 12.

The Court concluded, in terms we believe to be applicable here (328 U.S. at p. 151):

> * * * the court below should have stayed its hand and remitted the parties to the Commission for a determination of the administrative phases of the questions involved. Until that determination is had, it cannot be known with certainty what issues for judicial decision will emerge. Until that time, judicial action is premature. * * *

As this Court said in the *Morgan* case, which, as has been seen, involved a situation very similar to that at bar (307 U.S. at 191):

> * * * [I]n construing a statute setting up an administrative agency and providing for

judicial review of its action, court and agency are not to be regarded as wholly independent and unrelated instrumentalities of justice, each acting in the performance of its prescribed statutory duty without regard to the appropriate function of the other in securing the plainly indicated objects of the statute. Court and agency are the means adopted to attain the prescribed end, and so far as their duties are defined by the words of the statute, those words should be construed so as to attain that end through coordinated action. Neither body should repeat in this day the mistake made by the courts of law when equity was struggling for recognition as an ameliorating system of justice; neither can rightly be regarded by the other as an alien intruder, to be tolerated if must be, but never to be encouraged or aided by the other in the attainment of the common aim. * * *

CONCLUSION

These decisions and principles point the way to the proper disposition of the present problem. Although the Commission may not grant reparations, or award damages for fraud, it may—at least where fraud is alleged—investigate both the question of fraud and the related issue as to the lawfulness of past rates, vacate any filing found to be fraudulent, and ascertain what reasonable rate should have been accepted as the filed rate apart from the fraud. Where the District Court may award damages resulting from fraud,—even if it may not

grant reparations,—it should hold the case pending a determination of the administrative questions by the Federal Power Commission and thereafter enter an appropriate judgment predicated on the administrative finding.[26]

Attorneys,
Federal Power Commission.

NOVEMBER 1950.

---

[26] If this Court should conclude, contrary to the argument presented in Point I of this brief, that the district court may award reparations, the same procedure should be followed in a suit for reparations in which fraud is not alleged.

☆ U. S. GOVERNMENT PRINTING OFFICE 1950 51881 O 314
